IN RE: Seeds

May 27, 1932.

City Council

Honorable Finance Committee
of the City Council,
Seattle, Washington.

Gentlemen:

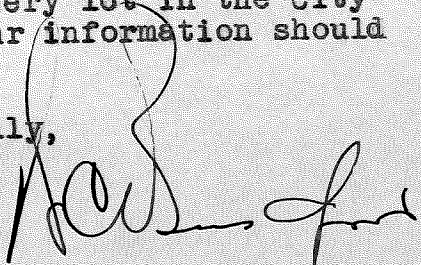

Attached please note final report of seed distribution to the needy unemployed.

You will note that there is an unexpended balance of \$393.63, but as the requests have been coming in so slowly for the last week, we have felt that it was proper to discontinue the issuance of these seeds. There was a small amount of seed left over at the time of our discontinuance and it was turned over to the Capitol Hill Local of the Unemployed Citizens League for their distribution should any requests be made.

We are particularly pleased with this distribution and of the work of Mr. E. F. Locker, who has handled the work for us. His untiring energy and attention to detail of reports and accounts is worthy of commendation; also, the fact that these seeds were purchased and distributed at an average cost per lot (40 x 100 feet) of \$0.67126.

A complete file of all reports showing location, size, seed supplied, etc., for every lot in the City is on file in our office, for your information should you so desire.

Respectfully,

W. C. Bickford,
Superintendent of Buildings.

May 27th, 1932
