RE: **Waterfront Seattle LID Special Benefits Report – File Ref: 19-0101 – November 18, 2019**
Authored by Valbridge.

Dear Ms. Terwilliger:

At your request, I have conducted this high-level review of the Valbridge mass appraisal study prepared for the purposes of documenting Special Benefit resulting from the city Waterfront Seattle project. The letter is intended as a consultation, and not as an appraisal review. At some point it may be appropriate to address individual valuations on a parcel by parcel basis, but that is not the concern of this letter. This consultation looks at the methodology employed and the general conclusions made in the presentation of the study. Please note, as a disclosure, I am part owner of a condominium located within the boundaries of the LID. I do not consider this to be a conflict in providing an objective review of the study methodology.

Valbridge Appraisal

Valbridge presents several conclusions, which briefly may be re-stated as:

1. LID Boundaries. Valbridge identifies a total of 6,238 properties with potential special benefits within an LID boundary that generally comprises the entire downtown area lying between Puget Sound, I-5, Denny Way, and S. Massachusetts Street.
2. Property Valuation. The value of property within this area is concluded to be approximately $56.3-billion.
3. Special Benefit Lift. The appraisal concludes with incremental increases in individual property values (which are presented numerically in the report) summarized as follows:[1]

Estimated Special Benefit Ranges By Property Class		
Property Class	Percentage of Property Value Increase	
	High	Low
Land value	<4.00%	<0.50%
Office/Retail	<3.50%	<0.50%
Hotel	<3.50%	<1.00%
Apartment/Subsidized housing	3.00%	0.00%
Residential condominium	3.00%	<0.50%
Waterfront	<4.00%	<0.50%
Special purpose	0.10%	1.00%

[1] This exhibit is lifted from the appraisal. Note that the "Special Purpose" category has the high and low figures reversed.

4. Special Benefit Amount v. Cost. The total of the individual assignments approximates a $448-million special benefit over these properties. This is compared and contrasted to the LID cost of $346-million. Legally the cost of the LID cannot exceed the benefit provided. In addition, the city has limited the assessment to $175,500,000.
5. After Valuation. The incremental increases in value calculated are added to the Before value to create an After value, which in aggregate comes to $56.8-billion.

Conceptual and Methodological Issues

1. The basic construct of the LID and its application to Waterfront Seattle

LIDs are typically reserved for the funding of utility improvements and infrastructure within a specific neighborhood or market, and represent a means by which a group of property owners can receive and pay for improvements that might otherwise be avoided by a municipality; perhaps the project in question is/has been deemed too specific, or not a priority, to cover with general funding. The mechanism essentially allows property owners to pay for the LID with the obvious value lift associated with, say, the provision of sewer or a road. Under RCW 34.44.010, "*The cost and expense* [of improvements made through an LID] *shall be assessed upon all the property* [within the boundaries of the LID] *in accordance with the special benefits conferred thereon.*" (bracketed language added). The value lift associated with provision of the infrastructure (say water, power or sewer) is typically easily measured, and *special benefits*[2] are not hard to prove and calculate.

The current proposal, to fund a regional park through this mechanism, represents a special challenge for an appraiser, as the special benefit associated with an amenity such as a publicly-owned park is not obviously beneficial in the same fashion as a utility extension, representing more of an aesthetic, and widely dependent upon factors unrelated to the mere presence of the project (such as operations, public use, etc.). The project becomes even more challenging, when the park is to be located in a regional economic center, and funding requirements require benefit assessment across several downtown blocks that lie uphill from the amenity.

2. Special Benefit

Background

A successful LID is based on the correct identification of the *Special Benefit* created. The term Special Benefit is both a legal term and a term of art in the appraisal industry. The most succinct definition of Special Benefit is provided as a WPI instruction:

> "*Special benefits are those that add value to the remaining property as distinguished from those arising incidentally and enjoyed by the public generally.* WPI 150.07.01

The distinction between Special and General benefits is then a key consideration for an appraiser in the application of benefit deemed special. Eaton stresses the importance of the proper identification of special benefit, and the necessity for also identifying general benefit for the simple purposes of appropriate benefit allocation; if a project creates both special and general benefits, only the special increment that accrues to certain properties can be part of the assessment:

> *It should be noted that project enhancement... may be composed of general benefits, special benefits, or a combination of the two. Thus it may be necessary... to allocate the beneficial effects*

[2] See subsequent discussion on the definition of a special as opposed to general benefit.

> *of project enhancement between special and general benefits and to consider only the special benefits in estimating the value of the property in the after situation."*
>
> Real Estate Valuation in Litigation, Page 326, by Jim Eaton MAI.

The standard dictionary definition of special, an adjective, is *better, greater, or otherwise different from what is usual*. Synonyms include *exceptional, unusual, singular, uncommon, notable, noteworthy, remarkable, outstanding, unique, more*. In practical application though, the precise meaning of Special Benefit has been debated in the courts, particularly in eminent domain cases, with the same principles applying to LIDs. One of the clearest and oft-cited distinctions of special and general benefit is found in the following court decision:

> *"The most satisfactory distinction between general and special benefit is that general benefits are those which arise from the fulfillment of the public object..., and special benefits are those which arise from the peculiar relation of the land in question to the public improvement"*
>
> United States v. 2,477.79 Acres of Land, as quoted in Nicols

There are various common sense applications of special benefits. They cannot be "*remote, speculative or imaginary*" (WPI). In addition the appraiser should consider when the benefits will actually be received.

> *The fair market value of the remainder, as of the date of valuation, shall reflect the time when the damage or benefit caused by the proposed improvement or project will be actually realized.* Uniform Eminent Domain Code 1974, §1006, p.10.11. as quoted in Real Estate Valuation in Litigation by Jim Eaton, MAI

3. The Valbridge Study

The Valbridge study presented on behalf the city fails to meet key tests of credibility in the application of Special Benefit. At issue are the following general categories of analysis:

a. Special Benefit Definition and Distinction from General Benefits

The appraisal:

- Makes no attempt to assess General Benefit, and does not offset the apparent measure of special benefits with general benefits. The appraisal ignores the basic equation:
  - Total Benefit minus General Benefit = Special Benefit.

  If the evidence of benefit presented by the appraiser is to be believed, it is apparent that General Benefits have been included in the Special Benefit Study.

Beyond the lack of recognition of General Benefits, it is noted that the very nature of the public improvement – a regional park - and the wide LID boundaries described in the report, suggests that entire project could be described as offering almost entirely general benefit. Almost by definition, if $48.1B of real estate is impacted by the project, the benefits provided would seem very general and widespread in nature. The appraisal even uses the term "generally" to discuss assigned Benefits in many areas of the Special Benefit Study[3].

b. Method of Assessment

The method of assessment used – an application of a percentage to a concluded before value – does not represent a true measure of benefit. This is considered a short-cut, akin to a "strip-take" analysis, typically

---

[3] Example, page 81, second to third line, third paragraph: "*Market value estimates generally are 2% to slightly above 3% higher than estimated value without the project.*" Another example, related to a comparison project, page 51, third paragraph, line 8: "*Properties closer to the park also generally command a higher sale price*
."

reserved for projects with minor damages - small easements or takes of strips of land. Its application to a special benefit study represents an improper method of analysis as the value lift should be calculated, not applied. The appraiser should evaluate the value of the properties without the project, and then with it, and measure the difference. Here the appraiser has not met the burden of proof of a value lift, as the latter is concluded and added, not measured as a difference.

c. Before & After Descriptions

There is very little clarity in the appraisal as to the precise value difference arising as a consequence of a comparison of the Before and After. The appraisal acknowledges that the viaduct is down in the before, but it is not clear how the value lift associated with the viaduct removal is built into the Before value estimates. Further it is also not clear how the level of improvement that would be undertaken by the city, but for the LID, is considered. Current values do not represent this condition, and presumably the appraiser is of the opinion that completed streets, street trees and landscaping, sidewalks and parking (many features of which are present in the After Condition) would have no impact on current values. It is unclear how the perceived additional aesthetic actually associated with the "After Improvements" is then translated into a 0.5 or 4% value increment, particularly when compared to the completion of the Before Condition with zero impact.

Three specific "before and after" issues are worthy of additional discussion.

i. Parking

With the addition of park improvements, there will be a loss in parking. This is not documented in detail in the report, and city-sources provide little clarification with regard to this valuable resource. In the August 9, 2017 Feasibility Study, the analysis of parking losses is limited to this statement, with a promise of follow up in the final study:

> *"Additionally, some parking loss will occur as a result of the project. This loss will be documented as part of the more detailed special benefit proportionate assessment study."* P. 3, 8/9/17 Feasibility study

The follow-up and documentation would be important, as clearly a loss of parking would be regarded as detrimental to many businesses, particularly retailers. However there is no follow-up in the final report, and the treatment of parking remains glossed over and not documented, contrasting with the purported precision of measurement of value for a landscaping aesthetic, an attribute of far-less deterministic value. A report detailing apparently minute impacts for more plants and park improvements, should also consider, in the same incremental manner, those associated with lost parking. The report, however, falls well short of this mark, merely paying lip-service to the issue, without incrementally measuring the impact. The only valuation commentary on parking presented in the study, none of which comes with any precise value-measurement, analysis or location specific value offset, is limited to the following two statements:

- Page 7: *"..some parking losses along Alaskan Way in the waterfront area will occur due to the project and this is considered in the analysis."*
- Page 83/4: *In this analysis, the maximum change in value for the waterfront economic entities is 3%. These conclusions recognize that, while the properties benefit from enhanced relative location arising from the project, there is also a reduced amount of available parking in the vicinity, an important factor considered in the analysis."*

Other sources offer some clues as to how much parking may be eliminated, and if correct, it is substantial. The 2016 FEIS notes that:

> *"The Preferred Alternative would permanently remove approximately 57 on-street parking spaces along Alaskan Way, 377 parking spaces that existed in the Alaskan Way Viaduct footprint, 15 on-street spaces on Bell Street, 3 spaces on Union Street, and 1 space on S. Main Street. This loss of 453 on-street parking spaces represents approximately 25 percent of the on-street parking supply in the study area".* Page 44 (pdf) Executive Summary 10/16 Final EIS Waterfront Seattle.

In order to properly measure the full impact of the Waterfront project, parking losses need to be analyzed and the loss in value measured on a location by location basis.

ii. Cost

The issue also extends to cost. The LID is noted as a $346,000,000 project. Yet the increment associated with the LID cost verses the investment that would occur anyway is not presented. Moreover this is no spatial presentation concerning where dollars are invested, as clearly they are not equal to all areas of the "park". It stands to reason that if the improvements add value, more improvements in localized situations should add more value, and less in other cases. This in particular would underscore the issue of "Special", as property in areas with no direct investment in the surrounding blocks challenge the notion of a received Special as opposed to General Benefit.

i. Timing

There is also no value discussion pertaining to timing; do assessments consider when the actual park will be complete, and therefore when the benefits, if present, will accrue? The interim condition and associated construction are likely to be disruptive: some properties will be "specially" as opposed to "generally" impacted by construction activity in terms of noise, dust, etc. Proximity, which is stressed as a special benefit, would represent a special negative as concerns related and proximate construction activity.

d. Assessments are not supported by empirical data

The evidence presented for special benefit is almost entirely anecdotal. The appraisal does not provide discrete and empirical before and after analyses of purportedly similar public projects across a wide-range of property takes. Anecdotal opinions of before and after, without apparent adjustment for general benefits, correction of blight issues and the passage of time, do not provide a convincing case for the assignment of a 0.5 to 4% value increase to a full spectrum of property types across a wide downtown area, many blocks away from the improvement.

Moreover, the level of assignment applied is largely immeasurable from an appraisal perspective. Application of a 0.5-4% value change on a general mass appraisal basis falls well below the standard of error already present in such an analysis – in effect the analysis reveals the benefit is immeasurable at this level. Even if individual "MAI appraisals" were completed on each property, it would be difficult if not impossible to measure the benefit of a park improvement a few blocks away to (for example) a downtown office tower.

Take for example the 1201 Third Avenue office tower, valued at $732,527,000 - it would be hard to rationalize discrete adjustments of the magnitude presented here amid the myriad impacts on value such as market conditions, tenant sizes and rollovers, and different views and floor levels. The majority of the tower has no special view of the park and no special access to it; a lease decision here would not logically include serious "special" consideration of a park three blocks away, and at a different elevation. Suggesting the property increased to $737,043,000 (a $4,516,000 benefit or 0.62% difference) on account of park proximity would seem to define a *"remote, speculative or imaginary"* adjustment. If these values were rounded to the nearest $5M, not an unreasonable level of rounding for a property worth over $700M, both Before and After estimates would round to the same number, essentially eliminating the "measurement".

e. Assessments include percentage assignments to improvement value

The assessments are based on a percentage assignment to total property value, in place in 2020. However, the project presented relates, purportedly, to a proximity benefit. This is a location factor, which is a land characteristic. Benefits from proximity do not normally accrue to improvement value, as the "bricks and mortar" are unchanged. This creates an inequity in the side-by-side comparison of improved and vacant land parcels, and one that is particular well illustrated in case of development properties that will imminently be developed, with a completed project in place by the time the park is complete in 2024. This methodological error is essentially a function of relying upon an across-the-board percentage adjustment, as compared to truly measuring before and after differences.

An example is provided in a comparison of the preliminary and final LID studies as pertain to one building that was under construction during the interval between receipt of the reports. In the Preliminary version, when the 2 + U tower was under construction, the main site for this building[4], at 1201 Second Avenue, # 197470-0175 was assessed as vacant. As of the date of the Final Study, the building had been largely constructed, although it remains unoccupied. Now with the value of the improvements added, the assessment increased 561% between the Preliminary and Final. See below.

LID Study Issue: Comparison of Preliminary and Special Benefit					
Property	Land Size*	Future sf	Assessment	$/sf land	$/sf building
Preliminary Study		*Low, as site treated vacant*			
2 + U Site*	25,760sf	701,000sf	$622,000	$24/sf	$0.89/sf
Final Study		*Now, with building nearly complete*			
2 + U Site*	25,760sf	701,000sf	$4,113,000	$160/sf	$5.87/sf

* LID study has an error; there is an additional half block still treated as vacant.

Had the construction been delayed a year, the property would have escaped this increase. And other vacant property, particularly parcels intended for imminent development, and there are many of them, will still be able to take advantage of this methodological error. An example of this is provided by the following comparison:

Example: Cyrene Apartments at Alaskan and University v. Woldson parking lot at 1100 Alaskan (with proposed development).

Property	Land Size	Units	Assessment	$/sf land	$/unit
50 University	15,413sf	169-units	$3,033,000	$197/sf	$17,947/unit
1100 Alaskan	28,306sf	257-units*	$1,312,000	$46/sf	$5,105/unit

* proposed; will probably be complete by 2024

Both properties have the same orientation to the park and lie at the same elevation. The higher assessment to the Cyrene Apartments at 50 University is thus inequitable as compared to 1100 Alaskan, which is planned to have a larger apartment complex constructed upon it by the time the park is complete in 2024.

[4] There is an error in the study. The appraiser is treating the half-block used for development of this tower, as though it were still vacant – Assessed parcels 197470-0190 and 197470-0210.

Conclusion

In conclusion, the Special Benefits study presents several major issues. These include:

- The Before condition is not adequately captured in the appraisal. The Before valuation pertains to "current" 2020 values, without the benefit of completed street improvements, as represented in renderings in the appraisal of the Before Condition. The inevitable conclusion is that the lift, if any, that property values would experience with completed streets and landscaping in the Before, has inadvertently been included as a "Special Benefit", or has no value.
- Special benefits are merely assigned, not measured. The study does not provide a measurement of After value, with the project in place, that is independent of the Before value, and takes into consideration delay of benefits until year of receipt.
- The benefits supposedly measured are not allocated into "general" and "special" benefits. Labelling all benefits as "special" does not appear credible for a regional park, or for an LID boundary that encompasses all of downtown.
- Benefits associated with proximity should be evaluated in the form of a lift in land value. The methodology used (a broad percentage assessment applied to total property value) results in inequitable assignments between properties. All properties that will be constructed and delivered to the market by 2024 have escaped a significant assessment, even though they may be identically positioned to otherwise currently built-product with regard to the Waterfront Project when it is complete.

The more general issue is the difficulty of trying to forecast a benefit that is special to a park that has regional appeal. The more common application of an LID is for extension of infrastructure; and here special benefits can be practically and incrementally assessed to unserved property brought to a development condition through the provision of infrastructure. However, the application of the special benefit methodology to a downtown area for a park amenity, represents a challenging and potential impossible assignment, if it is to be free of speculation and imagination.

Respectfully submitted,

Anthony Gibbons, MAI

Office of the City Clerk

12/30/2019

1000 1st Avenue South Lp - 7666206678
270 S Hanford St Ste 100
Seattle, WA 98134-1838

IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org OR (206) 499-8040.

Dear Property Owner:

YOU ARE NOTIFIED that the proposed final assessment roll for Local Improvement District No. 6751 (the "Waterfront LID"), which was created by Ordinance No. 125760 to finance a portion of the improvements of the Seattle Central Waterfront Improvement Program, includes your property and is now on file and available for inspection at the Office of the City Clerk located at Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington and available online at http://clerk.seattle.gov/search/clerk-files/321491.

YOU ARE FURTHER NOTIFIED that the Seattle City Council has fixed the time and date for the opening of a hearing of matters relating to the proposed final assessment roll for the Waterfront LID. The Assessment Roll Hearing will be held on Tuesday, February 4, 2020 starting at 9:00 AM PST:

Seattle City Hall
City Council Chambers
600 4th Avenue
Seattle, Washington 98104

Depending on the number of owners and representatives who choose to attend the hearing and state their views, it may be necessary to recess and continue the hearing, once commenced, to later dates and times.

Your Proposed Final LID Assessment
Included with this letter is an attachment listing the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against the described lot, tract, or parcel of land located in the City of Seattle, Washington, of which you are the owner as shown on the tax rolls of the King County Treasurer. *No payment is due at this time.*

Objecting to Proposed Final LID Assessment Amounts
If you would like to object to your proposed final LID assessment, you must make your objection in writing and file your objection with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing. All objections not made timely, in writing, and in the manner prescribed by RCW 35.44, shall conclusively be presumed to have been waived.

Persons filing written objections also are notified they may but are not required to appear at the hearing to state their views. Persons who wish to state their views at the hearing may sign-up to speak starting at 8:00 AM PST on the day of the hearing.

All objections:

- Must be made in writing.
- Must be filed with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing.
- Must state clearly the grounds of the objection.
- Should contain the lot, block, site address, parcel identification number or other identifying description of the property.

Written objections are required to be filed with the Office of the City Clerk, Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington at or prior to the date fixed for the Assessment Roll Hearing. Written objections may also be filed by email, addressed to LIDHearingExaminer@seattle.gov or by mail addressed to Seattle City Clerk, City of Seattle, P.O. Box 94607, Seattle, WA 98124-6907. Emailed or mailed objections must be received (by mail or email) prior to close of business on Monday, February 3, 2020.

Assessment Roll Hearing

At the time and place fixed for the Assessment Roll Hearing, and at such other times to which the hearing may be recessed and continued, the Council, a committee thereof, the Hearing Examiner or other designated officer, will sit as a board of equalization for the purpose of considering objections duly filed, together with all information and evidence in support of those objections, and for the purpose of considering the Waterfront LID assessment roll.

Following the conclusion of the hearing, the Hearing Examiner will prepare a written report with findings and recommendations. The report will be filed with the City Clerk and sent to City Council. In the report, the Hearing Examiner may recommend City Council correct, revise, raise, lower, change, or modify the roll or any part thereof, or set aside the roll and order the assessment to be made de novo. Property owners who made objections to their assessments will be notified when the Hearing Examiner's report is filed with the City Clerk. Property owners who made timely objections to their assessments in the manner required by law will have the opportunity to appeal the Hearing Examiner's recommendations.

Additional Information

Resolution 31915 is included with this letter for reference. The City intends to make available procedural rules for the hearing process. If you would like additional information about the Waterfront LID or the Assessment Roll Hearing, please visit **https://waterfrontseattle.org/local-improvement-district or email lid@waterfrontseattle.org or call (206) 499-8040.**

For disability accommodations at the hearings, materials in alternate formats, or accessibility information, contact the Office of the City Clerk at (206) 684-8344 or CityClerk@Seattle.gov at your earliest opportunity.

Sincerely,

Monica Martinez Simmons
City Clerk, City of Seattle

Enclosures (2):

- **Waterfront LID No. 6751 Proposed Final Assessment**
- **Resolution 31915**

THIS NOTICE HAS BEEN SENT TO THE PROPERTY OWNER AS SHOWN ON THE RECORDS OF THE KING COUNTY TREASURER'S OFFICE. IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org or (206) 499-8040

Waterfront LID No. 6751

PROPOSED FINAL ASSESSMENT

King County Parcel Identification Number (PIN):	7666206678
Parcel Site Address:	1000 1ST AVE S Seattle, WA
Final Special Benefit of LID Improvements to Parcel:	$35,000.00
Proposed Final LID Assessment for Parcel:	**$13,713.77**

As shown on the tax rolls of the King County Treasurer, you are the owner or reputed owner of the described lot, tract, or parcel of land listed above and located in the City of Seattle, Washington. Your proposed final assessment is the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against your property listed above. *No payment is due at this time.*

Consistent with the Waterfront LID Formation Ordinance No. 125760 passed in January 2019, the proposed final assessment roll, or the sum of all proposed final LID assessments, is $160 million plus approximately $15.5 million for financing (i.e. the costs of issuing the LID Bonds and making a Guaranty Fund deposit).

PLEASE SEE REVERSE SIDE FOR LID PAYMENT INFORMATION

LID ASSESSMENT PAYMENT INFORMATION

Upon approval of the ordinance confirming the assessment roll, notice will be published in the official newspaper of the City stating that assessments may be paid within 30 days from the date of first publication of the notice without penalty, interest or the payment of financing costs. Written notices will also be sent to each owner or reputed owner at the address shown on the tax rolls of the King County Treasurer regarding the option to prepay assessments.

After the 30-day prepayment period, any remaining principal balance of your assessment will be due in equal annual principal installments over an 18-year period and will be subject to interest on unpaid principal. The interest rate on unpaid assessments will be determined after the 30-day prepayment period, when the City issues bonds payable from the LID assessments. The interest rate on LID bonds will depend on the market conditions at the time the bonds are issued. Assessments may be prepaid without penalty at any time after the 30-day prepayment period, however interest will be required to be paid through the next upcoming installment due date.

The example below illustrates how annual assessment payments are calculated. Annual LID assessment payments are level principal payments. Interest will be calculated on the remaining principal balance of the assessment. The example below is not an assessment bill. The purpose of the example is to provide a basis for estimating annual payments.

The example assumes a $1,000 assessment and assumes an interest rate of 5%. The actual interest rate on the financing of your assessment may be higher or lower than 5%. If the actual interest rate is higher, the interest component of your payment will be higher.

EXAMPLE ONLY

Estimated Yearly Payment Schedule for each $1,000 of Assessment Assuming a 5% Interest Rate

YEAR	ASSESSMENT BALANCE	PRINCIPAL PAYMENT	INTEREST PAYMENT	ANNUAL PAYMENT
2021	$1,000.00	$55.56	$50.00	$105.56
2022	944.44	55.56	47.22	102.78
2023	888.89	55.56	44.44	100.00
2024	833.33	55.56	41.67	97.22
2025	777.78	55.56	38.89	94.44
2026	722.22	55.56	36.11	91.67

CITY CLERK

CITY OF SEATTLE

RESOLUTION 31915

A RESOLUTION fixing the date for hearing the final assessment roll for Local Improvement District No. 6751 ("Waterfront LID") to design and construct the Central Waterfront Improvement Program and directing that notice of the hearing be given in the manner required by law.

WHEREAS, by Ordinance 125760, passed in January 2019, the City Council of The City of Seattle established Local Improvement District No. 6751 of the City (interchangeably, "LID 6751" or the "Waterfront LID"); and

WHEREAS, the Director of Transportation has filed the proposed final assessment roll for LID 6751 with the City Clerk; and it is necessary to fix a date for the hearing of the roll, NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Notice of Public Hearing. The City Clerk is authorized and directed to give notice of the time and place fixed for the public hearing on the final assessment roll for Local Improvement District No. 6751. The notice shall also notify all persons who may desire to object thereto:

(1) To make their objections in writing and to file them with the City Clerk at or prior to the date fixed for the hearing;

(2) That at the time and place fixed and at times to which the hearing may be adjourned, the City Council will sit as a board of equalization for the purpose of considering the roll; and

(3) That at the hearing the City Council will consider the objections made and will correct, revise, raise, lower, change, or modify the roll or any part thereof or set aside the roll and order the assessment to be made de novo.

The City Clerk shall mail such notice at least 15 days before the date fixed for public hearing to the owner or reputed owner of the property, as shown on the rolls of the King County Treasurer at the address shown thereon, as required by law. Notice of the date(s), time(s), and place(s) of the public hearing shall also be published at least five times in the official daily newspaper or at least two times in a weekly newspaper of general circulation in the community where the improvement is constructed, with the date of the last publication at least 15 days before the date fixed for the public hearing(s).

Section 2. Time of Public Hearing. The City Council hereby determines that the hearing shall be held before a hearing examiner, with the City Clerk to select and engage the hearing examiner(s) necessary to conduct the hearing herein described and to enter into contracts as necessary for such hearing examiner services.

All persons who may desire to object to confirmation of the assessment roll as prepared are notified to appear and present those objections at the hearing before a hearing examiner to be held on the date below, which time and place are fixed for hearing all matters relating to the assessment roll and all objections thereto:

February 4, 2020

In order to allow all parties to provide testimony and essential additional information to the hearing examiner, the hearing examiner may exercise discretion to recess the hearing to times certain; provided, however, that an effort shall be made at all times to avoid delays which

unnecessarily allow interest to accumulate upon obligations for which the local improvement district is responsible.

Section 3. Filing of Report and Findings. The hearing examiner or officer shall reduce the hearing examiner's findings, recommendations, and decisions to writing and shall file them with the City Clerk following the conclusion of the hearing. Notice of the filing shall be posted or otherwise made available by the City Clerk or any person designated by the City Clerk to do so under the City Clerk's supervision.

Adopted by the City Council the 18th day of November, 2019, and signed by me in open session in authentication of its adoption this 18th day of November, 2019.

President _____ of the City Council

The Mayor concurred the 22nd day of November, 2019.

Jenny A. Durkan, Mayor

IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org OR (206) 499-8040.

Dear Property Owner:

YOU ARE NOTIFIED that the proposed final assessment roll for Local Improvement District No. 6751 (the "Waterfront LID"), which was created by Ordinance No. 125760 to finance a portion of the improvements of the Seattle Central Waterfront Improvement Program, includes your property and is now on file and available for inspection at the Office of the City Clerk located at Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington and available online at http://clerk.seattle.gov/search/clerk-files/321491.

YOU ARE FURTHER NOTIFIED that the Seattle City Council has fixed the time and date for the opening of a hearing of matters relating to the proposed final assessment roll for the Waterfront LID. The Assessment Roll Hearing will be held on Tuesday, February 4, 2020 starting at 9:00 AM PST:

Seattle City Hall
City Council Chambers
600 4th Avenue
Seattle, Washington 98104

Depending on the number of owners and representatives who choose to attend the hearing and state their views, it may be necessary to recess and continue the hearing, once commenced, to later dates and times.

Your Proposed Final LID Assessment

Included with this letter is an attachment listing the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against the described lot, tract, or parcel of land located in the City of Seattle, Washington, of which you are the owner as shown on the tax rolls of the King County Treasurer. *No payment is due at this time.*

Objecting to Proposed Final LID Assessment Amounts

If you would like to object to your proposed final LID assessment, you must make your objection in writing and file your objection with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing. All objections not made timely, in writing, and in the manner prescribed by RCW 35.44, shall conclusively be presumed to have been waived.

Persons filing written objections also are notified they may but are not required to appear at the hearing to state their views. Persons who wish to state their views at the hearing may sign-up to speak starting at 8:00 AM PST on the day of the hearing.

All objections:

- Must be made in writing.
- Must be filed with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing.
- Must state clearly the grounds of the objection.
- Should contain the lot, block, site address, parcel identification number or other identifying description of the property.

Written objections are required to be filed with the Office of the City Clerk, Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington at or prior to the date fixed for the Assessment Roll Hearing. Written objections may also be filed by email, addressed to LIDHearingExaminer@seattle.gov or by mail addressed to Seattle City Clerk, City of Seattle, P.O. Box 94607, Seattle, WA 98124-6907. Emailed or mailed objections must be received (by mail or email) prior to close of business on Monday, February 3, 2020.

Assessment Roll Hearing

At the time and place fixed for the Assessment Roll Hearing, and at such other times to which the hearing may be recessed and continued, the Council, a committee thereof, the Hearing Examiner or other designated officer, will sit as a board of equalization for the purpose of considering objections duly filed, together with all information and evidence in support of those objections, and for the purpose of considering the Waterfront LID assessment roll.

Following the conclusion of the hearing, the Hearing Examiner will prepare a written report with findings and recommendations. The report will be filed with the City Clerk and sent to City Council. In the report, the Hearing Examiner may recommend City Council correct, revise, raise, lower, change, or modify the roll or any part thereof, or set aside the roll and order the assessment to be made de novo. Property owners who made objections to their assessments will be notified when the Hearing Examiner's report is filed with the City Clerk. Property owners who made timely objections to their assessments in the manner required by law will have the opportunity to appeal the Hearing Examiner's recommendations.

Additional Information

Resolution 31915 is included with this letter for reference. The City intends to make available procedural rules for the hearing process. If you would like additional information about the Waterfront LID or the Assessment Roll Hearing, please visit **https://waterfrontseattle.org/local-improvement-district or email lid@waterfrontseattle.org or call (206) 499-8040.**

For disability accommodations at the hearings, materials in alternate formats, or accessibility information, contact the Office of the City Clerk at (206) 684-8344 or CityClerk@Seattle.gov at your earliest opportunity.

Sincerely,

Monica Martinez Simmons
City Clerk, City of Seattle

Enclosures (2):

- **Waterfront LID No. 6751 Proposed Final Assessment**
- **Resolution 31915**

THIS NOTICE HAS BEEN SENT TO THE PROPERTY OWNER AS SHOWN ON THE RECORDS OF THE KING COUNTY TREASURER'S OFFICE. IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org or (206) 499-8040

Waterfront LID No. 6751

PROPOSED FINAL ASSESSMENT

King County Parcel Identification Number (PIN):	7666206676
Parcel Site Address:	1000 1ST AV S Seattle, WA
Final Special Benefit of LID Improvements to Parcel:	$114,000.00
Proposed Final LID Assessment for Parcel:	**$44,667.71**

As shown on the tax rolls of the King County Treasurer, you are the owner or reputed owner of the described lot, tract, or parcel of land listed above and located in the City of Seattle, Washington. Your proposed final assessment is the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against your property listed above. *No payment is due at this time.*

Consistent with the Waterfront LID Formation Ordinance No. 125760 passed in January 2019, the proposed final assessment roll, or the sum of all proposed final LID assessments, is $160 million plus approximately $15.5 million for financing (i.e. the costs of issuing the LID Bonds and making a Guaranty Fund deposit).

PLEASE SEE REVERSE SIDE FOR LID PAYMENT INFORMATION

LID ASSESSMENT PAYMENT INFORMATION

Upon approval of the ordinance confirming the assessment roll, notice will be published in the official newspaper of the City stating that assessments may be paid within 30 days from the date of first publication of the notice without penalty, interest or the payment of financing costs. Written notices will also be sent to each owner or reputed owner at the address shown on the tax rolls of the King County Treasurer regarding the option to prepay assessments.

After the 30-day prepayment period, any remaining principal balance of your assessment will be due in equal annual principal installments over an 18-year period and will be subject to interest on unpaid principal. The interest rate on unpaid assessments will be determined after the 30-day prepayment period, when the City issues bonds payable from the LID assessments. The interest rate on LID bonds will depend on the market conditions at the time the bonds are issued. Assessments may be prepaid without penalty at any time after the 30-day prepayment period, however interest will be required to be paid through the next upcoming installment due date.

The example below illustrates how annual assessment payments are calculated. Annual LID assessment payments are level principal payments. Interest will be calculated on the remaining principal balance of the assessment. The example below is not an assessment bill. The purpose of the example is to provide a basis for estimating annual payments.

The example assumes a $1,000 assessment and assumes an interest rate of 5%. The actual interest rate on the financing of your assessment may be higher or lower than 5%. If the actual interest rate is higher, the interest component of your payment will be higher.

EXAMPLE ONLY

Estimated Yearly Payment Schedule for each $1,000 of Assessment Assuming a 5% Interest Rate

YEAR	ASSESSMENT BALANCE	PRINCIPAL PAYMENT	INTEREST PAYMENT	ANNUAL PAYMENT
2021	$1,000.00	$55.56	$50.00	$105.56

CITY CLERK

CITY OF SEATTLE

RESOLUTION 31915

A RESOLUTION fixing the date for hearing the final assessment roll for Local Improvement District No. 6751 ("Waterfront LID") to design and construct the Central Waterfront Improvement Program and directing that notice of the hearing be given in the manner required by law.

WHEREAS, by Ordinance 125760, passed in January 2019, the City Council of The City of Seattle established Local Improvement District No. 6751 of the City (interchangeably, "LID 6751" or the "Waterfront LID"); and

WHEREAS, the Director of Transportation has filed the proposed final assessment roll for LID 6751 with the City Clerk; and it is necessary to fix a date for the hearing of the roll,

NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Notice of Public Hearing. The City Clerk is authorized and directed to give notice of the time and place fixed for the public hearing on the final assessment roll for Local Improvement District No. 6751. The notice shall also notify all persons who may desire to object thereto:

(1) To make their objections in writing and to file them with the City Clerk at or prior to the date fixed for the hearing;

(2) That at the time and place fixed and at times to which the hearing may be adjourned, the City Council will sit as a board of equalization for the purpose of considering the roll; and

(3) That at the hearing the City Council will consider the objections made and will correct, revise, raise, lower, change, or modify the roll or any part thereof or set aside the roll and order the assessment to be made de novo.

The City Clerk shall mail such notice at least 15 days before the date fixed for public hearing to the owner or reputed owner of the property, as shown on the rolls of the King County Treasurer at the address shown thereon, as required by law. Notice of the date(s), time(s), and place(s) of the public hearing shall also be published at least five times in the official daily newspaper or at least two times in a weekly newspaper of general circulation in the community where the improvement is constructed, with the date of the last publication at least 15 days before the date fixed for the public hearing(s).

Section 2. Time of Public Hearing. The City Council hereby determines that the hearing shall be held before a hearing examiner, with the City Clerk to select and engage the hearing examiner(s) necessary to conduct the hearing herein described and to enter into contracts as necessary for such hearing examiner services.

All persons who may desire to object to confirmation of the assessment roll as prepared are notified to appear and present those objections at the hearing before a hearing examiner to be held on the date below, which time and place are fixed for hearing all matters relating to the assessment roll and all objections thereto:

February 4, 2020

In order to allow all parties to provide testimony and essential additional information to the hearing examiner, the hearing examiner may exercise discretion to recess the hearing to times certain; provided, however, that an effort shall be made at all times to avoid delays which

unnecessarily allow interest to accumulate upon obligations for which the local improvement district is responsible.

Section 3. Filing of Report and Findings. The hearing examiner or officer shall reduce the hearing examiner's findings, recommendations, and decisions to writing and shall file them with the City Clerk following the conclusion of the hearing. Notice of the filing shall be posted or otherwise made available by the City Clerk or any person designated by the City Clerk to do so under the City Clerk's supervision.

Adopted by the City Council the 18th day of November, 2019, and signed by me in open session in authentication of its adoption this 18th day of November, 2019.

President _____ of the City Council

The Mayor concurred the 22nd day of November, 2019.

Jenny A. Durkan, Mayor

Filed by me this 22nd day of November, 2019.

CITY CLERK

CITY OF SEATTLE

RESOLUTION 31915

A RESOLUTION fixing the date for hearing the final assessment roll for Local Improvement District No. 6751 ("Waterfront LID") to design and construct the Central Waterfront Improvement Program and directing that notice of the hearing be given in the manner required by law.

WHEREAS, by Ordinance 125760, passed in January 2019, the City Council of The City of Seattle established Local Improvement District No. 6751 of the City (interchangeably, "LID 6751" or the "Waterfront LID"); and

WHEREAS, the Director of Transportation has filed the proposed final assessment roll for LID 6751 with the City Clerk; and it is necessary to fix a date for the hearing of the roll,

NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Notice of Public Hearing. The City Clerk is authorized and directed to give notice of the time and place fixed for the public hearing on the final assessment roll for Local Improvement District No. 6751. The notice shall also notify all persons who may desire to object thereto:

(1) To make their objections in writing and to file them with the City Clerk at or prior to the date fixed for the hearing;

(2) That at the time and place fixed and at times to which the hearing may be adjourned, the City Council will sit as a board of equalization for the purpose of considering the roll; and

(3) That at the hearing the City Council will consider the objections made and will correct, revise, raise, lower, change, or modify the roll or any part thereof or set aside the roll and order the assessment to be made de novo.

The City Clerk shall mail such notice at least 15 days before the date fixed for public hearing to the owner or reputed owner of the property, as shown on the rolls of the King County Treasurer at the address shown thereon, as required by law. Notice of the date(s), time(s), and place(s) of the public hearing shall also be published at least five times in the official daily newspaper or at least two times in a weekly newspaper of general circulation in the community where the improvement is constructed, with the date of the last publication at least 15 days before the date fixed for the public hearing(s).

Section 2. Time of Public Hearing. The City Council hereby determines that the hearing shall be held before a hearing examiner, with the City Clerk to select and engage the hearing examiner(s) necessary to conduct the hearing herein described and to enter into contracts as necessary for such hearing examiner services.

All persons who may desire to object to confirmation of the assessment roll as prepared are notified to appear and present those objections at the hearing before a hearing examiner to be held on the date below, which time and place are fixed for hearing all matters relating to the assessment roll and all objections thereto:

February 4, 2020

In order to allow all parties to provide testimony and essential additional information to the hearing examiner, the hearing examiner may exercise discretion to recess the hearing to times certain; provided, however, that an effort shall be made at all times to avoid delays which

unnecessarily allow interest to accumulate upon obligations for which the local improvement district is responsible.

Section 3. Filing of Report and Findings. The hearing examiner or officer shall reduce the hearing examiner's findings, recommendations, and decisions to writing and shall file them with the City Clerk following the conclusion of the hearing. Notice of the filing shall be posted or otherwise made available by the City Clerk or any person designated by the City Clerk to do so under the City Clerk's supervision.

Adopted by the City Council the 18th day of November, 2019, and signed by me in open session in authentication of its adoption this 18th day of November, 2019.

President _____ of the City Council

The Mayor concurred the 22nd day of November, 2019.

Jenny A. Durkan, Mayor

Filed by me this 22nd day of November, 2019.

IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org OR (206) 499-8040.

Dear Property Owner:

YOU ARE NOTIFIED that the proposed final assessment roll for Local Improvement District No. 6751 (the "Waterfront LID"), which was created by Ordinance No. 125760 to finance a portion of the improvements of the Seattle Central Waterfront Improvement Program, includes your property and is now on file and available for inspection at the Office of the City Clerk located at Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington and available online at http://clerk.seattle.gov/search/clerk-files/321491.

YOU ARE FURTHER NOTIFIED that the Seattle City Council has fixed the time and date for the opening of a hearing of matters relating to the proposed final assessment roll for the Waterfront LID. The Assessment Roll Hearing will be held on Tuesday, February 4, 2020 starting at 9:00 AM PST:

Seattle City Hall
City Council Chambers
600 4th Avenue
Seattle, Washington 98104

Depending on the number of owners and representatives who choose to attend the hearing and state their views, it may be necessary to recess and continue the hearing, once commenced, to later dates and times.

Your Proposed Final LID Assessment

Included with this letter is an attachment listing the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against the described lot, tract, or parcel of land located in the City of Seattle, Washington, of which you are the owner as shown on the tax rolls of the King County Treasurer. *No payment is due at this time.*

Objecting to Proposed Final LID Assessment Amounts

If you would like to object to your proposed final LID assessment, you must make your objection in writing and file your objection with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing. All objections not made timely, in writing, and in the manner prescribed by RCW 35.44, shall conclusively be presumed to have been waived.

Persons filing written objections also are notified they may but are not required to appear at the hearing to state their views. Persons who wish to state their views at the hearing may sign-up to speak starting at 8:00 AM PST on the day of the hearing.

All objections:

- Must be made in writing.
- Must be filed with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing.
- Must state clearly the grounds of the objection.
- Should contain the lot, block, site address, parcel identification number or other identifying description of the property.

Written objections are required to be filed with the Office of the City Clerk, Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington at or prior to the date fixed for the Assessment Roll Hearing. Written objections may also be filed by email, addressed to LIDHearingExaminer@seattle.gov or by mail addressed to Seattle City Clerk, City of Seattle, P.O. Box 94607, Seattle, WA 98124-6907. Emailed or mailed objections must be received (by mail or email) prior to close of business on Monday, February 3, 2020.

Assessment Roll Hearing

At the time and place fixed for the Assessment Roll Hearing, and at such other times to which the hearing may be recessed and continued, the Council, a committee thereof, the Hearing Examiner or other designated officer, will sit as a board of equalization for the purpose of considering objections duly filed, together with all information and evidence in support of those objections, and for the purpose of considering the Waterfront LID assessment roll.

Following the conclusion of the hearing, the Hearing Examiner will prepare a written report with findings and recommendations. The report will be filed with the City Clerk and sent to City Council. In the report, the Hearing Examiner may recommend City Council correct, revise, raise, lower, change, or modify the roll or any part thereof, or set aside the roll and order the assessment to be made de novo. Property owners who made objections to their assessments will be notified when the Hearing Examiner's report is filed with the City Clerk. Property owners who made timely objections to their assessments in the manner required by law will have the opportunity to appeal the Hearing Examiner's recommendations.

Additional Information

Resolution 31915 is included with this letter for reference. The City intends to make available procedural rules for the hearing process. If you would like additional information about the Waterfront LID or the Assessment Roll Hearing, please visit **https://waterfrontseattle.org/local-improvement-district or email lid@waterfrontseattle.org or call (206) 499-8040.**

For disability accommodations at the hearings, materials in alternate formats, or accessibility information, contact the Office of the City Clerk at (206) 684-8344 or CityClerk@Seattle.gov at your earliest opportunity.

Sincerely,

Monica Martinez Simmons
City Clerk, City of Seattle

Enclosures (2):

- **Waterfront LID No. 6751 Proposed Final Assessment**
- **Resolution 31915**

THIS NOTICE HAS BEEN SENT TO THE PROPERTY OWNER AS SHOWN ON THE RECORDS OF THE KING COUNTY TREASURER'S OFFICE. IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org or (206) 499-8040

Waterfront LID No. 6751

PROPOSED FINAL ASSESSMENT

King County Parcel Identification Number (PIN):	7666204878
Parcel Site Address:	255 S KING ST Seattle, WA
Final Special Benefit of LID Improvements to Parcel:	$2,358,000.00
Proposed Final LID Assessment for Parcel:	**$923,916.28**

As shown on the tax rolls of the King County Treasurer, you are the owner or reputed owner of the described lot, tract, or parcel of land listed above and located in the City of Seattle, Washington. Your proposed final assessment is the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against your property listed above. *No payment is due at this time.*

Consistent with the Waterfront LID Formation Ordinance No. 125760 passed in January 2019, the proposed final assessment roll, or the sum of all proposed final LID assessments, is $160 million plus approximately $15.5 million for financing (i.e. the costs of issuing the LID Bonds and making a Guaranty Fund deposit).

PLEASE SEE REVERSE SIDE FOR LID PAYMENT INFORMATION

LID ASSESSMENT PAYMENT INFORMATION

Upon approval of the ordinance confirming the assessment roll, notice will be published in the official newspaper of the City stating that assessments may be paid within 30 days from the date of first publication of the notice without penalty, interest or the payment of financing costs. Written notices will also be sent to each owner or reputed owner at the address shown on the tax rolls of the King County Treasurer regarding the option to prepay assessments.

After the 30 day prepayment period, any remaining principal balance of your assessment will be due in equal annual principal installments over an 18-year period and will be subject to interest on unpaid principal. The interest rate on unpaid assessments will be determined after the 30-day prepayment period, when the City issues bonds payable from the LID assessments. The interest rate on LID bonds will depend on the market conditions at the time the bonds are issued. Assessments may be prepaid without penalty at any time after the 30-day prepayment period, however interest will be required to be paid through the next upcoming installment due date.

The example below illustrates how annual assessment payments are calculated. Annual LID assessment payments are level principal payments. Interest will be calculated on the remaining principal balance of the assessment. The example below is not an assessment bill. The purpose of the example is to provide a basis for estimating annual payments.

The example assumes a $1,000 assessment and assumes an interest rate of 5%. The actual interest rate on the financing of your assessment may be higher or lower than 5%. If the actual interest rate is higher, the interest component of your payment will be higher.

EXAMPLE ONLY

Estimated Yearly Payment Schedule for each $1,000 of Assessment Assuming a 5% Interest Rate

YEAR	ASSESSMENT BALANCE	PRINCIPAL PAYMENT	INTEREST PAYMENT	ANNUAL PAYMENT
2021	$1,000.00	$55.56	$50.00	$105.56

CITY CLERK

CITY OF SEATTLE

RESOLUTION 31915

A RESOLUTION fixing the date for hearing the final assessment roll for Local Improvement District No. 6751 ("Waterfront LID") to design and construct the Central Waterfront Improvement Program and directing that notice of the hearing be given in the manner required by law.

WHEREAS, by Ordinance 125760, passed in January 2019, the City Council of The City of Seattle established Local Improvement District No. 6751 of the City (interchangeably, "LID 6751" or the "Waterfront LID"); and

WHEREAS, the Director of Transportation has filed the proposed final assessment roll for LID 6751 with the City Clerk; and it is necessary to fix a date for the hearing of the roll, NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Notice of Public Hearing. The City Clerk is authorized and directed to give notice of the time and place fixed for the public hearing on the final assessment roll for Local Improvement District No. 6751. The notice shall also notify all persons who may desire to object thereto:

(1) To make their objections in writing and to file them with the City Clerk at or prior to the date fixed for the hearing;

(2) That at the time and place fixed and at times to which the hearing may be adjourned, the City Council will sit as a board of equalization for the purpose of considering the roll; and

(3) That at the hearing the City Council will consider the objections made and will correct, revise, raise, lower, change, or modify the roll or any part thereof or set aside the roll and order the assessment to be made de novo.

The City Clerk shall mail such notice at least 15 days before the date fixed for public hearing to the owner or reputed owner of the property, as shown on the rolls of the King County Treasurer at the address shown thereon, as required by law. Notice of the date(s), time(s), and place(s) of the public hearing shall also be published at least five times in the official daily newspaper or at least two times in a weekly newspaper of general circulation in the community where the improvement is constructed, with the date of the last publication at least 15 days before the date fixed for the public hearing(s).

Section 2. Time of Public Hearing. The City Council hereby determines that the hearing shall be held before a hearing examiner, with the City Clerk to select and engage the hearing examiner(s) necessary to conduct the hearing herein described and to enter into contracts as necessary for such hearing examiner services.

All persons who may desire to object to confirmation of the assessment roll as prepared are notified to appear and present those objections at the hearing before a hearing examiner to be held on the date below, which time and place are fixed for hearing all matters relating to the assessment roll and all objections thereto:

February 4, 2020

In order to allow all parties to provide testimony and essential additional information to the hearing examiner, the hearing examiner may exercise discretion to recess the hearing to times certain; provided, however, that an effort shall be made at all times to avoid delays which

unnecessarily allow interest to accumulate upon obligations for which the local improvement district is responsible.

Section 3. Filing of Report and Findings. The hearing examiner or officer shall reduce the hearing examiner's findings, recommendations, and decisions to writing and shall file them with the City Clerk following the conclusion of the hearing. Notice of the filing shall be posted or otherwise made available by the City Clerk or any person designated by the City Clerk to do so under the City Clerk's supervision.

Adopted by the City Council the 18th day of November, 2019, and signed by me in open session in authentication of its adoption this 18th day of November, 2019.

President _____ of the City Council

The Mayor concurred the 22nd day of November, 2019.

Jenny A. Durkan, Mayor

Filed by me this 22nd day of November, 2019.

IF THIS NOTICE IS RECEIVED BY SOMEONE OTHER THAN THE OWNER OF THE HEREIN-DESCRIBED PROPERTY, PLEASE FORWARD TO THE OWNER AND NOTIFY THE CITY AT lid@waterfrontseattle.org OR (206) 499-8040.

Dear Property Owner:

YOU ARE NOTIFIED that the proposed final assessment roll for Local Improvement District No. 6751 (the "Waterfront LID"), which was created by Ordinance No. 125760 to finance a portion of the improvements of the Seattle Central Waterfront Improvement Program, includes your property and is now on file and available for inspection at the Office of the City Clerk located at Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington and available online at http://clerk.seattle.gov/search/clerk-files/321491.

YOU ARE FURTHER NOTIFIED that the Seattle City Council has fixed the time and date for the opening of a hearing of matters relating to the proposed final assessment roll for the Waterfront LID. The Assessment Roll Hearing will be held on Tuesday, February 4, 2020 starting at 9:00 AM PST:

Seattle City Hall
City Council Chambers
600 4th Avenue
Seattle, Washington 98104

Depending on the number of owners and representatives who choose to attend the hearing and state their views, it may be necessary to recess and continue the hearing, once commenced, to later dates and times.

Your Proposed Final LID Assessment
Included with this letter is an attachment listing the amount of the cost and expense of the Waterfront LID Improvements to be borne by and assessed against the described lot, tract, or parcel of land located in the City of Seattle, Washington, of which you are the owner as shown on the tax rolls of the King County Treasurer. *No payment is due at this time.*

Objecting to Proposed Final LID Assessment Amounts
If you would like to object to your proposed final LID assessment, you must make your objection in writing and file your objection with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing. All objections not made timely, in writing, and in the manner prescribed by RCW 35.44, shall conclusively be presumed to have been waived.

Persons filing written objections also are notified they may but are not required to appear at the hearing to state their views. Persons who wish to state their views at the hearing may sign-up to speak starting at 8:00 AM PST on the day of the hearing.

All objections:

- Must be made in writing.
- Must be filed with the City Clerk at or prior to the date fixed for the Assessment Roll Hearing.
- Must state clearly the grounds of the objection.
- Should contain the lot, block, site address, parcel identification number or other identifying description of the property.

Written objections are required to be filed with the Office of the City Clerk, Seattle City Hall, 600 Fourth Avenue, Floor 3, Seattle, Washington at or prior to the date fixed for the Assessment Roll Hearing. Written objections may also be filed by email, addressed to LIDHearingExaminer@seattle.gov or by mail addressed to Seattle City Clerk, City of Seattle, P.O. Box 94607, Seattle, WA 98124-6907. Emailed or mailed objections must be received (by mail or email) prior to close of business on Monday, February 3, 2020.

Assessment Roll Hearing

At the time and place fixed for the Assessment Roll Hearing, and at such other times to which the hearing may be recessed and continued, the Council, a committee thereof, the Hearing Examiner or other designated officer, will sit as a board of equalization for the purpose of considering objections duly filed, together with all information and evidence in support of those objections, and for the purpose of considering the Waterfront LID assessment roll.

Following the conclusion of the hearing, the Hearing Examiner will prepare a written report with findings and recommendations. The report will be filed with the City Clerk and sent to City Council. In the report, the Hearing Examiner may recommend City Council correct, revise, raise, lower, change, or modify the roll or any part thereof, or set aside the roll and order the assessment to be made de novo. Property owners who made objections to their assessments will be notified when the Hearing Examiner's report is filed with the City Clerk. Property owners who made timely objections to their assessments in the manner required by law will have the opportunity to appeal the Hearing Examiner's recommendations.

CITY CLERK

CITY OF SEATTLE

RESOLUTION 31915

A RESOLUTION fixing the date for hearing the final assessment roll for Local Improvement District No. 6751 ("Waterfront LID") to design and construct the Central Waterfront Improvement Program and directing that notice of the hearing be given in the manner required by law.

WHEREAS, by Ordinance 125760, passed in January 2019, the City Council of The City of Seattle established Local Improvement District No. 6751 of the City (interchangeably, "LID 6751" or the "Waterfront LID"); and

WHEREAS, the Director of Transportation has filed the proposed final assessment roll for LID 6751 with the City Clerk; and it is necessary to fix a date for the hearing of the roll,

NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Notice of Public Hearing. The City Clerk is authorized and directed to give notice of the time and place fixed for the public hearing on the final assessment roll for Local Improvement District No. 6751. The notice shall also notify all persons who may desire to object thereto:

(1) To make their objections in writing and to file them with the City Clerk at or prior to the date fixed for the hearing;

(2) That at the time and place fixed and at times to which the hearing may be adjourned, the City Council will sit as a board of equalization for the purpose of considering the roll; and

(3) That at the hearing the City Council will consider the objections made and will correct, revise, raise, lower, change, or modify the roll or any part thereof or set aside the roll and order the assessment to be made de novo.

The City Clerk shall mail such notice at least 15 days before the date fixed for public hearing to the owner or reputed owner of the property, as shown on the rolls of the King County Treasurer at the address shown thereon, as required by law. Notice of the date(s), time(s), and place(s) of the public hearing shall also be published at least five times in the official daily newspaper or at least two times in a weekly newspaper of general circulation in the community where the improvement is constructed, with the date of the last publication at least 15 days before the date fixed for the public hearing(s).

Section 2. Time of Public Hearing. The City Council hereby determines that the hearing shall be held before a hearing examiner, with the City Clerk to select and engage the hearing examiner(s) necessary to conduct the hearing herein described and to enter into contracts as necessary for such hearing examiner services.

All persons who may desire to object to confirmation of the assessment roll as prepared are notified to appear and present those objections at the hearing before a hearing examiner to be held on the date below, which time and place are fixed for hearing all matters relating to the assessment roll and all objections thereto:

February 4, 2020

In order to allow all parties to provide testimony and essential additional information to the hearing examiner, the hearing examiner may exercise discretion to recess the hearing to times certain; provided, however, that an effort shall be made at all times to avoid delays which

unnecessarily allow interest to accumulate upon obligations for which the local improvement district is responsible.

Section 3. Filing of Report and Findings. The hearing examiner or officer shall reduce the hearing examiner's findings, recommendations, and decisions to writing and shall file them with the City Clerk following the conclusion of the hearing. Notice of the filing shall be posted or otherwise made available by the City Clerk or any person designated by the City Clerk to do so under the City Clerk's supervision.

Adopted by the City Council the 18th day of November, 2019, and signed by me in open session in authentication of its adoption this 18th day of November, 2019.

President _____ of the City Council

The Mayor concurred the 22nd day of November, 2019.

7. THIS SITE IS SUBJECT TO THE THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "COVENANT GEOLOGIC HAZARD AREA" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 9807311097.

8. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "STADIUM AND EXHIBITION CENTER PROPERTY CONTRIBUTION AND RESERVATION OF POSSESSORY RIGHTS AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 9812102052.

9. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS OF AN EASEMENT IN FAVOR OF THE CITY OF SEATTLE FOR UNDERGROUND ELECTRIC TRANSMISSION AND DISTRIBUTION LINE FACILITIES AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 19990811000621 AND IS SHOWN HEREON.

10. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "COVENANT GEOLOGIC HAZARD AREA" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 19991104001128.

11. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS OF AN EASEMENT FOR ACCESS AND EGRESS FOR VEHICLES AND PEDESTRIANS AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20000317000453. PORTIONS OF THE EASEMENT AREAS DESCRIBED WITHIN SAID INSTRUMENT ARE INSUFFICIENT TO DETERMINE THEIR EXACT LOCATION WITHIN THE SITE.

12. THIS SITE IS SUBJECT TO THE CONDITIONS, NOTES, EASEMENTS AND PROVISIONS CONTAINED AND/OR DELINEATED ON THE FACE OF THE SURVEY RECORDED UNDER RECORDING NUMBER 20050725900003. SAID SURVEY NOTES AN EASEMENT RESERVED FOR ACCESS, MAINTENANCE AND USE OF UTILITIES AND AN EASEMENT FOR RECONSTRUCTION, MAINTENANCE AND USE OF EXISTING RAILROAD TRACKS, RESERVED IN WARRANTY DEED RECORDED UNDER RECORDING NUMBER 7112140537. SAID EASEMENTS AND DEED ARE NOT SPECIFICALLY INCLUDED IN TITLE.

13. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "WELLER STREET BRIDGE TRANSFER AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20061201000126 AND MODIFIED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20070925000335. EASEMENT AREAS DESCRIBED WITHIN SAID INSTRUMENT ARE SHOWN HEREON.

14. THIS SITE IS SUBJECT TO THE RESTRICTIONS, CONDITIONS, DEDICATIONS, NOTES, EASEMENTS AND PROVISIONS, IF ANY, AS CONTAINED AND/OR DELINEATED ON THE FACE OF THE CITY OF SEATTLE LOT BOUNDARY ADJUSTMENT NUMBER 3008308 RECORDED UNDER RECORDING NUMBER 20090514900009.

15. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "DECLARATION REGARDING FLOOR AREA BONUS FOR PROPERTY AT 201 S. KING" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20100312000018.

16. THIS SITE IS SUBJECT TO THE EXHIBIT OF FLOOR PLAN FOR DECLARATION REGARDING FLOOR AREA BONUS FOR PROPERTY AT 201 S. KING STREET AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20100312900001 SAID EXHIBIT WAS RECORDED AS AN EXHIBIT TO ACCOMPANY EXCEPTION 15.

17. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "NORTH LOT RESTRICTIVE COVENANT AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000511.

18. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "EAST BLOCK AFFORDABLE HOUSING RESTRICTIVE COVENANT AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000512.

19. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "RESTRICTIVE PARKING COVENANT AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000514.

20. THIS SITE IS SUBJECT TO A DOCUMENT ENTITLED "RESTRICTIVE COVENANT", EXECUTED BY AND BETWEEN NORTH LOT DEVELOPMENT, LLC AND WASHINGTON STATE PUBLIC AUTHORITY AND ITS MASTER TENANT, FIRST & GOAL, INC. AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000515. VIEW PROTECTIONS AREAS DESCRIBED WITHIN SAID INSTRUMENT ARE SHOWN HEREON.

21. THIS SITE IS SUBJECT TO A DOCUMENT ENTITLED "MUTUAL RESTRICTIVE COVENANT FOR THE FIRE SEPARATION SETBACK" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000516. SETBACK AREAS DESCRIBED WITHIN SAID INSTRUMENT ARE SHOWN HEREON.

22. THIS SITE IS SUBJECT TO THE TERMS AND PROVISIONS CONTAINED IN THE DOCUMENT ENTITLED "COVENANT RUNNING WITH THE LAND WITH ACKNOWLEDGEMENT AND ACCEPTANCE OF RISK, DUTY TO INFORM, NEED FOR INSURANCE, INDEMNITY AND WAIVER" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000517.

23. THIS SITE IS SUBJECT TO THE TERMS, PROVISIONS AND EASEMENT(S) CONTAINED IN THE DOCUMENT ENTITLED "AGREEMENT FOR TEMPORARY EASEMENTS" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20111003001599 SAID INSTRUMENT IS A RE-RECORDING OF INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000518. THE TEMPORARY CRANE EASEMENT DESCRIBED WITHIN SAID INSTRUMENT IS SHOWN HEREON.

EXCEPTIONS 24 THROUGH 26 NOT NECESSARY TO NOTE ON THE A.L.T.A. SURVEY.

27. THIS SITE IS SUBJECT TO UNRECORDED LEASEHOLDS, IF ANY, RIGHTS OF VENDORS AND SECURITY AGREEMENT ON PERSONAL PROPERTY AND RIGHTS OF TENANTS, AND SECURED PARTIES TO REMOVE TRADE FIXTURES AT THE EXPIRATION OF THE TERM.

28. THIS SITE IS SUBJECT TO THE TERMS, PROVISIONS AND EASEMENT(S) CONTAINED IN THE DOCUMENT ENTITLED "ODOR CONTROL FACILITY EASEMENT AND AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000510. THE EASEMENT AREA DESCRIBED WITHIN SAID INSTRUMENT IS SHOWN HEREON.

29. THIS SITE IS SUBJECT TO THE TERMS, PROVISIONS AND EASEMENT(S) CONTAINED IN THE DOCUMENT ENTITLED "TRANSIT EASEMENT AND AGREEMENT" AS DISCLOSED BY INSTRUMENT RECORDED UNDER RECORDING NUMBER 20110926000510. THE EASEMENT AREA DESCRIBED WITHIN SAID INSTRUMENT IS SHOWN HEREON.

LEGAL DESCRIPTION:

NEW PARCEL B OF CITY OF SEATTLE LOT BOUNDARY ADJUSTMENT NO. 3012468 RECORDED SEPTEMBER 19, 2011 UNDER RECORDING NO. 20110919900011, RECORD OF KING COUNTY, WASHINGTON.

SURVEYOR'S NOTES:

1. ALL TITLE INFORMATION SHOWN ON THIS MAP HAS BEEN EXTRACTED FROM FIRST AMERICAN TITLE INSURANCE COMPANY COMMITMENT SECOND REPORT ORDER NO. NCS-514471-WA1 DATED DECEMBER 23, 2011. IN PREPARING THIS MAP, D.R. STRONG CONSULTING ENGINEERS INC. HAS CONDUCTED NO INDEPENDENT TITLE SEARCH NOR IS D.R. STRONG CONSULTING ENGINEERS INC. AWARE OF ANY TITLE ISSUES AFFECTING THE SURVEYED PROPERTY OTHER THAN THOSE SHOWN ON THE MAP AND DISCLOSED BY REFERENCED FIRST AMERICAN TITLE INSURANCE COMPANY COMMITMENT. D.R. STRONG CONSULTING ENGINEERS INC. HAS RELIED WHOLLY ON FIRST AMERICAN TITLE INSURANCE COMPANY REPRESENTATIONS OF THE TITLE'S CONDITION TO PREPARE THIS SURVEY AND THEREFOR D.R. STRONG CONSULTING ENGINEERS INC. QUALIFIES THE MAP'S ACCURACY AND COMPLETENESS TO THAT EXTENT.

2. THIS SURVEY REPRESENTS VISIBLE PHYSICAL IMPROVEMENT CONDITIONS EXISTING ON JANUARY 30, 2012. ALL SURVEY CONTROL INDICATED AS "FOUND" WAS RECOVERED FOR THIS PROJECT IN JANUARY, 2012.

3. PORTIONS OF THE EXISTING IMPROVEMENTS SHOWN HEREON ARE BASED ON THE SURVEY PREPARED BY BUSH RODE & HITCHINGS, INC. UNDER PROJECT NUMBER 2011016, SUPPLIED TO D.R. STRONG CONSULTING ENGINEERS INC. BY THE CLIENT. D.R. STRONG CONSULTING ENGINEERS INC. HAS PREFORMED SUFFICIENT FIELD VERIFICATIONS TO CONFIRM THE INFORMATION PREPARED BY BUSH RODE & HITCHINGS, INC.

4. PROPERTY AREA = 64,291± SQUARE FEET (1.4759± ACRES).

5. ALL DISTANCES ARE IN FEET.

6. THIS IS A FIELD TRAVERSE SURVEY. A LEICA FIVE SECOND COMBINED ELECTRONIC TOTAL STATION WAS USED TO MEASURE THE ANGULAR AND DISTANCE RELATIONSHIPS BETWEEN THE CONTROLLING MONUMENTATION AS SHOWN. CLOSURE RATIOS OF THE TRAVERSE MET OR EXCEEDED THOSE SPECIFIED IN WAC 332-130-090. ALL MEASURING INSTRUMENTS AND EQUIPMENT ARE MAINTAINED IN ADJUSTMENT ACCORDING TO MANUFACTURER'S SPECIFICATIONS.

7. UTILITIES OTHER THAN THOSE SHOWN MAY EXIST ON THIS SITE. ONLY THOSE UTILITIES WITH EVIDENCE OF THEIR INSTALLATION VISIBLE AT GROUND SURFACE ARE SHOWN HEREON. UNDERGROUND UTILITY LOCATIONS SHOWN ARE APPROXIMATE ONLY. UNDERGROUND CONNECTIONS ARE SHOWN AS STRAIGHT LINES BETWEEN SURFACE UTILITY LOCATIONS BUT MAY CONTAIN BENDS OR CURVES NOT SHOWN. SOME UNDERGROUND LOCATIONS SHOWN HEREON MAY HAVE BEEN TAKEN FROM PUBLIC RECORDS. D.R. STRONG CONSULTING ENGINEERS INC. ASSUMES NO LIABILITY FOR THE ACCURACY OF PUBLIC RECORDS.

NOTES:

1. KING COUNTY TAX PARCEL IDENTIFICATION NUMBER: 7666204878

2. FLOOD ZONE DESIGNATION = X, AREA DETERMINED TO BE OUTSIDE OF 500-YEAR FLOOD PLAIN, ACCORDING TO FLOOD INSURANCE RATE MAP, ("FIRM") NO. 53033C0630 F, EFFECTIVE MAY 16, 1995, KING COUNTY, WASHINGTON, AS PREPARED BY THE FEDERAL EMERGENCY MANAGEMENT AGENCY ("FEMA").

3. THERE ARE NO BUILDINGS ON SITE.

4. THIS PROPERTY HAS LEGAL ACCESS TO SOUTH KING STREET SHOWN HEREON AS PUBLIC RIGHT-OF-WAY. PHYSICAL ACCESS MAY BE LIMITED BY IMPROVEMENTS, OR LACK THEREOF, AS SHOWN ON THE SURVEY.

5. OCCUPATION LOCATION DIMENSIONS ARE MEASURED AT RIGHT ANGLES FROM THE PROPERTY LINE TO THE POSITIONS INDICATED, (UNLESS SHOWN OTHERWISE).

4 D.R. STRONG SURVEY CREWS DETECTED NO OBSERVABLE EVIDENCE OF ANY CEMETERIES, RUBBISH FILLS, SLOUGHS, SPRINGS, FILLED-IN WELLS, CISTERNS, OR SEEP HOLES ON THE PROPERTY.

5. PLANTED LANDSCAPE AREAS INCLUDE LAWN, SMALL SHRUBS, AND ORNAMENTAL PLANTS.

6. NO ATTEMPT WAS MADE TO DETERMINE THE LIMITS OF ANY UNDERGROUND FOUNDATIONS OR SLABS.

7. D.R. STRONG CONSULTING ENGINEERS IS UNAWARE OF ANY EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS OCCURRING WITHIN RECENT MONTHS.

8. D.R. STRONG CONSULTING ENGINEERS IS UNAWARE OF ANY CHANGES IN STREET RIGHT OF WAY LINES EITHER COMPLETED OR PROPOSED, AND AVAILABLE FROM THE CONTROLLING JURISDICTION OR OBSERVABLE EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS.

9. THERE ARE NO LAKES, DITCHES OR STREAMS RUNNING THROUGH OR WITHIN 25 FEET OF THE SURVEYED PROPERTY.

10. D.R. STRONG CONSULTING ENGINEERS IS UNAWARE OF ANY WELLS OR SEPTIC FIELDS WITHIN THE SURVEYED PROPERTY.

NE SECTION 5, TOWNSHIP 24 N, RANGE 4 E, W.M.

255 S KING ST Street Improvement Plan

GENERAL NOTES:

1. ALL WORK SHALL CONFORM TO THE 2014 EDITION OF CITY OF SEATTLE STANDARD SPECIFICATIONS, THE 2011 EDITION OF THE CITY OF SEATTLE STANDARD PLANS; AND SEATTLE DEPARTMENT OF TRANSPORTATION DIRECTOR'S RULE 05-2009 FOR STREET AND SIDEWALK PAVEMENT OPENING AND RESTORATION. A COPY OF THESE DOCUMENTS SHALL BE ON SITE DURING CONSTRUCTION.

2. A COPY OF THE APPROVED PLAN MUST BE ON SITE WHENEVER CONSTRUCTION IS IN PROGRESS.

3. ERRORS AND OMISSIONS ON THE PERMITTED PLANS MUST BE CORRECTED BY THE ENGINEER AND APPROVED BY THE CITY OF SEATTLE.

4. ALL PERMITS REQUIRED FOR WORK WITHIN THE PUBLIC RIGHT OF WAY MUST BE OBTAINED PRIOR TO THE START OF CONSTRUCTION.

5. PRIOR TO THE START OF CONSTRUCTION WITHIN THE RIGHT OF WAY, THE PERMITTEE SHALL SCHEDULE AND ATTEND A PRECONSTRUCTION MEETING WITH THE CITY OF SEATTLE DEPARTMENT OF TRANSPORTATION.

6. PERMITTEE SHALL CONTACT SEATTLE DEPARTMENT OF TRANSPORTATION, STREET USE INSPECTOR A MINIMUM OF 2 BUSINESS DAYS PRIOR TO NEEDING AN INSPECTION.

7. ALL DAMAGE TO CITY INFRASTRUCTURE CAUSED BY THE CONSTRUCTION SHALL BE IMMEDIATELY REPORTED AND REPAIRED AS REQUIRED BY THE SEATTLE DEPARTMENT OF TRANSPORTATION. TO REPORT DAMAGE TO SPU INFRASTRUCTURE, INCLUDING ANY SEWAGE RELEASE OR BLOCKAGE, CALL 206-386-1800.

8. THE APPROVED PLANS SHALL SHOW THE APPROXIMATE AREA OF PAVEMENT RESTORATION BASED ON THE DEPTH OF UTILITY CUTS AND/OR THE AREA OF CURB AND/OR PAVEMENT TO BE REMOVED AND REPLACED. THE ACTUAL LIMITS OF THE PAVEMENT RESTORATION SHALL BE PER THE STREET AND SIDEWALK PAVEMENT OPENING AND RESTORATION DIRECTOR'S RULE 05-2009 AND WILL BE DETERMINED IN THE FIELD BY THE SEATTLE DEPARTMENT OF TRANSPORTATION STREET USE INSPECTOR PRIOR TO THE PAVEMENT RESTORATION. FOR SPU WATER SERVICES, APPLICANT MUST SHOW THE PAVEMENT RESTORATION LIMITS FOR THE PROPOSED AND THE EXISTING WATER SERVICES TO BE RETIRED, INCLUDING SERVICES THAT ARE OUTSIDE THE PROJECT AREA, BUT SERVE THE PARCEL.

9. DATUM: NAVD 88 AND NAD83 (1991).

10. SURVEYING AND STAKING OF ALL IMPROVEMENTS IN THE PUBLIC RIGHT OF WAY SHALL BE COMPLETED PRIOR TO CONSTRUCTION. SURVEY CUT SHEETS MUST BE SUBMITTED AND APPROVED BY THE SEATTLE DEPARTMENT OF TRANSPORTATION AT LEAST 5 DAYS PRIOR TO CONSTRUCTION.

11. IF AN EXISTING CURB IS TO BE REMOVED AND REPLACED IN THE SAME LOCATION THE PERMITTEE SHALL PROVIDE THE STREET USE INSPECTOR A PLAN WITH EXISTING FLOW LINE AND TOP OF CURB ELEVATIONS IDENTIFIED. PERMITTEE TO STAKE THE LOCATION OF THE EXISTING CURB PRIOR TO DEMOLITION.

12. THE PERMITTEE SHALL BE RESPONSIBLE FOR REFERENCING AND REPLACING ALL MONUMENTS THAT MAY BE DISTURBED, DESTROYED OR REMOVED BY THE PROJECT AND SHALL FILE AN APPLICATION FOR PERMIT TO REMOVE OR DESTROY A SURVEY MONUMENT WITH THE WASHINGTON STATE DEPARTMENT OF NATURAL RESOURCES, PURSUANT TO RCW 58.24.040(8).

13. THE PERMITTEE SHALL SUBMIT ALL APPLICABLE DOCUMENTS REQUIRED UNDER SECTION 1-05.1 OF THE STANDARD SPECIFICATIONS PRIOR TO CONSTRUCTION. A MATERIAL SOURCE FORM FOR ALL MATERIALS TO BE PLACED IN THE RIGHT OF WAY AND MIX DESIGNS FOR ALL ASPHALT, CONCRETE AND AGGREGATES TO BE PLACED IN THE RIGHT OF WAY MUST BE SUBMITTED TO THE SEATTLE DEPARTMENT OF TRANSPORTATION FOR REVIEW AND APPROVAL PRIOR TO BEGINNING CONSTRUCTION. A REVISED MATERIAL SOURCE FORM AND MIX DESIGNS MUST BE SUBMITTED FOR REVIEW AND APPROVAL PRIOR TO PLACEMENT OF ANY SUBSTITUTE MATERIALS.

14. THE PERMITTEE SHALL NOTIFY THE SEATTLE FIRE DEPARTMENT DISPATCHER (206-386-1495) AT LEAST TWENTY-FOUR (24) HOURS IN ADVANCE OF ALL WATER SERVICE INTERRUPTIONS, HYDRANT SHUTOFFS, AND STREET CLOSURES OR OTHER ACCESS BLOCKAGE. THE PERMITTEE SHALL ALSO NOTIFY THE DISPATCHER OF ALL NEW, RELOCATED, OR ELIMINATED HYDRANTS RESULTING FROM THIS WORK.

15. THE PERMITTEE SHALL LOCATE AND PROTECT ALL CASTINGS AND UTILITIES DURING CONSTRUCTION.

16. THE PERMITTEE SHALL CONTACT THE UNDERGROUND UTILITIES LOCATOR SERVICE (1-800-424-5555) AT LEAST 48 HOURS PRIOR TO CONSTRUCTION.

17. IT IS THE SOLE RESPONSIBILITY OF THE PERMITTEE TO VERIFY THE ACCURACY OF ALL UTILITY LOCATIONS SHOWN AND TO FURTHER DISCOVER AND AVOID ANY OTHER UTILITIES NOT SHOWN WHICH MAY BE AFFECTED BY THE IMPLEMENTATION OF THIS PLAN.

18. THE PERMITTEE SHALL ADJUST ALL EXISTING MANHOLE RIMS, DRAINAGE STRUCTURE LIDS, VALVE BOXES, AND UTILITY ACCESS STRUCTURES TO FINISH GRADE WITHIN AREAS AFFECTED BY THE PROPOSED IMPROVEMENTS.

19. THE PERMITTEE SHALL FOLLOW SPU CORE TAP PROCEDURES FOR ALL NEW CONNECTIONS TO EXISTING SEWER OR DRAINAGE MAINS OR STRUCTURES. CONTRACTORS ARE NOT ALLOWED TO CORE INTO MAINS OR STRUCTURES WITHOUT PRIOR APPROVAL FROM SPU-DWW. TO SCHEDULE CORE CUTS CONTACT SPU-DWW AT 206-615-0511 A MINIMUM OF 48 HOURS IN ADVANCE.

20. UTILITY SERVICE CONNECTIONS SHOWN ON THIS PLAN REQUIRE SEPARATE PERMITS.

21. THE PERMITTEE SHALL PROVIDE FOR ALL TESTING AS REQUIRED BY THE STREET USE INSPECTOR.

22. INSPECTION AND ACCEPTANCE OF ALL WORK IN THE PUBLIC RIGHT-OF-WAY SHALL BE DONE BY REPRESENTATIVES OF THE CITY OF SEATTLE. IT SHALL BE THE PERMITTEE'S RESPONSIBILITY TO COORDINATE AND SCHEDULE APPROPRIATE INSPECTIONS ALLOWING FOR PROPER ADVANCE NOTICE. THE SEATTLE DEPARTMENT OF TRANSPORTATION STREET USE INSPECTOR MAY REQUIRE REMOVAL AND RECONSTRUCTION OF ANY ITEMS PLACED IN THE RIGHT OF WAY THAT DO NOT MEET CITY STANDARDS OR THAT WERE CONSTRUCTED WITHOUT APPROPRIATE INSPECTIONS.

23. THE PERMITTEE SHALL PROVIDE AND MAINTAIN TEMPORARY EROSION CONTROL AND SEDIMENTATION COLLECTION FACILITIES TO ENSURE THAT SEDIMENT-LADEN WATER DOES NOT ENTER THE NATURAL OR PUBLIC DRAINAGE SYSTEM PER SECTION 8-01. AS CONSTRUCTION PROGRESSES AND UNEXPECTED (SEASONAL) CONDITIONS DICTATE, ADDITIONAL CONTROL FACILITIES MAY BE REQUIRED. DURING THE COURSE OF CONSTRUCTION IT SHALL BE THE OBLIGATION AND RESPONSIBILITY OF THE PERMITTEE TO ADDRESS ANY NEW CONDITIONS THAT MAY BE CREATED BY THE PERMITTEE'S ACTIVITIES AND TO PROVIDE ADDITIONAL FACILITIES THAT MAY BE NEEDED TO PROTECT ADJACENT PROPERTIES.

24. ALL DISTURBED SOILS MUST BE AMENDED PER STANDARD PLAN 142 AND SECTION 8-02 OF THE STANDARD SPECIFICATIONS UNLESS WITHIN ONE FOOT OF A CURB OR SIDEWALK, THREE FEET OF A UTILITY STRUCTURE (E.G. WATER METER, UTILITY POLE, HAND HOLE, ETC.), OR THE DRIPLINE OF AN EXISTING TREE.

25. ALL TRAFFIC CONTROL SHALL BE IN ACCORDANCE WITH THE CITY OF SEATTLE TRAFFIC CONTROL MANUAL FOR IN-STREET WORK. AN APPROVED TRAFFIC CONTROL PLAN WILL BE REQUIRED FOR ALL ARTERIAL STREETS PRIOR TO BEGINNING CONSTRUCTION.

26. PERMITTEE SHALL NOTIFY KING COUNTY METRO AT 684-2732 FOURTEEN DAYS IN ADVANCE OF ANY IMPACT TO TRANSIT OPERATIONS.

27. COORDINATE SIGN AND PAY STATION AND/OR PARKING METER HEAD REMOVAL AND INSTALLATION WITH SEATTLE DEPARTMENT OF TRANSPORTATION AT 684-5370. SIGNPOSTS ARE TO BE INSTALLED IN ACCORDANCE WITH STANDARD PLANS 616, 620, 621A, 621B, 625, & 626.

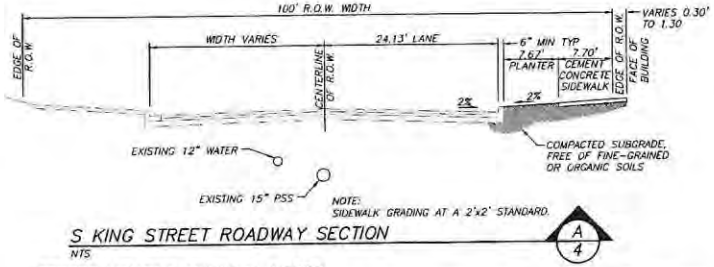
28. ALL STREET NAME SIGNS MUST BE INSTALLED BY SEATTLE DEPARTMENT OF TRANSPORTATION AT THE PERMITTEE'S EXPENSE.

29. ALL WORK PERFORMED BY SEATTLE CITY LIGHT, SEATTLE PUBLIC UTILITIES, AND OTHER UTILITIES TO REMOVE OR RELOCATE EXISTING UTILITIES SHALL BE DONE AT THE PERMITTEE'S EXPENSE.

30. PERMITTEE MUST CONTACT THE SEATTLE DEPARTMENT OF PARKS AND RECREATION TO APPLY FOR A SEPARATE PERMIT IF WORKING WITHIN A DESIGNATED PARK BOULEVARD.

31. CARE SHALL BE EXERCISED WHEN EXCAVATING OR REMOVING PAVEMENT NEAR EXISTING CHARGED WATER MAINS. CAST IRON WATER MAINS ARE KNOWN TO BE SENSITIVE TO EXCESSIVE VIBRATION. COORDINATE PROTECTIONS METHODS WITH SPU.

32. PERMITTEE SHALL CONTACT SEATTLE DEPARTMENT OF TRANSPORTATION, STREET USE INSPECTOR A MINIMUM OF 2 BUSINESS DAYS PRIOR TO PLANTING FOR INSPECTION OF STREET TREES AND LANDSCAPING.



S KING STREET ROADWAY SECTION (A/4)

NTS

STREET LIGHTING GENERAL NOTES:

1. ALL DISCONNECTIONS, TEMPORARY CONNECTIONS AND FINAL SERVICE CONNECTIONS WILL BE MADE BY SEATTLE CITY LIGHT (SCL) AT PROJECT'S EXPENSE.
2. CONTRACTOR SHALL COORDINATE WITH SCL FOR REMOVING FLOOD LIGHTS AND STREETLIGHTS FROM EXISTING POLES PRIOR TO POLE REMOVAL AND THE DELIVERY OF ALL THE SALVAGED STREETLIGHT RELATED MATERIALS TO SEATTLE CITY LIGHT SALVAGE YARD AT 4TH AVE SOUTH AND SOUTH SPOKANE ST.
3. CONTRACTOR SHALL MAINTAIN EXISTING STREET LIGHTING SYSTEM DURING CONSTRUCTION.
4. WORK SHALL BE SCHEDULED SUCH THAT NO TWO (2) ADJACENT OR OPPOSITE STREET LIGHTS ARE DISABLED AT ANY ONE TIME.
5. ANY EXCAVATION IN PROXIMITY TO AN EXISTING STREETLIGHT POLE MUST BE DONE WITHOUT UNDERMINING ITS STABILITY. CONTRACTOR IS RESPONSIBLE FOR TEMPORARY SUPPORT WHICH MAY BE REQUIRED TO STABILIZE THE POLE.
6. STREETLIGHT SYSTEM GROUNDING AND BONDING SHALL BE PER SEATTLE CITY LIGHT (SCL) CONSTRUCTION STANDARD 1710.50.
7. ALL WIRING, INCLUDING STREET LIGHTING, PEDESTRIAN LIGHTING AND FESTOON LIGHTING CIRCUITS SHALL BE CLEARLY LABELED PER SEATTLE CITY LIGHT (SCL) CONSTRUCTION STANDARD 1714.10.
8. EACH LUMINAIRE SHALL BE FUSED PER SEATTLE CITY LIGHT (SCL) CONSTRUCTION STANDARD 1730.00
9. CONTRACTOR SHALL CALL FOR AN INSPECTION OF THE STREET LIGHTING SYSTEM AT VARIOUS STAGES OF INSTALLATION/CONSTRUCTION OR AS INSTRUCTED BY THE SCL INSPECTOR.
10. FOR STREET LIGHTING INSPECTIONS CONTACT SCL ELECTRICAL REVIEWER PAJE CHASE 206-730-1076.
11. CONTRACTOR WILL ASSIST THE INSPECTOR DURING THE INSPECTION, COMMISSIONING, AND FINAL CONNECTION PHASES OF THE PROJECT AS INSTRUCTED BY THE INSPECTOR. SUCH ASSISTANCE WILL INCLUDE, BUT NOT BE LIMITED TO OPENING HANDHOLES, MANHOLES AND VARIOUS ACCESS COVERS, DISCONNECTING AND RECONNECTING FUSE HOLDERS AND MECHANICAL SPLICE CONNECTIONS, VERIFYING CONDUIT RUNS, ETC.
12. CONTRACTOR SHALL PROVIDE AN OPERATOR AND MAN LIFT TRUCK FOR USE DURING INSPECTION OF INSTALLED STREETLIGHT FACILITIES.
13. CONTRACTOR SHALL CORRECT ALL PUNCH LIST ITEMS AND CALL FOR A RE-INSPECTION WHERE REQUIRED BY THE INSPECTOR.
14. UPON COMPLETION OF WIRING THE STREETLIGHT SYSTEM, THE CONTRACTOR SHALL PREPARE A SIGNED AS-BUILT AND WIRING DIAGRAM. THE DIAGRAM SHALL INCLUDE WHICH DUCT IS USED IN EACH DUCT BANK. CONTRACTOR SHALL PROVIDE THE AS-BUILT TO SCL ELECTRICAL INSPECTOR PRIOR TO REQUESTING FINAL STREETLIGHT SERVICE CONNECTION.
15. COORDINATE ALL ENERGIZING AND DE-ENERGIZING OF STREET LIGHTING SERVICE WITH SCL ELECTRICAL SERVICE REPRESENTATIVE TEN (10) WORKING DAYS IN ADVANCE.

- HS-20 at S06 $ 55,990.00
- HS-15 at N23 Decks $ 38,296.00
- HS-18 at S06 & S07 $ 81,256.00

Finish Schedule:

- HS-08 – 12"x24"x1" – Preto Carvao Basalt – 50% Thermal 50% Adze Finish
- HS-09 – 4"x24"x1" – Preto Carvao Basalt – 50% Thermal 50% Adze Finish
- HS-15 – 24"x24"x1" – Preto Carvao Basalt – 50% Thermal 50% Adze Finish at S06 & S07
- HS-20 – 12"x12"x1" – Grigio Sal Granite – 50% Thermal 50% Adze Finish at East pedestrian walk
- HS-18 – Etic Pro Wood Pavers

Includes:

- Shop tickets for verification of dimensions and finishes
- Assembly drawings
- Digital images during fabrication
- QA/QC Reports
- Material samples for approval of color and finish
- Laticrete Platinum 254 thin set
- 2" mortar bed for atrium stone
- Stone anchors for vertical stone
- Pedestals for elevated paver application
- Stainproof Granite Sealer
- Parking for crew
- Layout of J&S Masonry installed items
- Removal of J&S Masonry generated debris to onsite dumpster provided by 255 S King Street
- Procurement of Yellow Mountain Stone materials from China including management of shipping and customs logistics
- HS-08 and HS-09 extend from the atrium through S0131 Hall to bathrooms S0130 and S0128.

General Exclusions:

- Layout of other trades work
- Breakaway bollards at southeast corner
- Overtime costs
- Shoring
- Engineering
- Caulking of masonry to dissimilar
- Substrates/structural fill/structural elements other than pedestals
- Fluid applied damp proofing
- Temp power and water
- Dumpsters
- Sculptural elements

Labor Rates:
J&S Masonry will perform corrective and/or additional work at the following billable rates for the duration of the project:

- Regular Time - $78.00 per hour
- Overtime - $103.00 per hour
- Double Time - $128.00 per hour

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   101 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;
  1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead
  2. Backup documentation is required for each item submitted for EQ credit 4
  3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner including "Trade Contractor Material Content Form"
  4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
  5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
  6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory
- Noise Reduction;
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
  4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise
- Historic Site;
  1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office trade contractor contact information sheet, subtier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 2 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade contractor to provide electronic copy of submittals

			Total	$382,860.00

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   32 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction;
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around equipment with the opening directed away from the sensitive receiving locations
  4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations idle rather than drag to minimize material handling noise
- Historic Site;
  1. Subcontractor is to comply with ordinance regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48)
- Before commencing work, subcontractor will go over schedule with superintendent, deliver to the office as insurance certificate, site specific safety plan and MSDS sheets
- Please invoice 253 S King St L.P. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 2 & 3 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Time sheets, material and equipment invoices to be included with monthly invoice
  Subcontractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Pollution liability insurance is not applicable
- Submittals must be bound in notebooks
- Subcontractor to provide 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

TRADE CONTRACT

THIS AGREEMENT was made and entered into this 27th of April, 2016, by and between:

255 South King Street LP
270 S Hanford St # 100
Seattle, WA 98134
TEL: 206-971-7899
FAX: 206-623-0338

the OWNER, and
Cochran, Inc.
2500 Aurora Ave N
PO Box 33524
Seattle, WA 98133
TEL: 206-637-1900
FAX: 206-368-3197

the TRADE CONTRACTOR

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

The Lump sum of: Eleven Million, Three Hundred and Seven Thousand, Six Hundred and Sixty Eight plus WA Sales Tax ($11,307,668).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project");

255 S King St Phase 1
Seattle, WA 98104

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified as the listed attached Exhibits (1, 2, 3, 4, 5), and in accordance with the drawings and specifications for the construction prepared by:

Freiheit & Ho Architects Construction Issue Set Dated 06/02/15 through ASI #12 dated 4/01/15
Freiheit & Ho Architects Project Manual Specifications Dated 05/12/15
DCI Engineers Construction Issue Set Dated 05/12/15
Degen & Degen Construction Issue Set Dated 05/12/15
Embassy Suites Brand Standards North America 07/2010
Exhibit 1 Construction Schedule 4/5/16
Exhibit 2 Trade Contractors Consent To Assignment And Lien Waiver
Exhibit 3 Wrap Up Insurance
Exhibit 4 Wrap Up Insurance Manual
Exhibit 5 ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. Scope of Work:

- Submittals & Drawings
- Building temporary lighting

- Power skids
- (2) Concrete placement boom power connections
- Spiderbox power
- Temporary lighting under scaffolding on King Street
- Temporary lighting
- Subcontractor basement shack buildouts

CSI Code 260500 Electrical — Total $2,399,022 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- 4000-amp hotel tower service (including SCL bus service)
- 4000-amp office tower service (including SCL bus service)
- 1200-amp retail service (including SCL bus service)
- 1200-amp roof switchboard
- Building metering system and integration
- Building grounding system and risers
- Transformers (15, 30, 45, 75, 150, and 500kVA)
- 208V & 480V Panels (including side-mount panelboards)
- 1600-amp busway riser for hotel
- Emergency and life safety power
- Optional stand-by power
- Fire pump emergency power connections
- Laundry rooms power, receptacles and mechanical connections
- Laundry room equipment connections
- Demarcation room power and receptacles
- Electrical, communications, and building system rooms power and receptacles
- Site, garage, and exterior power receptacles
- Parking control power and rough-in
- Atrium receptacles and mechanical connections
- Mechanical rooms power, receptacles, and connections
- Hotel bar power, receptacles, and mechanical connections
- Kitchen power, receptacles, and equipment connections
- Hotel unit POD power connections
- Hotel unit power, receptacles, and mechanical connections
- Ball room power, receptacles, and mechanical connections
- Fitness and health club power, receptacles, and mechanical connections
- Fitness and health club equipment power and data connections
- Public space bathroom power, receptacles, and mechanical connections
- N23 suite power, receptacles, and mechanical connections
- Elevator shaft and machine room equipment and power connections (including shunt trip breakers)
- Roof boiler room power and mechanical connections
- Roof chiller room power and mechanical connections

General Conditions:

- Office lease
- Tool and equipment rentals
- Overhead and mark-up
- Office supplies
- As-built drawings

CSI Code 263200 Generator, ATS, UPS, Fuel Tank — Total $14,568 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- 2MW Generator with fuel belly tank (includes move in and rigging)
- 4000-amp generator switchboard

- 75kVA UPS with maintenance bypass cabinet
- (2) 2000-amp ATS
- 1600-amp ATS
- Power connections for generator fuel system

CSI Code 265100 Lighting and Lighting Controls — Total $4,058,400 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- Exterior lighting and lighting controls (includes LED lighting programming)
- Hotel lighting and lighting controls (includes installation of hard wired fixtures)
- Garage lighting and lighting controls
- Lighting control panels with astronomical controls for exterior lighting
- Ball room lighting and lighting controls
- Site lighting and lighting control
- Shell & Core lighting in N01 and S01
- Submittals and O&Ms
- Owner's training for lighting controls

CSI Code 273100 Teledata — Total $1,154,659 + W.S.S.T.

Scope of Work:

- Submittals & Drawings

Telecommunications system with horizontal cabling comprised of Uniprise Connectivity and PLENUM Cabling solution along with a fully functional RG6 and P3 500 Based CATELEVISION System. Details of the solution are:

- (4) 1RG6 television floor locations
- (27) 2D locations
- (12) 2D room phone locations
- (4) 4D locations

Seventh floor

- (3) 1D locations
- (14) 1D WAP locations
- (7) 1D wall phone locations
- (22) 1RG6 television locations
- (8) 1RG6 television floor locations
- (8) 2D locations
- (1) 2D POS location
- (13) 2D room phone locations

Eighth floor

- (9) 1D WAP locations
- (2) 1D wall phone locations
- (22) 1RG6 television locations
- (9) 1RG6 television floor locations
- (16) 2D locations
- (13) 2D room phone locations

Ninth through seventeenth floors
- (9 per floor) 1D WAP locations
- (2 per floor) 1D wall phone locations
- (22 per floor) 1RG6 television locations
- (15 per floor) 2D locations
- (14 per floor) 2D room phone locations

Eighteenth floor
- (9) 1D WAP locations
- (2) 1D wall phone locations
- (22) 1RG6 television locations
- (15) 2D locations
- (14) 2D room phone locations

Nineteenth through twenty second floors
- (9 per floor) 1D WAP locations
- (2 per floor) 1D wall phone locations
- (22 per floor) 1RG6 television locations
- (15 per floor) 2D locations
- (14 per floor) 2D room phone locations

Twenty third floor
- (6) 1D WAP locations
- (2) 1D wall phone locations
- (15) 1RG6 television locations
- (6) 2D locations
- (10) 2D room phone locations

Roof
- (1) 2D elevator connection

General
- All cabling to route to IDF shown on T7.02 for termination onto Category 6 patch panels
- Terminate, label, and test all telecommunications cabling according to EIA/TIA/ANSI and industry specifications.
- Provide full test results and as-built drawings at completion of project (CAD background must be provided to Cochran).
- Pathway rough-in
- Pathway stub ups above accessible ceilings
- Pathway risers and sleeves
- Cable to be free-aired above ceilings

Backbone Cabling:

Provide and install data/voice backbone cabling with a central termination point of the Computer/Tech room (N0029) to consist of the following:
- (1) 12-Strand MM
- (1) 50-Pair ARMM cables to each for the Hotel IDF shown on T7.02
- (1) P3 500 JCAP Coax terminating in each IDF, and then continuing on to the next IDF for CATELEVISION distribution
- All fiber to terminate with LC Connectors then plugged into dedicated LC Multi-Mode or Single Mode coupler panels
- Each IDF to receive (1) 1U LIU and Computer/Tech room to receive (2) 4U LIU's
- All copper to terminate on 300-Pair Cross Connect 110 blocks along with all necessary wiring troughs and backboards to facilitate proper routing of cables

IDF and Computer/Tech Room Buildouts
- Provide and install 18"x2" Basket Tray in each IDF as shown on the details on sheet T3.02
- Provide and install 24" ladder rack along the vertical chases (where applicable) and securer to floor and wall
- Provide and install (2) 7FT Equipment Cabinets and (3) 7FT Racks along with Vertical Wire Management in the computer/tech room as shown on T3.01
- Provide and install (4) 7FT Racks along with Vertical Wire Management in the demarcation rooms as shown on T3.01.
- Secure racks to floor via concrete anchor kits and bolt to overhead ladder racking using appropriate hardware
- Provide and install (1) 7FT Equipment cabinets in each of the IDF's
- Secure all racks to the floor via concrete anchor kits and bolt to overhead ladder racking
- Provide and install up to eight (8) Category 6 patch panels along with horizontal wire management in each of the IDF cabinets as shown on T3.01

CSI Code 274100 Audio Visual — **Total $1,731,081 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Public area televisions and mounting
- N23 televisions and installation
- Hotel speaker system
- Public area event displays
- S06 AV closet
- S06 exterior speakers
- S06 ballrooms projectors and screens (northeast projector to be cart mounted on floor)
- S07 pool speakers
- S07 cardio and fitness area speaker system
- AV closet headend
- Coordination with Hilton project manager.
- Submit and obtain all required permits.
- Pathway rough-in
- Pathways stub up into accessible ceilings
- N23 suite sound systems

CSI Code 275300 Distributed Antenna System — **Total $564,445 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Life safety DAS design and installation
- Cellular DAS design and installation
- Riser conduit pathways
- Emergency power connections
- Equipment and programming

Horizontal Cabling

- (40) Antennas
- (25) Splitters
- (4) Remote Units
- Coax cabling to each antenna
- Fiber to each remote unit
- (1) Head End
- (1) Donor Antenna
- Terminate, label and test all telecommunications cabling according to EIA/TIA/ANSI and industry specifications

Backbone Cabling

- Provide and install 6-Strands Single Mode fiber from the Head End to each Remote Unit. Fusion splice on each side to SC/APC pigtails and land in a 2RU LIU in the head end and in a wall mount housing at each remote unit
- Label and test all telecommunications cabling according to EIA/TIA/ANSI and industry specifications. Provide full test results and as-built drawings at the completion of the project (CAD background must be provided to Cochran)

Head End Buildout

- Install previously mentioned LIU's and fiber patch cords. "One to one" fiber Patch Cords per Remote Unit.
- Antenna Mounts for all antennas
- All fiber optic cable, LIU's and fiber patch cords

CSI Code 281300 Security — **Total $353,150 + W.S.S.T.**

Scope of Work:

- One-Year Warranty from substantial completion on workmanship, manufacturer's warranty applies to Cochran supplied material
- Permit and Inspection

Access Control Management Systems (ACMS)

- Software licensing for (1) Lenel OnGuard PCS-ADV base server software
- Software licensing for PCC-ADV client software licenses with server and workstation turn-key from Lenel

- Security Network and computer hardware, includes one database server and one client workstation.
- Security Local Area Network (telecommunications outlets required for security equipment)
- (500) blank proximity badges
- Over cabling to the wall outlets
- Access Control Management Systems (ACMS) Controllers
- Connection of field devices to the Lenel OnGuard system
- Hoffman Enclosures with supporting 12/24v power supply
- Lenel OnGuard Major System Components: LNL-1320, LNL-1100, LNL-1200, LNL-1300, LNL-2220 and LNL-3300
- IC (intelligent controller) - LNL-3300 with an onboard Ethernet adapter
- Lenel OnGuard CTX-6 enclosure with integral 12V power supply
- All power supplies will have 12V-7AH battery backup for short term outages
- Access Control Management Systems (ACMS) door control panels & field devices
- Cable all controlled doors with a card reader or a monitored door with local sounder to nearest main equipment enclosure and connect to Lenel Dual Reader Interface (DRI) boards as required to meet the intent of the portal.
- Other card reader controlled doors such as gate entry/exit will be cabled as needed for the device purpose to the Lenel head-end equipment modules.
- Field devices for the ACMS (card readers, request to exit devices, door position status switches, lock connections and cabling)

Video Management System (VMS) - Cameras

- Lenel OnGuard licensing
- Video channel licensing per camera designed
- Lenel digital video enabler software
- Video appliance servers (VAS)

Security Camera System (SCS) Cameras

- Interior Dome IP Camera, Axis P33xx series, Sony DH-240
- Exterior IP PTZ Camera, Axis Q6035E or equal
- Camera channel license, LNL-SWR-CH1
- Appropriate housings, mounting arms and accessories
- CAT6 Cabling as required
- Coaxial cabling with appropriate IP as required

Security Intercom System (SIS)

- Stentofon XE1
- Wall mount intercom in an industry standard and society recognizable stainless steel enclosure

CSI Code 282600 Area of Refuge, Two Way Communications **Total $530,012 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Jeron Series 480 AOR system.
- CAT5 wiring between stations.
- Conduit Pathway in exposed areas.
- Free Air cable in concealed areas.
- Stations to be at each elevator lobby one or more floors above or below story of exit discharge
- Stairwell re-entry communication system located at every landing
- The master station located at fire command center room S0121 (or as designated by the Seattle Fire Department)

CSI Code 283100 Fire Alarm **Total $370,846 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Shunt trip control of elevator
- TrueSTARTII tool
- Startup and testing without control panel
- Address, circuit integrity, and equipment functions verification
- Conduit pathway in exposed areas.
- Free air cable in concealed areas.

Control Panels:

- Networked fire alarm control panels in Fire Command Center (S0121), Hotel Electrical Room (N0046) and Commercial Tower Electrical Room (S0112).
- Fire command center to have a 4100ES voice evacuation fire alarm system
- Addressable IDNet detection and control
- Addressable IDNAC visible notification power supplies UUKL listed for Smoke Control
- Voice evacuation panel with selectable speaker control
- Digital amplifiers with backup
- Voice evacuation panel with selectable speaker control
- 100W digital amplifiers with backup
- Integrated DACT
- Class A NAC circuits
- Remote fire alarm annunciator
- Hotel PBX office
- Fire alarm transponders (FAT) to provide distributed wiring location to be determined
- Addressable IDNet detection and control
- Addressable IDNAC visible notification power supplies
- Digital amplifiers with backup
- Visible notification power supplies
- Approved HOA switches
- Sprinkler Water Tank Annunciation Panels
- One graphic panel at Fire Command Center
- One graphic panel in fire sprinkler pump room

Initiating Devices:

- Manual pull stations at the fire alarm control panel and hotel reception desk.
- Smoke sensors at elevator landings and machine rooms, within 5' of each exit to the pressurized stairwells, within 5' of each wall mount smoke fire damper, R-1 interior guestroom corridors, and R-1 guestrooms with CO and non-520 Hz sounder base
- Heat sensors at the transformer vault, elevator motors, duct smoke sensors, air handling units over 2000 CFM, elevator and stairwell pressurization fans (two units per fan), within 5' of each inline smoke fire damper, and at all sprinkler switches.
- Supervised IAM at each floor control valve, the garage dry sprinkler system, and building main riser assembly
- Fire pump room monitoring
- Kitchen hood monitoring

Isolation modules:

- IDnet isolation modules in electrical room on each floor
- IDNAC isolation modules in control panels on each floor

Mechanical Interface Devices:

- Duct smoke sensors at air handling units over 2000 CFM and at each pressurization fans (two units per fan)
- Pressurization and smoke exhaust fan control and required monitoring
- Three outputs at each pressurization and smoke exhaust fan for VFD control
- Smoke Control Equipment per device control
- Power monitoring at each smoke control device
- Positive feedback monitoring at each smoke control device
- Status monitoring for each smoke control device
- 120VAC Power monitoring for required smoke control equipment
- Pressurization fan control
- Addressable relay for smoke exhaust damper control at each floor
- Stairwell door unlock
- Addressable FSD control relay per stairwell

Notification Devices:

- Digital 2-Channel Voice Evacuation system
- Notification speaker circuit at each floor
- Visual notification in public and common areas and driving lanes of the parking garage (combination audio/visual where appropriate)
- Fire Alarm Terminal Cabinets (one per floor)

CSI Code 328400 Irrigation — Total $2,618 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- 120 V power connections to irrigation equipment

CSI Code 337100 Electrical Utility — Total ($34,815) + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- SCL vault general purpose power and lighting
- Service busway from SCL vault to electrical switch room
- Sleeves as required by SCL
- Grounding as required by SCL
- SCL primary feeder conduits
- SCL electrical inspections

CSI Code 338200 Telecom Utility — Total $26,734 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- Telecoms pathway from exterior vaults to basement demarcation rooms
- Pathway risers and sleeves
- J-boxes in basement for incoming telecoms vaults

Specific Exclusions:

- All changes to design after 5/16/15
- Changes to general conditions incurred from changes to the construction schedule dated 2/18/15
- Performance and payment bonds
- Pool and hot tub chemical room equipment and programming
- ADA pool lift power and equipment connections
- Pool mechanical equipment and programming provided by others
- Water feature mechanical equipment and programming for fountains
- Water feature pump room equipment and programming for fountains
- Water feature lighting, lighting controls equipment, and programming
- Temporary power conex removal
- Crane equipment and programming
- Manlift equipment and programming
- Concrete placement boom equipment
- POD equipment fixtures and devices installation
- POD placement
- Mechanical equipment and programming
- Fire Pump equipment and programming
- Atrium mesh screen automation, design and install
- Elevator equipment and programming
- FF&E casework
- Hotel unit and ballroom shade power
- Laundry equipment and programming
- Kitchen equipment
- Parking control system, equipment, and programming
- Fitness equipment and programming
- Server rack power strips
- Housekeeping pads
- Concrete encasement
- Blockouts and curbs for housekeeping pads

- DOT work
- Equipment and material expediting
- Tenant improvements at N01, S01, S08-S18
- Door release buttons and intercoms in the atrium
- Furniture, fixtures, and equipment
- Roof penetrations and patching
- Painting and patching of existing surfaces
- Painting of exposed conduits
- Signage and placards (interior digital signage is included)
- All utility fees & monthly charges
- Dumpster & disposal fees
- Overtime & shift work starting after 5/01/16
- Engineering
- ASI changes after 5/16/15
- Flaggers
- Deliveries after normal working hours
- Shutdowns and startups after normal working hours
- Street use permits
- Hotel unit access panels procurement and installation
- Two-hour rated shaft for survivability circuits
- Demolition
- Line and low voltage control wiring for mechanical equipment
- Line and low voltage conduit and boxes
- DDC control system
- Building management system (BMS)
- Furnish of variable frequency drives (installation is included)
- Smoke control system
- Bathroom hand dryers
- Unit heaters
- CO detection during construction
- Heat trace (120V connection included)
- Starters for OW-WAC equipment
- Generator mechanical exhaust install
- Generator remote radiator install
- Generator fuel system equipment and programming
- Site trenching, backfill, and concrete bases
- Ballroom and pre-function chandeliers installation
- SCL pole lighting base installation
- Field end patch cords (except for wireless) to be owner provided and owner installed (Cochran to provide head end patch cords only)
- Cross connection to voice wall fields in IDF's
- Emergency or ARA signage
- Network switch equipment, servers, WAPs, UPS systems, rack mount power, all other active network/server room equipment, OFOI
- Site investigation
- Doors and door hardware (including electrified hardware)
- Offsite monitoring service for security, telephone, cellular and other services such as Cable TV or Satellite
- Troubleshooting or service on customer owned Wi-Fi devices including table computers, laptop computers, and cellular smartphones.
- Servicing client networks, devices, servers, workstations, operating systems, and applications not supplied by ITN.
- Incidents or requests from facilities not listed in the above-mentioned document.
- Connection speed guarantees
- Connection consistency unless related back to hardware failure.
- Service disruptions due to physical change of environment.
- INNCOM system, programming, and integration
- Saflock system, power, programming, and integration and power connections

- Point of sale systems
- GPON system
- Construction site Wi-Fi
- Hotel or owner provided audio/visual systems
- Ballroom operable window shade integration
- TI space tower speaker and audio/visual systems
- TI space audio/visual systems
- Category 6A (Cat 6a) cable upgrade
- Level N23 audio/visual changes
- Life safety DAS cross connection to building/service provider services
- Cellular DAS design & installation
- Paging system
- ADA operators, push plate actuators, pedestals for mounting ADA actuators and accessory devices such as card readers
- Elevator floor tracking in office tower
- Elevator control, tracking, and card readers in hotel controlled elevator cars
- Custom electric lock and power transfer hinge cable harness (Electrolynx or eq.)
- Door preparation for hardware
- Lock core coordination and installation
- Signage for security related equipment
- Office furniture, lockable cabinets, and other casework/furnishings
- Security badging printer and photo capture equipment
- Electrified door hardware, installation and procurement
- Integration to parking entry system (Amano McGann)
- Integration to hospitality lock and access control solution software, single badge interface for hotel guests core and shell tenants, owner
- Egress plan study
- Monitoring service
- Additional or failover servers for camera expansion or disaster recovery
- Hospitality lockset hardware, installation, and software
- Separate video surveillance system for hotel or other tenants
- SIS paging speakers, amplifiers, and adapters
- Area of refuge signage
- Fireman's phones
- Smoke damper end switches
- Sail switches
- All sprinkler switches
- Elevator carrier cable
- Stairwell door lock power and door holders
- Laundry chute devices and monitoring
- Egress door monitoring
- Phase-2 VESDA system
- Changes due to final door submittals
- Irrigation equipment and programming
- Low voltage transformers for irrigation equipment
- Low voltage cabling and wiring for irrigation equipment
- Underground exterior pathway for irrigation equipment
- Utility vaults
- Excavation & trenching
- Plating & shoring
- Backfill & compaction
- Patching of existing surfaces, concrete, asphalt, & curbing
- Saw cutting, concrete coring, scanning, & x-rays
- Dewatering
- Sheet pile cutting
- SCL cabling
- SCL transformer and vista vault buildouts

- SCL street lighting power to be supplied by others
- Telecoms vaults
- Utility street crossing
- Plywood backboards
- Telecom service cabling into building demarcation rooms
- Telecom service cabling into future TI spaces
- Service provider coordination
- Utility Street Crossing
- Design changes after 05/16/15

Craft Labor Rates through Feb 5, 2017

	Normal Rate	OT Rate	DT Rate
General Foreman	$94.62	$130.77	$166.94
Foreman	$88.48	$121.64	$154.80
Journeyman	$82.34	$112.48	$142.62
Apprentice	$71.69	$97.31	$122.92

Craft Labor Rates after Feb 5, 2017

	Normal Rate	OT Rate	DT Rate
General Foreman	$96.86	$133.01	$169.18
Foreman	$90.72	$123.88	$157.04
Journeyman	$84.58	$114.72	$144.86
Apprentice	$73.93	$99.55	$125.16

Other Hourly Rates

	Rate
Project Executive	$126.00
Project Manager	$106.40
Project Engineer	$65.00
Chief Estimator	$110.00
Estimator	$75.00
Safety Manager	$68.00
General Superintendent	$111.00
Project Assistant	$60.00
Purchasing	$69.00
CAD Lead Designer	$82.95
CAD Operator	$77.20
Warehouse Manager	$82.95
Warehouse Supervisor	$77.20
Warehouse Delivery Driver	$67.21
Gerber Engineering	$200.00

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

460 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;
    1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead
    2. Backup documentation is required for each item submitted for EQ credit 4
    3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner including "Trade Contractor Material Content Form"
    4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
    5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
    6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory
- Noise Reduction;
    1. All equipment and especially mufflers are to be maintained in good working order
    2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
    3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
    4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
    5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise
- Historic Site;
    1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48)
- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office trade contractor contact information sheet, subtier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on pages 2-10 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade contractor to provide submittals bound in notebooks and an electronic copy
- Trade contractor to provide a complete BIM model, 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

SODO Builders marked-up Enlarged hardscape plan, level S06
Exhibit 1 Construction Schedule
Exhibit 2 Trade Contractors Consent to Assignment and Lien Waiver
Exhibit 3 Wrap Up Insurance
Exhibit 4 Wrap Up Insurance Manual
Exhibit 5 ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

CSI Code 320100 Street Restoration, Fountain, and Landscape Walls **Total = $122,719.00 + W.S.S.T.**

SCOPE OF WORK

Landscape Walls:

- Planter walls at Level 1
- Planter walls at Level 6 (south)
- Curbs at Level 6 (south)
- Curbs at Level 7 (south)
- All concrete for this work includes the hycrete additive
- Formsavers included per SODO Builders' Marked-up Enlarged hardscape plan, level S06

GENERAL INCLUSIONS

General Conditions:

- All supervision for this project
- On site office
- Drinking water for ABI employees
- Site specific safety and fall protection plans
- Supervision and project management for the shell portion
- Lockable storage for all ABI equipment and tools
- ABI participates with 255 S King St LP on an overall project safety plan. Provisions can be made to leave behind floor coverings or handrails if directed to include these costs in a change order request

Cast in Place Concrete walls and curbs:

- Layout of all walls.
- Supply of embedded steel plates is not included. Installation of embedded items is included.
- Concrete supply
- Furnish and install reinforcing steel-see below.
- Concrete pumping as required.
- All form materials and related hardware.
- All labor to form, pour and strip cast in place concrete walls.
- Patch tie holes where waterproofing of the exterior surface is required.

Reinforcing Steel:

- All labor to place mild steel.
- All reinforcing steel supports and chairs for walls and curbs.
- Mill certifications per direction from Structural engineer.
- Unloading of materials at site or pre-fab yard.
- Disposal of surplus steel from the site.

SPECIFIC EXCLUSIONS

- Shoring of concrete walls for backfill activities
- All waterproofing, waterstops, protection membranes or caulking.
- All construction / saw cut joint material and sealants.
- All pipe and conduit slab penetrations / sleeves and associate sealants
- Grouting of steel base plates
- Grating and miscellaneous metals
- Supply and shop drawings for embedded items NOTE: ABI will place embeds from approved shop drawings
- Allowance for follow-on concrete crack repair
- Colored, stained, waterproofed, hardened, polished or sandblasted concrete. NOTE: Hycrete additive (with warranty) is included
- Street use permits
- Precast concrete
- All concrete walls/curbs outside of contract scope ~~the building lines~~

GENERAL EXCLUSIONS

- Unsuitable bearing material removal and fill. ABI will provide CDF material and placement on a time and material basis if requested by 255 S King St LP.
- Surface water removal, except as noted under General Inclusions
- Foundation and under slab drainage or capillary break materials and labor
- Vapor barriers, waterproofing or damp proofing, hydrophillic or PVC waterstop
- Final cleaning or sealing of concrete slabs on grade, walls, columns, elevated decks or topping slabs, including but not limited to any dust seals, surface seals, hardeners, shake on products, etc., unless included in General Inclusions
- All work related to caulking of vertical and horizontal control or contraction joints. Saw cutting is included.
- Fine tuning of footings, walls, slabs, elevated decks, etc. for waterproofing requirements. ABI will not provide "mirror smooth" finish for application of water or damp proofing. See sack and patch below
- All division 5 metals, anchor bolts, hold-downs, and miscellaneous embedded items supplied ~~or installed~~, unless noted otherwise in specific inclusions.
- ~~Electrical duct bank encasement or added reinforcing for PT decks per engineer requirements, including any concrete related to vertical encasement of risers, etc.~~
- Permits including Street permits required by City

- Site work such as curb and gutter, sidewalks, elevator infills, retaining walls, or other structures not shown on the structural drawings. Any structures such as retaining walls, seat walls, water detention tanks, etc. can be done on a time and material basis if requested by 255 S King St LP
- Perimeter insulation at walls or SOG unless specifically requested
- Perimeter and fall protection, except for ABI employees at areas of their operations, including but not limited to OSHA railings, opening covers, column isolation covers. Maintenance of safety barriers after ABI leave the immediate area
- ~~Performance/payment bonds. If required, the costs will be identified and are to be paid by Contractor/Owner.~~
- Insurance for third parties
- Sack and patch of walls, columns, beams and ceilings. ABI will repair deficiencies in their work only. Deficiencies are defined as rock pockets, bug holes larger than ¾" and step offs greater than ⅛". Proposal is based on an as cast "off the form" finish. ABI will remove fins and laitance from walls and columns. ABI will break off snap ties and patch exterior walls where waterproofing is to be installed. Class A, B, or any other finishes are available on a T&M basis or may be included in the General Inclusions

QUALIFICATIONS

- All formwork penetrations installed by others are to be set to proper elevations and locations by others. ABI does work with the mechanical trades for installation of pipe sleeves in exterior walls, if the mechanical subcontractor is not on site but has provided location drawings and materials, ABI will install the required sleeves to accommodate the schedule
- Due to normal drying shrinkage, an inherent characteristic of all concrete and regardless of the engineer's design and ABI's workmanship, some incidental narrow cracks, which will in no way interfere with the normal operation of the floor or structure, are unfortunately almost inevitable
- Suitable temporary roads and access ramps to be provided and maintained by others
- Standard time of work shall be Monday through Friday, 40 hours per week, coordinated with regular seasonal job starting time. However, typical seasonal overtime is included
- Mechanical and electrical representatives must be present during each pouring operation
- Sanitary facilities shall be provided by others
- Dust control shall be provided by others
- Hazardous waste disposal shall be provided by others
- Adequate electrical power, current, outlets and maintenance will be provided by others
- Temporary power for job shack(s) shall be provided by others
- Adequate water source, pressure and maintenance at location central to concrete operations

2015 – 2016 HOURLY RATES

Work done on a time and material basis will be completed at the following rates

	Straight Time	Straight Time w/Fee	Overtime	Overtime w/ Fee	Premium Time	Premium Time w/Fee
Supt / PM	$92.00	$105.80				
Field Superintendent	$81.00	$93.15	$115.50	$132.83	$34.50	$39.68
Carpenter Foreman	$73.00	$83.95	$101.50	$116.73	$28.50	$32.78
Carpenter	$68.00	$77.50	$97.00	$111.55	$34.00	$39.10
Laborer Foreman	$61.00	$70.15	$84.50	$97.18	$23.50	$27.03
Laborer / PE	$57.00	$65.55	$81.00	$93.15	$24.00	$27.60
Mason Foreman	$73.00	$84.53	$102.50	$117.88	$29.50	$33.35
Mason	$67.00	$77.63	$95.00	$109.25	$27.50	$31.63
Ironworker Supt.	$103.75	$114.13	$134.50	$147.95	$30.75	$35.36

Ironworker Foreman	$99.00	$108.90	$128.25	$141.08	$29.25	$33.64
Ironworker	$96.00	$105.60	$124.50	$136.95	$28.50	$32.78

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   45 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;
  1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead
  2. Backup documentation is required for each item submitted for EQ credit 4
  3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner including "Trade Contractor Material Content Form"
  4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
  5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
  6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory
- Noise Reduction;
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
  4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise
- Historic Site;
  1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office trade contractor contact information sheet, subtier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 2 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite

- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade contractor to provide submittals bound in notebooks and an electronic copy

TRADE CONTRACT

THIS AGREEMENT was made and entered into this 31st of March, 2016, by and between:

255 South King Street LP
270 S Hanford St # 100
Seattle, WA 98134
TEL: 206-971-7899
FAX: 206-623-0338

the OWNER, and

Salinas Construction, Inc.
7804 40th Ave NW
Mukilteo, WA 98275
TEL: 425-745-6048
FAX: 425-743-4610

the TRADE CONTRACTOR

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

Time and Material (based on Unit Pricing) Not to Exceed amount written out under Trade Contract: Four Hundred Twenty Five Thousand Two Hundred Twenty Seven and 72/100 Dollars plus WA Sales Tax ($425,227.72 + WSST).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project");

255 S King St Phase 1
Seattle, WA 98104

For

255 South King Street LP

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified as the listed attached Exhibits (1, 2, 3, 4, 5), and in accordance with the drawings and specifications for the construction as follows:

Primary Documents:

Civil Engineering Drawings Prepared by DR Strong:

- C1.0 General Notes (Dated 9/22/15)
- C2.0 LPCSC Plan (Dated 9/22/15)
- C2.1 LPCSC Plan Notes and Details (Dated 9/22/15)
- C3.0 Grading Plan (Dated 9/22/15)
- C3.1 Site Cross Sections (Dated 9/22/15)
- C4.0 Composition Utility Plan (Dated 6/27/14)
- C4.1 Utility Details (Dated 9/22/15)
- C4.1 Utility Details (Dated 9/22/15)
- DW1.0 Dewatering Plan (Dated 5/12/15)

ALTA Survey Drawings Prepared by DR Strong – 2 Sheets (Dated 2/5/14)
SDOT 90% Complete Street Improvement Plan (Dated 03/21/17) Sheets 1-4
Freiheit & Ho Architects Bulletin Set Dated 05/31/16 Through ASI's (Dated 03/06/17)
Landscape & Irrigation Drawings Prepared by Integrated Site Design (Dated 9/22/15)
Site Phasing Plan – Prepared by Sodo Builders (Dated 02/20/17) Sheets 1-2
PlanSwift – Base Pave Area and Site Plan Prepared by Salinas Construction (2/27/17) Sheets 1-2

Other Documents

Freiheit & Ho Architects Project Manual Specifications Dated 09/22/15
DCI Engineers Bulletin Set Dated 05/31/16 Through ASI's Dated 01/09/17
Exhibit 1 Phasing Plan
Exhibit 2 Trade Contractors Consent to Assignment and Lien Waiver
Exhibit 3 Wrap Up Insurance
Exhibit 4 Wrap Up Insurance Manual
Exhibit 5 ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, materials, labor, supplies, attachments, equipment, plant sundries and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with City of Seattle Specifications and Plans. All work as specified in section(s) including but not limited to:

			TOTAL:	366,340.82

CSI Code 321600 Curbs & Gutter T&M NTE $58,886.90 + WSST

Scope - Curbs	Qty.	Unit	Unit Price	Total Price
Cement Concrete Rolled Curb	590	lf	40.19	23,712.10
Cement Concrete Curb - COS Std Plan 410B (In lieu of C)	728	lf	40.35	29,374.80
Concrete Curb Ramp - COS 422A	2	ea	2,900.00	5,800.00
			TOTAL:	58,886.90

3.1 Scope Clarifications & Qualifications:

3.1.1. Unit Prices are based on provisional (estimated) quantities. Actual quantities will be verified in the field and paid at the Unit Prices listed in the tables above.

3.1.1.1. Unit Prices include standard specified concrete. Any premium for accelerated mixes will be charged at additional cost plus 20%.

3.1.1.2. Unit prices exclude demolition, removal, grade preparation, excavation and compaction

3.1.2. An 18" sonotube, installed by others, will be utilized for all bollards (any scanning necessary – by Owner)

3.1.3. Trade Contractor shall note removal and replacement of existing driveway on King Street

3.1.4. Trade Contractor shall note conduit (provided by others) to new light poles and potential impact to the Works

3.1.5. The Weller Street Bridge (East Side) must remain useable at all times. Phase pedestrian bridge closures to maintain access. Sodo and Trade Contractor shall devise a strategy for maintaining access to handicapped elevator.

3.1.6. The King Street sidewalk (south side of King Street) shall be completely replaced - preferably in one operation, but contingent upon weather. Trade Contractor shall replace the existing King Street curb in its entirety

3.1.7. Owner will arrange for an arborist to dress existing tree roots at King Street planter strips to facilitate the installation of new sidewalk.

3.1.8. Infill on top of structural slabs shall be Expanded Polystyrene Blocks installed by others. Trade Contract Works shall be formed over EPS blocks. The Trade Contract Sum excludes additional forming and placing over EPS blocks which, if required, will be provided on a Time & Material basis.

3.1.9. Trade Contractor shall collaborate with others at East Atrium Entry in order to establish accurate contours for EPS infill. Trade Contractor shall treat EPS as if it were traditional grading (+ / - 0.10)

3.1.10. Any additional costs for forming and placing the Works onto a concrete cap (if required) will be charged on a Time and Material basis.

3.1.11. Trade Contractor and Owner shall review permeable paving at the south side of building and how that relates to 6" slab (cap) directly below, if it all. Civil Engineer shall have final say.

3.1.12. Permeable Paving at South Side shall match existing elevations at existing parking lot interface.

3.1.13. Trade Contractor shall assist the Owner in submitting documents for approval. Trade Contractor will assist the Owner in coordinating sign-offs and inspections. Notwithstanding Section H, Trade Contractor is not responsible for securing and/or paying for permits, inspections, fees (including associated taxes) and the like. Trade Contractor is responsible for Washington State Sales Tax.

3.1.14. Footings and rebar for four (4) light poles, including as-builts and templates will be provided by others.

3.1.15. Trade Contractor note: Roadway base paving area ("replace in kind") is assumed to be 12" base paving and #5 dowels at 12" o.c. per City of Seattle specifications.

3.1.16. Trade Contractor is not responsible for investigating and familiarizing itself with other contracts and/or purchase orders executed by Owner. Trade Contractor shall coordinate with Owner if portions of the Work require isolation to protect it from damage by others. Owner will relieve Trade Contractor of damage liability resulting from Owner's direction to allow access to and through the Trade Contractor's Works.

3.1.17. Trade Contractor shall certify that submittals are in full compliance with Standard SDOT Specifications only. Materials quality shall meet City of Seattle Standards and Specifications only.

3.1.18. Trade Contractor shall commence and prosecute the Works as mutually agreed between Trade Contractor and Owner.

3.2. Exclusions.

The Trade Contract Sum Excludes:

3.2.1. Materials Testing

3.2.2. Waterproofing

3.2.3. Subsurface inspection and/or approval

3.2.4. The provision of trench drains, planter walls and unit pavers

3.2.5. Concrete pumping

3.2.6. Temporary access measures, night or weekend work hours

3.2.7. Any special finishes or colors (other than specifically included above)

3.2.8. Bond

3.2.9. Protection against vandalism or accidental damage

3.2.10. Survey & locates

3.2.11. Traffic control, flagging, barricading and permitting

4. To complete all work as described in Paragraph 3 within the Contract Time as follows: See Phasing Plan

4.1. The Trade Contract allows for up to six (6) mobilizations. Additional mobilizations will be charged at $1,500 each.

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals as required by the Trade Contract Documents.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction;
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations

4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise

Historic Site;

1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48

- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office Trade Contractor contact information sheet, sub-tier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on pages 2-3 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Time sheets, material and equipment invoices to be included with monthly invoice
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings while crews are on site.
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade Contractor to provide submittals bound in notebooks and an electronic copy

Bellevue, WA 98007
TEL: 425-453-8380
FAX: 425-453-8404

the TRADE CONTRACTOR

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

Time & Material Not To Exceed: Three Million, Three Hundred Forty Four Thousand, Six Hundred Fifty Dollars and Zero Cents plus WA Sales Tax ($3,344,650.00).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project");

255 S King St Construction
Seattle, WA 98104

For

255 South King Street LP

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified as the listed attached Exhibits (A, B, C, D, E), and in accordance with the drawings and specifications for the construction prepared by:

Freihelt & Ho Architects Building Permit Resubmittal #2 Preliminary Construction Issue Plans Dated 06/27/14
Freihelt & Ho Architects Project Manual Specifications Dated 06/27/14
DCI Engineers Building Permit Resubmittal #2 Preliminary Construction Issue Plans Dated 06/27/14
Exhibit A Construction Schedule
Exhibit B Subordination of Lien Rights
Exhibit C Wrap Up Insurance
Exhibit D Wrap Up Insurance Manual
Exhibit E ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

Install New Communication Vault	4	EA	$4,750.00	$19,000.00
			Total	$122,650.00

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   N/A

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction:
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
  4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise
- Historic Site;
  1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office an insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel.
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on pages 2 to 5 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment

- Time sheets, material and equipment invoices to be included with monthly invoice
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Pollution liability insurance is applicable
- Submittals must be bound in notebooks
- Trade contractor to provide 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

Cement Concrete Curb - COS Std Plan 410B (in lieu of C)	728	lf	40.35	29,374.80
Concrete Curb Ramp - COS 422A	2	ea	2,900.00	5,800.00
			TOTAL:	58,886.90

3.1 Scope Clarifications & Qualifications:

3.1.1. Unit Prices are based on provisional (estimated) quantities. Actual quantities will be verified in the field and paid at the Unit Prices listed in the tables above.

3.1.1.1. Unit Prices include standard specified concrete. Any premium for accelerated mixes will be charged at additional cost plus 20%.

3.1.1.2. Unit prices exclude demolition, removal, grade preparation, excavation and compaction

3.1.2. An 18" sonotube, installed by others, will be utilized for all bollards (any scanning necessary -- by Owner)

3.1.3. Trade Contractor shall note removal and replacement of existing driveway on King Street

3.1.4. Trade Contractor shall note conduit (provided by others) to new light poles and potential impact to the Works

3.1.5. The Weller Street Bridge (East Side) must remain useable at all times. Phase pedestrian bridge closures to maintain access. Sodo and Trade Contractor shall devise a strategy for maintaining access to handicapped elevator.

3.1.6. The King Street sidewalk (south side of King Street) shall be completely replaced - preferably in one operation, but contingent upon weather. Trade Contractor shall replace the existing King Street curb in its entirety

3.1.7. Owner will arrange for an arborist to dress existing tree roots at King Street planter strips to facilitate the installation of new sidewalk.

3.1.8. Infill on top of structural slabs shall be Expanded Polystyrene Blocks installed by others. Trade Contract Works shall be formed over EPS blocks. The Trade Contract Sum excludes additional forming and placing over EPS blocks which, if required, will be provided on a Time & Material basis.

3.1.9. Trade Contractor shall collaborate with others at East Atrium Entry in order to establish accurate contours for EPS infill. Trade Contractor shall treat EPS as if it were traditional grading (+/- 0.10)

3.1.10. Any additional costs for forming and placing the Works onto a concrete cap (if required) will be charged on a Time and Material basis.

3.1.11. Trade Contractor and Owner shall review permeable paving at the south side of building and how that relates to 6" slab (cap) directly below, if it all. Civil Engineer shall have final say.

3.1.12. Permeable Paving at South Side shall match existing elevations at existing parking lot interface.

3.1.13. Trade Contractor shall assist the Owner in submitting documents for approval. Trade Contractor will assist the Owner in coordinating sign-offs and inspections. Notwithstanding Section H, Trade Contractor is not responsible for securing and/or paying for permits, inspections, fees (including associated taxes) and the like. Trade Contractor is responsible for Washington State Sales Tax.

3.1.14. Footings and rebar for four (4) light poles, including as-builts and templates will be provided by others.

3.1.15. Trade Contractor note: Roadway base paving area ("replace in kind") is assumed to be 12" base paving and #5 dowels at 12" o.c. per City of Seattle specifications.

3.1.16. Trade Contractor is not responsible for investigating and familiarizing itself with other contracts and/or purchase orders executed by Owner. Trade Contractor shall coordinate with Owner if portions of the Work require isolation to protect it from damage by others. Owner will relieve Trade Contractor of damage liability resulting from Owner's direction to allow access to and through the Trade Contractor's Works.

3.1.17. Trade Contractor shall certify that submittals are in full compliance with Standard SDOT Specifications only. Materials quality shall meet City of Seattle Standards and Specifications only.

3.1.18. Trade Contractor shall commence and prosecute the Works as mutually agreed between Trade Contractor and Owner.

3.2. Exclusions.

The Trade Contract Sum Excludes:

3.2.1. Materials Testing

3.2.2. Waterproofing

3.2.3. Subsurface inspection and/or approval

3.2.4. The provision of trench drains, planter walls and unit pavers

3.2.5. Concrete pumping

3.2.6. Temporary access measures, night or weekend work hours

3.2.7. Any special finishes or colors (other than specifically included above)

3.2.8. Bond

3.2.9. Protection against vandalism or accidental damage

3.2.10. Survey & locates

3.2.11. Traffic control, flagging, barricading and permitting

4. To complete all work as described in Paragraph 3 within the Contract Time as follows: See Phasing Plan

4.1. The Trade Contract allows for up to six (6) mobilizations. Additional mobilizations will be charged at $1,500 each.

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals as required by the Trade Contract Documents.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction;
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations

4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise

Historic Site;

1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48

- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office Trade Contractor contact information sheet, sub-tier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on pages 2-3 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Time sheets, material and equipment invoices to be included with monthly invoice
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings while crews are on site.
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade Contractor to provide submittals bound in notebooks and an electronic copy

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

CSI Code 329100 – Planting Preparation **$413,622.00**

To provide all labor, materials, freight, equipment and the like as required to:

A. Supply and Install Specimen Trees, Plantings, Planters, Green Roofs, Rooftops and Vegetative Walls, including, but not limited to all required:

i. Drainage Material, Drain Mat, Termination Bars, Drain Standpipes and Covers, Filter Cloths
ii. Topsoil, Light Weight Soil and Soil Amendments
iii. Root Barriers
iv. Plant Material
v. Staking and Guying
vi. Mulch

In the following areas:

- Esplanade Trees – Row Plantings – Plaza Plantings **$159,870.00**
  - i. **ALLOW** for up to 10 no. 4' x 4' Cast Iron Tree Grates (Urban Accessories): **15,000.00**
  - ii. Moveable Planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): **$6,189.00**
- Interior Atrium **$18,625.00**
- 3rd & 6th Floor Roof Gardens: Green Roofs and Planters
  - i. Etera Green Roof 4.625" planting depth with 4.5" x 3.25" mill finish roof edge **$80,704.00**
  - ii. Moveable Planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): **$7,920.00**
  - iii. Provide 1" – 1 ½" River Rock as ballast on the roof surface to border green roof
    Provide Protection Board (Delta Drain) over roof membranes.
    Mobilize aggregate to both roof levels. Install, distribute, grade and wash aggregate.
    Clean up and remove all landscape debris **$6,388.00**
- 6th Floor Conference Court (Wedding Deck) including area where skylights have been removed
  - i. Plantings **$89,092.00**
  - ii. Moveable planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): **$27,629.00**
  - iii. See Alternate Deduct (D.1) for Work in This Area
  - iv. Trade Contractor requires 60 to 90-day notice to procure 6th Floor tree materials
- 7th Floor Recreation Court (Pool Deck) **$46,400.00**
  - i. Moveable Planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): **$13,240.00**

B. Include all Freight Charges **$2,000.00**

C. Trade Contractor has procured trees as detailed in Purchase Order #270 dated 1 March 2016 in the amount of ($59,435.00) Plus WSST (Level 1 and Level 6). This cost is deducted from the Trade Contract Sum detailed in Paragraph (A) above. Balance of deduction to be invoiced 12/2016

D. Provide drainboard as necessary at all locations except for Green Roofs. The installation of drainage board shall maintain the integrity of any waterproofing installed by others.

E. Provide Standpipe inserts to drains.

F. Tower Crane will not be available to Trade Contractor. Trade Contractor shall utilize the permanent freight elevators to deliver any material that can be so accommodated. Owner will coordinate and provide hoisting for materials that do not fit into the freight elevator.

G. Prior to the installation of Site Works (by others), Trade Contractor shall inspect and ensure that all relevant sleeves are installed correctly.

H. Green roofs shall be installed 2-3 months in advance of completion.

I. Trade Contractor shall clean each area and remove all generated debris at the direction of Sodo Builders.

J. EXCLUSIONS

- Do Not Provide South Rooftop landscaping and moveable planters (SEE ALTERNATE A7 BELOW)
- Do Not Provide Cable Anchors for Green Walls
  i. Trade Contractor is aware that the 3rd Floor Roof planters are 24" high. Trade Contractor shall assist in the coordination of planters and green wall cabling
- Do Not Provide cable stay eyebolts in concrete planters (provided by Concrete Contractor)

K. ALTERNATES: Trade Contractor requires 30-day notice prior to the exercise of any Alternate.

- Provide Tournesol Wilshire Collection Fiberglass Moveable Planters in lieu of Aluminum Powder Coat Planters

A1. Esplanade Moveable Polygon Planters:	ADD:	$8,354.00
A2. Third & Sixth Floor Moveable Planters	ADD:	$1,258.00
A3. Seventh Floor Moveable Planters	ADD:	$17,850.00
A4. South Rooftop Moveable Planters	ADD:	$8,722.00
A5. 6th Floor Wedding Deck Moveable Planters	ADD:	$25,621.00

- A.6 Provide Live Roof Maxx @ 8" soil depth (8.5" x 3.25" Roof Edge) at Third & Sixth Floor Roof Gardens in lieu of Etera Green Roof — ADD: $58,596.00
- A.7 Provide Landscaping to South Tower Rooftop
  i. Provide 21 no. Moveable Planters in Aluminum Powder Coat (6' x 2' x 2'): — ADD: $7,900.00 / ADD: $19,995.00
- D.1 Do Not Provide landscaping work at 6th floor Conference Court — DEDUCT: $89,092.00
- D.2 Do Not Provide Moveable Planters 21No. at 6th floor Conference Court — DEDUCT: $27,629.00
- D.3 Do Not Provide River Rock as shown on the 3rd and 6th Floor Roof Gardens. — DEDUCT: $6,388.00

CSI Code 328400 – Irrigation $89,240.00

To provide all labor, materials, freight, equipment and the like as required to:

L. Supply and Install Exterior Irrigation Systems at Street Level, 3rd Floor, 6th Floor and 7th Floor

M. Scope of Work for Irrigation extends to building envelope. Copper lines from inside building to envelope shall be provided by MacDonald Miller Facilities Solutions. Trade Contract shall coordinate with and "free-issue" the following materials to MacDonald Miller:

- At Ground Level:
  - i. 1 no. 1,5" Double Check Valve Assembly
- At Level 3:
  - i. 1 no. 1" Double Check Valve Assembly
  - ii. 1 no. 1" Master Valve
  - iii. 2 no. 1" Solenoid Valves
  - iv. 4 no. 1" Ball Valves
  - v. 4 no. 1" Unions
  - vi. 8 no. 1" Nipples
- At Level 7
  - i. 1 no. 1" Double Check Valve Assembly
  - ii. 1 no. 1" Master Valve
  - iii. 1 no. 1" Flow Sensor
  - iv. 5 no. 1" Solenoid Valves
  - v. 10 no. 1" Ball Valves
  - vi. 10 no. 1" Unions
  - vii. 20 no. Nipples

N. Scope of Work for Irrigation includes the provision of all required controllers. Cochran Electric shall provide power to controllers and conduit only between controllers and control valves / flow sensors. The Trade Contractor shall pull all necessary wiring through conduit provided by others.

O. Trade Contractor shall clean each area and remove all generated debris at the direction of Sodo Builders.

P. EXCLUSIONS:
- Do Not Provide irrigation to South Tower Level 18 and Roof (under Phase II contract)

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:
Not to Exceed 90 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Documents.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;

1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead

2. Backup documentation is required for each item submitted for EQ credit 4
3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner including "Trade Contractor Material Content Form"
4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory

- Noise Reduction;

1. All equipment and especially mufflers are to be maintained in good working order
2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise

- ~~Historic Site;~~

1. ~~Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48~~

- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office trade contractor contact information sheet, subtier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications

- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel

- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 1 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment

- ~~Time sheets, material and equipment invoices to be included in monthly invoice.~~

- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite

- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings

- Parking will not be provided by 255 S King St LP

- Pollution liability insurance is not applicable

- Trade contractor to provide submittals bound in notebooks and an electronic copy

- ~~Trade contractor to provide a complete BIM model, 2 hard copy sets and 1 electronic disk copy of as-builts of all completed work.~~

DocuSign Envelope ID: 81FD8420-0548-471D-BFDA-E94E7C1FF0D9

Trade Contract: MacDonald-Miller Facility Solutions, Inc.	Project Name: 255 S King St Phase 1
License Number: MACDOFS980RU	Contract Amount: $249,838.00 + W.S.S.T. CSI CODE 019100
Insurance Expiration Date: 12/31/15	$3,436.00 + W.S.S.T. CSI CODE 103100
Basis of Compensation: Lump Sum	$190,062.00 + W.S.S.T. CSI CODE 131100
Phone Number: 206-763-9400	$4,488.00 + W.S.S.T. CSI CODE 131200
Fax Number: 206-767-6773	$43,205.00 + W.S.S.T. CSI CODE 211300
Fax Number: 206-767-6773	$6,396,884.00 + W.S.S.T. CSI CODE 220500
	$10,583,974.00 + W.S.S.T. CSI CODE 230500
	$218,947.00 + W.S.S.T. CSI CODE 263200
	$30,342.00 + W.S.S.T. CSI CODE 328400
	Retainage Percentage: 5%
	Contract Time: 375 Working Days
	Schedule Attached: Yes [X] No [ ]

TRADE CONTRACT

THIS AGREEMENT was made and entered into this 5th of October, 2015, by and between:

MMFS 10/20/2015 Notes added, see page 12

255 South King Street LP
270 S Hanford St # 100
Seattle, WA 98134
TEL: 206-971-7899
FAX: 206-623-0338

the OWNER, and

MacDonald-Miller Facility Solutions, Inc.
PO Box 47983
7717 Detroit Ave SW
Seattle, WA 98106
TEL: 206-763-9400
FAX: 206-767-6773

the TRADE CONTRACTOR

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

The Lump sum of: seventeen million, seven hundred twenty one thousand, one hundred seventy six dollars and zero cents plus WA Sales Tax ($17,721,176.00).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project");

255 S King St Phase 1
Seattle. WA 98104

For

255 South King Street LP

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified as the listed attached Exhibits (A, B, C, D, E), and in accordance with the drawings and specifications for the construction prepared by:

Freiheit & Ho Architects Bid Issue Plans Dated 06/02/15 through ASI #22 Dated 08/27/15
Freiheit & Ho Architects Project Manual Specifications Dated 06/01/15
DCI Engineers Bid Issue Plans Dated 06/02/15
Embassy Suites Brand Standards North America 7/1/14
Exhibit A Construction Schedule
Exhibit B Subordination of Lien Rights
Exhibit C Wrap Up Insurance
Exhibit D Wrap Up Insurance Manual
Exhibit E ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

Mechanical Design Parameters:
See mechanical design standards on M0.06 in the 9/22/15 Macdonald-Miller Drawings.

CSI Code 019100 Commissioning of Plumbing & Mechanical Systems — **Total $249,838.00 + W.S.S.T**

CSI Code 103100 Fireplace — **Total $3,436.00 + W.S.ST**
Fireplace Venting
- Supply and installation of vent duct work at bar fireplace L1-North
- Installation of power vent fan (FOB)

CSI Code 131100 Pool & Hot Tub — **Total $190,062.00 + W.S.ST**
Pool Plumbing:
- Deck surface drains in pool area
- Laundry room connections, hose bib's, drinking fountain, eye wash station, pool shower area.
- Make-up water & natural gas piping for pool heating equipment (FBO)

Pool Mechanical:
- Gas-Fired Make-Up air unit
- Dehumidification Unit with heat re-claimer and related air distribution
- Venting of pool heating equipment (FBO)

CSI Code 131200 Fountain **Total $4,488.00 + W.S.ST**

Fountain Plumbing:

- Provide "finish" items at Water Feature pump rooms – supply water stub and backflow preventer

CSI Code 220500 Shell & Core Plumbing **Total $6,360,949.00 + W.S.ST**

Plumbing Overview:

Central Domestic Water Heating Plant Including:

- Condensing Domestic Water Boilers and Storage Tank(s)
- Pumps, Piping &Trim
- Control Zones including Re-circulation Pumps, Booster Heaters and Pumps

Domestic Water Booster pump(s)

Guestroom plumbing including:

- Domestic and SoVent waste/vent risers to serve the bathroom PODS
- Setting of the POD Toilets and connection of the POD plumbing
- Wet-bar skinks and plumbing connections

Amenity space plumbing including:

- Fixtures, Equipment and Piping
- Kitchen/Food service plumbing
- Grease waste

Roof/storm drain system to 5' outside the building

Natural gas piping system

Street Level Restaurant Plumbing with the following exceptions:

- Waste, vent and domestic water to the space for connection by future tenant
- Grease waste & Natural Gas Piping for connection by future tenant

Arcade Plumbing:

- Roof/storm drain system to 5' outside the building

Podium Parking Plumbing:

- Locker Room Plumbing at basement level
- Loading Dock/Recycle surface drainage system
- Parking level surface drainage system
- Hose Bibs/Wall Hydrants

Conference Center Plumbing:

- Amenity space/restroom plumbing fixtures
- Kitchen/Food service plumbing
- Grease waste & Natural gas piping

Fitness Club Plumbing:

- Fitness space plumbing fixtures and piping
- Dedicated Water Heating system

Plumbing for the Conference Center:

- Amenity space/restroom plumbing fixtures
- Kitchen/Food service plumbing
- Grease waste & Natural gas piping

Plumbing Equipment:

- (2) Service Elevator Pit Sump Pumps (P-SP-P101 & P102)
- (2) Duplex Sewage Ejector Pump (P-SE-P101A & P101B)
- (2) Triplex Domestic Water Booster Pumps (HN-BP-P101 & OS-BP-101)
- (3) Condensing Gas Water Heaters (HN-GWH-2401A, B & C)
- (7) Gas Water Heaters (P-GWH-P101A/B, OS-GWH-501A/B/C, OS-GWH-502A/B)
- (5) Electric Water Heaters (P-EWH-101,HN-EWH-201, 301, 1001 & 1701)
- (2) Hot Water Storage Tank (HN-HST-2401A, HN-HST-2402B)
- (1) Hydropneumatic Tank (HN-HPT-2401)
- (2) Hot-Water Pumps (HN-WHP-2401A,B)
- (10) HW Circulating Pumps (P-101,P-102,101,201,301,501,502,1000,1701,2401)
- (8) Expansion Tanks (2401, P-103, 501, 502, 101, 103, 201, P-EXT-P101)
- (2) Thermostatic Mixing & Mixing Valves (HN-TWV-2401 & P-MV-P101)
- (2) Domestic Water Sub-Meters (HN-WN-P101 & OS-WM-P101)

Plumbing Fixtures:

- (23) Wall-Hung Sensor Flush Valve Water Closets (WC-1)
- (20) ADA Wall-Hung Sensor Flush Valve Water Closets (WC-2)
- (9) Floor-Mount Tank-Type Water Closets (WC-3)
- (10) ADA Floor-Mount Tank-Type Water Closet (WC-4)
- (9) Wall-Hung Sensor Flush Valve Urinals (UR-1)
- (11) ADA Wall-Hung Sensor Flush Valve Urinals (UR-2)
- (27) Lavatories, Sensor Faucet & Soap Dispenser (L-1)
- (15) ADA Lavatories, Sensor Faucet & Soap Dispenser (L-2)
- (1) Lavatory, Sensor Faucet & Soap Dispenser (L-3)
- (1) Lavatories, Sensor Faucet & Soap Dispenser (L-5)
- (21) Lavatories, Sensor Faucet & Soap Dispenser (L-6)
- (2) Lavatories, Sensor Faucet & Soap Dispenser (L-7)
- (272) Stainless Steel Bar Sinks with Single Lever Faucets (BS-1)
- (10) ADA Stainless Steel Bar Sinks with Single Level Faucets (BS-2)
- (6) Janitor Sinks with Service Faucet, wall bracket and hose (JS-1)
- (2) Utility Sink with Faucets (US-1)
- (6) Fiber-Fab ADA Transfer Showers with Mixing Valves and Hand Spray (SH-1)
- (6) Fiber-Fab ADA Roll-In Showers with Mixing Valves and Hand Spray (SH-2)
- (2) Shower Mixing Valves and Shower Head (SH-4)
- (8) Shower Mixing Valves and Shower Head (SH-5)
- (10) Shower Mixing Valves and Shower Head (SH-6)
- (4) ADA double Height Drinking Fountains (DF-1)
- (1) ADA Height Drinking Fountain (DF-2)
- (5) Bathtubs and Faucets (BT-1)
- (1) Bathtub & Faucet (BT-2)
- (2) Emergency Eye Wash (EEW-1)
- (1) Emergency Shower (ESH-1)
- (3) Clothes washer Box (CW-1)
- (9) Hose Bibs (HB-1)
- (20) Cold Water Wall Hydrants (WH-1)
- (4) Hot/Cold water hose bibs (WH-2)
- (1) Post Hydrant (PH-1)

Hotel Bathroom PODS:

- Plumbing Connection of (267) FBO Hotel Bathroom PODs and including:
  - (267) Hot/Cold Water Tie-ins
  - (267) SoVent Waste Tie-ins
  - Setting of FBO Water Closet.
  - Field Installation of FBO Shower/Tub drain

Plumbing Drains:

- (136) Floor Drain (FD-1, FD-2, FD-3 & FD-4)
- (55) Floor Sink (FS-1, FS-2, FS-3 & FS-4)
- (1) 56lf Trench Drain (TD-1)
- (2) Area Drain (AD-1)
- (1) Area Overflow Drain (AOD-1)
- (43) Garage Drain (GD-1 & GD-2)
- (1) Roof Receptor (RR-1)
- (39) Roof Drain (RD-1, RD-2 & RD-3)
- (10) Overflow Roof Drain (OD-1, OD-2 & OD-3)
- (1) Laundry Trough

Plumbing Piping and Material:

- Above slab sanitary waste of Cast Iron No Hub - Public Spaces
- Above slab sanitary waste of Cast Iron SoVent - Hotel Tower
- Above slab sanitary vent piping of Schedule 40 PVC – Public Spaces
- Above slab storm drain piping of Cast Iron No Hub.
- Above or below grade Grease Waste Cast Iron No Hub

- Pumped Waste of Schedule 10 type 304 L Grooved Pipe
- Domestic water piping of type 'L' copper for connection at exterior Backflow preventer / entry.
- Above floor domestic water riser main piping over 2" - Type 'L' copper or Schedule 10 Stainless
- Above Floor domestic water branches 2" or below – Type "L" copper Pro Press
- Above floor domestic water riser main piping to be welded and/or Victaulic dependent on location
- Above or in-floor domestic water branch piping of copper pro press and / or Aqua Pex tubing
- Indirect condensate waste drain piping of Schedule 40 PVC
- Trap primer piping to be Copper Type "L" or Aqua Pex
- Make-up water of Schedule 40 Stainless Grooved Victaulic and/or Copper Pro-Press
- Gas piping riser piping of Schedule 40 black steel or Copper Pro-Press " G"
- Gas piping branch piping of Schedule 40 black steel or Copper Pro-Press " G"
- Fuel Oil Piping of Schedule 40 steel butt weld
- Heating and kitchen equipment hook-ups; equipment furnished /set in place by others.
- Reduced pressure backflow certification

Hotel Insulation Material:

- Overhead Domestic Cold Water piping with closed-cell/elastomeric insulation
- Overhead Rain Leader and underside of Drain Bodies with closed-cell/elastomeric insulation
- Hot Water and Hot Water Recirculation with Fiberglass
- Hot Water Below Grade with Therma-Cel
- Horizontal Coil Condensate Piping with closed-cell/elastomeric insulation

Non-Hotel Insulation Material:

- Overhead Domestic Cold Water piping with Fiberglas insulation
- Overhead Rain Leader and underside of Drain Bodies with Fiberglass insulation
- Hot Water and Hot Water Recirculation with Fiberglass
- Hot Water Below Grade with Therma-Cel insulation
- Horizontal Coil Condensate Piping with closed-cell/elastomeric insulation

CSI Code 230500 Shell & Core HVAC **Total $ 10,583,974.00 + W.S.ST**

HVAC Overview:

HVAC for the North Hotel Tower:

- Central Chilled Water/Heating Water Plant including:
  - (1) Triple Cell Dual Cell Cooling Tower
  - Plate & Frame Heat Exchangers
  - Turbo-Core Water-Cooled Chillers
  - Heating Water Boilers
  - Pumps, Piping and Trim
- Guestroom & Corridor Make-Up Air/Exhaust system including:
  - Rooftop Supply & Exhaust AHU with Heat Recovery System
  - Distribution throughout including risers, sub-ducts, auto-flow dampers, smoke/fire dampers and accessories.
- Elevator Hoist-way and Stairwell Pressurization Fans
- Guestroom HVAC including:
  - Vertical Stacked 4-pipe Fan-Coils with simple air distribution
  - Inncom occupancy based energy management thermostat
  - Connection of bathroom POD exhaust grille to central exhaust system
- Lobby, Mezzanine & basement VAV HVAC system including:
  - Chilled-water VAV AHU
  - Fan-Powered Terminal Units and related air distribution
  - General Exhaust Units and related air distribution.
- Mezzanine Kitchen Food Service HVAC including:
  - Pollution Control Unit for K-Hood and grease duct (K-Hoods are FBO)
  - Hot-water Make-Up Air Unit and related air distribution
- Infrastructure for future Laundry including:
  - Intake & relief pathways
- Future 13 Coins Restaurant Space HVAC:
  - Extension of Chilled/Hot water hydronic system for connection by future tenant
  - Coordination of intake and relief pathways
  - Freeze protection

Arcade HVAC:

- In-floor radiant heating/cooling system including:
  - Water-to-water Heat Pump to provide in-floor heating and cooling
  - In-floor radiant tubing, manifolds, pumps and controls
- Displacement Ventilation System including:
  - Water-Cooled Heat Pump with DAT controls
  - Air distribution including displacement diffusers
- Smoke Evacuation Fans

Parking/Utility HVAC:

- Basement Parking Ventilation system including:
  - Exhaust fans, ductwork and grating at floor level
- Loading Dock ventilation system including:
  - Exhaust fans and ductwork
- Mechanical/Equipment room heating & ventilation including:
  - Exhaust fans and ductwork
  - Heaters
- Transformer Vault Ventilation including:
  - Intake Louvers & Supply Fans
  - Relief assemblies with 3.0 Hr. FD
- Generator Exhaust including:
  - Engine Exhaust system (excluding muffler)
  - Duct-connections from Gen Set shroud to exhaust louver
  - Remote Radiator Piping (radiator FBO)
- Generator Fuel Oil system including:
  - Fill Station
  - Main fuel tank (UL Listed)
  - Fuel Polisher, pumps, alarms, permits and certification
- Locker rooms at SE corner of basement including:
  - DX spilt System Fan-Coil Unit and air distribution
  - Exhaust fan and air distribution
- Fire Command Center HVAC including:
  - Water-Source Heat-Pump and air distribution

Future Restaurant Space SO117 HVAC:

- Extension of Condenser Water system for connection by future tenant
- Coordination of intake and relief pathways
- Freeze protection (limited)

Conference Center/Sky-Bridge HVAC:

- Conference Center HVAC System including:
  - Water-cooled VAV Air Conditioning unit
  - Fan-Powered Terminal Units and related air distribution
- Conference Center restroom exhaust fans and related intake ductwork.
- Conference Center Kitchen Food Service HVAC including:
  - Pollution Control Unit for K-Hood and grease duct (K-Hoods are FBO)
  - Gas-Fired Make-Up Air Unit and related air distribution

Fitness Sky-Bridge & Locker Room HVAC

- Water-Source Heat-Pump and air distribution
- Restroom/locker-room exhaust fan and related intake ductwork.

Pool HVAC

- Dehumidification Unit with reclaim capabilities and related air distribution
- Venting of Pool Heating equipment (FBO)

HVAC Equipment:

- (2) Dual Cell Open Cooling Tower (HN-CT-2401 & 2402)
- (2) Turbo-Core Water Cooled Chillers (HN-CH-2401 & 2402)

- (3) Gas-Fired Condensing Heating Boilers (HN-B-2401, 2402 & 2403)
- (288) Vertical Stacked Hot/Chilled Water Fan-Coil Units (FCU-0302 thru FCU-2306B)
- (1) Chilled Water VAV AHU (HN-AHU-0101)
- (1) Water-to-Water Heat Pump (P-WWHP-0B01)
- (6) Hydronic Heat Pumps (HS-HHP-0101, 0102, 0701, 0702, 0703 & 0704)
- (1) Hydronic Vertical Heat Pump with DAT controls (P-HHP-0B01)
- (1) Water Cooled AC Unit (HS-WAC-0601)
- (1) Rooftop Outside Air Unit with Heat, Heat Recovery & Filtration (HN-SHRU-2014)
- (1) Rooftop Exhaust Unit with Heat Recovery (HN-EHRU-2401)
- (1) Pool Dehumidification Unit (HS-DHU-0701)
- (1) Hot/Chilled Water Makeup Air Unit (HN-MAU-0201)
- (6) Air-Cooled Split Heat-Pump Fan-Coils (HN-FCU-0B01 thru P-FCU-0101, FCU-0B01,FCU-0B02)
- (6) Air-Cooled Split Heat-Pump Condensing Units (HN-CU-0B01 thru P-CU-0101, P-CU-0B01, P-CU-0B02)
- (3) Chilled Water Pumps (HN-CHWP-2401, 2402 & 2403)
- (2) Heating Water Pumps (HN-HWP-2401 & 2402)
- (2) Open Condenser Water Pumps (HN-CDWP-2401 & 2402)
- (1) Closed Condenser Water Pump (HN-CDWP-2505)
- (5) Radiant Floor Hot/Chilled Water Pumps (P-RFP-0B01 thru 0B05)
- (1) Condensate Pump (P-CP-0B01)
- (2) Plate/Frame Heat Exchanger (HN-HX-2403, HN-HX-2404)
- (4) Air Separators (HN-AS-2401, 2402, 2404, P-AS-0B01)
- (1) Chilled Water Buffer Tank (P-BT-0B01)
- (4) Expansion Tanks (P-EXT-0B01, 2402, 2403 & 2404)
- (53) Series Fan-Powered VAV Terminal Units (HV-VAV-0B01 thru HS-VAV-0633)
- (2) Electric Duct Heaters (HS-EDH-0701 & P-EDH-0101)
- (14) Wall Mounted Electric Heaters with integral T-Stats (EH-0B01 thru EH-802)
- (2) Pollution Control Units (HN-PCU-0101 & HS-PCU-0601)
- (1) Gas Direct-Fired Make-up Air Unit (HS-MAU-0601)
- (10) Pressurization Fans (HN-EPF-2501 thru 2505 & P-EPF-0101, 0201, 0501, 0801 & 0802)
- (3) Smoke Evacuation Fans (P-SEF-0801, 0802 & HN-2401)
- (6) Relief Fans (HS RF 0601 thru 0606)
- (16) Supply/Transfer Fans (HN-SF-0B01, HN-TF-0B01 thru P-TF-0503 & HS-SF-0701)
- (5) Garage Fans (P-GCF-B01 & B02 & P-GEF-0B01, 0B02 & 0B03)
- (25) Exhaust Fans (HN-EF-0B01 thru HN-EF-2404 & HS-EF-0601 thru 0704, HN-LEF-0B01,0B02, HN-EF0-0101, P-EF-0101-0107, EF-0201-0705, HN-EF-2401-4)
- (4) Roof Hoods (P-RH-0801, 0802, 0803 & 0804)
- (6) Duct Silencers/Sound Traps (PST-0201, HNST 2301 – 2303, HSST-0601 & 0602)
- (2) Pre Heat Coils (HN-PHC-0B01, HN-PHS-0301)
- (1) Filter (HS-FTR-0701)
- (2) Radiant Gas Heaters (HN-RGR-0101, HN-RGH-0102)

HVAC Piping:

- Chilled Water Piping
- Condenser Water Piping
- Natural Gas Piping
- Fuel Oil Piping
- Valves and/or Piping Specialties

HVAC Piping Material:

- Chilled Water piping mains over 2" of Schedule 40 welded or Victaulic
- Chilled Water piping branches of Copper Pro-press or steel Mega-press
- Heating Hot Water piping mains over 2" of Schedule 40 welded or Victaulic
- Heating Hot Water piping branches of Copper Pro-press or steel Mega-press
- Condenser Water piping mains over 2" of Schedule 40 welded or Victaulic
- Condenser Water piping branches of Copper Pro-press or steel Mega-press
- Gas piping riser piping of Schedule 40 black steel or Copper Pro-Press " G"
- Gas piping branch piping of Schedule 40 black steel or Copper Pro-Press " G"

HVAC Air Distribution:

- Medium Pressure Ductwork and fittings
- Low Pressure Ductwork and fittings
- Welded Grease Ductwork and fittings
- Mechanical Louvers that are not part of Storefront/Window-Wall systems
- Fire/Smoke Dampers, Fire Dampers, Control Dampers and Manual Dampers
- Duct Access/Clean-outs
- Grilles, Registers and Diffusers
- Air Distribution Specialties and/or Accessories.

HVAC Ductwork Material

- Medium Pressure Ductwork of Galvanized Steel and per SMACNA Standards.
- Low Pressure Ductwork of Galvanized Steel, Stainless Steel or Aluminum (as noted on drawings) and per SMACNA Standards
- Welded Grease Ductwork is Black Iron or Stainless Steel (as noted on drawings) and per SMACNA standards

Hotel Insulation Material

- External duct wrapped with Fiberglass duct insulation with foil vapor barrier
- Internal duct liner in air stream to be closed-cell elastomeric
- Chilled Water Piping to be closed cell elastomeric
- Heating Water Piping to be Fiberglass insulation
- Acoustic Lagging of portion of the Medium Pressure ductwork where noted on plans.

Non Hotel Insulation Material

- External duct wrapped with Fiberglass duct insulation with foil vapor barrier
- Internal duct liner in air stream to be closed-cell elastomeric insulation
- Provide Indoor Fan Coils with Foil-Faces fiberglass insulation
- Chilled Water Piping to be closed cell elastomeric insulation
- Heating Water Piping to be Fiberglass insulation

Hotel Bathroom PODS:

- HVAC Connection of (267) FBO Hotel Bathroom PODs and including:
  - Exhaust Tie-In

Energy Management System

- BMS System including:
  - Honeywell Tridium WEBs AX Platform/Hardware
  - Interfaced the "Campus" Graphics and Work Station/Supervisory Software
  - Remote Monitoring, Trending and Alarming capabilities.
  - Software, Licensing, Programming and Graphics

Hotel Guestroom Energy Management System

- Innocm Occupancy Based Energy Management System including:
  - Digital Thermostat with Remote Occupancy sensor per guestroom
  - Wireless Door Lock Interface Software (door lock is FBO)
  - Window Switch
  - Eco Button
  - Front Desk/Hotel Operator Interface
  - Interfaced the "Campus" Graphics and Work Station/Supervisory Software

CSI Code 263200 Generator & Fuel Tank / System **Total $218,947.00 + W.S.ST**

Fuel Oil System:

- (1) Main Fuel Oil Tank (FOT-1)
- (1) Fill Station (FO-1)
- (24) Fuel Oil Valves, Safeties, Sensors and Switches (FO-2 thru FO-25)
- (1) Duplex Oil Pump Seat (DOPS-1)
- Fuel Oil Piping
- Generator Remote Radiator Piping (radiator is FBO)
- (23) Fuel Oil Day Tank Valves, Safeties, Sensors and Switches (DT-1 thru DT-23)
- (1) Fuel Polishing System (FOPS-01)
- (1) Submersible Fuel Oil Pump (FOPS-2)

Generator Exhaust including:

- Engine Exhaust system (excluding muffler)

- Duct-connections from Gen Set shroud to exhaust louver
- Remote Radiator Piping (radiator FBO)

Fuel Oil Piping Material

- Fuel Oil Piping of Schedule 40 steel butt weld

CSI Code 328400 Irrigation **Total $30,342.00 + W.S.ST**

Irrigation Plumbing:

- Provide supply piping and backflow preventers based on irrigation drawings.

Alternates

CSI Code 211300 Fire Sprinkler Heat-Trace Alt#1 **Total $43,205.00 + W.S.ST**

Add heat-tracing and insulation for wet sprinkler pipes in non-conditioned spaces.

CSI Code 220500 Temporary Water Service Alt#2 **Total $28,288.00 + W.S.ST**

Add temporary water for the North tower and podium through S07.

CSI Code 220500 Grease Interceptors **Total $7,647.00 + W.S.ST**

Add removal and deliver of the (2) existing "turtle" Grease Interceptors located at 1501 1st Ave. S building.

Specific Exclusions:

- Design and/or Construction cost impacts related to 31-Aug-15 REVIT/CAD updated (noted as TBD)
- Design and/or Construction impacts at Pool Area (required by 8/31/15 CAD/Revit update)
- Pool Equipment and/or TBD revisions to the Pool Equipment Venting
- Revisions for Mechanical/Plumbing Routing due to depth of Pool Beams (if required)
- Leak Detection and/or drain pans or piping associated with the interstitial space below L7-S Pool/Hot Tub
- Re-design/detailing impact related to shortened Hotel FCU closets and/or riser spaces
- Design and/or Construction Impact related to Phasing construction of the S Office Tower
- Cost to upgraded the hotel Plumbing Fixtures at N23 suites
- BIM/CAD Assistance with Slab Embeds (Curtain Wall, Slab Edge, Window Washing Track)
- Mechanical Cooling at Machine Room N2406
- HVAC for Demarc room #N0040
- Cooling capacity beyond 2TONS for room # S0019
- Gas–Fired Radiant Heaters at Valet Stand and/or S06 Deck
- Dryer Venting at Bike Storage (TBD)
- Louvers located in store-front or window-wall systems
- LEED 3rd Party Commissioning Expense
- HVAC Equipment maintenance platform/cat-walk.
- Refrigeration piping related to food service equipment.
- Retail/Restaurant Lease Space HVAC or Plumbing build out
- Rated assemblies, if required for the Electrical Vault exhaust duct
- Grease Interceptors (outside Bldg. Footprint – furnished/installed by Site Utilities Contractor)
- Canopy drains, gutters, scuppers and downspouts
- Fire protection
- Select fill; import or export of soils, gravel or other bedding material
- Warranty of Existing HVAC/Plumbing systems
- Off-hour/overtime labor expense
- Structural engineering; Structural reinforcement; Mechanical Equipment Screens
- Roofing, patching, curb leveling, flashing or cutting of roof openings
- Concrete cutting, coring, patching, forming, rebar, breakout or replacement
- Fire dampers, smoke/fire dampers or fire stopping not listed in inclusions (scope) above
- Upgrade/analysis of Fire/Life Safety system
- Interlocks, tests, permits or fees associated with fire/ life safety alarms
- Electrical conduit, disconnects, starters, power or low voltage wiring not listed in scope
- Temporary heating; gas meters or associated fees; gas piping not in scope; Site utilities or site utility hook-ups
- Gutters, downspouts, roof drains or leaders, footing drains, or de-watering unless specified in scope
- Architectural access doors
- Condensate drain lines with HVAC unless included above
- Energy Management control system unless specifically listed in above scope

Craft Labor Rates through Jan 1, 2016:

	Hourly Rate/Labor Notes (Straight-Time)	(Over-Time x 1.5)
Sheet Metal Field	$92.73 / 1, 3, 4	$125.48 / 1, 3, 4
Sheet Metal Shop	$82.18 / 2, 3, 4	$115.33 / 2, 3, 4
Plumbing/Piping Field	$95.15 / 1, 3, 4	$128.90/ 1, 3, 4
Plumbing/Piping Shop	$84.05 / 2, 3, 4	$119.02/ 2, 3, 4
Refrigeration Field	$98.55 / 1, 3, 4	$133.30 / 2, 3, 4
Air/Water Balance Field	$91.22 / 1, 3, 4	$124.97 / 1, 3, 4
Controls Technician Field	$98.55 / 1, 3, 4	$119.02/ 1, 3, 4
Controls Electrician Field	$89.73 /1, 3, 4	$121.23 / 1, 3, 4
Detailing	$119.92 /4	$149.94 /4
Engineering	$77.92 /4	$101.92 /4
Project Management	$88.63 /4	$116.59 /4
Administrative Assistant	$55.00 /4	$ 70.00 /4

Labor Notes:

1; All field labor will be burdened an additional 12% for small tools, vehicle expenses and communication expenses.
2; A shop burden of 38% will be added to all shop labor.
3; Labor rates subject to semi-annual labor contract increases (June 1st and January 1st of each year)
4; Labor rates subject to adjustment for shift pay and/or overtime as may be required to make schedule

Fees:

	MacDonald Miller Work	Subcontracts
Fee	10%	10%

Miscellaneous:

Warranty	1%
B&O Tax	0.9%

The above listed fees, warranty, and B&O tax will be applied to all construction direct job costs (including labor at the above listed rates) to establish final billing amounts.

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   375 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;
  1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead
  2. Backup documentation is required for each item submitted for EQ credit 4
  3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner

including "Trade Contractor Material Content Form"

4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory

- Noise Reduction;
    1. All equipment and especially mufflers are to be maintained in good working order
    2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
    3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
    4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
    5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise
- Historic Site;
    1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office an insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 2-9 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade contractor to provide submittals bound in notebooks and an electronic copy
- Trade contractor to provide a complete BIM model, 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

TRADE CONTRACT

THIS AGREEMENT was made and entered into this 27th of April, 2016, by and between:

255 South King Street LP
270 S Hanford St # 100
Seattle, WA 98134
TEL: 206-971-7899
FAX: 206-623-0338

the OWNER, and
Cochran, Inc.
2500 Aurora Ave N
PO Box 33524
Seattle, WA 98133
TEL: 206-637-1900
FAX: 206-368-3197

the TRADE CONTRACTOR

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

The Lump sum of: Eleven Million, Three Hundred and Seven Thousand, Six Hundred and Sixty Eight plus WA Sales Tax ($11,307,668).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project");

255 S King St Phase 1
Seattle, WA 98104

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified as the listed attached Exhibits (1, 2, 3, 4, 5), and in accordance with the drawings and specifications for the construction prepared by:

Freiheit & Ho Architects Construction Issue Set Dated 06/02/15 through ASI #12 dated 4/01/15
Freiheit & Ho Architects Project Manual Specifications Dated 05/12/15
DCI Engineers Construction Issue Set Dated 05/12/15
Degen & Degen Construction Issue Set Dated 05/12/15
Embassy Suites Brand Standards North America 07/2010
Exhibit 1 Construction Schedule 4/5/16
Exhibit 2 Trade Contractors Consent To Assignment And Lien Waiver
Exhibit 3 Wrap Up Insurance
Exhibit 4 Wrap Up Insurance Manual
Exhibit 5 ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

CSI Code 131100 Swimming Pool — **Total $63,380 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Pool area lighting
- In pool LED lighting

CSI Code 131200 Fountains — **Total $18,704 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Pump room power and equipment connections
- Mechanical power and equipment connections
- Grounding system for in-pool lighting
- Lighting & lighting control (Install only)

CSI Code 260100 Temporary Power — **Total $54,864 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Building temporary lighting

- Power skids
- (2) Concrete placement boom power connections
- Spiderbox power
- Temporary lighting under scaffolding on King Street
- Temporary lighting
- Subcontractor basement shack buildouts

CSI Code 260500 Electrical **Total $2,399,022 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- 4000-amp hotel tower service (including SCL bus service)
- 4000-amp office tower service (including SCL bus service)
- 1200-amp retail service (including SCL bus service)
- 1200-amp roof switchboard
- Building metering system and integration
- Building grounding system and risers
- Transformers (15, 30, 45, 75, 150, and 500kVA)
- 208V & 480V Panels (including side-mount panelboards)
- 1600-amp busway riser for hotel
- Emergency and life safety power
- Optional stand-by power
- Fire pump emergency power connections
- Laundry rooms power, receptacles and mechanical connections
- Laundry room equipment connections
- Demarcation room power and receptacles
- Electrical, communications, and building system rooms power and receptacles
- Site, garage, and exterior power receptacles
- Parking control power and rough-in
- Atrium receptacles and mechanical connections
- Mechanical rooms power, receptacles, and connections
- Hotel bar power, receptacles, and mechanical connections
- Kitchen power, receptacles, and equipment connections
- Hotel unit POD power connections
- Hotel unit power, receptacles, and mechanical connections
- Ball room power, receptacles, and mechanical connections
- Fitness and health club power, receptacles, and mechanical connections
- Fitness and health club equipment power and data connections
- Public space bathroom power, receptacles, and mechanical connections
- N23 suite power, receptacles, and mechanical connections
- Elevator shaft and machine room equipment and power connections (including shunt trip breakers)
- Roof boiler room power and mechanical connections
- Roof chiller room power and mechanical connections

General Conditions:

- Office lease
- Tool and equipment rentals
- Overhead and mark-up
- Office supplies
- As-built drawings

CSI Code 263200 Generator, ATS, UPS, Fuel Tank **Total $14,568 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- 2MW Generator with fuel belly tank (includes move in and rigging)
- 4000-amp generator switchboard

- 75kVA UPS with maintenance bypass cabinet
- (2) 2000-amp ATS
- 1600-amp ATS
- Power connections for generator fuel system

CSI Code 265100 Lighting and Lighting Controls **Total $4,058, 400 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Exterior lighting and lighting controls (includes LED lighting programming)
- Hotel lighting and lighting controls (includes installation of hard wired fixtures)
- Garage lighting and lighting controls
- Lighting control panels with astronomical controls for exterior lighting
- Ball room lighting and lighting controls
- Site lighting and lighting control
- Shell & Core lighting in N01 and S01
- Submittals and O&Ms
- Owner's training for lighting controls

CSI Code 273100 Teledata **Total $1,154,659 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings

Telecommunications system with horizontal cabling comprised of Uniprise Connectivity and PLENUM Cabling solution along with a fully functional RG6 and P3 500 Based CATELEVISION System. Details of the solution are:

Basement

- (3) 1D location
- (1) 1D LCD location
- (4) 1D WAP locations
- (4) 1D wall phone location
- (1) 1RG6 TELEVISION location
- (22) 2D locations

First floor

- (6) 1D locations
- (4) 1D AV DSD locations
- (1) 1D floor locations
- (5) 1D IP locations
- (1) 1D POS location
- (8) 1D WAP locations
- (8) 1D wall phone locations
- (7) 1RG6 television location
- (6) 2D locations
- (4) 2D floor locations
- (1) 2D IP location
- (2) 2D ticket splitter locations
- (1) 2D time clock location
- (2) 6D locations
- (1) 6D POS location

Second floor

- (1) 1D location
- (1) 1D AV DSD location
- (3) 1D IP locations
- (1) 1D LCD location
- (1) 1D POS location
- (6) 1D WAP locations

- (4) 1D wall phone locations
- (2) 1RG6 television locations
- (1) 1RG6 television floor location
- (2) 2D electric car charging stations
- (7) 2D floor locations
- (1) 2D floor POS location
- (1) 2D LCD location
- (1) 4D floor location

Third floor

- (1) 1D location
- (9) 1D WAP locations
- (4) 1D wall phone locations
- (25) 1RG6 television locations
- (14) 2D locations
- (13) 2D room phone locations

Fourth floor

- (1) 1D location
- (9) 1D WAP locations
- (4) 1D wall phone locations
- (24) 1RG6 television locations
- (13) 2D locations
- (13) 2D room phone locations

Fifth floor

- (9) 1D WAP locations
- (4) 1D wall phone locations
- (21) 1RG6 television locations
- (15) 2D locations
- (13) 2D room phone locations

Sixth floor

- (1) 1D locations
- (2) 1D IP locations
- (1) 1D LCD location
- (2) 1D POS locations
- (11) 1D WAP locations
- (11) 1D wall phone locations
- (20) 1RG6 television locations
- (4) 1RG6 television floor locations
- (27) 2D locations
- (12) 2D room phone locations
- (4) 4D locations

Seventh floor

- (3) 1D locations
- (14) 1D WAP locations
- (7) 1D wall phone locations
- (22) 1RG6 television locations
- (8) 1RG6 television floor locations
- (8) 2D locations
- (1) 2D POS location
- (13) 2D room phone locations

Eighth floor

- (9) 1D WAP locations
- (2) 1D wall phone locations
- (22) 1RG6 television locations
- (9) 1RG6 television floor locations
- (16) 2D locations
- (13) 2D room phone locations

Ninth through seventeenth floors

- (9 per floor) 1D WAP locations
- (2 per floor) 1D wall phone locations
- (22 per floor) 1RG6 television locations
- (15 per floor) 2D locations
- (14 per floor) 2D room phone locations

Eighteenth floor

- (9) 1D WAP locations
- (2) 1D wall phone locations
- (22) 1RG6 television locations
- (15) 2D locations
- (14) 2D room phone locations

Nineteenth through twenty second floors

- (9 per floor) 1D WAP locations
- (2 per floor) 1D wall phone locations
- (22 per floor) 1RG6 television locations
- (15 per floor) 2D locations
- (14 per floor) 2D room phone locations

Twenty third floor

- (6) 1D WAP locations
- (2) 1D wall phone locations
- (15) 1RG6 television locations
- (6) 2D locations
- (10) 2D room phone locations

Roof

- (1) 2D elevator connection

General

- All cabling to route to IDF shown on T7.02 for termination onto Category 6 patch panels
- Terminate, label, and test all telecommunications cabling according to EIA/TIA/ANSI and industry specifications.
- Provide full test results and as-built drawings at completion of project (CAD background must be provided to Cochran).
- Pathway rough-in
- Pathway stub ups above accessible ceilings
- Pathway risers and sleeves
- Cable to be free-aired above ceilings

Backbone Cabling:

Provide and install data/voice backbone cabling with a central termination point of the Computer/Tech room (N0029) to consist of the following:

- (1) 12-Strand MM
- (1) 50-Pair ARMM cables to each for the Hotel IDF shown on T7.02
- (1) P3 500 JCAP Coax terminating in each IDF, and then continuing on to the next IDF for CATELEVISION distribution
- All fiber to terminate with LC Connectors then plugged into dedicated LC Multi-Mode or Single Mode coupler panels
- Each IDF to receive (1) 1U LIU and Computer/Tech room to receive (2) 4U LIU's
- All copper to terminate on 300-Pair Cross Connect 110 blocks along with all necessary wiring troughs and backboards to facilitate proper routing of cables

IDF and Computer/Tech Room Buildouts

- Provide and install 18"x2" Basket Tray in each IDF as shown on the details on sheet T3.02
- Provide and install 24" ladder rack along the vertical chases (where applicable) and securer to floor and wall
- Provide and install (2) 7FT Equipment Cabinets and (3) 7FT Racks along with Vertical Wire Management in the computer/tech room as shown on T3.01
- Provide and install (4) 7FT Racks along with Vertical Wire Management in the demarcation rooms as shown on T3.01.
- Secure racks to floor via concrete anchor kits and bolt to overhead ladder racking using appropriate hardware
- Provide and install (1) 7FT Equipment cabinets in each of the IDF's
- Secure all racks to the floor via concrete anchor kits and bolt to overhead ladder racking
- Provide and install up to eight (8) Category 6 patch panels along with horizontal wire management in each of the IDF cabinets as shown on T3.01

CSI Code 274100 Audio Visual **Total $1,731,081 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Public area televisions and mounting
- N23 televisions and installation
- Hotel speaker system
- Public area event displays
- S06 AV closet
- S06 exterior speakers
- S06 ballrooms projectors and screens (northeast projector to be cart mounted on floor)
- S07 pool speakers
- S07 cardio and fitness area speaker system
- AV closet headend
- Coordination with Hilton project manager.
- Submit and obtain all required permits.
- Pathway rough-in
- Pathways stub up into accessible ceilings
- N23 suite sound systems

CSI Code 275300 Distributed Antenna System **Total $564,445 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Life safety DAS design and installation
- Cellular DAS design and installation
- Riser conduit pathways
- Emergency power connections
- Equipment and programming

Horizontal Cabling

- (40) Antennas
- (25) Splitters
- (4) Remote Units
- Coax cabling to each antenna
- Fiber to each remote unit
- (1) Head End
- (1) Donor Antenna
- Terminate, label and test all telecommunications cabling according to EIA/TIA/ANSI and industry specifications

Backbone Cabling

- Provide and install 6-Strands Single Mode fiber from the Head End to each Remote Unit. Fusion splice on each side to SC/APC pigtails and land in a 2RU LIU in the head end and in a wall mount housing at each remote unit
- Label and test all telecommunications cabling according to EIA/TIA/ANSI and industry specifications. Provide full test results and as-built drawings at the completion of the project (CAD background must be provided to Cochran)

Head End Buildout

- Install previously mentioned LIU's and fiber patch cords. "One to one" fiber Patch Cords per Remote Unit.
- Antenna Mounts for all antennas
- All fiber optic cable, LIU's and fiber patch cords

CSI Code 283100 Security **Total $353,150 + W.S.S.T.**

Scope of Work:

- One-Year Warranty from substantial completion on workmanship, manufacturer's warranty applies to Cochran supplied material
- Permit and Inspection

Access Control Management Systems (ACMS)

- Software licensing for (1) Lenel OnGuard PCS-ADV base server software
- Software licensing for PCC-ADV client software licenses with server and workstation turn-key from Lenel

- Security Network and computer hardware, includes one database server and one client workstation.
- Security Local Area Network (telecommunications outlets required for security equipment)
- (500) blank proximity badges
- Over cabling to the wall outlets
- Access Control Management Systems (ACMS) Controllers
- Connection of field devices to the Lenel OnGuard system
- Hoffman Enclosures with supporting 12/24v power supply
- Lenel OnGuard Major System Components: LNL-1320, LNL-1100, LNL-1200, LNL-1300, LNL-2220 and LNL-3300
- IC (intelligent controller) - LNL-3300 with an onboard Ethernet adapter
- Lenel OnGuard CTX-6 enclosure with integral 12V power supply
- All power supplies will have 12V-7AH battery backup for short term outages
- Access Control Management Systems (ACMS) door control panels & field devices
- Cable all controlled doors with a card reader or a monitored door with local sounder to nearest main equipment enclosure and connect to Lenel Dual Reader Interface (DRI) boards as required to meet the intent of the portal.
- Other card reader controlled doors such as gate entry/exit will be cabled as needed for the device purpose to the Lenel head-end equipment modules.
- Field devices for the ACMS (card readers, request to exit devices, door position status switches, lock connections and cabling)

Video Management System (VMS) - Cameras

- Lenel OnGuard licensing
- Video channel licensing per camera designed
- Lenel digital video enabler software
- Video appliance servers (VAS)

Security Camera System (SCS) Cameras

- Interior Dome IP Camera, Axis P33xx series, Sony DH-240
- Exterior IP PTZ Camera, Axis Q6035E or equal
- Camera channel license, LNL-SWR-CH1
- Appropriate housings, mounting arms and accessories
- CAT6 Cabling as required
- Coaxial cabling with appropriate IP as required

Security Intercom System (SIS)

- Stentofon XE1
- Wall mount intercom in an industry standard and society recognizable stainless steel enclosure

CSI Code 282600 Area of Refuge, Two Way Communications **Total $530,012 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Jeron Series 480 AOR system.
- CAT5 wiring between stations.
- Conduit Pathway in exposed areas.
- Free Air cable in concealed areas.
- Stations to be at each elevator lobby one or more floors above or below story of exit discharge
- Stairwell re-entry communication system located at every landing
- The master station located at fire command center room S0121 (or as designated by the Seattle Fire Department)

CSI Code 283100 Fire Alarm **Total $370,846 + W.S.S.T.**

Scope of Work:

- Submittals & Drawings
- Shunt trip control of elevator
- TrueSTART II tool
- Startup and testing without control panel
- Address, circuit integrity, and equipment functions verification
- Conduit pathway in exposed areas.
- Free air cable in concealed areas.

Control Panels:

- Networked fire alarm control panels in Fire Command Center (S0121), Hotel Electrical Room (N0046) and Commercial Tower Electrical Room (S0112).
- Fire command center to have a 4100ES voice evacuation fire alarm system
- Addressable IDNet detection and control
- Addressable IDNAC visible notification power supplies UUKL listed for Smoke Control
- Voice evacuation panel with selectable speaker control
- Digital amplifiers with backup
- Voice evacuation panel with selectable speaker control
- 100W digital amplifiers with backup
- Integrated DACT
- Class A NAC circuits
- Remote fire alarm annunciator
- Hotel PBX office
- Fire alarm transponders (FAT) to provide distributed wiring location to be determined
- Addressable IDNet detection and control
- Addressable IDNAC visible notification power supplies
- Digital amplifiers with backup
- Visible notification power supplies
- Approved HOA switches
- Sprinkler Water Tank Annunciation Panels
- One graphic panel at Fire Command Center
- One graphic panel in fire sprinkler pump room

Initiating Devices:

- Manual pull stations at the fire alarm control panel and hotel reception desk.
- Smoke sensors at elevator landings and machine rooms, within 5' of each exit to the pressurized stairwells, within 5' of each wall mount smoke fire damper, R-1 interior guestroom corridors, and R-1 guestrooms with CO and non-520 Hz sounder base
- Heat sensors at the transformer vault, elevator motors, duct smoke sensors, air handling units over 2000 CFM, elevator and stairwell pressurization fans (two units per fan), within 5' of each inline smoke fire damper, and at all sprinkler switches.
- Supervised IAM at each floor control valve, the garage dry sprinkler system, and building main riser assembly
- Fire pump room monitoring
- Kitchen hood monitoring

Isolation modules:

- IDnet isolation modules in electrical room on each floor
- IDNAC isolation modules in control panels on each floor

Mechanical Interface Devices:

- Duct smoke sensors at air handling units over 2000 CFM and at each pressurization fans (two units per fan)
- Pressurization and smoke exhaust fan control and required monitoring
- Three outputs at each pressurization and smoke exhaust fan for VFD control
- Smoke Control Equipment per device control
- Power monitoring at each smoke control device
- Positive feedback monitoring at each smoke control device
- Status monitoring for each smoke control device
- 120VAC Power monitoring for required smoke control equipment
- Pressurization fan control
- Addressable relay for smoke exhaust damper control at each floor
- Stairwell door unlock
- Addressable FSD control relay per stairwell

Notification Devices:

- Digital 2-Channel Voice Evacuation system
- Notification speaker circuit at each floor
- Visual notification in public and common areas and driving lanes of the parking garage (combination audio/visual where appropriate)
- Fire Alarm Terminal Cabinets (one per floor)

CSI Code 328400 Irrigation — Total $2,618 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- 120 V power connections to irrigation equipment

CSI Code 337100 Electrical Utility — Total ($34,815) + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- SCL vault general purpose power and lighting
- Service busway from SCL vault to electrical switch room
- Sleeves as required by SCL
- Grounding as required by SCL
- SCL primary feeder conduits
- SCL electrical inspections

CSI Code 338200 Telecom Utility — Total $26,734 + W.S.S.T.

Scope of Work:

- Submittals & Drawings
- Telecoms pathway from exterior vaults to basement demarcation rooms
- Pathway risers and sleeves
- J-boxes in basement for incoming telecoms vaults

Specific Exclusions:

- All changes to design after 5/16/15
- Changes to general conditions incurred from changes to the construction schedule dated 2/18/15
- Performance and payment bonds
- Pool and hot tub chemical room equipment and programming
- ADA pool lift power and equipment connections
- Pool mechanical equipment and programming provided by others
- Water feature mechanical equipment and programming for fountains
- Water feature pump room equipment and programming for fountains
- Water feature lighting, lighting controls equipment, and programming
- Temporary power conex removal
- Crane equipment and programming
- Manlift equipment and programming
- Concrete placement boom equipment
- POD equipment fixtures and devices installation
- POD placement
- Mechanical equipment and programming
- Fire Pump equipment and programming
- Atrium mesh screen automation, design and install
- Elevator equipment and programming
- FF&E casework
- Hotel unit and ballroom shade power
- Laundry equipment and programming
- Kitchen equipment
- Parking control system, equipment, and programming
- Fitness equipment and programming
- Server rack power strips
- Housekeeping pads
- Concrete encasement
- Blockouts and curbs for housekeeping pads

- DOT work
- Equipment and material expediting
- Tenant improvements at N01, S01, S08-S18
- Door release buttons and intercoms in the atrium
- Furniture, fixtures, and equipment
- Roof penetrations and patching
- Painting and patching of existing surfaces
- Painting of exposed conduits
- Signage and placards (interior digital signage is included)
- All utility fees & monthly charges
- Dumpster & disposal fees
- Overtime & shift work starting after 5/01/16
- Engineering
- ASI changes after 5/16/15
- Flaggers
- Deliveries after normal working hours
- Shutdowns and startups after normal working hours
- Street use permits
- Hotel unit access panels procurement and installation
- Two-hour rated shaft for survivability circuits
- Demolition
- Line and low voltage control wiring for mechanical equipment
- Line and low voltage conduit and boxes
- DDC control system
- Building management system (BMS)
- Furnish of variable frequency drives (installation is included)
- Smoke control system
- Bathroom hand dryers
- Unit heaters
- CO detection during construction
- Heat trace (120V connection included)
- Starters for OW-WAC equipment
- Generator mechanical exhaust install
- Generator remote radiator install
- Generator fuel system equipment and programming
- Site trenching, backfill, and concrete bases
- Ballroom and pre-function chandeliers installation
- SCL pole lighting base installation
- Field end patch cords (except for wireless) to be owner provided and owner installed (Cochran to provide head end patch cords only)
- Cross connection to voice wall fields in IDF's
- Emergency or ARA signage
- Network switch equipment, servers, WAPs, UPS systems, rack mount power, all other active network/server room equipment, OFOI
- Site investigation
- Doors and door hardware (including electrified hardware)
- Offsite monitoring service for security, telephone, cellular and other services such as Cable TV or Satellite
- Troubleshooting or service on customer owned Wi-Fi devices including table computers, laptop computers, and cellular smartphones.
- Servicing client networks, devices, servers, workstations, operating systems, and applications not supplied by ITN.
- Incidents or requests from facilities not listed in the above-mentioned document.
- Connection speed guarantees
- Connection consistency unless related back to hardware failure.
- Service disruptions due to physical change of environment.
- INNCOM system, programming, and integration
- Saflock system, power, programming, and integration and power connections

- Point of sale systems
- GPON system
- Construction site Wi-Fi
- Hotel or owner provided audio/visual systems
- Ballroom operable window shade integration
- TI space tower speaker and audio/visual systems
- TI space audio/visual systems
- Category 6A (Cat 6a) cable upgrade
- Level N23 audio/visual changes
- Life safety DAS cross connection to building/service provider services
- Cellular DAS design & installation
- Paging system
- ADA operators, push plate actuators, pedestals for mounting ADA actuators and accessory devices such as card readers
- Elevator floor tracking in office tower
- Elevator control, tracking, and card readers in hotel controlled elevator cars
- Custom electric lock and power transfer hinge cable harness (Electrolynx or eq.)
- Door preparation for hardware
- Lock core coordination and installation
- Signage for security related equipment
- Office furniture, lockable cabinets, and other casework/furnishings
- Security badging printer and photo capture equipment
- Electrified door hardware, installation and procurement
- Integration to parking entry system (Amano McGann)
- Integration to hospitality lock and access control solution software, single badge interface for hotel guests core and shell tenants, owner
- Egress plan study
- Monitoring service
- Additional or failover servers for camera expansion or disaster recovery
- Hospitality lockset hardware, installation, and software
- Separate video surveillance system for hotel or other tenants
- SIS paging speakers, amplifiers, and adapters
- Area of refuge signage
- Fireman's phones
- Smoke damper end switches
- Sail switches
- All sprinkler switches
- Elevator carrier cable
- Stairwell door lock power and door holders
- Laundry chute devices and monitoring
- Egress door monitoring
- Phase-2 VESDA system
- Changes due to final door submittals
- Irrigation equipment and programming
- Low voltage transformers for irrigation equipment
- Low voltage cabling and wiring for irrigation equipment
- Underground exterior pathway for irrigation equipment
- Utility vaults
- Excavation & trenching
- Plating & shoring
- Backfill & compaction
- Patching of existing surfaces, concrete, asphalt, & curbing
- Saw cutting, concrete coring, scanning, & x-rays
- Dewatering
- Sheet pile cutting
- SCL cabling
- SCL transformer and vista vault buildouts

- SCL street lighting power to be supplied by others
- Telecoms vaults
- Utility street crossing
- Plywood backboards
- Telecom service cabling into building demarcation rooms
- Telecom service cabling into future TI spaces
- Service provider coordination
- Utility Street Crossing
- Design changes after 05/16/15

Craft Labor Rates through Feb 5, 2017

	Normal Rate	OT Rate	DT Rate
General Foreman	$94.62	$130.77	$166.94
Foreman	$88.48	$121.64	$154.80
Journeyman	$82.34	$112.48	$142.62
Apprentice	$71.69	$97.31	$122.92

Craft Labor Rates after Feb 5, 2017

	Normal Rate	OT Rate	DT Rate
General Foreman	$96.86	$133.01	$169.18
Foreman	$90.72	$123.88	$157.04
Journeyman	$84.58	$114.72	$144.86
Apprentice	$73.93	$99.55	$125.16

Other Hourly Rates

	Rate
Project Executive	$126.00
Project Manager	$106.40
Project Engineer	$65.00
Chief Estimator	$110.00
Estimator	$75.00
Safety Manager	$68.00
General Superintendent	$111.00
Project Assistant	$60.00
Purchasing	$69.00
CAD Lead Designer	$82.95
CAD Operator	$77.20
Warehouse Manager	$82.95
Warehouse Supervisor	$77.20
Warehouse Delivery Driver	$67.21
Gerber Engineering	$200.00

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

460 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;
    1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead
    2. Backup documentation is required for each item submitted for EQ credit 4
    3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner including "Trade Contractor Material Content Form"
    4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
    5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
    6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory
- Noise Reduction;
    1. All equipment and especially mufflers are to be maintained in good working order
    2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
    3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
    4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
    5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise
- Historic Site;
    1. Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48)
- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office trade contractor contact information sheet, subtier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications
- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on pages 2-10 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Parking will not be provided by 255 S King St LP
- Pollution liability insurance is not applicable
- Trade contractor to provide submittals bound in notebooks and an electronic copy
- Trade contractor to provide a complete BIM model, 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

CSI Code 329100 – Planting Preparation — $413,622.00

To provide all labor, materials, freight, equipment and the like as required to:

A. Supply and Install Specimen Trees, Plantings, Planters, Green Roofs, Rooftops and Vegetative Walls, including, but not limited to all required:
   i. Drainage Material, Drain Mat, Termination Bars, Drain Standpipes and Covers, Filter Cloths
   ii. Topsoil, Light Weight Soil and Soil Amendments
   iii. Root Barriers
   iv. Plant Material
   v. Staking and Guying
   vi. Mulch

   In the following areas:

   - Esplanade Trees – Row Plantings – Plaza Plantings — $159,870.00
     i. ALLOW for up to 10 no. 4' x 4' Cast Iron Tree Grates (Urban Accessorics): 15,000.00
     ii. Moveable Planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): $6,189.00
   - Interior Atrium — $18,625.00
   - 3rd & 6th Floor Roof Gardens: Green Roofs and Planters
     i. Etera Green Roof 4.625" planting depth with 4.5" x 3.25" mill finish roof edge — $80,704.00
     ii. Moveable Planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): $7,920.00
     iii. Provide 1" – 1 ½" River Rock as ballast on the roof surface to border green roof.
     Provide Protection Board (Delta Drain) over roof membranes.
     Mobilize aggregate to both roof levels. Install, distribute, grade and wash aggregate.
     Clean up and remove all landscape debris — $6,388.00
   - 6th Floor Conference Court (Wedding Deck) including area where skylights have been removed
     i. Plantings — $89,092.00
     ii. Moveable planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): $27,629.00
     iii. See Alternate Deduct (D.1) for Work in This Area
     iv. Trade Contractor requires 60 to 90-day notice to procure 6th Floor tree materials
   - 7th Floor Recreation Court (Pool Deck)
     i. Moveable Planters in Aluminum Powder Coat to Match Tournesol Shadow (PMS 425): $46,400.00

B. Include all Freight Charges — $13,240.00 / $2,000.00

C. Trade Contractor has procured trees as detailed in Purchase Order #270 dated 1 March 2016 in the amount of Plus WSST (Level 1 and Level 6). This cost is deducted from the Trade Contract Sum detailed in Paragraph (A) above. Balance of deduction to be invoiced 12/2016 — ($59,435.00)

D. Provide drainboard as necessary at all locations except for Green Roofs. The installation of drainage board shall maintain the integrity of any waterproofing installed by others.

E. Provide Standpipe inserts to drains.

F. Tower Crane will not be available to Trade Contractor. Trade Contractor shall utilize the permanent freight elevators to deliver any material that can be so accommodated. Owner will coordinate and provide hoisting for materials that do not fit into the freight elevator.

G. Prior to the installation of Site Works (by others), Trade Contractor shall inspect and ensure that all relevant sleeves are installed correctly.

H. Green roofs shall be installed 2-3 months in advance of completion.

I. Trade Contractor shall clean each area and remove all generated debris at the direction of Sodo Builders.

J. EXCLUSIONS

- Do Not Provide South Rooftop landscaping and moveable planters (SEE ALTERNATE A7 BELOW)
- Do Not Provide Cable Anchors for Green Walls
  i. Trade Contractor is aware that the 3rd Floor Roof planters are 24" high. Trade Contractor shall assist in the coordination of planters and green wall cabling
- Do Not Provide cable stay eyebolts in concrete planters (provided by Concrete Contractor)

K. ALTERNATES: Trade Contractor requires 30-day notice prior to the exercise of any Alternate.

- Provide Tournesol Wilshire Collection Fiberglass Moveable Planters in lieu of Aluminum Powder Coat Planters

A1. Esplanade Moveable Polygon Planters:	ADD:	$8,354.00
A2. Third & Sixth Floor Moveable Planters	ADD:	$1,258.00
A3. Seventh Floor Moveable Planters	ADD:	$17,850.00
A4. South Rooftop Moveable Planters	ADD:	$8,722.00
A5. 6th Floor Wedding Deck Moveable Planters	ADD:	$25,621.00

- A.6 Provide Live Roof Maxx @ 8" soil depth (8.5" x 3.25" Roof Edge) at Third & Sixth Floor Roof Gardens in lieu of Etera Green Roof — ADD: $58,596.00
- A.7 Provide Landscaping to South Tower Rooftop — ADD: $7,900.00
  i. Provide 21 no. Moveable Planters in Aluminum Powder Coat (6' x 2' x 2'): ADD: $19,995.00
- D.1 Do Not Provide landscaping work at 6th floor Conference Court — DEDUCT: $89,092.00
- D.2 Do Not Provide Moveable Planters 21No. at 6th floor Conference Court — DEDUCT: $27,629.00
- D.3 Do Not Provide River Rock as shown on the 3rd and 6th Floor Roof Gardens. — DEDUCT: $6,388.00

CSI Code 328400 – Irrigation $89,240.00

To provide all labor, materials, freight, equipment and the like as required to:

L. Supply and Install Exterior Irrigation Systems at Street Level, 3rd Floor, 6th Floor and 7th Floor

M. Scope of Work for Irrigation extends to building envelope. Copper lines from inside building to envelope shall be provided by MacDonald Miller Facilities Solutions. Trade Contract shall coordinate with and "free-issue" the following materials to MacDonald Miller:

- At Ground Level:
  - i. 1 no. 1,5" Double Check Valve Assembly
- At Level 3:
  - i. 1 no. 1" Double Check Valve Assembly
  - ii. 1 no. 1" Master Valve
  - iii. 2 no. 1" Solenoid Valves
  - iv. 4 no. 1" Ball Valves
  - v. 4 no. 1" Unions
  - vi. 8 no. 1" Nipples
- At Level 7
  - i. 1 no. 1" Double Check Valve Assembly
  - ii. 1 no. 1" Master Valve
  - iii. 1 no. 1" Flow Sensor
  - iv. 5 no. 1" Solenoid Valves
  - v. 10 no. 1" Ball Valves
  - vi. 10 no. 1" Unions
  - vii. 20 no. Nipples

N. Scope of Work for Irrigation includes the provision of all required controllers. Cochran Electric shall provide power to controllers and conduit only between controllers and control valves / flow sensors. The Trade Contractor shall pull all necessary wiring through conduit provided by others.

O. Trade Contractor shall clean each area and remove all generated debris at the direction of Sodo Builders.

P. EXCLUSIONS:

- Do Not Provide irrigation to South Tower Level 18 and Roof (under Phase II contract)

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:
Not to Exceed 90 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Documents.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- LEED Requirements;

1. All sealants, adhesives, primers, paints, carpets and wood must be submitted to and approved by 255 S King St LP prior to using them onsite. Submittals to include "Trade Contractor EQ4 Form" and backup documentation on manufacturer's letterhead

2. Backup documentation is required for each item submitted for EQ credit 4
3. Trade contractor must provide 255 S King St LP with LEED credits MR4 and 5 submittals in a timely manner including "Trade Contractor Material Content Form"
4. Backup documentation is required for each material that has recycled content stating pre-consumer and post-consumer content for each item. Note that "industry" averages are not sufficient; actual values are needed
5. Backup documentation is required for each material that is manufactured and harvested within 500 miles of the jobsite stating harvest and manufacturing locations on formal letterhead from manufacturer. For materials that are heavily recycled, such as steel, the harvest location should be the scrapyard or recycler that the steel was purchased from
6. 255 S King St LP reserves the right to withhold payment on any invoice until LEED submittals are satisfactory

- Noise Reduction;

1. All equipment and especially mufflers are to be maintained in good working order
2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
5. Where feasible, equipment operations lifts rather than drag to minimize material handling noise

- ~~Historic Site;~~

1. ~~Trade contractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.01, 79.105 and WAC Chapter 25.48~~

- Before commencing work, trade contractor will go over the schedule with the superintendent, deliver to the office trade contractor contact information sheet, subtier contractor and supplier list, insurance certificate, site specific safety plan with MSDS sheets and Click Safety certifications

- Participation in the Click Safety program is mandatory. All costs associated with the program are the responsibility of the trade contractor. Click Safety applies to all trade contractors and their sub-tier onsite personnel

- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 1 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment

- ~~Time sheets, material and equipment invoices to be included in monthly invoice.~~

- Trade contractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite

- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings

- Parking will not be provided by 255 S King St LP

- Pollution liability insurance is not applicable

- Trade contractor to provide submittals bound in notebooks and an electronic copy

- ~~Trade contractor to provide a complete BIM model, 2 hard copy sets and 1 electronic disk copy of as-builts of all completed work.~~

TRADE CONTRACT

THIS AGREEMENT was made and entered into this 31st of July, 2014, by and between:

255 South King Street LP
2700 Hanford Pl # 100
Seattle, WA 98134
TEL: 206-971-7680
FAX: 206-622-6130

the OWNER, and
Northwest Construction, Inc.
1403 140th Pl NE, Suite #101
Bellevue, WA 98007
TEL: 425-453-8300
FAX: 425-453-8404

the TRADE CONTRACTOR.

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

Time & Material Not to Exceed: One Million, Thirty One Thousand, Seven Hundred Thirteen Dollars and Seventy Five Cents Plus WA Sales Tax ($1,031,713.75).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project"):

255 S King St Construction
Seattle, WA 98104

For

255 South King Street LP

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified on the listed attached Exhibits (A), and in accordance with the drawings and specifications for the construction prepared by:

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work included as identified in Specification Sections noted below.

			Total	$382,860.00

4. To complete all work as described in Paragraph 9 within the Contract Time as follows:

   32 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction:
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
  4. To the extent feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations like rather than drag to minimize material handling noise
- Historic Site;
  1. Subcontractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, subcontractor will go over schedule with superintendent, deliver to the office an insurance certificate, site specific safety plan and MSDS sheets
- Please invoice 255 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 2 & 3 of this agreement, W.S.E.T. and a lien waiver to speed the release of payment
- Time sheets, material and equipment invoices to be included with monthly invoice
- Subcontractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Pollution liability insurance is not applicable
- Submittals must be bound in notebooks
- Subcontractor to provide 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

Crushed Rock Base / AC Pavement Restoration	200	SY	$51.00	$10,200.00
			Total	$382,860.00

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   32 Working Days

5. To provide evidence of insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction:
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving locations
  4. To the extend feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations like rather than drag to minimize material handling noise
- Historic Site:
  1. Subcontractor is to comply with reference regulations regarding archeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, subcontractor will go over schedule with superintendent, deliver to the office an insurance certificate, site specific safety plan and MSDS sheets
- Please invoice 243 S King St LP. Be sure to include with your invoice a schedule of values using the CSI cost codes provided on page 2 & 3 of this agreement, W.S.H.T. and a lien waiver to speed the release of payment
- Time sheets, material and equipment invoices to be included with monthly invoice
- Subcontractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Pollution liability insurance is not applicable
- Submittals must be bound in notebooks
- Subcontractor to provide 2 hard copy sets and 1 electronic disk copy of as built of all completed work

Crushed Rock Base / AC Pavement Restoration	200	SY	$51.00	$10,200.00
			Total	$382,860.00

4. To complete all work as described in Paragraph 3 within the Contract Time as follows:

   32 Working Days

5. To provide evidence of adequate insurance as required by this TRADE CONTRACT.

6. To provide Submittals and/or Shop Drawings as required by the Trade Contract Drawings.

7. To faithfully perform all other terms and conditions of this TRADE CONTRACT.

8. Additional Requirements:

- Noise Reduction:
  1. All equipment and especially mufflers are to be maintained in good working order
  2. Engine enclosures to be used on non-portable equipment when the engine is the dominate source of noise
  3. Stationary equipment should be placed as far away from sensitive receiving locations as possible. Where this is infeasible, or where noise impacts may still be potentially significant, portable noise barriers shall be placed around the equipment with the opening directed away from the sensitive receiving location
  4. To the extent feasible, substitute hydraulic or electric models for impact tools such as jack hammers, rock drills and pavement breakers to reduce construction and demolition noise
  5. Where feasible, equipment operations idle rather than drag to minimize material handling noise
- Historic Site;
  1. Subcontractor is to comply with reference regulations regarding archaeological resources (RCW Chapters 27.34, 27.44, 27.53, 79.02, 79.105 and WAC Chapter 25.48
- Before commencing work, subcontractor will go over schedule with superintendent, deliver to the office an insurance certificate, site specific safety plan and MSDS sheets
- Please invoice 255 S King St LP. Be sure to include with your invoices a schedule of values using the CSI cost codes provided on page 2 & 3 of this agreement, W.S.S.T. and a lien waiver to speed the release of payment
- Time sheets, material and equipment invoices to be included with monthly invoice
- Subcontractor daily report must include # of workers onsite, hours worked per day, a short description of work completed and identification of any problems or issues onsite
- Attendance is mandatory at weekly safety meeting as well as weekly coordination meetings
- Pollution liability insurance is not applicable
- Submittals must be bound in notebooks
- Subcontractor to provide 2 hard copy sets and 1 electronic disk copy of as builts of all completed work

TRADE CONTRACT

THIS AGREEMENT was made and entered into this 28th of October, 2014, by and between:

255 South King Street LP
270 S Hanford St # 100
Seattle, WA 98134
TEL: 206-971-7899
FAX: 206-623-0338

the OWNER, and
Northwest Construction, Inc.
1408 140th Pl NE, Suite #101
Bellevue, WA 98007
TEL: 425-453-8380
FAX: 425-453-8404

the TRADE CONTRACTOR

THE OWNER, for the full, complete, and faithful performance of this TRADE CONTRACT, agrees to pay the TRADE CONTRACTOR on the following basis:

Time & Material Not To Exceed: Three Million, Three Hundred Forty Four Thousand, Six Hundred Fifty Dollars and Zero Cents plus WA Sales Tax ($3,344,650.00).

IN CONSIDERATION THEREFORE, THE TRADE CONTRACTOR AGREES AS FOLLOWS:

1. To furnish and perform all work as described in Paragraph 3, for the construction of (Project, Title & Location) (the "Project");

255 S King St Construction
Seattle, WA 98104

For

255 South King Street LP

the OWNER, and the representative of the OWNER authorized to interpret and judge the performance of the contract and named as the architect, engineer, contracting officer or otherwise which representative shall be designated as the OWNER'S authorized agent; and all of which shall be done timely, faithfully and in strict compliance with this Agreement and the TRADE CONTRACT DOCUMENTS identified as the listed attached Exhibits (A, B, C, D, E), and in accordance with the drawings and specifications for the construction prepared by:

Freiheit & Ho Architects Building Permit Resubmittal #2 Preliminary Construction Issue Plans Dated 06/27/14
Freiheit & Ho Architects Project Manual Specifications Dated 06/27/14
DCI Engineers Building Permit Resubmittal #2 Preliminary Construction Issue Plans Dated 06/27/14
Exhibit A Construction Schedule
Exhibit B Subordination of Lien Rights
Exhibit C Wrap Up Insurance
Exhibit D Wrap Up Insurance Manual
Exhibit E ClickSafety

2. To be bound by all laws, government regulations, and orders. Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to be inserted herein and this contract shall be read and enforced as though it were included herein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon the application of either party this contract shall forthwith be physically amended to make such insertion or correction.

3. To provide all necessary supervision, management, services, engineering, testing, materials, labor, supplies, attachments, equipment, plant sundries, appurtenances and/or any other act or necessary thing required to diligently and fully perform and complete all work required to complete the Project, in strict accordance with the TRADE CONTRACT DOCUMENTS. All work shall be performed in accordance with applicable manufacturer's instructions and industry best practices unless in conflict with the TRADE CONTRACT DOCUMENTS. All work as specified in section(s) including but not limited to:

OW Funding Plan and Partnership for Management and Operations RES
D14

CITY OF SEATTLE

RESOLUTION 31768

A RESOLUTION relating to funding for construction and long-term operations and management of public spaces on the Central Waterfront; reaffirming the overall funding plan for the Central Waterfront Improvements and the principles that will guide implementation of these improvements; outlining the process for formation of a Local Improvement District and completion of a fundraising plan for philanthropy; and identifying a framework for an agreement with the non-profit Friends of Waterfront Seattle to operate and manage public spaces on the Central Waterfront.

WHEREAS, in January 2011, the Seattle City Council (Council) adopted Resolution 31264, creating the Central Waterfront Committee (CWC) to oversee development of the waterfront conceptual design and framework plan, ensuring robust and innovative public engagement, identifying public and private funding sources, and establishing the foundation for a lasting civic partnership; and

WHEREAS, in August 2012, the Council adopted Resolution 31399, which stated the City's support of the Central Waterfront Concept Design and Framework Plan based on broad and inclusive public engagement over two years; and

WHEREAS, Resolution 31399 endorsed a Central Waterfront Strategic Plan (Strategic Plan), which established a funding plan and set of action steps to implement improvements to Seattle's Central Waterfront, including endorsement of a funding strategy which called for leveraging a mix of public, private, and philanthropic sources to achieve the public's vision for the Central Waterfront; and

WHEREAS, through Resolution 31399 Council recognized that other cities had successfully established relationships with non-profit organizations to provide consistent, strong leadership to realize visionary plans for complex signature public spaces; and

WHEREAS, the Strategic Plan recommended that the City develop long-term relationships with third-party, non-profit entities to perform a range of services, including operations, maintenance, and programming to provide a safe, accessible, and high-quality parks experience to the public; and

WHEREAS, via Resolution 31399, the City supported the creation of the non-profit Friends of Waterfront Seattle (Friends) to advocate for implementing the Central Waterfront Framework Plan and Concept Design;

WHEREAS, Friends was incorporated in 2012 to champion the "Waterfront Seattle" Program through outreach initiatives, to raise the funds necessary to complete its construction and to ensure the Central Waterfront Improvement Program's long-term success as a vibrant public destination through ongoing maintenance and programming; and

WHEREAS, in March 2014 the Central Waterfront Committee, citing other cities' successful arrangements with non-profit organizations in managing public spaces, recommended the City consider a direct contract with Friends to perform a range of services for the renovated Central Waterfront, including operations and management; and

WHEREAS, in August 2014, Seattle voters approved creation of the Seattle Park District, and funds collected by the District pay for operations and maintenance of Seattle parks, including an annual $3.5 million budget dedicated to operation and maintenance of the Central Waterfront parks and public spaces; and

WHEREAS, in 2015, Seattle City Council adopted Ordinance 124865 authorizing execution of an Agreement for Activation and Programming of Westlake Park and Occidental Square Park, which transferred programming, management, concessions, and most permitting

responsibilities of Westlake Park and Occidental Square Parks to the Downtown Seattle Association (DSA); and

WHEREAS, since the signing of that Agreement, the DSA has partnered with Friends, Seattle Parks Foundation, Alliance for Pioneer Square, and the Parks and Recreation Department to successfully demonstrate that non-profit partnerships for programming and activation of public spaces can increase access, vibrancy, and safety for all users; and

WHEREAS, since July 2015, Friends has been working with the City to implement a pilot program to provide programming and activation along certain sections of the Central Waterfront; and

WHEREAS, in September 2016, the City and Friends entered into a joint funding agreement to construct the Pier 62/63 Phase 1 Rebuild, in which Friends committed to contributing $8 million of the $29 million cost; and

WHEREAS, in the Pier 62/63 Phase 1 Rebuild joint funding agreement, the City and Friends indicated their intent to enter into an Operating Agreement for the Operation and Maintenance of the renovated Piers; and

WHEREAS, the City and Friends seek to develop a partnership to provide operations and management services to the Central Waterfront in order to protect the investment of public and private individuals and organizations; NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Central Waterfront Guiding Principles. The City of Seattle (City) intends to complete the planned improvements to the Central Waterfront consistent with the Central Waterfront Guiding Principles (Guiding Principles) endorsed in Resolution 31264,

creating a public asset that engages the entire city, remains focused on public uses and activities that attract people from all walks of life, and provides a "waterfront for all." The City's funding plan and subsequent efforts to complete the Central Waterfront improvements will be guided by the Guiding Principles called for in that resolution. The City expects outcomes from the Central Waterfront Improvements to be consistent with the City's Race and Social Justice Initiative, such as:

- improved public spaces that encourage use by people of all ages, incomes, and abilities, and support free expression; and
- public access to high-quality parks and recreation, enhanced by regular programming, concessions that support the public's use and enjoyment of the Central Waterfront, and free public access to civic and cultural events; and
- living wage jobs associated with operating and maintaining waterfront parks and public spaces for local citizens regardless of their age, ethnicity, gender, or sexual orientation.

Section 2. Overall Funding Plan. The City Council (Council) reaffirms its endorsement of an integrated funding plan for the waterfront which leverages a range of funding sources to pay for the Central Waterfront Improvement Program. This plan, previously endorsed in Resolution 31399, includes a Local Improvement District (LID) for certain components of the Central Waterfront Improvement Program to be funded by property assessments to be levied upon benefited properties, philanthropic donations raised by the Friends of Waterfront Seattle (Friends), and substantial investments from the City and State of Washington (State). Since that time, City commitments to the Central Waterfront Improvement Program have been reflected in the City's Capital Improvement Plan (CIP), and State commitments have been formalized in a

Funding Agreement between the City and the State that was approved by Council and executed on August 2, 2017.

Section 3. Local Improvement District. The City intends to create an LID in 2018 to fund a portion of the Central Waterfront Improvement Plan. The LID assessment amounts will be determined through the development of a special benefit analysis, in which a licensed real estate appraiser or appraisers will undertake an analysis that identifies the special benefit to real estate in the downtown area associated with the improvements included with the LID. The LID will assess downtown property owners for a portion of the special benefit.

The Office of the Waterfront (OW), the Department of Finance and Administrative Services (FAS) and the City Clerk's Office will utilize a review process that will provide affected property owners the opportunity for review and comment of the proposed plans, as described in Attachment A.

Section 4. Philanthropic Campaign Plan. Since adoption of the Waterfront Strategic Plan in 2012, Friends has worked to lay the foundation for a successful capital campaign to raise $100 million in private philanthropy to help fund the Central Waterfront Improvement Program. Friends is committed to raising these funds and is confident that capacity and interest are in place in the donor community in the Seattle region to allow the Friends to achieve its goal. Friends and the City have entered into an early campaign for the Pier 62 Rebuild, and Friends has exceeded its milestones for fundraising for that initial project and have raised $5.1 million as of July 31, 2017.

The City and Friends recognize that philanthropy and the LID leverage each other and that funding milestones for each are mutually reinforcing. Friends' fundraising efforts to date have confirmed that Friends' ability to meet the overall goal for philanthropic support depends

upon (i) confidence that the Central Waterfront capital improvements will be funded as described in Section 2 above, including the funding identified in the Funding Plan to be provided by the LID, (ii) the full scope of improvements being completed by the City, and (iii) sufficient funding for operations and maintenance retained over time consistent with the current plan. Similarly, the City's successful formation of the LID is supported by a strong early indication of a successful philanthropic capital campaign with indications that the total philanthropic goal of $100 million will be met over time. Subject to these conditions and prior to the introduction of the LID formation ordinance to Council, Friends will submit to the City Budget Director for the City's approval a Fundraising Plan for the $100 million philanthropic campaign anticipated in the Funding Plan. The Director of the OW and the City Budget Director will inform the Mayor and Council regarding the results of their review of the Fundraising Plan and its approval or rejection. The parties will work together to ensure the Fundraising Plan, including a pledge and payment schedule, is realistic, has clear goals and milestones, and provides sufficient funding to meet the cash flow needs of construction. The parties currently anticipate that this plan will include initial pledges representing no less than 25% of the total amount of Friends' fundraising commitment. The parties anticipate these pledges will be confirmed prior to the formation of the LID, with the City Budget Director having opportunity to review these commitments. These initial pledges will include funds raised as part of the early campaign for the Pier 62 Rebuild. The City Budget Director will monitor progress on the Fundraising Plan and inform the Mayor and Council of the status of the fundraising on a regular basis. OW will coordinate with Friends to support its implementation and administration of the Fundraising Plan.

Section 5. Partnership for Management and Operations. The Central Waterfront Strategic Plan, endorsed by Council through Resolution 31399 in 2012, cited the benefits other cities have

found in collaborating with nonprofit entities for the operations and management of urban parks and public spaces. In that same resolution, the City supported the creation of the non-profit Friends of Waterfront Seattle to advocate for implementing the Central Waterfront Framework Plan and Concept Design. In 2012, Friends was created as a 501(c)(3) non-profit organization. Since then, the City has further formalized a relationship with Friends through contractual agreements for outreach, operating of the Waterfront Space, programming and activation on the Central Waterfront, and the joint funding of Pier 62/63.

Building on these past actions, the City recognizes that partnerships with non-profit organizations like Friends will support the success of the Central Waterfront as a public space, provide opportunities to enhance daily maintenance, provide special programming, and expand access to the waterfront park consistent with the City's Guiding Principle to create a "waterfront for all."

To this end, the City intends to work with Friends to reach an agreement for the long-term provision of high quality operation and management services commensurate with the quality of programming envisioned in the public planning for the waterfront and as reflected in the improvements included in the Central Waterfront Improvement Program. The City and Friends have developed a relationship in the stewardship of waterfront parks and open spaces which supports an overall role for Friends in overseeing operations and management of the finished park. OW and the Parks and Recreation Department (SPR) will work towards an agreement to formalize Friend's role as the primary non-profit operation and management provider for the Central Waterfront Improvement Program in the form of an Operating Agreement. It is anticipated that this Agreement will include the provision of maintenance by a

dedicated and consistent team of SPR staff, funded through a $3.5 million Seattle Park District (District) allocation.

Section 6. Future Legislative Actions. In order to advance the final elements of the Waterfront Funding Plan, including forming an LID and developing a partnership for operations and management between the City and Friends, the Council understands that staff from OW, working in collaboration with its partners and other City departments, plan to submit the following items for legislative action:

1. LID Formation. A series of legislative actions will be necessary to form the LID. The City intends to submit the following, commencing in 2018: a resolution stating Council's intent to form the LID; an ordinance to form the LID that will include a preliminary LID assessment roll; a resolution setting assessment roll hearing date(s); and a subsequent ordinance to confirm and levy the final LID assessment roll. OW and FAS intend to submit all necessary legislation to support the timing of an LID formation and assessment roll confirmation as outlined in Attachment A.
2. Fundraising Plan. In 2018, a legislative action setting forth the manner by which the City will accept the payments made by Friends in accordance with the pledge and payment schedule outlined in the Fundraising Plan to be submitted to the City Budget Director for the City's approval.
3. City/Friends Operating Agreement: In 2018, OW, SPR and Friends will jointly develop a long-term agreement for operating and maintaining park elements of the Central Waterfront. The Operating Agreement, which will be formalized by the City through an ordinance, is anticipated to include the following elements:

a. Maintenance. A scope of work that identifies baseline maintenance to be provided by the appropriate City department as well as enhanced maintenance to be provided by a dedicated and consistent team of SPR staff working in partnership with Friends. OW, SPR, and Friends will jointly develop this scope of work and a staffing plan. It will include the following, subject to bargaining where necessary:

i. A scope and level of service for all aspects of the new waterfront public spaces jointly agreed upon by Friends, OW and SPR.

ii. Staffing levels to support maintenance of waterfront public spaces, utilizing the $3.5M in dedicated baseline funding from the District, subject to future review and adjustment to reflect actual costs and inflation. All staff funded by the District will be full City employees and receive all compensation, benefits, and representation accorded to City staff in comparable positions. Friends will identify and commit to fill key management positions necessary to successfully oversee maintenance operations, including an Operations Director.

iii. Protocols for Friends to request work changes and provide SPR direction in a way that allows for timely maintenance and meets the agreed upon level of service.

iv. Protocols for Friends to provide input into the selection of SPR staff and request staffing changes, and to integrate volunteer opportunities that supplement park operations.

v. Protocols for work locations, conditions, and attire which achieve the goal of a dedicated waterfront maintenance team under the leadership of Friends, including training as appropriate to perform the necessary duties at the agreed upon level of service.

b. Programming and Activation. To successfully provide a strong and diverse activation and programming schedule, protocols will be established that allow Friends to permit and program waterfront spaces, host free public events, and manage concessions. Friends shall be required to host a minimum number of free public events each year in partnership with community-based organizations across the city. Any event revenues shall support park operations and programming. Any permit requests related to free speech demonstrations will be handled in a similar manner as in the SPR and Downtown Seattle Association (DSA) contract for the operations and management of Westlake and Occidental parks with Friends managing all permitting requests except for those relating to free speech demonstrations, which would be managed by SPR.

c. Phasing. Allowance for phased operation and management of elements of the Waterfront Improvement Program as they are finished.

d. Budget. An integrated funding plan for operations of the park spaces that includes, but is not limited to, the District's $3.5 million budget allowance for the Central Waterfront Improvement Program; revenue generated and expended by Friends through concessions, permitting, and special events; and private fundraising by Friends.

e. Accountability. A set of annual reporting requirements that provide accountability and information to the City and the public including: an annual report to Council; data and performance metrics on the level of public use and enjoyment of waterfront public spaces; and an accounting of funds and leveraging through partnerships.

f. City Oversight and Participation. Participation by professional City staff in Friends organization and operations including two (2) permanent ex-officio seats on Friends' Board of Directors, one to be the Superintendent of SPR and one to be the Director of OW (or Mayor's designee).

g. Agreement Review. A term of no less than five (5) years, at which point both parties will review and adjust the Operating Agreement as necessary to ensure it meets the goals as stated therein.

h. Oversight Committee. Creation of an Oversight Committee concurrent with the opening of the waterfront park improvements that will review status of park maintenance, daily programming, special events, public safety, and other operational aspects to advise the Council, the Mayor, SPR, and Friends on a regular basis.

Adopted by the City Council the 11th day of September, 2017, and signed by me in open session in authentication of its passage this 11th day of September, 2017.

President _____ of the City Council

The Mayor concurred the 12th day of September, 2017.

Edward B. Murray, Mayor

City of Seattle
Mayor Jenny A. Durkan

April 24, 2018

Honorable Bruce A. Harrell, President
Seattle City Council
City Hall, 2nd Floor
Seattle, WA 98199

Dear Council President Harrell:

I am pleased to transmit the attached Resolution of Intent to Form the Waterfront Local Improvement District ("LID"), a proposed $200 million property assessment that is a cornerstone of the Waterfront Seattle funding plan. This Resolution is the first in a series of legislative actions that Council will consider to form the LID in 2018.

The Waterfront LID has been central to the Waterfront Seattle funding plan since 2012, when the City Council endorsed the Waterfront Seattle Strategic Plan. The plan identified a Local Improvement District as a fair and reasonable tool to ensure downtown property owners who will benefit from the new parks and open spaces contribute to a portion of the cost of their construction. If formed, the LID will leverage nearly $400 million in City and State investments in basic infrastructure and another $100 million of private philanthropy committed to the park improvements. By leveraging City, State, LID and philanthropic funds together, we are able to deliver a scale of public improvement on our Central Waterfront that wouldn't otherwise be possible.

This Resolution, if approved, is an important first step to ensure all parties are informed of the potential LID. It will ensure affected property owners are notified of the potential assessments and have the opportunity to make their voices heard.

Thank you for your consideration. If you have any questions, please do not hesitate to contact Marshall Foster, Director of the Office of the Waterfront and Civic Projects, at (206) 684-8413.

Sincerely,

Jenny A. Durkan

Jenny A. Durkan
Mayor of Seattle

CITY OF SEATTLE

RESOLUTION 31817

A RESOLUTION declaring the intention of the City Council of The City of Seattle to order the construction of the Seattle Central Waterfront Improvement Program, and to create a local improvement district to assess a part of the cost and expense of both carrying out certain of those improvements against the properties specially benefited thereby; notifying all persons who desire to object to such improvements to appear and present their objections; and establishing July 13, 2018, as the date the Council's consideration of the Waterfront Local Improvement District becomes a pending quasi-judicial proceeding.

WHEREAS, in January 2011, the Seattle City Council ("Council") adopted Resolution 31264, creating the Central Waterfront Committee (CWC) to oversee development of the waterfront conceptual design and framework plan, to ensure robust and innovative public engagement, to identify public and private funding sources, and to establish the foundation for a lasting civic partnership for the implementation of improvements to Seattle's Central Waterfront with the removal of the Alaskan Way Viaduct; and

WHEREAS, in August 2012, the Council adopted Resolution 31399, which stated support by The City of Seattle ("City") for the Central Waterfront Concept Design and Framework Plan, which was based on broad and inclusive public engagement over two years by the City and the Central Waterfront Committee; and

WHEREAS, Resolution 31399 also endorsed a Central Waterfront Strategic Plan ("Strategic Plan"), which established a funding plan and set of action steps to implement improvements to Seattle's Central Waterfront, including endorsement of a funding strategy which called for leveraging a mix of public, private, and philanthropic sources, including a Waterfront Local Improvement District (LID), to achieve the public's vision for the Central Waterfront; and

WHEREAS, subsequent to endorsement of the Concept Design, Framework Plan, and Strategic Plan for the Central Waterfront, the City established the Central Waterfront Improvement Program in the City's Capital Improvement Plans, including the use of the Local Improvement District to fund a portion of the total program; and

WHEREAS, over the five years since endorsement of the Concept Design, Framework Plan, and Strategic Plan and establishment of the Central Waterfront Improvement Program, the City has invested approximately $129 million in improvements to the Central Waterfront from a range of local funding sources, and the State of Washington has committed $193 million toward its completion;

WHEREAS, in September 2017, the Council adopted Resolution 31768, which reaffirmed the overall funding plan for the Central Waterfront improvements, as well as the principles that will guide the implementation of these improvements, and outlined a process for the formation of the LID; NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THAT:

Section 1. Declaration of Intent. It is the intention of the City Council to order improvements to Seattle's Central Waterfront, including the construction of a new Alaskan Way/Elliott Way surface street providing access to and from downtown, new parks, paths, and access to Elliott Bay ("Improvements"), all as shown in Exhibit C to this resolution, which is incorporated by reference. It is the intention of the City Council, pursuant to RCW 35.43.040 and other applicable law, to order the improvement of the properties within the area mapped as Exhibit B to this resolution, which is incorporated by reference, and those portions of the

Improvements designated as Local Improvement District (LID) Improvements, as described in Exhibit C to this resolution ("LID Improvements").

The Improvements shall be in accordance with the plans and specifications prepared by the Seattle Office of the Waterfront and Civic Projects (OWCP), as a division of the Seattle Department of Transportation, and may be modified by the City as long as modification does not affect the purpose of the LID Improvements after formation of the LID.

Section 2. Estimated Cost and Expense. The total estimated cost and expense of design and construction of the Improvements is declared to be approximately $700 million, including the estimated costs of administration, creation, and formation of the LID. The City intends that a portion of the Central Waterfront Improvements shall be funded by the LID. The cost and expense of the LID Improvements, including administrative costs, shall be assessed against the property specially benefited by the LID Improvements, which shall be included in the LID to be established, embracing as nearly as practicable all the property specially benefited by the LID Improvements. The City intends that the balance of the cost and expense of the LID Improvements shall be paid by the City and philanthropic donations from individuals and organizations, consistent with the City's overall funding plan for the Central Waterfront. Actual assessments may vary from estimated assessments as long as they do not exceed a figure equal to the increased true and fair value the LID Improvements add to the property. In no case shall the City levy a total amount in excess of $200 million in the confirmed final assessment roll for the LID. The City shall be obligated to deliver the LID improvements once a final assessment roll is established and shall not pursue any future supplemental assessments to cover additional costs accrued during construction.

Section 3. Notice of Public Hearing. The City Clerk, on behalf of the Director of Transportation, is authorized and directed to give notice of the adoption of this resolution and of the date(s), time(s), and place(s) fixed for the public hearing(s), setting forth the nature of the proposed LID Improvements, the total estimated cost, and the estimated benefits of the proposed LID Improvements to the particular lot, tract, or parcel of land for each owner or reputed owner of any lot, tract, parcel of land, or other property within the proposed LID. The City Clerk shall mail such notice at least 15 days before the date fixed for public hearing to the owner or reputed owner of the property, as shown on the rolls of the King County Assessor at the address shown thereon, as required by law.

This resolution also shall be published in its entirety in at least two consecutive issues of the official newspaper of the City, with the date of the first publication at least 15 days before the date fixed for the public hearing(s).

Section 4. Time of Public Hearing and Protest Procedures. The City Council hereby determines that the hearings shall be held before a hearing examiner, with the City Clerk to select and engage the hearing examiner(s) necessary to conduct the hearings herein described and to enter into contracts as necessary for such hearing examiner services.

All persons who may desire to object to the LID Improvements are notified to appear and present those objections at hearings before a hearing examiner to be held on the dates below, which times and places are fixed for hearing all matters relating to the LID Improvements and all objections thereto.

Public Hearing Date and Time	**Public Hearing Location**
Friday, July 13, 2018 (two sessions) 9:00 a.m. – 1:00 p.m. 2:00 p.m. – 6:00 p.m.	Washington State Convention Center Ballroom 6E 700 Pike Street Seattle, Washington

Public Hearing Date and Time	Public Hearing Location
Tuesday, July 17, 2018 5:00 p.m. – 9:00 p.m. Wednesday, July 18, 2018 5:00 p.m. – 9:00 p.m. Saturday, July 28, 2018 9:00 a.m. – 1:00 p.m.	Seattle City Hall 600 4th Avenue Seattle, Washington

Section 5. Application of the City Council's Rules for Quasi-Judicial Proceedings. Notwithstanding provisions relating to matters becoming pending in the City Council's Rules for Quasi-Judicial Proceedings, July 13, 2018, shall be the date the Council's consideration of the LID Improvements becomes a pending quasi-judicial proceeding.

Section 6. Submittal of Information. The Director of OWCP, on behalf of the Director of Transportation, is directed to submit and certify to the City Council on or prior to June 1, 2018, an estimate of the cost and expense of the proposed Improvements together with all papers and information about the proposed Improvements, a description of the boundaries of the proposed LID, and a statement of what portion of the cost and expense of the Improvements should be borne by the property within the proposed LID. This information, together with a detailed copy of the preliminary assessment roll and the plans and assessment maps of the proposed Improvements, shall be filed with the City Clerk.

Section 7. Section Headings. Section headings in this resolution are used for convenience only and shall not constitute a substantive portion of this resolution.

Adopted by the City Council the 22nd day of May, 2018, and signed by me in open session in authentication of its adoption this 22nd day of May, 2018.

Bruce O. Harrell

Element	Description
Promenade	A continuous public open space extending along the west side of Alaskan Way from King Street to Pine Street.
Overlook Walk	An elevated pedestrian bridge situated at the terminus of the Pike/Pine corridor, would include several buildings, an elevated lid over the surface street, open space with excellent view amenities, and an accessible pedestrian pathway with many connections between the Pike Place Market and the waterfront.
Pioneer Square Street Improvements	Streetscape and new roadway/ sidewalk improvements to portions of S Main Street, S Washington Street, Yesler Way and S King Street from Alaskan Way/First Avenue east to 2nd Avenue S. The improvements would create pedestrian-friendly links from Pioneer Square to the waterfront.
Union Street Pedestrian Connection	A universally accessible pedestrian link between the new waterfront and Western Avenue. An elevated pedestrian walkway and elevator extends from the southwest corner of Union Street and Western Avenue to the eastern side of Alaskan Way.
Pike/Pine Streetscape Improvements	Pedestrian improvements along Pike and Pine streets from First Avenue to Ninth Avenue, providing enhanced pedestrian access to and from the Pike Place Market and waterfront.
Waterfront Park	A rebuilt pier park located at the base of Union Street, would provide a unique atmosphere for social gathering/performance spaces with excellent view amenities.

Seattle City Council: Civic Dev, Public Assets & Native Communities Committee
Friends of the Waterfront – May 16, 2018

Speaker	Time	Testimony
Madam Chair	00:00	Introductions: **Eric McConaghy**, Council Central Staff, **Maggie Walker**, Co-Chair of the Central Waterfront Committee and Chair of the Board of Friends of the Waterfront of Seattle, **Marshal Foster**, Director of City's Waterfront and Civic Projects, **Joshua Curtis**, Partnership's Manager at the Office Waterfront and Civic Projects, **Dory Kosto**, Finance Manager at the Office Waterfront and Civic Projects
Madam Chair	01:05	Briefly Friends of the Waterfront, how much money raised, what you are committed to raise, share who you are – committee chair apologized for rudeness at public hearing and being booed – and contribution from philanthropy:
Maggie	01:38	Thank you Council Members. Friends of Waterfront Seattle was created about 6-years ago as the stewardship partner to the Project which was started about 10 years ago under Mayor Nichols. We have taken upon ourselves to make sure that this Project has significant philanthropic funding. From the very beginning our plan was to leverage the support from property owners downtown to create an opportunity for folks around the region, to give significant philanthropic gifts towards this iconic downtown Project. So we have a goal of raising $100 million, which we committed to in an MOU with the City in September – I believe it was. . . is that correct *(it is)*. So that was accepted and it was contingent on the passage of the LID for $200 million, as well. So we agreed that there would be a series of benchmarks, that we would have to have pledges in-hand for everything to continue to move forward. So to date, we have raised $28.8 million towards this Project. And that is from a number of donors who have great faith that this is a Project that will change the face of this City and who are willing, and they do not necessarily live in the City, they live in the region, but they believe in the vision of this Project and that this is the moment we need to do it. We have the opportunity to make a huge difference in our City. So we had agreed to have $25 million in hand by September, and we have exceeded our goal and will continue to fundraise. But we do not have certainty around this Project, and as you might imagine that adds a little bit of excitement to the prospect of raising money from philanthropists. So much of this money is contingent upon the formation of the LID. So it is very unusual for people to contribute to a public project, but it is a model that works in a lot of other cities, and it is one we have tried to formulate particularly around this Project.
Madam Chair	03:52	Let me ask two follow-up questions for members not previously on the committee: you promised to raise $25 million by September 2017 and you did – Thank You, now you are up to $28.8 million as of today's date, I understand that Friends of the Waterfront as you said started 10-years ago, 6-years ago?
Maggie	04:17	No, I think we were incorporated – Heidi will remember *(2012)*, so 6-years.
Madam Chair	04:32	So with that, again for the viewing public, Friends of the Waterfront has a board of 30 members?

Maggie	04:46	35, I think at this point. And we have a letter that we have submitted to all the council members today, outlining what we have our accomplished to this point that has a list of our board members.
	04:50	*Cross talk*: Is that part of our materials or did you just send it via email? It was just sent. But I have. Great. Thank you, I appreciate you handing it to my colleague. And that has a board list for you. Oh, that was an email sent earlier this morning. I saw it.
Council Member	05:05	Thank you Madam Chair. Could you, just for the purpose of the public record, read some of the names of the members of your board of directors so that I think we have a better understanding of the type of representation that has been at the table since 2012?
Maggie	05:22	So I will just read through the list, if that would help. **Mary Bass** *(Wells Fargo)*, **Carol Binder**, former Director of The Pike Place Market, **Tom Byers**, who you met earlier who is on the Parks Commission, **Chris DeVore**, who runs a small startup, Incubator here in town, **Lynn Dodson**, who is the Secretary of the State Labor Council, **Gene Duvernoy**, who until a week ago was head of Forterra, **Stephanie Ellis-Smith**, **Olive Goh** *(Citi Private Bank)*, **Patrick Gordon** *(ZGF Architects LLP)*, **Seth Grizzle**, **Leslie Hanauer**, **Sandra Jackson Dumont** *(Lucas Museum of Narrative ART)*, **Gerry Johnson**, **Paul Keller** *(Mack RE Dev)*, **Martha Kongsgaard**, **Dan Kully**, **Carla Lewis**, **Kyle McCoy**, **Kollin Min** *(Bill & Melinda Gates Foundation)*, **Glenn Nelson**, **John Nesholm** *(LMN Architects)*, **Jeannie Nordsrom**, **Estella Ortega**, **Bob Ratliff**, **Stuart Rolfe** *(Wright Hotels)*, **Charles Royer** *(Former Seattle Mayor)*, **Ryan Smith**, **Brady Pinaro Walkinshaw** *(Grist)*, myself ***(Maggy Walker)***, **Charles Wright** *(Merrill Gardens)* and **David Woo**.
Madam Chair	06:18	Great. Thank you Anything else from my colleagues.

Chapter 6
Cumulative Effects

This chapter describes how the effects of the Elliott Bay Seawall Project may contribute to the environmental effects of other past, present, and future projects in the project vicinity. The Elliott Bay Seawall Project would be constructed in the midst of a robust waterfront and concurrently with other capital projects, such as the Alaskan Way Viaduct Replacement Project, Waterfront Seattle, and the Seattle Multimodal Terminal at Colman Dock Project.

In contrast to the potential direct and indirect effects of the build alternatives or the No Action Alternative (discussed in Chapters 4 and 5), cumulative effects are those that could result from the combination of individual effects of multiple actions over time. Cumulative and incremental effects can result in unintended and undesirable environmental changes despite efforts to mitigate the project-specific direct and indirect effects of the proposed action and the previously completed or reasonably foreseeable actions.

The purpose of a cumulative effects analysis is to identify the potential for incremental increased environmental effects caused by a series of actions, which, when left unmitigated, can reach significant proportions. It is also helpful for decision-makers in evaluating how sustainable a proposed project is likely to be in the future and how it might interact with other projects that are reasonably foreseeable but have not yet been built.

Defining Cumulative Effects

SEPA requires that cumulative effects be considered in an EIS (WAC 197-11-792). Although SEPA does not specifically define "cumulative effects," the term is defined under NEPA as "the impact on the environment which results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions. Cumulative effects can result from individually minor but collectively significant actions taking place over a period of time." (40 CFR 1508.7)

6.1 How Cumulative Effects Were Evaluated for the Elliott Bay Seawall Project

In order to determine the potential cumulative effects of the project, the analysis considered the relationships between the direct and indirect effects of the project alternatives, past and present actions, and other reasonably foreseeable future actions (RFFAs) on the resources of concern. The expected cumulative effects for the project were identified according to a process recommended by the President's Council on Environmental Quality (CEQ 1997) and considered how past and present actions have already affected the geographic area. Those past and present actions (developments) have changed several of the environmental elements discussed in this Final EIS relative to their original conditions and continue to influence current trends.

The year 2030 (the project design year) was used as the future temporal boundary for the cumulative effects analysis for all the environmental elements (also referred to as resources or disciplines) discussed in Chapters 3, 4, and 5.

The past temporal boundary, or environmental reference point, for the cumulative effects analysis was determined on the basis of the unique history of each resource. Lasting effects due to past actions have accumulated in the project vicinity since the mid-nineteenth century, starting with the first Euro-American settlements along the Duwamish River in the 1850s, and have continued to shape the sequence of development that has occurred in the area. The built and natural environments within the project vicinity have been transformed to varying degrees by actions such as timber harvesting and processing, commercial fishing, ship building, railroad development, aircraft manufacturing, and other heavy industry, as well as the development and expansion of the state and federal highway systems and urban residential communities with their supporting infrastructure. These actions are discussed in the following overview and subsequent subsections, which are organized by discipline.

Like the past temporal boundaries, the geographic boundaries used for the cumulative effects analysis vary by resource. These boundaries may be natural ecological boundaries or sociocultural boundaries selected to ensure that all the potential effects are included. They also may take into account the distance at which an effect can influence a particular resource.

The list of RFFAs that were considered in the cumulative effects analysis in combination with the Elliott Bay Seawall Project is a result of collaboration and coordination among other government agencies and private parties to ensure that all appropriate present and future actions were considered. These future projects, along with relevant recently completed and ongoing projects, are shown in Figure 6-1 and summarized at the end of this chapter (Table 6-1).

The Council on Environmental Quality

The Council on Environmental Quality (CEQ) coordinates Federal environmental efforts and works closely with agencies and other White House offices in the development of environmental policies and initiatives. CEQ was established within the Executive Office of the President by Congress as part of NEPA and additional responsibilities were provided by the Environmental Quality Improvement Act of 1970.

Figure 6-1. Reasonably foreseeable future actions in the Elliott Bay Seawall Project vicinity

6.2 History of the Elliott Bay Seawall Project Area

The project area for the Elliott Bay Seawall Project has experienced significant changes since the mid-nineteenth century. Both the built environment and the natural environment in the project vicinity have been widely shaped by the development that has occurred since the earliest Euro-American settlements along the Duwamish River and on the Alki peninsula in 1851. These changes set in motion cultural, biological, and demographic trends that are the focus of the cumulative effects analysis.

Historically, the shoreline of Elliott Bay consisted of gravel beaches, intertidal mudflats and sand flats, and vegetated wetlands bordered by steep upland bluffs. This natural environment supported a wide range of habitats and provided diverse resources that influenced the locations and periods of occupation by the Duwamish people, who lived in villages on the shores of Elliott Bay before European contact.

The abundance of hardwood reserves in the area influenced nonnative settlement in the area. Only 1 year after the arrival of Europeans around eastern Elliott Bay in 1852, Henry Yesler's first lumber mill began production near the southern end of the existing seawall. Development north of Yesler's Mill was limited by the steep bluffs. Over time, however, regrading and filling took place, wharves were built, and commercial activities along the shoreline grew more diverse, fundamentally altering the form and function of the waterfront. Railroad companies obtained rights-of-way along the shoreline of Elliott Bay, and Railroad Avenue (then extending north along the waterfront) was soon constructed of "piles and rip rap and broken rock and filled in with earth from the hills" (Bass 1937). Once the railroad trestle was completed, additional wharf construction took place. Most of Railroad Avenue and the adjacent structures were destroyed in Seattle's Great Fire of 1889, but they were quickly rebuilt along with many new docks.

Native Americans were largely displaced throughout Seattle's growth periods, but they maintained a presence along the waterfront in the early ages of Seattle's development. Many resided in temporary camps along the shoreline that were shared by transient traders and hop pickers. In the late nineteenth and early twentieth centuries, Native Americans, sailors, fishermen, and others lived near the waterfront in rooming houses and small dwellings clustered around sawmills, packing plants, and the railroad.

While the timber industry and strong trade ties with northern territories fueled Seattle's growth through the second half of the nineteenth century, the 1897 discovery of gold in Alaska precipitated the city's next development boom and unprecedented levels of activity along the waterfront. The population more than tripled between 1900 and 1910. This growth precipitated haphazard demolition and redevelopment of waterfront piers, as well as the construction of a new tunnel that would

carry rail traffic under the city to reduce congestion along Railroad Avenue. Nearly 500,000 cubic yards of fill from the tunnel construction were hauled away by rail car and dumped throughout Elliott Bay.

By the 1920s, many railroad facilities had moved to the filled tidelands south of downtown, where much of Seattle's industry was located. The City had constructed a concrete gravity seawall from S. Washington Street to Madison Street in response to unsafe conditions of the planked roadways and trestle pilings of Railroad Avenue. Railroad Avenue was back-filled with materials removed in the regrading of Jackson Street. In 1929, the railroads signed a new franchise agreement that limited through tracks along the central waterfront solely to the eastern side of the street, allowing the city to proceed with its plans to build a seawall along the rest of the waterfront.

Within another decade, marine transportation activities along the waterfront began to decline as trucks and cars competed for shipping and transport business. Construction of the Elliott Bay Seawall supported extensive commercial and transportation development along the waterfront: most notably, the opening of the Alaskan Way Viaduct in 1953, which significantly changed travel patterns and the visual character of the Seattle waterfront. By the late 1950s, shippers began consolidating cargo in large shipping containers, and freight sheds and warehouses on the piers were no longer needed. Instead of the narrow piers with storage sheds found on the downtown Seattle waterfront, large parking areas were required to accommodate cranes, trucks, and containers. South of Pier 48, the Terminal 37/46 complex was created by filling and joining several piers.

Throughout more than 100 years of urbanization, the downtown Seattle waterfront was fundamentally altered by filling, dredging, and grading along the shoreline and by the construction of infrastructure including the seawall, other shoreline armoring, and overwater structures. The historical shoreline topography is buried behind (landward of) and below the seawall. Upland areas, including Pioneer Square and Pike Place Market, were also fundamentally altered by urban development, expanding the realm of activities in the area of the seawall from primarily industrial maritime to a mix of commercial, residential, tourist, and institutional.

6.3 Transportation

The year construction began on the existing seawall (1911) was used as the environmental reference point for past and present development related to transportation. The original construction of the seawall resulted in an ongoing cumulative effect on the transportation network and an increasing demand for the movement of goods and services throughout the greater Seattle area.

The area considered for the analysis of cumulative effects on the transportation network includes the area within the Seattle regional traffic models, which extends throughout the Puget Sound region.

Past and Present Actions

Construction of the seawall supported extensive commercial and transportation development along the waterfront and throughout the study area. Most notably, the opening of the Alaskan Way Viaduct significantly changed the travel patterns in the study area. Over time, there have been incremental improvements to this and other major transportation corridors. These improvements along with associated changes in land use due to these transportation improvements (such as the growth of the Port of Seattle and increased freight traffic on Alaskan Way), have also resulted in cumulative changes in the seawall corridor in terms of transportation.

Reasonably Foreseeable Future Actions

The RFFAs most likely to affect congestion and access include the Alaskan Way Viaduct Replacement Project, the improvements associated with Waterfront Seattle, and the Elliott/Western Connector.

Cumulative Effects of the Build Alternatives

Adverse cumulative effects associated with transportation would primarily be limited to temporary effects during construction of the seawall, which coincides with construction of other RFFAs such as the Alaskan Way Viaduct Replacement Project which includes the demolition of the Alaskan Way Viaduct. Tunnel boring is estimated to occur between 2013 and 2014, with the new SR 99 tunnel opening for use in late 2015. The demolition of the downtown waterfront section of the Alaskan Way Viaduct is estimated to occur in 2016. These estimates suggest that Central Seawall construction would overlap with construction of RFFAs in the 2013 to 2016 timeframe. Traffic congestion would increase during this period, as would travel times due to road closures and detours.

Construction of the North Seawall would occur sometime after the completion of the Central Seawall, the demolition of the Alaskan Way Viaduct and the opening of the bored tunnel. The traffic analysis assumes a worst-case scenario for North Seawall construction, with the Elliott/Western Connector not in place. This would result in higher traffic volumes on the Alaskan Way surface street along the North Seawall than would be the case with the Elliott/Western Connector in place. If the Elliott/Western Connector is constructed before the North Seawall construction, the cumulative construction effects would be less than those reported in the EIS.

Once completed, the proposed alternatives would restore the roadway to existing conditions (2010) (with the addition of a second northbound lane adjacent to Colman Dock under Alternatives A and C). Therefore, the Elliott Bay Seawall Project would make a slight positive contribution to the improvements provided by the RFFAs, which would enhance the functionality of the transportation network by reducing congestion and improving traffic flow. The project would not significantly change the

transportation trends in the study area. The operational effects of the Elliott/Western Connector on Alaskan Way traffic flow is discussed further in Chapter 5.

Cumulative Effects of the No Action Alternative

The Minimal Damage scenario of the No Action Alternative is likely to result in occasional lane closures to facilitate routine maintenance or emergency repairs. Congestion caused by such closures, in combination with the construction of other planned projects such as the Alaskan Way Viaduct Replacement Project and the Seattle Multimodal Terminal at Colman Dock Project, would contribute adverse cumulative effects. The Loss of Functionality scenario would contribute to worse safety and congestion problems along the waterfront over time, which could affect the nature and timing of currently planned transportation improvements in the study area.

The Collapse of the Seawall scenario would contribute more substantially to cumulative effects than the other No Action Alternative scenarios or any of the build alternatives. The activities required to provide emergency access and repair of the seawall—combined with other RFFAs and the physical damage caused by the collapse—would result in widespread transportation impacts throughout the downtown area.

Mitigation for Cumulative Effects

Because adverse cumulative effects are construction-related, the City will focus mitigation measures on minimizing those temporary impacts. The City will coordinate with Metro, WSDOT, the Port of Seattle, local businesses, and neighborhoods to coordinate construction sequencing between projects. This will minimize potential effects to traffic and parking during construction of the seawall and the Reasonable Foreseeable Future Actions and encourage the use of public transit during construction.

6.4 Economics

Both local and regional economic effects were considered for the economics cumulative effects analysis. For local effects, the study area is based on neighborhood planning areas and census tracts between S. Jackson Street on the south, Broad Street on the north, First Avenue on the east, and Elliott Bay on the west. The regional geographic boundary includes the Seattle city limits and the surrounding central Puget Sound region (King, Snohomish, Pierce, and Kitsap Counties).

Past and Present Actions

The temporal boundary of the cumulative effects analysis for economics began in 1911, when seawall construction began. The seawall has provided a continuous influence on local and regional economies. In addition to the original construction of the seawall, other past and

present actions that have resulted in ongoing trends related to the economy include the development of the Port of Seattle and the Seattle waterfront as a center for commerce and transportation; the construction of the Alaskan Way Viaduct; and the development of the tourism industry in downtown Seattle, especially along the waterfront.

The Seattle waterfront has developed into an eclectic mix of operations: tourist, offices, residential buildings, restaurants, retail space, transportation hubs, and shipping. Tourist activity peaks along the waterfront during the summer season, and many businesses make most of their revenue during those months. Customers of businesses on the waterfront and east of Alaskan Way rely on on-street parking spaces and a linear lot running under the Alaskan Way Viaduct. Additionally, the redevelopment of the Belltown neighborhood from primarily commercial uses to a mixed-use and residential area has been a catalyst for new development in the northern end of the project area.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect economic resources in the study area. Based on the current anticipated construction schedules, construction of the Central Seawall would occur at the same time as the Alaskan Way Viaduct Replacement Project (Table 6-1).

Cumulative Effects of the Build Alternatives

Adverse cumulative effects associated with economic resources would primarily be limited to temporary effects during construction of the seawall, as the construction timeframe coincides with construction of other RFFAs described above. In general, concurrent construction activities associated with multiple projects in the downtown Seattle waterfront area would affect the local economy by limiting access to the waterfront and increasing traffic congestion. Construction of Alternative B is expected to take up to 2 years longer than Alternatives A and C. Therefore, the cumulative effects to the economy would be greater with this alternative.

Concurrent construction of the Elliott Bay Seawall Project and the Alaskan Way Viaduct Replacement Project (especially construction of the south portal of the tunnel) further limits access to local waterfront businesses due to the need for multiple construction staging areas, additional construction vehicles, and construction-related traffic. Tunnel boring is estimated to occur between 2013 and 2014, with the new bored tunnel opening for use in late 2015. Demolition of the downtown waterfront section of the Alaskan Way Viaduct is expected to occur in 2016. These timelines suggest that the Elliott Bay Seawall Project construction would overlap with the construction of the RFFAs in the 2013 to 2016 timeframe. When combined with the potential temporary economic effects of these RFFAs due to traffic congestion, detours, and reduced parking supply along the waterfront, the Elliott Bay Seawall

Project construction would contribute to cumulative economic effects in the study area.

Construction of the North Seawall would occur after completion of the Central Seawall, the bored tunnel, and the demolition of the Alaskan Way Viaduct. The Draft EIS, in a worst-case analysis, assumed that the Elliott/Western connector would not yet be constructed or would be constructed concurrently with North Seawall construction. This would result in the higher traffic volumes indicated in the EIS along the North Seawall. This high level of congestion, in turn, would make access to businesses along this section of Alaskan Way more difficult and likely have an economic effect on these businesses. In particular, passenger arrivals and departures (by charter bus, taxi, and car) at the Bell Harbor Pier Cruise Terminal and at the Victoria Clipper terminal, as well as vehicle access to both, would be adversely affected.

Under any of the build alternatives, completion of the Elliott Bay Seawall Project and other RFFAs would contribute to improvements in the long-term economic conditions in the study area. The post-construction benefits to the economy would be driven by improved public safety, mobility, and access along a revitalized waterfront, which would attract more residents, visitors, and associated revenues. The improvements may also attract additional visitors to the general vicinity of the waterfront and have beneficial economic effects on adjacent areas, especially Pioneer Square, Pike Place Market, and Olympic Sculpture Park, by increasing visitor activity and spending in those areas. The timing and extent of these improvements would depend on the local and regional economic cycles of growth. Other than the extended temporary adverse cumulative effects associated with Alternative B due to the longer construction period, there likely would be no substantive differences between the three build alternatives in terms of their cumulative effects. The cumulative effects of the Elliott Bay Seawall Project and the other RFFAs are not likely to change the trajectory of economic trends in the study area.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario, the No Action Alternative would contribute incrementally to adverse economic effects in the study area related to public safety, future investment, and development in the short term. Congestion due to temporary lane closures, temporary loss of access to commercial entities along the waterfront, and general safety concerns on Alaskan Way and the roadway network in the vicinity of the Elliott Bay Seawall would worsen over time as the seawall deteriorates. Other planned projects and investments in the area may be cancelled because of the increasing risk and uncertainty associated with seawall failure or collapse in the near future. Under the Loss of Functionality scenario or Collapse of the Seawall scenario, the cumulative effects would be similar to those of the build alternatives, although the specific outcomes would depend on the other concurrent projects at the time of the collapse. Without the other planned

transportation improvement projects, increased traffic congestion and travel times for freight movement in the study area would adversely affect the economy.

Mitigation for Cumulative Effects

SDOT will coordinate with other City departments, WSDOT, and others to minimize the combined construction-related effects of concurrent projects in the vicinity of the seawall. Cumulative traffic and parking issues resulting from concurrent projects that could affect local businesses will be addressed by the various agencies involved, as follows:

- During seawall construction, distribute timely information to the public indicating alternate ways of accessing facilities on the downtown Seattle waterfront.
- Coordinate construction detours as necessary with other projects.
- Work with public and private entities that own and operate the various waterfront facilities to encourage local residents and visitors to continue to visit and patronize the waterfront during construction of the concurrent projects.

No long-term cumulative effects to economic resources are anticipated following seawall construction.

6.5 Noise and Vibration

The geographic area considered for the analysis of cumulative effects on noise included on-shore locations within approximately 1,000 feet of the construction work zone for the Elliott Bay Seawall Project, as well as in-water and more distant on-shore locations, where applicable. Airborne noise and ground-borne vibration levels decrease rapidly with increasing distance from the source, thereby resulting in a geographically limited area of potential effects.

Past and Present Actions

The temporal boundary of the cumulative effects analysis for noise and vibration began in 1953, which is the year the Alaskan Way Viaduct opened. The construction of the viaduct as the major north-south thoroughfare in Seattle resulted in an ongoing cumulative effect on noise and vibration in the project vicinity. Traffic on the Alaskan Way Viaduct is the predominant source of noise in the study area, and natural noises such as leaves rustling, light surf, and bird vocalizations are limited in many locations. In addition to the initial construction of the Alaskan Way Viaduct, other past and present actions that have contributed to trends related to noise and vibration include the development of the Port of Seattle and the Seattle waterfront as a center for commerce and transportation.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect noise and vibration in the study area. Based on the current anticipated construction schedules, the RFFAs that would most likely contribute to noise and vibration due to construction-generated disturbance are the Alaskan Way Viaduct Replacement Project (including demolition of the Alaskan Way Viaduct), the improvements associated with Waterfront Seattle, the Seattle Multimodal Terminal at Colman Dock Project, and the Elliott/Western Connector (Table 6-1).

Cumulative Effects of the Build Alternatives

Adverse cumulative effects associated with noise and vibration would be limited to temporary effects during construction of the seawall, as the construction timeframe coincides with construction of other RFFAs described above. In general, cumulative noise and vibration effects would result because noise and vibration from construction of the Elliott Bay Seawall Project would occur at the same time or in close succession to construction of the RFFAs. This temporal overlap may increase the amount of noise and extend the duration over which some receptors are exposed to construction-related noise.

Because Seattle is one of the busiest ports in the United States, a wide range of noise-producing activities along the waterfront will continue over time, beyond the construction of the seawall. The construction activities associated with the Elliott Bay Seawall Project and other nearby RFFAs would be temporary and periodic; therefore, they would not constitute long-term incremental increases in the overall noise environment.

Operation of the proposed alternatives would not have any effect on the noise environment.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario for the No Action Alternative, routine and emergency maintenance activities would not have a substantial effect on noise and vibration, either alone or when coupled with the RFFAs. Under the Loss of Function and Collapse of the Seawall scenarios, the construction-related effects of the No Action Alternative combined with those of the other RFFAs could result in temporary cumulative construction effects similar to those described for the build alternatives, depending on the timing of the collapse relative to the other projects in the vicinity. No further cumulative effects on noise and vibration associated with the No Action Alternative are expected.

Mitigation for Cumulative Effects

Beyond the measures for mitigating the effects of project construction described in Chapter 4, no mitigation for cumulative noise and vibration effects is anticipated as the project will not generate noise and vibration after construction.

6.6 Cultural, Historic, and Archaeological Resources

The geographic area considered for the analysis of cumulative effects on cultural, historic, and archaeological resources is the APE used to evaluate construction and operational effects in Chapters 4 and 5. Although the southern extent of the seawall is located at S. Washington Street, the APE extends one block farther to S. Main Street to allow the consideration of potential adverse effects on the built environment. The northern boundary is generally the north side of Broad Street.

Past and Present Actions

The temporal boundary of the cumulative effects analysis for cultural, historic, and archaeological resources began in 1911, when seawall construction began. The installation of the seawall influenced the patterns of use and development within the waterfront area. In addition to the original construction of the seawall, other past actions affecting cultural, historic, and archaeological resources include earlier interaction between humans and the environment that modified the nature of the archaeological record, especially during the large-scale construction projects that characterized the Seattle waterfront during the historic period. The majority of these past actions have contributed to a trend of declining historic and archaeological resources in the study area by removing historic structures and displacing, or limiting access to, archaeological resources.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect cultural, historic, and archaeological resources in the study area. Other projects that may have effects on cultural, historic, and archeological resources include the Alaskan Way Viaduct Replacement Project, the Seattle Multimodal Terminal at Colman Dock Project, and the improvements associated with Waterfront Seattle. Each of these projects would either directly affect a historical or archaeological resource or is in proximity to such a resource.

Cumulative Effects of the Build Alternatives

Adverse effects from the proposed build alternatives may contribute to cumulative effects on archaeological resources from construction of the RFFAs, if any of the RFFAs involve excavation within and beneath the historic fill or along the waterward side of the seawall. Loss or

degradation of these cultural resources would contribute to the cumulative reduction of the finite number of potential archaeological sites associated with the Seattle waterfront. Such reductions could result from the proposed waterfront projects if construction for these projects occurs concurrently with that of the Elliott Bay Seawall Project. These potential cumulative effects are not expected to alter the historical trends for these resources in the study area.

Temporary adverse cumulative effects may occur to historic resources due to the concurrent construction of the seawall, in combination with RFFAs described above. If construction of the seawall occurs concurrently with other waterfront projects and the Elliott/Western Connector, these concurrent actions would cumulatively increase the temporary adverse effects on the historic Pike Place Market and waterfront piers by further limiting access, increasing roadway congestion, and exacerbating noise and air quality effects. However, no permanent loss of historic resources is expected to result from these projects.

Following construction, the South Downtown Rezone (an RFFA included as project 18 in Table 6-1) provides incentives for historic preservation and encourages appropriate development in the historic districts. The North Parking Lot Development at CenturyLink Field is also expected to enhance the Pioneer Square Historic District in the long term. Operations of any of the proposed alternatives would contribute to the enhancements within the study area that expected to result from these proposed actions and other RFFAs in the vicinity of the Pioneer Square Historic District.

No permanent adverse cumulative effects on historic buildings or structures are expected with any of the seawall alternatives.

Cumulative Effects of the No Action Alternative

No cumulative effects related to cultural, historic, or archaeological resources have been identified for the No Action Alternative.

Mitigation for Cumulative Effects

The construction-related mitigation measures described in Chapter 4 will avoid or minimize the cumulative effects of the proposed alternatives that will occur during construction. SDOT will coordinate the construction of the proposed projects with all other applicable agencies to minimize the effects on historic and archaeological resources.

6.7 Energy Resources

The cumulative effects analysis for energy resources used a regional geographic boundary that includes the greater Seattle area in which energy would be consumed and GHG emissions would occur as a result of construction equipment and worker vehicle trips.

Past and Present Actions

The temporal boundary of the cumulative effects analysis for energy resources began in 1910, for two reasons: (1) Seattle City Light was established in 1910 as a municipal utility providing power to the project area, and (2) Seattle Steam Company, another important energy provider in the study area, had also been recently established as a local provider. The original provision of heat and power to the project area facilitated commercial and industrial development and produced an ongoing cumulative effect on energy resources.

Today's demand for energy in the study area is largely influenced by transportation needs, and the energy supply relies on fossil fuels to meet the demand. Beginning in the 1970s, fuel efficiency standards and policies, as well as growth management strategies such as VISION 2020 and Transportation 2040, have contributed to general reductions in energy consumption trends. However, as discussed in Chapter 3, transportation remains the predominant consumer of energy in Washington State and the project area. Because Washington uses hydropower for much of its electricity (nearly three-fourths of the state electricity generation), the electricity sector in the study area contributes a lower percentage of GHGs in the region than the national average. The transportation sector, on the other hand, is the major contributor of GHGs throughout the state and Seattle proper (Center for Climate Studies 2007).

The City's overall carbon footprint was about 8 percent smaller in 2005 than it was in 1990 (City of Seattle 2008b). This reduction was due to energy conservation efforts and Seattle City Light's policy of achieving "net zero" GHG emissions in the delivery of electricity through the use of conservation, the use of renewable energy, and the purchase of carbon offsets.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect energy resources in the study area. Based on the current anticipated construction schedules, the projects considered most likely to result in cumulative effects on energy resources, mainly as a result of increased traffic congestion throughout downtown Seattle include the Alaskan Way Viaduct Replacement Project, the improvements associated with Waterfront Seattle, and the Elliott/Western Connector (Table 6-1).

Although detailed construction energy consumption estimates were not calculated for each of the RFFAs, each RFFA was assessed qualitatively to determine how the operation of the new seawall might contribute to the energy effects of these projects.

There is substantial land use and population growth projected for Seattle over the next 20 years. It is important to note that much of the expected increase in traffic and resulting increase in fuel consumption is

related to this projected growth. Although a substantial shift from single-occupancy vehicle travel to transit is expected between existing conditions and future conditions, which would help to minimize fuel consumption throughout Seattle, the overall expected growth would still result in additional vehicles on the roadway network.

Cumulative Effects of the Build Alternatives

Cumulative energy effects can occur when there is a change in energy consumption (or supply) due to more than one project taking place at the same time or projects being constructed at some time in the foreseeable future. Most of the projects considered in the cumulative effects analysis involve construction activities, and construction is the primary source of potential cumulative energy effects when the seawall construction is concurrent with the construction associated with the other RFFAs.

Although temporary adverse cumulative effects on energy would result from addition of the seawall construction to RFFAs, these effects would not place any significant stress on the existing energy systems in the region or in the study area. The overlapping construction schedules for the Elliott Bay Seawall Project and the other RFFAs would result in temporary adverse cumulative effects involving GHG emissions associated with project-related vehicles and equipment. However, these effects would be minor in terms of overall emissions in the region.

When considered in concert with the RFFAs in the project vicinity, operation of the new seawall is not expected to result in any cumulative effects related to energy use. Similarly, the operation of the new seawall would not result in long-term cumulative effects on GHG emissions.

Cumulative Effects of the No Action Alternative

Under the No Action Alternative, no substantial cumulative effects on energy resources are expected. Although future traffic volumes would continue to increase with the forecasted population growth, fuel consumption and GHG emissions would merely be shifted to other areas of Seattle and the region if the seawall collapses either partially or fully. Under the Loss of Functionality or Collapse of the Seawall scenarios, the cumulative effects of seawall reconstruction would be similar to those described for the build alternatives.

Mitigation for Cumulative Effects

No mitigation measures for cumulative effects on energy use are proposed. Although the cumulative effects of the GHG emissions resulting from the Elliott Bay Seawall Project are not expected to be significant, there are certain elements of the construction plans for the seawall and nearby projects that could be coordinated to ensure that the cumulative GHG emissions are minimized. Traffic plans for overlapping projects could include detours and strategic construction

timing to minimize traffic congestion and engine idling in the project area. SDOT will coordinate with other City departments and regional transit agencies to promote ridesharing efforts and transit use for construction workers on the Elliott Bay Seawall Project, as well as the other projects under construction at the same time.

6.8 Land Use, Shorelines, and Parks and Recreation

The geographic boundary for the cumulative effects analysis is based on neighborhood planning areas in the vicinity of the Elliott Bay Seawall Project and is generally bounded by S. Washington Street on the south, Broad Street on the north, First Avenue on the east, and Elliott Bay on the west. The study area also includes the piers that extend waterward from the seawall and the immediate shoreline along Elliott Bay adjacent to Alaskan Way.

Past and Present Actions

The temporal boundary of the cumulative effects analysis for land use, shorelines, and parks and recreation begins in 1911, when seawall construction began. The seawall influenced the patterns of use and development within the waterfront area. Other past and present actions that have shaped ongoing trends related to land use and recreational resources include the development of the Port of Seattle and the Seattle waterfront as a center for commerce and transportation, the development of the tourism industry in downtown Seattle, and general growth and development in Seattle and the region.

Water-dependent activities continue on the waterfront, including operations of passenger vessels, ferries, and cruise ships. In recent decades, development along the downtown Seattle waterfront has broadened to include use as a major center for tourism, recreation, retail shopping, meeting and convention activities, and entertainment. Residential development in the upland area also has increased substantially.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect land use, shorelines, and parks and recreation resources in the study area.

The projects evaluated in the cumulative effects analysis for land use, shorelines, and parks and recreation include the potential changes to Terminal 46 at the southern edge of the seawall, the improvements associated with the Seattle Multimodal Terminal at Colman Dock Project, long-term plans to expand the Seattle Aquarium, the Alaskan Way Viaduct Replacement Project, and improvements associated with Waterfront Seattle. When these projects are taken as a whole, the

downtown Seattle waterfront would experience substantial improvements in infrastructure over existing conditions.

Cumulative Effects of the Build Alternatives

Land Use and Shorelines

In general, the construction-related effects of the proposed build alternatives, in combination with those of the RFFAs, would result in temporary adverse cumulative effects on land use and recreational resources in the study area. The seawall project would increase both the overall intensity and the overall duration of construction work in the area proposed under the RFFAs. Cumulative adverse effects would include vehicle and pedestrian detours and traffic and parking issues. Construction of Alternative B is expected to take up to 2 years longer than Alternatives A and C and is, therefore, more likely to have overlapping construction schedules with other projects along the waterfront.

The cumulative effects of completion of the Elliott Bay Seawall Project and the RFFAs would be a structurally stable and aesthetically improved waterfront from Washington Street to Broad Street. This could provide impetus for property owners on both side of Alaskan Way to make further investments in their properties. Property owners on the east side of Alaskan Way also may decide to build, rebuild, or expand their buildings within the limits of the current zoning code. These effects would be in line with overall land use trends in the study area and would generally be considered positive.

Parks and Recreation

The cumulative adverse construction effects discussed for land use and shorelines could also complicate access to parks and recreational facilities in the area. New detours and changes in access due to the construction of the Elliott Bay Seawall Project may compound construction effects associated with the RFFAs, discouraging residents and tourists from visiting parks and recreational facilities. To the extent that the construction effects of the Elliott Bay Seawall Project further reduce the attractiveness of the waterfront to visitors when combined with the effects of other nearby RFFAs with concurrent construction schedules, the project may result in reduced revenues for tourist-oriented businesses in the vicinity during construction, especially during the non-summer months, and increased duration during which these businesses are subjected to the construction effects of projects in the vicinity.

The construction of Alternative B is expected to take up to 2 years longer than Alternatives A and C and is, therefore, more likely to have overlap with other projects along the waterfront. The longer construction duration would result in a longer period of reduced access to parks and recreational facilities and, therefore, would make a greater contribution to cumulative effects. However, the cumulative

construction effects of the project and the RFFAs are not expected to change long-term trends related to the use of parks and recreational facilities in the project area under any of the build alternatives.

All of the proposed build alternatives would result in long-term beneficial cumulative effects on parks and recreational facilities in the project vicinity. Once construction is completed, the cumulative benefit of the Elliott Bay Seawall Project with the completed RFFAs would be a revitalized waterfront from Washington Street to Broad Street. This could make the waterfront more attractive, resulting in more visitors (both local residents and tourists) to parks and recreational facilities along the waterfront.

Cumulative Effects of the No Action Alternative

The No Action Alternative would potentially result in long-term adverse cumulative effects on land use, shorelines, and parks and recreational facilities. If none of the proposed build alternatives are constructed, problems related to safety, aesthetics, and traffic congestion along the waterfront would become worse over time. Potential damage to parks and recreational facilities would adversely affect access to and use of lands in the project vicinity, including recreational facilities. The damage and subsequent repair work could interfere with the timing of and change the nature of future development and land use decisions in the project area. Under the Loss of Functionality or Collapse of the Seawall scenarios, the cumulative effects would depend on the other projects that are underway at that time.

Mitigation for Cumulative Effects

The City will coordinate active public information efforts for construction of the Elliott Bay Seawall Project with other projects in the vicinity to provide a consistent and comprehensive approach to informing the public of accessibility to the waterfront, available parking, and transit options.

Project staff will work closely with Seattle Parks and Recreation and the Seattle Aquarium to make sure that the project provides flexibility for future redevelopment or expansion of Waterfront Park, Pier 62/63, and the Seattle Aquarium.

6.9 Public Services and Utilities

The geographic boundary used for the cumulative effects analysis for public services and utilities extends east from the seawall to several blocks east of Alaskan Way (generally to First Avenue) and north from S. Washington Street to Broad Street. The boundary extends farther to encompass a larger area (greater downtown Seattle, Belltown, and SODO) where public services and utility systems are intricately related to those within the primary geographic boundary.

Past and Present Actions

The temporal boundary for the cumulative effects analysis for public services and utilities is 1911, the year seawall construction began, as the presence of the seawall solidified an active commercial corridor in which many local and regional utility providers located essential service lines and stations. As described in Chapter 3, a number of utilities have been sited in and along the Elliott Bay Seawall and the Alaskan Way corridor to serve Seattle's growing demands as it developed over the last century. In addition, essential public services such as a fire station and port facilities are located within the study area. Alaskan Way is also a key corridor for utilities serving a much wider area.

The current provision of public services and utilities in the study area is adequate to meet the existing demand. However, the location of these services and utilities in a liquefaction-prone area makes them vulnerable to damage due to seismic events.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect public services and utilities in the study area. Construction of the Elliott Bay Seawall Project, in combination with RFFAs, may increase the risk or frequency of service disruptions or potential damage to utility infrastructure. Projects that could affect utilities and public services are those dealing with utility relocations and disruptions in the immediate project area, such as the Alaskan Way Viaduct Replacement Project, improvements associated with Waterfront Seattle, and the Seattle Multimodal Terminal at Colman Dock Project (Table 6-1).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects by increasing the potential for service outages or damage to existing infrastructure. Utility outages could affect businesses and residential customers, and public services such as police and fire response could be affected due to road blockages and/or detours. The complexity of the relocations needed by various projects, and the critical nature of the utility infrastructure in downtown Seattle, could compound these effects.

Once construction is completed, the seawall in combination with other nearby RFFAs would result in cumulative long-term benefits through stabilization of the waterfront and incremental upgrades of utility infrastructure, thereby reducing the risk of future service disruptions to utility corridors on the waterfront. Operation of the seawall is not expected to result in any cumulative effects on public services.

Cumulative Effects of the No Action Alternative

Under the No Action Alternative, the Minimal Damage scenario in combination with the construction of planned projects such as the Alaskan Way Viaduct Replacement Project and other reasonably foreseeable citywide development patterns would result in additional interruptions in public services and utilities throughout the study area, similar to those noted for the build alternatives. These interruptions, which would result from occasional traffic detours and access restrictions due to routine maintenance or emergency repairs, would constitute an adverse cumulative effect. The Loss of Functionality scenario would result in worse disruptions in utilities and public services along the waterfront over time, which could interfere with the timing of and change the nature of RFFAs in the study area. The Collapse of the Seawall scenario would result in cumulative effects worse than the build alternatives due to the unplanned nature of the collapse followed by the need to rebuild.

Mitigation for Cumulative Effects

Because multiple projects will have overlapping construction schedules, the City will lead a coordination effort with other projects to minimize the construction effects on public services, public service providers, and utilities.

6.10 Social Resources

The geographic area considered for the analysis of cumulative effects on social resources and environmental justice populations is generally bounded by S. Washington Street on the south, Broad Street on the north, First Avenue on the east, and Elliott Bay on the west. The study area traverses several neighborhood planning areas, including the Pioneer Square, Commercial Core, and Belltown neighborhoods. The analysis of cumulative effects on environmental justice populations focused on a broader geographic area, including greater Seattle, King County, and the Puget Sound region.

Past and Present Actions

The temporal boundary for the cumulative effects analysis for social resources is the 1980s because population shifts associated with growth trends since that time have resulted in ongoing effects on social resources in the study area.

As discussed in Chapter 3, the population of Seattle and King County has grown steadily in the last several decades. The population of King County increased by 36.8 percent between 1980 and 2000, and by another 12 percent between 2000 and 2010. The population of Seattle increased 14.1 percent between 1980 and 2000, and another 8 percent between 2000 and 2010. Forecasts for the region indicate that historical growth trends will likely continue. In 2010, the percentage of minority populations in the geographic area of analysis was slightly less than the

percentage of minority populations in the city as a whole (see the Social Resources and Environmental Justice Discipline Report [Appendix B]).

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect social resources and environmental justice populations in the study area. Construction of the Seawall Project, in combination with RFFAs, may affect access to residences and social service agencies. The RFFAs most likely to contribute to these cumulative effects are the Alaskan Way Viaduct Replacement Project and the improvements associated with Waterfront Seattle (Table 6-1).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects to social resources and environmental justice populations. The combined effects would include increased temporary disruptions in access, traffic congestion, and increased noise levels in the project area. These combined effects could make it more difficult to reach social service providers in the project area, and are likely to displace homeless people who currently shelter under existing structures. However, based on the wide range of the population potentially affected by these disruptions, the seawall construction coupled with construction of the other RFFAs is not expected to result in disproportionately high and adverse effects on minority and low-income populations.

Over the long term, the Elliott Bay Seawall Project, in combination with other projects in the area, is likely to contribute to beneficial effects on social resources and environmental justice populations, including improved mobility and safety along the downtown Seattle waterfront. Pedestrian improvements constructed as part of the Elliott Bay Seawall Project, in combination with those planned as part of Waterfront Seattle improvements, would provide safer conditions for low-income residents and would increase community cohesion in the project vicinity, linking neighborhoods and providing opportunities for all residents to share in recreational activities.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario of the No Action Alternative, there would be minimal cumulative effects on social resources. In the long term, the No Action Alternative would adversely affect social resources and environmental justice populations in the study area because of increasingly degraded access to local social services and a general decrease in safety along the entire waterfront.

Under both the Loss of Functionality and Collapse of the Seawall scenarios, temporary adverse cumulative construction effects on social

resources and environmental justice populations resulting from projects with overlapping construction schedules would be similar to those noted for the build alternatives, including increased congestion on Alaskan Way and the surrounding roadways, and localized effects associated with dust, noise, access, and parking.

Mitigation for Cumulative Effects

Beyond the mitigation proposed above for construction effects on social resources and environmental justice populations, no further mitigation for cumulative effects is needed. The City will coordinate with other project sponsors to minimize construction effects, which in turn will reduce cumulative construction impacts.

6.11 Visual Resources

The geographic area considered for the analysis of cumulative effects on visual quality is the viewshed surrounding the project area, which includes Elliott Bay, West Seattle, the Kitsap Peninsula, and Olympic Mountains to the west; Alaskan Way and the Seattle skyline to the east; the Magnolia bluffs to the northwest; and the Duwamish industrial area to the southwest.

Past and Present Actions

The temporal boundary for the cumulative effects analysis related to visual resources begins with the development of the Duwamish industrial area, including the creation of Harbor Island in 1909 and completion of the Alaskan Way Viaduct in 1953, because these actions introduced major components of the human-made visual resources in the study area.

Within the project area, the construction of the piers, Bell Harbor Marina, Waterfront Park, Colman Dock, and Washington Street Boat Landing—as well as the Elliott Bay Seawall, the railing, and the exposed riprap stone revetment along the base of the seawall—have all contributed to Seattle's unique waterfront character. The angled piers reflect the waterfront's historical commerce and rail-yard origins and contrast with Seattle's street grid and seawall.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect the visual character of the study area. Other projects that may contribute to changes in the visual environment include the Alaskan Way Viaduct Replacement Project, the improvements associated with Waterfront Seattle, and the Elliott/Western Connector (Table 6-1).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects to the visual environment of the waterfront. The demolition of the downtown waterfront section of the Alaskan Way Viaduct is planned to occur in 2016. Both the Elliott/Western Connector and improvements associated with Waterfront Seattle are expected to be constructed between 2016 and 2020. These estimated construction timelines suggest that the seawall construction would overlap with the construction of the RFFAs in 2016 for Alternatives A and C or from 2016 to 2018 for Alternative B and would result in cumulative effects on visual resources during those periods. Such effects would include visual disruption and/or blockage of views by construction equipment, detour signage, excavated areas, stockpiles, and so forth.

Over the long term, any of the proposed build alternatives in combination with the other RFFAs likely would contribute to improved visual character and visual quality in the project area. Removal of the Alaskan Way Viaduct and rerouting of traffic into the bored tunnel would increase the visibility of the waterfront from city streets and buildings. Pavement, plants, railing, and other site furnishings installed as part of the project would become more visually apparent after the viaduct is removed, and the views toward the Seattle waterfront from piers, watercraft, and moorage areas would be improved. Once the viaduct is removed, implementation of the *Concept Design and Framework Plan for Seattle's Central Waterfront* is likely to lead to new road alignments, walks, streetscapes, overwater and upland park areas, and other site features (James Corner Field Operations 2012).

The CSO outfall upgrades included in the Seattle Combined Sewer System Upgrades may alter the character of the new seawall face. The modifications resulting from the Seattle Multimodal Terminal at Colman Dock Project could affect the views toward Elliott Bay and distant landforms from new upland and shoreline viewing areas, but they would not impede those views. Removal or modification of non-historic Pier 60 as part of the Seattle Aquarium expansion may improve visual character by increasing views toward Elliott Bay and may increase the unity of the visual environment by removing an encroaching element.

The surface improvements associated with the build alternatives would make a slight contribution to the improvements planned as part of the other RFFAs, and they would fall in line with the trend of improving visual resources relative to the environmental reference points. Combined, these improvements have great potential to cumulatively benefit visual resources in the project area.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario of the No Action Alternative, routine maintenance and emergency repair activities would have only a minimal effect on the visual quality changes resulting from the RFFAs.

Either the Loss of Functionality scenario or the Collapse of the Seawall scenario could interfere with the timing of and change the nature of the RFFAs, which would otherwise benefit visual quality in the project area, thereby resulting in an overall adverse effect. After a seawall failure, it can be assumed that future restoration and/or repair actions would incrementally benefit the visual quality and character of the area.

Mitigation for Cumulative Effects

The project will result in only minor temporary cumulative effects on visual quality, and the majority of the effects will be beneficial. Therefore, no mitigation for cumulative effects on visual resources is proposed.

6.12 Fish, Wildlife, and Vegetation

The geographic boundary used in the cumulative effects analysis for fish, wildlife, and vegetation focuses primarily on the area extending from S. Washington Street in the south to Broad Street in the north (Piers 48 through 70), Western Avenue in the east, and the approximate 50-foot bathymetric contour to the west (which generally corresponds to the outer edge of the piers). However, because effects on local biological resources can potentially extend farther into Elliott Bay, organisms and habitats found in deeper waters were also considered. The biological resources included in the analysis are all species present in the study area, including those protected by state or federal agencies, such as fish and marine mammals that are on list of species protected under the Endangered Species Act.

Past and Present Actions

The temporal boundary for the cumulative effects analysis related to fish, wildlife, and vegetation began in 1916, the year the seawall was constructed. Although other commercial and industrial development had occurred on the waterfront before the seawall construction, the replacement of the entire natural shoreline in the study area with an armored shoreline resulted in a lasting influence of fish, wildlife, and shoreline vegetation.

Historically, the project area consisted of gravel and sand beaches, shallow shorelines, and vegetated wetlands bordered by steep bluffs (see the Fish, Wildlife, and Vegetation Discipline Report [Appendix L]). The Elliott Bay Seawall Project would be constructed in an area where the habitat has been substantially altered and degraded over the last century. Through more than 100 years of urbanization, the downtown Seattle waterfront was fundamentally altered by filling, dredging, and grading along the shoreline. The construction of infrastructure, including the seawall, bulkheads, and overwater structures has virtually eliminated the intertidal zone in the study area. Upland areas also have been fundamentally altered by urban development, which has left virtually no natural habitat intact. The upland habitat that remains has

been fragmented and degraded by pollution, disturbance, and the introduction of exotic species.

It can be assumed that past projects include all those that have occurred since the Euro-American settlement began in the area and that have initiated and perpetuated the substantial degradation of natural habitats and species. Although all of the natural shoreline in the study area has been replaced by the seawall, adjacent areas with less armoring retain some natural function. Nevertheless, the net cumulative effect of past actions on native vegetation and fish and wildlife habitat in the project vicinity has been adverse.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect fish, wildlife, and vegetation in the study area. Construction of these other projects is likely to affect stormwater facilities and/or require in-water construction. These projects include the Alaskan Way Viaduct Replacement Project, improvements associated with Waterfront Seattle, the Seattle Multimodal Terminal at Colman Dock Project, the Seattle Aquarium expansion, the Seattle Combined Sewer System Upgrades, and the Elliott/Western Connector (Table 6-1).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, could result in temporary adverse cumulative effects to fish, wildlife, and vegetation. These effects would be primarily project- and site-specific; the only other nearby in-water work with which they are likely to occur simultaneously are the improvements associated with the Seattle Multimodal Terminal at Colman Dock Project. Because the construction-phase effects of the Elliott Bay Seawall Project would have subsided before many of the RFFAs would be implemented, the cumulative effects on water quality in Elliott Bay and, therefore, on aquatic resources, could consist of occasional temporary exceedances of water quality standards over a prolonged period. This would be more likely to occur if on-site BMPs are not sufficiently effective in containing sediments and other pollutants.

The Elliott Bay Seawall Project combined with the applicable RFFAs would result in a long term beneficial cumulative effect on fish, wildlife, and vegetation and improved environmental quality in the downtown Seattle waterfront area. Completed projects in the surrounding area have improved habitat quality (e.g., Olympic Sculpture Park); concurrent and future projects are slated to continue this theme. A specific beneficial cumulative effect of these projects would be the creation of a shoreline migratory corridor much more favorable to juvenile salmon and other aquatic animals and vegetation. Through the combination of the Elliott Bay Seawall project and the RFFAs, habitat features for salmonids would continue to improve along the Seattle waterfront and should enhance juvenile salmon movements.

Furthermore, the Elliott Bay Seawall Project would slightly reduce contaminants in the nearshore sediments through the placement of materials for the proposed habitat enhancements and reduce pollutant loading in localized stormwater runoff. Combined with future projects, such as the Seattle Combined Sewer System Upgrades, the Elliott Bay Seawall Project would further improve water quality and sediment quality and conditions for fish and wildlife. Therefore, it is expected that water quality would continue to improve over time as a result of projects implemented after the completion of the Elliott Bay Seawall Project. The Elliott Bay Seawall Project would enhance upland habitats, increasing the amount of native vegetation in the area. It would not limit or compromise potential habitat enhancements that could be included in the RFFAs and, in combination with enhancements associated with the RFFAs, may help to reverse the trend of perpetual and substantial declines in natural habitats and species in Elliott Bay.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario of the No Action Alternative, no cumulative effects are likely to result from routine maintenance or emergency repair. The Loss of Functionality and Collapse of the Seawall scenarios could preclude the implementation of some of the RFFAs, including the required mitigation for effects on native vegetation and fish and wildlife habitat associated with those projects. This could increase the potential for temporary adverse effects on native vegetation and fish and wildlife habitat until construction of repairs is complete. Furthermore, a collapse of the seawall could release contaminants and other debris into the nearshore environment and further degrade habitats in the project area.

However, after a seawall collapse, future actions similar to those proposed for the build alternatives are likely to contribute to cumulative improvements in native vegetation and fish and wildlife habitat over the long term through the implementation of mitigation measures for the other RFFAs.

Mitigation for Cumulative Effects

All other construction projects in the area will need to adhere to permit conditions and regulations that protect fish, wildlife, and vegetation.

The City will maintain the habitat features as required by the project's permits and protect the habitat features from future damage via the Shoreline Code and agreements with property owners.

6.13 Water Resources

The geographic area considered for the analysis of cumulative effects on water quality includes the aquifers underlying the project area as well as the greater Elliott Bay. Elliott Bay has a surface area of approximately 7.7 square miles and a volume of approximately 20,200 acre-feet, with depths greater than 600 feet in some areas.

Past and Present Actions

The temporal boundary for the cumulative effects analysis related to water resources began in the early 1900s, when early filling of the shoreline converted much of the shallow nearshore areas into hardened shorelines, and human-made storm sewer systems replaced much of the natural drainage system. These infrastructure changes influenced the future development of the area, and the corresponding effects to water resources.

The net effect of early human alterations of the natural shoreline on water resources in the project vicinity has been adverse. Much of the ground surface has been built on, compacted, or otherwise made less permeable. Recharge to underlying aquifers has been reduced, and the shoreline shallow-water zone has been eliminated. In addition, growth and development in downtown Seattle have contributed to increased peak surface water flows, degradation of surface water quality, increased contamination of groundwater, and loss of wetlands and riparian areas.

The stormwater collection and conveyance network along the downtown Seattle waterfront was generally constructed in the 1930s and 1980s as part of the improvements to the Alaskan Way road surface, sidewalk, and seawall. As described in Chapter 3, stormwater runoff from most of the project area flows untreated into Elliott Bay via the City's separated stormwater system, with a smaller portion draining to the combined sewer system and thence to King County's West Point Treatment Plant. Ongoing CSO control programs by the City and the King County Wastewater Treatment Division are designed to reduce CSO discharges from Elliott Bay outfalls (see Chapter 3 and the Water Resources Discipline Report [Appendix M]).

Reasonably Foreseeable Future Actions

Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect water resources in the study area. Other projects that may affect stormwater facilities and water quality within Elliott Bay include the Alaskan Way Viaduct Replacement Project, the Seattle Multimodal Terminal at Colman Dock Project, the improvements associated with Waterfront Seattle, the Elliott/Western Connector, the Seattle Combined Sewer System Upgrades (see Table 6-1), and completed or ongoing activities at adjacent upland and in-water state and federal cleanup sites (see Chapter 3).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects on water resources as a result of multiple projects being constructed within the same timeframe. In particular, demolition of the viaduct would result in extensive dust and debris at

street level that could be washed into Elliott Bay during storm events, causing occasional turbidity plumes and potentially a local increase in the pH of the affected nearshore water due to concrete dust.

Adverse effects on water resources could include increased contamination of surface water that is transported to the receiving waterways and increased risk of accidental spills, which could result in groundwater or surface water contamination. However, it is assumed that RFFAs, like the seawall project, would all implement mitigation measures set forth by regulatory agencies to avoid or minimize potential adverse effects and protect water quality during construction. Thus, any cumulative effects on Elliott Bay water quality would likely be limited to occasional exceedances of water quality standards over a prolonged period if on-site BMPs are not effective enough in containing sediments and other pollutants.

As a result of the stormwater treatment features included in the project, operation of any of the build alternatives would reduce the overall pollutant loadings in stormwater runoff to Elliott Bay. Project operation would, therefore, result in a long-term cumulative beneficial effect on water quality in the bay when combined with other RFFAs that are subject to post-construction stormwater treatment requirements.

Some of the RFFAs would also inherently improve environmental conditions in Elliott Bay. Numerous state and federal cleanup actions are either underway or proposed in Elliott Bay and the vicinity, including actions at the Seattle Steam Company site, the Central Waterfront cleanup site, the former Unocal site, and the Colman Dock cleanup site. Completion of these cleanup actions should improve water quality in Elliott Bay by eliminating long-standing contaminant sources and contaminated sediments. Several of the RFFAs included in this analysis would be subject to the same water quality protection requirements during construction and the same post-construction stormwater treatment requirements as the Elliott Bay Seawall Project.

The Alaskan Way Viaduct Replacement Project would eliminate a large source area of untreated stormwater runoff, resulting in a substantial net reduction in pollutant loadings in stormwater runoff and improved water quality in the bay. Other elements of Waterfront Seattle could trigger the City's stormwater treatment requirements, likely contributing to a slight improvement of water quality in Elliott Bay for the long term. Lastly, the proposed combined sewer upgrade projects would significantly reduce the CSO frequency and volume of discharge to Elliott Bay during rainfall events. When completed, these projects would have a measurable, lasting beneficial effect on the quality of water and sediment in Elliott Bay. Therefore, the Elliott Bay Seawall Project in combination with these projects would result in long-term cumulative benefits to water quality, reversing the trend of water quality degradation in Elliott Bay that began in the early 1900s.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario of the No Action Alternative, no cumulative effects are likely to result from routine maintenance or emergency repair. Under the Loss of Functionality and Collapse of the Seawall scenarios, a seawall collapse could preclude the implementation of some of the RFFAs, including the required mitigation and BMPs for protecting water resources associated with those projects. This preclusion may increase the potential net adverse effect on water resources in the near term. Furthermore, a seawall collapse could release contaminants and other debris into the nearshore environment and temporarily increase pollutant loading due to unmitigated surface water runoff, which would further degrade habitats in the project area.

However, after a seawall collapse, future actions similar to those proposed as part of the build alternatives are likely to contribute to cumulative improvements in water quality over the long term through the implementation of required mitigation measures and BMPs for other RFFAs.

Mitigation for Cumulative Effects

No long-term adverse cumulative effects to water quality are anticipated that will require additional mitigation.

6.14 Contaminated Materials

The geographic area considered for the analysis of cumulative effects related to contaminated materials extends from S. Washington Street to Broad Street and from approximately Western Avenue to the outer harbor line in Elliott Bay.

Past and Present Actions

The temporal boundary for cumulative effects analysis related to contaminated materials began in the early 1900s, as the industrial and commercial uses of the Seattle waterfront had largely been developed at that time. The Elliott Bay Seawall is located within industrial and commercial areas of Seattle that were first developed between the 1870s and the early 1900s. These historical land uses likely have contributed to releases of contaminated materials into the surrounding environment from various sources that could adversely affect the project area in the present day. The most prevalent contaminants resulting from historical land uses are petroleum products, metals, and PAHs. In general, the waterfront area is underlain by fill that was placed in the early 1900s that covered and incorporated timber and debris previously used in the construction of piers, wharves, and trestles.

Generally, the contaminant concentrations in soil in the upland portion of the project area are assumed to be greater than the MTCA residential and general use cleanup levels because of the industrial history of the waterfront and the known historical activities. A review of the available

data indicates that soil material and groundwater above the relieving platform on the existing seawall structure contain contaminants at concentrations less than the MTCA cleanup levels. A number of historical industrial and commercial land uses and ongoing uses likely have contributed to the observed in-water surface and subsurface sediment contamination in the project area. The most widespread contaminant in sediments along the Central Seawall segment of the waterfront is the metal mercury. In general, the surface sediment concentrations continue to improve over time, consistent with the implementation of source controls (primarily in the 1970s) and ongoing natural recovery processes (e.g., sedimentation) in the area. Cleanup actions (e.g., placement of sediment caps) have been conducted in some areas of the waterfront over the past 22 years.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect contamination and presence of hazardous materials in the study area. These RFFAs include the Alaskan Way Viaduct Replacement Project, the Seattle Multimodal Terminal at Colman Dock Project, the improvements associated with Waterfront Seattle, and the Elliott/Western Connector. In addition to these construction projects, there are also regulation-driven cleanup and restoration projects in the vicinity of the Elliott Bay Seawall Project, which are discussed in the Contaminated Materials Discipline Report (Appendix O).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects through the exposure of existing contaminants in soils or sediments or through spills of hazardous materials.

Under any of the build alternatives, the construction work would be coordinated with Ecology, EPA, and other agencies, as required. The cumulative effects of this work in conjunction with that of the other RFFAs and cleanup efforts in the vicinity should result in an overall improvement in conditions related to contaminated materials throughout the waterfront. Information on contaminants encountered during project construction, combined with the data and information compiled by other RFFAs in the vicinity, would inform stakeholders, enabling them to expedite future cleanups. Consequently, there would be an overall reduction in contaminated materials in the project vicinity.

In combination with the other nearby construction projects in the list of RFFAs, the Elliott Bay Seawall Project would result in improved environmental quality in the downtown Seattle waterfront area after the completion of construction. As a consequence of the seawall construction and the other RFFAs, contaminated materials would be removed and remediated within the work areas in compliance with

state and federal environmental regulations. The conditions of the sediment surfaces would continue to improve, and additional aquatic habitat would be constructed. These benefits would augment those resulting from the in-water work proposed as part of the Elliott Bay Seawall Project and contribute to environmental benefits resulting from the other RFFAs. Construction of the Elliott Bay Seawall Project and other RFFAs would cumulatively help to reverse the trend of increased contamination that started in the early 1900s.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario of the No Action Alternative, no cumulative effects are expected. Under the Collapse of the Seawall scenario (and possibly the Loss of Functionality scenario), contaminated soils likely would be released and washed into Elliott Bay, potentially adding to the cumulative degradation of aquatic habitat and water quality in the project vicinity. After a seawall collapse, however, future actions are likely to contribute to cumulative improvements in conditions related to contaminated materials and environmental quality similar to those discussed for the build alternatives.

Mitigation for Cumulative Effects

Appropriate construction BMPs will be implemented to minimize the potential effects associated with the presence and handling of contaminated materials, which will minimize the potential cumulative effects associated with the exposure of multiple contaminated media during concurrent construction. No long-term adverse cumulative effects are anticipated that require additional mitigation.

6.15 Geology and Soils

The geology encountered along the Elliott Bay Seawall generally consists of glacially overridden deposits that are overlain by various thicknesses of recent native soils (deposited through geologic processes) and fill (deposited by humans). Along most of the project area, the glacially overridden deposits are located within about 60 feet of the ground surface. Groundwater is encountered about 7 to 15 feet bgs, depending on the location along the seawall.

Past and Present Actions

The temporal boundary for the cumulative effects analysis related to geology and soils began in the early 1900s, as this was the time of substantial changes to the landforms on and near the waterfront. During this period, fill placed throughout the waterfront area (including the seawall) and the regrading of the adjacent hills significantly changed the landforms and bathymetry, resulting in a lasting effect on geology and soils in the study area. That period of urban development substantially altered the geologic surface conditions throughout the entire project area.

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect geology and soils within the study area, primarily due to the effects of dewatering activities. These RFFAs include the Alaskan Way Viaduct Replacement Project, the Seattle Combined Sewer System Upgrades, and the relocation of private utilities associated with the Alaskan Way Viaduct (Table 6-1).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects due to variations in the water table from simultaneous construction efforts. Projects like the Alaskan Way Viaduct Replacement Project and the various utility projects may involve excavation and dewatering at the same time as the excavations for the Elliott Bay Seawall Project. Dewatering in and around excavations can result in a drawdown of the water table beyond the excavation area, which in turn could increase the stress on subsurface soils and cause the soils to compress and settle. This settlement could affect adjacent structures, utilities, and roadways.

Once construction is completed, the Elliott Bay Seawall Project could contribute to a beneficial cumulative effect by removing contaminated soils encountered during construction. Furthermore, the soil improvements completed as part of the project, combined with the soil improvements associated with the Alaskan Way Viaduct Replacement Project and with the seismic improvements planned as part of the Seattle Multimodal Terminal at Colman Dock Project, would address seismic issues caused by liquefaction along the waterfront, thereby contributing to a cumulative beneficial effect.

Cumulative Effects of the No Action Alternative

The Minimal Damage scenario of the No Action Alternative would result in no cumulative effects on geology and soils. Under the Loss of Functionality and Collapse of the Seawall scenarios, the cumulative effects of water-table drawdown would be slightly less than the effects of the build alternatives because under these scenarios there would not be the same degree of water-table drawdown due to construction-related dewatering.

The Loss of Functionality and Collapse of the Seawall scenarios could preclude or delay the implementation of some of the RFFAs, including the required mitigation for water-table drawdown and soil improvements associated with those projects. However, after a seawall collapse, future actions similar to those proposed as part of the build alternatives are likely to have effects in the project area that are similar to those of the build alternatives over the long term, depending on

when and how infrastructure is rebuilt. No further cumulative effects on geology and soils are expected to result from the No Action Alternative.

Mitigation for Cumulative Effects

The City will coordinate with other project sponsors to address potential effects to the water table during dewatering activities. No long-term cumulative adverse effects are anticipated that require further mitigation.

6.16 Air Quality

The geographic boundary used for the purposes of analyzing cumulative effects on local air quality focuses on the area within 1,000 feet of the construction work zone, generally between S. Washington Street on the south, Broad Street on the north, First Avenue on the east, and Elliott Bay on the west. The geographic boundary for regional effects encompasses the broader Seattle area, where emissions from construction equipment and worker vehicle trips would occur.

Past and Present Actions

The temporal boundary of the cumulative effects analysis for air quality began in 1952, coinciding with the construction of the Alaskan Way Viaduct and the subsequent development of the Duwamish River industrial area, as this infrastructure established ongoing effects to air quality in the project vicinity. The Elliott Bay Seawall is located in the vicinity of the industrial and commercial core of Seattle and a number of ground and marine transportation routes serving the area. The dominant contributors of air pollutants in the project vicinity include on-road vehicle traffic for emissions of ozone precursors (reactive organic gases and nitrogen oxides) and carbon monoxide; rail and maritime equipment for sulfur oxide emissions; and roadways, construction sites, and other sources of fugitive dust for $PM_{2.5}$ emissions.

Ecology and the Puget Sound Clean Air Agency operate a network of ambient air quality monitoring stations in the Seattle area, and the Puget Sound Clean Air Agency publishes annual reports of air quality monitoring data, with the most recent report covering data from 2008 (PSCAA 2009). The data from the monitoring stations show no recent violations of current federal ambient air quality standards. Regulatory actions by federal and state agencies generally have reversed historical contributions to the degradation of air quality by establishing (1) ambient air quality standards for acceptable exposure to air pollutants in coordination with monitoring and regulation programs, and (2) emissions standards regulating the release of specific hazardous substances by individual facilities or by specific types of equipment (see the Air Quality Discipline Report [Appendix G]).

Reasonably Foreseeable Future Actions

The Elliott Bay Seawall Project is one of several major infrastructure projects planned along the downtown Seattle waterfront that could affect air quality in the study area during construction. The RFFAs most likely to contribute to cumulative effects on air quality during construction activities include the Alaskan Way Viaduct Replacement Project, improvements associated with Waterfront Seattle, and the Elliott/Western Connector (Table 6-1).

Cumulative Effects of the Build Alternatives

Construction of the Elliott Bay Seawall Project, in combination with concurrent construction activities of RFFAs, may result in temporary adverse cumulative effects on air quality.

The potential for cumulative effects on air quality depends on the proximity to the construction work zone. Some air pollutants, such as ozone precursors (reactive organic gases and nitrogen oxides), have a rather large region of influence due to the timeframe in which atmospheric chemical reactions take place. Other pollutants such as carbon monoxide and directly emitted $PM_{2.5}$ have a more localized region of influence because they are emitted fully formed and disperse with increasing distance from the emissions source.

The project with the greatest potential for localized cumulative effects on air quality in combination with the Elliott Bay Seawall Project is the Alaskan Way Viaduct Replacement Project. Demolition of the Alaskan Way Viaduct in 2016 is likely to result in periods with high emissions of particulate matter, which could cause localized and temporary problems related to fugitive dust. Overlapping construction of the seawall in the area of the Colman Dock Ferry Terminal (Zone 2) and Pioneer Square (Zone 1) in 2016 may contribute to temporarily increased amounts of fugitive dust in the area. These overlaps are likely to increase traffic congestion in the project area and cause local, cumulative adverse effects on air quality.

Once completed, the Elliott Bay Seawall Project under Alternatives A and C would include an additional northbound lane adjacent to Colman Dock. As a result of this second northbound lane, the project would make a slight positive contribution to transportation improvements provided by the other RFFAs. These improvements would enhance the functionality of the transportation network by reducing congestion and improving traffic flow, thereby contributing to a cumulative long-term reduction in traffic-induced pollutant emissions in the project vicinity.

Cumulative Effects of the No Action Alternative

Under the Minimal Damage scenario of the No Action Alternative, there would be few if any effects on air quality that, when coupled with other projects in the vicinity, would result in an adverse effect. Under the Loss of Functionality or Collapse of the Seawall scenarios, construction activities associated with seawall repairs could result in adverse

cumulative effects on air quality similar to those described for the build alternatives. It is impossible to predict whether the effects on air quality due to the seawall construction would coincide with the construction activities associated with the other RRFAs. It is likely that the diversion of traffic resulting from a seawall failure or collapse would contribute to increased levels of congestion in other parts of the city, especially where the timing coincides with the construction-related detours of other RFFAs in the study area. These interactions between other roadway projects and the traffic diversions caused by a seawall collapse or failure potentially could cause local, adverse cumulative effects on air quality in the short term, similar to those described for the build alternatives.

Mitigation for Cumulative Effects

The mitigation measures listed above will help offset cumulative effects of construction on air quality and will include coordination with other projects in the project area. The proposed alternatives will result in no long-term adverse cumulative effects on air quality; therefore, no additional mitigation measures are recommended.

This page intentionally left blank.

Table 6-1. Past, Present, and Reasonably Foreseeable Future Actions Considered by Discipline

Project ID	Sponsor	Project Name	Description	Completion Year	Transportation	Economics	Noise and Vibration	Cultural, Historic, and Archaeological Resources	Energy Resources	Land Use, Shorelines, and Parks and Recreation	Public Services and Utilities	Social Resources and Environmental Justice	Visual Resources	Fish, Wildlife, and Vegetation	Water Resources	Contaminated Materials	Geology and Soils	Air Quality
1	Sound Transit	North Link (Light Rail)	The North Link project is a 4.3-mile extension of light rail from University of Washington Station to Northgate Station with two stations in between (Brooklyn and Roosevelt).	2020	x													x
2	Washington State Department of Transportation	SR 520 Bridge Replacement & HOV Project	The SR 520 Bridge Replacement and HOV Project will replace the existing 520 bridge with two general-purpose lanes in each direction and provide transit and carpool lanes in the new structure. Although the replacement is not a major capacity project, the bridge carries 115,000 vehicles and 190,000 travelers on a typical weekday and, therefore, is an important connection between Seattle and eastside communities. A NEPA Record of Decision was issued in August 2011.	New bridge: 2014; Portage Bay improvement schedule to be determined	x				X									x
3	Sound Transit	University Link (Light Rail)	The University Link project is a 3.15-mile light rail extension that will run in twin bored tunnels from downtown Seattle north to the University of Washington, with stations at Capitol Hill and on the University of Washington campus near Husky Stadium. By 2030, the University Link line is projected to add 70,000 boardings per day to the light rail system.	2016	x				X									x
4	Seattle Department of Transportation	Mercer Street East (Dexter Avenue to Interstate 5)	The Mercer Street East project will replace the existing Mercer Street/Valley Street one-way couplet in the South Lake Union neighborhood with a widened two-way Mercer Street primarily to the north and a narrowed two-way Valley Street. The widened Mercer Street will have three lanes in each direction, with widened sidewalks, on-street parking, and a landscaped median. Valley Street will be narrowed to a two-lane street with sidewalks, bicycle lanes, and on-street parking. The project will also include improvements to the north-south streets within the project area, including Fairview, Boren, Terry, Westlake, and Ninth Avenues. Street crossings throughout the project area will be improved.	2013	x				X									x
5	Seattle Department of Transportation	Mercer Street West (Elliott Avenue to Dexter Avenue)	The Mercer Street West project includes enhancing Mercer Street between First Avenue N. and Dexter Avenue N. and Roy Street between Dexter Avenue N. and Queen Anne Avenue N. to provide two-way operations. Broad Street from Harrison Street to Ninth Avenue N. will be closed. The project may involve corridor enhancements west of First Avenue N., including widening of W. Mercer Place between Elliott Avenue W. and First Avenue W. The purpose of this project is to improve east-west connectivity through the north end of downtown Seattle.	2014	x			X	X									x

6	Port of Seattle	Pier 69: cathodic protection for support piers (Port of Seattle 10-year plan)	This project involves ongoing improvements to the structural supports of piers.	Through 2020		x		x			x			x	x	x		
7	Seattle Department of Transportation	Elliott/Western Connector	The Elliott/Western Connector is a new roadway linking Alaskan Way to Elliott and Western Avenues over the BNSF mainline railroad tracks. The current conceptual design includes four traffic lanes with pedestrian and bicycle facilities, and it cannot be built until the Alaskan Way Viaduct has been removed. The Elliott/Western Connector would act as an alternate route for much of the traffic that currently uses Alaskan Way north of Pike Street. The project would eliminate delays caused by the railroad crossings at Broad Street.	2016–2020	X	X	X	x	X	x	X	x	X	X	X	X	x	X
8	Port of Seattle	Pier 66 Cruise Terminal: Shore Power Upgrade (Port of Seattle 10-year plan)	This project will provide shore power at the Pier 66 cruise facility to allow future cruise ships to turn off their engines and "plug in" while in port.	Through 2020		x			x		x					x		x
9	Port of Seattle	Replace baffles/ wave breaks on Pier 66 apron	This project involves the replacement of baffles/wave breaks on the south section of the Pier 66 apron.	Unknown		x	x	X		x	x	x		x	x	x	x	x
10	Seattle Department of Transportation	Waterfront Seattle	Waterfront Seattle involves the replacement of Alaskan Way with a new permanent roadway that includes a promenade. The new roadway is expected to have more space allocated for pedestrians and bicyclists while maintaining or expanding the existing roadway capacity along the waterfront.	2016–2020	X	x	X	X	X	X	X	X	X	X	X	X	x	X
11	City of Seattle	Seattle Aquarium expansion/ Waterfront Park/ Pier 62/63	The Seattle Aquarium expansion includes the remodeling of the Seattle Aquarium at Pier 59, which began in June 2005. The Seattle Department of Parks and Recreation restored structural integrity to most of the aquarium facility by installing new driven and posted piles and new concrete aprons (to replace wooden ones). Similar improvements are expected for Waterfront Park and Pier 62/63. The staff-preferred plan in the Final Environmental Impact Study for the Central Waterfront Master Parks Plan calls for rebuilding Piers 62/63 and demolishing Waterfront Park and Pier 60 to make room for the larger Seattle Aquarium. 12	Seattle Department of Transportation	First Avenue Streetcar	The City of Seattle has proposed the construction of a streetcar line from King Street Station in the south end of downtown Seattle to Seattle Center. The streetcar would run along the First Avenue alignment, serving Pioneer Square, Pike Place Market, Belltown, and Seattle Center. No definitive schedule and funding have been identified.	Unknown	x			x	X									x
13	Seattle Department of Transportation	First Hill Streetcar	The City of Seattle is developing the First Hill Streetcar through an inter-local agreement with Sound Transit. The First Hill Streetcar connector project will link First Hill employment centers to the light rail system via connections on Capitol Hill and in the International District.	Construction 2013	x				X									x
14	Washington State Department of Transportation	Seattle Multimodal Terminal at Colman Dock	Washington State Ferries plans to improve Colman Dock Ferry Terminal in the next several years. The project will include the following improvements: (1) replacement/reconfiguration of the timber trestle portion of the dock, (2)replacement of the main terminal building, (3) reconfiguration of the dock layout for safer and more efficient operations, (4) replacement of the Slip 3 overhead loading and transfer span (scheduled for completion in 2016), (5) replacement of vessel landing aids for Slips 2 and 3, (6) relocation of the passenger-only ferry service in the vicinity of Colman Dock, and (7) installation of a new bicycle entry gate and an electrical distribution system (already completed). Construction of the improvements is currently scheduled for 2015 to 2020.	2020	x	x	X	X	X	X	X	X	X	X	X	X	x	x
15	Seattle Public Utilities	Seattle Combined Sewer System Upgrades	The purpose of the Seattle Combined Sewer System Upgrades is to limit untreated overflows at each CSO outfall to an average of no more than one per year, and to capture 99 percent of the combined sewer volume from the City of Seattle's combined sewer system during storm events. The Central Waterfront CSO Reduction Project is planned to start in 2015.	2018/ timing unknown		x	x	x	x	x	x	x	X	X	X	x	X	x

Project ID	Sponsor	Project Name	Description	Completion Year	Transportation	Economics	Noise and Vibration	Cultural, Historic, and Archaeological Resources	Energy Resources	Land Use, Shorelines, and Parks and Recreation	Public Services and Utilities	Social Resources and Environmental Justice	Visual Resources	Fish, Wildlife, and Vegetation	Water Resources	Contaminated Materials	Geology and Soils	Air Quality
16	Washington State Department of Transportation	Alaskan Way Viaduct Replacement Project	The project consists of several components: SR 99 Bored Tunnel, South Access, North Access, North Surface Street, Alaskan Way Viaduct Removal, and the Battery Street Tunnel Decommissioning. The bored tunnel will be constructed between S. Royal Brougham Way and Roy Street to replace the Alaskan Way Viaduct (SR 99) north of S. Royal Brougham Way. The tunnel will have two lanes in each direction. Beginning at S. Royal Brougham Way, SR 99 will be a surface roadway that will transition to a cut-and-cover tunnel. At approximately S. King Street, SR 99 will become a stacked bored tunnel with two southbound travel lanes on the top and two northbound travel lanes on the bottom. The bored tunnel will continue under Alaskan Way S. to approximately S. Washington Street, where it will curve slightly away from the waterfront and then travel under First Avenue beginning at approximately University Street. At Stewart Street, the bored tunnel will travel in a northern direction under Belltown. At Denny Way, it will travel under Sixth Avenue N. and transition to a surface roadway at about Harrison Street. The Alaskan Way Viaduct Replacement Project will remove the existing parking under the viaduct, but the City will ultimately determine how on-street parking spaces are managed.	2016	X	X	X	X	X	X	X	X	x	x	x	X	X	X
17	Seattle Department of Planning and Development	South Downtown Rezone	In April 2011, the Seattle City Council approved zoning changes for south downtown that are designed to balance the preservation of several of Seattle's most distinctive ethnic and historic neighborhoods while adding taller residential buildings meant to attract more in-city residents. The final adopted building height for the area in Pioneer Square east of Occidental Park and closest to the Smith Tower is 120 feet. Between Alaskan Way and just east of Second Avenue from James to Columbia Street, the maximum height was increased to 130 feet. In a small area east of Third Avenue, the maximum height was increased to 150 feet, with greater heights of up to 240 feet in the Hilltop area of the International District, farther east. In the north parking lot at CenturyLink Field in Pioneer Square, the maximum height was increased to 240 feet. Under the new plan, developers can qualify for the maximum heights only if they also provide community benefits such as open space, street improvements, and affordable housing. Telepone (206) 777-7551
Email: elaine.spencer@millernash.com; madeline.engel@millernash.com

Petitioner would like to receive documents from the Office of Hearing Examiner by email attachment.

2. RESPONDENT

The Respondent is the City of Seattle through its Department of Transportation (SDOT). On October 31, 2016, SDOT issued a Final Environmental Statement (FEIS) for Alaskan Way, Promenade, and Overlook Walk (AWPOW).

3. INTERESTS OF SEATTLE HISTORIC WATERFRONT ASSOCIATION

The Seattle Historic Waterfront Association is a nonprofit organization whose members are the owners of the four privately-owned historic landmark piers along Seattle's central waterfront and the businesses that operate within and alongside those piers. They are homegrown businesses, the oldest of which predates construction of the Alaskan Way Viaduct, and one of the newest of which became an instant landmark on Seattle's skyline. In an increasingly homogeneous world, members of the Seattle Historic Waterfront Association are an essential part of what gives a visit to Seattle its distinctive flavor.

Before the City's Elliott Bay Seawall Replacement Project, Seattle Historic Waterfront Association members and the central waterfront played host to approximately 4.5 million visitors in 2014, generated about $65 million in revenues, and employed about 1,500 people in family-wage jobs. Furthering the goals of the Shoreline Management Act and Seattle's Shoreline Master Program, Argosy and Let's Go Sailing provided annual opportunities for nearly 400,000 visitors to the central waterfront to get out onto Elliott Bay for recreational purposes. Each of those visitors was a pedestrian, which means that he or she either was delivered by passenger bus to the curb at the central waterfront (in addition to the 45,000 schoolchildren in groups visiting the Aquarium annually) or had to cross Alaskan Way by foot. The ease of mobility for those 4.5

MILLER NASH GRAHAM & DUNN LLP

million annual pedestrian visitors coming to the central waterfront should have been a central focus of the design of AWPOW.

Based on years of surveying their customers, Seattle Historic Waterfront Association members know these Seattle visitors well. Between 53 and 74 percent of their visitors arrive by car.[1] They come in family groups (3+ people per vehicle). That frequently includes children in strollers or grandparents, both of whom may face mobility issues. Those arriving by car tend to come from Washington State and often the Puget Sound region, but they do not work downtown; they come to the waterfront as a recreational day trip. As a result, they are neither familiar nor comfortable with Seattle's transit system, as downtown commuters are. Furthermore, there is no transit service along the central waterfront.[2] The Third Avenue bus tunnel, which carries a substantial portion of the transit vehicles serving downtown Seattle, is confusing to these visitors and, in any event, beyond where the bulk of the visitors to the central waterfront are willing to walk from in order to access the waterfront. Kate Joncas, former Downtown Seattle Association President and now Seattle deputy mayor, had a rule for such visitors: "they want to park within sight of their destinations." Their visits are for recreation, not business. If it is too hard to get to the central waterfront, or park once they arrive, they will exercise their freedom to spend their recreational time elsewhere. As designed, AWPOW will effectively make the central waterfront inaccessible to the majority of the visitors who have been the visitors to the central waterfront for

---

[1] By contrast, 79 percent of the employees on Pier 54 arrive by mass transit, as compared to 45 percent for downtown Seattle as a whole.

[2] The FEIS is incorrect, or at best misleading, when it says that there are currently three Metro routes to the waterfront. Until construction of the Alaskan Way Viaduct Replacement Project began, Metro operated Route 99 along the waterfront. Usage was limited because it had no fixed schedule, had no covered bus stops and ran on very long intervals, making it largely useless as transportation. Today Route 99 operates on First Avenue, and Seattle Historic Waterfront Association is aware of no binding commitment that it will come back to the waterfront, nor at a level of frequency that would make it attractive to users. The FEIS also says that Route 66 and Route 16 serve the Waterfront. They connect Northgate and the University District to Colman Dock. But at most they will make a stop near Colman Dock, serving the ferry system but providing no service along the Waterfront to the north of Colman Dock. Nor do they do anything to make the Waterfront accessible to visitors from Burien or Bothell or Kent or Issaquah, or the host of other parts of the region that guests to the central waterfront have historically come from. In short, there is no functional transit for getting visitors to the waterfront.

decades, unless replacement parking is provided and crossing Alaskan Way and the project's new bicycle track is made safe and comfortable for pedestrians. As a result, it threatens the long-term survival of the members of Seattle Historic Waterfront Association.

The most recent budget for AWPOW (not including the Aquarium Expansion or the Pike Place Market project) is $641 million. Of that, the City has not identified potential sources for at least $165 million, including $47 million for which the source is listed in the budget as "TBD," $25 million identified as "other City revenues," and $103 million of unidentified "philanthropy." There is no assurance that the City Council and State of Washington will agree to provide an additional $290 million, which the budget assumes would come from revenues otherwise available for other public purposes, including the real estate excise tax, the commercial parking tax, and Washington State Department of Transportation (WSDOT) funding. The most recent budget expects the City to raise $199 million through a Local Improvement District (LID) that is not yet formed. Since the substantial majority of the funding for AWPOW is not yet secured, Seattle Historic Waterfront Association depends on the City's having a fallback alternative if the full group of AWPOW projects is delayed or cannot be funded. This alternative must capitalize on the enhancement of the waterfront resulting from removal of the Viaduct by the State of Washington, and keep the waterfront open and accessible.

The City expects to impose a special assessment on properties owned by members of Seattle Historic Waterfront Association under the LID. An LID is a proper way to finance construction of public improvements only if those public improvements provide particular properties with "special benefit" that is not received by the public at large. Far from AWPOW's providing "special benefit" to members of Seattle Historic Waterfront Association, as designed and as described in the FEIS, without significant additional mitigation AWPOW will damage the members of Seattle Historic Waterfront Association by making their businesses inaccessible to a majority of their longtime customers, and providing no assurance that those customers, for whom

MILLER NASH GRAHAM & DUNN LLP

SEATTLE, WASHINGTON 98121

the Seattle waterfront will no longer be a recreational destination, will be replaced by the new fit, savvy urbanites who the FEIS says the City expects will replace the traditional visitors.

Seattle Historic Waterfront Association members have been at ground zero of the construction of the Alaskan Way Viaduct Replacement Project, which began in 2010, and the Elliott Bay Seawall Replacement Project, which began in 2014. Both projects, but particularly the Elliott Bay Seawall Replacement Project, have blighted the central waterfront, making visits to the central waterfront difficult and unpleasant. The schedule for both projects has slipped by years. The Elliott Bay Seawall Replacement Project was originally to be completed by the summer of 2015. It is now scheduled for completion in 2018. The Alaskan Way Viaduct Replacement Project was originally scheduled for completion in December 2015. The deep-bore tunnel is now scheduled to open in early 2019, with the demolition of the Viaduct scheduled to continue through the first three quarters of 2019. Construction of the AWPOW projects is not expected to be completed until early 2023, meaning that if the schedule doesn't slip again, the waterfront will have been subject to 13 years of uninterrupted construction. The businesses of Seattle Historic Waterfront Association need a pause in the construction process so that they can recover, and so that they can begin to bring their traditional customers back to the waterfront or attract the new customers that the FEIS for AWPOW posits. That means that it is extremely important to the members of Seattle Historic Waterfront Association that the FEIS present a realistic "No Action Alternative" in addition to other reasonable alternatives, because the No Action Alternative is likely the best alternative for some period of time, and given the lack of secured funding for AWPOW, it may well occur in any event.

Seattle Historic Waterfront Association has provided comments on both the Draft EIS and the Supplemental Draft EIS for AWPOW on behalf of its members, as well as participating in countless meetings with representatives of SDOT and Waterfront Seattle to express the concerns identified in this petition for review. Public comment cannot be measured by how many hours a public employee spends sitting in a room with concerned citizens. Those meetings

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW

have consistently demonstrated that project officials will neither hear the concerns of Seattle Historic Waterfront Association nor make any actual change in their proposed action in response to those concerns, making that public comment essentially meaningless.

4. DESCRIPTION OF AWPOW

The replacement of the Alaskan Way Viaduct with a deep-bore tunnel provides a once-in-a-generation opportunity to reconnect downtown Seattle to its waterfront, because it will remove the Alaskan Way Viaduct, which since 1953 has created a noisy visual barrier between downtown Seattle and the waterfront. The City of Seattle established seven goals for the reconfiguration of the waterfront after the Viaduct is removed:

- Create a waterfront for all
- Put the shoreline and innovative, sustainable design at the forefront
- Reconnect the city to its waterfront
- Embrace and celebrate Seattle's past, present and future
- Improve access and mobility (for people and goods)
- Create a bold vision that is adaptable over time
- Develop consistent leadership from concept to operations

AWPOW is a compilation of several projects that arose from the post-Viaduct waterfront planning process and were intended to achieve the stated goals. These include reconstruction of Alaskan Way, construction of a promenade along the waterfront, and new connections between downtown Seattle to the waterfront, including a major overpass of Alaskan Way at the Pike Place Market called the Overlook Walk, a new stairway and elevator at Union Street to take pedestrians from the level of Western Avenue to the east side of Alaskan Way, reconstruction of Marion and Columbia Streets following demolition of the Viaduct, and minor street improvements and sidewalk repairs at S. Main and S. Washington Streets. Except at the Overlook Walk, pedestrians will have to cross both Alaskan Way and a new bicycle track intended to allow bicycles to ride the length of the waterfront, at grade level.

SEATTLE, WASHINGTON 98121

AWPOW will cause the permanent loss of 453 on-street parking places as well as 189 off-street parking places, almost all of which are within line of sight of the central waterfront. That loss comes on top of the prior loss of more than 1,000 parking spaces from the earlier Alaskan Way Viaduct Replacement Project and Elliott Bay Seawall Replacement Projects. The loss of an additional 453 on-street parking places is 25 percent of the remaining on-street parking supply within the quarter-mile-deep/one-and-one-third-mile long parking study area that the City evaluated in the AWPOW EIS, but is essentially 100 percent of line-of-sight parking that remains to serve visitors to the central waterfront. Combining on-street and off-street parking losses due to AWPOW, the total loss will be an additional 642 parking spaces, which is a very large percentage of the total parking available for visitors of the central waterfront. The FEIS contends that the loss is only 6 percent of the parking spaces within the quarter-mile-deep/one-and-one-third-mile-long study area that the City identified for purposes of the FEIS. But a much higher portion of the parking that is actually accessible to the 53 to 74 percent of visitors to the central waterfront who have arrived by automobile in the past will be lost. There is no basis to conclude that those visitors to the central waterfront would actually come to the waterfront if they had to park as far away as the FEIS assumes.[3]

5. DEFICIENCIES IN THE FEIS

An adequate EIS for AWPOW was required to consider alternatives that would achieve the goals of the waterfront plan, and to identify the adverse impacts of those alternatives and mitigation that could reduce those adverse impacts. The inadequacies of the Draft EIS and Draft Supplemental EIS were detailed in comment letters submitted by Seattle Historic Waterfront

---

[3] The change in grade between the central waterfront and downtown Seattle is a major factor preventing visitors from using parking in much of the Parking Study Area shown in FEIS Figure 3-9. Not only is the parking in zones 4 and 5 of the City's Parking Study Area as much as a mile from the Central Waterfront "as the crow flies," but it is a few hundred feet higher in elevation than the central waterfront, requiring family groups attempting to visit the central waterfront to climb and descend hundreds of steps along streets that are difficult for people with children in strollers or with mobility impairments and off-putting for people not already familiar with downtown Seattle. For instance, there are 162 steps from the Seattle Aquarium to the Pike Place Market, and 102 steps from Western Avenue to First Avenue at Union Street.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599

Association on August 24, 2015, and May 18, 2016, Exhibits A and B to this petition. Those comments are incorporated in this petition by reference. The FEIS for AWPOW is inadequate in at least the following respects.

a. Failure to properly define the proposal

WAC 197-11-440(6)(a) and SMC 25.05.440(E)(1) require that "the EIS shall describe the existing environment that will be affected by the proposal." That is the foundation from which an EIS then analyzes the environmental impacts of a proposal and discusses reasonable mitigation of those impacts. If the EIS does not accurately describe the affected environment, it cannot accurately describe the impacts of the proposal and therefore cannot accurately address required mitigation.

The FEIS never recognizes that the affected environment of the AWPOW proposal is one of the most important visitor destinations in the City of Seattle, with at least 4.5 million unique pedestrian visitors per year needing to come to, and cross to the west side of, Alaskan Way. Instead it treats the project area as primarily a north-south corridor for vehicular and bicycle traffic passing from north to south of downtown Seattle, or as having the office core of downtown Seattle as its destination. As a result of this failure to properly define the nature of the transportation problem, the FEIS largely ignores the needs of the pedestrian and vehicular traffic for which the central waterfront is the destination. It assumes that the primary pedestrian traffic to the central waterfront is and should be pedestrians coming from the Pike Place Market, who have historically come down Market Steps or the elevators in the Pike Place Market parking garage, and under AWPOW are expected to use the new Overlook Walk. While such pedestrians have always been a component of the pedestrians who come to the central waterfront, they have been a minority. Because the City refused to acknowledge the majority of the visitors to the central waterfront (or has concluded that it no longer wants those visitors), it has designed AWPOW to make the central waterfront inaccessible to the out-of-town families from the region who have been the majority of the historic visitors to the central waterfront.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

The FEIS also fails to recognize the critical role of seasonality in the impacts of the proposal. Fifty-four percent of the visitors to the central waterfront come in the four months of June through September. Argosy has an additional foot-traffic peak in December. Those are the periods when parking must be available and when it must be possible to get to the Central waterfront. The FEIS relies on occupancy data that, besides being outdated and based on an inappropriate study area, was collected during off-peak periods, when the amount of available parking is not representative of what is needed during peak periods.

b. Failure to consider alternatives that could achieve AWPOW's objectives with greater certainty or lower environmental cost

The Draft EIS claimed that there was no alternative other than the No Aaction Alternative or the preferred alternative. That was not true. The additional "alternatives" ostensibly considered in the Draft Supplemental EIS did nothing to remedy the inadequacy of the identification and discussion of reasonable alternatives that the EIS requires.

In response to Seattle Historic Waterfront Association's comments on the Draft EIS, the City issued a Supplemental Draft EIS that considered two changes to the "preferred alternative." The first was to substitute an expansion of the Seattle Aquarium for the original design of the Overlook Walk, but leaving the routing of the Elliott Connector under the Overlook Walk unchanged. By the time the Supplemental Draft EIS was issued, it was clear that the original Overlook Walk was not financially feasible, and that if the Seattle Aquarium were not allowed to expand to the east of Alaskan Way, it would have no opportunity to expand from its existing facility, which is inadequate to meet its long-term objectives. Thus the original Overlook Walk plan was not a viable alternative, and the change to substitute the Seattle Aquarium expansion was not an "additional" alternative—it was the only action alternative for the northern portion of AWPOW along the central waterfront. Substitution of the Seattle Aquarium expansion for the original Overlook Walk could also have been an opportunity to redesign the intersection between

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

Alaskan Way and the Elliott Connector, potentially eliminating significant adverse impacts and major opposition to AWPOW. But the City chose not to use that opportunity.

The second change put forward in the Draft Supplemental EIS was to remove the transit lanes on Alaskan Way south of Columbia Street, while still funneling more than 600 buses per day onto Alaskan Way to and from Columbia Street. The result of that alternative was to increase the gridlock already projected for intersections from Columbia Street to the south, and thus was not a viable alternative. In short, the Supplemental Draft EIS still left the EIS for AWPOW proposing one potentially viable "action alternative" and the No Action Alternative.

An adequate EIS should have at least considered alternatives that:

- Replaced far more of the parking that has been lost on the central waterfront.
- Reconfigured the intersection of Alaskan Way and the Elliott Connector so that it was less damaging to the Waterfront Landings condominium and thus did not force that major property owner to oppose AWPOW.
- Devoted more of the public's limited resources to improving east-west pedestrian connection at multiple streets, rather than focusing a disproportionate share of those resources on the single connection between the Pike Place Market and Pier 62/63.
- Proposed a realistic constructive "no-action" alternative, which assumed that AWPOW would not occur, but that the City would use its resources, such as the $900 million Move Seattle levy and funds from the Park District created by Seattle voters in 2014, to keep the central waterfront accessible, and provide at least nominal enhancement to the new public open space created when the Viaduct is removed.
- Used other approaches to narrowing Alaskan Way south of Columbia Street, without exacerbating gridlock.
- Allowed for a pause of at least three or four years in all major construction on the central waterfront after completion of the Alaskan Way Viaduct Replacement Project and the

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

Elliott Bay Seawall Replacement so that businesses along the central waterfront can recover from the decade of construction they will by then have experienced.

- Provided a realistic "middle ground" alternative, which phased the implementation of the AWPOW improvements over time, or accomplished the goals of AWPOW as well as possible, if some or all of the desired funding for AWPOW does not materialize or does not materialize on the proposed schedule.
- Provided actual mitigation to reduce the adverse impacts of the project.

c. <u>The discussion of parking impacts in the FEIS is inadequate on multiple levels</u>

As described above, the FEIS is inadequate in its discussion of AWPOW's parking impacts because:

- It fails to recognize the unique nature of more than 50 percent of the 4.5 million annual visitors to the central waterfront, for whom AWPOW will make Seattle's central waterfront inaccessible. The choice of taking transit to downtown Seattle or parking thousands of feet away as the crow flies and hundreds of feet up the bluff along Seattle's waterfront will cause those visitors to simply spend their recreational time elsewhere.
- It uses demonstrably outdated and inappropriate data.
- It fails to identify the actual impact of AWPOW, which is to remove essentially all remaining on-street parking and a much higher percentage than disclosed of the total (on-street plus off-street) parking available to visitors to the central waterfront.
- It fails to identify any meaningful mitigation for the loss of parking, under the incorrect assumption that if the City cannot <u>require</u> mitigation of the impacts of a proposal, then those impacts need not be disclosed and mitigation does not need to be identified in the environmental documents. The impacts must be disclosed because that is essential to an informed decision about the project. This is a public project, and rules applicable to the conditions under which a project can be conditioned or denied do not govern the

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T 206 624 8300 | F 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

adequacy of the FEIS. If the impacts are accurately disclosed and potential mitigation is identified in the FEIS, the City may well choose to provide mitigation, even though it might not be able to "compel" itself to do so. But if the impacts are not disclosed and the mitigation is not identified, the EIS will fail in its fundamental purpose of providing the information needed for sound public decision-making.

d. The FEIS's inadequacy in making no meaningful correction to numerous other deficiencies in the Draft EIS that Seattle Historic Waterfront Association identified in its comments on the Draft EIS.

In its comments on the Draft EIS for AWPOW (Exhibit A, pp. 13-21) Seattle Historic Waterfront Association identified several other inadequacies of the Draft EIS. None of these deficiencies were addressed in the FEIS, and thus the FEIS is also inadequate as to those issues. These deficiencies include the following:

- The FEIS is inadequate because construction mitigation must be identified and committed to.
- The FEIS fails to identify gridlock coming to, from, and along the waterfront or identify mitigation of that impact.
- The FEIS fails to address how 4.5 million pedestrian visitors per year can safely and conveniently cross to the waterfront.
- The Land Use chapter fails to identify the fact that the proposed kiosks violate the City's adopted standards for view protection.
- Other chapters needed revision as identified in Exhibit A.
- The discussion of cumulative effects is inadequate.

Each of those inadequacies must be corrected in order for the FEIS for AWPOW to be adequate.

6. REQUESTED RELIEF

Seattle Historic Waterfront Association asks the Hearing Examiner to determine that the FEIS for AWPOW is inadequate under SEPA and to remand the matter to SDOT for preparation of an adequate EIS.

AWPOW - Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34966
Seattle, WA 98124-4966

Subject: Comments of Seattle Historic Waterfront Association on the DEIS for AWPOW

Dear Mr. Mazzola

Thank you for the opportunity to comment on the Draft Environmental Impact Statement ("DEIS") for the Alaskan Way Promenade and Overlook Walk ("AWPOW"). These comments are submitted on behalf of the Seattle Historic Waterfront Association.

The members of the Seattle Historic Waterfront Association are the owners of the four privately owned historic landmark piers along the central waterfront and the businesses that operate within and alongside those piers. They are homegrown businesses, the oldest of which predates construction of the Alaskan Way Viaduct, and the newest of which became an instant feature of Seattle's skyline. Consistent with their location on the City's shoreline, Argosy and Let's Go Sailing provide annual opportunities for nearly 400,000 visitors to get out onto Elliott Bay for recreational purposes. Members of the Seattle Historic Waterfront Association are an essential part of what gives a visit to Seattle its distinctive flavor in an increasingly homogeneous world.

In the years before the City began replacement of the Elliott Bay seawall, the Central Waterfront hosted approximately 4.5 million visitors to Seattle annually. Each of those visitors was a pedestrian, which means that he or she was either delivered by passenger bus to the curb at the Central Waterfront (such as the 45,000 schoolchildren in groups visiting the Aquarium annually) or had to cross Alaskan Way by foot.

Based on years of surveying their customers, Seattle Historic Waterfront Association members know these Seattle visitors well. Between 53 and 74 percent of their visitors arrive by car.[1] They come in family groups (3+ people per vehicle). That frequently includes children in strollers or grandparents, both of which pose mobility issues. Those arriving by car tend to come from Washington State and often the Puget Sound region, but they do not work downtown; they come to the waterfront as a recreational daytrip. As a result they are not familiar, nor comfortable, with Seattle's transit system, as downtown commuters are. Kate Joncas, former Downtown Seattle Association President and now Seattle Deputy Mayor, had a rule for such visitors: they want to "park within sight of their destinations." Their visits are for recreation, not business. As a result, if it is too hard to get to the Central Waterfront, or park once they arrive, they exercise their freedom to spend their recreational time elsewhere.

The members of Seattle Historic Waterfront Association would be among AWPOW's biggest beneficiaries and supporters if AWPOW were designed and constructed to achieve its stated goals:

- create a waterfront for all,
- reconnect the city to its waterfront, and
- embrace and celebrate Seattle's past, present and future,

Unfortunately, the plan presented in the DEIS does not advance those goals. It will not create a waterfront for all; it will create a waterfront for young, fit bike riders and for people staying at the downtown hotels who want to get from the Pike Place Market to the waterfront. It will not reconnect the City to its waterfront; it is primarily focused on moving vehicles and bicycles north and south along Alaskan Way. The only locations where it will potentially be easier for pedestrians to reach the waterfront is at the Overlook Walk,[2] and to some extent at Union Street; for the rest of the waterfront, the east-west passage of pedestrians will be no better, and potentially more dangerous, since they need to cross six to eight lanes of Alaskan Way, and a new bicycle track designed to allow cyclists to travel north and south without stopping. Far from embracing the views of the historic landmark piers and the Pike Place Market for those approaching or on the Central Waterfront, the plan calls for multiple structures that will block the

[1] By contrast, 79 percent of the employees on Pier 54 arrive by mass transit, as compared to 45 percent for downtown Seattle as a whole. http://stb-wp.s3.amazonaws.com/wp-content/uploads/2015/02/Modal-Split-Snip.jpg

[2] The plan will make it more difficult to use the two existing elevators that currently take pedestrians from the Pike Place Market to the waterfront, making it unclear that it will be easier for pedestrians with the Overlook Walk.

views of the historic piers and the Market, in the form of towers described as "beacons" and the Overlook Walk.

Without significant change and mitigation of its impacts, AWPOW threatens to eliminate the 53 to 74 percent of the customers of the members of Seattle Historic Waterfront Association who are not welcome under the plan. That loss of customer base, combined with serious unmitigated construction impacts, will threaten the continued existence of the members of Seattle Historic Waterfront Association. This letter primarily addresses deficiencies in the DEIS for AWPOW, but the Seattle Historic Waterfront Association would very much like to discuss meaningful change to the AWPOW proposal, so that it can proceed while still allowing Seattle Historic Waterfront Association members to remain a part of Seattle's future as well as its past.

I. The DEIS fails to accurately describe the affected environment.

WAC 197-11-440(6) and SMC 25.05.440(E) require that "the EIS shall describe the existing environment that will be affected by the proposal." That is the foundation from which an EIS then analyzes the environmental impacts of a proposal and discusses reasonable mitigation measures of those impacts. If the EIS doesn't accurately describe the affected environment, it cannot accurately describe the impacts, and therefore cannot adequately address required mitigation.

The DEIS never recognizes that the affected environment of the AWPOW proposal is one of the most important visitor destinations in the City of Seattle, with approximately 4.5 million unique pedestrian visitors per year. *See* Sec. 4.1.1, "Existing Land Use" ("the study area contains a variety of land uses," with a generic listing of building types); Sec. 3.2, "Affected Environment for Transportation" (describing vehicular traffic passing from north of the area to south of the area and travel times for that traffic, but never describing how traffic gets to the area as a destination; describing the width of existing sidewalks but not the number of pedestrians using those walks along the Central Waterfront, yet describing the number of bicyclists crossing Alaskan Way with specificity); Sec. 3.5, describing the affected environment for parking as extending from King Street and Second Avenue to Wall Street and Second Avenue, at times 1,500 feet horizontally, and several hundred feet vertically from the waterfront. *See also* Section 3.2.3, where the DEIS states in passing:

> East-west traffic approaching many of the signalized intersections on Alaskan Way is expected to experience greater delays than those shown for the overall intersection LOS because the overall intersection delay is the weighted average delay of all the individual movements. Therefore, some side street approaches

may experience substantial delays even if the intersection LOS does not indicate congestions.

If the only relevant vehicular traffic is the traffic passing from north to south, that analysis might be adequate. But if the relevant traffic is the ability of visitors to get to and leave the waterfront, the fact that east/west traffic is gridlocked is a major environmental impact. By treating the relevant traffic as being north/south through-traffic of vehicles and bicycles, and ignoring pedestrian and vehicular traffic to and from the central waterfront, the DEIS fails to identify the significant adverse impacts of the proposal.

The failure to acknowledge the central waterfront as a leading pedestrian destination for visitors to Seattle causes the DEIS to fail to address the impact of both vehicular traffic and the proposed bicycle path on the ability of pedestrians to reach the waterfront. Section 3.2.6 predicts that in 2017, between 1,000 and 1,500 bicyclists per day will cross Alaskan Way at Spring Street, between 450 and 1,100 bicyclists per day will cross Alaskan Way at University Street, and between 750 and 1,000 bicyclists per day will cross Alaskan Way at Union Street. In 2006, the Seattle Historic Waterfront Association conducted pedestrian counts from 11 a.m. to 9 p.m. on August 4 to determine the number of pedestrians along Alaskan Way at the peak hour and during the average hour. August 4 was selected because it was during the busy summer period, but it was not expected to be the peak day of the summer. The results are as follows:

Hourly Alaskan Way Pedestrian Traffic Counts

	Pier 66 west side of Alaskan Way	Pike Hill Climb east side of Alaskan Way	Spring Street west side of Alaskan Way	Spring Street east side of Alaskan Way	Seneca Street west side of Alaskan Way	Seneca Street east side of Alaskan Way	Total Counts
August 4 peak hour	2,061	459	2,474	613	1,988	1,013	8,097
August 4 average hour	1,537	301	1,864	469	1,401	768	6,400

Not surprisingly, pedestrian counts were from two to four times higher on the west side as on the east side of Alaskan Way. Although counts were high at the intersection of Alaskan Way and Pike Street, the counts were higher at Spring Street, and nearly as high at Seneca Street. All the pedestrian counts were much higher than the projected bicycle use of the new bike path.

Yet the DEIS gives no consideration to how this pedestrian traffic will cross Alaskan Way or the bike path.

By failing to recognize the Central Waterfront as a major visitor destination, the DEIS also fails to recognize the critical role of seasonality in the impacts of the proposal. As the Seattle Historic Waterfront Association has told the City many times, 54 percent of the visitors to the central waterfront come in the four months of June through September. Argosy has a peak in December and in the spring. Those are the periods when parking must be available and when it must be possible to get to the central waterfront. With advance notice, members of the Seattle Historic Waterfront Association can plan for environmental disruption during their low-attendance periods, but disruption to parking and access during the key summer months is potentially fatal to its members, and the new waterfront park.

The DEIS also fails to recognize that during those peak summer months, both vehicular and pedestrian traffic further peak when there are events at Safeco Field (at least 53 dates from June through September) or Century Link Field (at least 13 dates from June through September), or other major downtown events. The p.m. peak hour when there is no major event at the stadiums or elsewhere in downtown is much less congested than the p.m. peak hour when events are occurring. The EIS must analyze the existing pedestrian and vehicular environment during those true peak periods, and must provide mitigation for the significant adverse impacts during those periods.

Finally, the DEIS both understates the current connections between the Pike Place Market and the central waterfront, and ignores the fact that visitors to the waterfront currently arrive by multiple east-west streets, many of which would benefit from significant improvement. On page 1-6, the DEIS states the need for the Overlook Walk as being that "opportunities for pedestrians to move directly between the market and the waterfront are limited to two sets of stairs: the Pike Hillclimb and a staircase ascending the undeveloped slope west of the market in the Pine Street right of way." That ignores the two elevators (and stairways) within the Market parking garage, which easily take visitors by elevator between Alaskan Way and the Pike Place Market, but will be eliminated or made much less accessible by AWPOW. The DEIS also ignores the current east-west connections between downtown and the central waterfront at Union Street, University Street, Seneca Street, Spring Street, and Madison Street, which are used by residents and workers in the heart of downtown

Seattle to get to the waterfront, but which AWPOW makes little or no effort to make more accessible.

The DEIS ignores the fact that except for the Overlook Walk and an elevator between Post Alley and Alaskan Way at Union, the difficulty for pedestrians of navigating the topographic drop between First Avenue and Alaskan Way will remain unchanged. There is at least 100 feet of elevation change between the waterfront and the Pike Place Market. The Pike Place Hillclimb has 160+ steps. The largest issue in moving people from the heart of downtown to the waterfront is the need to climb and descend the bluff. That dissuades visitors to any part of the central waterfront from parking anywhere beyond Western Avenue.

II. The DEIS is defective in its failure to consider alternatives that could achieve AWPOW's objectives with greater certainty or lower environmental cost.

The DEIS claims that there is no alternative other than "no action" to the preferred alternative. That is simply not true, and the failure to consider reasonable alternatives renders the DEIS defective. SEPA requires that an EIS must include a discussion of alternatives to the proposed action. RCW 43.21C.030(2)(c)(iii); WAC 197-11-440(5); SMC 25.05.440.D.

> The required discussion of alternatives to a proposed project is of major importance, because it provides a basis for a reasoned decision among alternatives having differing environmental impacts. Pursuant to WAC 197-11-440(5)(b), the reasonable alternatives which must be considered are those which could feasibly attain or approximate a proposal's objectives, but at a lower environmental cost or decreased level of environmental degradation.

Weyerhaeuser v. Pierce County, 124 Wn.2d 26, 38 (1994) (finding an EIS for a landfill inadequate as a matter of law because it did not include more than the proposal and a no action alternative). See also, *Brinnon Grp v. Jefferson County*, 159 Wn. App. 446, 481 (2011). WAC 197-11-440(5)(d) and SMC 25.05.440.D.4 provide, "When a proposal is for a private project on a specific site, the lead agency shall be required to evaluate only the no-action alternative plus other reasonable alternatives for achieving the proposal's objectives on the same site." WAC 197-11-440(5)(d) and SMC 25.05.440.D.4 have no application here, because this is not a private project. See SMC 25.05.780 defining "private project" as "any proposal primarily initiated or sponsored by an individual or entity other than an agency." The proponents of

AWPOW are the Seattle Department of Transportation and Seattle Office of the Waterfront. There is no basis for two public agencies to consider only the no action alternative.[3]

Reasonable action alternatives should include:

- replacing far more of the parking that has been lost on the central waterfront,
- redesign of the Overlook Walk to provide the 76,000 square feet of additional space that the Aquarium's master plan calls for rather than only 22,000 square feet, as stated at pages ES-8 and 2-15, , and
- consider devoting more of the public's limited resources to improving east-west pedestrian connections at multiple streets as well as devoting resources to connections between the Pike Place Market and Pier 62/63.

In its comments on the scope of the AWPOW EIS, the Seattle Historic Waterfront Association said, "The EIS should include analysis of alternatives and phasing plans that will be implemented if either the LID does not go forward, the levy is rejected, and/or the hoped for philanthropy does not materialize." Since then, the City has realized that it does not have the money to either build improvements to Pier 62/63 or rebuild Waterfront Park, and so those have disappeared from the AWPOW proposal. When we commented on the scope of the AWPOW EIS, we assumed that the State of Washington had committed $290 million to remove the viaduct, build the elevated Elliott Connection, decommission the Battery Street Tunnel and construct new surface Alaskan Way. *See* Central Waterfront Committee Strategic Plan at 30, (July 2012). We now understand that the $290 million funding may be at least in part in doubt. The remainder of AWPOW is unfunded. The City has not disclosed its current cost estimates for

[3] WAC 197-11-440(5)(d) and SMC 25.05.440.D.4 do not absolve private parties from considering alternatives on the property owned by the private party that might reduce the environmental impacts; they simply do not require a private party to consider siting the proposal on property that it does not own. Here the proposed action area is well over 25 acres. It is not plausible that there is no alternative other than the proposed alternative to achieve the City's stated objectives within the available space. *See* ES-5: "No other alternatives that could feasibly attain or approximate the proposal's objectives, but at a lower environmental cost or decreased level of environmental degradation, were identified." If the City hired three other design teams, it would get more than three different alternatives, because most design teams would offer the City more than one alternative to consider. Furthermore, the City is intending to use its powers of eminent domain to acquire at least two parcels to add to the current public property. If the City can condemn those two properties, there is no reason why the City should not consider alternatives that might call for acquisition of different parcels. So even if this were a private proposal, which it is not, there would be no basis to limit the alternatives considered on the property currently within the City's control. For a public project, alternatives that require acquisition of other property should also be considered.

construction of any part of AWPOW. At this point, the public has no basis to understand whether AWPOW is financially feasible.

How the City treats the project area once SR 99 is in a deep-bore tunnel and the Alaskan Way Viaduct is critical to the City, both because of Alaskan Way's role as a north-south arterial and because it is critical to welcoming visitors to Seattle's waterfront. It is therefore even more important today than in September 2013, as we commented on the scope of the EIS, that the City consider alternatives that would mitigate the impacts of the No Action alternative or delayed construction of elements of the proposed action over an extended period if the entire proposal is financially infeasible. SEPA requires that there be a full and fair discussion of the actual alternatives, so that the public and the decision makers can make reasoned decisions.

III. The discussion of parking impacts is inadequate on multiple levels

If they can survive the construction impacts of AWPOW (see below), no single issue is more critical to the Seattle Historic Waterfront Association than that the parking impacts of the project be mitigated. To be mitigated, they must first be fairly disclosed. The DEIS discussion of parking impacts is inadequate on several levels.

The DEIS does disclose on page 3-40 that within Zones 2 and 3 (where the Seattle Historic Waterfront Association is located) visitors "may need to park off street or travel several blocks farther to find available on-street or off-street parking." As discussed above, years of surveying the visitors to the Central Waterfront have shown that from 53 to 74 percent of current visitors to the Seattle central waterfront will likely be deterred from visiting at all under those circumstances. Those visitors have historically seen a trip to the central waterfront as an enjoyable outing for a day trip, but are not able to walk several blocks, or don't know how to get around by transit, or can't climb the 60 to 150 feet between Alaskan Way and First or Second Avenue, or come in family groups with a stroller to push or a grandparent with mobility issues. AWPOW is designed for younger, fitter people, or guests staying at downtown hotels, who walk to the Pike Place Market and then want to get to the waterfront. Guests at downtown hotels have historically made up a significant minority of visitors to the waterfront. But the Seattle Historic Waterfront Association is seriously concerned about a plan that essentially disinvites a majority of its historic customer base.[4]

[4] If the City is not interested in providing a waterfront for people from this region to visit for day trips, and the loss of the historic customer base of the Seattle Historic Waterfront Association is simply an unfortunate consequence of what the City sees as progress, it should say that plainly. But the function of the EIS is to clearly disclose the environmental consequences of public decisions. The EIS is inadequate in that it uses the rhetoric of creating a

Defects in the DEIS analysis of parking impacts include the following:

- The EIS must recognize the loss of parking from the entire Alaskan Way Viaduct replacement/Elliot Bay Seawall replacement/AWPOW project. They are intimately tied together such that AWPOW would not happen but for the Viaduct and Seawall replacement. Thus, the total number of lost on-street and off-street parking spaces is not 673, as stated on page ES-16, but over 1200. The 250 new parking spaces that are included in the Pike Place Market development were funded by the State of Washington as partial mitigation for the impacts of the Alaskan Way Viaduct replacement project. **It is not new mitigation and cannot be claimed as mitigation for the AWPOW project.**

- The parking study area (Figure 3-9) is not realistic as a measure of where visitors to the central waterfront will park. Those visitors will not park as far uphill as Second Avenue. As discussed above, there is no reason to believe they will park if they cannot see their destination from where they park. Although out-of-town visitors much prefer on-street or surface parking to parking in a garage, either on-street or off-street parking can be viable—but not parking that requires walking several blocks uphill and cannot be seen from the waterfront. The relevant zone is west of First Avenue south of spring street, and west of Western Avenue north of Spring Street.

- The PSRC study does not represent the demand and occupancy during the critical summer months. Visits to the central waterfront are highly seasonal with June through September as the critical months. A survey between March and May is irrelevant to whether there is adequate parking in summer, just as a parking survey during the month of October would be irrelevant to whether there is adequate parking during December to sustain retailers in the retail core. Throughout the summer, the Pike Place Market parking garage, the Hillclimb Court garage, and every spot in the lots or on the street within site of the central waterfront are regularly 100 percent full. Furthermore, the relevant parking utilization is the peak periods of the day, not an average over the entire day. A visitor looking for parking at 6 p.m. takes no comfort from the fact that at 10 a.m. a garage might have had spots available.

- The DEIS overstates the off-street parking supply as it will exist in 2017. Section 4.2.2 of Appendix B states:

"waterfront for all," while not disclosing that the waterfront will be inaccessible to a high percentage of the visitors who have historically been among its 4.5 million annual visitors.

> Off-street parking supply, demand, and utilization were obtained from the Puget Sound Regional Council (PSRC) off-street parking survey information. The PSRC parking survey data were collected on weekdays [Monday through Thursday] from March through June 2013. Because off-street parking supply has not changed and is not expected to change as a result of AWVRP and EBSP construction, 2013 data are expected to represent a reasonable estimate of parking supply, demand, and utilization in 2017.

The DEIS never identifies where PSRC found the 10,746 off-street parking spaces that it claims exist within the parking study area.[5] See page 3-35. As a result, we assumed that Figure 5-2 (Existing Land Use) was a reasonable approximation of what the City assumes is the location of existing parking. On the morning of July 30, 2015 (a Thursday), we walked the southern half of the parking study area to look at sites for which Figure 5-2 shows the existing land use as "parking," to determine whether the City's assumptions that parking that existed in 2013 would exist in 2017, and that utilization of existing parking was between 60 and 74 percent, were accurate. What we found on areas shown as off-street "parking" in Figure 5-2 was as follows:

- Merrill Place garage. It currently has 140 total spots. A DPD sign on the garage says that it will be replaced with an eight-story structure with 155,000 square feet of office, 9,500 square feet of retail, and 48 underground parking places. The existing building will be demolished. So the number of parking spaces on the property will go down, while on-site demand will increase. **No parking available to the general public can be expected in 2017.**
- North Lot. In 2011 the North Lot had 1,165 public parking places. **More than 50% of these have been lost to development.**
- Parking garage between Jackson and Main on Alaskan Way. The garage currently has 100 spots. Although it appears that at times public parking is allowed, it was entirely full with monthly parkers at 10 a.m. on a Thursday. A DPD sign on the building says that the building will be replaced with an 11-story structure with 199 residences and 78 parking spaces. Again, the number of spaces will go down while on-site demand goes up. **No spaces are likely to be available to visitors.**
- Lot between Occidental and the alley, Main and Washington. The site is currently under construction for the new Weyerhaeuser headquarters. **All 132 public parking spaces are gone.**

[5] PSRC's 2013 parking study is not available online, so the public has no way to verify the number reported in the DEIS.

- Multistory garage between Columbia and Cherry, west of First Avenue. It had 154 open spaces at 10:30 a.m. on a Thursday. The First and Columbia garage typically has space available, even during peak parking demand periods. Exactly why is unclear, but visitors seem to avoid it even when nearby parking garages are full.
- Lot between Western and Post Alley, Columbia and Marion. It is now occupied by a residential building called "The Post." **All of its public parking is gone.**
- Garage between Cherry and Columbia facing First Avenue. The attendant said that the garage has 230 spaces. At 10:30 a.m. he said that 4 or 5 spaces were still available on the top floor.
- Lot between Western and Post and Seneca and Spring. The electronic sign said there was 1 spot open at 10:30 on a Thursday.
- Lot between University and Enwave (formerly Seattle Steam) west of Western. The former parking lot is currently under construction of a residential tower by Mack Urban. **All 71 public parking spaces are gone.**
- Nine-story parking garage east of Second and north of Union. At 11:50 a.m. there were 54 spots open on the 8th and 9th floors. We did not learn the total number of spots in the garage, but the garage appeared to be at least 90 percent full.
- Lot on the north part of that block. Construction of a new building has just started. **All public parking is now gone.**

We did not attempt to do a similar survey of all the off-street parking within the parking study area to find every parking lot or structure that may have existed in 2013 that cannot be expected to be available in 2017, or to determine how accurate the projection that off-street parking is only 65 percent occupied during the critical summer months may be. That is the City's job. But our survey clearly demonstrated that it is inaccurate to assume that all off-street parking that PSRC counted in 2013 will be there in 2017, or that during the relevant period 35 to 40 percent of the off-street parking will be available to waterfront visitors or anyone else.

- The DEIS mischaracterizes the impacts of lack of parking. On page 3-40, it states that "motorists" may need to park off-street or travel several blocks farther to find available on-street or off-street parking. That implies that "motorists" are people who have made a socially unacceptable decision to drive to the City. But as described above, those "motorists" are visitors to the central waterfront, who have good personal reasons for coming by automobile and who are unlikely to visit under the conditions created by AWPOW. In addition, Ivar's research since 1997 indicates that those "motorists" come in groups which average 3+ people per vehicle. The DEIS should disclose that a substantial number of the pre-project visitors to the central waterfront will be forced to

walk several blocks farther, away from the waterfront and uphill, and as a result may choose not to visit the waterfront.

- Mitigation is required.
    - On pages 3-41 and 3-42 the DEIS discusses what it claims is mitigation that will occur. It starts with "influences on parking demand by other modes," stating that the Action Alternative will provide improved bicycle facilities, the Promenade, the Overlook Walk and improved transit facilities in the form of dedicated transit lands and bus stops, which it suggests "could" result in changes to non-motorized modes that would reduce parking demand. The visitors who currently come by car will not bike there. They are not staying at the hotels around the retail core, from which they walked to the Pike Place Market, so the Overlook Walk will not address their parking problem. There is currently no transit along the waterfront, and, while promised in the DEIS, there is no assurance that the former route 99 will be returned to the waterfront, nor if it does return, that it will operate frequently enough to be attractive as transit. The only east-west transit to the waterfront is directed to the ferry terminal and south to West Seattle, Burien and other points to the south from which commuters now rely on buses using the Alaskan Way Viaduct. It will not provide any assistance for most visitors to the central waterfront who may be forced to park in a garage on First or Second Avenue.

    - On page 3-42, the City describes more formal mitigation. It first claims credit for the 250 spaces in the PPMWE. That is not mitigation for this project, unless the City counts the 1200+ parking spaces that have been lost since the beginning of the Alaskan Way Viaduct Replacement Project as impacts of this project. The City then identifies four actions that we assume are already adopted policy, the continuation of which should go without saying. One that is particularly hollow is "working with transit agencies to increase awareness of transit routes and facilities in the area and to encourage visitors to use alternative modes of transportation." As discussed above, many of the historic visitors to the central waterfront are unfamiliar with transit, do not take it regularly, and are not likely to first try it for a family outing to the waterfront. So while we encourage the City to do whatever it can to encourage use of public transit, that is not mitigation for the loss of parking. When one of the Seattle Historic Waterfront Association's members proposed a gondola to take people from the Convention Center (which has a large parking garage with substantial capacity) to the waterfront, that idea

was summarily turned down. The City offers no possibility of providing the easy east-west transit that would encourage visitors to the waterfront to park in the downtown core.

- Mitigation must provide a substantial number of new parking spots within sight of the waterfront, and the EIS must discuss alternatives for achieving that mitigation. That could be in the form of on-street or off-street parking—both of which are easily possible alternatives within or adjacent to the project area. While the various efforts the City has made to promote E-park and other means of obtaining greater utilization of existing garages, there is no evidence that sufficient parking is available. Given the central role of parking to achieving the goal of making this a waterfront for all, the decision makers deserve to be able to consider both alternatives that include new on street parking and a commitment to creation of new off-street parking within sight of the waterfront.

IV. Construction mitigation must be identified and committed to.

Since the first comment letter on the first Draft Environmental Impact Statement for the Alaskan Way Viaduct and Seawall Replacement Project that some members of the Seattle Historic Waterfront Association signed in June 2004, we have always been clear. Construction that cuts off the central waterfront from its customer base and from the rest of downtown Seattle, or that forces visitors to the central waterfront to walk near or across construction activity or brave a waterfront that is a construction site, can easily be fatal to members of the Seattle Historic Waterfront Association. The City's failure to complete the intended portions of the seawall project before the reopening of the waterfront this summer has provided proof of how serious the issue is. Businesses most affected by the failure to complete the work are experiencing a 20 to 30 percent drop in customer counts compared to the same weeks in 2014 or 2013. That drop in business comes at a time when the economy is strong and visitors are thronging to Seattle. For instance, two retailers see sales down 5 and 10 percent on the waterfront at the same time that their stores on First and Pike and First and Pine are up 21 and 23 percent.

While the City's failure to meet the schedule for seawall construction severely damages members of the Seattle Historic Waterfront Association, the City's seawall team at least gets credit for trying to mitigate its impacts. They recognized that construction must not occur during the key summer months. They have tried to provide advance notice of issues as they have arisen. They have created the waterfront promenade, with games and music in an attempt to make the area marred by construction more inviting.

The DEIS for the park suggests that no such efforts are contemplated for AWPOW construction.

The DEIS says that construction will occur from early 2017 until sometime in 2020—at least a three-year construction process. Page ES-9. Alaskan Way will be closed entirely for four months. Page ES-10. Access to businesses may be blocked entirely at times. *Id.* Construction would occur year-round, with multiple shifts. Page 2-30. Construction workers will not be prohibited from taking up the few precious parking spots within or near the construction footprint. *Id.* Ostensibly because plans are too undeveloped at this point, no meaningful mitigation is offered. *See* page 3-38: "Once construction and staging plans have been developed, the City would develop practices to manage parking during construction to ensure, to the extent feasible, that parking is convenient and accessible to waterfront businesses and their patrons." That is not acceptable.

The DEIS is deficient because it fails to provide an adequate analysis of the transportation impacts of the construction process, including both the four-month closure of Alaskan Way between Pike Street and Pine Street and Alaskan Way being limited to one lane in each direction for more than three years.

The EIS can and should now identify meaningful mitigation that will be provided to mitigate construction impacts. Those at a minimum must include the following:

- Construction activities must completely cease from June 1 through September 30 each year.
- One-for-one replacement must be provided for all parking lost during the construction period, or consumed by construction workers, within sight of the central waterfront.
- Business-interruption compensation must be made for any period when, to reach a business, customers must cross a construction site or within an area with a noise level exceeding 85 dbA between 7 a.m. and 10 p.m. on weekdays and between 9 a.m. and 10 p.m. on weekends.
- If the City is asked to grant a noise variance, to exceed the standards set forth in SMC 25.08.425, that variance will be considered and approved only under the process of SMC 25.08.655, with notice given to the Seattle Historic Waterfront Association.
- The City must provide mitigation for transportation impacts during construction, including but not necessarily limited to a complete review and adjustment of signal

timing to maximize the capacity of the constrained system, and provision of traffic police to manage intersections that result in unnecessary congestion. The vague description of traffic conditions during construction suggests that it will be similar to or worse than that currently experienced during seawall construction. When there is an event at the stadiums now, traffic backs up from Madison Street to Pier 70, or beyond. It can take 30 to 60 minutes to travel from Broad Street to Madison. During parts of construction, traffic will be much worse, because Alaskan Way will be required to handle all the traffic now using Elliott and Western to access the viaduct. Because there is no analysis of traffic conditions during construction in the DEIS, it is impossible to comment on the specifics of required mitigation. But the City cannot simply permit gridlock for more than three years because it hasn't disclosed the anticipated conditions; it must perform the analysis to disclose traffic conditions during construction, and then use standard traffic-engineering methods to determine possible mitigation that it discloses in the EIS.

V. **The Transportation Analysis is deficient in providing no meaningful mitigation for gridlock along the waterfront, in not adequately identifying the congestion faced by vehicles coming to or leaving the waterfront on east-west streets, in making no provision for transit to or along the waterfront other than buses that stop at the ferry terminal and then head south to West Seattle, Burien or south King County, and in failing to provide safe and convenient passage for 4.5 million pedestrians annually across six to eight lanes of traffic and a bike lane.**

A. Gridlock coming to, from and along the waterfront must be fully disclosed and mitigated.

Figure 3-6 discloses that with the Action Alternative, at least two intersections on Alaskan Way and two intersections on Western Avenue will experience level of service F in 2030. The DEIS further discloses that "[a]pproximately 30 percent of the vehicles expected to use Alaskan Way would not be able to access the corridor." Page 3-20. In addition:

> East-west traffic approaching many of the signalized intersections on Alaskan Way is expected to experience greater delays than those shown for the overall intersection LOS because the overall intersection delay is the weighted average delay of all the individual movements. Therefore, some side street approaches may experience substantial delays even if the intersection LOS does not indicate congestion.

Page 3-5.

That dire traffic analysis was done without considering the additional traffic associated with events at the stadiums or elsewhere in Seattle. Similarly, having said that 30 percent of the traffic that would otherwise use the corridor will not be able to access the corridor because of congestion, the EIS makes no effort to disclose where that traffic will be diverted to and what its impacts will be on the diverted areas.

The EIS must (1) disclose the expected traffic conditions during the true peak periods (when there are events at the stadiums), (2) disclose the conditions that will be faced by traffic using east-west streets in approaching or leaving the waterfront, (3) disclose the impact of the 30 percent of traffic that cannot access the waterfront on the areas to which it is diverted, and most importantly, (4) identify mitigation that can alleviate that gridlock.

The same is true of the No Action Alternative. The EIS assumes that in the No Action Alternative, the City is helpless to do anything to alleviate gridlock. That failure to consider mitigation of traffic congestion is perhaps best illustrated by the discussion on pages 3-26 and 3-27 of the No Action Alternative. The DEIS assumes that with the No Action Alternative, two intersections will be at LOS F because they either are unsignalized (Alaskan Way and Pine Street) or have a pedestrian half signal (Alaskan Way and Spring Street). By contrast, page 3-27 states that under the Action Alternative,

> all intersections on Alaskan Way would be fully signalized. This is a substantial change from the No Action Alternative, where three intersections along Alaskan Way were unsignalized and three additional intersections had only pedestrian half signals. Signalizing all of the intersections along Alaskan Way and adding left-turn storage lanes would improve operations at most intersections along Alaskan Way compared to the No Action Alternative. Four intersections along Western Avenue . . . were assumed to remain unsignalized.

Although the City has not disclosed its current cost estimates for AWPOW, the estimate as of July 2012 was $565 million for the components of AWPOW. As of October 2014, the City had spent $39 million on only the design of the project. We don't know what the current cost of a signalized intersection is; WSDOT estimates the cost at $250,000 to $500,000 per signal.[6] Reasonable mitigation for the No Action Alternative would clearly include signalizing all intersections. Similarly, anyone who regularly drives Alaskan Way and turns up Madison now knows that much of the congestion in turning up Madison arises because of congested intersections on Western. Reasonable mitigation of the Action Alternative and the No Action

[6] http://www.wsdot.wa.gov/Operations/Traffic/signals.htm

Alternative would include signalizing the Western intersections and, as importantly, properly timing all those intersections. As of 2005, the U.S. Department of Transportation estimated the cost of optimizing timing of intersections at $2,500 to $3,100 per signal update.[7] It is inexcusable to disclose the level of congestion shown in the DEIS and then not propose such cost-effective mitigation.

B. The EIS must be clear: there is no transit along the waterfront, and there is no assurance that transit will exist along the waterfront at any point. Frequent transit along the waterfront and to and from more than just Coleman dock is required.

When construction of the Seattle Art Museum Sculpture Park began, the City removed the George Benson trolley from the waterfront, which had provided frequent north-south transit for users of the central waterfront. Until construction of the Alaskan Way Viaduct Replacement Project began, Metro operated Route 99 along the waterfront. Usage was limited because it had no fixed schedule, had no covered bus stops, and ran on very long intervals, making it largely useless as transportation. Today Route 99 operates on First Avenue, and the Seattle Historic Waterfront Association is aware of no binding commitment that it will come back to the waterfront, nor at a level of frequency to make it attractive.

The DEIS states that "Route 66, connecting Northgate Mall, the University District and the King Street Station with a stop on Alaskan Way at Marion Street near Colman Dock," will operate in 2017. Today that route also operates on First Avenue.[8] The same is true of Route 16.[9] Those routes currently provide no transit to the waterfront, and there is no assurance that they ever will. At most, however, they would provide transit between Northgate or the University District and Colman Dock. They do nothing to make transit available to the remainder of the waterfront. Nor do they do anything to make the waterfront accessible to visitors from Burien or Bothell or Kent or Issaquah, or the host of other parts of the region that guests to the central waterfront have historically come from. When the DEIS says that AWPOW improves transit, it means that it improves transit between areas south of downtown and the heart of downtown Seattle. But it provides no transit to or along the waterfront.

AWPOW must provide assurance that transit will return to the waterfront upon its completion. Frequency must be every 10 to 15 minutes during peak periods year-round, and

[7] http://www.itscosts.its.dot.gov/its/benecost.nsf/0/215F723DB93D293C8525725F00786FD8

[8] http://metro.kingcounty.gov/schedules/066/map.html

[9] http://metro.kingcounty.gov/schedules/016/map.html

throughout the summer months, and at least every 30 minutes during off-peak periods in the winter. If that is not possible, then the EIS must be clear that the waterfront has no transit and no commitment that transit will be provided.

C. The EIS must disclose how the design of AWPOW will permit safe and convenient crossing to the waterfront for 4.5 million pedestrian visitors per year.

In an ideal world, AWPOW would increase the number of visitors to the central waterfront. For all the reasons discussed above, that might not happen. But at a minimum, AWPOW should be designed to safely and comfortably allow the 4.5 million annual visitors that the central waterfront has historically welcomed to pass from the east side of Alaskan Way to the new Promenade. The City "owes a duty to all persons . . . to build and maintain its roadways in a condition that is reasonably safe for ordinary travel." *Keller v. Spokane*, 146 Wn.2d 237, 249 (2002). The DEIS describes in detail the condition of roadway travel for vehicles traveling north and south, and for bicycles, which AWPOW moves to the west of the new Alaskan Way so that they do not need to stop at intersections. But it says nothing about how 4.5 million pedestrians, including 45,000 schoolchildren visiting the Seattle Aquarium, are to safely pass from the east side of Alaskan Way to the new Promenade. If that is not carefully designed, the City will endanger the lives of those pedestrians, and not only discourage visitors, but expose the City to serious liability.

VI. The Land Use Chapter must be revised.

At page 2-12 the DEIS discloses a plan to place 16 feet by 16 feet kiosks, 46 to 48 feet tall, made of shiny reflective material, in the center of the Promenade at Spring, Seneca, University and Union Streets. The City has adopted view protection policies under SEPA. SMC 25.05.675.P.2.a.i provides that it is the City's policy to protect public views of significant natural features including Puget Sound from designated scenic routes, which include Alaskan Way. The kiosks will interrupt the view of Puget Sound from Alaskan Way. SMC 25.05.675.P.2.b provides that it is the City's policy to protect public views of historic landmarks. Piers 54, 55, 56, 57 and 59 are designated historic landmarks. They are the last remaining examples of the commercial piers which first created Seattle's economic base. They are an important part of its maritime history and a reminder of the original role of the central waterfront in making Seattle a major northwest seaport. The kiosks will also block the public's view of those piers. Similarly the Overlook Walk will block the view of the historic piers, the Pike Place Market, and Elliott Bay for pedestrians walking south along Alaskan Way from the north waterfront.

The Land Use Chapter must explain how the City can justify approving these violations of adopted City view protection policies, and how the City will apply its view protection policies to private projects in the future if it chooses not to apply them to AWPOW.

The Land Use Chapter must also be revised to explain how AWPOW will be operated and maintained so that it does not become a blight on the central waterfront, either for lack of maintenance or because it comes a magnet for drug abusers, criminals and parking pirates, whom the City has demonstrated it is unable to control. In meetings with Waterfront Seattle, Seattle Historic Waterfront Association has been promised that the Promenade will be designed to be easily maintained, so that the City can secure it from overnight camping (either by the Seattle Police Department or through private security), that the City will maintain, landscape, clean and repair, and program APOW for daily use, and that it will have budgets to allow it to do so. In the absence of those commitments being met, AWPOW threatens to further drive away the historic visitors to the central waterfront, as well as the hotel guests coming from the Pike Place Market, and could easily become a blighted area. Because of the critical nature of maintenance and security to the aesthetic qualities of the waterfront, the EIS must explain in detail how the City will meet those commitments.

VII. Other Chapters must be revised.

Chapter 6 Noise This chapter purports to describe sources and levels of noise. They are lower than what Seattle Historic Waterfront Association members have measured along the waterfront this summer near their businesses. It is common for jet grouting and vacuum noise to be recorded above 100 dB at business property lines, yet the chart on page 6-5 says 88 dB is the maximum noise level that can be expected. Note that pile driving is not an activity whose noise is characterized in the chart, yet pile driving will occur as part of the construction.

Noise levels should be based on actual noise levels that are measured during the seawall construction. Effective mitigation must be identified for any noise levels exceeding the standards permitted by SMC 25.08.425.

Chapter 8 Public Service and Utilities This chapter includes the same promises the Seattle Historic Waterfront Association has heard before about the lack of interruption of service, but with no details. There is no apparent learning from experience of the seawall project. There are assurances that the project will "coordinate" and "communicate" and "timely repair," but no promises of anything. Nor does it appear that any redundancy is built into the system.

Chapter 9 Historic Preservation. It is fine, but not enough, for the City to promise to repair any physical damage that it does to the historic piers. Those piers exist today only because

businesses within them have remained economically viable. Where historic piers have not maintained an economically viable use, they have quickly fallen into derelict status and had to be removed (Pier 62/63), or have been so altered in the course of trying to provide them with economic use that they have lost their historic character and are no longer eligible for historic designation (Coleman dock, Pier 66, Pier 69, Pier 70). If either the construction process or the ultimate operation, without appropriate mitigation, make the piers on the central waterfront no longer viable, the City must provide the owners with sufficient income stream to maintain these historic structures.

Chapter 15 Cumulative Effects This chapter is inadequate in both its failure to recognize the cumulative effects of the tunnel, viaduct, and seawall projects with this new park. The impacts of those connected and integrated project are not sufficiently integrated and analyzed. The removal of parking for the viaduct is one example of that lack of integration.

The EIS is also deficient in its failure to analyze the cumulative impacts of AWPOW with other known public projects in the immediate vicinity. An example is the failure to recognize and analyze the impacts of the Seattle Aquarium's proposed expansion pursuant to the master plan which the City Council recently blessed. That master plan states that the Aquarium needs approximately 76,000 square feet of expansion space, however the DEIS states that the Overlook Walk will provide it with only 22,000 square feet of expansion space. The Aquarium also brings at least 45,000 school children to the Aquarium annually, yet AWPOW provides nowhere for buses to let those children off and pick them up without taking them across an unrestricted bike path. Nor does the EIS recognize the parking demand that the Aquarium generates. Comparison of parking spaces available to the Seattle Aquarium with other prominent aquariums demonstrates the inadequacy of the available parking.

	Spaces	**Attendees/Space**	**Notes**
New England (Boston)	1,200	980	subway stop is also at its door
Monterey	1,641	1641	2 garages plus street parking
Baltimore	950	1455	1 plus other garages
Georgia	1,600	1321	Attached garage

Chicago	4,000	516	CTA + streets in addition
San Francisco	800	1876	Bart, Trolley available
Seattle	270	3000	Assumes ½ Pike Garage for Aquarium

Similar issues arise with respect to the Ferry Terminal expansion. The need for eight lanes on Alaskan Way south of Yesler is entirely premised on SDOT allowing the Washington State Ferry System to use two lanes of Alaskan Way for ferry parking. The alternatives for ferry terminal expansion need to be analyzed concurrently with AWPOW so that proper decisions can be made for both.

VIII. Conclusion

How the City will rebuild Alaskan Way and reconnect the city to its waterfront once the viaduct is down is probably the most important urban design challenge of this generation. It needs to be made carefully, and it needs to be made with the fully consideration of alternatives that SEPA require. The current DEIS is sufficiently defective so that it must be redone, with a true consideration of alternatives, and a true examination of how the significant adverse impacts inherent in the project can be mitigated.

The Seattle Historic Waterfront Association has devoted thousands of hours to helping the city and state on the Alaskan Way Viaduct and Seawall Replacement Programs, and looks forward to more productive work together with the City to make this a Waterfront for All.

AWPOW--Supplemental Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34996
Seattle, WA 98124-4996

Subject: Comments of Seattle Historic Waterfront Association on the Draft Supplemental EIS for Waterfront Seattle ("DSEIS")

Dear Mr. Mazzola:

This letter is submitted on behalf of Seattle Historic Waterfront Association. Prior to the City's Elliott Bay Seawall Replacement Project its members annually played host to approximately 4.5 million visitors to Seattle's Waterfront in 2014. Argosy and Let's Go Sailing have provided opportunities for nearly 400,000 visitors each year to not just look from shore, but actually get out onto Elliott Bay for recreational purposes. Its members are homegrown businesses that are beloved by Seattle citizens, and provide distinctive memories for visitors to Seattle. As we have said on multiple occasions, while the members of Seattle Historic Waterfront Association would much prefer to be the biggest boosters of the Waterfront Seattle plans, the City's failure to address the significant adverse environmental impacts of the proposal threaten the continued viability of their businesses and makes it impossible for them to support the entire plan.

Seattle Historic Waterfront Association is very disappointed in the DSEIS. It had hoped when the City announced that it would be preparing a supplemental EIS that the City would finally seriously address the comments of the Seattle Historic Waterfront Association, as well as other interested parties along the waterfront, and the concerns raised by Downtown Seattle Association and BOMA. To the contrary, the DSEIS addresses none of those concerns.

Seattle Historic Waterfront Association supports the proposed Overlook Walk Alternative 2 that incorporates the future expansion of the Seattle Aquarium. This location is an appropriate site for Aquarium use, and would support the expansion of one of the waterfront's most important cultural and educational institutions within the central waterfront redevelopment project. We also support a planning process that ensures that the new Aquarium building and the Overlook Walk structure are built simultaneously so as to limit the overall duration of construction disruption.

But apart from the Aquarium alternative being included – as it should have been in the DEIS – the DSEIS addresses none of the concerns raised in Seattle Historic Waterfront Association's comments on the DEIS dated August 25, 2015. The intervening eight months, which could have been spent coming to grips with the environmental impacts of the proposal, appear to have been wasted.[1]

The scope of this letter is necessarily restricted by the fact that the City refused our request for an extension and we have been given only 30 days to comment on the DSEIS. While this letter focuses on the issues of most concern to Seattle Historic Waterfront Association, the Association urges the City to also pay close attention to the concerns expressed by Alliance for Pioneer Square, Waterfront Landings and Downtown Seattle Association/BOMA. Much of Waterfront Seattle is supposed to be paid for by an LID, to be imposed on downtown property owners whose property receives "special benefit" from the project. It is inexplicable that the planning for Waterfront Seattle could have proceeded as far as it has in complete disregard of the concerns of the parties most affected, and who are expected to pay a substantial share of the cost.

I. The DSEIS is again fatally deficient in its consideration of alternatives.

The City has not presented any serious alternatives to its proposed action. It has not presented any mitigation for the impacts of its proposed action. And, perhaps most disturbingly, it has not presented a thoughtful no-action alternative.

A substantial part of the DSEIS (pp. 2-1 to 2-18) attempts to argue why there are no alternatives to the proposed action. Quite simply, the City has no credibility when it says that there is only one way to redevelop the Seattle Waterfront. This is the same City which from at least 2004 through 2008 argued that there were

[1] Seattle Historic Waterfront Association incorporates its August 25, 2015 letter as an appendix. The DSEIS does not address any of its comments on the DEIS.

only two ways to replace the Alaskan Way Viaduct – a cut-and-cover tunnel under Alaskan Way which would have shut down SR 99 entirely for from 4 to 9 years and would have killed all existing businesses along the waterfront, or replacement of the viaduct with a new elevated roadway, again shutting down SR 99 for years and destroying the waterfront businesses, but also repeating a serious urban design mistake of the mid-20th Century. Seattle Historic Waterfront Association spent those years examining alternatives, finding and promoting the deep bore tunnel plus transit alternative years before the City acknowledged its viability, and helping to build a consensus among city-wide stakeholders that the City's "only" two alternatives deserved a "no-no" vote. Although the deep bore tunnel has not been without its challenges, SR 99 will remain open for all but a few weeks until the deep bore tunnel opens, and the waterfront and its anchor businesses have survived. So there is physical proof that when the City says that there are no alternatives other than ones that seriously damage the waterfront, it is not to be taken seriously.

The City appears to misunderstand the role of an environmental impact statement. That role is not simply to justify political decision that is already made. An EIS cannot limit the range of alternatives and mitigation considered to those which meet pre-decided policy preferences. To the contrary, the EIS is required to present a reasonable range of alternatives and mitigation, and describe the environmental consequences of those alternatives and mitigation, without being circumscribed by policy preconceptions. The EIS is required to inform decision-makers of the environmental consequences of their decisions before the decisions are made. SEPA, like NEPA, was intended to put an end to the practice of making decisions based on policy assumptions and only later reckoning with the unexpected consequences.

Here the decision-makers whom the EIS is meant to inform are not only the permitting staff which will act on the required permits. The decision-makers are also the City Council, which in order to pay for the preferred alternative will need to divert City revenues from other uses to pay for part of the cost and form an LID and issue property assessments based on alleged special benefit to particular properties. The decision-makers also include the property owners and their tenants who will be expected to pay those assessments. Those decision-makers need full disclosure of the consequences of their decisions, so that the City Council can modify policies if necessary to achieve their intended purposes at the least environmental cost, and so that property owners understand what they are being asked to pay for. The purpose of the EIS is not to determine the decision or justify a decision that has already been made; it is to lay out the consequences of and alternatives to potential decisions, so that decision-makers are fully informed when they make decisions.

To take a case in point, the DSEIS states that the loss of parking which results from the two action alternative is consistent with policy decisions to restrict the use of automobiles. (DSEIS page 4-14) **Therefore no significant mitigation for the loss of parking is proposed.** It may be that if the EIS disclosed that the preferred alternative would be consistent with that policy but will reduce or eliminate use of the waterfront by the 53 to 74 percent of visitors to the waterfront who prior to the City's seawall construction arrived by automobile, and that the loss of those visitors will put many existing businesses out of business, leaving the waterfront with "space available" signs to greet tourists using the grand staircase from the Pike Place Market, the City Council and the property owners would make the decision to sacrifice those visitors and the existing businesses, in service of a vision of an auto-free city. Or, it may be that if the impacts were accurately disclosed, the decision-makers would insist on adequate mitigation for the loss of parking, so that the waterfront remained accessible to families who come to the waterfront with children and grandparents, and to out-of-town visitors who come for the day, not for a convention, and who do not stay at fancy hotels in the retail core. It may be that decision-makers would conclude that it is unacceptable to have no transit options west of First Avenue other than serving the ferry terminal. It may be that the City's policy of antagonism to the automobile would be modified, to retain the focus on walking and transit for commuters, but to better recognize the role of the automobile in maintaining the vitality of retail and visitor-oriented areas. The purpose of an EIS is to provide information to facilitate such choices, not to, as this EIS does, simply justify one policy perspective while ignoring the options to mitigate its adverse impacts.

II. The SDEIS should have been based on current data.

The ostensible reason for the "new" Overlook Walk alternative is the release of the Aquarium's master plan, which occurred essentially at the same time as the DEIS was released. Seattle Historic Waterfront Association believed that the Aquarium alternative should have been the preferred alternative in the DEIS. But it agrees it is appropriate to update the Draft EIS with a Supplement since that did not occur. It is improper, however, to now supplement the DEIS without using current information as to a number of changes that have occurred since the release of the DEIS. These include, but may not be limited to:

- The cumulative loss of parking has been exacerbated by continued development which has removed available parking spaces. The most egregious loss was announced last week when the Seattle Department of Transportation released an Environmental Assessment for a proposed streetcar line of First Avenue, which if

built will remove 192 on-street parking spaces from First Avenue (84% of the current supply).

- The construction impacts have been exacerbated by both the fact that completion of the Elliott Bay seawall construction is delayed a full two years after its scheduled completion, and that the central waterfront has suffered through far more construction damage than it was led to expect by the environmental review of the seawall project. That construction damage was increased by the fact that the City replaced the utility mains along Western Avenue and throughout Pioneer Square as a result of settlement caused by the AWV project, and SDOT's most recently announced multi-year streetcar construction process on First Avenue.

- A significant cause of congestion along Alaskan Way and its extreme width south of Columbia Street is the 500+ buses per day that the project assumes must be routed onto Alaskan Way. Metro rejected alternative routes for those 500+ buses because of the need to cross train tracks with alternatives using Third and Fourth Avenues. But, the S. Lander Street overpass, which would address that problem, has made good progress since the DEIS was issued in obtaining funding. The first $20 million was funded by the Move Seattle levy passed by the voters last November. http://www.seattle.gov/transportation/docs/CB118402SpendingBreakdown.pdf. The City has applied for an additional $55 million from the federal government. http://www.seattle.gov/transportation/lander_bridge.htm. Although that still leaves a funding gap to be filled, it is entirely realistic to expect that the S. Lander Street overpass can be completed before Waterfront Seattle is built. If that is true there is no justification for funneling 12 bus routes and 500+ buses per day onto Alaskan Way. Removing those buses and the transit lanes that AWPOW assumes they require would dramatically alter the extent to which Pioneer Square remains cut off from the waterfront.

III. The need for a fully-developed no-action alternative has only increased in the intervening months since the DEIS was issued.

WAC 197-11-440(5)(c)(vii) and SMC 25.05.440(D)(3)(g) require that an EIS:

> Discuss the benefits and disadvantages of reserving for some future time the implementation of the proposal, as compared with possible approval at this time. The agency perspective should be that each generation is, in

> effect, a trustee of the environment for succeeding generations. Particular attention should be given to the possibility of foreclosing future options by implementing the proposal.

That injunction is particularly important here. The Waterfront Seattle proposal is a grandiose plan for which the City has incomplete funding, coming on the heels of at least seven years of serious disruption of the waterfront for construction of the viaduct replacement, and then the rebuilding of the Elliot Bay Seawall.[2]

Removal of the viaduct will open up the waterfront to downtown Seattle in ways that have been impossible to imagine until it is gone. Alternatives that are not now apparent will undoubtedly emerge as the people of Seattle get to experience the City's waterfront without the viaduct. Great cities are built over time, rarely in single grand gestures such as Waterfront Seattle proposes. The urban renewal projects of the 1970s generally taught us that grand gestures that radically change large sweeps of a city end up being sterile mistakes. This generation of Seattleites can take pride in having removed the viaduct and replaced the Elliott Bay seawall, without feeling compelled to build the grand vision of Waterfront Seattle.

And, whether that is true or not, the proposal for Waterfront Seattle may not happen, or it may need to be significantly scaled back or built in phases. The City has been silent about current cost estimates for any of the built alternatives discussed in the DEIS or the DSEIS.

- The project's most recent budget materials (http://www.waterfrontseattle.org/budget-schedule) assume the State of

[2] The most disruptive part of that construction – rebuilding of the seawall, was to have been completed in 2016, with construction in front of the historic piers completed prior to the summer season of 2015. Instead, the historic piers have suffered through an added 11 months of construction blocking visitors from easy access to them and making a visit to the waterfront a visit to a major industrial site. The result is that customer counts for the businesses have been down 10 to 70% over this period. The latest report from the City's seawall team is that seawall construction will not be fully completed until mid-2018 – two years late. Those delays have breached assurances made to Seattle Historic Waterfront Association in resolving a challenge it brought to the EIS on the seawall, and have resulted in extraordinary adverse impacts to them. The City's approach to Waterfront Seattle seems to be to not make any promises of mitigation of its adverse impact, since it has breached its most important assurances of mitigation with respect to the seawall. The fact that the City has not met its commitments for mitigation of the seawall is even more reason why the EIS for Waterfront Seattle must identify mitigation of its impacts. Furthermore, the extended construction period has made it important to Seattle Historic Waterfront Association that there be a complete pause in any major construction on the waterfront for several years, so that its members can recover from the seven years of disruption thus far.

Washington will provide $220 million for rebuilding Alaskan Way, however it is not at all clear the State has committed to that funding. Nor is it clear that $220 million will rebuild Alaskan Way.

- The City's most recent budget assumed that $199 million would come from an LID, which has not been formed, and which property owners in Downtown Seattle may not support, for all the reasons spelled out in the comments of DSA and BOMA on the DEIS.

- The City's most recent budget assumed that $103 million would come from philanthropy, the securing of which has not happened, or at least has not been announced.

- Another $153 million is projected to come from various general funds of the City (real estate excise tax, commercial parking tax, the seawall bond, Washington state grants, "other City revenues" and "other sources TBD"). The seawall reconstruction was last reported to be $70 million over budget, so presumably revenues from the seawall bond have been consumed.

- The other sources are either undefined, or, in the case of real estate excise tax or commercial parking tax revenues, could be used for other City priorities if not dedicated to Waterfront Seattle. The City Council will have to appropriate those funds, and there is no guarantee that the Council will do so.

The result of all of these factors is that the Project may not happen, or it may happen in phases or at a significantly reduced scale. The EIS needs to provide a thoughtful analysis of what alternatives exist if that occurs, and how the City can best live within what may be restricted means.

To the contrary, the DEIS makes no effort to explain how the City will address a no-action or a phased-action alternative if that is the reality it is faced with. Last year Seattle residents passed a transportation levy that will provide the City with over $100 million per year for the next nine years to improve transportation operations, improve pedestrian safety, improve corridor mobility and improve freight mobility. Although the City has many transportation needs, if funding for the City's preferred alternative does not materialize, some of that money should be available and will have to be used to improve the functioning of the no-action alternative. The EIS must thoughtfully consider how to do that, and not simply tell decision-makers that their only choice is to fund the only Action Alternative or accept gridlock along the waterfront.

Very truly yours,

AWPOW - Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34966
Seattle, WA 98124-4966

Subject: Comments of Seattle Historic Waterfront Association on the DEIS for AWPOW

Dear Mr. Mazzola

Thank you for the opportunity to comment on the Draft Environmental Impact Statement ("DEIS") for the Alaskan Way Promenade and Overlook Walk ("AWPOW"). These comments are submitted on behalf of the Seattle Historic Waterfront Association.

The members of the Seattle Historic Waterfront Association are the owners of the four privately owned historic landmark piers along the central waterfront and the businesses that operate within and alongside those piers. They are homegrown businesses, the oldest of which predates construction of the Alaskan Way Viaduct, and the newest of which became an instant feature of Seattle's skyline. Consistent with their location on the City's shoreline, Argosy and Let's Go Sailing provide annual opportunities for nearly 400,000 visitors to get out onto Elliott Bay for recreational purposes. Members of the Seattle Historic Waterfront Association are an essential part of what gives a visit to Seattle its distinctive flavor in an increasingly homogeneous world.

In the years before the City began replacement of the Elliott Bay seawall, the Central Waterfront hosted approximately 4.5 million visitors to Seattle annually. Each of those visitors was a pedestrian, which means that he or she was either delivered by passenger bus to the curb at the Central Waterfront (such as the 45,000 schoolchildren in groups visiting the Aquarium annually) or had to cross Alaskan Way by foot.

Based on years of surveying their customers, Seattle Historic Waterfront Association members know these Seattle visitors well. Between 53 and 74 percent of their visitors arrive by car.[1] They come in family groups (3+ people per vehicle). That frequently includes children in strollers or grandparents, both of which pose mobility issues. Those arriving by car tend to come from Washington State and often the Puget Sound region, but they do not work downtown; they come to the waterfront as a recreational daytrip. As a result they are not familiar, nor comfortable, with Seattle's transit system, as downtown commuters are. Kate Joncas, former Downtown Seattle Association President and now Seattle Deputy Mayor, had a rule for such visitors: they want to "park within sight of their destinations." Their visits are for recreation, not business. As a result, if it is too hard to get to the Central Waterfront, or park once they arrive, they exercise their freedom to spend their recreational time elsewhere.

The members of Seattle Historic Waterfront Association would be among AWPOW's biggest beneficiaries and supporters if AWPOW were designed and constructed to achieve its stated goals:

- create a waterfront for all,
- reconnect the city to its waterfront, and
- embrace and celebrate Seattle's past, present and future,

Unfortunately, the plan presented in the DEIS does not advance those goals. It will not create a waterfront for all; it will create a waterfront for young, fit bike riders and for people staying at the downtown hotels who want to get from the Pike Place Market to the waterfront. It will not reconnect the City to its waterfront; it is primarily focused on moving vehicles and bicycles north and south along Alaskan Way. The only locations where it will potentially be easier for pedestrians to reach the waterfront is at the Overlook Walk,[2] and to some extent at Union Street; for the rest of the waterfront, the east-west passage of pedestrians will be no better, and potentially more dangerous, since they need to cross six to eight lanes of Alaskan Way, and a new bicycle track designed to allow cyclists to travel north and south without stopping. Far from embracing the views of the historic landmark piers and the Pike Place Market for those approaching or on the Central Waterfront, the plan calls for multiple structures that will block the

[1] By contrast, 79 percent of the employees on Pier 54 arrive by mass transit, as compared to 45 percent for downtown Seattle as a whole. http://stb-wp.s3.amazonaws.com/wp-content/uploads/2015/02/Modal-Split-Snip.jpg

[2] The plan will make it more difficult to use the two existing elevators that currently take pedestrians from the Pike Place Market to the waterfront, making it unclear that it will be easier for pedestrians with the Overlook Walk.

views of the historic piers and the Market, in the form of towers described as "beacons" and the Overlook Walk.

Without significant change and mitigation of its impacts, AWPOW threatens to eliminate the 53 to 74 percent of the customers of the members of Seattle Historic Waterfront Association who are not welcome under the plan. That loss of customer base, combined with serious unmitigated construction impacts, will threaten the continued existence of the members of Seattle Historic Waterfront Association. This letter primarily addresses deficiencies in the DEIS for AWPOW, but the Seattle Historic Waterfront Association would very much like to discuss meaningful change to the AWPOW proposal, so that it can proceed while still allowing Seattle Historic Waterfront Association members to remain a part of Seattle's future as well as its past.

I. The DEIS fails to accurately describe the affected environment.

WAC 197-11-440(6) and SMC 25.05.440(E) require that "the EIS shall describe the existing environment that will be affected by the proposal." That is the foundation from which an EIS then analyzes the environmental impacts of a proposal and discusses reasonable mitigation measures of those impacts. If the EIS doesn't accurately describe the affected environment, it cannot accurately describe the impacts, and therefore cannot adequately address required mitigation.

The DEIS never recognizes that the affected environment of the AWPOW proposal is one of the most important visitor destinations in the City of Seattle, with approximately 4.5 million unique pedestrian visitors per year. *See* Sec. 4.1.1, "Existing Land Use" ("the study area contains a variety of land uses," with a generic listing of building types); Sec. 3.2, "Affected Environment for Transportation" (describing vehicular traffic passing from north of the area to south of the area and travel times for that traffic, but never describing how traffic gets to the area as a destination; describing the width of existing sidewalks but not the number of pedestrians using those walks along the Central Waterfront, yet describing the number of bicyclists crossing Alaskan Way with specificity); Sec. 3.5, describing the affected environment for parking as extending from King Street and Second Avenue to Wall Street and Second Avenue, at times 1,500 feet horizontally, and several hundred feet vertically from the waterfront. *See also* Section 3.2.3, where the DEIS states in passing:

> East-west traffic approaching many of the signalized intersections on Alaskan Way is expected to experience greater delays than those shown for the overall intersection LOS because the overall intersection delay is the weighted average delay of all the individual movements. Therefore, some side street approaches

may experience substantial delays even if the intersection LOS does not indicate congestions.

If the only relevant vehicular traffic is the traffic passing from north to south, that analysis might be adequate. But if the relevant traffic is the ability of visitors to get to and leave the waterfront, the fact that east/west traffic is gridlocked is a major environmental impact. By treating the relevant traffic as being north/south through-traffic of vehicles and bicycles, and ignoring pedestrian and vehicular traffic to and from the central waterfront, the DEIS fails to identify the significant adverse impacts of the proposal.

The failure to acknowledge the central waterfront as a leading pedestrian destination for visitors to Seattle causes the DEIS to fail to address the impact of both vehicular traffic and the proposed bicycle path on the ability of pedestrians to reach the waterfront. Section 3.2.6 predicts that in 2017, between 1,000 and 1,500 bicyclists per day will cross Alaskan Way at Spring Street, between 450 and 1,100 bicyclists per day will cross Alaskan Way at University Street, and between 750 and 1,000 bicyclists per day will cross Alaskan Way at Union Street. In 2006, the Seattle Historic Waterfront Association conducted pedestrian counts from 11 a.m. to 9 p.m. on August 4 to determine the number of pedestrians along Alaskan Way at the peak hour and during the average hour. August 4 was selected because it was during the busy summer period, but it was not expected to be the peak day of the summer. The results are as follows:

Hourly Alaskan Way Pedestrian Traffic Counts

	Pier 66 west side of Alaskan Way	Pike Hill Climb east side of Alaskan Way	Spring Street west side of Alaskan Way	Spring Street east side of Alaskan Way	Seneca Street west side of Alaskan Way	Seneca Street east side of Alaskan Way	Total Counts
August 4 peak hour	2,061	459	2,474	613	1,988	1,013	8,097
August 4 average hour	1,537	301	1,864	469	1,401	768	6,400

Not surprisingly, pedestrian counts were from two to four times higher on the west side as on the east side of Alaskan Way. Although counts were high at the intersection of Alaskan Way and Pike Street, the counts were higher at Spring Street, and nearly as high at Seneca Street. All the pedestrian counts were much higher than the projected bicycle use of the new bike path.

Yet the DEIS gives no consideration to how this pedestrian traffic will cross Alaskan Way or the bike path.

By failing to recognize the Central Waterfront as a major visitor destination, the DEIS also fails to recognize the critical role of seasonality in the impacts of the proposal. As the Seattle Historic Waterfront Association has told the City many times, 54 percent of the visitors to the central waterfront come in the four months of June through September. Argosy has a peak in December and in the spring. Those are the periods when parking must be available and when it must be possible to get to the central waterfront. With advance notice, members of the Seattle Historic Waterfront Association can plan for environmental disruption during their low-attendance periods, but disruption to parking and access during the key summer months is potentially fatal to its members, and the new waterfront park.

The DEIS also fails to recognize that during those peak summer months, both vehicular and pedestrian traffic further peak when there are events at Safeco Field (at least 53 dates from June through September) or Century Link Field (at least 13 dates from June through September), or other major downtown events. The p.m. peak hour when there is no major event at the stadiums or elsewhere in downtown is much less congested than the p.m. peak hour when events are occurring. The EIS must analyze the existing pedestrian and vehicular environment during those true peak periods, and must provide mitigation for the significant adverse impacts during those periods.

Finally, the DEIS both understates the current connections between the Pike Place Market and the central waterfront, and ignores the fact that visitors to the waterfront currently arrive by multiple east-west streets, many of which would benefit from significant improvement. On page 1-6, the DEIS states the need for the Overlook Walk as being that "opportunities for pedestrians to move directly between the market and the waterfront are limited to two sets of stairs: the Pike Hillclimb and a staircase ascending the undeveloped slope west of the market in the Pine Street right of way." That ignores the two elevators (and stairways) within the Market parking garage, which easily take visitors by elevator between Alaskan Way and the Pike Place Market, but will be climinated or made much less accessible by AWPOW. The DEIS also ignores the current east-west connections between downtown and the central waterfront at Union Street, University Street, Seneca Street, Spring Street, and Madison Street, which are used by residents and workers in the heart of downtown

Seattle to get to the waterfront, but which AWPOW makes little or no effort to make more accessible.

The DEIS ignores the fact that except for the Overlook Walk and an elevator between Post Alley and Alaskan Way at Union, the difficulty for pedestrians of navigating the topographic drop between First Avenue and Alaskan Way will remain unchanged. There is at least 100 feet of elevation change between the waterfront and the Pike Place Market. The Pike Place Hillclimb has 160+ steps. The largest issue in moving people from the heart of downtown to the waterfront is the need to climb and descend the bluff. That dissuades visitors to any part of the central waterfront from parking anywhere beyond Western Avenue.

II. The DEIS is defective in its failure to consider alternatives that could achieve AWPOW's objectives with greater certainty or lower environmental cost.

The DEIS claims that there is no alternative other than "no action" to the preferred alternative. That is simply not true, and the failure to consider reasonable alternatives renders the DEIS defective. SEPA requires that an EIS must include a discussion of alternatives to the proposed action. RCW 43.21C.030(2)(c)(iii); WAC 197-11-440(5); SMC 25.05.440.D.

> The required discussion of alternatives to a proposed project is of major importance, because it provides a basis for a reasoned decision among alternatives having differing environmental impacts. Pursuant to WAC 197-11-440(5)(b), the reasonable alternatives which must be considered are those which could feasibly attain or approximate a proposal's objectives, but at a lower environmental cost or decreased level of environmental degradation.

Weyerhaeuser v. Pierce County, 124 Wn.2d 26, 38 (1994) (finding an EIS for a landfill inadequate as a matter of law because it did not include more than the proposal and a no action alternative). See also, *Brinnon Grp v. Jefferson County*, 159 Wn. App. 446, 481 (2011). WAC 197-11-440(5)(d) and SMC 25.05.440.D.4 provide, "When a proposal is for a private project on a specific site, the lead agency shall be required to evaluate only the no-action alternative plus other reasonable alternatives for achieving the proposal's objectives on the same site." WAC 197-11-440(5)(d) and SMC 25.05.440.D.4 have no application here, because this is not a private project. See SMC 25.05.780 defining "private project" as "any proposal primarily initiated or sponsored by an individual or entity other than an agency." The proponents of

AWPOW are the Seattle Department of Transportation and Seattle Office of the Waterfront. There is no basis for two public agencies to consider only the no action alternative.[3]

Reasonable action alternatives should include:

- replacing far more of the parking that has been lost on the central waterfront,
- redesign of the Overlook Walk to provide the 76,000 square feet of additional space that the Aquarium's master plan calls for rather than only 22,000 square feet, as stated at pages ES-8 and 2-15, , and
- consider devoting more of the public's limited resources to improving east-west pedestrian connections at multiple streets as well as devoting resources to connections between the Pike Place Market and Pier 62/63.

In its comments on the scope of the AWPOW EIS, the Seattle Historic Waterfront Association said, "The EIS should include analysis of alternatives and phasing plans that will be implemented if either the LID does not go forward, the levy is rejected, and/or the hoped for philanthropy does not materialize." Since then, the City has realized that it does not have the money to either build improvements to Pier 62/63 or rebuild Waterfront Park, and so those have disappeared from the AWPOW proposal. When we commented on the scope of the AWPOW EIS, we assumed that the State of Washington had committed $290 million to remove the viaduct, build the elevated Elliott Connection, decommission the Battery Street Tunnel and construct new surface Alaskan Way. *See* Central Waterfront Committee Strategic Plan at 30, (July 2012). We now understand that the $290 million funding may be at least in part in doubt. The remainder of AWPOW is unfunded. The City has not disclosed its current cost estimates for

[3] WAC 197-11-440(5)(d) and SMC 25.05.440.D.4 do not absolve private parties from considering alternatives on the property owned by the private party that might reduce the environmental impacts; they simply do not require a private party to consider siting the proposal on property that it does not own. Here the proposed action area is well over 25 acres. It is not plausible that there is no alternative other than the proposed alternative to achieve the City's stated objectives within the available space. *See* ES-5: "No other alternatives that could feasibly attain or approximate the proposal's objectives, but at a lower environmental cost or decreased level of environmental degradation, were identified." If the City hired three other design teams, it would get more than three different alternatives, because most design teams would offer the City more than one alternative to consider. Furthermore, the City is intending to use its powers of eminent domain to acquire at least two parcels to add to the current public property. If the City can condemn those two properties, there is no reason why the City should not consider alternatives that might call for acquisition of different parcels. So even if this were a private proposal, which it is not, there would be no basis to limit the alternatives considered on the property currently within the City's control. For a public project, alternatives that require acquisition of other property should also be considered.

construction of any part of AWPOW. At this point, the public has no basis to understand whether AWPOW is financially feasible.

How the City treats the project area once SR 99 is in a deep-bore tunnel and the Alaskan Way Viaduct is critical to the City, both because of Alaskan Way's role as a north-south arterial and because it is critical to welcoming visitors to Seattle's waterfront. It is therefore even more important today than in September 2013, as we commented on the scope of the EIS, that the City consider alternatives that would mitigate the impacts of the No Action alternative or delayed construction of elements of the proposed action over an extended period if the entire proposal is financially infeasible. SEPA requires that there be a full and fair discussion of the actual alternatives, so that the public and the decision makers can make reasoned decisions.

III. The discussion of parking impacts is inadequate on multiple levels

If they can survive the construction impacts of AWPOW (see below), no single issue is more critical to the Seattle Historic Waterfront Association than that the parking impacts of the project be mitigated. To be mitigated, they must first be fairly disclosed. The DEIS discussion of parking impacts is inadequate on several levels.

The DEIS does disclose on page 3-40 that within Zones 2 and 3 (where the Seattle Historic Waterfront Association is located) visitors "may need to park off street or travel several blocks farther to find available on-street or off-street parking." As discussed above, years of surveying the visitors to the Central Waterfront have shown that from 53 to 74 percent of current visitors to the Seattle central waterfront will likely be deterred from visiting at all under those circumstances. Those visitors have historically seen a trip to the central waterfront as an enjoyable outing for a day trip, but are not able to walk several blocks, or don't know how to get around by transit, or can't climb the 60 to 150 feet between Alaskan Way and First or Second Avenue, or come in family groups with a stroller to push or a grandparent with mobility issues. AWPOW is designed for younger, fitter people, or guests staying at downtown hotels, who walk to the Pike Place Market and then want to get to the waterfront. Guests at downtown hotels have historically made up a significant minority of visitors to the waterfront. But the Seattle Historic Waterfront Association is seriously concerned about a plan that essentially disinvites a majority of its historic customer base.[4]

[4] If the City is not interested in providing a waterfront for people from this region to visit for day trips, and the loss of the historic customer base of the Seattle Historic Waterfront Association is simply an unfortunate consequence of what the City sees as progress, it should say that plainly. But the function of the EIS is to clearly disclose the environmental consequences of public decisions. The EIS is inadequate in that it uses the rhetoric of creating a

Defects in the DEIS analysis of parking impacts include the following:

- The EIS must recognize the loss of parking from the entire Alaskan Way Viaduct replacement/Elliot Bay Seawall replacement/AWPOW project. They are intimately tied together such that AWPOW would not happen but for the Viaduct and Seawall replacement. Thus, the total number of lost on-street and off-street parking spaces is not 673, as stated on page ES-16, but over 1200. The 250 new parking spaces that are included in the Pike Place Market development were funded by the State of Washington as partial mitigation for the impacts of the Alaskan Way Viaduct replacement project. **It is not new mitigation and cannot be claimed as mitigation for the AWPOW project.**

- The parking study area (Figure 3-9) is not realistic as a measure of where visitors to the central waterfront will park. Those visitors will not park as far uphill as Second Avenue. As discussed above, there is no reason to believe they will park if they cannot see their destination from where they park. Although out-of-town visitors much prefer on-street or surface parking to parking in a garage, either on-street or off-street parking can be viable—but not parking that requires walking several blocks uphill and cannot be seen from the waterfront. The relevant zone is west of First Avenue south of spring street, and west of Western Avenue north of Spring Street.

- The PSRC study does not represent the demand and occupancy during the critical summer months. Visits to the central waterfront are highly seasonal with June through September as the critical months. A survey between March and May is irrelevant to whether there is adequate parking in summer, just as a parking survey during the month of October would be irrelevant to whether there is adequate parking during December to sustain retailers in the retail core. Throughout the summer, the Pike Place Market parking garage, the Hillclimb Court garage, and every spot in the lots or on the street within site of the central waterfront are regularly 100 percent full. Furthermore, the relevant parking utilization is the peak periods of the day, not an average over the entire day. A visitor looking for parking at 6 p.m. takes no comfort from the fact that at 10 a.m. a garage might have had spots available.

- The DEIS overstates the off-street parking supply as it will exist in 2017. Section 4.2.2 of Appendix B states:

"waterfront for all," while not disclosing that the waterfront will be inaccessible to a high percentage of the visitors who have historically been among its 4.5 million annual visitors.

> Off-street parking supply, demand, and utilization were obtained from the Puget Sound Regional Council (PSRC) off-street parking survey information. The PSRC parking survey data were collected on weekdays [Monday through Thursday] from March through June 2013. Because off-street parking supply has not changed and is not expected to change as a result of AWVRP and EBSP construction, 2013 data are expected to represent a reasonable estimate of parking supply, demand, and utilization in 2017.

The DEIS never identifies where PSRC found the 10,746 off-street parking spaces that it claims exist within the parking study area.[5] See page 3-35. As a result, we assumed that Figure 5-2 (Existing Land Use) was a reasonable approximation of what the City assumes is the location of existing parking. On the morning of July 30, 2015 (a Thursday), we walked the southern half of the parking study area to look at sites for which Figure 5-2 shows the existing land use as "parking," to determine whether the City's assumptions that parking that existed in 2013 would exist in 2017, and that utilization of existing parking was between 60 and 74 percent, were accurate. What we found on areas shown as off-street "parking" in Figure 5-2 was as follows:

- Merrill Place garage. It currently has 140 total spots. A DPD sign on the garage says that it will be replaced with an eight-story structure with 155,000 square feet of office, 9,500 square feet of retail, and 48 underground parking places. The existing building will be demolished. So the number of parking spaces on the property will go down, while on-site demand will increase. **No parking available to the general public can be expected in 2017.**
- North Lot. In 2011 the North Lot had 1,165 public parking places. **More than 50% of these have been lost to development.**
- Parking garage between Jackson and Main on Alaskan Way. The garage currently has 100 spots. Although it appears that at times public parking is allowed, it was entirely full with monthly parkers at 10 a.m. on a Thursday. A DPD sign on the building says that the building will be replaced with an 11-story structure with 199 residences and 78 parking spaces. Again, the number of spaces will go down while on-site demand goes up. **No spaces are likely to be available to visitors.**
- Lot between Occidental and the alley, Main and Washington. The site is currently under construction for the new Weyerhaeuser headquarters. **All 132 public parking spaces are gone.**

[5] PSRC's 2013 parking study is not available online, so the public has no way to verify the number reported in the DEIS.

- Multistory garage between Columbia and Cherry, west of First Avenue. It had 154 open spaces at 10:30 a.m. on a Thursday. The First and Columbia garage typically has space available, even during peak parking demand periods. Exactly why is unclear, but visitors seem to avoid it even when nearby parking garages are full.
- Lot between Western and Post Alley, Columbia and Marion. It is now occupied by a residential building called "The Post." **All of its public parking is gone.**
- Garage between Cherry and Columbia facing First Avenue. The attendant said that the garage has 230 spaces. At 10:30 a.m. he said that 4 or 5 spaces were still available on the top floor.
- Lot between Western and Post and Seneca and Spring. The electronic sign said there was 1 spot open at 10:30 on a Thursday.
- Lot between University and Enwave (formerly Seattle Steam) west of Western. The former parking lot is currently under construction of a residential tower by Mack Urban. **All 71 public parking spaces are gone.**
- Nine-story parking garage east of Second and north of Union. At 11:50 a.m. there were 54 spots open on the 8th and 9th floors. We did not learn the total number of spots in the garage, but the garage appeared to be at least 90 percent full.
- Lot on the north part of that block. Construction of a new building has just started. **All public parking is now gone.**

We did not attempt to do a similar survey of all the off-street parking within the parking study area to find every parking lot or structure that may have existed in 2013 that cannot be expected to be available in 2017, or to determine how accurate the projection that off-street parking is only 65 percent occupied during the critical summer months may be. That is the City's job. But our survey clearly demonstrated that it is inaccurate to assume that all off-street parking that PSRC counted in 2013 will be there in 2017, or that during the relevant period 35 to 40 percent of the off-street parking will be available to waterfront visitors or anyone else.

- The DEIS mischaracterizes the impacts of lack of parking. On page 3-40, it states that "motorists" may need to park off-street or travel several blocks farther to find available on-street or off-street parking. That implies that "motorists" are people who have made a socially unacceptable decision to drive to the City. But as described above, those "motorists" are visitors to the central waterfront, who have good personal reasons for coming by automobile and who are unlikely to visit under the conditions created by AWPOW. In addition, Ivar's research since 1997 indicates that those "motorists" come in groups which average 3+ people per vehicle. The DEIS should disclose that a substantial number of the pre-project visitors to the central waterfront will be forced to

walk several blocks farther, away from the waterfront and uphill, and as a result may choose not to visit the waterfront.

- Mitigation is required.
    - On pages 3-41 and 3-42 the DEIS discusses what it claims is mitigation that will occur. It starts with "influences on parking demand by other modes," stating that the Action Alternative will provide improved bicycle facilities, the Promenade, the Overlook Walk and improved transit facilities in the form of dedicated transit lands and bus stops, which it suggests "could" result in changes to non-motorized modes that would reduce parking demand. The visitors who currently come by car will not bike there. They are not staying at the hotels around the retail core, from which they walked to the Pike Place Market, so the Overlook Walk will not address their parking problem. There is currently no transit along the waterfront, and, while promised in the DEIS, there is no assurance that the former route 99 will be returned to the waterfront, nor if it does return, that it will operate frequently enough to be attractive as transit. The only east-west transit to the waterfront is directed to the ferry terminal and south to West Seattle, Burien and other points to the south from which commuters now rely on buses using the Alaskan Way Viaduct. It will not provide any assistance for most visitors to the central waterfront who may be forced to park in a garage on First or Second Avenue.

    - On page 3-42, the City describes more formal mitigation. It first claims credit for the 250 spaces in the PPMWE. That is not mitigation for this project, unless the City counts the 1200+ parking spaces that have been lost since the beginning of the Alaskan Way Viaduct Replacement Project as impacts of this project. The City then identifies four actions that we assume are already adopted policy, the continuation of which should go without saying. One that is particularly hollow is "working with transit agencies to increase awareness of transit routes and facilities in the area and to encourage visitors to use alternative modes of transportation." As discussed above, many of the historic visitors to the central waterfront are unfamiliar with transit, do not take it regularly, and are not likely to first try it for a family outing to the waterfront. So while we encourage the City to do whatever it can to encourage use of public transit, that is not mitigation for the loss of parking. When one of the Seattle Historic Waterfront Association's members proposed a gondola to take people from the Convention Center (which has a large parking garage with substantial capacity) to the waterfront, that idea

was summarily turned down. The City offers no possibility of providing the easy east-west transit that would encourage visitors to the waterfront to park in the downtown core.

- Mitigation must provide a substantial number of new parking spots within sight of the waterfront, and the EIS must discuss alternatives for achieving that mitigation. That could be in the form of on-street or off-street parking—both of which are easily possible alternatives within or adjacent to the project area. While the various efforts the City has made to promote E-park and other means of obtaining greater utilization of existing garages, there is no evidence that sufficient parking is available. Given the central role of parking to achieving the goal of making this a waterfront for all, the decision makers deserve to be able to consider both alternatives that include new on street parking and a commitment to creation of new off-street parking within sight of the waterfront.

IV. Construction mitigation must be identified and committed to.

Since the first comment letter on the first Draft Environmental Impact Statement for the Alaskan Way Viaduct and Seawall Replacement Project that some members of the Seattle Historic Waterfront Association signed in June 2004, we have always been clear. Construction that cuts off the central waterfront from its customer base and from the rest of downtown Seattle, or that forces visitors to the central waterfront to walk near or across construction activity or brave a waterfront that is a construction site, can easily be fatal to members of the Seattle Historic Waterfront Association. The City's failure to complete the intended portions of the seawall project before the reopening of the waterfront this summer has provided proof of how serious the issue is. Businesses most affected by the failure to complete the work are experiencing a 20 to 30 percent drop in customer counts compared to the same weeks in 2014 or 2013. That drop in business comes at a time when the economy is strong and visitors are thronging to Seattle. For instance, two retailers see sales down 5 and 10 percent on the waterfront at the same time that their stores on First and Pike and First and Pine are up 21 and 23 percent.

While the City's failure to meet the schedule for seawall construction severely damages members of the Seattle Historic Waterfront Association, the City's seawall team at least gets credit for trying to mitigate its impacts. They recognized that construction must not occur during the key summer months. They have tried to provide advance notice of issues as they have arisen. They have created the waterfront promenade, with games and music in an attempt to make the area marred by construction more inviting.

The DEIS for the park suggests that no such efforts are contemplated for AWPOW construction.

The DEIS says that construction will occur from early 2017 until sometime in 2020—at least a three-year construction process. Page ES-9. Alaskan Way will be closed entirely for four months. Page ES-10. Access to businesses may be blocked entirely at times. *Id.* Construction would occur year-round, with multiple shifts. Page 2-30. Construction workers will not be prohibited from taking up the few precious parking spots within or near the construction footprint. *Id.* Ostensibly because plans are too undeveloped at this point, no meaningful mitigation is offered. *See* page 3-38: "Once construction and staging plans have been developed, the City would develop practices to manage parking during construction to ensure, to the extent feasible, that parking is convenient and accessible to waterfront businesses and their patrons." That is not acceptable.

The DEIS is deficient because it fails to provide an adequate analysis of the transportation impacts of the construction process, including both the four-month closure of Alaskan Way between Pike Street and Pine Street and Alaskan Way being limited to one lane in each direction for more than three years.

The EIS can and should now identify meaningful mitigation that will be provided to mitigate construction impacts. Those at a minimum must include the following:

- Construction activities must completely cease from June 1 through September 30 each year.
- One-for-one replacement must be provided for all parking lost during the construction period, or consumed by construction workers, within sight of the central waterfront.
- Business-interruption compensation must be made for any period when, to reach a business, customers must cross a construction site or within an area with a noise level exceeding 85 dbA between 7 a.m. and 10 p.m. on weekdays and between 9 a.m. and 10 p.m. on weekends.
- If the City is asked to grant a noise variance, to exceed the standards set forth in SMC 25.08.425, that variance will be considered and approved only under the process of SMC 25.08.655, with notice given to the Seattle Historic Waterfront Association.
- The City must provide mitigation for transportation impacts during construction, including but not necessarily limited to a complete review and adjustment of signal

timing to maximize the capacity of the constrained system, and provision of traffic police to manage intersections that result in unnecessary congestion. The vague description of traffic conditions during construction suggests that it will be similar to or worse than that currently experienced during seawall construction. When there is an event at the stadiums now, traffic backs up from Madison Street to Pier 70, or beyond. It can take 30 to 60 minutes to travel from Broad Street to Madison. During parts of construction, traffic will be much worse, because Alaskan Way will be required to handle all the traffic now using Elliott and Western to access the viaduct. Because there is no analysis of traffic conditions during construction in the DEIS, it is impossible to comment on the specifics of required mitigation. But the City cannot simply permit gridlock for more than three years because it hasn't disclosed the anticipated conditions; it must perform the analysis to disclose traffic conditions during construction, and then use standard traffic-engineering methods to determine possible mitigation that it discloses in the EIS.

V. **The Transportation Analysis is deficient in providing no meaningful mitigation for gridlock along the waterfront, in not adequately identifying the congestion faced by vehicles coming to or leaving the waterfront on east-west streets, in making no provision for transit to or along the waterfront other than buses that stop at the ferry terminal and then head south to West Seattle, Burien or south King County, and in failing to provide safe and convenient passage for 4.5 million pedestrians annually across six to eight lanes of traffic and a bike lane.**

A. Gridlock coming to, from and along the waterfront must be fully disclosed and mitigated.

Figure 3-6 discloses that with the Action Alternative, at least two intersections on Alaskan Way and two intersections on Western Avenue will experience level of service F in 2030. The DEIS further discloses that "[a]pproximately 30 percent of the vehicles expected to use Alaskan Way would not be able to access the corridor." Page 3-20. In addition:

> East-west traffic approaching many of the signalized intersections on Alaskan Way is expected to experience greater delays than those shown for the overall intersection LOS because the overall intersection delay is the weighted average delay of all the individual movements. Therefore, some side street approaches may experience substantial delays even if the intersection LOS does not indicate congestion.

Page 3-5.

That dire traffic analysis was done without considering the additional traffic associated with events at the stadiums or elsewhere in Seattle. Similarly, having said that 30 percent of the traffic that would otherwise use the corridor will not be able to access the corridor because of congestion, the EIS makes no effort to disclose where that traffic will be diverted to and what its impacts will be on the diverted areas.

The EIS must (1) disclose the expected traffic conditions during the true peak periods (when there are events at the stadiums), (2) disclose the conditions that will be faced by traffic using east-west streets in approaching or leaving the waterfront, (3) disclose the impact of the 30 percent of traffic that cannot access the waterfront on the areas to which it is diverted, and most importantly, (4) identify mitigation that can alleviate that gridlock.

The same is true of the No Action Alternative. The EIS assumes that in the No Action Alternative, the City is helpless to do anything to alleviate gridlock. That failure to consider mitigation of traffic congestion is perhaps best illustrated by the discussion on pages 3-26 and 3-27 of the No Action Alternative. The DEIS assumes that with the No Action Alternative, two intersections will be at LOS F because they either are unsignalized (Alaskan Way and Pine Street) or have a pedestrian half signal (Alaskan Way and Spring Street). By contrast, page 3-27 states that under the Action Alternative,

> all intersections on Alaskan Way would be fully signalized. This is a substantial change from the No Action Alternative, where three intersections along Alaskan Way were unsignalized and three additional intersections had only pedestrian half signals. Signalizing all of the intersections along Alaskan Way and adding left-turn storage lanes would improve operations at most intersections along Alaskan Way compared to the No Action Alternative. Four intersections along Western Avenue . . . were assumed to remain unsignalized.

Although the City has not disclosed its current cost estimates for AWPOW, the estimate as of July 2012 was $565 million for the components of AWPOW. As of October 2014, the City had spent $39 million on only the design of the project. We don't know what the current cost of a signalized intersection is; WSDOT estimates the cost at $250,000 to $500,000 per signal.[6] Reasonable mitigation for the No Action Alternative would clearly include signalizing all intersections. Similarly, anyone who regularly drives Alaskan Way and turns up Madison now knows that much of the congestion in turning up Madison arises because of congested intersections on Western. Reasonable mitigation of the Action Alternative and the No Action

[6] http://www.wsdot.wa.gov/Operations/Traffic/signals.htm

Alternative would include signalizing the Western intersections and, as importantly, properly timing all those intersections. As of 2005, the U.S. Department of Transportation estimated the cost of optimizing timing of intersections at $2,500 to $3,100 per signal update.[7] It is inexcusable to disclose the level of congestion shown in the DEIS and then not propose such cost-effective mitigation.

B. The EIS must be clear: there is no transit along the waterfront, and there is no assurance that transit will exist along the waterfront at any point. Frequent transit along the waterfront and to and from more than just Coleman dock is required.

When construction of the Seattle Art Museum Sculpture Park began, the City removed the George Benson trolley from the waterfront, which had provided frequent north-south transit for users of the central waterfront. Until construction of the Alaskan Way Viaduct Replacement Project began, Metro operated Route 99 along the waterfront. Usage was limited because it had no fixed schedule, had no covered bus stops, and ran on very long intervals, making it largely useless as transportation. Today Route 99 operates on First Avenue, and the Seattle Historic Waterfront Association is aware of no binding commitment that it will come back to the waterfront, nor at a level of frequency to make it attractive.

The DEIS states that "Route 66, connecting Northgate Mall, the University District and the King Street Station with a stop on Alaskan Way at Marion Street near Colman Dock," will operate in 2017. Today that route also operates on First Avenue.[8] The same is true of Route 16.[9] Those routes currently provide no transit to the waterfront, and there is no assurance that they ever will. At most, however, they would provide transit between Northgate or the University District and Colman Dock. They do nothing to make transit available to the remainder of the waterfront. Nor do they do anything to make the waterfront accessible to visitors from Burien or Bothell or Kent or Issaquah, or the host of other parts of the region that guests to the central waterfront have historically come from. When the DEIS says that AWPOW improves transit, it means that it improves transit between areas south of downtown and the heart of downtown Seattle. But it provides no transit to or along the waterfront.

AWPOW must provide assurance that transit will return to the waterfront upon its completion. Frequency must be every 10 to 15 minutes during peak periods year-round, and

[7] http://www.itscosts.its.dot.gov/its/benecost.nsf/0/2151723DB93D293C8525725F00786D28

[8] http://metro.kingcounty.gov/schedules/066/map.html

[9] http://metro.kingcounty.gov/schedules/016/map.html

throughout the summer months, and at least every 30 minutes during off-peak periods in the winter. If that is not possible, then the EIS must be clear that the waterfront has no transit and no commitment that transit will be provided.

C. The EIS must disclose how the design of AWPOW will permit safe and convenient crossing to the waterfront for 4.5 million pedestrian visitors per year.

In an ideal world, AWPOW would increase the number of visitors to the central waterfront. For all the reasons discussed above, that might not happen. But at a minimum, AWPOW should be designed to safely and comfortably allow the 4.5 million annual visitors that the central waterfront has historically welcomed to pass from the east side of Alaskan Way to the new Promenade. The City "owes a duty to all persons . . . to build and maintain its roadways in a condition that is reasonably safe for ordinary travel." *Keller v. Spokane*, 146 Wn.2d 237, 249 (2002). The DEIS describes in detail the condition of roadway travel for vehicles traveling north and south, and for bicycles, which AWPOW moves to the west of the new Alaskan Way so that they do not need to stop at intersections. But it says nothing about how 4.5 million pedestrians, including 45,000 schoolchildren visiting the Seattle Aquarium, are to safely pass from the east side of Alaskan Way to the new Promenade. If that is not carefully designed, the City will endanger the lives of those pedestrians, and not only discourage visitors, but expose the City to serious liability.

VI. The Land Use Chapter must be revised.

At page 2-12 the DEIS discloses a plan to place 16 feet by 16 feet kiosks, 46 to 48 feet tall, made of shiny reflective material, in the center of the Promenade at Spring, Seneca, University and Union Streets. The City has adopted view protection policies under SEPA. SMC 25.05.675.P.2.a.i provides that it is the City's policy to protect public views of significant natural features including Puget Sound from designated scenic routes, which include Alaskan Way. The kiosks will interrupt the view of Puget Sound from Alaskan Way. SMC 25.05.675.P.2.b provides that it is the City's policy to protect public views of historic landmarks. Piers 54, 55, 56, 57 and 59 are designated historic landmarks. They are the last remaining examples of the commercial piers which first created Seattle's economic base. They are an important part of its maritime history and a reminder of the original role of the central waterfront in making Seattle a major northwest seaport. The kiosks will also block the public's view of those piers. Similarly the Overlook Walk will block the view of the historic piers, the Pike Place Market, and Elliott Bay for pedestrians walking south along Alaskan Way from the north waterfront.

The Land Use Chapter must explain how the City can justify approving these violations of adopted City view protection policies, and how the City will apply its view protection policies to private projects in the future if it chooses not to apply them to AWPOW.

The Land Use Chapter must also be revised to explain how AWPOW will be operated and maintained so that it does not become a blight on the central waterfront, either for lack of maintenance or because it comes a magnet for drug abusers, criminals and parking pirates, whom the City has demonstrated it is unable to control. In meetings with Waterfront Seattle, Seattle Historic Waterfront Association has been promised that the Promenade will be designed to be easily maintained, so that the City can secure it from overnight camping (either by the Seattle Police Department or through private security), that the City will maintain, landscape, clean and repair, and program APOW for daily use, and that it will have budgets to allow it to do so. In the absence of those commitments being met, AWPOW threatens to further drive away the historic visitors to the central waterfront, as well as the hotel guests coming from the Pike Place Market, and could easily become a blighted area. Because of the critical nature of maintenance and security to the aesthetic qualities of the waterfront, the EIS must explain in detail how the City will meet those commitments.

VII. Other Chapters must be revised.

Chapter 6 Noise This chapter purports to describe sources and levels of noise. They are lower than what Seattle Historic Waterfront Association members have measured along the waterfront this summer near their businesses. It is common for jet grouting and vacuum noise to be recorded above 100 dB at business property lines, yet the chart on page 6-5 says 88 dB is the maximum noise level that can be expected. Note that pile driving is not an activity whose noise is characterized in the chart, yet pile driving will occur as part of the construction.

Noise levels should be based on actual noise levels that are measured during the seawall construction. Effective mitigation must be identified for any noise levels exceeding the standards permitted by SMC 25.08.425.

Chapter 8 Public Service and Utilities This chapter includes the same promises the Seattle Historic Waterfront Association has heard before about the lack of interruption of service, but with no details. There is no apparent learning from experience of the seawall project. There are assurances that the project will "coordinate" and "communicate" and "timely repair," but no promises of anything. Nor does it appear that any redundancy is built into the system.

Chapter 9 Historic Preservation. It is fine, but not enough, for the City to promise to repair any physical damage that it does to the historic piers. Those piers exist today only because

businesses within them have remained economically viable. Where historic piers have not maintained an economically viable use, they have quickly fallen into derelict status and had to be removed (Pier 62/63), or have been so altered in the course of trying to provide them with economic use that they have lost their historic character and are no longer eligible for historic designation (Coleman dock, Pier 66, Pier 69, Pier 70). If either the construction process or the ultimate operation, without appropriate mitigation, make the piers on the central waterfront no longer viable, the City must provide the owners with sufficient income stream to maintain these historic structures.

Chapter 15 Cumulative Effects This chapter is inadequate in both its failure to recognize the cumulative effects of the tunnel, viaduct, and seawall projects with this new park. The impacts of those connected and integrated project are not sufficiently integrated and analyzed. The removal of parking for the viaduct is one example of that lack of integration.

The EIS is also deficient in its failure to analyze the cumulative impacts of AWPOW with other known public projects in the immediate vicinity. An example is the failure to recognize and analyze the impacts of the Seattle Aquarium's proposed expansion pursuant to the master plan which the City Council recently blessed. That master plan states that the Aquarium needs approximately 76,000 square feet of expansion space, however the DEIS states that the Overlook Walk will provide it with only 22,000 square feet of expansion space. The Aquarium also brings at least 45,000 school children to the Aquarium annually, yet AWPOW provides nowhere for buses to let those children off and pick them up without taking them across an unrestricted bike path. Nor does the EIS recognize the parking demand that the Aquarium generates. Comparison of parking spaces available to the Seattle Aquarium with other prominent aquariums demonstrates the inadequacy of the available parking.

	Spaces	Attendees/Space	Notes
New England (Boston)	1,200	980	subway stop is also at its door
Monterey	1,641	1641	2 garages plus street parking
Baltimore	950	1455	1 plus other garages
Georgia	1,600	1321	Attached garage

Chicago	4,000	516	CTA + streets in addition
San Francisco	800	1876	Bart, Trolley available
Seattle	270	3000	Assumes ½ Pike Garage for Aquarium

Similar issues arise with respect to the Ferry Terminal expansion. The need for eight lanes on Alaskan Way south of Yesler is entirely premised on SDOT allowing the Washington State Ferry System to use two lanes of Alaskan Way for ferry parking. The alternatives for ferry terminal expansion need to be analyzed concurrently with AWPOW so that proper decisions can be made for both.

VIII. Conclusion

How the City will rebuild Alaskan Way and reconnect the city to its waterfront once the viaduct is down is probably the most important urban design challenge of this generation. It needs to be made carefully, and it needs to be made with the fully consideration of alternatives that SEPA require. The current DEIS is sufficiently defective so that it must be redone, with a true consideration of alternatives, and a true examination of how the significant adverse impacts inherent in the project can be mitigated.

The Seattle Historic Waterfront Association has devoted thousands of hours to helping the city and state on the Alaskan Way Viaduct and Seawall Replacement Programs, and looks forward to more productive work together with the City to make this a Waterfront for All.

Miller Nash Graham & Dunn LLP

Very truly yours,

Elaine L. Spencer

BEFORE THE SEATTLE HEARING EXAMINER

THE ALLIANCE FOR PIONEER SQUARE, a Washington nonprofit corporation, Petitioner, vs. THE CITY OF SEATTLE, through its DEPARTMENT OF TRANSPORTATION, Respondent.	Case No. **THE ALLIANCE FOR PIONEER SQUARE'S PETITION FOR REVIEW OF ADEQUACY OF ENVIRONMENTAL IMPACT STATEMENT FOR ALASKAN WAY, PROMENADE, AND OVERLOOK WALK**

1. PETITIONER

The Petitioner is The Alliance for Pioneer Square. Its mailing address and telephone number are:

Petitioner would like to receive documents from the Office of Hearing Examiner by email attachment.

2. RESPONDENT

The Respondent is the City of Seattle through its Department of Transportation (SDOT). On October 31, 2016 SDOT issued a Final Environmental Impact Statement (the FEIS) for Alaskan Way, Promenade, and Overlook Walk (AWPOW).

3. INTEREST OF THE ALLIANCE FOR PIONEER SQUARE

The Alliance for Pioneer Square is a nonprofit organization leading the revitalization of the Pioneer Square Historic District through advocacy, programming, marketing, and community action. It works to help preserve what makes Pioneer Square the most authentic, engaging, and dynamic neighborhood in Seattle. By fostering pivotal new programs and facilitating crucial neighborhood action, it helps Pioneer Square move toward a more vibrant and better place for everyone to work, live, and visit.

The Alliance for Pioneer Square has provided comments on both the Draft Environmental Impact Statement (EIS) and the Supplemental Draft EIS for AWPOW on behalf of its members.

Members of The Alliance for Pioneer Square include property owners within the Pioneer Square Historic District. The City of Seattle expects to pay for the improvements included within AWPOW by, among other things, establishing a Local Improvement District (LID) to provide $199 million. The City expects to impose a special assessment on properties within Pioneer Square under the LID. An LID is a proper way to finance construction of public

improvements only if those public improvements provide "special benefit" to particular properties not received by the public at large.

As designed, and as described in the FEIS, AWPOW provides no "special benefit" for properties within the Pioneer Square Historic District. To the contrary, it will permanently cut off much of Pioneer Square from Seattle's waterfront, making it unattractive for residents and workers in Pioneer Square to cross to the waterfront, unattractive for visitors to the waterfront to cross into Pioneer Square, and continue the blight of the Alaskan Way Viaduct (the Viaduct) for properties adjacent to the AWPOW project by replacing the Viaduct with an eight- to nine-lane highway, with 600 buses per day traveling the outer lanes of that highway. Those same 600 buses per day needing to turn at Columbia and the travel to and from Third and Fourth Avenues will create backups along Columbia Street, blocking access to office buildings, residences, and parking on Columbia Street. It will further exacerbate a growing shortage of short-term parking within the Pioneer Square Historic District, which is essential to the health of street-level retail businesses that in turn create the vibrant street scene that makes Pioneer Square an attractive place to visit, and the residential uses that make Pioneer Square a 24-hour neighborhood.

Two of the most important functions of an EIS for a public project are consideration of reasonable alternatives and identification of mitigation that can reduce the adverse impacts of the project. The failure of the FEIS for AWPOW to fulfill those functions leads to AWPOW's failure to provide any benefit to property owners within the Pioneer Square Historic District. The Alliance for Pioneer Square needs the EIS for AWPOW to seriously consider alternatives that would achieve the stated goals of AWPOW, and to identify mitigation for those impacts which AWPOW will cause.

4. DESCRIPTION OF AWPOW

The replacement of the Viaduct with a deep bore tunnel provided a once-in-a-generation opportunity to reconnect downtown Seattle to its waterfront. Since 1953 the Viaduct has created a noisy visual barrier between downtown Seattle and the waterfront. Removal of the Viaduct

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

will remove the physical barrier of the Viaduct, reduce the noise and air pollution that it creates, and provide significant additional open space that can be used to make the waterfront more attractive.

The City of Seattle established seven goals for the reconfiguration of the waterfront after the Viaduct is removed:

- Create a waterfront for all
- Put the shoreline and innovative, sustainable design at the forefront
- Reconnect the city to its waterfront
- Embrace and celebrate Seattle's past, present and future
- Improve access and mobility (for people and goods)
- Create a bold vision that is adaptable over time
- Develop consistent leadership from concept to operations

AWPOW is a compilation of several projects that arose from the post-Viaduct waterfront planning process. These include reconstruction of Alaskan Way, construction of a promenade along the waterfront, and new connections to the waterfront, including a major overpass of Alaskan Way at the Pike Place Market, a new stairway and elevator at Union Street to take pedestrians from the level of First Avenue to the east side of Alaskan Way, reconstruction of Marion and Columbia Streets following demolition of the Viaduct, and minor street improvements and sidewalk repairs at S. Main and S. Washington Streets.

AWPOW will direct 600 buses per day onto Columbia Street and Alaskan Way. That requires two additional lanes on Alaskan Way, insuring that Alaskan Way will be a permanent barrier to keep pedestrians from crossing between Pioneer Square and the waterfront. The assumption that 600 buses a day must travel down Columbia Street will prevent removal of the Viaduct from Columbia from being an opportunity to reconnect the north end of Pioneer Square to the Waterfront at Columbia. It will also make it difficult for the many vehicles which access Pioneer Square by turning left on First Avenue, thus reducing accessibility of Pioneer Square.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

An earlier version of the AWPOW projects included a "Festival Pier" at Pier 48 and pedestrian access to the water at the refurbished Washington Street Boat Landing. Those would have helped reconnect Pioneer Square to the waterfront, but both have been eliminated from AWPOW. There is not even a sidewalk along the waterfront from King Street to Washington Street, with pedestrians being forced instead to walk along a 12-foot sidewalk between the transit lane on Alaskan Way and a landscaped barrier separating pedestrians from the bicycle track to the west.

5. DEFICIENCIES OF THE FEIS

An adequate EIS for AWPOW was required to consider alternatives that would achieve the goals of the waterfront plan, and to identify the adverse impacts of those alternatives, and mitigation that could reduce those adverse impacts. The inadequacies of the DEIS and Draft Supplemental EIS were detailed in comment letters submitted by Alliance for Pioneer Square on August 24, 2015 and May 18, 2016, Exhibits A and B to this petition. Those comments are incorporated herein by reference. The FEIS contains no changes to correct those deficiencies. Without limiting the foregoing, the FEIS for AWPOW is inadequate in at least the following respects.

a. Failure to properly define the proposal

WAC 197-11-060(3) and SMC 25.05.060(C) require that:

> (a)[1] Agencies shall make certain that the proposal that is the subject of the environmental review is properly defined.
>
> . . . .
>
> (iii)[c] Proposals should be described in ways that encourage considering and comparing alternatives. Agencies are encouraged to describe public or non-project proposals in terms of objectives rather than preferred solutions.

(Bracketed outline designations in SMC). Rather than defining the proposal based on the seven stated objectives and then considering alternatives that would meet those objectives, the FEIS

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T. 206.624.8300 | F. 206.340.9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

makes a number of assumptions about constraints that the project must also accommodate. The two most notable assumptions are that:

- The southern portion of the rebuilt Alaskan Way, south of Columbia Street, must carry 600 buses per day that currently use the Viaduct to access downtown Seattle from neighborhoods to the south.
- The rebuilt Alaskan Way must provide nearly 20,000 square feet of parking for ferry customer traffic waiting to get through the toll booths on Coleman Dock.

Neither assumption is proper, and together those assumptions ensure that AWPOW cannot achieve the goals of creating a waterfront for all, putting the shoreline and innovative, sustainable design at the forefront, reconnecting the city to its waterfront, embracing and celebrating Seattle's past, present, and future, or improving access and mobility for people and goods. Those two assumptions are why what should have been at most a five- to six-lane road has become an eight- to nine-lane highway adjacent to Pioneer Square, and why Columbia Street will lose its potential to connect the north end of Pioneer Square to the Waterfront.

The City justifies the first assumption based on a 2012 study done by Metro, King County Metro *Downtown Southend Transit Study* (2012) (the "*Southend* study"). The *Southend* study made it clear that Metro chose the Alaskan Way alternative for getting its buses into and out of downtown because Waterfront Seattle had promised that it would provide a dedicated bus lane in each direction on the rebuilt Alaskan Way. Thus the justification for assuming that the rebuilt Alaskan Way must carry 600 buses per day, and thus must have dedicated bus lanes, is circular. Metro selected Alaskan Way as its preferred alternative only because it was promised dedicated bus lanes there. The *Southend* study also makes it clear that the preferred alternative would have been different but for the fact that as of 2012 the City had not found funding for the Lander Street overpass, which would allow buses using Fourth and Third Avenues to cross the railroad tracks. Since 2012, however, the City has secured most or all of the funding for the Lander Street overpass. The Lander Street overpass is now expected to be completed by 2020,

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

which is three years before AWPOW is currently scheduled for completion. But the City's definition of the proposal in the FEIS, as requiring two transit lanes on Alaskan Way south of Columbia Street, artificially prevented consideration of alternatives that would have narrowed Alaskan Way adjacent to Pioneer Square from eight- to nine-lanes to six- to seven-lanes without causing traffic gridlock.

The City justifies the second assumption based on the desires of the ferry system for customer parking for cars attempting to access its current toll booths. The State Environmental Policy Act (SEPA) requires that an EIS describe "the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity." RCW 43.21C.030(1)(c)(iv). The Washington Department of Transportation has eliminated the need for toll booths on its freeways through new technology. Within the next decade it is likely to use the same technology to eliminate or significantly reduce the need for toll booths at ferry docks. The ferry system also has significant amounts of land on Coleman Dock that could be used to reconfigure on-site parking. Construction of two lanes of Alaskan Way dedicated solely to ferry parking will simply delay the process of ferry system conversion to modern tolling technology. It is a violation of the purpose and intent of SEPA to permanently define the AWPOW project to commit a significant area of Alaskan Way to ferry parking rather than considering alternatives that would permit the ferry system to function without that on-street ferry parking.

Those assumptions lead to the conclusion that there is no alternative to requiring Alaskan Way to be from eight- to nine-lanes wide along the blocks between Yesler Way and King Street. An eight- to nine-lane highway will permanently cut off Pioneer Square from the waterfront and ensure that AWPOW does not achieve its stated purpose as to Pioneer Square. The mitigation, as described in the FEIS, is that AWPOW will provide signalized crosswalks, and in some areas street trees, between the sidewalk and the eight- to nine-lane highway. But as the City's reconstruction of Mercer Street has shown, neither signalized cross walks nor street trees create

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206.624.8300 | F: 206.340.9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

an inviting pedestrian environment when the highway in question is eight- to nine-lanes wide and has 600 buses per day traveling on it.

b. Failure to consider reasonable alternatives

The identification and analysis of alternatives is the heart of an EIS. WAC 197-11-440(5) requires that:

> (b) Reasonable alternatives shall include actions that could feasibly attain or approximate a proposal's objectives, but at a lower environmental cost or decreased level of environmental degradation.

The FEIS is inadequate because it does not consider reasonable alternatives that would allow AWPOW to achieve its stated objectives. Specifically, and at a minimum, the FEIS fails to consider: 1) an alternative that redirects the 600 buses that the FEIS assumes must travel Alaskan Way and Columbia Street to Fourth Avenue and the Lander Street overpass, and 2) an alternative that reduces the need for ferry parking on Alaskan Way by changes in tolling technology and/or changing the use of Coleman Dock.

c. Use of outdated and inappropriate data and unreasonable assumptions in its parking analysis

Businesses and residents of Pioneer Square depend on the availability of short-term parking within short walking distances for customers and guests. The entirety of Pioneer Square must be considered when looking at parking availability, because loss of parking under the Viaduct will cause visitors to the west side of Pioneer Square to use parking farther east, thus reducing supply for visitors to the eastern side of Pioneer Square. While commuters can be expected to rely on transit, retail and restaurant customers and visitors to residents of Pioneer Square will in many cases not come to Pioneer Square at all if they are unable to drive and park within a reasonable distance of their destination.

Both off-street and on-street parking supply within Pioneer Square has been steadily reduced over the past three years by the unprecedented construction boom the City has experienced. Transportation construction and private development has taken more than twenty-

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T. 206 624 8300 | F. 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

five percent of Pioneer Square curb space and private parking over the past decade, with more to come as the City implements its Center City Connector project. AWPOW is the third major interrelated public project on Seattle's waterfront in the last decade,[1] each of which has eliminated hundreds of on-street parking spots. Although the State helped fund a contract with two public parking garages to reduce their rates until the end of 2019 as mitigation for the Alaskan Way Viaduct Replacement Project's construction impacts, the only new parking spots that will be provided as mitigation for those two prior projects was the addition of 250 new off-street parking spaces in the MarketFront development under the Pike Place Market. That is mitigation for the loss of over 1,000 on-street parking places as a result of the Viaduct Replacement. That new parking supply does nothing to mitigate loss of parking near Pioneer Square, because it is unreasonable to expect visitors to Pioneer Square to park at the Pike Place Market. The loss of parking to public and private projects has increasingly resulted in a lack of short-term parking and loss of customers for street-level business and has made residences in Pioneer Square less attractive.

The EIS acknowledges that AWPOW will permanently remove an additional 453 on-street parking spaces and 189 off-street parking spaces, for a total loss of 642 parking spaces. The FEIS concludes that there is adequate parking in the area, however, based on two assumptions that make the parking analysis inadequate.

The first is an assumption that the number of off-street parking spaces in 2017, which is incorrectly treated as the baseline year for purposes of comparing alternatives,[2] will be the same as shown in a 2013 Puget Sound Regional Council (PSRC) parking inventory. Since the 2013 PSRC inventory was conducted, numerous off-street parking facilities within the study area have

---

[1] The first two are the Alaskan Way Viaduct Replacement Project, conducted by the Washington Department of Transportation in cooperation with SDOT, and the Elliott Bay Seawall Project, conducted by SDOT.

[2] AWPOW will not begin construction until the Viaduct has been demolished, which is currently expected to happen in the third quarter of 2019. Construction of AWPOW is not expected to be completed until 2022 or 2023. The base year that the EIS should consider in its parking analysis is at least 2022, at which point the PSRC data will be nearly a decade old.

been demolished or eliminated as a result of new construction that reduces the amount of parking on the site and makes it no longer available for public parking. The FEIS purports to use the 2013 PSRC inventory as a measure of off-street parking that will be available in 2017, and that is demonstrably false because the data is demonstrably outdated.

The second assumption is that visitors will be willing to walk up to 1,320 feet from where they park to their destination. The parking study area defined in the FEIS is based on that assumption, and indeed on the assumption that all parking within an area bounded by S. King Street on the south, Wall Street on the north, the waterfront on the west, and Third Avenue on the east is available to meet the parking needs of businesses and residents that have depended on the parking being lost to AWPOW. That is a completely unfounded assumption and results in a distorted analysis of the impact of the loss of parking from AWPOW.

The FEIS must be redone, using data that is likely to be current as of a realistic base year, and discussing the impact of loss of parking from AWPOW on the actual users of that parking.

d. Inadequate traffic analysis

The traffic analysis of the FEIS is inadequate in at least two respects. First, it considers the impact of the project only on days when there are no major events in downtown Seattle. But the baseline condition—the normal condition in the absence of AWPOW—includes a minimum of 300 days per year when events in the stadium area of downtown Seattle or elsewhere in downtown bring traffic to a standstill. While AWPOW is not "responsible" for those events, it is the baseline from which the impacts of AWPOW should be measured, and from which mitigation must be identified.

Second, the traffic analysis must consider and propose mitigation for congestion on S. King Street and S. Jackson Street that will result from the project. According to the FEIS, the project will direct 225 afternoon peak-hour trips onto S. Jackson Street heading south on Alaskan Way, while in the no-action alternative there are none, and will direct 210 afternoon peak-hour trips onto S. King Street. S. Jackson Street has been reduced to a two-lane road between First

Avenue and Occidental, and it is not capable of handling additional traffic. S. King Street dead-ends at King Street Station. According to the FEIS the project will result in 405 p.m. peak hour vehicle trips heading west on S. Jackson Street, while in the no-action alternative there are none, and 455 p.m. peak hour vehicle trips heading west on S. King Street, while in the no-action alternative there are 223. The EIS must also explain how S. Jackson Street and S. King Street can handle that additional traffic, and must analyze the impact on the intersections of both S. Jackson Street and S. King Street and First Avenue as well. The impacts of AWPOW's directing traffic onto those streets must be disclosed and mitigated.

e. Inadequate description of possible mitigation

One of the critical functions of an EIS is to identify mitigation that could be provided for significant adverse impacts. The role of the EIS is not to determine what mitigation will be required. It is to identify the significant adverse impacts of the project and identify what mitigation could be provided so that decision makers and the public can understand the implications of their decisions.

The FEIS is inadequate because it provides no analysis of mitigation that could be provided for the three Level of Service (LOS) F intersections within or abutting Pioneer Square that will result from AWPOW, or the LOS E intersection that will be at the edge of failure. It is inadequate because it identifies no mitigation that could be provided for the cumulative loss of additional parking that will result from AWPOW.

6. REQUESTED RELIEF

The Alliance for Pioneer Square asks the Hearing Examiner to determine that the FEIS for AWPOW is inadequate under SEPA and remand the matter to SDOT for preparation of an adequate EIS.

AWPOW -- Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34996
Seattle, WA 98124-4996

Subject: Comments of Alliance for Pioneer Square on the Draft EIS for Alaskan Way, Promenade, and Overlook Walk

Dear Mr. Mazzola:

Thank you for the opportunity to comment on the Draft Environmental Impact Statement ("DEIS") for Alaskan Way, Promenade and Overlook Walk ("AWPOW"). These comments are submitted on behalf of Alliance for Pioneer Square.

Alliance for Pioneer Square is a nonprofit organization leading the revitalization of the Pioneer Square Historic District through advocacy, programming, marketing, and community action. It works to help preserve what makes Pioneer Square the most authentic, engaging, and dynamic neighborhood in Seattle. By fostering pivotal new programs and facilitating crucial neighborhood action, it helps Pioneer Square move towards a more vibrant and better place for everyone to work, live, and visit.

There is a special resonance for Pioneer Square in Waterfront Seattle's Guiding Principle of reconnecting the city to its waterfront. Pioneer Square and the waterfront were once collectively not just the heart of Seattle, but all there was of Seattle. Their history is inextricably shared. Similarly, Waterfront Seattle's Guiding Principle of "embracing and celebrating Seattle's past, present and future" is also a fundamental part of Alliance for Pioneer Square's mission. In the years since 1970, when the Pioneer Square-Skid Road Historic District was placed on the National Register of Historic Places, experience has taught that Pioneer Square is a delicate thing. Its fortunes have waxed and waned. We have learned that actually preserving its many historic buildings requires continued reinvestment in them, which in turn requires that they be viewed as desirable places for people to live, work, and visit. Preserving the unique character of

the District as a whole requires constant vigilance to protect not just its physical form but also its human vitality.

Today, Pioneer Square is in the midst of a renaissance. It has welcomed fast-growing start-up companies, new residential development, and a vibrant hub of outstanding restaurants, and by 2017 it will become the headquarters site for Weyerhaeuser Company, a regional icon with a history almost as long as Pioneer Square's. But that renaissance is fragile. If Pioneer Square becomes inaccessible or so choked with traffic that businesses cannot attract visitors from outside the District and residents can't invite friends or family to visit, Pioneer Square could easily revert to the struggles that have periodically blighted it over the last 40 years.

Unfortunately, the DEIS discloses that AWPOW will not reconnect Pioneer Square to the waterfront. To the contrary, it will construct a barrier of up to eight lanes of traffic between Pioneer Square and the waterfront. It offers no way for pedestrians to safely and comfortably cross to the waterfront, and on the west side of Alaskan Way, it relegates pedestrians to secondary status relative to bicyclists on a new bike trail that is being moved to the west side of Alaskan Way so that bicyclists will not be required to stop at intersections. AWPOW will further exacerbate what has become an increasingly critical loss of parking available to Pioneer Square since the beginning of the Alaskan Way Viaduct replacement project. It will funnel hundreds of buses every day along Alaskan Way, contributing to the new barrier between Pioneer Square and the waterfront, and it will funnel much of the ferry traffic exiting Coleman Dock onto S. King and S. Jackson Streets, neither of which is suitable for handling increased traffic.

The neighborhood already becomes gridlocked from the overuse of S. King Street and S. Jackson Street during 300 events per year. The DEIS provides no analysis of how they can function with additional ferry traffic in the face of that existing gridlock. The decision to funnel ferry traffic onto S. King and S. Jackson is particularly perplexing because S. King is not a through street, and S. Jackson will have a streetcar and buses on it, limiting its capacity for ferry traffic. The DEIS is deficient in failing to adequately examine the impact on S. King and S. Jackson, both during the ordinary peak and during events, and in failing to describe mitigation to address adverse impacts.

The DEIS is clearly drafted to place the No Action Alternative in the worst possible light. On page ES-17, the DEIS says that "there would be no visual impact or benefits under the No Action Alternative because it would be identical to the 2017 existing conditions." But of course, in the No Action Alternative, the Alaskan Way Viaduct, the major blighting structure that has severed the connection between Pioneer

Square and the waterfront since the first half of the 20th century, will be gone. The Washington Street Boat Landing will be replaced, providing a water destination for pedestrians from Pioneer Square. Comparing the No-Action and the Action Alternatives on Figure 5-4, what we see with the No Action Alternative is a parking supply, and Alaskan Way being narrower and more approachable. The same is true of Figure 5-5. We hate to think that the No Action Alternative is preferable, but if AWPOW cannot improve the connection of Pioneer Square to the waterfront, and cannot or will not mitigate its impact on access, parking and traffic, that may be our conclusion.

The DEIS maintains that no alternatives to the Action Alternative or the No Action Alternative are possible. Alliance for Pioneer Square believes that is patently untrue. There are always alternatives to any proposal; SEPA requires that they be identified and analyzed in the DEIS. Similarly, the DEIS offers no meaningful mitigation for any of the significant adverse impacts of the Action Alternative. SEPA requires that potential mitigation be identified, whether or not it is being proposed, so that the public and the decision-makers understand what mitigation is possible and can decide based on full information whether it should be required.

I. The DEIS is inadequate because it is impossible to understand what pedestrian facilities will be provided to allow Pioneer Square residents and visitors to access the waterfront.

The first requirement of an EIS is that it "describes and presents the proposal." WAC 197-11-440(5)(a); SMC 25.05.440.D.1. The DEIS fails to present the pedestrian access from Pioneer Square to the waterfront in a manner that allows us to reasonably comment on it. The DEIS should be reissued with accurate and consistent drawings so that we and the rest of the public can determine what is actually being proposed, and comment on that.

Figure 2-3 purports to show the Action Alternative between S. King Street and Spring Street. It shows no pedestrian promenade on the west side of the project footprint between S. King Street and S. Washington Street, with a narrowing pedestrian promenade between Yesler Way and S. Washington Street (apparently so that pedestrians coming from the north can reach the Washington Street Boat Landing, historically a key link between Pioneer Square and the water, but essentially inaccessible to Pioneer Square under AWPOW). Figure 2-3 shows a narrow "pedestrian pathway" (colored orange) between landscaping on the west side of Alaskan Way. Earlier public presentations of AWPOW had shown a bike path in the location of what is now labeled as a "pedestrian pathway." As a result, we asked you:

Figure 2-3, 2-4 and 2-5 show what is labeled as a "Pedestrian Pathway," that I would have understood to be the bike path. I am trying to understand what is sidewalk and what is bike path. Should I assume that pedestrians are expected to stay on the "pedestrian path" as labeled? Please clarify.

Also, south of Washington Street, the drawing does not appear to show any sidewalk on the west side of Alaskan Way. Is that correct?

You responded, which we appreciate. To the first question, you replied,

Answer: You are correct—what is labelled as the "Pedestrian Pathway" should actually be labeled as the protected bike facility. The Action Alternative includes a sidewalk immediately to the east of the protected bike facility, separated by a landscaped buffer area of varying widths. Pedestrians would be expected to use the sidewalk and of course the pedestrian promenade to the west of the protected bike facility. Please see the cross-sections shown in Figures 2-9 through 2-15 for more detail.

To the second question, you replied:

Answer: That is not correct—the Action Alternative includes a sidewalk on the west side of Alaskan Way south of S. Washington Street. Please see figure 2-9, which is a cross-section of the proposed new Alaskan Way between S. King Street and S. Main Street for further clarification.

As a result, we turned to Figure 2-9, which is a cross-section from S. King Street to S. Main Street, and Figure 2-10, which is a cross-section from S. Main Street to Yesler Way.

Figure 2-9 (S. King Street to S. Main Street) shows a 16-foot sidewalk between the four southbound lanes of Alaskan Way and the new bike facility, and no pedestrian promenade along the waterfront. The 16-foot sidewalk is functionally only eight feet, because it has four-foot tree wells on both sides of the sidewalk area. Figure 2-10 (S. Main Street to Yesler Way) shows an eight-foot sidewalk along the three southbound lanes of Alaskan Way, effectively narrowed to four-foot by four-foot tree wells between the pedestrians and the bike path. Again, there is no pedestrian promenade shown along the water. Again we asked you to clarify.

Am I correct that between S. King Street and Yesler, the pedestrians have to walk between the bike path (which is on the water side) and the traffic? Figure 2-10 shows an

8-foot sidewalk, with tree wells in it, abutting the bus lanes on the west side of Alaskan Way. How wide are the tree wells? (My question really is, after you take out the tree wells, how wide is the area left for pedestrians?) Since a tree well would normally be at least four feet wide, the diagram Figure 2-10 suggests that the travel surface for pedestrians is only at most 4 to 6 feet wide from S. Main to Yesler, assuming pedestrians shouldn't walk through the tree wells. Between S. King and S. Main, it looks like the pedestrians get 8 feet of walking surface, after deducting for the planting strips. Am I reading that correctly?

Again, you responded, which we appreciate.

Answer: Figure 2-10, which is meant to represent cross-section 2, just north of the S. Washington Street intersection, incorrectly shows a sidewalk on the east side of the landscaped area (the street tree), immediately adjacent to the southbound roadway. Under the Action Alternative, between S. King Street and S. Washington Street, heading north, pedestrians would walk along the sidewalk on the east side of the protected bike lanes. The sidewalk would be between 13 and 16 feet wide, with a minimum of 6 feet of walking surface. In general, there would be a landscaped buffer between pedestrians and the roadway. At the S. Washington Street intersection, pedestrians would cross S. Washington Street onto the pedestrian promenade.

As for your question about Figure 2-10, you are correct that it shows 8 feet of walking surface for pedestrians between the two planting strips.

Unfortunately, that response leaves it completely unclear what is actually being proposed. We asked you to send us a correct drawing, but you responded: "We do not have a correct version of Figure 2-10 at this time—we will update it (and other figures as appropriate) in the Final EIS."

If we take the graphics in the DEIS seriously, they raise a number of questions. Why does the bicycle path move away from Alaskan Way to separate pedestrians from the waterfront? Figure 2-3 suggests there in no promenade south of Washington. Why not? That means pedestrians on S. King, S. Jackson and S. Main cannot cross Alaskan Way to a pedestrian promenade along Terminal 46 and Pier 48. Why not? Those are important parts of the current waterfront, which have as much fascination for pedestrians as the historic piers further north. How are bike/pedestrian accidents going to be prevented or mitigated? How does this design promote crossing Alaskan Way and exploring Pioneer Square, crucial to its continued economic success? If we cannot take

the graphics seriously, then the DEIS needs to be reissued with graphics that reflect the actual plan.

Every design iteration of the waterfront plan has included a beach proximate to the Washington Street boat landing – historically tied to Pioneer Square. If bikes rather than pedestrians are given priority, how are people going to access either the beach or the boat landing itself?

One of the principal functions of SEPA is to allow the public to understand and have input on the design of public projects. For that function to work, the draft environmental impact statement must clearly disclose what is being proposed. SEPA requires that an environmental impact statement be prepared "at the earliest possible point in the planning ... process, when the principal features of a proposal and its environmental impacts can be reasonably identified." WAC 197-11-055(2); SMC 25.05.055.B. The reason SEPA requires that early disclosure is so that public input can be taken seriously, without an excuse that it is too late to consider alternative approaches. That has not happened here; $39 million had been spent on design as of last October. But that does not excuse the failure to adequately describe what is being proposed so that the public can make meaningful comments. Indeed the vast sums that have been spent on design make it inexcusable that a clear drawing is not available.

II. Alternatives must be presented that provide safe and attractive access to the waterfront for pedestrians crossing S. King Street, S. Jackson Street, S. Main Street, Washington Street, Yesler Way, and Columbia Street.

The design of the pedestrian facilities and Alaskan Way, to the extent that we can figure them out from the DEIS, appears to force pedestrians to cross eight lanes of traffic between S. King Street and Yesler Way.[1] The total distance across traffic will be 88 feet, although there will be a meridian of some width to offer refuge for pedestrians who cannot make it all the way across on one light. Once pedestrians cross those eight

[1] We do appreciate that AWPOW includes rebuilding the streets and sidewalks on S. Washington Street and S. Main Street to remedy ADA deficiencies. Page 2-15. Those actions are really just deferred maintenance which the City should have done in any event. Including them within the rubric of AWPOW does not make them different from what they are: long-overdue work that has nothing to do with removal of the Alaskan Way Viaduct or replacement of the seawall, the projects that enabled the City to undertake the rest of AWPOW. The neighborhood has been told repeatedly that S. Main & S. Washington Streets will become "green streets" as part of the Alaskan Way design. The DEIS doesn't show what this is or how the work will discourage cars through this primarily pedestrian-friendly zone. What does "green streets" mean and are these improvements consistent with hardscape changes in the historic district?

lanes of traffic, they must stay between the traffic and the bike trail.[2] The sidewalk in some areas will have less than 8 feet of walking surface once tree wells are deducted. It is hard to imagine how the rebuilt Alaskan Way could be more inhospitable to residents of and visitors to Pioneer Square. The EIS must propose mitigation for those impacts.

AWPOW seems to focus most of its effort to "reconnect the city to its waterfront" on the Overlook Walk, and to a lesser extent on Union Street. But residents of and visitors to Pioneer Square gain nothing from those elements of the proposal. Without considerably more mitigation, creation of an eight-lane highway between Pioneer Square and the waterfront will effectively sever the connection between the two, as has the Alaskan Way Viaduct. We do not understand the rationale for putting a 30-foot sidewalk along the eastern side of Alaskan Way between S. King and Yesler Way. Given the volume of bus traffic planned for the new Alaskan Way we question the ability to lease vibrant retail spaces abutting it, resulting in a dead zone, uninviting to pedestrians, likely attractive to homeless individuals, and detrimental to historic buildings. We doubt that sitting next to an eight-lane highway will be attractive to customers of sidewalk cafes.

AWPOW also seems to assume that any crossing of Alaskan Way to the waterfront can happen at Columbia Street or perhaps Marion. But pedestrians coming from buildings along S. King Street need to be able to cross to the water on S. King Street, pedestrians coming from S. Jackson Street need to cross at S. Jackson Street, etc. In addition, the two stadiums south of Pioneer Square host ~300 events per year, bringing increased pedestrian traffic both to and from the waterfront and stadiums. Pedestrians need to be able to cross the street and enter Pioneer Square. Anything less does not amount to reconnecting Pioneer Square to its waterfront. The EIS needs to discuss how that will be accommodated.

The EIS must carefully consider how to mitigate those impacts. Reconnecting the city to its waterfront means making it comfortable and safe for pedestrians of all

[2] The DEIS says at page 2-11, "Pedestrians would be permitted to cross the bicycle path at specific locations, including crosswalks, transit stops, and loading zones. Standard and specialized signals would regulate bicycle crossings at intersections along Alaskan Way." That implies that bicycles are given primacy over pedestrians along the full distance of AWPOW. But where AWPOW abuts Pioneer Square, the drawings of the proposal simply have no pedestrian facilities on the west side of the project area, as exists along the central waterfront. With light rail, Amtrak, the Sounder, ferry commuters, and the Metro bus tunnel, Pioneer Square is arguably one of the largest transit hubs on the west coast, spilling out much foot traffic into the neighborhood. Those pedestrians should be invited to the waterfront; we do not understand why bikes are giving precedence over pedestrians along the new waterfront adjacent to Pioneer Square.

abilities to cross Alaskan Way. In the absence of achieving that basic objective, AWPOW is of no value to Pioneer Square, and in fact is a hindrance because of its impacts on parking, accessibility, and traffic. If AWPOW cannot provide comfortable and safe access to the waterfront from Pioneer Square, it should state that plainly, so that decision-makers understand the choices that are being made, and the lack of benefit to Pioneer Square from the proposal.

III. AWPOW must mitigate the cumulative impacts on parking of the full Alaskan Way Viaduct Replacement/Seawall Replacement/Waterfront Seattle project.

The parking discussion in the DEIS is inadequate on multiple levels.

The "parking study area" (Figure 3-9) is erroneous as it applies to Pioneer Square. The boundary between Area 1 and Area 2 is not the meaningful boundary. Area 1 should include all of Pioneer Square. On the north, that would move the boundary between Area 1 and Area 2 to Columbia Street. On the east, Area 1 should extend to Fourth Avenue. This is because the entirety of Pioneer Square depends on the availability of parking within the parking study area. The parking section should be revised to reflect the actual parking available within each of the revised boundaries.

The EIS must recognize the cumulative loss of parking from the entire Alaskan Way Viaduct replacement/Elliot Bay Seawall replacement/AWPOW project. They are intimately tied together such that AWPOW would not happen but for the Viaduct and Seawall replacement. Thus, the total number of lost on-street and off-street parking spaces is not 673, as stated on page ES-16, but over 1,200. The 250 new parking spaces that are included in the Pike Place Market development were funded by the State of Washington as partial mitigation for the impacts of the Alaskan Way Viaduct replacement project. It is not new mitigation and cannot be claimed as mitigation for the AWPOW project. Furthermore a parking garage at the market does not mitigate loss of parking in Pioneer Square; no one is going to park at the Pike Place Market to visit Pioneer Square.

The DEIS overstates the off-street parking supply as it will exist in 2017. Section 4.2.2 of Appendix B states:

Off-street parking supply, demand, and utilization were obtained from the Puget Sound Regional Council (PSRC) off-street parking survey information. The PSRC parking survey data were collected on weekdays [Monday through Thursday] from March through June 2013. Because off-street parking supply has not changed and is not

expected to change as a result of AWVRP and EBSP construction, 2013 data are expected to represent a reasonable estimate of parking supply, demand, and utilization in 2017.

The DEIS never identifies where PSRC found the 10,746 off-street parking spaces that it claims exist within the parking study area.[3] *See* page 3-35. As a result, we assumed that Figure 4-2 (Existing Land Use) was a reasonable approximation of what the City assumes is the location of existing parking. On the morning of July 30, 2015 (a Thursday), we walked the southern half of the parking study area to look at sites for which Figure 4-2 shows the existing land use as "parking," to determine whether the City's assumptions that parking that existed in 2013 would exist in 2017, and that utilization of existing parking was between 60 and 74 percent, were accurate. What we found on areas shown as off-street "parking" in Figure 4-2 was as follows:

- Merrill Place garage. It currently has 140 total spots. A DPD sign on the garage says that it will be replaced with an eight-story structure with 155,000 square feet of office, 9,500 square feet of retail, and 48 underground parking places. The existing building will be demolished. So the number of parking spaces on the property will go down, while on-site demand will increase. No parking available to the general public can be expected in 2017.

- North Lot. In 2011 the North Lot had 1,165 public parking places. More than 50% of these have been lost to development.

- Parking garage between Jackson and Main on Alaskan Way. The garage currently has 100 spots. Although it appears that at times public parking is allowed, it was entirely full with monthly parkers at 10 a.m. on a Thursday. A DPD sign on the building says that the building will be replaced with an 11-story structure with 199 residences and 78 parking spaces. Again, the number of spaces will go down while on-site demand goes up. No spaces are likely to be available to visitors.

- Lot between Occidental and the alley, Main and Washington. The site is currently under construction for the new Weyerhaeuser headquarters. All 132 public parking spaces are gone.

[3] PSRC's 2013 parking study is not available online, so the public has no way to verify the number reported in the DEIS.

- Multistory garage between Columbia and Cherry, west of First Avenue. It had 154 open spaces at 10:30 a.m. on a Thursday. The First and Columbia garage typically has space available, even during peak parking demand periods. Exactly why is unclear, but visitors seem to avoid it even when nearby parking garages are full.

- Lot between Western and Post Alley, Columbia and Marion. It is now occupied by a residential building called "The Post." All of its public parking is gone.

- Garage between Cherry and Columbia facing First Avenue. The attendant said that the garage has 230 spaces. At 10:30 a.m. he said that 4 or 5 spaces were still available on the top floor.

- Lot between Western and Post and Seneca and Spring. The electronic sign said there was 1 spot open at 10:30 a.m. on a Thursday.

- Lot between University and Enwave (formerly Seattle Steam) west of Western. The former parking lot is currently under construction of a residential tower by Mack Urban. All 71 public parking spaces are gone.

- Nine-story parking garage east of Second and north of Union. At 11:50 a.m. there were 54 spots open on the 8th and 9th floors. We did not learn the total number of spots in the garage, but the garage appeared to be at least 90 percent full.

- Lot on the southeast corner of 2nd and Pike. Construction of a new building has just started. All public parking is now gone.

The PSRC study was also unrepresentative of actual demand because it was conducted from March through June of 2013. Both the waterfront and Pioneer Square face peak visitor demand during the summer. Furthermore, the relevant parking utilization is the peak periods of the day, not an average over the entire day. A visitor looking for parking at 6 p.m. takes no comfort from the fact that at 10 a.m. a garage might have had spots available.

The City needs to conduct its own parking survey, deducting any parking that it knows or should know, based on proposals that have been presented to DPD in the permitting process, will not be available in 2017. It needs to conduct the study during

peak summer months and identify the peak hours, and it needs to develop actual data for both weekdays and weekends.

Once the City has an accurate parking analysis, it needs to propose mitigation for the cumulative impact of the viaduct replacement, seawall replacement and AWPOW. It is clear from Figures 5-4 and 5-5 that AWPOW is choosing to remove parking and devote it to 30-foot-wide sidewalks on the east side of Alaskan Way. That parking could be allowed to remain. There are undoubtedly other ways that the loss of parking could be mitigated. But the viability of the restaurants and ground-level retailers within Pioneer Square, and the desirability of housing within Pioneer Square, is currently put at risk by the loss of parking that has occurred since the start of the viaduct replacement project, and those impacts will be exacerbated by AWPOW. Mitigation must be disclosed in the EIS, so that decision-makers can decide whether it should be provided.

The discussion of parking and traffic impacts in the DEIS is also deficient because it doesn't mention sports or other events in the two stadiums and event center. There are roughly 300 events per year. The DEIS must analyze what happens to total available parking on a soccer or football day, or during a home or garden show. Current traffic management plans for the stadiums do not adequately anticipate waterfront, seawall, etc., construction impacts or long term changing traffic patterns. The DEIS must analyze the traffic and parking impacts with full realization of the existing impacts of the stadiums and events center.

IV. Transportation impacts on Alaskan Way and on S. King Street and S. Jackson Street must be fully disclosed, and mitigation must be proposed.

It appears that the primary concern of the designers of AWPOW adjacent to Pioneer Square was not how to reconnect the City to its waterfront or how to embrace and celebrate Seattle's past, present, and future, but rather how to get hundreds of buses per day to west Seattle and Burien and how to get cars on and off the Washington State ferries at Coleman Dock.

Despite the signalization and traffic flow changes, level of service at the intersections studied in Pioneer Square declines in all cases. The DEIS must:

1. Provide more data and reasoning as to why intersections at the south end of the project will experience extremely lower levels of service, and extremely higher levels of delay times and explain what would be needed in order to remedy that.

2. Explain and address the variance in the number of vehicles leaving Colman Dock via Marion Street and Yesler Way between the No Action and the Action Alternative. Figures 3-5 and 3-8. The No Action Alternative expects more vehicles than the Action Alternative. That must be explained.

3. Explain the mitigation measures that "were considered only for traffic operations" under section 3.4.3.

4. Show data to verify the assumption under section 3.4.3 that states "Operations at most intersections would be similar to or better than those for the No Action Alternative, even with higher volumes of traffic."

Did the city conduct an alternatives analysis to putting all buses on Alaskan Way? Is there data to show that this is the best option? Both freight traffic and buses could be accommodated by a "fly over" at S. Lander St. or any of several other streets along the corridor. Were those considered, and if so, why were they rejected.

If all these buses have to follow this route, where are the bus stops? Are all buses going to stop at each stop? Are we going to have buses lined up all along the new waterfront, effectively creating another barrier between Pioneer Square and the waterfront? Or, are these buses not going to serve Pioneer Square, but simply pass by on their way to and from stops in the central business district?

Alternatives must be proposed for how to mitigate the impacts of the eight lanes of traffic proposed for Alaskan Way adjacent to Pioneer Square.

There also needs to be more detailed analysis of the impact on S. Jackson Street and S. King Street of the fact that the default exit for ferry traffic is Yesler Way, where only a south turn onto Alaskan Way is permitted, and where the majority of the vehicles will then turn north onto S. Jackson Street or S. King Street. Comparing Figures 3-5 and 3-8, it appears that the Action Alternative puts nearly 600 extra p.m. peak-hour trips east on S. Jackson, and nearly 500 extra p.m. peak-hour trips on S. King Street. That traffic goes to or comes from somewhere. Those streets have limited capacity. At what point in time was this analysis conducted and did it include results of changes on S. Jackson St. of the addition of the streetcar lane? The EIS needs to analyze its impacts both on those streets and on the intersections where the added traffic may require additional mitigation. Mitigation of the impacts must be proposed.

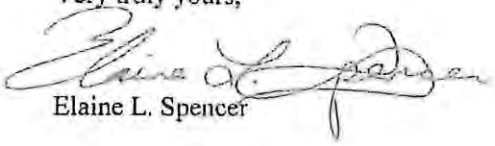
V. Ferry Queuing

The DEIS must explain why two lanes of the new Alaskan Way are being provided for ferry queuing and what alternatives were considered? Are these used "frequently" or only on busy weekend/holiday schedules? There are not two lanes for ferry queuing now, and it is working. Why does the city give critical right-of-way to WSDOT for car storage waiting for boats? Would the same function be served by a reservation system? Would a waiting lot down by the port or on Pier 48, such as the cell phone lot at Sea-Tac Airport, that allows cars to drive to the boat at time of loading, mitigate the need for ferry storage on Alaskan Way? The WSDOT currently provides on-dock daily parking to 50-60 employees. If these folks were required to park off-site and the spots were utilized for ferry waiting would they still need two lanes of Alaskan Way? The impact of Alaskan Way being an eight-lane highway across from Pioneer Square is a significant adverse impact. The DEIS cannot summarily state that no alternative is possible without explaining why these or other alternatives could not work.

VI. Impact on Historic Resources

The renaissance in Pioneer Square is occurring because of the significant investment and hard work of the Alliance and its many partners. This has happened in spite of ten years of construction, lost parking, and negative impacts on the historic district from the viaduct/seawall/Alaskan Way projects. Only a portion of these negative impacts have been adequately mitigated to date. The impacts described above will affect the continuing economic viability of the businesses and properties within Pioneer Square. That in turn affects the continued preservation of the historic structures within the Historic District. Historic structures are preserved when they are economically viable. When they are not, in the absence of public acquisition, they are eventually allowed to deteriorate and are removed. An 8-lane highway, built to accommodate buses, freight, and ferries, does not connect Pioneer Square to the waterfront nor to the increased economic opportunity afforded other parts of downtown Seattle. Thus, mitigation of these impacts is essential to the preservation of the historic resources within Pioneer Square.

Very truly yours,



Elaine L. Spencer

AWPOW--Supplemental Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34996
Seattle, WA 98124-4996

Subject: Comments of Alliance for Pioneer Square on the Supplemental Draft EIS for Alaskan Way, Promenade and Overlook Walk ("SDEIS")

Dear Mr. Mazzola:

These comments on the SDEIS are prepared on behalf of Alliance for Pioneer Square. Alliance for Pioneer Square is a nonprofit organization whose mission is to lead the revitalization of the Pioneer Square Historic District—Seattle's first neighborhood, and the one whose history is most closely tied to Seattle's historic waterfront. If Waterfront Seattle were to achieve its supposedly guiding principles of reconnecting the city to its waterfront, creating a waterfront for all, improving access and mobility for people and goods, and embracing and celebrating Seattle's past, present, and future, the new waterfront and Pioneer Square would have powerful synergy, enhancing the vitality of both.

Unfortunately, the SDEIS abandons those guiding principles. Instead of reconnecting Pioneer Square to the waterfront, creating a waterfront for all, and improving access and mobility for pedestrians trying to reach the waterfront from Pioneer Square, the SDEIS defines each of the components of Waterfront Seattle as having much more narrow objectives, in conflict with those guiding principles. Specifically, the SDEIS states that the "purpose" of the main corridor is limited to providing "reliable travel between the south downtown area and Belltown for general-purpose traffic, regional transit, freight, ferry traffic, pedestrians and bicycles." With north-south through flow as the sole purpose of the main corridor, the fact that Pioneer Square will be permanently cut off from the waterfront becomes irrelevant in the

project's design. Alliance for Pioneer Square submits that the alternatives that are presented in the SDEIS are fatally flawed because they focus only on north-south throughput, relegate reconnecting Pioneer Square to the waterfront to an afterthought, and give no consideration to or mitigation for the consequences of treating Alaskan Way solely as a transportation system for moving traffic from north of to south of downtown Seattle.

Alliance for Pioneer Square submitted detailed comments on the DEIS on August 24, 2015, and incorporate those comments by reference. None have been responded to in the SDEIS.

The new "Main Corridor Alternative 2" removes the transit lane from three blocks between Yesler and South Jackson Street on the west side of Alaskan Way, and from four blocks on the east side, replacing the east side bus lane with a block-long bus stop and 31 parking spots on the other three blocks. In exchange, it results in greater congestion on Alaskan Way. But according to Figure 3-2, south of South Jackson Street, Main Corridor Alternative 2 will move the roadway 12 feet east on the water side and 10 feet east on the uphill side—for a net reduction in width of the roadway of 2 feet.[1] North of South Jackson, the street is 12 feet narrower, and the crosswalk is 24 feet narrower. But the crosswalk is still, according to Table 4-3, 76 feet wide.

We asked project staff how long pedestrians would be given to walk across that street. The response was: "For people crossing Alaskan Way, for example, the minimum 'walk' signal time is anticipated to be 7 seconds, followed by a longer flashing "don't walk" signal that is a function of the width of the roadway, set to accommodate an average pedestrian crossing speed of 3.5 feet per second." A recent study published in the *Journal of the American Medical Association* found that the average walking speed of a large group of individuals of from 65 to 75 years old was less than 1 meter/second. http://jama.jamanetwork.com/article.aspx?articleid=644554 Table 2. Walking speed went down as the groups studied got older. The SDEIS assumes that walk signals will be set for a speed that many elderly, and presumably others, including families with young children, cannot meet. Clearly this is not going to be part of a "waterfront for all."

[1] Figure 3-1 and Figure 3-2 appear to contradict each other. Figure 3-1 appears to have the roadway of Alternative 2 on the west side of Alaskan Way south of South Jackson Street in exactly the same position as in Alternative 1. Figure 3-2 purports to move it 12 feet to the east. As with graphics in the DEIS, the public can hardly be expected to comment on the impacts of the roadway design for pedestrians when the graphics contradict each other.

Quite apart from the ability of the elderly or others with limited mobility to cross the street, the six to seven lane highway proposed for Alaskan Way by Pioneer Square is a visual barrier that people will not cross. The City has spent considerable money building crosswalks on Aurora Avenue north of 145th Street, which is a similar width of highway. The City should count the number of people who use those crosswalks. It is not many. The same is true of Fauntleroy Way or other arterials with six or seven lanes, designed to carry maximum through traffic.

I. The City needs to consider alternatives that exclude the use of Alaskan Way for ferry parking and that direct the 12 Metro bus routes now slated to use Alaskan Way south of Columbia Street onto Fourth and Third Avenues.

The SDEIS devotes 18 of its pages to attempting to justify why no other alternatives are feasible. It makes no effort to develop any mitigation for the adverse impacts of the alternatives that have been chosen. But the SDEIS misconceives the function of an EIS and its alternatives analysis. The function of an EIS is to describe for decision-makers the consequences of policy choices and assumptions they are making. Without that analysis of the comparative impacts of various choices, decision-makers are doomed to continue the practices that led to the adoption of SEPA and NEPA—making what they assumed were good choices at the time, and only later having to deal with the unintended consequences of their decisions. SEPA does not dictate the choice. It may be that if the choices were fully discussed, the decision-makers would conclude that severing Pioneer Square from the waterfront is an acceptable consequence of directing 12 bus routes onto Alaskan Way and using Alaskan Way for ferry parking. But that must be an informed choice, which the SDEIS does not allow.

The SDEIS presumes that policy choices made in other contexts, often by staff rather than elected officials, and often in the absence of full environmental disclosure, can circumscribe the choice of alternatives to be considered. It simply assumes, with no apparent basis, that the City must provide four blocks of one lane of Alaskan Way, and two blocks of a second lane of Alaskan Way, for parking of vehicles waiting to enter the Washington State Ferry terminal. The SDEIS assumes that it is bound by a King County Metro Downtown Southend Transit Study issued in 2012, which recommended that all bus routes currently using the Alaskan Way Viaduct between downtown Seattle and points south instead use Alaskan Way south of Columbia Street. Neither of those assumptions can foreclose consideration of other alternatives.

Alaskan Way will need to carry the increased traffic between SoDo and Belltown/Ballard/Magnolia that is required because there are no entrances or exits to the tunnel comparable to the current exit/entrance to the Viaduct at the Pike Place Market. But Alaskan Way likely could carry that additional traffic without becoming a barrier between Pioneer Square and the waterfront if Alaskan Way were not also required to serve as a parking lot for the Washington State Ferry traffic waiting for space on the ferry terminal, and to carry more than 500 daily buses.

A. Ferry parking is not an acceptable use of Alaskan Way.

Using the rough measuring tools of Google Earth, it appears that approximately 1,300 lineal feet of Alaskan Way (a quarter mile) is devoted to one ferry parking lane, and 650 lineal feet (an eighth of a mile) is devoted to a second ferry parking lane. Assuming 10-foot lanes, that is nearly 20,000 square feet of Alaskan Way that is being devoted to ferry parking. Those lanes are presumably needed for ferry traffic to park when the ferry terminal parking space is full.[2] Again using the rough measuring tools of Google Earth, it appears that the ferry system currently uses at least 25,000 square feet of the ferry terminal for noncustomer parking—presumably employee parking. Indeed, it is clear from Google Earth photography that much of that area was formerly striped for ferry customer parking, but was subsequently restriped to make it unavailable for customers and available only for noncustomer parking.

We very much doubt that the City of Seattle would allow any private entity to devote such critical space to employee parking. But if the ferry system must provide parking for its employees, that parking should be on the adjacent, vacant Pier 48, which WSDOT also owns. (If that generates sighs of disgust, because employee parking can't possibly be the highest and best use of Pier 48, that very reaction should be telling of how absurd it is to use Alaskan Way for ferry parking so that the ferry system can use the ferry terminal space for employee parking.) A decision that 20,000 square feet of Alaskan Way cannot be used for ferry parking may force the ferry system to make some

[2] A single turning lane on the block between Yesler Way and S. Washington is likely needed and Alliance for Pioneer Square would not object to that. But note that the traffic analysis (Figure 4-1) assumes that 435 vehicles per hour will turn left or right during rush hour from S. King Street without a turning lane, and 395 vehicles per hour will turn left or right from S. Jackson Street without a turn lane. If more than one turn lane is needed for the ferry terminal, it is likely because of the configuration and functioning of the toll booths. WSDOT has the technology to completely eliminate toll booths on its highways. It may be that it needs to upgrade its technology for toll booths at ferry terminals. It is inexcusable to permanently commit 1,000 square feet of Alaskan Way to ferry turning because WSDOT has not yet adopted known technology that would speed toll collection.

hard decisions about the configuration and use of its ferry terminal space. But since Waterfront Seattle presumes to force hard decisions on dozens of private property owners—which it expects to pay for much of its proposal—it cannot exempt public bodies from hard decisions just because they are public.

B. Alternatives that place Metro's buses on Fourth or Third Avenue must be considered as part of the Waterfront Seattle EIS.

The DEIS and the SDEIS assume that Alaskan Way south of Columbia must accommodate more than 500 daily buses, serving 12 south-end Metro bus routes that currently use the Alaskan Way Viaduct. They make that assumption because of a 2012 King County Metro study that considered 13 possible routes and concluded that Alaskan Way south of Columbia was the preferred route. *King County Metro Downtown Southend Transit Study* (2012) ("*Southend*"). The EIS cannot make that assumption without analysis of the comparative impacts of other choices.

The conclusion that Alaskan Way must accept the 500+ buses from 12 Metro bus routes because *Southend* concluded that is the best route is first of all circular. On page 4-6, *Southend* explained its conclusions about transit service reliability, for which it scored use of Alaskan Way the highest:

> [T]he Waterfront Seattle Project is proposing northbound AM peak period bus lanes to Columbia Street and southbound AM and PM peak period bus lanes south from Columbia Street to the south. These bus lanes would improve travel time reliability of buses traveling on Alaskan Way in the peak direction.

(emphasis added). Waterfront Seattle cannot, with no prior environmental review or consideration of the impacts on Pioneer Square, first promise Metro dedicated bus lanes on Alaskan Way south of Columbia Street, and then rely on Metro's decision that Alaskan Way is the best transit alternative as a reason to not consider alternatives that put Metro buses on Fourth or Third Avenue. The EIS must also analyze the functioning of Alaskan Way with the added traffic from Ballard/Magnolia, but without the 500+ buses that the City volunteered to put on Alaskan Way.

Review of *Southend* shows that several of the alternatives that Metro rejected, in the face of Waterfront Seattle's promise of dedicated bus lanes, may have been plausible in the absence of those promised lanes.

- The most obvious is the SoDo Busway. It was eliminated because the 12 routes being added to the Busway "would greatly increase congestion in the busway. Also, the current busway has one lane in each direction and Rapid Ride coaches would be required to stop behind local service serving these stops, which is not preferred." *Southend* at 2-1. If the 12 routes would overwhelm the dedicated Busway, why should they be rerouted to overwhelm Alaskan Way?[3] And how does Alaskan Way resolve the issue of Rapid Ride coaches being required to stop behind local buses?

- Pathways 4A and 4B were eliminated because of "poor transit reliability . . . , increased travel time . . . compared to the existing Alaskan Way Viaduct pathway—bus travel time would increase by approximately 4.5 minutes northbound and 7.5 minutes southbound during the PM peak." *Southend* at 3-20. In the comparative scoring of pathways, *Southend* at 3-21, Pathway 4A scored one point higher, and Pathway 4B scored three points higher than the chosen pathway of Alaskan/Columbia & Marion (31 out of 45 points for Pathway 4A, and 33 out of 45 for Pathway 4B, versus 30 out of 45 points for alternative 5A). That was in the context of Waterfront Seattle's having promised Metro dedicated bus lanes on Alaskan Way. Who knows why *Southend* chose to eliminate alternatives 4A and 4B, which scored higher in its evaluation, or whether it would have come to the same conclusion had Waterfront Seattle not made that improper commitment. The EIS should include a comparative analysis of the travel time for buses using other alternatives versus Alaskan Way. It may be that decision-makers would choose to save commuters a few minutes (if there is in fact any difference—*Southend* does not appear to provide that information) at the price of permanently disconnecting Pioneer Square from the waterfront. But those are choices that the EIS must disclose.

It is possible that capital investments will be needed to improve the functioning of one or more of the alternatives that *Southend* rejected without analysis. If so, those capital investments should be identified. But the fact that capital investments are needed for transit to function effectively is not itself a reason why

[3] Sound Transit will be asking voters this fall to fund the creation of a second transit tunnel under Seattle to resolve congestion in the Third Avenue bus tunnel. Over time, Metro will need to resolve a number of congestion issues, and presumably will do so. But the commitment of two lanes of Alaskan Way to transit only, or the commitment to permanent congestion on Alaskan Way from buses, permanently disconnecting Pioneer Square from the waterfront, is an irretrievable commitment of resources that won't be revisited when Metro addresses the Busway congestion.

Pioneer Square should face a seven- or eight-lane highway between it and the waterfront.

The primary objection to several routes was that they were subject to train traffic. But the City and State developed a mitigation option of an overpass at S. Lander Street in the early days of seeking solutions to the SR 99 Replacement process. Of the estimated $150 million cost of the S. Lander Street overpass, the first $20 million was provided by the Move Seattle levy. http://www.seattle.gov/transportation/docs/CB118402SpendingBreakdown.pdf. The City has applied to the federal government for the next $55 million. http://www.seattle.gov/transportation/lander_bridge.htm. Although that means it is not yet fully funded, it is much closer to reality than the currently unfunded Waterfront Seattle AWPOW, which requires something on the order of $700 million that is not yet funded.

II. The EIS must disclose how the significant adverse impacts of both the preferred alternative and the new alternative will be mitigated.

In its comment letter on the DEIS, Alliance for Pioneer Square pointed out numerous significant adverse environmental impacts, including the impact on parking, the impact on South Jackson and South King Street of directing hundreds of ferry trips per hour onto those constrained streets, and the inadequacy of the meager improvements supposedly included in Waterfront Seattle to provide east-west connections to the waterfront. The new Main Alternative 2 does nothing to address any of those concerns; it simply increases the congestion on Alaskan Way. It is not acceptable for the City to simply throw up its hands with a "so sorry." There needs to be serious mitigation for the impacts of the proposal.

III. The EIS needs to be based on current data.

As Alliance for Pioneer Square pointed out in its comments on the DEIS, the DEIS was inadequate in its failure to adequately disclose the cumulative impact of the loss of parking as a result of the AWPOW. In the intervening months, things have only gotten worse, and yet the SDEIS makes no effort to deal with current information. Two weeks after the SDEIS was released, the Seattle Department of Transportation released an Environmental Assessment of a proposed streetcar system that will remove 192 parking places from First Avenue – some 84% of the on-street parking within the route of the streetcar. That greatly exacerbates the loss of parking from AWPOW, but is not addressed by the SDEIS. Similarly, additional development since the release of the

DEIS has removed additional parking from Pioneer Square and downtown Seattle, yet there is no effort to address those changed circumstances. The SDEIS will increase congestion on Alaskan Way and will necessarily divert traffic onto other streets affecting Pioneer Square. But the SDEIS makes no effort to address those changes in circumstances. The assumptions that were flawed in the DEIS are more flawed today, and should have been addressed as part of the SDEIS.

IV. There needs to be a thoughtful no-action alternative.

The "no-action" alternative in the DEIS paints it as being as bad as possible. The DEIS assumed that the City would do nothing to address congestion on Alaskan Way—no signal timing, no improvements of intersections, nothing. The citizens of Seattle have since passed a transportation levy that will provide $100 million per year for the next nine years for transportation improvements. The City cannot expect to just let Alaskan Way traffic remain at gridlock under the no-action alternative, when minor improvements such as replacing outmoded traffic signals or signal timing could significantly improve the functioning of the no-action alternative. The no-action alternative needs to be an alternative in which the City devotes the same resources to improvement of traffic conditions on Alaskan Way that the citizens have given it to improve traffic conditions throughout the City.

The City currently has no commitments of money for any part of Waterfront Seattle. It is entirely possible that some or all of it will not go forward promptly after the deep-bore tunnel opens. The City needs to think carefully about, and present in its EIS, a realistic plan for how it will take ordinary, responsible steps if the no-action alternative is chosen by either decision or default.

Very truly yours,

Petitioner would like to receive documents from the Office of Hearing Examiner by email attachment.

2. RESPONDENT

Respondent is the City of Seattle through its Department of Transportation (SDOT). On October 31, 2016 SDOT issued a Final Environmental Impact Statement (the FEIS) for Alaskan Way, Promenade, and Overlook Walk (AWPOW).

3. INTEREST OF WATERFRONT LANDINGS

Waterfront Landings is a 232-unit residential condominium community fronting on Alaskan Way between Pine and Lenora Streets. It is home to nearly 400 residents, who have chosen to live there because of the scenic beauty of the location, the amenity of its pedestrian environment, and its easy access to downtown Seattle. Waterfront Landings Owners Association is the homeowner association for Waterfront Landings. Waterfront Landings was one of the first developments in Seattle for which the City insisted that a significant number of units be small enough to be affordable. As a result, while Waterfront Landings has some lovely homes with privileged owners, it also includes a significant number of very small homes, owned by residents on modest fixed incomes. Of the 386 people living at Waterfront Landings as of August 2015, 25 percent were senior citizens and retired, 6 percent were children, and 70 percent were adults of working age.

As Waterfront Landings explained to the City in comments on the Draft Environmental Impact Statement ("EIS") for AWPOW, its primary concerns about the environmental impacts of AWPOW are:

- The proposed elevated roadway on Alaskan Way and Pine Street will create toxic fumes and dirt from the road and subject residents to noise at all hours, as well as cutting off Waterfront Landings' access to downtown Seattle. Significant light pollution from vehicular traffic, roadway lighting, and traffic signals located within twenty feet of residents' windows will adversely impact residents' quality of life. Combined with the Overlook Walk (either as originally proposed or under the revised Seattle Aquarium proposal), it will sever the north waterfront from the central waterfront.
- The new 19-foot (two story) concrete retaining wall and guardrail in Pine Street will make the remnant of Pine Street a shaded, dangerous, and blighted neighbor to Waterfront Landings.
- Safety and emergency needs of residents will be severely compromised during construction. Project officials have made at most vague promises that they will provide access for emergency vehicles during construction, but acknowledge that response time for emergency vehicles may still be delayed. After project completion, safety and emergency needs will be compromised by design workarounds required to prevent transient people from occupying the space at the rear and side of the Waterfront Landings building. Again, only vague promises of mitigation have been provided, not specific measures that will assure Waterfront Landings residents that their health and safety will be protected.
- Removal of on-street parking that is essential in order for family members or other guests to visit residents will cause homes within Waterfront Landings to be isolated from the City.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T. 206 624 8300 | F. 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

- The new "service drive," which is essential to replace the loss of Pine Street when the grade of Alaskan Way and Pine Street is changed, will subject residents to noise and fumes at all hours. It is likely to result in accidents as trucks are forced to stop for residents turning into Waterfront Landings or residents try to exit onto Alaskan Way. It will degrade the landscaped walkway in front of Waterfront Landings, which has always been a significant amenity of its homes. It will require a security gate between Waterfront Landings and the retaining wall that will create the impression of a medium-security prison.

Waterfront Landings has provided comments on both the Draft EIS and the Supplemental Draft EIS for AWPOW on behalf of its members, as well as participating for years in numerous meetings with representatives of SDOT and Waterfront Seattle to express the concerns identified in this petition for review. Public comment cannot be measured by how many hours a public employee spends sitting in a room with concerned citizens. The City's responses to those meetings have consistently demonstrated that project officials will neither hear the concerns of Waterfront Landings nor make any substantive changes in the project to address those concerns. When presented with the opportunity to address Waterfront Landings' greatest concern—the raising of the grade of Pine Street and Alaskan Way, which cuts off the northern waterfront and blights Waterfront Landings' southern building, through the replacement of the Overlook Walk with the Aquarium expansion—project officials refused to even consider an alternative that would address that concern. The City's refusal to make any more than cosmetic change to the project to prevent it from becoming a permanent blight on Waterfront Landings leaves Waterfront Landings with no choice but to seek an EIS that discusses a reasonable alternative that has less adverse impact on its residents.

The City of Seattle expects to pay for the improvements included within AWPOW by, among other things, establishing a Local Improvement District ("LID") to provide $199 million. The City expects to impose a special assessment on homes within Waterfront Landings. An LID

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599

SEATTLE, WASHINGTON 98121

is a proper way to finance construction of public improvements only if those public improvements provide "special benefit" to particular properties not received by the public at large.

As designed, and as described in the FEIS, AWPOW provides no "special benefit" for Waterfront Landings. To the contrary, it will permanently blight Waterfront Landings by tucking it in the armpit of an elevated highway, cutting off its easy access to downtown Seattle, and destroying much of its amenity value.

Two of the most important functions of an EIS for a public project are consideration of reasonable alternatives and identification of mitigation that can reduce the adverse impacts of the project. The failure of the FEIS for AWPOW to fulfill those functions leads to AWPOW's failure to provide any benefit for owners of Waterfront Landings. Waterfront Landings needs the EIS for AWPOW to seriously consider an alternative that would achieve the stated goals of AWPOW without permanently blighting Waterfront Landings. That requires an alternative that moves the intersection of the Elliott Connector and Alaskan Way to Pike Street and reorients the Seattle Aquarium expansion to accommodate that move.

4. DESCRIPTION OF AWPOW

AWPOW was an outgrowth of the removal of the Alaskan Way Viaduct (the Viaduct). Although Waterfront Landings is located and was designed so that the Viaduct had no adverse impact on Waterfront Landings, the Viaduct had been a noisy visual barrier between downtown Seattle and the central waterfront to the south of Waterfront Landings. Removal of the Viaduct will remove that physical barrier and reduce the noise and air pollution that it created to the south of Waterfront Landings, and will provide significant additional open space that can be used to make the central waterfront more attractive. Because Waterfront Landings is not now adversely impacted by the Viaduct and its residents now have easy access to downtown Seattle through the Pike Place Market parking garage elevators, its interest in both the removal of the Viaduct and AWPOW was less than that of properties along the central waterfront.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T. 206 624 8300 | F. 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

The City of Seattle established seven goals for the reconfiguration of the waterfront after the Viaduct is removed:

- Create a waterfront for all
- Put the shoreline and innovative, sustainable design at the forefront
- Reconnect the city to its waterfront
- Embrace and celebrate Seattle's past, present and future
- Improve access and mobility (for people and goods)
- Create a bold vision that is adaptable over time
- Develop consistent leadership from concept to operations

AWPOW is a compilation of several projects that arose from the post-Viaduct waterfront planning process. These include reconstruction of Alaskan Way, construction of a promenade along the waterfront, and new connections to the waterfront, including a major overpass of Alaskan Way below the Pike Place Market. That overpass was originally a grand sweep of concrete coming down from the Pike Place Market to Pier 62/63. The intent was to give tourists a sweeping view of the Olympic Mountains as they walked down to Pier 62/63 from the Pike Place Market.

Approximately one-third of the traffic on the Viaduct coming to or from north of downtown Seattle currently exits or enters the Viaduct at the Pike Place Market by means of Elliott and Western Avenues, to proceed to Ballard, Interbay, and Magnolia. As part of the Viaduct replacement project, it was necessary to build a "Connector" to extend Elliott and Western Avenues down the hill behind Waterfront Landings to Alaskan Way, so that the Ballard/Magnolia/Interbay traffic can use Alaskan Way to reach areas south of downtown Seattle. As originally proposed by Washington State Department of Transportation (WSDOT), the intersection of Alaskan Way and the Elliott Connector was to have been at Pike Street. That intersection would have provided reasonable grades for trucks needing to ascend the bluff, and would have had no adverse impact on Waterfront Landings.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

With the AWPOW design of the Overlook Walk, the Pike Street intersection of the Elliott Connector and Alaskan Way was no longer possible because the grand sweep of concrete directed at Pier 62/63 required that the grades of the roadway underneath be changed. Instead of placing the intersection at Pike and Alaskan Way, AWPOW moved the intersection of Alaskan Way and the Elliott Connector to Pine Street behind Waterfront Landings. That required it to build a wall in the middle of Pine Street adjacent to Waterfront Landings but only inches from the building at its southeast corner, totaling 19-feet high with the required railings. It also required it to raise the grade of Alaskan Way in front of portions of Waterfront Landings. Without additional mitigation, it would have left Waterfront Landings with no access to the southern entrance to its parking garage, no ability for trash and recycling trucks to access the area where trash and recycling is stored, no place for moving vans to park when needed, and no ability for emergency vehicles to access the rear of the building. To address those circumstances, AWPOW requires that a portion of the sidewalk in front of Waterfront Landings be turned instead into a service road, moving all traffic that now accesses the south or rear of the building to pass immediately in front of and below the windows of homes that currently face onto the walkway, Alaskan Way, and Elliott Bay. Those changes will profoundly impact Waterfront Landings.

The AWPOW project team has been clear that only the design of the Overlook Walk made those impacts necessary. AWPOW officials were not, however, willing to alter the original Overlook Walk to reduce the adverse impact of the Overlook Walk on Waterfront Landings.

By early 2016 it was clear that the Overlook Walk was not feasible. It was too expensive, offered too little benefit, and would prevent the Seattle Aquarium, the heart of the central waterfront, from implementing its long-term strategic plan for expansion. As a result, in April 2016 the City issued a Draft Supplemental EIS that substituted an expansion of the Seattle Aquarium for the Overlook Walk as originally presented. Waterfront Landings urged the City to

MILLER NASH GRAHAM & DUNN LLP

use that occasion to develop and evaluate an alternative that moved the Elliott Connector/Alaskan Way intersection back to Pike Street as originally proposed by WSDOT, but the AWPOW staff refused to do so.

A reasonable alternative would include a scheme for the Aquarium expansion that moved the intersection of the Elliott Connector and Alaskan Way to Pike Street, with the Aquarium expansion allowing pedestrian passage across Alaskan Way to the waterfront on top of that intersection. Such an alternative is feasible, and would result in far less adverse impact to Waterfront Landings and upon vehicular and pedestrian safety on Alaskan Way.

5. DEFICIENCIES OF THE FEIS

An adequate EIS for AWPOW was required to consider alternatives that would achieve the goals of the waterfront plan and to identify the adverse impacts of those alternatives, and mitigation that could reduce those adverse impacts. The inadequacies of the Draft EIS and Draft Supplemental EIS were detailed in comment letters submitted by Waterfront Landings on August 12, 2015 and May 18, 2016, Exhibits A and B to this petition. Those comments are incorporated in this petition by reference. The FEIS contains no changes or even consideration of alternatives to correct those deficiencies. Without limiting the foregoing, the FEIS for AWPOW is inadequate in at least the following respects.

a. Failure to adequately describe the environmental impacts of the Overlook Walk component of AWPOW

The FEIS focuses almost entirely on the effect of AWPOW on the central waterfront and fails to adequately describe the impact on either Waterfront Landings or the northern waterfront.

b. Failure to consider reasonable alternatives

The identification and analysis of alternatives is the heart of an EIS. WAC 197-11-440(5) requires that:

> (b) Reasonable alternatives shall include actions that could feasibly attain or approximate a proposal's objectives, but at a lower environmental cost or decreased level of environmental degradation.

MILLER NASH GRAHAM & DUNN LLP
ATTORNEYS AT LAW
T: 206 624 8300 | F: 206 340 9599
PIER 70
2801 ALASKAN WAY, SUITE 300
SEATTLE, WASHINGTON 98121

The FEIS is inadequate because it does not consider reasonable alternatives that would allow AWPOW to achieve its stated objectives with less environmental degradation. For a private project, it may be appropriate to consider only a "no action" alternative. But for a major public project, SEPA expects that the EIS will consider a reasonable range of alternatives. For a project of this character, it is simply untrue that there is only one alternative that could achieve the project's objectives, and untrue that there is no mitigation that the public can commit to that would achieve the project's objectives at lower environmental cost. By placing the intersection of Alaskan Way and the Elliott Connector beside Waterfront Landings at Pine Street, the project as designed will permanently blight Waterfront Landings. It will cut off the northern waterfront from the central waterfront, destroying the view for what is now one of the great pedestrian experiences of Seattle by interrupting the sweeping view of the harbor for pedestrians walking south along Alaskan Way. The State Environmental Policy Act ("SEPA") requires that before a proposal with such significant adverse impacts is implemented, public decision-makers and the public at large have full disclosure of the environmental impacts of the proposed action and the possible mitigation that might achieve the proposal's objectives at lower environmental cost.

c. Inadequate description of possible mitigation

An essential element of an adequate EIS is description of the possible mitigation for the adverse impacts of the proposal. Without a description of the possible mitigation, decision-makers do not know how they may be able to mitigate those adverse effects. It is not the function of the EIS to decide what mitigation will be provided; its function is to describe the mitigation that could alleviate the adverse impacts, so that decision-makers can determine what mitigation will be required.

As detailed in Exhibits A and B, the EIS has no adequate description of either the mitigation that can be provided for the significant adverse construction impacts of the project or the significant adverse impacts of the project once it is completed. The responses to Waterfront Landings' comments simply demonstrate that the FEIS makes no commitments to any mitigation

MILLER NASH GRAHAM & DUNN LLP

SEATTLE, WASHINGTON 98121

of adverse construction or operational impacts beyond a vague and unenforceable commitment to "continue working with" Waterfront Landings. That is not the level of detail or precision that an adequate EIS requires.

6. REQUESTED RELIEF

Waterfront Landings asks the Hearing Examiner to determine that the FEIS for AWPOW is inadequate under SEPA and to remand the matter to SDOT for preparation of an adequate EIS.

AWPOW—Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34996
Seattle, WA 98124-4996

Comments of Waterfront Landings Condominium on Draft EIS for Waterfront Seattle Alaskan Way, Promenade and Overlook Walk

Dear Mr. Mazzola,

Waterfront Landings is a 232-unit residential community that is home to nearly 400 residents who have chosen to live there because of the scenic beauty of the location, the amenity of its pedestrian environment, and its easy access to downtown Seattle. It was one of the first developments in Seattle where the City insisted that a significant number of units be small enough to be affordable. As a result, while Waterfront Landings has some lovely homes with privileged owners, it also includes a significant number of very small homes, owned by residents on modest fixed incomes. Of the 386 people living at Waterfront Landings, 25% are senior citizens and retired, 6% are children, and 70% are adults, most working.

The negative impact of the central waterfront plan as currently proposed will significantly reduce the quality of life and safety for all residents living at Waterfront Landings Condominiums. The following are our major concerns:

- The proposed elevated roadway on Alaskan Way and Pine Street will create toxic fumes and dirt from the road and subject residents to noise at all hours, as well as cutting off Waterfront Landing's access to downtown Seattle. Combined with the Overlook Walk, it will sever the north waterfront from the central waterfront.
- The new 25-foot wall in Pine Street will make the remnant of Pine Street a shaded, dangerous, blighted neighbor to Waterfront Landings.
- Safety and emergency needs of residents will be compromised during construction due to lack of access to emergency medical and fire vehicles, and during operation due to increased homeless use and illegal activities in the area next to and behind the building.
- Loss of parking for resident's family or guests which will isolate our homes from the City.
- The service drive, which is essential to replace our lost use of Pine Street when the grade of Alaskan Way and Pine Street is changed, will subject residents to noise and fumes at all hours, while also destroying the walkway in front of Waterfront Landings, which is a significant amenity of our homes.

Having Focused on only One Alternative, the DEIS Incorrectly Pretends that the Preferred Alternative Achieves the Project Objectives.

The Preferred Alternative does not propose a "waterfront for all;" it is a waterfront for tourists or young, fit bike riders, not for people with mobility issues or people pushing strollers, such as many Waterfront Landings residents and their families. It does not "reconnect the City to its waterfront;" it severs the north waterfront from the central waterfront, and leaves Waterfront Landings tucked behind a new highway overpass, with access to Downtown Seattle much restricted when compared to our current access. It does not "embrace and celebrate Seattle's past;" it blocks the views of the historic waterfront and Pike Place Market for everyone on the formerly-majestic walk of the northern waterfront.

The EIS must consider alternatives that would reduce those impacts. The premise of the DEIS is there is only one alternative that could achieve the City's objectives within the confines of the existing right of way. That is absurd. If the City hired ten world-class design teams it would get more than ten alternative ways to achieve the City's objectives, because most of the design teams would offer the City several alternatives. And most of the design team would propose alternatives that recognized that the public interest is not served when the City builds something that aggressively damages its closest neighbors then turns a blind eye to its impacts.

The EIS also must consider realistic alternatives that could be implemented if the project as proposed is not feasible. Waterfront Seattle has been opaque about the cost of the AWPOW projects, and where it expects to get the money to build them. At this point the public has no basis to conclude that the Preferred Alternative is feasible. Instead of providing the public with a realistic basis to understand what would happen if the City does not build the Preferred Alternative, the EIS tries to magnify the disadvantages of the "No Action" alternative by assuming that the City would permanently stand helplessly by and let all of the worst qualities of the No Action alternative continue indefinitely. Read closely, the EIS shows that modest investments would ameliorate many of what the EIS treats as the disadvantages of the "No Action" alternative. Once the viaduct is removed, it is likely that a range of approaches to enlivening the Waterfront and truly connecting it to the heart of the city will become more obvious. The EIS does the City a disservice by not considering ways to keep the City moving while that process unfolds.

The EIS Must Consider an Alternative that moves the Intersection of Alaskan Way and the Elliott Extension to Pike Street, as Proposed by WSDOT, the City and the Federal Highway Administration in 2009.

The severe long-term impact on Waterfront Landings comes from the Preferred Alternative raising the grade of Alaskan Way in front of its southern building, and then raising the grade of Pine Street so that vehicles pass on a raised roadway a few feet from the southern building, letting people in the cars stare into residents' homes. Access to the Waterfront Landings parking garage will become difficult and circuitous. The gracious walkway in front of the building will be eliminated. The ability to walk down the east side of Alaskan Way to the Central Waterfront will be eliminated. Garbage and recycling and delivery trucks will pass directly under residents windows. Residents making the hairpin turn into the property to reach

the garage run the risk of being run down by trucks and other vehicles making a sharp descent and right turn from the new raised intersection. The project has shown the public glossy renderings that minimize the adverse impact on the quality of the space around the building, by distorting the proportions and showing flowers and sunlight at the base of a north-facing wall. To give decision-makers an accurate understanding of the impact, we built a model, based on the plans and elevations we received from the City. By any reasonable measure, that new road will be a long-term blight to Waterfront Landings and a continuing traffic hazard for vehicles and pedestrians.

In 2009 the Washington State Department of Transportation, the Federal Highwaty Administration and the City of Seattle developed a plan for the Elliott & Western Connector that would eliminate the adverse impacts on Waterfront Landings. In meetings with the Project Team we have been told that the only reason that the 2009 plan is not an alternative now is that it would be impossible to have the Overlook Walk connect the Pike Place Market to Pier 62/63 with that plan. Pier 62/63 is a seismically unsound wooden platform, with no historic value, and which the City has no money to put to public use – assuming that the federal resource agencies such as the U.S. Army Corps of Engineers would give the City permits to restore Pier 62/63 to public use. The EIS must consider an alternative which reverts to the WSDOT/FHA/City plan for the Elliott & Western Connector, and directs pedestrians to the Central Waterfront rather than to Pier 62/63.

The EIS Must Consider An Alternative That Connects the Pike Place Market to the Central Waterfront Without Severing the Connection between the North Waterfront and the Central Waterfront

In rare candor, on page 5-25 the EIS says, "[T]he Overlook Walk would divide the Alaskan Way corridor visually and physically into separate north and south segments and would serve as the new visual terminus for views from Alaskan Way. This would result in substantial impact on the character and aesthetics of the northern half of the Waterfront landscape unit." Today, the views of the waterfront, the Pike Place Market, Mt. Rainier and downtown Seattle for anyone walking south along the Alaskan Way from Broad Street, is one of the world's great pedestrian vistas. The Port of Seattle's pedestrian overpass at Bell Street was designed so that it did not destroy that view. But the Overlook Walk, in its single-minded zeal to enhance the view of tourists coming from the Pike Place Market to the Waterfront, will be a huge visual barrier severing the north waterfront from the central waterfront. We understand the desire to get pedestrians over Alaskan Way and the new bike path, but the Port's Bell Street overpass demonstrates that doesn't require damaging the views of the Waterfront from the north.

City environmental policy requires that development protect public views of historic landmarks. The EIS has only one visual depicting how it will hide the views of the historic Pike Place Market. Figure 5-8. But the Overlook Walk will block the views of both the Pike Place Market and the historic piers on the Central Waterfront, inserting a swath of glass, steel and concrete into one of Seattle's most fine-grained historic urban settings.

The EIS Must Disclose How the City Will Keep the New Raised Pine Street from Being a Magnet for Homeless Camping and Illegal Activity Immediately Adjacent to Waterfront Landings.

Over many years, many police chiefs and many mayors, the City has become increasingly unwilling or unable to deal with homeless individuals camping in its public spaces, and engaging in a range of illegal activities. Waterfront Landings residents have endured that phenomenon with camping under the Viaduct. With the removal of the viaduct, that population will need to find new places to camp. We understand the City hopes to keep people from camping in the new park, but the planters at the base of the new wall for Pine Street, or the area under the new Elliott Way extender that must be available to service vehicles behind Waterfront Landing will be prime spots for homeless camping. They will not be readily visible from Alaskan Way, will be sheltered from southwest winter winds, and will be relatively quiet. The EIS needs to disclose how the City will prevent that outcome. Whatever happens in the rest of the Project, the intrusion of the new Pine Street on Waterfront Landings will be magnified unless the City keeps it free of homeless camping and illegal activity.

The EIS Must Consider a Redesign of Overlook Walk that Would Not Doom the Seattle Aquarium to Mediocrity

The Seattle Aquarium is one of Waterfront Landing's closest neighbors. It is the largest draw to the Waterfront, and it has gone through an extensive master planning process, with the

goals to, among other things, "build on [its] role as an authentic and uniquely Seattle aquarium at the center of Seattle's great new waterfront" and "make the Aquarium the single most compelling and fun element of the new waterfront." That Master Plan defines the way the Aquarium can achieve those goals. But to achieve those goals, the Aquarium needs nearly 76,000 square feet of new building. One of its options – likely the only realistic option – for where to put that space is on the block the Preferred Alternative instead consumes with the Overlook Walk. According to the EIS, pp. ES-8 and 2-15, the Overlook Walk will leave the Aquarium with only 22,000 square feet of new space, or less than a third of what it needs.

Providing the Aquarium with the space it needs would require moving the new Aquarium to the north end of the block between Pike and Pine – where the Preferred Alternative instead puts the new raised Pine Street, and putting the intersection of Alaskan Way and Elliott Way at Pike Street. The roof of a new Aquarium on that block could provide a landscaped greenspace path down from the Pike Place Market to the Waterfront. It could provide an overpass of Alaskan Way that landed both Aquarium visitors and the general public on the west side of Alaskan Way and the new bike path. Redesign to accommodate the Aquarium's needs could also resolve the concerns of Waterfront Landings with Pine Street.

Waterfront Seattle's failure to consider such an alternative is inexplicable. Public records show that through October 2014, Waterfront Seattle had spent nearly $39 million on the design, without SEPA review. That's an enormous amount of money, when compared to the $58 million Seattle voters agreed in 2014 to spend on universal preschool, the $13 million cost of a new fire station, or the $2 million per mile cost of sidewalks in neighborhoods which have none. One has to believe that the City's refusal to consider alternatives has much more to do with the Project Team not wanting to admit it spent $39 million on design of the project and had to redesign it than it has to do with any real limitation on alternatives.

Waterfront Seattle Must Provide Specific and Effective Mitigation for the Construction Impacts Disclosed in the EIS.

The EIS states that construction of Waterfront Seattle will occur from 2017 through mid-2020. It also says that Alaskan Way will be closed for "a short period (assumed to be up to 4 months for the purpose of analysis)" in front of Waterfront Landing. The EIS acknowledges that closing Alaskan Way will require all vehicles, including emergency vehicles, to cross the Burlington Northern tracks at Wall, Vine, Clay or Broad Street. The EIS incorrectly suggests that the delay would be between 1 and 5.5 minutes, which they say is the "typical" time for gate closures. The author clearly hasn't crossed at those locations often. Burlington Northern trains sometimes stop while blocking the crossing, presumably to switch tracks at the grain terminal. A second train sometimes comes before the first one clears. Closures can last 20 or 30 minutes or more. That is an unacceptable time for emergency vehicles to be delayed. If it seems a "moderate" impact to the EIS drafters, it is a life-threatening impact to someone who needs the emergency vehicle. At a bare minimum, Alaskan Way must always be open to emergency vehicles.

The EIS must also provide much more specific mitigation for the other construction impacts. Waterfront Landings has endured half of the three-year construction window for the

seawall replacement. Another three years of construction, including multiple shifts and traffic disruption, requires significant mitigation, in keeping with the significant impact.

The City must address the loss of parking on the waterfront.

The EIS makes it clear – if you can't walk the grades between First Avenue and the Waterfront, you're out of luck. The EIS suggests that AWPOW will enhance transit. That is true for people taking buses between West Seattle or Burien and downtown. But there is no transit on the waterfront. The City removed the Waterfront Trolley, and there is no assurance it will ever be replaced. Today Waterfront Landing has easy accessible access to Downtown Seattle; we can walk south on Alaskan Way and then take the elevator of the Market parking garage to the level of First Avenue. The Preferred Alternative will eliminate that access. This summer the Pike Place Market parking garage and all available on street and off street parking off of Alaskan Way has frequently been 100% full. That is the future, according to the EIS.

That has a significant adverse impact on living at Waterfront Landings. The EIS says, p. 4-16, "[T]he Action Alternative would remove parking spaces primarily along Alaskan Way and in the current Alaskan Way Viaduct right of way. A few spaces would also be removed on east-west streets. Parking patterns may shift, as motorists accustomed to parking on the street in a particular location may have to travel several blocks farther to find available parking." Those "motorists" are our elderly parents, our friends with mobility limitations, sometimes our children bringing our grandchildren to visit. Our guests are often not capable of walking "several blocks further to find available parking," then walking the grades proposed by the Preferred Alternative. If that is their choice, the people most important to us will not be able to visit our homes. It is hard to imagine a more significant adverse impact. The stated goal of a "Waterfront for all" becomes a cheap jingle.

Conclusion

We want to be clear. We do not want to be at war with the City. We want a Waterfront Seattle that we can be enthusiastic about. But the project team's adamant refusal to consider our concerns, and its insistence on its way, has led to a project that will be severely damaging to us. The good news is that the SR 99 replacement tunnel is not expected to be open until spring of 2018. That gives the City time to start over and get this right. We look forward to working with the City to accomplish a great waterfront, and ask the City to give us that opportunity, not simply insist on proceeding in a way that will fundamentally blight Waterfront Landings.

Thank you for considering these comments.

Very Truly Yours

AWPOW – Supplemental Draft EIS Comments
c/o Mark Mazzola, Environmental Manager
Seattle Department of Transportation
PO Box 34996
Seattle, WA 98124-4996

Subject: Comments of Waterfront Landings on Supplemental Draft Environmental Impact Statement for Alaskan Way, Promenade, and Overlook Walk ("SDEIS")

Dear Mr. Mazzola:

These comments on the SDEIS are submitted by Waterfront Landings Condominium, a 232-unit residential community immediately abutting Waterfront Seattle's rerouting of Pine Street, the change of grade of Alaskan Way and Pine Street, and the Overlook Walk components of "AWPOW." In its August 12, 2015, letter commenting on the significant adverse impacts of AWPOW, signed by 110 residents, Waterfront Landings identified the following major concerns with the environmental impacts of the proposal:

- The proposed elevated roadway on Alaskan Way and Pine Street will create toxic fumes and dirt from the road and subject residents to noise at all hours, as well as cutting off Waterfront Landings' access to downtown Seattle. Combined with the Overlook Walk, it will sever the north waterfront from the central waterfront.

- The new 25-foot wall in Pine Street will make the remnant of Pine Street a shaded, dangerous, and blighted neighbor to Waterfront Landings.

- Safety and emergency needs of residents will be compromised during construction due to lack of access to emergency medical and fire vehicles, and

during operation due to increased homeless use and illegal activities in the area next to and behind the building.

- Loss of parking for residents' families and guests will isolate residents' homes from the City.

- The service drive, which is essential to replace the lost use of Pine Street when the grade of Alaskan Way and Pine Street is changed, will subject residents to noise and fumes at all hours, while also destroying the walkway in front of Waterfront Landings, which is a significant amenity of their homes.

None of those concerns are addressed by the SDEIS. All of them must be addressed.

When the City announced that it would be preparing a supplemental EIS, Waterfront Landings hoped that meant the City was finally going to take its comments seriously. So long as the City insists on raising the grade of Alaskan Way and Pine Street adjacent to Waterfront Landings, it is not clear that Waterfront Landings property owners can ever accept the project. Nonetheless, Waterfront Landings leadership met with the Waterfront Seattle staff to outline the minimum mitigation that would be necessary in order for Waterfront Landings' leaders to consider recommending acceptance of the project. None of the mitigation measures that they consider essential are included in the SDEIS.

Overlook Walk Alternative 2, replacing an expansion of the Seattle Aquarium for the unidentified user of the former Building C, which was just conceptual in the first place, is not a genuine alternative. So the EIS for this very public project considers no real alternative, other than "no action." The City has never considered any alternatives to the Corner Plan. We believe SEPA expects more from the City. While Waterfront Landings will likely prefer the Aquarium as a neighbor to whoever else might have occupied Building C, and the Aquarium is less likely to countenance as much of the uncivil behavior tolerated at Steinbrueck Park as would whoever is ultimately responsible for the Overlook Walk, Waterfront Landings still believes that the City must consider a genuine alternative that does not change the grade of Pine Street or Alaskan Way abutting Waterfront Landings.

The SDEIS gives only conclusory reasoning for why the City has not developed an alternative that moves the intersection of Alaskan Way and the Elliott Connector to Pike Street (or south of Pike Street if needed). *See* SDEIS at 2-11.

- It says that an intersection at the base of Pike Street would be elevated approximately five feet above ground level. That suggests that the natural location for the intersection is perhaps south of Pike Street, which is fine with Waterfront Landings. Presumably the project has both the existing Alaskan Way right-of-way and the existing SR 99 right-of-way to work with. There is no reason why the intersection can't be as far south as it needs to be so that the entire intersection is built on grade, which will be both cheaper to build and easier for vehicles, particularly trucks, to negotiate.[1]

- It says that the west crosswalk would increase in length from approximately 70 feet to 90 feet. While Waterfront Landings agrees that this is wide, it notes three things: First, a 90-foot crosswalk pales in comparison to the convoluted route that Waterfront Landings residents will be expected to take in order to reach the Pike Place Market and downtown Seattle if the Overlook Walk is built. Second, it is still ten feet shorter than the proposed crosswalk at South Washington Street under Main Corridor Alternative 1, where Pioneer Square residents would cross Alaskan Way to enjoy the restored historic Washington Street Boat Landing. The City cannot rule out a 90-foot-wide crosswalk as being too wide for pedestrian access, while imposing a 100-foot crosswalk on a key intersection in Pioneer Square. Third, the whole purpose of the Overlook Walk was to create a pedestrian route over Alaskan Way to fulfill the objective of reconnecting the city to its waterfront. If Overlook Walk is actually as effective in funneling all the people who want to get from downtown Seattle to the waterfront across the Overlook Walk as the project seems to expect, the crosswalk at Alaskan Way level underneath the Overlook Walk should not be too significant. We do not believe the design team has given meaningful thought to how people will actually move through the project, particularly people with limited mobility. But a 90-foot crosswalk is not an excuse to not consider a reasonable alternative in

[1] Every sketch the Waterfront Seattle staff has provided of moving the intersection of the Elliott Connector and Alaskan Way south to Pike Street has assumed that Elliott Connector and Alaskan Way must be a straight street going up the hill under the Pike Place Market, with Alaskan Way north of the intersection being relocated to bend east to intersect that new, straight street. That configuration relegates Alaskan Way north of the intersection to a minor side-street, and permanently damages the views for pedestrians walking south along Alaskan Way. It is not clear what motivates that destruction of Alaskan Way as the boulevard along the entire downtown waterfront – not just the portion of the waterfront adjacent to the new seawall. It may be a traffic engineer's effort to give primacy to maximizing the speed of traffic coming to and from Ballard/Magnolia; it may something else. But there is no reason why the Elliott Connector cannot come down to grade level, and there bend to intersect the existing path of Alaskan Way.

this project when a larger crosswalk is accepted as the norm in another part of the project.

Because the SDEIS simply refuses to consider an alternative that moves the intersection of Alaskan Way and Elliott Connector to the south, the SDEIS itself provides no basis for the public to understand whether that is reasonable or not. Waterfront Seattle staff has shown Waterfront Landings leadership two sketches of designs that would move the intersection to Pike Street. Both appear to be based on assumptions that are not valid.

The first is an assumption that trucks must be able to reach the Port of Seattle's cruise ship dock at Pier 67 from the north, coming down the Elliott Connector. Trucks cannot now reach Pier 67 from the north without crossing the railroad tracks at Broad Street, and once the project is built, they will still be able to reach Pier 67 the same way. The stated purpose of the Main Corridor (SDEIS at ES-2) is to "accommodate safe, efficient, and reliable travel between the south downtown area and Belltown." (emphasis added). While we believe the purpose of the Main Corridor is and should be much broader than that, that stated purpose is necessitated by the fact that the deep-bore tunnel does not have any entrance/exit comparable to the entrance/exit to the viaduct at the Pike Place Market. We understand that the Port might like the option that it does not now have of bringing trucks to Pier 67 from the north. But nothing requires that the desires of the Port be met to Waterfront Landings' detriment. At the very least, the desire of the Port for access it does not now have cannot be the basis to restrict the alternatives considered.

The second assumption seems to be that the "Main Corridor" is not Alaskan Way (both north and south of the Aquarium), with a new intersection of Alaskan Way where the Elliot Connector intersects with it. Rather, the traffic engineers seem to have assumed that since the stated "purpose" of the Main Corridor is to move traffic from Belltown to SoDo, the "Main Corridor" is a new street consisting of Alaskan Way south of the Aquarium and the new Elliott Connector, with Alaskan Way north of the Aquarium becoming the street that intersects the "Main Corridor."[2] Indeed, the City

[2] The DEIS stated the goals of the project as a whole as being: 1) create a waterfront for all, 2) put the shoreline and innovative, sustainable design at the forefront, 3) reconnect the city to its waterfront, 4) embrace and celebrate Seattle's past, present and future, 5) improve access and mobility (for people and goods), 6) create a bold vision that is adaptable over time, and 7) develop consistent leadership from concept to operations. DEIS at ES-1. The specific focus of each of the four components of AWPOW must be understood to be in that context and subject to those overarching objectives. The main corridor cannot focus on north-south throughput at the expense of the larger purposes of the project as a whole.

apparently intends to abandon nearly 50 feet of the existing Alaskan Way right-of-way so that the Aquarium Ocean Pavilion can be built on what is now Alaskan Way. The result will be a loss of one of the great views in Seattle, that experienced by pedestrians walking south from the Olympic Sculpture Park or one of the northern piers to the central waterfront.

The third assumption is that the City must create a public open space that it calls "Aquarium Plaza" in order to achieve its objectives for Waterfront Seattle. While we understand that the City would like all the open space it can get (whether or not it can maintain it), the removal of the Viaduct will enable creation of acres of additional public open space along the Promenade. The City already has Pier 62/63, which would be usable public open space. The City claims it has plans to rebuild it so that it is structurally sound concurrent with the next phase of the Seawall project adjacent to those piers, although where the money to do that is to come from has not been disclosed. The City has Waterfront Park, which it does not have money to rehabilitate. It has not explained how it will fund the maintenance and supervision required in order to keep the new public open spaces created by Waterfront Seattle from becoming overrun by the sort of antisocial behavior that has plagued Steinbrueck Park and other downtown open spaces. The City has many "gathering" spots, including but not limited to Westlake Park, Seattle Center, Myrtle Edwards Park, and the new South Lake Union Park. There is nothing essential about creating a public open space at "Aquarium Plaza" for Waterfront Seattle to achieve its purposes and objectives.

It appears that those three assumptions, or some variation on them, not only are the excuse for not considering moving the Elliott Connector to Pike Street or south of Pike Street, but also will restrict the Seattle Aquarium's expansion to only 48,000 square feet rather than the 76,000 square feet that its recently adopted master plan says it needs in order to achieve its long-term vision. By moving the Elliot Connector south, the Aquarium likely could have the additional building size it needs. Using the Aquarium's expansion's roof as public open space, as the Aquarium has proposed, is certainly a reasonable alternative to the jerry-rigged Aquarium Plaza provided by either Overlook Walk Alternative 1 or Alternative 2.

To have an adequate EIS, the City needs to consider an alternative that moves the intersection of the Elliott Connector to the south without regard to Port truck traffic to Pier 67, that continues the open space and transportation functions of Pine Street and Alaskan Way without alteration or intrusion, and that makes the Elliott Connector intersect into Alaskan Way at grade level. With those criteria in place, it then needs to determine whether the Aquarium expansion, south of existing Pine Street and

east of existing Alaskan Way, can be large enough to actually meet the Aquarium's long-term needs. If it can be, that would be a genuinely viable alternative. If the Aquarium expansion needs to extend into the Alaskan Way right-of-way in order to have enough space for its expansion needs, that intrusion should be as small as possible.

Because Waterfront Seattle has made not serious effort to show whether an alternative that moved the intersection of Alaskan Way with the Elliott Connector could be viable, Waterfront Landings asked a transportation engineer to see whether it was possible to move the intersection of Alaskan Way and Elliott Connector to Pike Street, while still leaving room for the Aquarium's Ocean Pavilion as it is presented in the SDEIS, and having the Overlook Walk incorporate the roof of the Ocean Pavilion and allow pedestrians to pass over Alaskan Way between the Pike Place Market and the Waterfront Park and the Aquarium. Attached is his work, demonstrating that it is indeed possible.[3] His work, like the sketches in the SDEIS, is schematic and undoubtedly requires further development. But it demonstrates that an alternative that reduces the harm to Waterfront Landings and produces better traffic planning for the City is entirely possible. The City should now develop that alternative to determine whether the Aquarium could get the space it actually needs for its expansion, and whether it could do so without intruding into the Alaskan Way right-of-way, so that the views of the City for pedestrians walking south on Alaskan Way from the Olympic Sculpture Park and the northern piers will be preserved.

This letter is restricted to commenting on the new alternatives presented in the SDEIS and the need for consideration of real alternatives. We want to emphasize that the SDEIS responds to none of Waterfront Landings' comments on the DEIS, and that those comments must receive a substantive response.

[3] He was forced to work with plans that were difficult to scale, as a result of which some of his dimensions make the Preferred Alternative seem less harmful than it actually is. Waterfront Landings will have a claim for damages against the City from raising the grade of Pine Street and Alaskan Way. That damage claim will include all the damages to access, damage to the canopy of the Viaggio Building Lobby if service and garbage trucks cannot negotiate the turn without hitting it, the loss of emergency access, as well as damages due to loss of light and air, light pollution from the strobe effect of vehicles on the raised highway, and noise, dust and contaminant pollution to units within the project.

Very truly yours,

MILLER NASH GRAHAM & DUNN LLP

AGREEMENT REGARDING AWPOW BETWEEN THE ALLIANCE FOR PIONEER SQUARE, THE CITY OF SEATTLE, WSDOT, AND KING COUNTY

RECITALS

A. The City of Seattle ("City") is the proponent of a series of contiguous projects, known as the Alaskan Way, Promenade, and Overlook Walk ("AWPOW") which are a series of public improvements extending from south of S. King Street on the south to Battery Street on the north, generally along Seattle's waterfront and including Alaskan Way.

B. The City is the lead agency for AWPOW, and in that capacity has issued a Final Environmental Impact Statement ("FEIS") on AWPOW dated October 31, 2016.

C. The City intends to pay for AWPOW through several sources of funding, one of which is a local improvement district ("LID"), through which it expects to raise up to $200 million from parties whose property receives "special benefit" from AWPOW.

D. Alliance for Pioneer Square ("Alliance") is a nonprofit organization leading the revitalization of Pioneer Square Historic District ("Pioneer Square"). It has filed an appeal of the adequacy of the FEIS to the City Hearing Examiner, contending that the FEIS is inadequate to meet the City's responsibilities under RCW ch. 43.21.C ("SEPA") on multiple grounds.

E. The Washington State Department of Transportation ("WSDOT") has intervened in the appeal of the FEIS to the Hearing Examiner. It is interested in AWPOW because Alaskan Way south of Colman Dock serves as State Route 519, provides access to the Seattle Ferry Terminal at Colman Dock, which is a WSDOT facility, and serves as one of two north-south freight routes through Seattle. In addition, WSDOT owns the property proposed as the location for the "Habitat Bench." WSDOT has also relied on the FEIS to sign Amendment No. 11 to GCB 1308, and has published a Notice of Action under SEPA of the signing of Amendment No. 11 to GCB 1308 ("Amendment 11"), relying on the FEIS for its compliance with SEPA in signing Amendment 11. Alliance has filed an action in King County Superior Court, Case No. 17-2-01514-8 SEA, challenging the validity of the State's action as described in the Notice of Action issued on December 21, 2016.

F. King County ("County") has intervened in the appeal of the FEIS to the Hearing Examiner. County has assumed the duties of the Metropolitan Municipal Corporation under RCW ch. 35.58, and operates bus transit service ("Metro") throughout King County. AWPOW includes the addition of two dedicated lanes for buses on Alaskan Way south of Columbia Street, on which Metro intends to run approximately 600 buses per day once the Alaskan Way Viaduct is removed. The combination of those transit lanes and turning lanes for vehicles waiting to

enter Colman Dock will result in Alaskan Way being between seven and eight lanes wide south of Yesler Way, adjacent to Pioneer Square.

G. City, WSDOT and County deny that the FEIS is inadequate. Without admitting any of the contentions of Alliance in its appeal to the Hearing Examiner, City, WSDOT and County are willing to take the following actions and make the following commitments, in consideration for Alliance dismissing its appeal of the adequacy of the FEIS before the Hearing Examiner and the suit challenging the validity of the State's actions described in WSDOT's Notice of Action and agreeing not to file any additional appeals related to AWPOW.

H. Sound Transit is currently in the process of designing and implementing a group of projects known as "ST 3." One component of ST 3 is extension of Link Light Rail to West Seattle. When the extension of Link Light Rail to the Alaska Junction Station in West Seattle is completed and open to service, Metro expects that its need to operate buses on Alaskan Way and Columbia Street west of Third Avenue will be significantly reduced.

I. The Port of Seattle, while not a party to this Agreement, is providing funding for the Alaskan Way Viaduct Replacement Program, which includes the improvements to Alaskan Way that are being constructed as part of AWPOW, pursuant to an agreement executed on August 27, 2013. Under this agreement, WSDOT has committed to ensuring that the Alaskan Way Viaduct Replacement Program will be designed and constructed to facilitate efficient movement of freight and other traffic on the west corridors of the Seattle transportation system between the Duwamish Waterway and the Ballard-Interbay neighborhoods.

J. The Alliance, the City, WSDOT and County (the Parties) are entering into this Agreement to fully resolve any dispute over the adequacy of the AWPOW FEIS.

AGREEMENT

I. Construction Mitigation and Immediate Changes to AWPOW

1. The City and the State agree to allow public access to the "Habitat Bench" as generally depicted in Figure 2-3 of the FEIS in accordance with a construction easement and future lease agreement between the City and State. Access will be available to members of the public during operating hours established by the Seattle Department of Parks and Recreation, through a gate that will be built as part of the Habitat Bench immediately north of the Washington Street Boat Landing depicted on Figure 2-3 of the FEIS. The City will be responsible for maintaining public access to the Habitat Bench. The City and the State will negotiate the timing and responsibility for construction of the Habitat Bench, but agree to make it accessible to the public by the end of 2022. "Operating hours" for the Habitat Bench will generally be the same as for other city parks for which the Seattle Department of Parks and Recreation establishes operating hours and hours

of closure, but not less than sunrise to sunset. The City and State, in collaboration with the Alliance, agree to work together to establish an operating plan for the Habitat Bench, which must meet the Seattle Ferry Terminal's public safety and security requirements, and that will address operating hours and other considerations.

The City, State, and Alliance further agree that public access to the Habitat Bench will not cause the Habitat Bench to be treated as a public recreational facility for the purposes of section 4(f) of the Transportation Act, 23 U.S.C. §138, and that the Habitat Bench will be developed as a joint development, as set out in 23 C.F.R. §774.11(i).

2. The City will increase funding for east/west connections in Pioneer Square from approximately $12M to a total of $20M. The Parties recognize that the future source of this additional funding will be the proposed Waterfront LID, which will be subject to more review and input from stakeholders in Pioneer Square and elsewhere in Center City and will require approval of the Seattle City Council. The additional funding will be used to implement pedestrian improvements, of like kind to those planned for S. Washington Street and S. Main Street and described in Section 2.3.4 of the FEIS, to Yesler Way, S. Main Street, S. Washington Street and S. King Street, and will extend from Alaskan Way to Second Avenue, to the extent feasible. The City and Alliance, with input from the neighborhood stakeholders, will collaboratively analyze on a block by block basis how to best leverage city dollars with planned private investment so as to maximize the benefit of those street improvements to Pioneer Square as a whole. The City and Alliance acknowledge that historic preservation requirements related to the preservation/reconstruction of areaways could significantly add to the cost of these improvements and will work together to address that issue.

3. Beginning 6 months prior to the anticipated start of waterfront construction until the end of significant construction of AWPOW, City will pay to Alliance $75,000 annually, pro-rated as appropriate, to allow Alliance to fulfill construction coordination and communication functions in collaboration with public partners. The Alliance will provide status reports at reasonable intervals and containing relevant information, as agreed to by the Alliance and the City and memorialized in a memorandum of agreement. This support is intended to ensure an effective interface between the City, WSDOT and County, on the one hand, and property owners and tenants within Pioneer Square, on the other hand, to help ensure that construction of AWPOW does not render properties within Pioneer Square inaccessible or uninhabitable for their usual purposes, and to minimize the construction impacts on owners and tenants and their customers within Pioneer Square. For purposes of this Section I.3 and Section I.4, below, the "end of significant construction" shall be the date on which all construction of Alaskan Way and the east/west connections improvements described in Section I.2 above has been completed (other than improvements which based on the process in Section I.2 the Parties decide will be implemented by adjacent private properties), and all restrictions on any streets within Pioneer Square due to construction of AWPOW have been eliminated.

4. From the start of waterfront construction until the end of significant construction of AWPOW, the City and State will fund the extension of existing low-rate parking agreements with off-street parking operators at the First and Columbia and Butler Garages that acquire the right for short-term parkers to park off-street at the City's on-street parking rate. The City, State, and Alliance recognize that meeting this commitment is contingent on reaching reasonable terms with these parking operators generally consistent with existing low-rate parking agreements. For purposes of this provision, "short term" parking is parking for 4 hours or less.

5. Until ST 3 reaches the Alaska Junction Station (or if final design changes the plan as presented to voters in 2016, to the nearest station to what was shown as the Alaska Junction Station in 2016), Metro estimates that it will operate not more than 650 buses per day on Alaskan Way south of Columbia Street, provided, however, that when the City of Seattle has completed the Lander Street Overpass, the Parties and other stakeholders, including the Port of Seattle, will convene to review travel time and reliability data since the opening of the SR 519/Alaskan Way surface street as part of AWPOW. This data will be used to look for possible opportunities for route adjustments and improvements and the Parties may make recommendations to the County Executive, Mayor, and City Council. Any route adjustment or improvements will be subject to King County Code Section 28.94.020 as currently adopted or hereafter amended.

II. Final Conditions

1. When the extension of Sound Transit Light Rail to the West Seattle Alaska Junction Station (or, if final design changes the plan as presented to voters in 2016, to the nearest station to what was shown as the Alaska Junction Station in 2016) is completed and open to service, Metro will, subject to King County Code Section 28.94.020 as currently adopted or hereafter amended, reduce bus volumes on Alaskan Way south of Columbia Street and on Columbia Street, west of Third Avenue, to not more than 195 buses per day, or 30% of the currently estimated total of 650 trips per day. Upon commencement of the Sound Transit Light Rail operations to West Seattle, the Parties and other stakeholders, including the Port of Seattle, will convene to evaluate the corridor's overall function along with the location of bus stops and signage, along the SR 519/Alaskan Way surface street and Columbia Street, and may make recommendations to the appropriate governing bodies or executives regarding opportunities for adjustments and improvements.

2. Within fifteen (15) months of the opening of the Alaska Junction Station of Sound Transit Light Rail service to West Seattle, the City will retrofit SR 519/Alaskan Way between Yesler Way and South King Street to narrow Alaskan Way by eliminating the transit lane on each side of Alaskan Way, and converting the area of the former transit lane to sidewalks, landscaping, and on-street parking identified in the FEIS or other uses (Alaskan Way Retrofit), subject to approval by WSDOT for the sections of the roadway that are within the SR 519 right-of-way, and taking into account the recommendations made under paragraph II.1. The Alaskan Way retrofit shall generally conform to the "Future 2030 5/6 Lane Configuration" shown on two

sets of plans titled "Southend Alaskan Way 2030 Narrowing Concept," attached hereto as Exhibit A. The Alaskan Way Retrofit will be funded by the City and will require final budget authorization by the Seattle City Council for the Alaskan Way Retrofit at that time. The Alliance, the State, and the City will review the planned placement of street trees on the east and west side of Alaskan Way as part of AWPOW to ensure they do not conflict with this commitment. Beginning up to 5 years prior to the scheduled opening of Sound Transit Light Rail service to West Seattle, the City will work with WSDOT, the Port of Seattle, the Alliance, and Pioneer Square property owners and tenants on the design of the final configuration of Alaskan Way, generally consistent with the final configuration shown on Exhibit A.

3. Once the Alaskan Way Retrofit described in Section I.2 above is completed, and taking into account the recommendations from Section II.1, the City will allow general purpose traffic movement on Columbia Street in both directions, between Alaskan Way and Third Avenue, to facilitate local access and will maximize opportunities to restore parking, loading and building access that were reduced as part of changes directing Metro buses onto Columbia Street.

III. Effective Date and Dismissal of Appeals of FEIS

1. This "Agreement Regarding AWPOW" ("Agreement") will be ratified by ordinances passed by the Seattle City Council and signed by the Mayor of Seattle, and by the King County Council and signed by the King County Executive. The form of the ordinances will be approved by the Seattle City Attorney, the King County Prosecuting Attorney's Office and counsel for Alliance prior to their adoption. The Effective Date of this Agreement will be the date when the last of the actions required by this Section III.1 has occurred.

2. From the date this Agreement is signed by all Parties until the Effective Date, all proceedings before the Seattle Hearing Examiner or in Superior Court will be stayed. Within two business days following the Effective Date of the Agreement, Alliance will move to dismiss its appeal to the City Hearing Examiner of the adequacy of the FEIS, and will move to dismiss King County Cause No. 17-2-01514-8 SEA.

IV. SEPA Compliance

1. Alliance stipulates and agrees that so long as the LID, if formed, includes the funding and improvements generally described in Section I.2, above, the Alliance will support having costs associated with implementing those provisions included in the LID, and work with other Center City stakeholders to advocate for their inclusion in the LID.

2. Alliance stipulates and agrees that the changes in AWPOW called for by this Agreement, including the additional investments in east/west connections called for in Section I.2 above, will

have no significant adverse impact on the environment and that it will take no steps to challenge any amendment to AWPOW that is consistent with this Agreement based on SEPA.

V. Miscellaneous Provisions

1. This Agreement may be signed in counterparts.

2. This Agreement may be amended by the Parties so long as all Parties agree to the amendment in writing.

3. Nothing in this agreement supersedes WSDOT's responsibilities under state law, including Title 47 RCW. If any portion of this Agreement is found to be invalid or unenforceable, the remainder shall be valid and enforceable so long as the overall purpose of the Agreement can be achieved.

4. The Parties agree that they will comply with their obligations under this Agreement. Should any party fail to comply with their obligations, the others will have no adequate remedy in damages and will be entitled to an injunction cnforcing this Agreement.

5. Alliance agrees that it will not file any local, state, or federal administrative appeal, state or federal judicial appeal, or any appeal or lawsuit of any other kind challenging any governmental permit or approval related to AWPOW, unless there is substantial modification to AWPOW as it is currently proposed and described herein. The parties agree to negotiate in good faith to amend the terms of this Agreement, as needed, to address any issues related to any substantial modification. Any opposition, shall be limited to the impacts associated with any substantial modification. For purposes of this paragraph, "substantial modification" does not include modifications reasonably required or necessary to implement the purposes of this Agreement. Notwithstanding the foregoing, Alliance shall be entitled to take any administrative or legal action it deems appropriate or necessary to enforce the terms of this Agreement.

AGREEMENT REGARDING AWPOW BETWEEN THE SEATTLE HISTORIC WATERFRONT ASSOCIATION, THE CITY OF SEATTLE AND WSDOT

RECITALS

A. The City of Seattle ("City") is the proponent of a series of contiguous projects, known as the Alaskan Way, Promenade, and Overlook Walk ("AWPOW") which are a series of public improvements extending from south of S. King Street on the south to Battery Street on the north, generally along Seattle's waterfront and including Alaskan Way.

B. The City is the lead agency for AWPOW, and in that capacity has issued a Final Environmental Impact Statement ("FEIS") on AWPOW dated October 31, 2016.

C. Seattle Historic Waterfront Association ("SHWA") is a nonprofit organization whose members are the owners of the four privately-owned historic landmark piers along Seattle's central waterfront and the businesses that operate within and alongside those piers. SHWA has filed an appeal of the adequacy of the FEIS to the City Hearing Examiner, contending that the FEIS is inadequate to meet the City's responsibilities under RCW ch. 43.21.C ("SEPA") on multiple grounds.

D. The Washington State Department of Transportation ("WSDOT") has moved to intervene in the appeal of the FEIS to the Hearing Examiner. It is interested in AWPOW because Alaskan Way south of Colman Dock serves as State Route 519, and as access to Colman Dock, which is a WSDOT facility. WSDOT has also relied on the FEIS to sign Amendment No. 11 to GCB 1308, and has published a Notice of Action under SEPA of the signing of Amendment No. 11 to GCB 1308 ("Amendment 11"), relying on the FEIS for its compliance with SEPA in signing Amendment 11.

E. King County ("County") has filed a motion to intervene in the appeal of the FEIS to the Hearing Examiner. County has assumed the duties of the Metropolitan Municipal Corporation under RCW ch 35.58, and operates bus transit service ("Metro") throughout King County.

F. City, WSDOT and County deny that the FEIS is inadequate. Without admitting any of the contentions of SHWA in its appeal to the Hearing Examiner, the City and State are willing to take the following actions and make the following commitments, in consideration for SHWA dismissing its appeal of the adequacy of the FEIS before the Hearing Examiner and any judicial appeal of the FEIS and agreeing not to file any additional appeals related to AWPOW.

AGREEMENT

1. **Circulator Shuttle**. The City will work in good faith to establish a partnership to bring into operation a circulator shuttle connecting the waterfront, Seattle Center and Pioneer Square/Stadiums. The goals will be to have this service build on existing services such as the

Emerald City Trolley, to mitigate AWPOW construction and to operate through the end of AWPOW construction, annually between Mother's Day and Halloween. The goals will be for the circulator service to operate on a published schedule with not more than 10 minute headways, to accept Orca cards as payment; to have the vehicles be open air, attractive, and fun for riders; and to set rates to be reasonable and encourage ridership. Exact details of service plan, timing and routes, fare structure and operations will be developed in consultation with waterfront businesses and an operator, to be determined.

Within 60 days following conclusion of the first season of service, the parties will meet to evaluate the effectiveness of the circulator shuttle in encouraging visitors to the Waterfront to use existing parking or transit facilities that are more than one block east of Alaskan Way and will work with the Shuttle operator to make modifications as needed.

2. **Construction Coordination and Mitigation.** Beginning 6 months prior to the start of construction of AWPOW until the completion of construction of AWPOW, the City will pay to SHWA $150,000 per year, pro-rated as appropriate, to allow SHWA to fulfill construction coordination and communication functions in collaboration with public partners, functions typically fulfilled by SDOT's outreach team. Such coordination and communication expenditures may include the following:

- Hiring a construction coordinator to walk the site several times daily and nightly, including weekends, to assure that public access to all businesses is maintained, is safe for the public, is ADA accessible, and is appropriately lighted with readable and effective signs. The construction coordinator will act as a liaison with the City and SHWA members to solve any problems created by the construction of AWPOW. The City maintains its sole authority in directing the City's contractor.
- In coordination with the City, funding mitigation activities including, but not limited to, providing information to visitors that the Waterfront is open and an attractive destination during construction, educating visitors as to how to access the Waterfront during construction, including how to ride transit and use Downtown SeattleParking.com, making the Waterfront more attractive to visitors in spite of the disruptions created by construction, and encouraging visitors to come back to the Waterfront after construction is concluded.

SHWA will provide status reports at reasonable intervals and containing relevant information, as agreed to by SHWA and the City and memorialized in a memorandum of agreement identifying SHWA's scope of work, activities, and allowable expenditures. The City agrees to work cooperatively with SHWA's construction coordinator to minimize interference with the accessibility and attractiveness of SHWA members' businesses and property during AWPOW construction.

3. **Parking mitigation**

Interim Parking Mitigation. From the date of execution of this agreement through completion of AWPOW construction, the City and State will fund the extension of existing low-rate parking agreements with off-street parking operators whose parking stall counts are as follows: HillClimb Court Garage (146 total stalls, 40 available at low rates), Watermark Garage (122 total

stalls, 30 available at low rates), and First and Columbia Garage (695 total stalls, 50 available at low rates) that acquire the right for short-term parkers to park off-street at the City's on-street parking rate. The parties recognize that this commitment is contingent on reaching reasonable terms with these parking operators generally consistent with existing low-rate parking agreements. For purposes of this provision, "short term" parking is parking for 4 hours or less.

Permanent Short-term Parking. The parties recognize that the City has invested $34M in Pike Place Market's Marketfront project, in part to create 300 new permanent short-term parking stalls at the Market (526 total stalls), directly accessible to the waterfront from Alaskan Way for a 50 year duration. In addition, City will advance up to $4.6M in additional funding for permanent short-term parking on the Central Waterfront, subject to approval by the Seattle City Council, to supplement $6M in available WSDOT funds as part of their parking mitigation program. The parties agree that the first priority for these funds is to acquire the long-term rights to short-term parking at the Gonzaga property on Alaskan Way at Spring and Seneca Streets. If that opportunity fails, the City and State will pursue other opportunities within the district, will look at opportunities along the shuttle route with waterfront businesses. The City and State agree that these funds will remain available for other parking opportunities through to opening of the new SR99 tunnel. As part of any agreement for short-term parking, the City and State will ensure that any such parking is short term parking available for a fixed duration at the same rates as the City's on-street parking.

4. **Maximizing on-street parking during construction.** From the completion of the Elliott Bay Seawall Project Box 1 construction until the beginning of AWPOW construction, the City will work with SHWA to make interim on-street parking available in front of the Seattle Aquarium to the extent feasible, recognizing the need for the Pier 62 contractor to have reasonable staging area and access to the site for construction vehicles which will use this area at certain times. During AWPOW construction, the City shall maximize, to the extent feasible, the number of on-street parking spaces available to visitors to the Central Waterfront on the east-west streets intersecting Alaskan Way that do not connect through to Western Avenue (i.e., Seneca and Union) and on Alaskan Way north of Pier 63 to Bell Street. The City will not permit long-term school bus layover along the waterfront during this period.

5. **Consideration of the proposed Gondola from Sixth Avenue to Waterfront Park.** The proponents of the Gondola Proposal may continue to pursue a term permit and the City will consider that proposal as provided by Seattle Municipal Code Chapter 15.65. Ultimate decisions about the Gondola Proposal will be made by the City Council after completion of a SEPA process, including an environmental impact statement (EIS). The Pier 57 owners shall bear the cost of the EIS and shall be allowed to prepare the preliminary draft of the EIS for City review and revision. The City and the Pier owners will mutually agree on a consultant to prepare the preliminary draft. The City may hire such consultants as necessary to assist in the City review of the preliminary draft and any revisions. Those costs shall be borne by the Pier 57 owners.

6. **Uses and tenants of future waterfront kiosks.** If the kiosks located in front of Pier 57, between Pier 55 and 56, and between Pier 54 and 55, described on p. 2-22 of the FEIS are constructed, the City or other entity managing those kiosks, shall review any proposed tenants

and uses of the kiosks or adjacent properties with the SHWA members whose properties are immediately adjacent to those kiosks to seek complementary adjacent uses. This requirement shall not apply to the kiosk located at the foot of Union Street, in front of Pier 59.

7. **LID special benefit assessment**. The City agrees to meet with SHWA members prior to formation of the LID, to discuss LID special benefit assessment, including methodology and deferments and exemptions established by State law.

8. **Dismissal of appeals.** Within two business days following the date the Agreement has been signed by all parties to the Agreement, SHWA will move to dismiss its appeal to the City Hearing Examiner of the adequacy of the FEIS, and will move to dismiss any judicial appeal of the WSDOT Notice of Action or the FEIS.

9. **SEPA compliance.** SHWA stipulates and agrees that changes in AWPOW called for by this Agreement will have no significant adverse impact on the environment and that it will take no steps to challenge any amendment to AWPOW that is consistent with this Agreement based on SEPA.

10. This Agreement may be signed in counterparts.

11. If any portion of this Agreement is found to be invalid or unenforceable, the remainder shall be valid and enforceable so long as the overall purpose of the Agreement can be achieved.

12. The parties agree that should SHWA comply with its obligations under this Agreement but the City, fail to comply with their obligations, SHWA will have no adequate remedy in damages and will be entitled to request an injunction enforcing this Agreement, in addition to such damages as may be proven.

13. This Agreement may be amended by the Parties so long as all Parties agree to the amendment in writing.

14. SHWA agrees that it will not file any local, state, or federal administrative appeal, state or federal judicial appeal, or any appeal or lawsuit of any other kind challenging any governmental permit or approval related to AWPOW, unless there is substantial modification to AWPOW as it is currently proposed and described herein. The parties agree to negotiate in good faith to amend the terms of this agreement, as needed, to address any issues related to any substantial modification. Any opposition shall be limited to the impacts associated with any substantial modification. For purposes of this paragraph, "substantial modification" does not include modifications reasonably required or necessary to implement the purposes of this agreement. Notwithstanding the foregoing, SHWA shall be entitled to take any administrative or legal action it deems appropriate or necessary to enforce the terms of this agreement.

AGREEMENT WITH WATERFRONT LANDINGS OWNERS ASSOCIATION REGARDING AWPOW

RECITALS

A. The City of Seattle ("City") is the proponent of a series of contiguous projects, known as the Alaskan Way, Promenade, and Overlook Walk ("AWPOW") which are a series of public improvements extending from south of S. King Street on the south to Battery Street on the north, generally along Seattle's waterfront and including Alaskan Way.

B. The City is the lead agency for AWPOW, and in that capacity has issued a Final Environmental Impact Statement ("FEIS") on AWPOW dated October 31, 2016.

C. Waterfront Landings Owners Association ("Association") is the homeowners association for Waterfront Landings, a 232-unit residential condominium community fronting on Alaskan Way between Pine and Lenora Streets. The Association believes Waterfront Landings will be directly impacted by AWPOW. Owners have filed an appeal of the adequacy of the FEIS to the City Hearing Examiner, contending that the FEIS is inadequate to meet the City's responsibilities under RCW ch. 43.21C ("SEPA") on multiple grounds. It has also filed a lawsuit in King County Superior Court, Cause No. 17-2-01517-2-SEA, challenging the Notice of Action published by the Washington State Department of Transportation ("WSDOT") in reliance on the FEIS (the "Lawsuit").

D. WSDOT has issued a Notice of Action under SEPA relying on the FEIS for its signature on Amendment No. 11 to GCB 1308, a contract between WSDOT and the City in which WSDOT agrees to pay the City to complete the design of AWPOW. WSDOT intervened in the appeal of the FEIS to the Hearing Examiner. King County ("County") has also intervened in the appeal of the FEIS to the Hearing Examiner.

E. City, WSDOT, and County deny that the FEIS is inadequate. Without admitting any of the contentions of the Association in its appeal to the Hearing Examiner, are willing to take the following actions and make the following commitments, in consideration for Owners dismissing its appeal of the adequacy of the FEIS before the Seattle Hearing Examiner and its Lawsuit.

F. The owners of homes within Waterfront Landings are intended third-party beneficiaries of this Agreement.

AGREEMENT

I. Pedestrian Safety and Vehicular and Bicycle Signal Controls

1. Prior to completion of AWPOW, the City will evaluate the addition of pedestrian crossing signals on the east side of Alaskan Way to the 3-way stop light and pedestrian crosswalk signage at the intersection of Lenora Street and Alaskan Way, based on the traffic signal warrants specified in the most current version of Chapter 4C of the Federal Highway

Administration's Manual on Uniform Traffic Control Devices (Chapter 4C). The City will install these improvements to the extent warranted under Chapter 4C, as determined by the City Traffic Engineer under SMC 11.16.340.

2. The City will evaluate installation of a bicycle signal at Pine Street and/or Lenora Street, based on the most current editions of the Interim Approval for Optional Use of a Bicycle Signal Face (1A-16) (or as finalized by FHWA) ("Interim or Final Guidance") and the Federal Highway Administration's Manual on Uniform Traffic Control Devices, which are used to determine where bicycle signals are warranted. The City will install this improvement to the extent warranted under the Interim or Final Guidance, as determined by the City Traffic Engineer under SMC 11.16.340.

3. One year after completion of the rebuilt Alaskan Way and Pine Street Extension, the City will evaluate the traffic safety and function of Alaskan Way from Pine Street to Wall Street, including pedestrian, bicycle, and vehicular safety. The City will solicit input from the Association and from Waterfront Landings residents about their experience, and will install monitoring equipment if needed to fully evaluate conflicts and hazards. The City will implement modifications to its signage and signals if warranted as determined by the City Traffic Engineer considering all the input he has received, and applying the same standards as were used to install pedestrian signals at the intersection of Alaskan Way and Lenora Street, Alaskan Way and Bell Street extended. or Alaskan Way and Blanchard Street extended.

II. Waterfront Landings Access and Security

1. The City will sign curb space in front of Waterfront Landings at 1950 Alaskan Way for a loading zone for Federal Express, the U. S. Postal Service, UPS and other delivery services or for other load/unload uses as defined by the most current City standards.

2. The City will install "No Outlet" or "Local Access Only" (yellow diamond) signage at both service road entrances from Alaskan Way.

3. The City will obtain written confirmation from the Fire Department that the design of the service road is consistent with Seattle Fire Marshall requirements for public projects. The City will implement this design without requiring any change to the canopy at the entrance to the Viaggio Building.

4. The City will provide adequate space for a passenger vehicle to turn around on the service road at the south end of Waterfront Landings where the service road accesses the building parking.

5. The City will review the design of the service road where it makes the turn from north/south to east/west at the south end of the Viaggio Building, and will include measures to ensure protection of private property. This may include installation of bollards or other forms of protection if needed to provide adequate separation of traffic from the building.

6. The City will provide a loading zone on the north side of the service road next to the south side of the Viaggio Building, which it will sign for "load/unload" parking only.

7. The City will ensure that the right of way area behind the Waterfront Landings buildings underneath the new Elliott Way is fenced and secured in a manner that is designed and intended to prevent unauthorized access; ensure that the City and Association and its service providers have access to the area; and prohibit unauthorized access. The components of that fencing and security will include:

a. The City will install a secured gate between the service road and the area behind Waterfront Landings, such that the area can be accessed by the City, emergency vehicles, trash and recycling collection, Waterfront Landings deliveries, Waterfront Landings moving and delivery trucks, other Waterfront Landings service providers, and Waterfront Landings guests and staff. The City will provide gating and access capabilities, at no charge to the Association, and will exclude unauthorized access. This fencing and gate will be of a character and quality that is mutually agreed upon by the Parties.

b. The City will ensure that the fencing is designed and intended to prevent it from being cut or climbed by trespassers attempting to enter the area by crossing the Burlington Northern railroad tracks or other public right of way. The area to remain fenced will be as generally depicted on Exhibit A or as modified based on mutual agreement. The City will post "No Trespassing" signs along this fencing. The City will install lights in the fenced area to ensure the area is well-lit and discourages unauthorized entry and activity.

c. The plans for the fencing, lighting, and signage will be reviewed with the Association for its approval.

d. The City will install continuous asphalt paving throughout the fenced area. It will assign space within the fenced area for dumpster storage and garbage truck access.

III. Street Use Permit

1. Upon completion of construction of the service road and the other improvements described in Section II of this agreement and the filing of a complete application by the Association, the City agrees to issue a Street Use Permit, pursuant to SMC 15.04, for the miscellaneous use of the right-of-way identified on Exhibit A, as conditioned to maintain emergency and city access, maintenance of utilities, and otherwise comply with SMC Title 15. The Association agrees to pay the associated annual fee, identified as use code 14 in the Street Use Fee Schedule, Attachment A to Ordinance No. 123477 or successor provision, and any associated administration or processing fees. Additional uses will be allowed under the permit for no fee, including planting strip beautification, removal of underbrush from unimproved right-of-way, and other activities identified on the Fee Schedule that have value to the general citizenry.

IV. Visual Mitigation

1. The City will install a decorative wall (tile, stamped concrete, or other decorative materials) on the north-facing wall of the Pine Street Connector. The Association and the City will agree on the design. The landscaped planters shown in earlier designs will be replaced with this solution.

V. Construction Mitigation

1. The City will provide adequate emergency vehicle access to Waterfront Landings. Access during periods when Alaskan Way is closed will be across the construction site. The construction contractor will be obligated to make such access available at all times.

2. The City will monitor noise within the Viaggio Building during construction where residences receive noise from Alaskan Way and the waterfront, will include this requirement in the terms and conditions of any noise variance obtained by the City, and will encourage its contractor to minimize any night-time and early morning noise that may exceed normal limits. The Association agrees to allow the City and its contractors free access to the building to install monitoring equipment.

3. The City will require its construction contractor to install settlement monitoring equipment on Waterfront Landings buildings and the Association agrees to allow the City and its contractors access to the building upon reasonable notice to install the monitoring devices. The Association may report any settlement or cracking damage that it believes has occurred as a result of the construction of AWPOW, and the City will hold the contractor responsible for any damage deemed to have been caused by the contractor's work on the project.

4. The City will maintain communication with the Association during and after construction of AWPOW and will meet with the Association one year after the completion of construction to evaluate any security concerns, and in coordination with the Association will work in good faith to address any security concerns that are a direct result of modifications due to the project.

5. All parties recognize that it is the City's responsibility to operate public rights-of-way to ensure the public's safety and best serve the transportation needs of the city as a whole. If at any time any of the provisions of this Agreement within the jurisdiction of the City Traffic Engineer are deemed in need of modification in order to meet that responsibility, the parties agree to work in good faith to agree on modification. The parties acknowledge that ultimately the City Traffic Engineer has the right to make needed modifications on public rights-of-way. The parties agree, however, that if such modifications reduce the safety or security of Waterfront Landings residents, the City will consider additional mitigation to address those reductions in safety and security.

VI. Dismissal of Appeals of FEIS

1. Within two business days following the signing of the Agreement by all parties, the Association will move to dismiss its appeal to the City Hearing Examiner of the adequacy of the FEIS, and will move to dismiss the Lawsuit.

VII. Miscellaneous Provisions

1. This Agreement may be signed in counterparts.

2. If any portion of this Agreement is found to be invalid or unenforceable, the remainder shall be valid and enforceable so long as the overall purpose of the Agreement can be achieved.

3. The parties agree that they will comply with their obligations under this Agreement. Should any party fail to comply with their obligations, the others will have no adequate remedy in damages and will be entitled to an injunction enforcing this Agreement.

4. This Agreement may be amended by the Parties so long as all Parties agree to the amendment in writing.

5. The Association agrees that it will not file any local, state, or federal administrative appeal, state or federal judicial appeal, or any appeal or lawsuit of any other kind challenging any governmental permit or approval related to AWPOW, unless there is substantial modification to AWPOW as it is currently proposed and described herein. The parties agree to negotiate in good faith to amend the terms of this agreement, as needed, to address any issues related to any substantial modification. Any opposition, shall be limited to the impacts associated with any substantial modification. For purposes of this paragraph, "substantial modification" does not include modifications reasonably required or necessary to implement the purposes of this agreement. Notwithstanding the foregoing, the Parties shall be entitled to take any administrative or legal action it deems appropriate or necessary to enforce the terms of this agreement. This Agreement does not affect the rights of individual unit owners or Association to bring suit for inverse condemnation or damages related to the change of the grade of Pine Street or to oppose the proposed Local Improvement District, including any special assessment of their property.

All named plaintiffs (collectively "Plaintiffs") hereby serve the City of Seattle with these written Interrogatories and Requests for Production pursuant to Washington Civil Rules 26, 33 and 34. Space has been provided for your answer immediately below each Interrogatory and Request for Production. If the space provided is insufficient, please attach additional pages as necessary.

GENERAL RULES

The original copy of these Interrogatories & Requests for Production has been served upon you. After you have completed your answers, the completed and verified original should be returned to the offices of Plaintiffs' attorneys, Schlemlein Fick & Scruggs, PLLC, at 66 S. Hanford St., Suite 300, Seattle, Washington, 98134. PLEASE ANSWER FULLY, VERIFY, AND RETURN THE COMPLETED INTERROGATORIES AND REQUESTS FOR PRODUCTION WITHIN THIRTY (30) DAYS OF THEIR SERVICE UPON YOU. ANY FAILURE TO COMPLY WITH THESE REQUIREMENTS MAY SUBJECT YOU TO SANCTIONS, PURSUANT TO CIVIL RULE 37, INCLUDING EXCLUSION OF EVIDENCE FAVORABLE TO YOU, JUDGMENT BY DEFAULT AGAINST YOU, AND AN AWARD, REQUIRING YOU TO PAY DEFENDANT'S EXPENSES, INCLUDING ATTORNEY FEES.

You have a duty to supplement your answers to the Interrogatories and Requests for Production imposed by Rule CR 26(e) throughout the duration of this case. IF AND WHEN YOU OBTAIN ANY INFORMATION OR DOCUMENTS RESPONSIVE TO ANY QUESTION HEREIN, THE AFFECTED ANSWER(S) SHALL BE DEEMED NO LONGER TRUE, AND YOUR FAILURE PROMPTLY TO SUPPLEMENT OR AMEND SUCH ANSWER(S) SHALL BE DEEMED IN SUBSTANCE A KNOWING CONCEALMENT. THIS DUTY EXTENDS TO ANY ANSWER SUPPLIED PURSUANT TO CR 33(c), WHICH MUST BE SUPPLEMENTED OR AMENDED UPON ANY CHANGE IN THE RECORDS INVOLVED, INCLUDING THE CREATION OR RECEIPT OF ANY NEW RECORD WHICH WOULD HAVE BEEN SPECIFIED HAD IT EXISTED AT THE TIME YOU ANSWERED.

FACSIMILE: +1 206 623 7022

Any objection to these Interrogatories or Requests for Production must set forth the specific factual and legal basis of the objection, with particularity, in lieu of (or in conjunction with) your answer and must be signed by the Person making the objection. Objections not specifically asserted are waived. Each objection based upon privilege must specify the grounds thereof and Identify the specific document(s) or information by date, author, recipient, and general subject matter. The Civil Rules require that you provide all information and documents responsive to the Interrogatory or Request for Production that does not fall within your claim of privilege.

GENERAL OBJECTIONS

Defendant City of Seattle ("City") provides the following general objections to Plaintiffs' Fourth Set of Interrogatories and Requests for Production (the "Fourth Discovery Requests"), which are incorporated into each specific Answer or Response set forth below:

1. The City objects to the Fourth Discovery Requests to the extent they attempt to impose any greater obligation on Defendant than is required under the Washington Superior Court Civil Rules, King County Superior Court Rules, and applicable case law.

2. The City objects to the Fourth Discovery Requests to the extent they seek information protected from discovery by the attorney-client privilege, work product doctrine, or any other applicable privilege under statutory, constitutional, or common law. The City will not produce any privileged information in response to the Fourth Discovery Requests, and any inadvertent production of such information is not intended to be and shall not be deemed as a waiver of these privilege(s). The City and Plaintiffs have agreed to appropriate non-waiver language under Evidence Rule 502 in the context of an Agreed Order on Pretrial Conference, filed with the Court on January 8, 2020.

The City also objects to the Plaintiffs' requests for production of documents to the extent they purport to require the preparation of a privilege log that is inconsistent with the City's obligations under the Washington Superior Court Civil Rules. Specifically, the City objects to Plaintiffs' demand that, for each privileged document identified, the City include "a *precise*

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

description of the place in which the document is kept, including the title or description of the file in which said document may be found and the *exact location* of such file," as well as four distinct date fields (the date it was prepared, the date it bears, the date it was sent, and the date it was received) (emphasis added). Not only is the italicized language vague and ambiguous, but such levels of specificity are neither required under the rules nor reasonable in light of the data volumes in this matter. CR 26(b)(1). Moreover, the City objects to the extent that Plaintiffs' Requests for Production purport to require the City's privilege log to identify files as they were maintained in the ordinary course of business, as well as by the specific Request or Requests to which the document is responsive. Such redundancy is not required nor appropriate. The City will meet and confer with the Plaintiffs regarding the appropriate formats for the parties' respective privilege logs that satisfies their obligations under the Civil Rules to provide sufficient information for the adverse party to evaluate each claim of privilege, while balancing reasonableness and proportionality considerations in light of the efficient administration of justice.

Finally, the City will only log documents in its privilege log until February 27, 2019, the date upon which Plaintiffs filed their original complaint in this matter.

3. The City objects to the Fourth Discovery Requests to the extent they seek information or documents that are available from other sources that are equally available to the Plaintiffs, more convenient, less burdensome, or less costly.

4. The City objects to the following definitions from the Fourth Discovery Requests:

a. The City objects to the definition of "Defendant or You" to the extent it purports to require the City to answer on behalf of "its agents, employees, representatives, subsidiaries, successors in interest, predecessors in interest, and/or any other entity or person over whom any Defendant has control," regardless of their nexus to this matter. Moreover, the City has no obligation to and will not respond on behalf of third parties, unless specified otherwise in response to a particular Interrogatory or

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 75800
FACSIMILE: +1 206 623 7022

Request for Production. The City further objects to this definition as unduly burdensome and duplicative, to the extent it seeks knowledge, information or documents requested by Plaintiffs from the City pursuant to Public Records Act requests or in the possession of third parties to whom Plaintiffs have already sought, or reasonably may seek, discovery in this matter.

b. The City objects to the definition of "Document" or "Documents" to the extent it purports to require the City to provide Documents in the "actual or constructive possession, custody, care, or control of ... any of its representatives" regardless of their nexus to this matter. Moreover, the City has no obligation to and will not respond on behalf of third parties, unless specified otherwise in response to a particular Interrogatory or Request for Production. The City further objects to this definition as unduly burdensome and duplicative, to the extent it seeks documents already requested by Plaintiffs from the City pursuant to Public Records Act requests or in the possession of third parties from whom Plaintiffs have already sought, or reasonably may seek, discovery in this matter.

c. The City objects to the definition of "identify" when used with reference to a document to the extent it purports to require the City to provide information not within its possession, custody, or control. The City further objects to this definition as unduly burdensome and improperly seeking duplicative information, to the extent that it (i) would require the City to separately provide information that is either apparent on the face of a produced document or contained therein, or (ii) seeks information about documents in the possession of either Plaintiffs pursuant to Public Records Act requests or third parties from whom Plaintiffs have already sought, or reasonably may seek, discovery in this matter. Finally, absent entry of an appropriate discovery order, the City also objects to providing contact information for individuals to the extent such information is confidential.

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

d. The City objects to the definition of "identify" when used with reference to a "Person" to the extent it purports to require the City to provide information not within its possession, custody, or control. Absent entry of an appropriate discovery order, the City also objects to providing contact information for individuals to the extent such information is confidential.

e. The City objects to the definition of the term "Material" to the extent it purports to require the City to provide Material(s) provided to the City Council not within the City's possession, custody, or control. The City further objects to the definition of "Material" above as over broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent that an Interrogatory or Request for Production seeks information or documents related to <u>any</u> Material the City Council received regardless of its timing or source. For example, there is no credible way for the City to collect and report on every instance where a constituent briefly engaged with a City Council member regarding Ordinance 125760 at a public event. The City will therefore interpret this definition as limited in temporal scope to information presented to the City Council prior to the passage of Ordinance 125760, and in subject matter scope as excluding information arguably received from *de minimis* contacts with the public.

f. The City objects to the definition of "Alaskan Way Promenade Overlook Walk (AWPOW) Environmental Impact Statements (EIS)" to the extent the definition includes the Preliminary Draft and Draft Environmental Impact Statements, as any Preliminary Drafts or Draft Environmental Impact Statements would have been published before January 1, 2016 and fall outside of Plaintiffs' requested time period of January 1, 2016 to June 1, 2019. The City will therefore interpret this definition as limited in temporal scope to information between January 1, 2016 and June 1, 2019, as requested by Plaintiffs.

5. The City's answers, responses and objections herein are based upon present knowledge, information, and belief following its diligent search and reasonable inquiry. However, discovery and investigation are ongoing. The City reserves its rights to produce evidence of any subsequently discovered fact, to alter or amend its objections and responses set forth herein, and otherwise to assert factual and legal contentions as additional facts are ascertained, analyses are made, and legal research is completed. The City objects to the Fourth Discovery Requests insofar as they may be construed to limit or restrict the City's right to rely upon any information or document for any purposes whatsoever, including, but not limited to, the use of information or responsive documents as evidence at any subsequent hearing, trial or other proceeding.

6. The City objects to the Fourth Discovery Requests to the extent they use terms that are subject to varying interpretations, or are vague, ambiguous, or misleading. Terms that are vague, ambiguous, or misleading are identified in particular responses. The City's responses to the Fourth Discovery Requests are based on the common meaning of the words used in the Fourth Discovery Requests.

7. The City objects to any discovery request that assumes facts not in evidence.

8. The City does not concede nor waive any objections regarding the relevance, admissibility, or discoverability of any information or documents provided and reserves its right at any time to assert such objections irrespective of production of such information.

9. The City reserves the right to seek a protective order or agreement between the parties prior to producing any documents containing confidential or proprietary information regarding the City, any of its agents, any of its current or former employees, or any other non-parties.

10. To the extent the City agrees to search for and produce responsive documents, the City is not representing that any such documents do in fact exist.

SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 75800
FACSIMILE: +1 206 623 7022

11. If Plaintiffs do not accept the objections and limitations set forth herein (including both these General Objections, as well as the objections set forth in the specific responses to the individual discovery requests below), the City requests an opportunity to meet and confer. Failing agreement, the City will request a status conference with the Court or move for a protective order if required.

DEFINITIONS

As used herein, the following definitions apply to each request for production contained herein. The definitions and instructions set forth below are expressly incorporated by reference into and made a part of this Request for Production.

1. "Answer" shall mean "Defendant City of Seattle's Answer and Affirmative Defenses to Third Amended Complaint for Declaratory Relief and Damages" filed in King County Superior Court Cause No. 19-2-05733-5 SEA (Consolidated with No. 19-2-08787-1 SEA).

2. The term "Complaint" means Plaintiffs' "Third Amended Complaint for Declaratory Relief and Damages" filed in King County Superior Court Cause No. 19-2-05733-5 SEA (Consolidated with No. 19-2-08787-1 SEA).

3. The term "City" means the City of Seattle, a Washington municipal corporation.

4. The term "City Councilmembers" as used herein, refers to the Councilmembers for the City of Seattle and their Staff (including Legislative Aids, and Council Central Staff).

5. The term "Defendant" or "You" as used herein means any or all of the following, and should be applied to give the Interrogatory or Request for Production the broadest scope: City of Seattle, as a Washington municipal corporation, its agents, employees, representatives, subsidiaries, successors in interest, predecessors in interest, and/or any other entity or Person over whom any Defendant has control.

6. "Document" or "Documents" as used herein, are synonymous in meaning and equal in scope and are defined to the broadest extent permissible under the Washington Civil Rules, and refer

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 75800
FACSIMILE: +1 206 623 7022

to all written, electronic, and graphic matter, however produced or reproduced, of every kind and description in the actual or constructive possession, custody, care, or control of the responding party, or any of its representatives, including, but not limited to:

(a) Papers, books, journals, ledgers, statements, purchase or sale confirmations, statement of accounts, memoranda, prospectuses, reports, invoices, work papers, notes, transcriptions of notes, letters, correspondence, checks, graphic representations, films, photographs, diaries, calendars, desk calendars, pocket calendars, lists, logs, publications, advertisements, messages, summaries, agreements, contracts, telegraphs, telexes, transcriptions of tapes or records, and any other writings or tangible things on which any handwriting, typing printing, photostatic or other forms of communications or information recorded or reproduced, as well as all notations on or pertaining to the foregoing;

(b) Originals and all other copies not absolutely identical to said originals;

(c) All drafts and notes (whether typed, handwritten or otherwise) made or prepared in connection with such documents, whether used or not; and

(d) All digital data or electronic information or other information of any form, including electronic or digital data maintained on computer disks or databases and e-mails.

7. "Identify," when used with reference to a document, means to set forth with respect to the original and each copy thereof the following information:

(a) Its title, or if untitled, its nature (e.g.: letter, memoranda, telegram, note, drawing, etc.);

(b) Its date;

(c) The identity of the Person or Person who composed or originated it;

(d) The identity of each Person to whom the original or a copy was sent;

(e) A brief summary of its contents;

(f) The name and last known address of the Person who presently has custody of it; and

(g) Any other descriptive information necessary in order to adequately describe the document in a subpoena *duces tecum*, or in a motion or request for production thereof.

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 75800
FACSIMILE: +1 206 623 7022

8. "Identify," when used with reference to a "Person" means to set forth with the following information:

(a) The Person's name;

(b) Last known home and/or address;

(c) Last known telephone number(s); and

(d) Last known e-mail address.

9. The term "Material" as used herein shall mean the facts, statistics, studies, evidence, opinions, and other information presented to the City Council related to Ordinance 125760. *See Abbenhaus v. City of Yakima*, 89 Wn.2d 855, 859, 576 P.2d 888 (1978) ("the superior court should be considering the material presented to the city council and determining whether it adequately supports the action of the municipality") (emphasis added).

10. "Person" or "Persons" means all entities, including, without limiting the generality of the foregoing, all individuals (whether living or deceased) having knowledge pertaining to the facts herein.

11. The phrases "relating to," "regarding," "arising from," or "pertaining to" as used herein shall mean any information, fact or Document which is relevant in any way to the subject matter including without limitation all Documents which contain, record, reflect, summarize, evaluate, comment upon, transmit or discuss the subject matter of any request as well as the text or notes of any oral or written presentation or conversation.

12. The term "Waterfront LID" as used herein means the Waterfront Local Improvement District You admit you created in Section I of Your Answer.

13. The term "Waterfront LID Improvements" means that list of improvements attached as Exhibit A to Ordinance 125760.

14. The term "Alaskan Way Promenade Overlook Walk (AWPOW) Environmental Impact Statements (EIS)" includes the Preliminary Draft, Draft, Supplemental Draft, and Final EIS.

SEATTLE, WA 98104-1158
TELEPHONE +1 206 623 7580
FACSIMILE +1 206 623 7022

15. The term SEPA means the state of Washington "State Environmental Policy Act" under chapter 43.21C RCW.

INTERROGATORIES

Your answers to these Interrogatories are to include all information contained in or on writings, records, photographs, computer files and data, e-mails, or any other tangible thing or material that is known or available to You, including all information in possession of Your agents, attorneys, accountants, auditors or other Persons or experts or any investigators or any Person acting on Your behalf or under Your or Your attorney's employment, direction and/or control.

If the answer to an Interrogatory may be ascertained from Your business records, You may supply the optional form of answer provided by CR 33(c). Moreover, any Interrogatory requesting that You "Identify," "describe" or "locate" any document may be answered by attaching a complete and correct copy of the document as part of Your answer to that Interrogatory or by presenting the document for inspection and copying at the offices of Plaintiffs' attorneys, Schlemlein Fick & Scruggs, PLLC, 66 S. Hanford St., Suite 300, Seattle, Washington, 98134.

Each Interrogatory is intended to, and does, request that each and every part and subpart thereof be answered with the same force and effect as if each part and particular were the subject of and were asked by a separate Interrogatory. If You do not know and cannot ascertain the answer to any Interrogatory (or portion thereof), please state that affirmatively in lieu of Your answer.

Please use the time period between January 1, 2016, and February 1, 2021, unless a different time period is indicated in the interrogatory.

OBJECTION: The City objects to these general instructions to the extent that they purport to require the City to provide information outside of its possession, custody or control as defined in the Civil Rules and authority interpreting same. The City further objects to these instructions to the extent they purport to include information protected by the attorney-client privilege, work product doctrine or other applicable protections cited by the City in objection or response to a particular Interrogatory. The City also objects to the time period of January

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

1, 2016 to February 1, 2021 to the extent it purports to require the City to answer and respond to the Fourth Discovery Requests into the future. The City will limit its Answers, Responses and document collection efforts to January 1, 2016 to January 23, 2020, the date Defendant served these Objections, Answers, and Responses to Plaintiffs' Fourth Discovery Requests. Finally, the City incorporates herein the City's General Objections above.

INTERROGATORY NO. 41: For each Waterfront LID Improvement, identify each final agency decision for purposes of State Environmental Policy Act (SEPA) review.

ANSWER: The City objects to this improper contention Interrogatory, as the City is not required to inform Plaintiffs of its legal conclusions or theories in response to Interrogatories. The City also objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in evidence, as SEPA review may not be required for all aspects of all Waterfront LID Improvements. Finally, the City objects to this Interrogatory as vague and ambiguous because of the undefined terms "agency," "decision," and "final agency decision." For the purposes of answering this Interrogatory, the City will assume "agency" has the same meaning contained in WAC 197-11-758, the definition for "lead agency." Additionally, because "decision" is not a defined term under SEPA, the City will assume the term "decision" refers to the "threshold determination" (i.e., a determination of nonsignificance or a determination of significance) that a lead agency is required to make under WAC 197-11-310 for any proposal which meets the definition of action and is not categorically exempt from SEPA Review . Therefore, for the purposes of answering this Interrogatory the City will identify the date of the lead agency's threshold determination for each Waterfront LID Improvement, if applicable.

If Plaintiffs disagree with the City's approach in responding to this Interrogatory, the City requests an opportunity to meet and confer.

Subject to and without waiver of its stated objections, the City answers as follows: the Seattle Department of Transportation (SDOT)—the lead agency for the AWPOW FEIS, which covers the Promenade, Overlook Walk, Pioneer Square Street Improvements, and the Union

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE +1 206 623 75800
FACSIMILE +1 206 623 7022

Street Pedestrian Connection—issued a determination of significance on August 9, 2013. The lead agencies for the Pike and Pine Streetscape Improvements (SDOT) and Pier 58/Waterfront Park (Seattle Parks and Recreation) have not yet issued threshold determinations.

INTERROGATORY NO. 42: For Waterfront LID No. 6751, identify each final agency decision for purposes of SEPA review.

ANSWER: The City incorporates by reference its objections to Interrogatory No. 41. Subject to and without waiver of its stated objections, the City notes that the formation of Waterfront LID No. 6751 is categorically exempt from SEPA pursuant to WAC 197-11-800(16).

INTERROGATORY NO. 43: For each Waterfront LID Improvement, identify the "earliest possible point in time" for purposes of SEPA evaluation under WAC 197-11-055(2).

ANSWER: The City objects to this improper contention Interrogatory, as the City is not required to inform Plaintiffs of its legal conclusions or theories in response to Interrogatories. The City also objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in evidence, as SEPA review may not be required for all aspects of all Waterfront LID Improvements and because timing of SEPA review is determined by the lead agency under WAC 197-11-055. The City further objects to this Interrogatory as vague and ambiguous because of the undefined term "earliest possible point in time." For the purposes of responding to this Interrogatory, the City will rely upon the language from WAC 197-11-055(2) and identify "the earliest possible point *in the planning and decision-making process*, when the principal features of a proposal and its environmental impacts can be reasonably identified." (emphasis added). Lastly, the City objects to the undefined term "SEPA evaluation" as vague and ambiguous. For the purposes of responding to this Interrogatory, the City interprets "SEPA evaluation" to mean information regarding the timing of the preparation of "threshold determination and environmental impact statement (EIS), if required," as provided by WAC 197-11-055(2).

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 75800
FACSIMILE: +1 206 623 7022

Subject to and without waiver of its stated objections, under WAC 197-11-055(2) the "lead agency" (as defined by WAC 197-11-758) "shall prepare its threshold determination and environmental impact statement (EIS), if required, at the earliest possible point in the planning and decision making process, when the principal features of a proposal and its environmental impacts can be reasonably identified." Furthermore, WAC 197-11-055(2)(b) provides that an agency "shall identify the times at which the environmental review shall be conducted either in their procedures *or on a case-by-case basis.*" (emphasis added). Recognizing these parameters, lead agencies within the City generally do not begin SEPA review until a proposal reaches 30% design. For the Waterfront LID improvements, SEPA review has been completed for the Promenade, Overlook Walk, Pioneer Square Street Improvements, and Union Street Pedestrian Connection, is in process for Pier 58/Waterfront Park, and has not yet begun for the Pike/Pine Streetscape Improvements.

INTERROGATORY NO. 44: For Waterfront LID No. 6751, identify the "earliest possible point in time" for purposes of SEPA evaluation under WAC 197-11-055(2).

ANSWER: The City incorporates by reference its objections and answers to Interrogatory No. 43. Subject to and without waiver of its stated objections, the City answers as follows: the formation of Waterfront LID No. 6751 is categorically exempt from SEPA "threshold determination and [environmental impact statement] requirements." *See* WAC 197-11-800(16).

INTERROGATORY NO. 45: For each Waterfront LID Improvement, identify how and when the lead agency will supplement the AWPOW FEIS or otherwise complete review under SEPA, and mail, publish, or otherwise provide notice thereof.

ANSWER: The City objects to this Interrogatory as duplicative of Interrogatory Nos. 31 and 32 in Plaintiffs' Second Set of Interrogatories and Requests for Production (the "Second Discovery Requests"). The City also objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in evidence, as SEPA review may not be required for all

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

aspects of all Waterfront LID Improvements. Further, the City objects to this Interrogatory as duplicative to the extent it seeks information already requested by Plaintiffs' counsel via its multiple Public Records Act (PRA) requests, specifically PRA Request No. C043490 submitted on June 14, 2019. Finally, the City objects to the undefined term "complete review under SEPA" as vague and ambiguous because SEPA does not define when SEPA review is "complete."

Subject to and without waiver of its stated objections, and recognizing that the City may supplement this Answer upon further investigation, the City is following the processes and timelines for environmental review for each Waterfront LID Improvement as required by Washington law (*see* Chap. 43.21C and Chap. 197-11 WAC) and Seattle Municipal Code Chap. 25.05. The City will also supplement the AWPOW FEIS, if necessary, consistent with SEPA. *See* WAC 197-11-405(4) (describing when a supplemental EIS shall be prepared). The City will "mail, publish, or otherwise provide notice" of "review under SEPA" for each Waterfront LID Improvement consistent with SEPA. *See, e.g.*, WAC 197-11-510; *see also*, SMC 25.05.510.

INTERROGATORY NO. 46: For Waterfront LID No. 6751, identify each reason the Waterfront LID is exempt under SMC 25.05.880(Q) or some other provision from SEPA.

ANSWER: The City objects to this improper contention Interrogatory, as the City is not required to inform Plaintiffs of its legal conclusions or theories in response to Interrogatories. The City further objects to this Interrogatory to the extent it is duplicative of Interrogatory No. 35 in Plaintiffs' Second Discovery Requests. Subject to and without waiver of its stated objections, the City answers: SMC 25.05.880(Q) does not exist. To the extent that Plaintiffs intended to cite SMC 25.05.800(Q), the text of that provision speaks for itself.

INTERROGATORY NO. 47: For each Waterfront LID Improvement, identify all Seattle Design Commission and/or Seattle Design Review Board reviews and approvals.

ANSWER: The City objects to this Interrogatory as overbroad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent it seeks all Seattle Design Commission and/or Seattle Design Review Board reviews and approvals,

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE +1 206 623 7580
FACSIMILE +1 206 623 7022

regardless of the significance of the reviews and approvals (or lack thereof). The City further objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in evidence, to the extent this Interrogatory assumes each Waterfront LID Improvement has to be reviewed and approved by the Seattle Design Commission and/or the Seattle Design Review Board. The Waterfront LID Improvements are not required to be reviewed or approved by the Seattle Design Review Board. The Seattle Design Review Board reviews large-scale projects proposed to be built on private property. Additionally, the Seattle Design Commission does not have jurisdiction over the Pioneer Square Street Improvements.

Subject to and without waiver of its stated objections, pursuant to CR 33(c), the City refers Plaintiffs to SEA_LID_0165991. In addition, pursuant to CR 33(c), the City will search for and may produce non-privileged documents from which Plaintiffs may ascertain responsive information.

INTERROGATORY NO. 48: For each Waterfront LID Improvement, identify each reason for not supplementing or completing SEPA review prior to now.

ANSWER: The City objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in evidence, as the City is under no obligation or duty to supplement or complete environmental review "prior to now." The City further objects to this Interrogatory as overly broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent it seeks each "reason for not supplementing or completing SEPA review prior to now," regardless of the significance of each reason (or lack thereof) to the claims and defenses in this matter. Finally, the City objects to the undefined term "now" as vague and ambiguous, and interprets "now" to mean January 23, 2020, the date Defendant served these Objections, Answers, and Responses to Plaintiffs' Fourth Discovery Requests.

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

Subject to and without waiver of its stated objections, and recognizing that the City may supplement this Answer upon further investigation, the City refers Plaintiffs to its answer to Interrogatory Nos. 43 and 45.

INTERROGATORY NO. 49: For each Waterfront LID Improvement, identify each reason for not completing (1) designs, (2) plans, (3) agency reviews, (4) specifications, and (5) construction documents prior to now.

ANSWER: The City objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in evidence, as the City is under no obligation or duty to complete designs, plans, agency reviews, specifications, and construction documents "prior to now." The City also objects to this Interrogatory as overly broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent it seeks each "reason for not completing (1) designs, (2) plans, (3) agency reviews, (4) specifications, and (5) construction documents prior to now[,]" regardless of the significance of each reason (or lack thereof). Finally, the City objects to this Interrogatory as vague and ambiguous because of the undefined terms "designs," "plans," "agency reviews," "specifications," "construction documents," and "now." For the purposes of responding to this Interrogatory, the City will interpret "designs," "plans," "specifications," and "construction documents" to mean the information contained in the conformed set of plans and specifications for each Waterfront LID Improvement, as prepared by an outside engineering firm hired by the City, after the Waterfront LID Improvement has reached 100% design. Furthermore, "designs," "plans," and "specifications" are not separate and distinct documents, they are all related and dependent on one another. The City will interpret "agency reviews" to mean local, state, or federal agency review for each Waterfront LID Improvement. The City will interpret "now" to mean January 23, 2020, the date Defendant served these Objections, Answers, and Responses to Plaintiffs' Fourth Discovery Requests.

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 75800
FACSIMILE: +1 206 623 7022

If Plaintiffs disagree with the City's approach in responding to this Interrogatory, the City requests an opportunity to meet and confer.

Subject to and without waiver of its stated objections, the design, plans, specifications and construction documents are complete for the Promenade. Overlook Walk, Pioneer Square Street Improvements, Pike/Pine Streetscape Improvements, and Pier 58/Waterfront Park have not yet reached 100% design. Union Street Pedestrian Connection has reached 100% design but it has not yet been put out to bid. .

INTERROGATORY NO. 50: For each Waterfront LID Improvement, identify when the lead agency will complete all (1) designs, (2) plans, (3) agency reviews, (4) specifications, and (5) construction documents.

ANSWER: The City incorporates by reference its objections and answer to Interrogatory No. 49. The City also objects to this Interrogatory as unduly burdensome, overly broad, and not reasonably calculated to lead to the discovery of admissible evidence, to the extent that it seeks dates when the City will complete *all* designs, plans, agency reviews, specifications, and construction documents. The design and construction of the Waterfront LID Improvements is a complex process that will take several years to complete, and the timelines for completion of all designs, plans, agency reviews, specifications, and construction documents are still in process and subject to change. For these reasons, the City will respond to this Interrogatory with general estimates of when the lead agency will complete the designs, plans, agency reviews, specifications, and construction documents for each Waterfront LID Improvement. Finally, the City objects to this Interrogatory as vague and ambiguous due to the undefined term "lead agency." For the purposes of answering this Interrogatory, the City assumes "lead agency" will have the same meaning as "lead agency" in WAC 197-11-758.

Subject to and without waiver of its stated objections, the designs, plans, specifications, and construction documents are complete for the Promenade. The City is investigating when it estimates it will complete all designs, plans, agency reviews, specifications, and construction

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

documents for the remaining Waterfront LID Improvements and will update this Answer accordingly. In addition, pursuant to CR 33(c), the City will search for and may produce non-privileged Documents from which Plaintiffs may ascertain responsive information.

INTERROGATORY NO. 51: For each Waterfront LID Improvement, identify each condition precedent that might impact the lead agency's ability to complete all (1) designs, (2) plans, (3) agency reviews, (4) specifications, and (5) construction documents according the above-identified schedule.

ANSWER: The City incorporates by reference its objections to Interrogatory Nos. 49 and 50. The City also objects to this Interrogatory to the extent it relies upon a legal conclusion or assumes facts not in the evidence, to the extent it assumes the City is required to complete all designs, plans, agency reviews, specifications, and construction documents to the above-identified schedule. Further, the City objects to this Interrogatory as vague and ambiguous because of the undefined term "condition precedent." For the purposes of answering this Interrogatory, the City will interpret "condition precedent" to mean commitments or constraints, as well as an event, condition, or approval that must occur in order to complete all designs, plans, agency reviews, specifications, and construction documents. Lastly, the City objects to this Interrogatory as unduly burdensome, overly broad, and not reasonably calculated to lead to the discovery of admissible evidence, to the extent that it seeks each "condition precedent[s] that might impact the lead agency's ability to complete all (1) designs, (2) plans, (3) agency reviews, (4) specifications, and (5) construction documents according the above-identified schedule[,]" regardless of the significance (or lack thereof) of the condition precedent or impact to the lead agency.

Subject to and without waiver of its stated objections, the City is investigating the "condition precedent[s] that might impact the lead agency's ability to complete all (1) designs, (2) plans, (3) agency reviews, (4) specifications, and (5) construction documents according the above-identified schedule" and will update this Answer accordingly. In addition, pursuant to

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE: +1 206 623 7580
FACSIMILE: +1 206 623 7022

CR 33(c), the City will search for and may produce non-privileged Documents from which Plaintiffs may ascertain responsive information.

INTERROGATORY NO. 52: For each Waterfront LID Improvement, identify when the lead agency will complete construction.

ANSWER: The City incorporates by reference its objections to Interrogatory No. 50. Subject to and without waiver of its stated objections, and in recognition that the Waterfront LID is a complex multi-year project whose processes and timelines for construction are subject to change, the City anticipates that construction for the Pioneer Square Street Improvements will be complete by mid-2023, Pike and Pine Street Improvements will be complete by the end of 2023, and Promenade, Overlook Walk and Pier 58/Waterfront Park will be complete by early 2024.

INTERROGATORY NO. 53: For each Waterfront LID Improvement, identify each condition precedent that might impact the timing of construction.

ANSWER: The City incorporates by reference its objections and answer to Interrogatory Nos. 51 and 52. The City further objects to this Interrogatory as overly broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent it seeks each "condition precedent that might impact the timing of construction[,]" regardless of the significance (or lack thereof) of the condition precedent or impact to the construction timing. The design and construction of the Waterfront LID Improvements is a complex project that will take several more years to complete, and the "condition precedents" that may impact the timing of construction are subject to change.

Subject to and without waiver of its stated objections, the City is investigating whether any condition precedents are currently known that might impact the timing of construction for any Waterfront LID Improvement, and will supplement this Answer accordingly. In addition, pursuant to CR 33(c), the City will search for and may produce non-privileged Documents from which Plaintiffs may ascertain responsive information.

FACSIMILE: +1 206 623 7022

REQUESTS FOR PRODUCTION

Pursuant to Washington Civil Rules 26 and 34, Plaintiffs request that Defendant produce for inspection and copying by Plaintiffs, all documents within the scope of each Request for Production. The documents should be produced in the form and state as they are kept in the usual course of business of the Person, corporation or entity which currently has possession, custody or control of the documents. Production must be made to the office of Plaintiffs' counsel, Schlemlein Fick & Scruggs, located at 66 S. Hanford St., Suite 300, Seattle, Washington, 98134 within thirty (30) days after receipt hereof.

The phrase "possession, custody or control" extends to any documents in the possession, custody or control of Defendant, or any agent, representative, accountant, or attorney of the Defendant. A document or thing is deemed to be in the possession, custody or control of Defendant if it is in any of the Defendant's physical custody or Defendant: (a) owns such a document in whole or in part; (b) has a right by contract, law, or otherwise to use, inspect, examine or copy such document on any terms; (c) has an understanding, express or implied, that they may use, inspect, examine or copy such document on any terms; or (d) can, as a practical matter, examine or copy such documents.

If a claim of privilege is asserted to the production of any document requested below, state as to each document the following information:

(a) The specific privilege claimed;

(b) A precise statement of the facts upon which such claim of privilege is based;

(c) The following information as to each purportedly privileged document:

(1) Its nature: e.g., letter, memorandum, photograph, tape, etc.;

(2) The date it was prepared;

(3) The date it bears;

(4) The date it was sent;

(5) The date it was received;

(6) The identity of the Person sending it;

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE +1 206 623 7580
FACSIMILE +1 206 623 7022

(7) The identity of each Person to whom it was sent;

(8) The identity of the Person preparing it;

(9) A statement of the subject of the document(s); and

(10) A precise description of the place in which the document is kept, including the title or description of the file in which said document may be found and the exact location of such file.

If You contend only a portion of the document is privileged, please provide a redacted document with a listing of the above information as to the redacted portion.

OBJECTION: The City objects to the Plaintiffs' Requests to the extent the requested format of production is inconsistent with the City's obligations under the Civil Rules. Specifically, Plaintiffs' request that "documents should be produced in the *form and state* as they are kept in the usual course of business of the Person, corporation or entity which currently has possession, custom or control of the documents" is vague and ambiguous with respect to the italicized language. The City also objects to the Plaintiffs' request that it produce documents according to the specific Request or Requests to which the documents are responsive, in addition to producing documents as they are kept in the ordinary course of business. Such redundancy is neither appropriate nor required under the Civil Rules. The City intends to produce documents responsive to these Fourth Discovery Requests consistent with industry-standard production specifications or to otherwise meet and confer with Plaintiffs' counsel to identify a mutually agreeable set of production format specifications. The City further objects to these instructions to the extent they purport to require the City to provide information on behalf of third parties and/or not within its possession, custody, or control. Finally, the City incorporates herein the City's General Objections above, including but not limited to its temporal limitations and its obligations regarding the Plaintiffs' request for a privilege log.

REQUEST FOR PRODUCTION NO. 25: Please produce any and all Documents and electronically stored information (limited to the years January 1, 2016 — June 1, 2020) in Your possession, custody or control related to Interrogatory No. 46.

K&L GATES LLP
925 FOURTH AVENUE, SUITE 2900
SEATTLE, WA 98104-1158
TELEPHONE +1 206 623 7580
FACSIMILE +1 206 623 7022

RESPONSE: The City objects to the time period of this Request (January 1, 2016 to June 1, 2020) to the extent it purports to require the City to respond to this Request into the future. The City further objects to this Request as overly broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent it purports to encompass "any and all Documents" related to Interrogatory No. 46, regardless of the significance of the Document (or lack thereof) to the claims and defenses in this matter. Finally, the City objects to this Request as duplicative to the extent it seeks information already requested by Plaintiffs' counsel via its multiple Public Records Act (PRA) requests, specifically PRA Request No. C043490 submitted on June 14, 2019 and closed on November 18, 2019, PRA Request No. C043486-061419 submitted on June 14, 2019 and closed on October 1, 2019, and PRA Request No. C043485-061419 submitted on June 14, 2019 and closed on September 6, 2019.

Subject to and without waiver of its stated objections, the City will search for and produce responsive, non-privileged Documents to the extent they have not already been produced pursuant to PRA reqeusts.

REQUEST FOR PRODUCTION NO. 26: Please produce any and all Documents and electronically stored information (limited to the years January 1, 2016 — June 1, 2020) in Your possession, custody or control related to Interrogatory No. 47.

RESPONSE: The City incorporates by reference its objections to Request for Production No. 25. The City further objects to this Request as overly broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence, to the extent it purports to encompass "any and all Documents" related to Interrogatory No. 47, regardless of the significance of the Document (or lack thereof) to the claims and defenses in this matter.

Subject to and without waiver of its stated objections, the City will search for and produce responsive, non-privileged Documents.

CWF-0337
CWF-0339
CWF-0340
CWF-0342

1. Appraisal is Fundamentally Flawed

2. Plans & Specifications are Vital and Missing

3. With & Without Scenarios = No Special Benefits

4. Several Other Defects Require Resolution

City's Final Benefit Study is "Remote, Speculative and Imaginary"

- Does not measure or address the General Benefits
- Does not measure before and after values
- Assigns and does not measure Special Benefits
- Treatment of vacant land and land values resulted in huge inequities
- Is within margin of error for appraisal and mass appraisal, so is speculative
- Makes incorrect assumptions about status of plans and specifications

Source: Testimony of Anthony Gibbons, MAI, CRE; Ex. 19, p. 2 (ABS Final Benefit Study); Ex. 24, p. 1 (Seattle Design Commission Minutes)

Total Benefits – General Benefits = Special Benefits

- Sole purpose of Waterfront LID Improvements is to create General Benefits
- Size of Waterfront LID Boundary in and of itself proves it is about General Benefits
- Special Benefits are "for the construction of local improvements that are appurtenant to specific land and bring a benefit substantially more intense than is yielded to the rest of the municipality."
- Appurtenancy is rooted in constitutional due process and takings law. It is the rule, while an LID without appurtenancy is the exception.

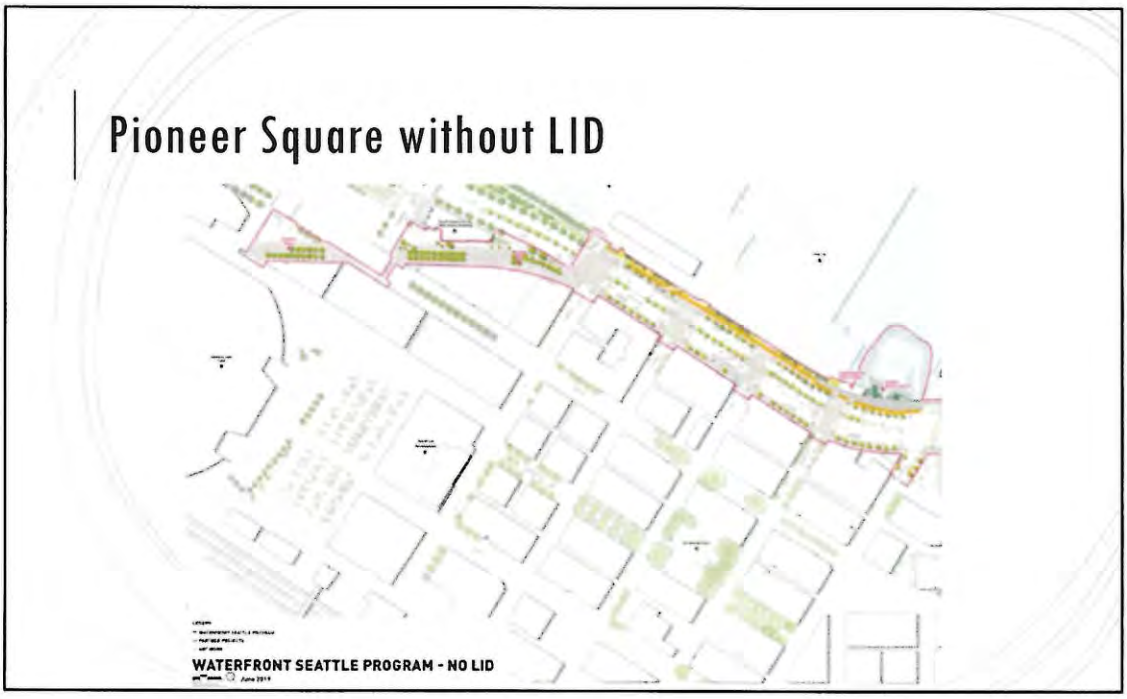
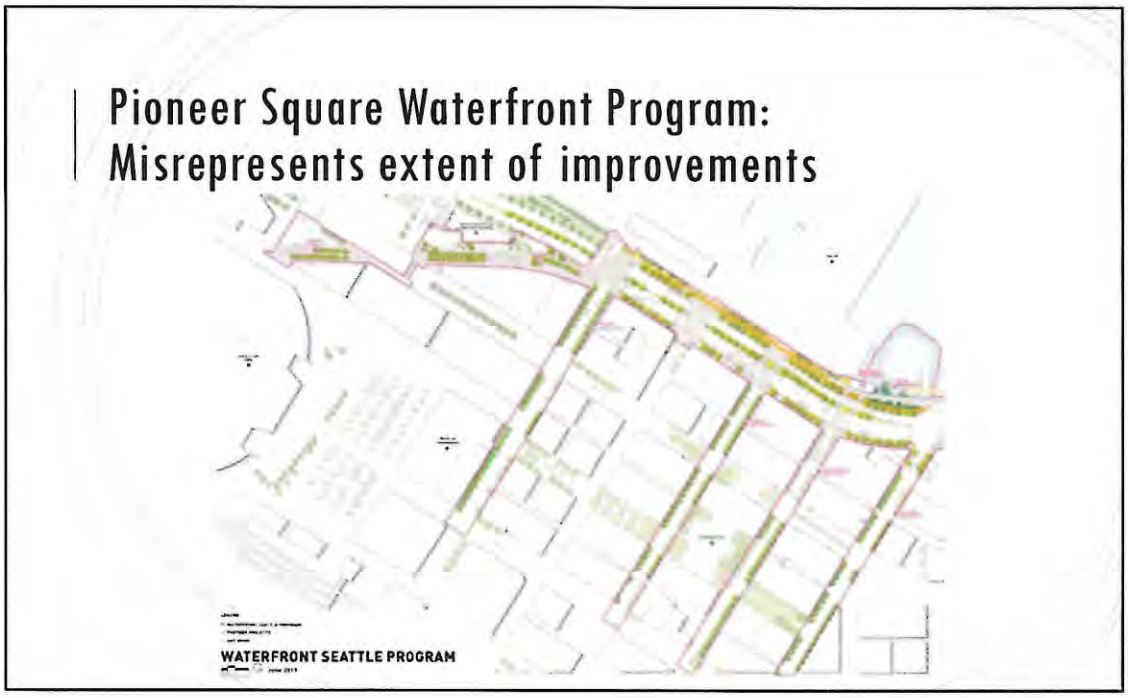
New Appraisal is Required

- Appraiser's percent of design assumption is wrong
- "With" and "Without" LID improvements are "extraordinary assumptions"
- Appraisal says use of preliminary plans requires a new appraisal

Source: Ex. 19, ABS Final Benefits Study, pp. 28 and 91



Source: Ex. 31, ABS Final Benefit Study, p. 121 (Addendum D-5)



Source: Ex. 31, ABS Final Benefit Study, p 121 (Addendum D-5)

Note: Waterfront Seattle Program does not mean Waterfront LID

With LID

- Improvements to small segments of:
  - Yesler Way (ends at First)
  - South Washington Street (ends at Occidental)
  - South Main Street (ends at Occidental)
  - South King Street (ends at First)
  - Second Avenue South (not included in Ex. 15, Formation Ordinance 125760, Attachment C)

Objectors' Five properties are not being improved

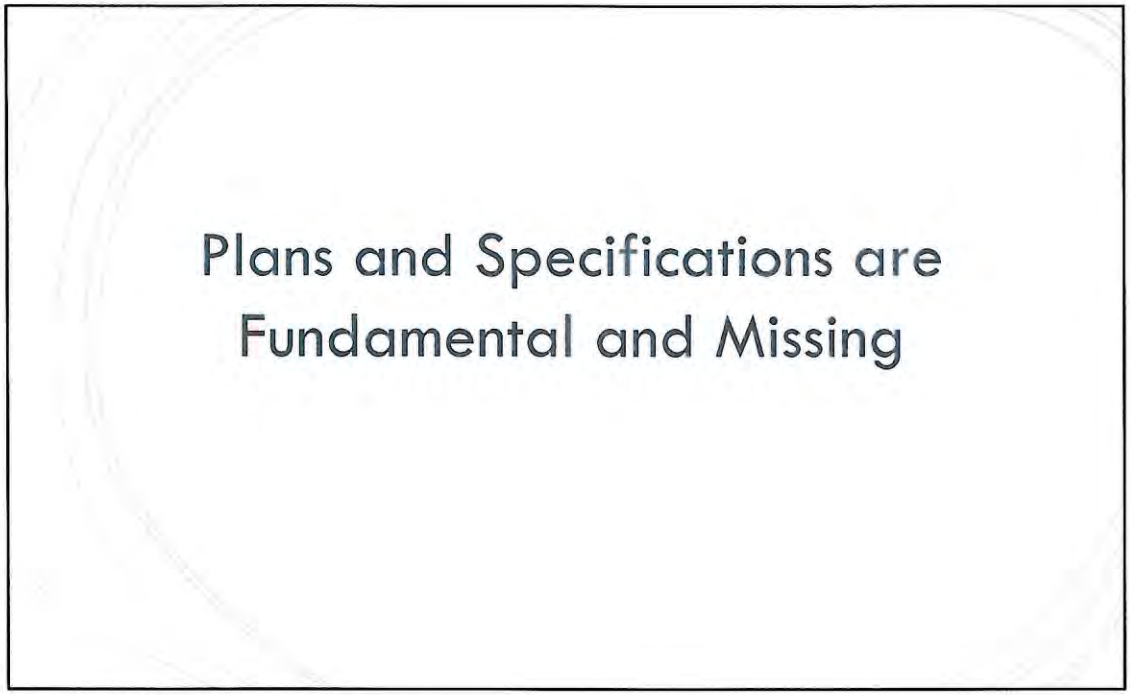
Source: Google Earth for First Avenue South properties



Source: Testimony of Anthony Gibbons, MAI, CRE; Ex. 19, p. 2 (ABS Final Benefit Study)

Plans and Specifications Are Fundamental and Missing

- Foundation and Purpose of Waterfront LID must be fulfilled
- Formation Ordinance 125760 requires compliance with January 2019 "plans and specifications"
- "Plans and Specifications" means 100% design and are not available
- "Plans and specifications" and construction will not be complete for "several years" and are "subject to change"

Source: *Hamilton Corner I, LLC v. City of Napavine,* 200 Wn. App. 258, 268-69, 402 P.3d 368 (2017) (the fundamental purpose of the LID Improvements and the foundation for special benefits must be accomplished); Ex. 17, [City's] Objections and Responses to Plaintiffs' Second Set of Interrogatories and Requests for Production, Response to Interrogatory No. 32, p. 23; Ex. 59, [City's] Objections and Responses to Plaintiffs' Fourth Set of Interrogatories and Requests for Production, pp. 18 & 24; Ex. 15, Formation Ordinance 125760, Section 3, p. 8; Ex. 16, [City's] Objections and Responses to Plaintiffs' Third Set of Interrogatories and Requests for Production, Response to Interrogatory No. 36, p. 12; Ex. 4, Local and Road Improvement Districts Manual for Washington State 6th Edition (2009), *p. 20 ("completion of project"), pp. 42, 43, 48 & 61 ("project is completed"), p. 53 (property is analyzed "with the LID assumed completed"), p. 55 ("constructed or completed within a specific time period")*

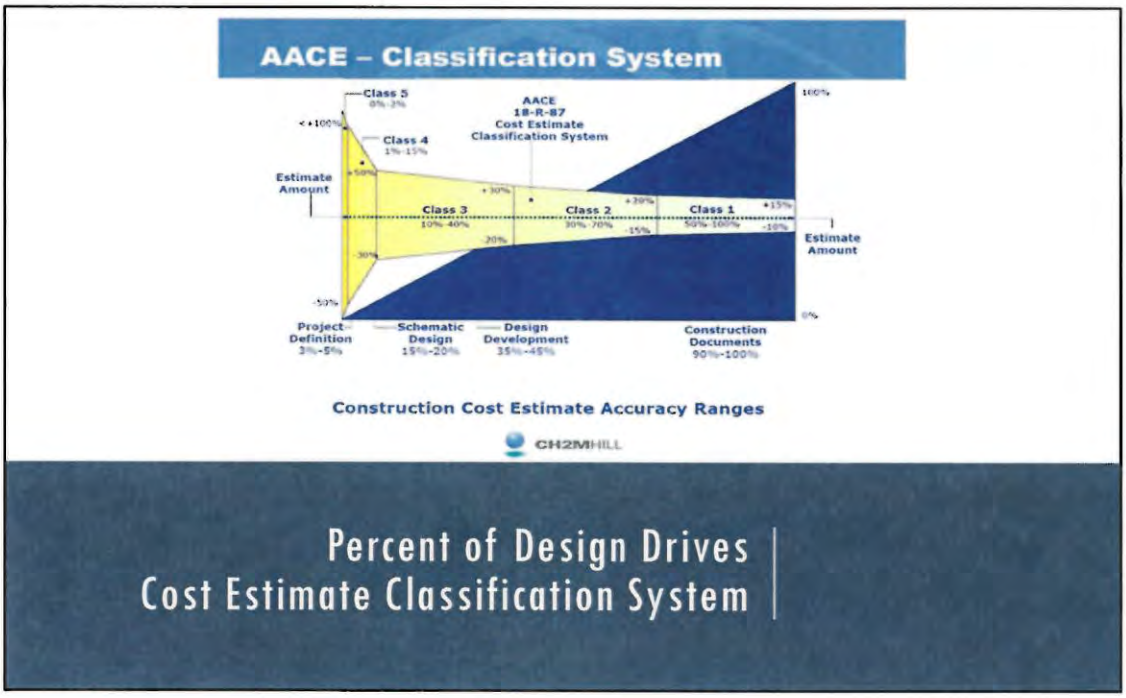
Percent of Design and Costs are Fundamental and Certified by City Appraiser

- Preliminary City Appraisal relies upon percent of designs and costs to calculate increased values
- Final City Appraisal relies upon percent of designs and costs to calculate increased values
- A. Gibbons testifies the designs and costs are fundamental to appraisal
- Macaulay certifies the appraisal is accurate

Source: A. Gibbons testimony; Ex. 18, Valbridge Preliminary Study, pp. 2-3, 6-8, 18, 19, 48, 52, 66-68 & 72; Ex. 19, ABS Final Special Benefit Study, p. 2; p. 94 (Macaulay certifies the appraisal is accurate)

- RCW 35.44.020 requires an analysis of LID Improvements cost.
- RCW 35.43.130 requires preliminary estimates to be based upon costs.
- Property owners cannot be charged more than the cost of the improvements. RCW 35.44.310
- An appraisal examines the cost of the improvements to quantify their value. Ex. 19, ABS Final Benefit Study, pp. 7. 9, 13, 26, 27, 74, 85 (cost of components); p. 8, excel 12-12, 12, 87 (cost/benefit ratio); p. 27 (client to do); pp. 2, 59, 60, 72, 81, 84 (cost approach).
- The City uses industry standard guidelines to cost estimate. Ex. 20, Waterfront Seattle – Waterfront Park Improvements 30% SD Update, April 17, 2017, Appendix E.
- Good cost estimates depend upon the percent of design that has been completed. Ex. 20, Waterfront Seattle – Waterfront Park Improvements 30% SD Update, April 17, 2017, Appendix E.
- The greater the percent of design that is completed, the less risk there is that the cost estimate will be wrong. Ex. 20, Waterfront Seattle – Waterfront Park Improvements 30% SD Update, April 17, 2017, Appendix E.
- Good cost estimates prevent the City from going over budget and unlawfully binding future City Councils and budgets. *See* Washington Attorney General Opinion 2012 No. 4 (May 15, 2012)

Source: Ex. 19, ABS Final Benefit Study, p. 28 (City's "with" & "without" scenarios are extraordinary assumptions) and p. 91 (Use of preliminary plans requires new appraisal after plans and specifications done)



Note: Thirty percent schematic design means 5-7% designs.

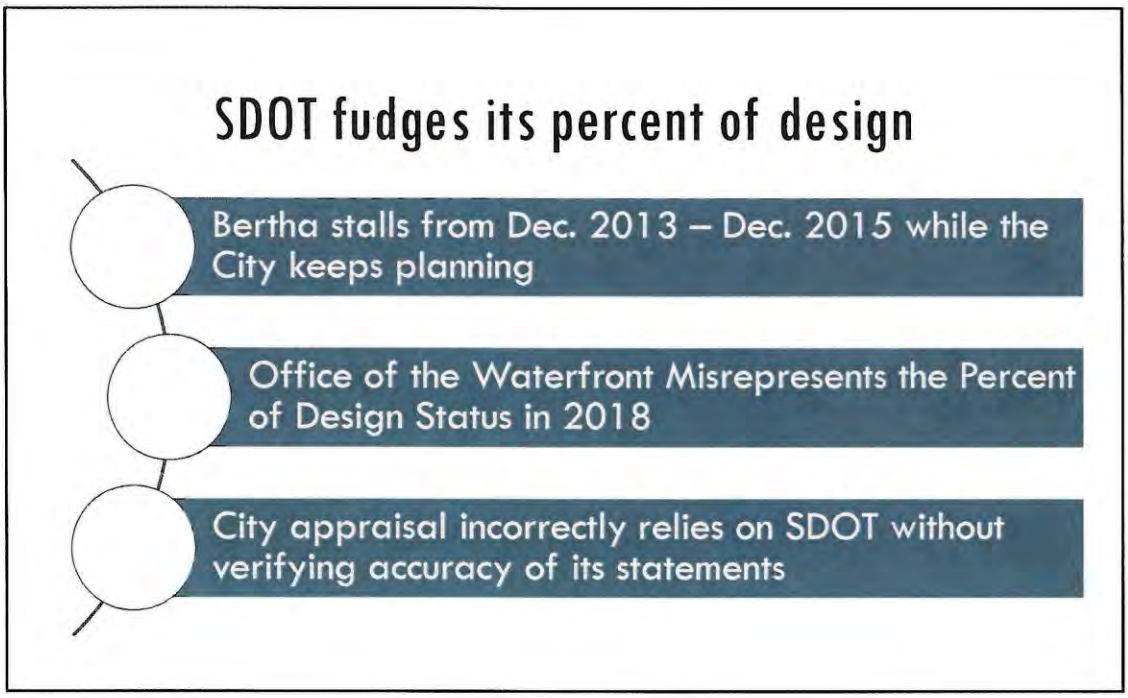
Source: Ex. 20, Waterfront Seattle – Waterfront Park Improvements 30% SD Update, April 17, 2017, Appendix E.

Estimate Class	Class 5		Class 4		Class 3		Class 2		Class 1	
LEVEL OF PROJECT DEFINITION Expressed as a % of complete definition	0% to 2%		1% to 15%		10% to 40%		30% to 70%		50% to 100%	
END USAGE Typical Purpose of Estimate	Concept Screening		Study or Feasibility		Budget Authorization, or Control		Control or Bid / Tender		Check Estimate or Bid / Tender	
METHODOLOGY Typical estimating method	Capacity Factored, Parametric Models, Judgment, or Analogy		Equipment Factored or Parametric Models		Semi-Detailed Unit Costs with Assembly Level Line Items		Detailed Unit Cost with Forced Detailed Take-Off		Detailed Unit Cost with Detailed Take-Off	
EXPECTED ACCURACY RANGE Typical variation in low and high ranges [a]	L: -20% to -50%	H: +30% to +100%	L: -15% to -30%	H: +20% to +50%	L: -10% to -20%	H: +10% to +30%	L: -5% to -15%	H: +5% to +20%	L: -3% to -10%	H: +3% to +15%
PREPARATION EFFORT Typical degree of effort relative to least cost index of 1 [b]	1		2 to 4		3 to 10		4 to 20		5 to 100	

Concept Cost Estimates Carry a -50% to +100% Accuracy Range

Note: Concept level designs means 2% design that comes before project definitions.

Source: Ex. 20, Waterfront Seattle – Waterfront Park Improvements 30% SD Update, April 17, 2017, Appendix E.



Office of the Waterfront "2014 Accomplishments"

- 30% - 60% design milestones for Main Corridor, Overlook Walk, public piers and Union Street

Source: Ex. 21, 2015 Work Plan Office of the Waterfront, Central Waterfront, Seawall and Alaskan Way Viaduct Replacement Program Select Committee, February 9, 2015, p. 2.

- Office of the Waterfront Pre-development Plans for 2015
  - Overlook Walk at 90% in 2018
  - Union Street at 90% in 2017
  - Pike-Pine Streets at 90% in 2017
  - Pioneer Square at 90% in 2018

Source: Ex. 22, Waterfront Seattle - Waterfront Program Progress Report, Q3 2015 (July - September), p. 4.

SDOT misrepresents status of designs to Seattle Design Commission

Seattle Design Commission Minutes
(4/19/2018)

Overlook Walk is at "concept design" (2%) only

- Waterfront Landings access issues
- Vegetation will block views
- Increase elevator capacity to be reliable and meet demand
- Adjacent stairs need to be more appealing to users
- Equity issues identified involving accessibility, restrooms, and tribes

Source: Ex. 23, Seattle Design Commission Overlook Walk & Ocean Pavilion 30% Design Presentation; Ex. 24, Seattle Design Commission Approved Minutes, April 19, 2018, p. 1

City Appraiser adopts SDOT's misrepresentation while the truth hides in plain sight

Seattle Design Commission Minutes (4/19/2018)

Overlook Walk is at "concept design" (2%) only

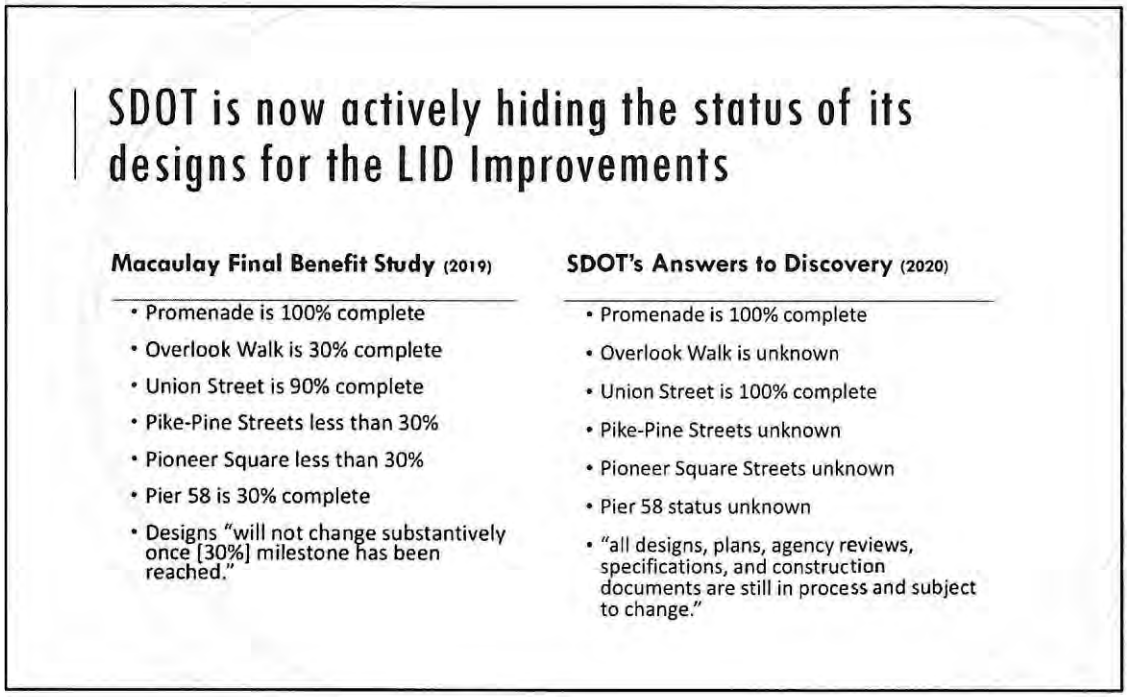
- Waterfront Landings access issues
- Vegetation will block views
- Increase elevator capacity to be reliable and meet demand
- Adjacent stairs need to be more appealing to users
- Equity issues identified involving accessibility, restrooms, and tribes

Summary from Macaulay Preliminary Study (May 9, 2018)

Overlook Walk is "approximately 30% completed."

- Promenade is 90% complete
- Union Street is approximately 30% completed
- Pioneer Square is less than 10%
- Pike-Pine Streets are at 10%

Source: Ex. 24, Seattle Design Commission Approved Minutes, April 19, 2018, p. 1; Ex. 18, Valbridge Preliminary Study, pp. 2-3



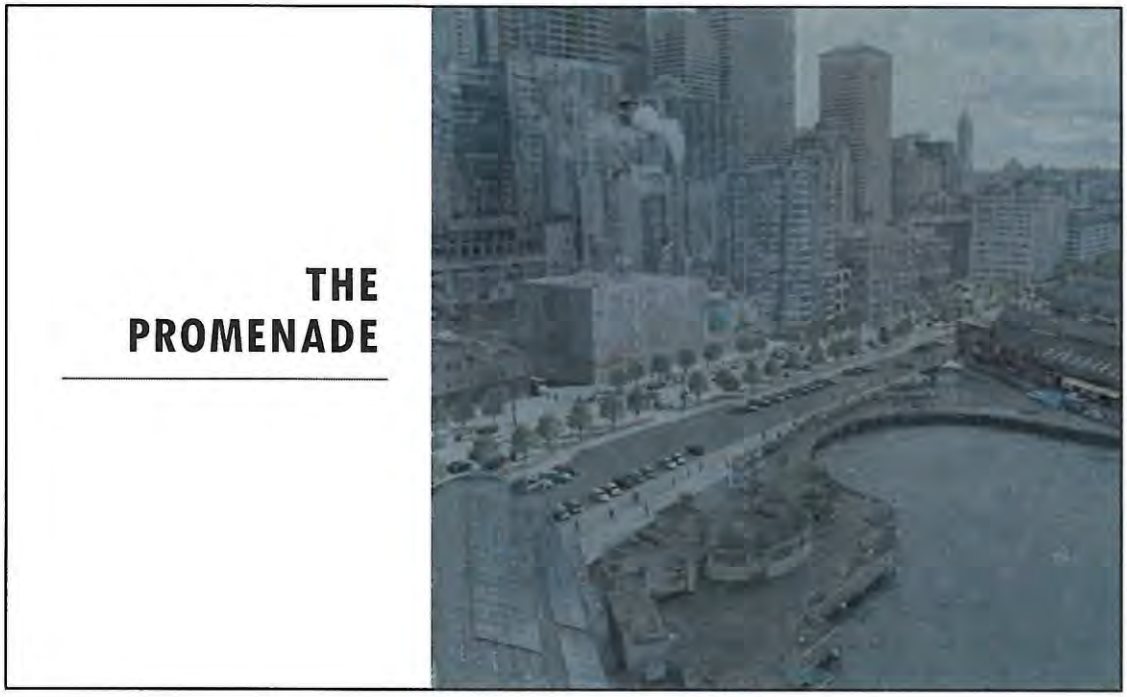
Source: Ex. 19, ABS Final Benefit Study, p. 2-3; Ex. 16, City's Objections to Third Interrogatories, pp. 12-13; Ex. 59, [City's] Objections and Responses to Plaintiffs' Fourth Set of Interrogatories and Requests for Production

Compare Ex. 21, (2014 accomplishments that Overlook Walk design is 30-60% complete) with Ex. 16 (design status is something less than 100% and unknown)

With and Without LID Scenarios of the Six Specific Projects Reveal No Special Benefits

Central Waterfront Baseline is significant without LID Improvements

- Seawall is Replaced ($388 million), includes Light Penetrating Surface (LPS) sidewalk
- SR 99 Tunnel is complete ($3.3 billion)
- Viaduct is removed, Battery Street Tunnel decommissioned
- Pier 62 is replaced ($100 million); Pier 63 is closed
- New two-way bicycle facility on the west side of Alaskan Way
- New Marion Street pedestrian bridge is completed
- New Lenora Street pedestrian bridge to new Elliott Way is completed
- University, Spring, Madison, Marion, Columbia, Yesler Way, Washington, Main, Jackson, and King Streets have roadway and sidewalk access to and connect to Alaskan Way
- Original Pike Street Hillclimb, Union Street Stairs, and Seneca Stairs provide pedestrian access
- Adds 823 trees
- Maintains 453 on-street parking spaces
- Rebuilt Washington Boat Landing
- Habitat Beach completed
- Main Corridor is Restored ($370.7 million)



Note: Artist renderings in Final Benefit Study are not to scale and do not comport with FEIS or Final Benefit Study "Without" and "With" descriptions

Source: Ex. 31, ABS Addenda Volume, pp. 24, 76 & 78 (Addenda A-21, B-2 & B-4); Ex. 19, ABS Final Special Benefit Study, p. 17-18; A. Gibbons Testimony

$62.88m Promenade improvements adds little to no new value

- Removes and replaces 2' x 2' scored concrete sidewalks with 2' x 2' exposed aggregate
- Removes and replaces 110 trees with evergreens
- Removes and replaces 163 trees with ornamental trees
- Removes and replaces one type of ground cover with non-native shrubs and bulbs
- Adds 16 new trees
- Adds 50 cedar benches and an unknown number of decorative planters
- Removes 453 on-street parking spaces

Sources (Landscaping): Ex. 25, SDOT 2019-2024 Adopted Capital Improvement Program, pp. 270-

71, 290-91, 294, 346-47; Ex. 28, SDOT 2020-2025 Proposed Capital Improvement Program, pp. 182, 188-189, 193, 201-02, 210-213 & 268; Ex. 29, SDOT 2018-2023 Adopted Capital Improvement Program, pp. 351-353; Ex. 19, ABS Final Special Benefit Study, p. 15, 17-19; Ex. 30, Office of the Waterfront and Civic Projects: Bell Street & Railroad Way; Ex. 31, ABS Valuation Summary of Final Special Benefit/Proportionate Assessment Study for Waterfront Seattle Project LID - Addenda Volume (hereinafter "ABS Addenda Volume"), pp. 4 & 78 (Addenda A-1 & B-4)

Sources (Parking): Ex. 7, FEIS, pp. ES-6, ES-7, ES-18; Ex. 31, ABS Final Special Benefit Study Addenda Volume, pp. 44-46, 52 & 58 (Addenda A-41, A-42, A-43, A-49, and A-55); Ex. 26, 2019 Environmental Permitting Summary, SEA_LID_0046123

Sources (Sidewalks): Ex. 19, ABS Final Special Benefit Study, p. 17-18

CODE COMPLIANCE ISSUES: PROMENADE

- 6 inch curb is standard, not 3 inches
- Non-native species generally prohibited
- Evergreens not suitable for sidewalks, need approximately 35' x 35'
- Exposed aggregate requires sealing, not particularly suitable for trucks

Source: *Bettina Hansen/The Seattle Times, Take the stairs at Seattle waterfront for a view of Duwamish history,* Seattle Times, March 26, 2018; Ex. 19, ABS Final Special Benefit Study, p. 22; Ex. 31, ABS Final Special Benefit Study, Addenda Volume, p. 94 (Addendum B-20)

Union Street needs KC WW discharge permit

Source: Ex. 26, 2019 Environmental Permitting Summary, SEA_LID_0046123

OVERLOOK WALK

Overlook Walk ($174m) is compromised

Per FEIS (2016)
- Lid deck spans Pine Street to alley north of Pike Street
- Multiple staircases to access Promenade
- Two elevators
- Public restrooms under staircases
- Lid elevation is approximately 40 feet above the Promenade

Source: Ex. 7, FEIS, pp. ES-20, 2-23

Per SEIS (September 2018)
- Lid deck reduced to hour-glass shape, new square footage unknown
- Two horseshoe configured staircases run east-west and allow access to Promenade (parallel to Pine Street)
- No new elevators. Elevator access will be east of Elliott Way and through Pike Place Market Garage and Heritage House access points
- Public restrooms under the staircases
- Lid elevation is approximately 50 feet above the Promenade

Source: Ex. 36, New Overlook Walk EIS Re-Evaluation, September 2018

Overlook Walk needs CWA NPDES permit, KC WW discharge permit

Source: Ex. 26, 2019 Environmental Permitting Summary, SEA_LID_0046123

Overlook Walk 2.0

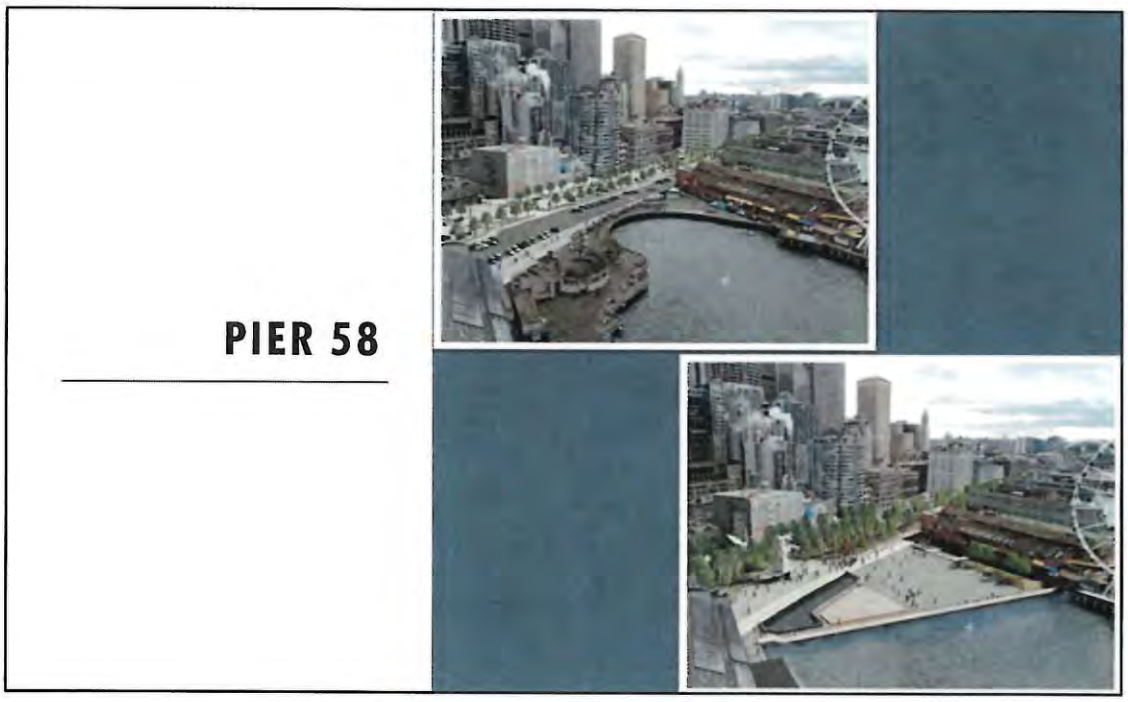
Per ABS Final Benefit Study

- Lid deck remains an hour-glass shape, new square footage
- One set of horseshoe staircases (north) will be built, while south side of horseshoe staircase is eliminated and contingent upon Aquarium expansion
- No new elevators. Elevator access will be east of Elliott Way and through Pike Place Market Garage and Heritage House access points, and possibly Aquarium Pavilion later
- No restrooms under the staircases
- Lid elevation is approximately 28 feet above the roadway, which is 18 feet above Alaskan Way (46 feet)

Source: Ex. 31, ABS Final Special Benefit Study Addenda Volume, pp. 9, 66, 98 & 101 (Addenda A-6, A-63, C-1 & C-4); Ex. 19, ABS Final Benefit Study, pp. 15 & 19

CODE COMPLIANCE ISSUES: OVERLOOK WALK

- Seattle Design Commission Approval still outstanding. SMC 3.58.070 and .080; SMC Chapters 15.64 and 15.65.
  - Accessibility, restrooms, elevator capacity, and participation by tribes need improvement
- Elevators and ADA access from Overlook Walk to Promenade eliminated
  - Disabled have to use Market Garage and Heritage House elevators, then cross Elliott Way



Note: Artist renderings are not to scale and misrepresent increase in number of trees (LID adds only 16 trees).

- Pier 58 "reboot" will "re-evaluat[e] the schematic design"
- City says 2017 cost estimate based upon 2014 design no longer applicable
- Pier 58 needs USACE, DNR, WDFW, HPA, SEPA, SDCI, Marine Mammal Protection Act, DOE

Source: Ex. 31, ABS Final Special Benefit Study Addenda Volume, pp. 52-53 (Addenda A-49 & A-50); Ex. 26, 2019 Environmental Permitting Summary, SEA_LID_0046123.
