PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

1209

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of he or himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

1217

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle, and my residence is correctly stated.

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

1212

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval.

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition. I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

3252

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

Pat Hallelly 3-C

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

1260

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire Protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle, and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition, I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition. I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

Ray Schutz 3

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

Bob Gremm

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

Corr

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to Fire Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle, and my residence is correctly stated.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (became height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition, I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electors of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.

PETITION FOR REFERENDUM
VACATION OF EIGHTH AVENUE

To the City Council
City of Seattle:

Ordinance 93643 should be referred to the citizens of Seattle for their approval or disapproval:

1. Access to First Hill and the Jackson-Rainier area will be prevented. The city has appropriated funds for an over-all study of the street system in this area to link these districts. The results of the study are not complete. No streets should be given away until all the facts are known.

2. Fire protection and the hospital. This ordinance was passed in spite of the Fire Department's protest. It cuts off a much needed approach to Harborview County Hospital. A street can be constructed to serve the hospital.

3. High-rises, congestion, and view. This street closing will permit high-rise buildings in the area to go even higher (because height is limited by distance to the street and you are eliminating the street). Views will be blocked and the hospital area will become more congested.

4. Parking and traffic. The Harborview Hospital area is already congested to a critical degree. The street area has been used for parking until now. This ordinance permits a building to be built where the public right of way now is.

5. Therefore, we the undersigned citizens of Seattle, Washington and qualified voters of the City of Seattle, under the authority of the Charter of the City of Seattle, do hereby petition your honorable body to submit said Ordinance No. 93643 passed the 24th day of February 1965 entitled: An ordinance vacating Eighth Avenue et al on petition of Seattle Housing Authority.

TO A REFERENDUM of the qualified electon of the City of Seattle at the next regular municipal election; and each of us for himself says: I have personally signed this Petition; I am a qualified and legal voter of the City of Seattle; and my residence is correctly stated.
