15 16. The record is clear that while no one can know what “special benefit” might
16 accrue to these properties in four years (if any), we do know that there are no actual benefits
17 now. The LID improvements provide no immediate special benefit to property owners
18 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
19 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
20 sewer system for future users). For example, notwithstanding the questionable hypothesis
21 that hotels will benefit from an expected increase in tourism (higher room rates or
22 occupancy) when the improvements are complete, it is undisputed that tourists are not
23 coming in larger numbers and paying higher room rates now because of something
24 happening five years down the road. *See* 3/12/2020 (J. Gordon) Hrg. Tr. at 207:11-23.
25
26

34
35 17. Further, there are no “plans and specifications” on file with the Clerk’s Office
36 for the LID Improvements, and it is unlawful to move to final assessments without such
37 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
38 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
39 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
40 dollars on projects still early in the design process. *See* Washington Attorney General
41 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
42
43
44
45
46
47

1 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
2 of programs and included “only so much of the overall costs” that took place within and
3 benefitted the assessed properties).
4

5
6 18. The COVID-19 crisis highlights how fundamentally speculative and unfair it
7 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
8 anticipated to be delivered five years later. Even before COVID, it was speculative to
9 assume that market highs experienced in October 2019¹ would be sustained through 2024,
10 after an already extraordinarily long expansion period. *See, e.g.*, 3/3/2020 (A. Gibbons)
11 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
12 my analysis in October 2019, who would have thought that this COVID issue would
13 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
14 process was that the market was going to continue to go up”—in fact, it did not for
15 Taxpayer’s property. *Id.* Mr. Gordon’s appraisals after March 1, 2020 showed that
16 downtown hotel values had already dropped an estimated 10-15% from their October 2019
17 levels, and occupancy rates were at zero or in single digits. *See* Gordon Decl. (dated
18 4/21/2020) at ¶ 9. Hotels without guests will derive no benefit, special or otherwise, from
19 the planned LID Improvements. And even assuming hotels recover prior to 2024, there is
20 no basis for assuming that values hypothesized in October 2019 will remain relevant; they
21 are already irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶ 12 (dated 7/7/2020).
22 Although COVID does not change actual values as of October 2019 (*see* Examiner’s
23 Recommendation at 109), the pandemic has impacted *current* values and rendered the
24 hypothetical October 2019 Final Study valuations outdated.
25

26 19. As another example of how future events could affect the accuracy and
27 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing

1 Examiner re-open the record to allow the City to explain whether the assessments against
2 property owners within the LID are, in fact, being used by the City to fund the emergency
3 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
4 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
5 would be improperly imposing costs on property owners within the LID for improvements
6 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
7 habitat and City infrastructure—this does not provide any special benefit to LID property
8 owners.
9

10
11 20. There is also no certainty the improvements will be delivered on time. Mr.
12 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
13 delay in construction schedule would not constitute a “material change” under the City
14 Council’s ordinance authorizing the improvements. In other words, the City cannot
15 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
16 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
17 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
18 potential delays and project changes inherent in those processes, that call into question the

1 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
2 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
3 Decl., dated 4/15/2020).
4

5
6 21. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
7 he could not point to a single one where the assessment roll was finalized five years in
8 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
9 he has never recommended final special assessments based on designs less than 30 percent
10 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
11 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
12 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
13 at 66:17-25. He performed no independent due diligence to determine the reliability of the
14 City’s estimates for completion of the LID Improvements, or to ensure that proposed
15 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
16 agreed that if any of his assumptions are incorrect, his opinion of market value would need
17 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
18 68:11-18.
19
20

21
22 22. The City has cited no authority—and Taxpayer is aware of none—that
23 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
24 assess taxes for “actual” special benefits that will not accrue for another five years (if all
25 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
26 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
27 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
28 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
2
3 IV.C.14, and IV.C.18.

4
5 23. Failure to discount special benefit estimates to account for risks and present
6 value. Due to the inherent uncertainty, Taxpayer's expert opine that the Final Study should
7
8 have accounted for risks associated with delivery of the improvements (including permitting
9
10 risk, construction risk, general economic risk) and any special damages associated with
11
12 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
13
14 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
15
16 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
17
18 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) ("Appraisers routinely consider
19
20 the impact of future conditions [through] discounted cash flow analysis.").

21
22
23 24. Mr. Macaulay acknowledged that appraisers can discount the value of a
24
25 future condition not in place at the date of valuation and can discount for the time value of
26
27 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
28
29 until 2024, "[y]ou would be discounting it back to a present value." *Id.* at 77:2-19.
30
31 Discounting would also have been consistent with his approach for analyzing special
32
33 benefits to vacant land. He testified that the difference between similarly situated vacant
34
35 sites slated for development and already developed sites was that the labor, capital and risks
36
37 associated with development had not yet been borne for those vacant sites. Therefore, the
38
39 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
40
41 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
42
43 fully permitted, has not completed environmental review, and has not reached full design is
44
45 presently worth significantly less.
46
47

1 25. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
2 present value, an appraiser would consider discount rates for land development to account
3 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
4 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
5 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
6 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
7
8
9
10
11

12 26. Applying the Q19 Korpacz rates and assuming arguendo that Macauley's
13 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
14 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
15 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
16 ignoring momentarily all of the other methodological and other flaws discussed here and in
17 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
18 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
19 exceeds special benefits when reduced to present value. Further, to the extent the City is
20 arguing that because they are permitted to assess 100% of the special benefit, the special
21 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
22 is again wrong. After applying proper discounting, the City's proposed special benefit
23 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
24 100% of the total estimated special benefit.
25
26
27
28
29
30
31
32
33
34
35
36
37

38 27. But even the assumption that the LID improvements would deliver benefits
39 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
40 on. Rather, those studies demonstrate that a discount period of five years is conservative.
41 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
42 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
43
44
45
46
47

1 indicates that during the construction period, the Greenway district “significantly” lagged in
2 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
3 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
4 30-31 (discussing New York City High Line and San Francisco Embarcadero
5 improvements). Given the lengthy delay, any prediction of future special benefits is
6 speculative, especially during the construction phase where values are likely to decline.
7
8 Second Decl. of Shorett ISO Closing Stmt., ¶ 6 (dated 7/7/2020). And assuming the LID
9 Improvements take a similarly long period of time after they are complete to start producing
10 tangible property value benefits, each additional year of delay results in further discount to
11 the present value of any future alleged benefit. Gibbons Decl. ISO Closing Stmt., ¶ 19, Ex.
12 A.
13
14

15 28. Applying the same discounting methods described above and in Mr. Gibbons
16 declaration, the 2019 net present value of ABS’s estimate for benefits that actually start
17 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
18 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
19 100% assessment should be no more than \$336,294. Anything more would permit the City
20 to assess Taxpayer based on a hypothetical assumption that these improvements are in place
21 and providing benefit, and ignore the risks, construction disamenity, and time value of
22 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
23 would counsel that the assessment should be only 39.2% of that assessment cap, or
24 \$131,827.
25
26

27 29. Attachment C includes two Excel spreadsheets applying these discounting
28 methods to Taxpayer’s assessment. It is undisputed that special benefits will not actually
29 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 demonstrates that discounting the City’s hypothetical October 2019 special benefits to
2 present value would reduce Taxpayer’s assessment to \$479,912, exclusive of any other
3 flaws in the City’s proposed assessment. The second spreadsheet shows even more drastic
4 reductions after taking into account: (1) Taxpayer’s experts’ estimated “Before” value based
5 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
6 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
7 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
8 the time it takes for the improvements to capture property value). After such reductions,
9 Taxpayer’s assessment would be just \$283,481 (for the 5-year discount) or \$77,891 (for the
10 10-year discount). Further, the spreadsheet concludes a “zero” benefit for this property
11 because, based on Dr. Crompton’s testimony, Taxpayer’s property is more than 2,000 feet
12 from the core “park” improvements and therefore too distant to receive any special benefit.
13 Neither of these spreadsheets address other issues raised by Taxpayer’s appeal, but are
14 intended to help demonstrate how unfair and inflated the City’s proposed hypothetical
15 assessment is. The Hearing Examiner’s Recommendation simply dismisses Taxpayer’s
16 discounting argument without legal or factual analysis; that failure is error.

32 **Appraisal and Assessment Calculation Methods Are Flawed**

33
34 30. The “general rule is that each lot, piece, or parcel of land should be assessed
35 separately” for purposes of local improvement district special assessment. *Doolittle*, 114
36 Wn.2d at 97.

37
38 31. It is proper to sustain a challenge to an assessment, even without the appraisal
39 testimony from the owner, where the objector’s expert establishes that the assessment was
40 “clearly grounded upon a fundamentally wrong basis” due to an error in the method
41 employed by the City’s appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
42
43
44
45
46
47

1 32. The City’s appraiser purports to utilize the income method of valuation but
2
3 relied on inaccurate revenue and market data, as discussed further below.

4
5 33. The City’s appraiser purports to utilize the comparable sales method of
6
7 valuation, but no City witness attempted “to characterize any one, or all of them, as
8
9 comparable to [Taxpayer’s property].” *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
10
11 “several serious flaws” in ABS’s LID analysis in that case, including that the appraiser
12
13 “attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
14
15 characterize any one, or all of them, as comparable to any particular property within the LID”).
16
17 And no City witness could explain how specific adjustments were made to these sales to
18
19 account for value increases due to the hypothesized Before and After Improvements. For this
20
21 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.

22
23 34. Special assessment improperly includes value lift from the Before
24
25 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
26
27 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
28
29 Improvements, which WSDOT had independently committed to fund. However, Mr.
30
31 Macauley did not calculate the actual market value of LID properties in October 2019, and
32
33 did not separately analyze the hypothetical increase to property values attributable to
34
35 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
36
37 current value and then separately calculate a hypothetical “With WSDOT” Before value);
38
39 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
40
41 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
42
43 3-4; Shorett Appraisal Review (attached to Appeal Petition) at 2-14. Without any
44
45 documented basis or support, Mr. Macauley simply “ma[de] a judgment a call” on what
46
47 occupancy and rates would have been for the commercial properties assuming all of the

1 WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-130:11. This
2 outright omission precludes any independent evaluation of the true market “Before” values.
3
4 See 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards;
5
6 if an appraiser uses current sales data to infer values, then the appraiser must explain how he
7
8 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
9
10 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
11
12 other road, pedestrian and landscaping improvements WSDOT had already committed to
13
14 make.
15

16
17 35. However, because Mr. Macaulay testified that he did include some WSDOT-
18
19 related value-lift in the “Before” values, it follows that part of the special assessment
20
21 improperly is based on value attributable to the WSDOT Improvements. As shown by
22
23 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
24
25 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
26
27 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
28
29 special benefit assignment would result in \$300,000 of over-assessment. See Gibbons Decl.
30
31 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
32
33 to properly exclude the value of Before Improvements from the assessments. For these
34
35 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
36
37 Sections II.16, II.19, II.29, and IV.B.11(a)(ii)
38

39 36. Special benefits were assigned rather than measured. Mr. Macaulay
40
41 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
42
43 property. See 1/30/2020 Gibbons Letter (attached to Petition); 3/12/2020 (P. Shorett) Hrg.
44
45 Tr. at 49:4-50:1; *id.* (J. Gordon) at 168:2-20; 176:1-10; 33/3/2020 (A. Gibbons) Hrg Tr. at
46
47 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr. Macaulay used to

1 analyze the commercial properties, Taxpayer's experts concluded that Mr. Macaulay based
2 adjustments on hypothesized very small increases to property revenue and very small
3 reductions to cap rates to "calculate" an "After" value due to the coming 2024 LID
4 Improvements. Attachment B (ABS Spreadsheet). These series of micro adjustments were
5 based on "professional judgment" that are neither shown nor replicable.
6
7
8
9

10 37. For these reasons, Taxpayer appeals the following portions of the Examiner's
11 Recommendation: Sections II.19 and IV.B.11(a)(iii).
12
13

14 38. Special benefit falls within margin of error. The Final Special Benefit Study
15 applies an estimated value enhancement of less than 4%, which is generally within the
16 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
17 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
18 Taxpayer's experts explained that if two appraisers independently arrive at values within 5%
19 of one another, this difference is considered reasonable as it falls within the standard margin
20 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/11/2020
21 (P. Shorett) Hrg. Tr. at 216:25-217:11. Because Mr. Macaulay's micro-special benefit
22 percentages fall far below that 5% margin, "there is no way of authenticating" such
23 incremental changes because "[m]arket forces completely obliterate any tiny little noise
24 factor like that." *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed
25 during his deposition that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Yet,
26 Mr. Macaulay assigned or purported to measure a difference in revenue and cap rates for
27 Taxpayer's property within that margin. Additionally, the fact that "Before" values are also
28 based on a hypothetical that adds some unstated incremental value to actual 2019 values
29 exacerbates this issue—the ability for an appraiser to discern the micro-value differences
30 between hypothetical conditions that are so similar (the WSDOT improvements compared to
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 the LID improvements) “verges on being ludicrous.” 3/3/2020 (A. Gibbons) Hrg. Tr. at
2
3 89:4-90:7.

4
5 39. Even if it were possible to accurately tease out such a miniscule hypothetical
6
7 value change due to improvements coming five years later, experts testified that there is no
8
9 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
10
11 what he felt the changes (hypothetically) would be. *See* 3/12/2020 (J. Gordon) Hrg. Tr. at
12
13 168:2-20; 176:1-177:6; *id.* (P. Shorett) at 49:4-50:1; 3/3/2020 (A. Gibbons) Hrg. Tr. at
14
15 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
16
17 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
18
19 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

20
21 40. No analysis of value increase attributable to individual components of the
22
23 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
24
25 percentage difference between hypothetical Before and After conditions. Throughout his
26
27 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
28
29 descriptions in the Addenda even though he testified that he relied on these to calculate
30
31 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
32
33 someone might be able to determine how he attributed value to After conditions described in
34
35 the Addenda, he answered that that was “not the scope of the assignment” because he was
36
37 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
38
39 that the six components were not actually a continuous project, that he was viewing them
40
41 together because the City asked him to, and that if he were to view them independently,
42
43 there was a low probability that properties in the north would specially benefit from
44
45 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.
46
47

1 41. Not only did he fail to analyze benefits from each of these non-contiguous
2 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.*,
3 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
4 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
5 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
6 objectives that guided regulators’ assessment of architectural plans for buildings along a
7 “signature street” were so vague that they amounted to ad hoc review based on the
8 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
9 even though he used the renderings as “visual aid[s] in appraising the property in the before
10 and after” to “visually see what the differences would be,” he could not explain what
11 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
12 when shown a rendering of a two-lane road going down to one-lane in the After condition
13 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
14 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
15 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
16 could explain the depiction of the same trees in the After condition nearly twice as tall as in
17 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
18 of the Examiner’s Recommendation: II.27 and IV.B.4.
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 42. Special assessment is not supported by comparable studies, data or reports.
2
3 Mr. Macaulay's references to empirical research do not justify his fundamental assumption
4 that the LID Improvements will lead to meaningfully increased real estate values for
5 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
6
7 comparable sales or information from the "over twenty-five studies and reports" to arrive at
8
9 very precise special benefit increases for the commercial properties, including Taxpayer's
10
11 property. For example, although Mr. Macaulay stated that no single report or study was
12
13 directly on point due to the unique nature of the LID Improvements (*see, e.g.,* 6/25/2020
14
15 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
16
17 parcel-by-parcel analysis other than to say that the studies generally provided "some
18
19 background to base decisions on." *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
20
21 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
22
23 similarities and differences between these improvements and the comparable parks he
24
25 looked at).
26

27
28 43. Mr. Macaulay purports to rely on Dr. Crompton's research to justify the
29
30 assignment of incremental increase of 0.5% to 4% to property values within the LID.
31
32 However, among other critiques, Dr. Crompton testified that Mr. Macaulay's reliance on his
33
34 research misinterprets his work in critical ways, including because the LID Improvements
35
36 manifest the characteristics of a parkway (not a park), and his research indicates that most of
37
38 a *park's* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
39
40 in Seattle). *See* Hrg. Exhibit 94 (Crompton's report). Further, updated research shows park-
41
42 related value increases are in fact smaller; that estimated increases are "best guesses" rather
43
44 than predictions of property value increases in a particular city; and that percentages do not
45
46 account for diminishing returns after taking into account water views, which would be the
47

1 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
2 topography grants most properties in downtown a water view.
3

4
5 44. Rather than addressing Dr. Crompton's critiques, Mr. Macaulay simply states
6 that this was just one source of information that was not entirely relevant because, among
7 other things, Dr. Crompton's research dealt with parks and not streetscapes. However, Dr.
8 Crompton's critiques were based on Mr. Macaulay's own testimony that the core "park"
9 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
10 180:2 (explaining that for purposes of "drawing boundaries around a park" he was
11 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
12 Crompton concluded that 500 feet via road from "park" improvements is just one or two
13 Seattle blocks and that Mr. Macaulay "inappropriately extend[ed] the LID impact
14 significantly beyond that which the park study indicated (even if it was legitimate to use the
15 park review's findings)." Hrg. Exhibit 94 (Crompton's Report) at 7. Indeed, the LID area
16 extends even past 2,000 feet from the core "park" improvements, which is the outer limit of
17 impact applicable to "community parks"—which the LID Improvements are not. *Id.* The
18 Hyatt Regency is not within 2,000 road network feet from the "park" improvements. *See*
19 Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.
20
21

22
23 45. Further, Mr. Macaulay's testimony that he analyzed streetscapes, parkways,
24 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
25 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
26 based on the attention given to Dr. Crompton's work in the Final Study and supporting
27 materials, it was clearly an important—if not *the* most important—source of information for
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 estimating special benefits (especially with respect to the condos).⁷ No City witness
2 adequately explained exactly how Dr. Crompton's research informed ABS Valuation's
3 parcel-by-parcel analysis.
4

5
6 46. The destination parks discussed in the Final Special Benefit Study do not
7 provide reliable, comparable, and valid support for the calculation of special assessments
8 here. *See* Shorett Appraisal Review (attached to Petition) at 15-19 (Shorett's critique of
9 every case study cited concludes the changes to those "dwarf the difference between the
10 before-after condition of the property with LID"); Gibbons 5/2/2018 Letter at 4; Hrg.
11 Exhibit 49 (P. Shorett's Supplemental Report); 3/11/2020 (P. Shorett) Hrg. Tr. at 208:8-24;
12 3/12/2020 (P. Shorett) Hrg. Tr. at 6:19-7:18; Second Decl. of Shorett ISO Closing Stmt., ¶ 5
13 (explaining again why the San Francisco, Boston, and Portland case studies are not in fact
14 comparable). None of the parks cited in the Final Special Benefit Study were funded by a
15 LID. And in virtually all of those cases, the park improvements dramatically restored
16 unimproved or blighted areas, and properties evaluated were within two or three blocks of
17 the park.
18

19 47. ABS's claimed reliance on three economic studies to support property value
20 increase is also flawed. The HR&A study does not inform what value increases are
21 expected from the LID Improvements because it projects increases to tourism from *all* of the
22 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
23
24
25
26

37
38
39
40
41
42 ⁷ Of the 62 files in Mr. Macaulay's "2019 Report Info" folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton's study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 dissimilar parks in other cities,⁸ making the methodological application to the LID
2 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
3 conclusion that there would be *no new net visitors* from downtown residents as a result of
4 the LID Improvements and could not explain how this impacted his condo analysis.
5
6
7
8
9 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
10 Property Values" primarily focused on whether the benefits accrue to the larger community
11 rather than properties adjacent to the park. And the 2014 New York City Department of
12 Transportation study is not based on real estate transactions and market sales and fails to
13 substantiate any link between increased retail sales and property values. Moreover, this
14 study only looked at impact either directly abutting the streetscape improvement, or a couple
15 hundred feet for plaza-like improvements.
16
17
18
19
20
21

22 48. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
23 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
24 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
25 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
26 compared with HR&A's estimate of \$191 million for just the waterfront improvements, and
27 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
28 asked whether he considered that HR&A's estimated LID impact is six times greater than
29 TPL's assessment of Seattle's entire park system, he surmised that it was because the
30
31
32
33
34
35
36
37
38
39

40
41 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
42 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
43 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
44 expected tourists visiting the LID park was calculated using data from only from New York City, a
45 notorious tourist destination. More fundamentally, the assumption that hotel visitors are going to
46 increase their stays in the Seattle core based on proximity to Pier 58, as an example, is contrary to
47 how hotel visitors actually select hotels to stay in.

1 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
2 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
3 assumptions to account for this difference, which may be partly explained by the fact that
4 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
5 approximately 3.44% of King County tourists visit Seattle primarily because of the city
6 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
7 waterfront improvements.
8
9

10
11
12
13
14
15 49. Although proximity to the improvements is a key factor in all of these
16 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
17 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
18 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
19 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
20 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
21 Improvements is approximate 20 acres and it is not a community park.⁹
22
23
24
25
26
27

28
29 50. There is no explanation in the Final Study or the supporting materials of how
30 the studies or comparable sales were used to derive values for Taxpayer's property. For
31 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
32 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.
33
34
35
36

37 51. Failure to comply with USPAP. Taxpayer's assessment also rests on a
38 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
39 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
40
41
42
43

44 ⁹ *See*
45 [https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf)
46 [Qs_Final.pdf](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf) ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle's central waterfront to downtown.").

1 recognized) for developing the MAI standards for mass appraisals, testified that the Final
2 Study does not meet mass appraisal standards nor allow for independent assessment of the
3 accuracy of Mr. Macauley's conclusions.
4

5
6 52. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
7 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
8 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
9 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
10 testimony suggests that he incorrectly believed that the only difference between direct
11 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
12 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
13 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
14 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
15 Gordon uses in doing his limited restricted report").
16

17 53. But the difference is not only in reporting—mass appraisal techniques must
18 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
19 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
20 parcel approach:
21

22 The mass appraisal technique is an appraisal method used to evaluate
23 a group of properties that are subject to similar market forces as of a
24 certain date through the use of market data, statistical analysis and
25 testing. As a result, the mass appraisal technique does not require or
26 involve analysis of each individual property's specific data.
27

28 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
29

30 54. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
31 universe of properties as a given date using standard methodology, employing common data,
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 and allowing for statistical testing.” Appraisal Foundation, Uniform Standards of
2 Professional Appraisal Practice at 5 (2020-2021). And the definition for “mass appraisal
3 model” is “a mathematical expression of how supply and demand factors interact in a
4 market.” *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
5 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
6 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
7
8
9
10
11

12 55. Regardless of client direction, Mr. Macaulay is required to comply with
13 USPAP. So if, as he determined, a “[p]arcel-by-parcel direct appraisal” would not have been
14 economically feasible because it would have taken “an incredible amount of time and cost”
15 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
16 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 (“performing an
17 individual appraisal of each [condo] parcel would have been cost and time prohibitive”).
18
19
20
21
22

23 56. But Mr. Macaulay’s methods fail to comply with USPAP Standards 5 and 6
24 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
25 value, fails to calibrate the model structure to determine the contribution of the individual
26 characteristics affecting value, and does not review the mass appraisal results against actual
27 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
28 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
29
30
31
32
33
34
35
36

37 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
38 relationship between characteristics that affect value, and to calibrate that model to specify how
39 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
40 21). The purpose is to rationally determine what characteristics will create value, and by how much.
41 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
42 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
43 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
44 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
45 include explanation of the model specification, data requirements, calibration methods, and
46 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
47

1 57. Mr. Macaulay explained that factors like “aesthetic change in the area, the
2 proximity to the elements, the increase in market rent, market vacancy changes,
3 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
4 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
5 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
6 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
7 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
8 internal review process. *Id.* at 104:24-105:20. And because both the Before and After
9 values were hypothetical, it was not possible to identify matched pair sales and no City
10 witness explained how ABS Valuation made adjustments to “comparable” sales in order to
11 check their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which
12 requires him to explain his model structure.
13
14

15 58. For these reasons, Taxpayer appeals the following portions of the Examiner’s
16 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
17 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
18 and appeals the Examiner’s denial of that motion.
19
20

21 59. Finally, Taxpayer’s property is not appurtenant—or even in close
22 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
23 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
24 close proximity to the property on which expert testimony was given”). The Hyatt Regency
25 is more than 3/4 of a mile walk—approximately 3,500 feet as the crow flies—from Pier 58
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44

45 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
46 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
47 Hrg. Tr. at 206:15-207:17.

1 and the proposed waterfront improvements. *See* Hrg. Exhibit 114 (Decl. of Z. Ahmed), ¶
2
3 24. And, as described above, the special assessment is overstated because the Final Study
4 makes no attempt to determine general benefits, existing amenities for Taxpayer’s specific
5 property, or special detriments. In addition, it is speculative due to the fact that, as of
6
7 October 2019, improvements were not in place—and, in fact, much of the waterfront is a
8
9 construction zone following removal of the viaduct and now Pier 58 demolition. Under
10
11 these circumstances, rather than relying on entirely imaginary income and shaky
12
13 hypotheticals, Mr. Macaulay at the very least should have discounted the special benefit
14
15 estimates or waited to perform the Study until the improvements were at least close to
16
17 complete.
18
19

20 21 **Erroneous Pre-Improvement Valuation**

22
23 60. The proposed final assessment erroneously overstates the pre-improvement
24 value of Taxpayer’s property as of October 1, 2019 and, as a result, overstates the special
25 benefit to the Taxpayer’s property.
26

27
28 61. The City’s Final Study was used to compute the proposed final assessment of
29 the Hyatt Regency. The City’s Study purportedly uses data from the King County
30 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
31 Study does not accurately reflect this data. For example, the City’s Study values Taxpayer’s
32 property at \$732,952,000 as of October 1, 2019. However, the King County assessor
33 determined the true and fair value of the property to be \$486,906,100, valued in 2019 for tax
34 year 2020. In other words, the Final Special Benefit Study’s valuation is 151% the King

43

44
45 ¹¹ *See, e.g.*, Final Special Benefit Study, “All Other LID Commercial Properties” Spreadsheet
46 (providing a “County Link” to the King County Department of Assessment’s online “eReal
47 Property” search tool).

1 County's assessed value. The Final Special Benefit Study does not explain this difference—
2
3 or any differences—between its pre-improvement valuation and its supposed source for
4
5 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
6
7 Recommendation.

8
9 62. Further, the City's analysis was based on unreliable market data. For the
10
11 hotels, Mr. Macaulay's decision to rely on inaccurate market data notably deviates from
12
13 standard appraisal practices because more reliable data in the form of STR reports are
14
15 readily available. Examiner Recommendation at Section IV.C.10; 3/12/2020 (J. Gordon)
16
17 Hrg. Tr. at 196:5-197:12; 215:9-18. Without the STR reports or actual input from the hotels,
18
19 Mr. Macaulay's "Before" valuations are drastically overstated in large part because he relies
20
21 on publicly available "room rack rates" to estimate hotel income. *See id.* (J. Gordon) at
22
23 162:3-18; 170:16-171:13; 179:25-180:14; 192:15-22. As the Examiner found, "Mr. Gordon
24
25 is a specialist expert in appraising hotels and his expert opinion, in addition to the specific
26
27 information he relied on for that opinion, is superior to the opinion and supporting data of
28
29 the City in its valuation." Examiner's Recommendation at II.16. The Examiner concluded
30
31 that Mr. Gordon's valuations were more reliable "due to the specialist nature of Mr.
32
33 Gordon's background and the specificity of the valuation data upon which he relied"—
34
35 namely STR reports or actual revenue data from the hotel. *Id.* at IV.C.10. Therefore, "the
36
37 valuation of [this] property should be remanded for recalculation by the City appraiser based
38
39 on the information provided by [this] Objector." *Id.*

40
41 63. Specifically, the evidence and testimony presented showed that the actual
42
43 average daily room rate (ADR) for the Hyatt Regency in 2019 was \$205, stabilized at \$222.
44
45 However, Mr. Macaulay incorrectly estimated an ADR of \$365 for this property which is
46
47 78% higher than the actual ADR, far exceeds the most optimistic assumptions about future

1 growth in hotel room rates for the Hyatt Regency, and is not a reasonable assumption in
2 valuing a hotel of this type in the downtown Seattle market. In addition, the Hyatt Regency
3 had an average occupancy rate of 67.8% in 2019, which is substantially lower than the 80%
4 occupancy rate assumed by Mr. Macaulay in valuing the property. And the Hyatt Regency
5 has significantly reduced operations as a result of the COVID-19 outbreak.
6
7
8
9

10 64. Due to these errors alone, Mr. Macaulay artificially raised the property's
11 Before value; Mr. Gordon valued the property at \$494,800,000 (without personal property),
12 which is \$238,152,000 (or about 32.5%) less than ABS Valuation's estimate. Setting aside
13 that ABS Valuation's inclusion of personal property when valuing hotels is disproportionate
14 and flawed, Mr. Gordon's estimate of value including personal property is \$507,400,000,
15 which is still significantly lower than ABS Valuation's estimate (\$732,952,000). *See* Fourth
16 Decl. of Gordon, at ¶ 5 (dated 7/7/2020).
17
18
19
20
21
22
23

24 65. Taxpayer expects an opportunity to respond to the revised assessment once
25 that is provided (*see* Examiner's Recommendation at V) and appeals the remainder of
26 Section IV.C.10 of the Examiner's Recommendation rejecting Taxpayer's other bases for
27 reducing the assessment. For example, Taxpayer disagrees with the Examiner's conclusion
28 that one of the reasons Mr. Gordon's appraisals concludes a lower value for this property is
29 because he was not valuing the properties in the "Before" condition. Examiner's
30 Recommendation at Section II.16. This does not explain the 78% difference between ABS
31 Valuation's estimate and actual average room rates for the Hyatt Regency. Further, Mr.
32 Lukens—who reviewed ABS's valuation estimates for reasonableness—was not even aware
33 that the Before values were supposed to include the WSDOT Improvements. 6/26/2020
34 Hrg. Tr. at 165:2-166:22.
35
36
37
38
39
40
41
42
43
44
45
46
47

1 66. Thus, aside from multiple other reasons why computation of the special
2 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
3 improvement values that do not accurately reflect market data. For these reason, Taxpayer
4 appeals Section II.16 of the Examiner’s Recommendation.
5
6
7
8

9 **Erroneous Computation of Special Benefit**

10 67. “Special benefit” is “the increase in fair market value attributable to the local
11 improvements.” *Doolittle*, 114 Wn.2d at 103. “A benefit that a particular piece of property
12 may receive by reason of the improvement is not measured alone by the physical character
13 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
14 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
15 the particular tract or property benefited by the entire improvement, and is it assessed
16 proportionately with the other property included within the assessment district?” *Id.* 165–
17 66.
18
19
20
21
22
23
24
25

26 68. The proposed final assessment erroneously overstates the special benefit of
27 LID improvements in a number of ways.
28
29

30 69. Overstated Before value led to overstated special benefit. ABS Valuation’s
31 overstated Before value resulted in an inflated special benefit estimate and assessment after
32 Mr. Macaulay made micro adjustments to “Before” revenue and capitalization rates to
33 calculate an After value. Mr. Macaulay conceded that using his methods and his
34 spreadsheets, changing the room rate alone would change the special assessment. 6/25/2020
35 Hrg. Tr. at 42:21-43:15 (explaining that changing the room rate will result in a different
36 assessment and the same is true for every hotel); *see also* 6/23/2020 Hrg. Tr. at 111:9-11,
37 132:12-133:10, 140:20-141:9. And he agreed that if Mr. Gordon’s numbers are accurate—
38
39
40
41
42
43
44
45
46
47

1 and there is no evidence they are not—then ABS would need to redo the appraisal for the
2 Hyatt Regency to determine if adjustments are needed. *See id.* 109:17-110:2.

3
4 70. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
5 the Hyatt Regency, Mr. Macaulay assumed room/rental rates would increase by 0.20% (low)
6 and 0.45% (high) due to the 2024 LID Improvements. But as Mr. Gordon testified, it is not
7 possible to accurately conclude that the reason for this level of percentage increase would be
8 due to the LID Improvements, and there appears to be no support for assignment of these
9 percentages. Based on formulas in the spreadsheets, Mr. Macaulay then uses these same
10 percentages (0.20% and 0.45%) to increase food and beverage revenue, and parking and
11 other income. He then uses this hypothesized increased revenue to calculate a new net
12 operating income for the commercial properties and capitalizes that to come up with an
13 “After” valuation.
14

15 71. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
16 operating income remains the same as in the hypothetical “Before” condition, but changes
17 the cap rate. For the Hyatt Regency, the cap rate goes from 7.25% to 7.2% (low scenario,
18 creating a bigger value increase) and 7.23% (high scenario, creating a lower value increase).
19 Mr. Gordon likewise explained that cap rate changes of 0.05% or 0.02% are not typically
20 measurable, and there appears to be no support for these changes in the Final Study or any
21 of its supporting materials.
22

23 72. Mr. Macaulay then averages his four “After” values to arrive at a final special
24 benefit conclusion. For the Hyatt Regency, this is an increase in property value of 0.49%
25 due to the LID Improvements.
26

27 73. Mr. Macaulay offered little justification for his micro adjustments to revenue
28 and capitalization rates. When asked precisely what the basis is for his special benefit
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 percentage increases to revenue for each commercial property, he could not point to
2 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
3 is nothing in the report to allow a reader to understand how he came up with these
4 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
5 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
6 the basis for his belief that certain factors—liked increased connectivity—will increase
7 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
8 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
9 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
10 sources equally even though there was no separate analysis done for food and beverage or
11 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
12 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
13 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
14 properties.

15
16 74. When asked the basis for making such adjustments specifically for hotels,
17 Mr. Macaulay pointed to “discussions with Mr. Lukens.” *Id.* at 116:5-19; 117:1-8; 126:3-7
18 (“Mr. Lukens helped significantly in that regard in helping, you know, look at probable
19 adjustments”). However, Mr. Lukens testified that he did not review the percentage
20 increases. *See* 6/25/2020 Hrg. Tr. at 170:24-172:20.¹² And he did not review any work or

41
42
43
44
45
46
47

¹² As another example of how arbitrary Mr. Macaulay’s methods are, he assigned different special benefit and capitalization rate increases to the parking and retail parcels associated with the Grand Hyatt and the Four Season even though these sources of revenue receive identical increases when they are part of the same legal parcel as the hotel. But he ends up concluding the same special benefit increase overall (3% for all of the Four Seasons parcels and 1.5% for the Grand Hyatt parcels). When asked whether this was a matter of coincidence, his answer was that is “just our estimate of how the market would react.” 6/23/2020 Hrg. Tr. at 151:24-152:9. But by comparison, a

1 data to determine whether the revenue percentage adjustments in the spreadsheets were
2 reasonable, nor did he ever find them to be unreasonable or suggest any changes. *Id.* at
3 172:3-20. Instead, he appeared to be considering them for the first time on cross
4 examination, testifying that the adjustments “appear to be a kind of sensitivity analysis” and
5 “appear to be a very minor change.” *Id.* at 170:18-172:13. Likewise, he had no
6 understanding of what factors went into determining the change in capitalization rates in the
7 spreadsheets. *Id.* at 173:23-174:1. And he did not know how ABS Valuation reconciled the
8 four scenarios to come to final estimated special benefit. *Id.* at 174:22-175:4.
9

10
11 75. Mr. Macaulay testified that he used comparable sales as a reasonableness
12 check for commercial properties. But as explained above, no City witness has explained
13 how anyone, or all, of the sales are comparable to any particular commercial property within
14 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
15 in order to make sales “comparable,” he would have had to make adjustments to account for
16 Before and After conditions, but there is no way to understand how adjustments were made
17 because he “didn’t do a separate sales comparison approach where we showed adjustments
18 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
19 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
20 *Id.* at 127:10-128:24.
21

22
23 76. It also bears noting that any “internal review” of the special benefit estimates
24 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
25 error. Indeed, given all the same information, he seemed to suggest that it would be
26 perfectly reasonable for another experienced appraiser to come up with special benefit
27

28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46 parking lot near the Grand Hyatt (Parcel 0659000355) received just a 0.65% special benefit even
47 though it is one block closer to the waterfront.

1 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
2
3 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
4
5 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
6
7 margin of error conflicts with the testimony of Taxpayer's experts and reaffirms that there
8
9 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
10
11 margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there are still
12
13 reasonable and unreasonable variations within the appraisal field. *See Examiner's*
14
15 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
16
17 special because it is arbitrarily assigned; and it is too small to realistically be supported by
18
19 appraisal techniques.

20
21 77. No evidence of special benefit. There is "no actual evidence from any seller
22
23 or purchaser that the price was higher because of the LID improvements." *Bellevue Plaza,*
24
25 *Inc*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not identified any
26
27 seller or buyer, or any particular property where the existence of the LID improvements had
28
29 an effect on the market price." *Id.* at 410-11. Meanwhile, Taxpayer has explained that the
30
31 property has not increased rental rates or revenue due to the forthcoming LID
32
33 Improvements, because, among other reasons (and apart from COVID), the improvements
34
35 ABS believes will generate value do not exist, and will not for a number of years to come.
36
37 There are no comparable sales because the LID Improvements are not in place, nor will they
38
39 be until the end of 2024 if completed on schedule. Notably, this property is further than
40
41 2,000 feet from the core waterfront improvement, making any basis for finding a special
42
43 benefit extremely tenuous given Dr. Crompton's testimony and reports.

44
45 78. The fair market value of Taxpayer's property has not changed due to
46
47 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially

1 benefited from installation of new water main and fire hydrant where it was already
2 adequately supplied with water and afforded adequate fire protection). And in any event,
3 any value attributable to removal of the viaduct was to be excluded from the assessment
4 calculation.
5
6

7
8 79. There is no special benefit because LID improvements in fact diminish the
9 value of Taxpayer's property potentially drawing visitors away towards improvements that
10 do not abut the property and increasing competition in other areas of the city. *See Kuskys*, 85
11 Wn. App. 493 (testimony of owners' expert that LID actually diminished value of property
12 was sufficient to rebut presumption that assessment was proper).
13
14

15 80. Moreover, the assessment formula is an attempt to distribute costs that do not
16 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
17 "merely a mathematical model that distributes costs").
18
19

20 81. The Special Benefit Study fails to address whether the \$346,000,000
21 estimated LID project cost takes into account the investment that would have occurred in the
22 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
23 invested. This is a critical component of estimating which properties receive a direct benefit
24 from the improvements, versus more incidental benefits further from the park.
25
26

27 82. Assessments are disproportionate. Taxpayer also presented evidence
28 showing that the assessments are disproportionate. For example, the City disproportionately
29 assessed hotels a greater percentage of the cost of the Improvements even though there no
30 evidence that hotel properties will in fact benefit. And even within the hotels, the
31 assessments are disproportionate. Mr. Gordon testified that the differences between the
32 special benefit increases for the Hyatt at Olive 8, the Grand Hyatt, and Hyatt Regency—
33 which are all very close together—made little sense and raised doubts as to proportionality.
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 83. Mr. Macaulay also included personal property in his valuation of hotels even
2 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
3 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
4 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
5 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
6 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
7 receiving a disproportionately high LID assessment in comparison to other property types,
8 since hotels were the only property type subject to personal property LID assessments.
9 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
10 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
11 notice procedures because hotel property owners only received notice that their real estate
12 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).

13 84. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
14 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
15 a television at the waterfront Marriott is assigned a greater special benefit than the same
16 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
17 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
18 unreasonable to assign a value lift to personal property that is replaceable at the same cost
19 and may be obsolete before the LID improvements are even completed. *See* Second Decl. of
20 Shorett ISO Closing Stmt., ¶ 7 (dated 7/7/2020). Further, personal property is highly
21 depreciable, and likely to be fully depreciated or potentially discarded by 2024. *Id.*; *see also*
22 Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must be redone to correct
23 for this error.

1 85. The only evidence the City provided specific to this property was to rebut
2
3 Mr. Gordon’s “Before” valuation. But the Hearing Examiner has already found that Mr.
4
5 Gordon’s valuation is more reliable. The remainder of the City’s evidence and testimony
6
7 regarding this property provides only general responses which have already been rebutted by
8
9 Taxpayer in its case-in-chief and cross-examination. *See* Lukens Decl., at ¶¶ 31-33 (dated
10
11 4/30/2020); Second Decl. of Bird, at ¶¶ 74-82 (6/26/2020).

12 86. The proposed final assessment substantially exceeds the special benefit to the
13
14 property and is grossly disproportionate to similarly situated properties within the LID. For
15
16 these reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
17
18 Sections II.17, II.22, II.23, II.27, IV.B.4, IV.B.11(a)(iii), and IV.C.10.

19
20
21 **State Environmental Policy Act and Other Environmental Permitting**

22 87. While this appeal is not challenging the City’s environmental review and
23
24 permitting processes, those processes are relevant in determining the legality of the
25
26 assessments, and to assessing the delivery risk, the present value of the City’s plans, and
27
28 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
29
30 pursue projects that have not yet undergone environmental review (thus limiting the choice
31
32 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
33
34 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
35
36 is just beginning. Further, the City has segmented environmental review, and still has a
37
38 gauntlet of federal, state and tribal review processes to complete before it will be clear what
39
40 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
41
42 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
43
44 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
45
46 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
47

1 committing to reconstruction of Pier 58 and major street improvements without
2 environmental review, or the City's Final Special Study has improperly included and is
3 proposing to assess the Taxpayer the costs and special benefits of improvements that may
4 not get built. Either way, it is faulty process.
5
6
7

8 **Due Process Rights**

9
10 88. The City's failed to notify Taxpayer sufficiently in advance of the hearing to
11 allow Taxpayer to obtain evidence and prepare to properly challenge the assessments.
12 Because LID assessments involve a deprivation of property, affected owners have the right
13 to a hearing as to whether the improvement resulted (or will result) in special benefits to
14 their properties and whether their assessments are proportionate, which necessarily includes
15 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
16 555, 569–70, 229 P.3d 761 (2010).
17
18
19
20
21
22
23

24 89. The LID statute specifies that cities must mail notices giving the time and
25 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
26 publish the notice once a week for 2 consecutive weeks in the city's official newspaper, with
27 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
28 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
29 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
30 secure their own appraisal), evaluate proportionality of the proposed assessments, and
31 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
32 for anybody to get an appraisal”).
33
34
35
36
37
38
39
40
41

42 90. The City's Notice of Assessment was sent on December 30, 2019. And the
43 Final Special Benefit Study has only been available for public review since January 7, 2020.
44 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
45
46
47

1 order that would preserve and protect Taxpayer's right to analyze and respond to the Final
2 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
3 preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City's
4 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
5 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
6 the Examiner's Recommendation: I.B.
7
8
9
10
11
12

13 **VII. Relief Requested**

14 Taxpayer respectfully requests that the City Council:

- 15 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
16 assessment dated December 30, 2019; or
17
18 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
19 proposed final assessment to \$0 (zero), or such amount as Taxpayer establishes at the
20 hearing in this matter; or
21
22 3. Grant the Examiner's recommended remand but with instructions recalculate
23 and reduce Taxpayer's assessment using recognized appraisal techniques consistent with
24 USPAP and;
25
26 a. Excluding any property value increase attributable to viaduct removal and
27 other planned WSDOT Improvements;
28

24
25
26 **III. Statement of Elliot NE LLC's Interest and Incorporation of Prior Arguments**

27 ELLIOT NE LLC is the taxpayer for the property that is subject to the proposed
28
29 final assessment described in Section IV.

30
31 Elliot NE LLC is amending its appeal as authorized in City of Seattle Resolution
32 31979 to include additional arguments relevant to the revised Final Recommendations of the
33
34 Hearing Examiner issued on February 1, 2021. On February 4, 2020, Elliot NE LLC timely
35
36 filed an objection to the assessment, which was based on the Final Study. Elliot NE LLC
37
38 further timely filed an appeal of the Hearing Examiner's 2020 recommendations to the City
39
40 Council. Elliot NE LLC maintains and incorporates all objections and arguments raised in
41
42 its appeal filed with the City Clerk on September 22, 2020. This amendment is a
43
44 supplement is to be read together with Elliot NE LLC's appeal filed on September 22, 2020.
45
46
47

1 Elliot NE LLC incorporates by reference all filings, evidence, and pleadings filed by any
2 party before the Hearing Examiner as authorized by the Hearing Examiner, including
3 without limitation all records pertaining to the November 2020 through February 2021
4 remand hearing ordered by Council.
5
6

7
8
9 **IV. Amended Arguments on Appeal**

10 ELLIOT NE LLC supplements its appeal of the Hearing Examiner's
11 recommendation to deny in part and revise on remand in part Elliot NE LLC's objection to
12 the City of Seattle's Waterfront Local Improvement District No. 6751 proposed final
13 assessment dated December 30, 2019 against the following property:
14
15
16

17
18 King County Parcel No. 0660000708
19 Site Address: 808 Howell St., Seattle, Washington
20 Proposed Final LID Assessment for Parcel: \$1,205,636
21
22

23 To avoid repetition, Elliot NE LLC incorporates the evidence and arguments raised
24 before the Hearing Examiner and before the City in its September 22, 2020 appeal, into this
25 amended appeal.
26
27

28
29 **A. The Anticipated Special Benefits to Elliot NE LLC's Property should be**
30 **Discounted to Present Value and Assessments Adjusted as Appropriate**
31

32 On remand, the City's appraiser acknowledged that special benefits to parcels can be
33 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
34 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
35 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
36 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
37 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
38 accepted that recommendation. The City's appraiser further acknowledged that benefit
39 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
40
41
42
43
44
45
46
47

1 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
2 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
3 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
4 calculations to present value because the general benefits are not anticipated from the LID
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
7 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
8 benefit calculation, and related assessments, to account for the delay between the assessment
9 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
10 standard appraisal practice, and renders the other proposed Waterfront LID special
11 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
12 “fundamentally wrong methods.”
13
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
18 Additionally, the assessments may not materially exceed the actual special benefit conferred
19 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
20 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
21 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
22 discount benefits the City estimated would accrue to the properties from improvements to be
23 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
24 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
25 property while treating all or most others (including Taxpayer’s) differently, and
26 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
2 for some properties because the benefits are too distant, while assessing other properties as
3 though distant benefits have already been secured. As Taxpayer identified in its September
4 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
7 reject the improper calculation of the benefit or remand and require the appraiser to discount
8 the benefits to net present value.
9

10
11
12
13
14
15
16
17 **B. The City's Appraiser's Disregard of Hotel STR Report Performance**
18 **Data is Another Example of How His Analysis is Unreliable, Not**
19 **Admissible under Frye or ER 702, and His Proposed Special**
20 **Assessments are not based on Actual, Measurable and Special Value**
21 **Increases from the anticipated LID Improvements.**
22

23 The City's appraiser was provided actual performance data for the remanded hotels,
24 including their average daily room rates, from which he had been instructed to "recalculate"
25 hotel "before" values on remand. *See* Hearing Examiner Initial Recommendation at p. 117
26 (Sept. 8, 2020). The appraiser refused, explaining that, had he done so, his before values
27 would be "too low." Instead, he divined an alternative value from "comparable sales", and
28 then worked backwards to calculate small adjustments to his average daily room rate
29 assumptions, substituting them in his "income spreadsheets," and thereby correlating his
30 income analysis to his preconceived value estimate. His remand analysis demonstrates that
31 his whole "income approach to valuation", used for both hotels and other commercial
32 properties, is contrived speculation on speculation. The City's appraiser disregarded these
33 hotels' actual net income in a supposed "income analysis." *See e.g.*, Deposition of Robert J.
34 Macaulay, 7:10-13 (December 22, 2020) (Attached as Exhibit A to Objector's Statement on
35 Remand for Case Nos. CWF-0318, 0413, 0415, 0417, 0418, 0423, 0429, 0436). Taxpayer's
36
37
38
39
40
41
42
43
44
45
46
47

1 appraiser submitted an appraisal with room rates much closer to the actual performance of
2 the hotel and should be incorporated. *See* Declaration of John D. Gordon in City Council's
3 LID Remand, (Jan. 8, 2021).
4

5
6 For example, compare the room rate and valuation for the appraisals in the table
7 below, where the actual average daily room rate for 2019 was \$205. Elliot NE LLC testified
8 that the City Appraiser's assumed room rate was too high - it not only had not been
9 achieved, but even pre-Covid, was not reasonably achievable.
10
11
12
13
14
15

Hyatt Regency Hotel CWF-0413	City's Revised Appraisal	Elliot NE LLC's Appraisal
Hotel Value	\$646,935,000	\$507,4000,000
Less Personal Property	\$12,600,000	\$22,700,000
Real Estate Value	\$634,335,000	\$484,700,000
Benefit Ratio	0.49%	0.49%
Special Benefit	\$3,077,000	\$2,351,000
Levy Ratio	39.18%	39.18%
LID Levy	\$1,205,636	\$921,173
Average Room Rate	\$335	\$222
Daily RevPAR	\$268	\$169

16
17
18
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33 To correct the "before value" alone, the City Council should instead adopt Elliot NE
34 LLC's valuation, which was developed using actual data, and otherwise applying the City
35 appraiser's assessment formula:
36
37
38
39
40
41
42
43
44
45
46
47

Hyatt Regency Hotel CWF-0413	Appraisal Amount
Hotel Value	\$323,614,000
Less Personal Property	\$22,700,000
Real Estate Value	\$300,914,000
Benefit Ratio	0.49%
Special Benefit	\$1,460,000
Levy Ratio	39.18%
LID Levy	\$572,060

The City's appraiser only slightly reduced his original values in ways that are still entirely inconsistent with historical performance data. The City's appraisal and analysis is speculative and should be rejected. The City Council should at least adopt Elliot NE LLC's "before values" and resultant LID assessments.

C. In Light of Covid's Continuing Impact on Elliot NE LLC and other Downtown Property Owners and other Material Changes Since October 2019, the LID Should be Cancelled, or at Least Assessments Recalculated, to take Into Account Property Value Reductions

In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e] into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and other relevant developments since October 2019." When Washington's first COVID restrictions were imposed in March and April 2020, there was an assumption that they would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover for another 5 years. Retail stores are boarded up. Homelessness and related challenges have gotten much worse. The City has already imposed higher minimum wages and taxes on businesses to try to fund recovery. The West Seattle Bridge and other bridges are in immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several

1 years from completion, as a best case. In current circumstances, a downtown tax to fund
2 new, non-essential park improvements against financially strapped taxpayers, and likely
3 passed through to financially strapped tenants and customers would be unfair to taxpayers
4 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
5 rethinks its budget priorities for the next few years, and its potentially funding sources,
6
7 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
8 property owners) have a chance to recover, and that any assessment take into account the
9 changed circumstances since this appeal process started on February 4, 2020 to avoid
10 unnecessarily and perhaps permanently killing downtown properties and businesses in the
11 name of bettering them.
12
13
14
15
16
17
18
19

20
21 **V. Relief Requested**

22
23 Particularly in light of the Committee's decision not to take further comment, Elliot
24 NE LLC respectfully request that each Committee member carefully review the record
25 transmitted to Council before voting on our appeal.
26
27

28
29 ELLIOT NE LLC respectfully reiterates its request from the September 22, 2020
30 appeal that the City Council:
31

- 32
33 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
34 assessment dated December 30, 2019; or
35
36 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
37 proposed final assessment to \$0 (zero), or such amount as Taxpayer
38 establishes at the hearing in this matter; or
39
40 3. Grant the Examiner's recommended remand but with instructions to
41 recalculate and reduce Taxpayer's assessment using recognized appraisal
42 techniques consistent with USPAP and
43
44
45
46
47

- 1 a. Excluding any property value increase attributable to viaduct removal
2 and other planned WSDOT Improvements;
3
4
5 b. Taking into account the effects of the COVID-19 pandemic on the
6 value of Taxpayer's property and other relevant developments since
7 October 2019;
8
9
10 c. Accounting for and excluding (1) any special benefits from existing
11 or planned improvements that already provide similar benefits to
12 Taxpayer's property, and (2) any special detriments from construction
13 and other anticipated LID-related disamenities;
14
15
16 d. Accounting for and including only those actual benefits anticipated to
17 accrue to Taxpayer's property based on its location relative to Pier 58,
18 Overlook Walk, and the Promenade, and specific elements of the LID
19 Improvements;
20
21
22 e. Discounting anticipated special benefits to present value, based on
23 reliable estimates regarding when special benefits will start accruing
24 following completion of the LID Improvements; and
25
26
27 f. Accounting for such other issues specific to Taxpayer's property
28 relevant to calculation of such assessment; and
29
30
31
32
33
34
35
36
37 4. Grant such further relief as the City Council deems just and proper.

Hearing Examiner File No. CWF-0414

NOTICE OF APPEAL OF HEARING
EXAMINER’S FINDINGS AND
RECOMMENDATION ON LOT B LLC’S
OBJECTION TO WATERFRONT LID NO.
6751 PROPOSED FINAL ASSESSMENT
FOR PARCEL NO. 0660000740

31
32 Lot B LLC (“Taxpayer”) files this appeal pursuant to RCW 35.44.070, Seattle
33 Municipal Code 20.04.090, City of Seattle Resolution 31915, the notice of the Seattle Office
34 of the City Clerk dated December 30, 2019, and the Hearing Examiner’s Findings and
35 Recommendation issued September 8, 2020 (“Examiner’s Recommendation”).

28
29

30 **III. Statement of Taxpayer's Interest**
31

32 Lot B LLC is the taxpayer for the property that is subject to the proposed final
33 assessment described in Section IV. This property is an undeveloped lot east of the Hyatt
34 Regency Seattle. It is leased to a third party who operates a surface parking lot on the
35 property and pays rent to Lot B LLC.
36
37
38

39 The basis of the proposed assessment is a Final Special Benefit/Proportionate
40 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
41 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
42 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
43
44
45
46
47

1 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
2 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4 to exclude charges for other improvement projects in the Central Waterfront, and
5 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
6 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
7 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
8 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
9 because construction was not complete on the LID Improvements or the WSDOT
10 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
11 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
12 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
13 was based on the Final Study.
14

15 **IV. Matter Under Appeal**

16 Taxpayer appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
17 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
18 final assessment dated December 30, 2019 against the following property:
19

20 King County Parcel No. 066000-0740
21 Site Address: 815 Howell Street, Seattle, Washington 98101
22 Proposed Final LID Assessment for Parcel: \$73,666
23

24 See Examiner’s Recommendation at 61-62, 104. To avoid repetition, Taxpayer incorporates
25 the evidence and arguments raised before the Hearing Examiner into this appeal. In
26 particular, Taxpayer points the City Council to Taxpayer’s initial Appeal Petition, *Frye*
27 motion, Closing Brief submitted at the close of its case-in-chief (dated 4/16/2020), and
28

1 supplemental Closing Statement submitted at the close of the City's case-in-chief (dated
2 7/7/2020).¹
3

4
5 As discussed more fully below, Taxpayer specifically appeals the following Findings
6 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
7
8 Pages 61-62, 104, Sections II.6, II.7, II.12, II.14, II.18, II.19, II.20, II.21, II.22, II.23, II.24,
9 II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3, IV.B.4,
10 IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
11 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.2, IV.C.3, IV.C.4, IV.C.5, IV.C.8, IV.C.11,
12 IV.C.12, IV.C.14, and IV.C.18.
13
14

15 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
16 recommendations on material issues raised during Taxpayer's appeal that were supported by
17 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
18 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
19 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
20 recommended anything other than denial of objectors' appeals were where the City's
21 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
22 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
23 special assessments based on "fundamentally wrong methods."
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38

39
40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$188,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
5 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS’s appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City’s appraiser asserts that the City is not collecting assessments “based
16 on the value of WSDOT’s planned improvements.” See Final Study at 3. However, the
17 City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition,
18 the City’s appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City’s promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT’s planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City’s appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be “physical and material and not merely speculative
35 or conjectural”
36

37
38 **ABS Study:** Not only are the improvements not yet “physical or material,” but
39 environmental review and permitting for the City’s proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City’s then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
2 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
3 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
4 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
5 Final Study fails to meet basic standards for admissibility and must be remanded.
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6
7 **V. Standard of Review**
8

9 “When considering the assessment roll, the city council sits ‘as a board of
10 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
11 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
12 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
13 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
14
15

16 The proposed assessments are presumed correct, “unless overcome by clear, cogent
17 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
18 than the heightened presumption of correctness on judicial appeal because “applying these
19 elevated standards at the municipal hearing would afford unwarranted deference to a report
20 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
21 presumption is not evidence and its efficacy is lost when the other party adduces credible
22 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
23 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
24 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
25 presented credible evidence showing that the City’s proposed assessment is arbitrary,
26 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
27 to the City to prove the assessments are actual, measurable, special, non-speculative and
28 proportionate. The City failed that burden.

41
42
43
44
45
46
47

1 **VI. Grounds for Appeal**

2 Taxpayer appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Second Decl. of Peter Shorett ISO Closing Stmt., ¶¶ 3-4 (dated 7/7/2020); Decl. of
12 Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has
13 explained: "[W]e have explicitly rejected an argument that, because certain protestors 'failed
14 to offer expert testimony at the city council hearing[,] the presumptions [in favor of the
15 assessment] were still operative as to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting
16 *In re Indian Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*,
17 85 Wn. App. 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he
18 provided expert opinion showing that improvements actually diminished value of the
19 property). In fact, no independent evidence is required at all if, for example, objectors show
20 that the assessment was grounded on a fundamentally wrong basis due to an error in the
21 City's appraiser's methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
22 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
23 a property owner could simply point out that the square footage assumed in the City's
24 appraisal was incorrect. For these reasons, Taxpayer appeals the following portions of the
25 Examiner's Recommendation: Sections II.12, II.14, IV.A, IV.B.11(a), IV.C.2, IV.C.8, and
26 IV.C.11.

41
42
43
44
45
46
47

1 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

2 2. RCW 35.43.040 provides cities and towns authority for ordering local
3
4 improvements and for levying and collecting special assessments “on property specially
5 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed
6
7 upon all the property in accordance with the special benefits conferred thereon.” RCW
8
9 35.44.010.
10

11 3. No analysis of general benefits. Special assessments have been “held valid
12
13 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
14
15 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
16
17 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
18
19 they are for the construction of local improvements that are appurtenant to specific land and
20
21 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
22

23 4. Taxpayer’s property is not specially benefited by the LID Improvements.
24
25 The primary purpose and effect of the LID Improvements are to benefit “members of the
26
27 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
28
29 library is for the benefit of the members of the whole community individually and
30
31 collectively who may be served by it”). Mr. Macaulay’s own chapter of the LID Manual
32
33 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
34
35 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
36
37 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
38
39
40
41

42
43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 that if an appraiser “identifies both general and special benefits, these benefits should be
2 clearly distinguished and explained, and only special benefits should be included in the
3 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
4
5 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/11/2020 (P. Shorett) Hrg. Tr. at 182:14-
6
7 183:4; Peter Shorett January 30, 2020 Appraisal Review (attached to Appeal Petition) at
8
9 Attachment p. 15 (explaining the examples in the Final Study only provide information
10
11 about general benefits and Study does not use proper measure of analysis to show special
12
13 benefits).
14
15

16
17 5. It is undisputed that Mr. Macaulay did not analyze or measure general
18
19 benefits, including those arising from construction necessary to meet basic design standards.
20
21 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
22
23 construction costs related to meeting design standards which may be general benefits as
24
25 distinct from construction costs emanating from requirements of the LID project”). To the
26
27 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
28
29 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
30
31 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
32
33 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.
34

35 6. LID Improvements not necessary. Unlike typical LID projects, the
36
37 Waterfront LID improvements are largely unnecessary to the functionality of any particular
38
39 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
40
41 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
42
43 held invalid where owners would have benefitted equally from increase of only 9 feet);
44
45 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
46
47 intersection for new water main for hydrant held invalid because land was already afforded

1 functional hydrant at nearby street). Here, Taxpayer testified that the LID Improvements are
2 not necessary to the business of this income-producing properties, which Taxpayer leases to
3 a third party who operates a surface parking lot. Hrg. Exhibit 114 (Decl. of Z. Ahmed) at
4 ¶¶77-82.
5
6

7
8 7. The fact that there is no case law differentiating between binary
9 improvements and parks does not change the law prohibiting assessments on properties
10 already adequately served by existing amenities. See Examiner's Recommendation at
11 IV.C.3 (reasoning that "no case law is provided to support the differentiation between a
12 hardscape benefit and the more ephemeral benefits of park"). Nor does the Examiner's
13 reasoning excuse the City's failure to account for existing amenities as part of the special
14 benefit calculation. As Dr. Crompton testified, existing view amenities may in fact diminish
15 the incremental effect of new park improvements on the value of properties, much like
16 turning on a weak light in an already brightly illuminated room. See Hrg. Exhibit 94
17 (Crompton's Report) at 12-13.
18
19

20 8. To the extent benefits can be considered "special" as opposed to general, they
21 are nominal or nonexistent for many properties in the Central Waterfront, which already has
22 a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v. Spokane*
23 *Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not change due
24 to expansion of sewer service *near* owners' parcel which were already connected). Even if
25 the City could assess for a view change (and it has promised not to assess for viaduct
26 removal), the fair market value of Taxpayer's property has not changed because the LID
27 Improvements have not improved the property's waterfront view or access to the waterfront,
28 nor will they when the City anticipates completion in 2024. For these reasons, Taxpayer
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 appeals the following portions of the Examiner's Recommendation: Sections IV.C.3,
2
3 IV.B.9, and IV.C.3.

4
5 9. No analysis of special detriments. The Final Study fails to properly account
6
7 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
8
9 owners for removal and cleanup of underground storage tanks discovered during the
10
11 improvement project). Mr. Ahmed testified that Taxpayer will not be able to recover the
12
13 cost of the LID assessment from its tenant under the lease in place or through future rent
14
15 increases. A parking lot operator will not be able to charge more or attract more customers
16
17 because of proposed future improvements located 3/4 of a mile away. Further, if the City is
18
19 correct that improvements (when constructed) will attract visitors to the waterfront,
20
21 Taxpayer's tenant may see a decrease in business as visitors patronize businesses nearer the
22
23 waterfront. *See* Hrg. Exhibit 114 (Decl. of Z. Ahmed) at ¶ 83. Accordingly, the assessment
24
25 is a substantial additional cost of Taxpayer, which will decrease the fair market value of the
26
27 property. *Id.* at ¶ 84. And Mr. Ahmed testified that the property is more valuable without
28
29 the proposed LID Improvements and the corresponding assessment. *Id.* at ¶ 85.

30
31 10. Although Mr. Macaulay claims he analyzed impacts on the City's planned
32
33 elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation of how
34
35 lost parking might be a detriment, and no property-specific parking analysis in any of his
36
37 materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12; *see also* 6/26/2020 Hrg. Tr. at
38
39 153:18-154:19 (did not actually analyze impact of decreased parking on condos).

40
41 11. Likewise, there was no analysis of the risks associated with disamenities such
42
43 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
44
45 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
46
47 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss

1 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
2 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
3 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
4 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
5 the maintenance agreement. *Id.* at 13:4-14:2.
6
7
8
9

10 12. There was also no consideration of negative impacts from another four-plus
11 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
12 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
13 law allowing him to dismiss these actual, non-speculative impacts. Because future special
14 benefits calculations are inherently speculative, Washington's eminent domain statute
15 specifically allows condemnees to postpone special benefits assessments until improvements
16 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
17 Moreover, the studies that Mr. Macaulay relied on demonstrate that construction disamenity
18 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
19 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
20 Greenway, the Greenway district "significantly" lagged in value). For these reasons,
21 Taxpayer appeals the following portions of the Examiner's Recommendation: Sections
22 II.25, IV.B.8, and IV.B.9.
23
24
25
26
27
28
29
30
31
32
33
34
35

36 13. Special benefit estimate is speculative. When calculating a special benefit,
37 "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at
38 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it
39
40
41
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 becomes pure speculation.” *Id.* (quoting *In re Local Imp. 6097*, 52 Wn.2d 330, 335–36, 324
2 P.2d 1078 (1958)).
3

4
5 14. Assuming without conceding that one day, the City’s planned LID
6
7 Improvements might increase the value of neighboring properties to some extent, that
8
9 potential benefit is many years away and speculative. While appraisers tolerate some degree
10
11 of estimation and judgment, Taxpayer’s expert testified that Mr. Macaulay’s Final Study is
12
13 far too speculative to satisfy industry practices and standards. *See. e.g.*, 3/12/2020 (P.
14
15 Shorett) Hrg. Tr. at 92:24-93:10 (it is impossible to perform a special benefit analysis with
16
17 the level of precision implied in the Final Study due to the size of the LID and use of
18
19 hypotheticals).
20

21 15. Although LIDs are sometimes finalized prior to completion of improvements,
22
23 this is typically just six month or a year prior, and the assessments are otherwise supported
24
25 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
26
27 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
28
29 will not be realized for four or five years. In the meantime, there is permitting risk,
30
31 construction risk, and general economic risk (e.g., COVID), which renders ABS’s 2019
32
33 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
34
35 and to what extent, different factors will impact value. *Id.* at 51:13-53:5; *see also* 3/11/2020
36
37 (P. Shorett) Hrg. Tr. at 196:17-21; 205:22-206:2. Ultimately, Mr. Macaulay concedes that
38
39 there is inherent uncertainty in valuing the future delivery of projects because “we can’t read
40
41 the future.” 6/23/2020 Hrg. Tr. at 79:18-80:8. As he testified: “I just don’t know what the
42
43 market value would be as of the date the project would be finally constructed” because
44
45 “[t]here could be a lot of elements in the market that did occur between now and then that
46
47 impact value.” 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.* at 211:8-20 (no way to know if

1 his estimates will be higher or lower than comparable sales in 2024 because “markets tend to
2 fluctuate over time” and “I can’t predict the future”).

3
4
5 16. The record is clear that while no one can know what “special benefit” might
6 accrue to these properties in four years (if any), we do know that there are no actual benefits
7 now. The LID improvements provide no immediate special benefit to property owners
8 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
9 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
10 sewer system for future users). For example, notwithstanding the questionable hypothesis
11 that parking lots may benefit from an expected increase in tourism when the improvements
12 are complete, it is undisputed that tourists are not coming in larger numbers and paying
13 higher rates now because of something happening five years down the road. *See* Hrg.
14 Exhibit 114 (Decl. of Z. Ahmed) at ¶ 83. And no potential property owner would invest
15 \$73,663 today in a project that will have no return for either the five years of planning and
16 construction of the period afterward. *Id.* at ¶ 84.

17
18
19 17. Further, there are no “plans and specifications” on file with the Clerk’s Office
20 for the LID Improvements, and it is unlawful to move to final assessments without such
21 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
22 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
23 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
24 dollars on projects still early in the design process. *See* Washington Attorney General
25 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
26 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
27 of programs and included “only so much of the overall costs” that took place within and
28 benefitted the assessed properties).

1 18. The COVID-19 crisis highlights how fundamentally speculative and unfair it
2 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
3 anticipated to be delivered five years later. Even before COVID, it was speculative to
4 assume that market highs experienced in October 2019¹ would be sustained through 2024,
5 after an already extraordinarily long expansion period. 3/3/2020 (A. Gibbons) Hrg. Tr. at
6 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing my analysis
7 in October 2019, who would have thought that this COVID issue would happen?”
8
9 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought process was
10 that the market was going to continue to go up.” However, given COVID and numerous
11 other unknowns, there is no basis for assuming that values hypothesized in October 2019
12 will remain relevant; they are already irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶
13 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019
14 (see Examiner’s Recommendation at 109), the pandemic has impacted *current* values and
15 rendered the hypothetical October 2019 Final Study valuations outdated.
16
17

18 19. As another example of how future events could affect the accuracy and
19 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
20 Examiner re-open the record to allow the City to explain whether the assessments against
21 property owners within the LID are, in fact, being used by the City to fund the emergency
22 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
23
24
25
26
27
28

29 ⁴ Associated Press, *Seattle mayor approves ‘emergency dismantling’ of waterfront Pier 58* (King
30 5, Aug. 15, 2020), available at <https://www.king5.com/article/news/local/seattle/seattle-mayor-approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-0b60d4097aa3>; *See* Aug. 21, 2020 Memo from R. Holtz et al. to L. Arber re HPA Request for Pier

34 Burton to D. Graves et al. re Review of Pier 58 Movement Observation Report & Recommendations,
35
36
37
38
39

1 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
2 would be improperly imposing costs on property owners within the LID for improvements
3 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
4 habitat and City infrastructure—this does not provide any special benefit to LID property
5 owners.
6
7
8
9

10 20. There is also no certainty the improvements will be delivered on time. Mr.
11 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
12 delay in construction schedule would not constitute a “material change” under the City
13 Council’s ordinance authorizing the improvements. In other words, the City cannot
14 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
15 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
16 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
17 potential delays and project changes inherent in those processes, that call into question the
18 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
19 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
20 Decl., dated 4/15/2020).
21
22
23
24
25
26
27
28
29
30
31

32 21. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
33 he could not point to a single one where the assessment roll was finalized five years in
34 advance of the anticipated project completion. See 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
35 he has never recommended final special assessments based on designs less than 30 percent
36
37
38
39
40

41
42 available at
43 [https://www.govonlineaas.com/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.ashx?que](https://www.govonlineaas.com/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.ashx?query=EvGV09Syk1HCKYhwoN5Gqo5VpGOk5QBr3KFzTsfO4Lw=)
44 [ry=EvGV09Syk1HCKYhwoN5Gqo5VpGOk5QBr3KFzTsfO4Lw=](https://www.govonlineaas.com/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.ashx?query=EvGV09Syk1HCKYhwoN5Gqo5VpGOk5QBr3KFzTsfO4Lw=).

45 ⁵ Asia Fields, ‘Substantial’ pier shift closes Seattle’s Waterfront Park (Seattle Times, Aug. 8,
46 2020), available at [https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/)
47 [waterfront-park/](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/).

1 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
2
3 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
4
5 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
6
7 at 66:17-25. He performed no independent due diligence to determine the reliability of the
8
9 City’s estimates for completion of the LID Improvements, or to ensure that proposed
10
11 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
12
13 agreed that if any of his assumptions are incorrect, his opinion of market value would need
14
15 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
16
17 68:11-18.

18
19 22. The City has cited no authority—and Taxpayer is aware of none—that
20
21 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
22
23 assess taxes for “actual” special benefits that will not accrue for another five years (if all
24
25 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
26
27 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
28
29 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
30
31 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
32
33 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
34
35 IV.C.14, and IV.C.18.

36
37 23. Failure to discount special benefit estimates to account for risks and present
38
39 value. Due to the inherent uncertainty, Taxpayer’s expert opine that the Final Study should
40
41 have accounted for risks associated with delivery of the improvements (including permitting
42
43 risk, construction risk, general economic risk) and any special damages associated with
44
45 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
46
47 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the

1 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
2 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers routinely consider
3 the impact of future conditions [through] discounted cash flow analysis.”).
4

5
6 24. Mr. Macaulay acknowledged that appraisers can discount the value of a
7 future condition not in place at the date of valuation and can discount for the time value of
8 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
9 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
10 Discounting would also have been consistent with his approach for analyzing special
11 benefits to vacant land. He testified that the difference between similarly situated vacant
12 sites slated for development and already developed sites was that the labor, capital and risks
13 associated with development had not yet been borne for those vacant sites. Therefore, the
14 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
15 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
16 fully permitted, has not completed environmental review, and has not reached full design is
17 presently worth significantly less.
18
19
20
21
22
23
24
25
26
27
28
29

30 25. The City’s hotel expert, Mr. Lukens, likewise explained that to calculate
31 present value, an appraiser would consider discount rates for land development to account
32 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
33 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
34 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
35 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
36
37
38
39
40
41

42 26. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley’s
43 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
44 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
45
46
47

1 Ex. A. Notably, this is lower than the City’s proposed \$171,000,000 assessment. Thus,
2
3 ignoring momentarily all of the other methodological and other flaws discussed here and in
4
5 Taxpayer’s case-in-chief, and assuming that the LID Improvements provide special benefits
6
7 as soon as they are complete in 2024, Mr. Macaulay’s hypothetical assessment materially
8
9 exceeds special benefits when reduced to present value. Further, to the extent the City is
10
11 arguing that because they are permitted to assess 100% of the special benefit, the special
12
13 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
14
15 is again wrong. After applying proper discounting, the City’s proposed special benefit
16
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18
19 100% of the total estimated special benefit.

20
21 27. But even the assumption that the LID improvements would deliver benefits
22
23 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
24
25 on. Rather, those studies demonstrate that a discount period of five years is conservative.
26
27 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A’s study
28
29 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay’s backup files)
30
31 indicates that during the construction period, the Greenway district “significantly” lagged in
32
33 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
34
35 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
36
37 30-31 (discussing New York City High Line and San Francisco Embarcadero
38
39 improvements). Given the lengthy delay, any prediction of future special benefits is
40
41 speculative, especially during the construction phase where values are likely to decline.
42
43 Second Decl. of Shorett ISO Closing Stmt., ¶ 6 (dated 7/7/2020). And assuming the LID
44
45 Improvements take a similarly long period of time after they are complete to start producing
46
47 tangible property value benefits, each additional year of delay results in further discount to

1 the present value of any future alleged benefit. Gibbons Decl. ISO Closing Stmt., ¶ 19, Ex.
2
3 A.

4
5 28. Applying the same discounting methods described above and in Mr. Gibbons
6
7 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
8
9 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
10
11 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
12
13 100% assessment should be no more than \$17,709. Anything more would permit the City to
14
15 assess Taxpayer based on a hypothetical assumption that these improvements are in place
16
17 and providing benefit, and ignore the risks, construction disamenity, and time value of
18
19 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
20
21 would counsel that the assessment should be only 39.2% of that assessment cap, or \$6,942.

22
23 29. Attachment C includes two Excel spreadsheets applying these discounting
24
25 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
26
27 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
28
29 demonstrates that discounting the City's hypothetical October 2019 special benefits to
30
31 present value would reduce Taxpayer's assessment to \$25,273, exclusive of any other flaws
32
33 in the City's proposed assessment. The second spreadsheet shows even more drastic
34
35 reductions after taking into account: (1) a rough discount for property value loss due to
36
37 COVID-19; and (2) discounting to present value for 5 years (*i.e.*, from 2024 when the City
38
39 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
40
41 the time it takes for the improvements to capture property value). After such reductions,
42
43 Taxpayer's assessment would be just \$22,114 (for the 5-year discount) or \$6,076 (for the
44
45 10-year discount). Further, the spreadsheet concludes a "zero" benefit for this property
46
47 because, based on Dr. Crompton's testimony, Taxpayer's property is more than 2,000 feet

1 from the core “park” improvements and therefore too distant to receive any special benefit.
2
3 Neither of these spreadsheets address other issues raised by Taxpayer’s appeal, but are
4
5 intended to help demonstrate how unfair and inflated the City’s proposed hypothetical
6
7 assessment is. The Hearing Examiner’s Recommendation simply dismisses Taxpayer’s
8
9 discounting argument without legal or factual analysis; that failure is error.

10 **Appraisal and Assessment Calculation Methods Are Flawed**

11 30. The “general rule is that each lot, piece, or parcel of land should be assessed
12
13 separately” for purposes of local improvement district special assessment. *Doolittle*, 114
14
15 Wn.2d at 97.

16
17 31. It is proper to sustain a challenge to an assessment, even without the appraisal
18
19 testimony from the owner, where the objector’s expert establishes that the assessment was
20
21 “clearly grounded upon a fundamentally wrong basis” due to an error in the method
22
23 employed by the City’s appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.

24
25 32. The City’s appraiser purports to utilize the income method of valuation but
26
27 relied on inaccurate revenue and market data, as discussed further below.

28
29 33. The City’s appraiser purports to utilize the comparable sales method of
30
31 valuation, but no City witness attempted “to characterize any one, or all of them, as
32
33 comparable to [Taxpayer’s property].” *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
34
35 “several serious flaws” in ABS’s LID analysis in that case, including that the appraiser
36
37 “attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
38
39 characterize any one, or all of them, as comparable to any particular property within the LID”).
40
41 And no City witness could explain how specific adjustments were made to these sales to
42
43 account for value increases due to the hypothesized Before and After Improvements. For this
44
45 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
46
47

1 34. Special assessment improperly includes value lift from the Before
2
3 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
4
5 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
6
7 Improvements, which WSDOT had independently committed to fund. However, Mr.
8
9 Macauley did not calculate the actual market value of LID properties in October 2019, and
10
11 did not separately analyze the hypothetical increase to property values attributable to
12
13 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
14
15 current value and then separately calculate a hypothetical "With WSDOT" Before value);
16
17 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
18
19 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
20
21 3-4; Shorett Appraisal Review (attached to Appeal Petition) at 2-14. Without any
22
23 documented basis or support, Mr. Macauley simply "ma[de] a judgment a call" on what
24
25 occupancy and rates would have been for the commercial properties assuming all of the
26
27 WSDOT Improvements are completed as of 2019. Macauley Depo. at 129:19-130:11. This
28
29 outright omission precludes any independent evaluation of the true market "Before" values.
30
31 *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards;
32
33 if an appraiser uses current sales data to infer values, then the appraiser must explain how he
34
35 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
36
37 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
38
39 other road, pedestrian and landscaping improvements WSDOT had already committed to
40
41 make.

42
43 35. However, because Mr. Macauley testified that he did include some WSDOT-
44
45 related value-lift in the "Before" values, it follows that part of the special assessment
46
47 improperly is based on value attributable to the WSDOT Improvements. As shown by

1 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
2 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
3 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
4 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
5 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
6 to properly exclude the value of Before Improvements from the assessments. For these
7 reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
8 Sections II.19, II.29, and IV.B.11(a)(ii)
9

10
11
12
13
14
15
16 36. Special benefits were assigned rather than measured. Mr. Macaulay
17 arbitrarily "assigns" special benefits to Before values instead of measuring them for each
18 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/12/2020 (P.
19 Shorett) Hrg. Tr. at 49:4-50:1; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13.
20 Based on formulas in spreadsheets that Mr. Macaulay used to analyze the commercial
21 properties, Taxpayer's experts concluded that Mr. Macaulay based adjustments on
22 hypothesized very small increases to property revenue and very small reductions to cap rates
23 to "calculate" an "After" value due to the coming 2024 LID Improvements. Attachment B
24 (ABS Spreadsheet). These series of micro adjustments were based on "professional
25 judgment" that are neither shown nor replicable.
26

27
28
29
30
31
32
33
34
35
36 37. For these reasons, Taxpayer appeals the following portions of the Examiner's
37 Recommendation: Sections II.19 and IV.B.11(a)(iii).
38

39
40
41 38. Special benefit falls within margin of error. The Final Special Benefit Study
42 applies an estimated value enhancement of less than 4%, which is generally within the
43 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
44 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
45
46
47

1 Taxpayer's experts explained that if two appraisers independently arrive at values within 5%
2 of one another, this difference is considered reasonable as it falls within the standard margin
3 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/11/2020
4 (P. Shorett) Hrg. Tr. at 216:25-217:11. Because Mr. Macaulay's micro-special benefit
5 percentages fall far below that 5% margin, "there is no way of authenticating" such
6 incremental changes because "[m]arket forces completely obliterate any tiny little noise
7 factor like that." See 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed
8 during his deposition that 0.25% is too small to measure. Macaulay Depo. at 25:17-25.
9 Additionally, the fact that "Before" values are also based on a hypothetical that adds some
10 unstated incremental value to actual 2019 values exacerbates this issue—the ability for an
11 appraiser to discern the micro-value differences between hypothetical conditions that are so
12 similar (the WSDOT improvements compared to the LID improvements) "verges on being
13 ludicrous." 3/3/2020 (A. Gibbons) Hrg. Tr. at 89:4-90:7.

14
15

20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47
39. Even if it were possible to accurately tease out such a miniscule hypothetical
value change due to improvements coming five years later, experts testified that there is no
data to justify the mathematical adjustments—they are just the appraiser's guesses as to
what he felt the changes (hypothetically) would be. See 3/12/2020 (P. Shorett) Hrg. Tr. at
49:4-50:1; 3/3/2020 (A. Gibbons) Hrg. Tr. at 88:21-88:24 ("you cannot measure one percent
difference in a high-rise building for this kind of a medium ... it's simply assigned to a
before value"). For these reasons, Taxpayer appeals the following portions of the
Examiner's Recommendation: II.27 and IV.B.4.

40
41
42
43
44
45
46
47
40. No analysis of value increase attributable to individual components of the
LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
percentage difference between hypothetical Before and After conditions. Throughout his

1 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
2 descriptions in the Addenda even though he testified that he relied on these to calculate
3 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
4 someone might be able to determine how he attributed value to After conditions described in
5 the Addenda, he answered that that was “not the scope of the assignment” because he was
6 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
7 that the six components were not actually a continuous project, that he was viewing them
8 together because the City asked him to, and that if he were to view them independently,
9 there was a low probability that properties in the north would specially benefit from
10 improvements in the south and vice versa. See 6/25/2020 Hrg. Tr. at 27:18-28:5.
11
12
13
14
15
16
17
18
19

20 41. Not only did he fail to analyze benefits from each of these non-contiguous
21 improvements, his familiarity with descriptions as whole was tenuous at best. See, e.g.,
22 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
23 arose from specific Before/After descriptions in the Addenda); cf. *Anderson v. City of*
24 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
25 objectives that guided regulators’ assessment of architectural plans for buildings along a
26 “signature street” were so vague that they amounted to ad hoc review based on the
27 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
28 even though he used the renderings as “visual aid[s] in appraising the property in the before
29
30
31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. See RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 and after” to “visually see what the differences would be,” he could not explain what
2 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
3 when shown a rendering of a two-lane road going down to one-lane in the After condition
4 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
5 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
6 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
7 could explain the depiction of the same trees in the After condition nearly twice as tall as in
8 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
9 of the Examiner’s Recommendation: II.27 and IV.B.4.

10
11 42. Special assessment is not supported by comparable studies, data or reports.
12 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
13 that the LID Improvements will lead to meaningfully increased real estate values for
14 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
15 comparable sales or information from the “over twenty-five studies and reports” to arrive at
16 very precise special benefit increases for the commercial properties, including Taxpayer’s
17 property. For example, although Mr. Macaulay stated that no single report or study was
18 directly on point due to the unique nature of the LID Improvements (*see, e.g.,* 6/25/2020
19 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
20 parcel-by-parcel analysis other than to say that the studies generally provided “some
21 background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
22 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
23 similarities and differences between these improvements and the comparable parks he
24 looked at).

1 43. Mr. Macaulay purports to rely on Dr. Crompton's research to justify the
2 assignment of incremental increase of 0.5% to 4% to property values within the LID.
3
4 However, among other critiques, Dr. Crompton testified that Mr. Macaulay's reliance on his
5 research misinterprets his work in critical ways, including because the LID Improvements
6 manifest the characteristics of a parkway (not a park), and his research indicates that most of
7 a *park's* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
8 in Seattle). *See* Hrg. Exhibit 94 (Crompton's report). Further, updated research shows park-
9 related value increases are in fact smaller; that estimated increases are "best guesses" rather
10 than predictions of property value increases in a particular city; and that percentages do not
11 account for diminishing returns after taking into account water views, which would be the
12 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
13 topography grants most properties in downtown a water view.
14

15 44. Rather than addressing Dr. Crompton's critiques, Mr. Macaulay simply states
16 that this was just one source of information that was not entirely relevant because, among
17 other things, Dr. Crompton's research dealt with parks and not streetscapes. However, Dr.
18 Crompton's critiques were based on Mr. Macaulay's own testimony that the core "park"
19 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
20 180:2 (explaining that for purposes of "drawing boundaries around a park" he was
21 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
22 Crompton concluded that 500 feet via road from "park" improvements is just one or two
23 Seattle blocks and that Mr. Macaulay "inappropriately extend[ed] the LID impact
24 significantly beyond that which the park study indicated (even if it was legitimate to use the
25 park review's findings)." Hrg. Exhibit 94 (Crompton's Report) at 7. Indeed, the LID area
26 extends even past 2,000 feet from the core "park" improvements, which is the outer limit of
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 impact applicable to “community parks”—which the LID Improvements are not. *Id.*
2
3 Taxpayer’s property is not within 2,000 road network feet from the “park” improvements.
4
5 *See* Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.

6
7 45. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
8
9 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
10
11 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
12
13 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
14
15 materials, it was clearly an important—if not *the* most important—source of information for
16
17 estimating special benefits (especially with respect to the condos).⁷ No City witness
18
19 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
20
21 parcel-by-parcel analysis.

22
23 46. The destination parks discussed in the Final Special Benefit Study do not
24
25 provide reliable, comparable, and valid support for the calculation of special assessments
26
27 here. *See* Shorett Appraisal Review (attached to Appeal Petition) at 15-19 (Shorett’s
28
29 critique of every case study cited concludes the changes to those “dwarf the difference
30
31 between the before-after condition of the property with LID”); Gibbons 5/2/2018 Letter at 4;
32
33 Hrg. Exhibit 49 (P. Shorett’s Supplemental Report); 3/11/2020 (P. Shorett) Hrg. Tr. at
34
35 208:8-24; 3/12/2020 (P. Shorett) Hrg. Tr. at 6:19-7:18; Second Decl. of Shorett ISO Closing
36
37 Stmt., ¶ 5 (explaining again why the San Francisco, Boston, and Portland case studies are
38
39 not in fact comparable). None of the parks cited in the Final Special Benefit Study were
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 funded by a LID. And in virtually all of those cases, the park improvements dramatically
2 restored unimproved or blighted areas, and properties evaluated were within two or three
3 blocks of the park.
4

5
6 47. ABS's claimed reliance on three economic studies to support property value
7 increase is also flawed. The HR&A study does not inform what value increases are
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
10 dissimilar parks in other cities,⁸ making the methodological application to the LID
11 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
12 conclusion that there would be *no new net visitors* from downtown residents as a result of
13 the LID Improvements and could not explain how this impacted his condo analysis.
14

15 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
16 Property Values" primarily focused on whether the benefits accrue to the larger community
17 rather than properties adjacent to the park. And the 2014 New York City Department of
18 Transportation study is not based on real estate transactions and market sales and fails to
19 substantiate any link between increased retail sales and property values. Moreover, this
20 study only looked at impact either directly abutting the streetscape improvement, or a couple
21 hundred feet for plaza-like improvements.
22

23 48. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
24 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
25

26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 Exhibit 124. One explanation of that this omission could be TPL’s estimate of the economic
2 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
3 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
4 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
5 asked whether he considered that HR&A’s estimated LID impact is six times greater than
6 TPL’s assessment of Seattle’s entire park system, his surmised that it was because the
7 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
8 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
9 assumptions to account for this difference, which may be partly explained by the fact that
10 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
11 approximately 3.44% of King County tourists visit Seattle primarily because of the city
12 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
13 waterfront improvements.

21
22
23
24
25
26
27 49. Although proximity to the improvements is a key factor in all of these
28 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
29 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
30 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
31 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
32 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
33 Improvements is approximate 20 acres and it is not a community park.⁹

44
45 ⁹ *See*
46 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 50. There is no explanation in the Final Study or the supporting materials of how
2 the studies or comparable sales were used to derive values for Taxpayer's property. For
3 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
4
5 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.
6
7

8 51. Failure to comply with USPAP. Taxpayer's assessment also rests on a
9 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
10 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12 Study does not meet mass appraisal standards nor allow for independent assessment of the
13 accuracy of Mr. Macauley's conclusions.
14
15

16 52. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
17 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
18 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
19 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
20 testimony suggests that he incorrectly believed that the only difference between direct
21 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
22 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
23 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
24 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
25 Gordon uses in doing his limited restricted report").
26
27

28 53. But the difference is not only in reporting—mass appraisal techniques must
29 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
30 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
31 parcel approach:
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 The mass appraisal technique is an appraisal method used to evaluate
2 a group of properties that are subject to similar market forces as of a
3 certain date through the use of market data, statistical analysis and
4 testing. As a result, the mass appraisal technique does not require or
5 involve analysis of each individual property's specific data.
6

7
8 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
9

10 54. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
11 universe of properties as a given date using standard methodology, employing common data,
12 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
13 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
14 model" is "a mathematical expression of how supply and demand factors interact in a
15 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
16 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
17 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
18
19
20
21
22
23
24
25

26 55. Regardless of client direction, Mr. Macaulay is required to comply with
27 USPAP. So if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have been
28 economically feasible because it would have taken "an incredible amount of time and cost"
29 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
30 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 ("performing an
31 individual appraisal of each [condo] parcel would have been cost and time prohibitive").
32
33
34
35
36
37

38 56. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
39 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
40 value, fails to calibrate the model structure to determine the contribution of the individual
41 characteristics affecting value, and does not review the mass appraisal results against actual
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

3
4
5 57. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6 proximity to the elements, the increase in market rent, market vacancy changes,
7 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
8 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
9 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
10 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
11 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
12 internal review process. *Id.* at 104:24-105:20. And because both the Before and After
13 values were hypothetical, it was not possible to identify matched pair sales and no City
14 witness explained how ABS Valuation made adjustments to “comparable” sales in order to
15 check their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which
16 requires him to explain his model structure.
17
18
19
20
21
22
23
24
25
26
27

28 58. For these reasons, Taxpayer appeals the following portions of the Examiner’s
29 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
30
31
32
33

34 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner's denial of that motion.
4

5 59. Finally, Taxpayer's property is not appurtenant—or even in close
6
7 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
8
9 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
10
11 close proximity to the property on which expert testimony was given”). Indeed, Taxpayer's
12
13 property is more than a 3/4 of a mile walk—approximately 3,000 feet as the crow flies—
14
15 from Pier 58 and the proposed waterfront improvements. *See* Hrg. Exhibit 114 (Decl. of Z.
16
17 Ahmed) at ¶ 81. And, as described above, the special assessment is overstated because the
18
19 Final Study makes no attempt to determine general benefits, existing amenities for
20
21 Taxpayer's specific property, or special detriments. In addition, it is speculative due to the
22
23 fact that, as of October 2019, improvements were not in in place—and, in fact, much of the
24
25 waterfront is a construction zone following removal of the viaduct and now Pier 58
26
27 demolition. Under these circumstances, rather than relying on entirely imaginary income
28
29 and shaky hypotheticals, Mr. Macaulay at the very least should have discounted the special
30
31 benefit estimates or waited to perform the Study until the improvements were at least close
32
33 to complete.
34

35 **Erroneous Pre-Improvement Valuation**

36
37 60. The proposed final assessment erroneously overstates the pre-improvement
38
39 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
40
41 benefit to the Taxpayer's property.
42

43 61. The City's Final Study was used to compute the proposed final assessment of
44
45 Taxpayer's property. The City's Study purportedly uses data from the King County
46
47

1 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
2 Study does not accurately reflect this data. *See, e.g.*, Shorett Appraisal Review (attached to
3 Appeal Petition) at Attachment pp. 23-24 (some properties were overvalued by 100%). For
4 example, Mr. Macaulay valued this property at \$46,935,000 prior to the LID improvements.
5 Taxpayer testified that the Assessor's valuation of \$32,184,000 is a more reasonable
6 estimate of fair market value. Hrg. Exhibit 114 (Decl. of Z. Ahmed) at ¶ 79. And the Final
7 Special Benefit Study does not explain this difference between its pre-improvement
8 valuation and its supposed source for market data. For this reason, Taxpayer appeals
9 Section IV.C.11 of the Examiner's Recommendation.

10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47

Erroneous Computation of Special Benefit

62. "Special benefit" is "the increase in fair market value attributable to the local improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property may receive by reason of the improvement is not measured alone by the physical character or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). "The question is: To what extent is the particular tract or property benefited by the entire improvement, and is it assessed proportionately with the other property included within the assessment district?" *Id.* 165–66.

63. The proposed final assessment erroneously overstates the special benefit of LID improvements in a number of ways.

¹¹ *See, e.g.*, Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet (providing a "County Link" to the King County Department of Assessment's online "eReal Property" search tool).

1 64. Spreadsheet show arbitrary changes to land value. For the Lot B property,
2
3 Mr. Macaulay assumed land value would increase by \$7 per square foot due to the LID
4
5 Improvements. But Mr. Gordon explained that there is no basis for the special benefit
6
7 increase of \$7 per square foot in Mr. Macaulay's spreadsheet and that this appears to be an
8
9 increase of 0.4%, which is basically a rounding error. 4/13/2020 (J. Gordon) Hrg. Tr. at
10
11 131:24-133:9. Notably, this property is further than 2,000 feet from the core waterfront
12
13 improvement, making any basis for finding a special benefit extremely tenuous given Dr.
14
15 Crompton's testimony and reports.

16
17 65. Mr. Macaulay testified that he used comparable sales as a reasonableness
18
19 check for commercial properties. But as explained above, no City witness has explained
20
21 how anyone, or all, of the sales are comparable to any particular commercial property within
22
23 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
24
25 in order to make sales "comparable," he would have had to make adjustments to account for
26
27 Before and After conditions, but there is no way to understand how adjustments were made
28
29 because he "didn't do a separate sales comparison approach where we showed adjustments
30
31 and whatnot." 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
32
33 his adjustments were reliable, he said it would have simply been a "test of reasonableness."
34
35 *Id.* at 127:10-128:24.

36
37 66. It also bears noting that any "internal review" of the special benefit estimates
38
39 would have been largely arbitrary given Mr. Macaulay's testimony that there is no margin of
40
41 error. Indeed, given all the same information, he seemed to suggest that it would be
42
43 perfectly reasonable for another experienced appraiser to come up with special benefit
44
45 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
46
47 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact

1 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
2 margin of error conflicts with the testimony of Taxpayer's experts and reaffirms that there
3 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
4 margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there are still
5 reasonable and unreasonable variations within the appraisal field. *See Examiner's*
6 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
7 special because it is arbitrarily assigned; and it is too small to realistically be supported by
8 appraisal techniques.

9
10
11
12
13
14
15
16
17 67. No evidence of special benefit. Meanwhile, there is "no actual evidence from
18 any seller or purchaser that the price was higher because of the LID improvements."
19 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
20 identified any seller or buyer, or any particular property where the existence of the LID
21 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Taxpayer has
22 explained that the property has not increased parking rates or lease rates due to the
23 forthcoming LID Improvements, because, among other reasons (and apart from COVID),
24 the improvements ABS believes will generate value do not exist and will not for a number
25 of years to come. There are no comparable sales because the LID Improvements are not in
26 place, nor will they be until the end of 2024 if completed on schedule.

27
28
29
30
31
32
33
34
35
36
37 68. The fair market value of Taxpayer's property has not changed due to
38 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
39 benefited from installation of new water main and fire hydrant where it was already
40 adequately supplied with water and afforded adequate fire protection). And in any event,
41 any value attributable to removal of the viaduct was to be excluded from the assessment
42 calculation.

1 69. There is no special benefit because LID improvements in fact diminish the
2 value of Taxpayer's property by drawing visitors away towards improvements that do not
3 abut the property. *See Kuskys*, 85 Wn. App. 493 (testimony of owners' expert that LID
4 actually diminished value of property was sufficient to rebut presumption that assessment
5 was proper).
6
7
8
9

10 70. Moreover, the assessment formula is an attempt to distribute costs that do not
11 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
12 "merely a mathematical model that distributes costs").
13
14
15

16 71. The Special Benefit Study fails to address whether the \$346,000,000
17 estimated LID project cost takes into account the investment that would have occurred in the
18 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
19 invested. This is a critical component of estimating which properties receive a direct benefit
20 from the improvements, versus more incidental benefits further from the park.
21
22
23
24
25

26 72. Not proportionate. As another example of how arbitrary Mr. Macaulay's
27 methods are, he assigned the same special benefit increase overall (3% for all of the Four
28 Seasons parcels and 1.5% for the Grand Hyatt parcels) when parking was part of the same
29 parcel as a hotel. When asked whether this was a matter of coincidence, his answer was that
30 is "just our estimate of how the market would react." 6/23/2020 Hrg. Tr. at 151:24-152:9.
31 But for this parking lot, which was originally intended to be part of the Hyatt Regency, he
32 assigned a 0.40% special benefit while the Hyatt Regency received a 0.49% benefit. By
33 comparison, a parking lot near the Grand Hyatt (Parcel 0659000355) received just a 0.65%
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 special benefit, while the Grand Hyatt was assigned a 1.50% special benefit, even though
2 that parking lot is one block closer to the waterfront.¹²
3

4 73. The proposed final assessment substantially exceeds the special benefit to the
5 property and is grossly disproportionate to similarly situated properties within the LID. The
6 City has not addressed any of these specific issues and offers only general responses which
7 have already been rebutted by Objectors in their case-in-chief and cross-examination. *See*
8 Paul Bird Decl., ¶ 29-30 (dated 4/30/2020). For these reasons, Taxpayer appeals the
9 following portions of the Examiner's Recommendation: Sections II.22, II.23, II.27, IV.B.4,
10 and IV.B.11(a)(iii).
11
12
13
14
15
16
17

18 **State Environmental Policy Act and Other Environmental Permitting**

19 74. While this appeal is not challenging the City's environmental review and
20 permitting processes, those processes are relevant in determining the legality of the
21 assessments, and to assessing the delivery risk, the present value of the City's plans, and
22 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
23 pursue projects that have not yet undergone environmental review (thus limiting the choice
24 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
25 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
26 is just beginning. Further, the City has segmented environmental review, and still has a
27 gauntlet of federal, state and tribal review processes to complete before it will be clear what
28 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
29 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
30 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
31
32
33
34
35
36
37
38
39
40
41
42
43
44

45 ¹² He also assigned different special benefit and capitalization rate increases to the parking
46 and retail parcels associated with the Grand Hyatt and the Four Season even though these sources of
47 revenue receive identical increases when they are part of the same legal parcel as the hotel.

1 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
2
3 committing to reconstruction of Pier 58 and major street improvements without
4
5 environmental review, or the City's Final Special Study has improperly included and is
6
7 proposing to assess the Taxpayer the costs and special benefits of improvements that may
8
9 not get built. Either way, it is faulty process.

10 **Due Process Rights**

11
12 75. The City's failed to notify Taxpayer sufficiently in advance of the hearing to
13
14 allow Taxpayer to obtain evidence and prepare to properly challenge the assessments.
15
16 Because LID assessments involve a deprivation of property, affected owners have the right
17
18 to a hearing as to whether the improvement resulted (or will result) in special benefits to
19
20 their properties and whether their assessments are proportionate, which necessarily includes
21
22 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
23
24 555, 569–70, 229 P.3d 761 (2010).
25

26
27 76. The LID statute specifies that cities must mail notices giving the time and
28
29 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
30
31 publish the notice once a week for 2 consecutive weeks in the city's official newspaper, with
32
33 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
34
35 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
36
37 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
38
39 secure their own appraisal), evaluate proportionality of the proposed assessments, and
40
41 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
42
43 for anybody to get an appraisal”).
44

45 77. The City's Notice of Assessment was sent on December 30, 2019. And the
46
47 Final Special Benefit Study has only been available for public review since January 7, 2020.

1 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
2 order that would preserve and protect Taxpayer's right to analyze and respond to the Final
3 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
4 preliminary motions (e.g., with respect to the interplay between SEPA and the City's
5 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
6 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
7 the Examiner's Recommendation: I.B.
8
9
10
11
12
13
14

15 **VII. Relief Requested**

16 Taxpayer respectfully requests that the City Council:

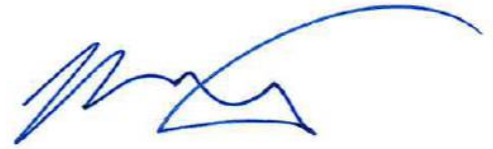

- 17 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection;
18
19 and
20
21
22
23 a. Cancel the Waterfront Local Improvement District No. 6751 proposed final
24 assessment dated December 30, 2019; or
25
26 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
27 proposed final assessment to \$0 (zero), or such amount as Taxpayer
28 establishes at the hearing in this matter; or
29
30 c. Remand the matter to the Hearing Examiner or City appraiser to recalculate
31 and reduce Taxpayer's assessment using recognized appraisal techniques
32 consistent with USPAP and:
33
34 i. Excluding any property value increase attributable to viaduct removal
35 and other planned WSDOT Improvements;
36
37 ii. Taking into account the effects of the COVID-19 pandemic on the
38 value of Taxpayer's property and other relevant developments since
39
40 October 2019;
41
42
43
44
45
46
47

24
25
26 **III. Statement of LOT B LLC's Interest and Incorporation of Prior Arguments**

27 LOT B LLC is the taxpayer for the property that is subject to the proposed final
28 assessment described in Section IV.
29

30
31 LOT B LLC is amending its appeal as authorized in City of Seattle Resolution 31979
32 to include additional arguments relevant to the revised Final Recommendations of the
33 Hearing Examiner issued on February 1, 2021. On February 4, 2020, LOT B LLC timely
34 filed an objection to the assessment, which was based on the Final Study. LOT B LLC
35 further timely filed an appeal of the Hearing Examiner's 2020 recommendations to the City
36 Council. LOT B LLC maintains and incorporates all objections and arguments raised in its
37 appeal filed with the City Clerk on September 22, 2020. This amendment is a supplement is
38 to be read together with LOT B LLC's appeal filed on September 22, 2020. LOT B LLC
39
40
41
42
43
44
45
46
47

1 incorporates by reference all filings, evidence, and pleadings filed by any party before the
2
3 Hearing Examiner as authorized by the Hearing Examiner, including without limitation all
4
5 records pertaining to the November 2020 through February 2021 remand hearing ordered by
6
7 Council.
8

9 **IV. Amended Arguments on Appeal**

10 LOT B LLC supplements its appeal of the Hearing Examiner's recommendation to
11
12 deny LOT B LLC's objection to the City of Seattle's Waterfront Local Improvement District
13
14 No. 6751 proposed final assessment dated December 30, 2019 against the following
15
16 property:
17

18
19 King County Parcel No. 066000-0740
20 Site Address: 815 Howell St., Seattle, Washington
21 Proposed Final LID Assessment for Parcel: \$73,666
22

23 To avoid repetition, LOT B LLC incorporates the evidence and arguments raised
24
25 before the Hearing Examiner and before the City in its September 22, 2020 appeal, into this
26
27 amended appeal.
28

29 **A. The Anticipated Special Benefits to LOT B LLC's Property should be**
30 **Discounted to Present Value and Assessments Adjusted as Appropriate**
31

32 On remand, the City's appraiser acknowledged that special benefits to parcels can be
33
34 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
35
36 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
37
38 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
39
40 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
41
42 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
43
44 accepted that recommendation. The City's appraiser further acknowledged that benefit
45
46 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
47

1 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
2 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
3 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
4
5 calculations to present value because the general benefits are not anticipated from the LID
6
7 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
8
9 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
10
11 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
12
13 benefit calculation, and related assessments, to account for the delay between the assessment
14
15 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
16
17 standard appraisal practice, and renders the other proposed Waterfront LID special
18
19 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
20
21 “fundamentally wrong methods.”
22

23
24 All special benefit taxes assessed by a municipality must be based on “actual,
25
26 physical and material [special benefits that are] not merely speculative or conjectural.”
27
28 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
29
30 Additionally, the assessments may not materially exceed the actual special benefit conferred
31
32 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
33
34 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
35
36 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
37
38 discount benefits the City estimated would accrue to the properties from improvements to be
39
40 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
41
42 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
43
44 property while treating all or most others (including Taxpayer’s) differently, and
45
46 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
47

1 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
2 for some properties because the benefit are too distant, while assessing other properties as
3 though distant benefits have already been secured. As Taxpayer identified in its September
4 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
7 reject the improper calculation of the benefit or remand and require the appraiser to discount
8 the benefits to net present value.
9

10
11
12
13
14
15
16
17 **B. In Light of Covid's Continuing Impact on LOT B LLC and other**
18 **Downtown Property Owners and other Material Changes Since October**
19 **2019, the LID Should be Cancelled, or at Least Assessments**
20 **Recalculated, to take Into Account Property Value Reductions**
21

22 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
23 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
24 other relevant developments since October 2019." When Washington's first COVID
25 restrictions were imposed in March and April 2020, there was an assumption that they
26 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
27 II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover
28 for another 5 years. Retail stores are boarded up. Homelessness and related challenges have
29 gotten much worse. The City has already imposed higher minimum wages and taxes on
30 businesses to try to fund recovery. The West Seattle Bridge and other bridges are in
31 immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park
32 hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several
33 years from completion, as a best case. In current circumstances, a downtown tax to fund
34 new, non-essential park improvements against financially strapped taxpayers, and likely
35
36
37
38
39
40
41
42
43
44
45
46
47

1 passed through to financially strapped tenants and customers would be unfair to taxpayers
2 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
3 rethinks its budget priorities for the next few years, and its potentially funding sources,
4 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
5 property owners) have a chance to recover, and that any assessment take into account the
6 changed circumstances since this appeal process started on February 4, 2020 to avoid
7 unnecessarily and perhaps permanently killing downtown properties and businesses in the
8 name of bettering them.
9

10
11
12
13
14
15
16
17 **V. Relief Requested**

18 Particularly in light of the Committee's decision not to take further comment, LOT B
19 LLC respectfully request that each Committee member carefully review the record
20 transmitted to Council before voting on our appeal.
21

22 LOT B LLC respectfully reiterates its request from the September 22, 2020 appeal
23 that the City Council:
24

25 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
26 assessment dated December 30, 2019; or
27

28 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
29 proposed final assessment to \$0 (zero), or such amount as Taxpayer establishes at the
30 hearing in this matter; or
31

32 3. Grant the Examiner's recommended remand but with instructions to
33 recalculate and reduce Taxpayer's assessment using recognized appraisal techniques
34 consistent with USPAP and
35

36 a. Excluding any property value increase attributable to viaduct removal
37 and other planned WSDOT Improvements;
38
39
40
41
42
43
44
45
46
47

- 1 b. Taking into account the effects of the COVID-19 pandemic on the
2 value of Taxpayer's property and other relevant developments since October
3 2019;
4
5
6 c. Accounting for and excluding (1) any special benefits from existing
7 or planned improvements that already provide similar benefits to Taxpayer's
8 property, and (2) any special detriments from construction and other
9 anticipated LID-related disamenities;
10
11 d. Accounting for and including only those actual benefits anticipated to
12 accrue to Taxpayer's property based on its location relative to Pier 58,
13 Overlook Walk, and the Promenade, and specific elements of the LID
14 Improvements;
15
16 e. Discounting anticipated special benefits to present value, based on
17 reliable estimates regarding when special benefits will start accruing
18 following completion of the LID Improvements; and
19
20 f. Accounting for such other issues specific to Taxpayer's property
21 relevant to calculation of such assessment; and
22
23 4. Grant such further relief as the City Council deems just and proper.

28 **III. Statement of Seattle Tower I, LLC's Interest**
29

30 SEATTLE TOWER I, LLC owns the property that is subject to the proposed final
31 assessment described in Section IV. The Seattle Tower I, LLC property is a mixed-use
32 tower consisting of 344 residential apartments comprising the Arrive Luxury Apartments
33 above a 142-room hotel and restaurant comprising the Sound Hotel, operated under a
34 franchise agreement with Hilton Hotels. The basis of the proposed assessment is a Final
35 Special Benefit/Proportionate Assessment Study for Waterfront Seattle Local Improvement
36 District ("Final Study"), dated October 1, 2019 and prepared by Robert Macaulay with ABS
37 Valuation (the City's appraiser). The Final Study proposes assessments that are purportedly
38 limited to paying for the LID-funded components—namely, the Promenade, Overlook Walk,
39
40
41
42
43
44
45
46
47

1 Pioneer Square Street Improvements, Union Street Pedestrian Connection, Pike/Pine
2 Streetscape Improvements, and Pier 58 (together, the “LID Improvements”). The Final
3 Study purports to exclude charges for other improvement projects in the Central Waterfront,
4 and specifically those WSDOT had already agreed to pay for and construct: viaduct
5 demolition, the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State
6 Route 99 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces
7 WSDOT planned fronting piers between Pike and Madison (together, the “WSDOT
8 Improvements”). But because construction was not complete on the LID Improvements or
9 the WSDOT Improvements at the time the Final Study was prepared, Mr. Macaulay’s
10 October 1, 2019 “Before” and “After” valuations are both based on hypothetical conditions
11 rather than actual facts. On February 4, 2020, Seattle Tower I, LLC timely filed an
12 objection to the assessment, which was based on the Final Study.
13
14

15 **IV. Matter Under Appeal**

16 SEATTLE TOWER I, LLC appeals the Hearing Examiner’s recommendation to
17 remand the Sound Hotel Seattle Tower I, LLC’s objection to the City of Seattle’s Waterfront
18 Local Improvement District No. 6751 proposed final assessment dated December 30, 2019
19 against the following property:
20
21

22 King County Parcel No. 0696000015
23 Site Address: 2116 4th Ave. Seattle, Washington
24 Proposed Final LID Assessment for Parcel: \$613,201
25

26 See Examiner’s Recommendation at 61-62, 104. To avoid repetition, Seattle Tower I, LLC
27 incorporates the evidence and arguments raised before the Hearing Examiner into this
28 appeal. In particular, Seattle Tower I, LLC points the City Council to Seattle Tower I,
29 LLC’s initial Appeal Petition, *Frye* motion, Closing Brief submitted at the close of its case-
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 in-chief (dated 4/16/2020), and supplemental Closing Statement submitted at the close of the
2
3 City's case-in-chief (dated 7/7/2020).¹
4

5 As discussed more fully below, Seattle Tower I, LLC specifically appeals the
6
7 following Findings and Recommendations in the Hearing Examiner's September 8, 2020
8
9 Recommendation: Pages 61-62, 104, Sections II.6, II.7, II.12, II.14, II.16, II.17, II.18, II.19,
10
11 II.20, II.21, II.22, II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A,
12
13 IV.B.1, IV.B.2, IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a),
14
15 IV.B.11(a)(i), IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.2, IV.C.3,
16
17 IV.C.4, IV.C.5, IV.C.8, IV.C.10, IV.C.11, IV.C.12, IV.C.14, IV.C.18.
18

19 Seattle Tower I, LLC also appeals the Hearing Examiner's failure to make findings
20
21 of fact or recommendations on material issues raised during Seattle Tower I, LLC's appeal
22
23 that were supported by law, expert testimony, and fact. The Final Study fails in numerous
24
25 ways to satisfy the basic requirements of a LID assessment study, and the Examiner's
26
27 Recommendation ignores the many deficiencies in the Final Study. In fact, the only
28
29 instances in which the Examiner recommended anything other than denial of objectors'
30
31 appeals were where the City's appraiser confessed error. The appraiser's proposed
32
33 assessments, and the Examiner's Recommendations, would have the City impose arbitrary
34
35 and capricious Waterfront LID special assessments based on "fundamentally wrong
36
37 methods."
38

39
40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$1,565,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
5 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS’s appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City’s appraiser asserts that the City is not collecting assessments “based
16 on the value of WSDOT’s planned improvements.” See Final Study at 3. However, the
17 City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition,
18 the City’s appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City’s promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT’s planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City’s appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be “physical and material and not merely speculative
35 or conjectural”
36

37
38 **ABS Study:** Not only are the improvements not yet “physical or material,” but
39 environmental review and permitting for the City’s proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City’s then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** LID assessments reflect special benefits and must be proportionate
47

1 **ABS Study:** The City's appraiser proposes to assess against the value of hotel personal
2 property (furniture, fixtures and equipment), but not personal property of other types of
3 property. It is not proportionate to assess against hotel personal property and not other
4 personal property. Further, personal property is moveable, the value does not depend on
5 location, and is likely to be fully depreciated and perhaps removed before the LID
6 Improvements are in place. (Note also that personal property accounts are separate, and
7 the City gave no notice of any LID assessment against personal property. The Examiner
8 should have reversed personal property assessments on that basis as well.)
9

10
11 **Legal Requirement:** Must comply with appraisal standards
12

13 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
14 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
15 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
16 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
17 Final Study fails to meet basic standards for admissibility and must be remanded.
18
19

20 **Legal Requirement:** Actual and measurable special benefit
21

22 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
23 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
24 on a host of "micro-judgments" that are not supported by any documentation, nor capable
25 of replication or quality assurance/quality control. The assessments are undocumented,
26 unreliable, and not supported by empirical studies, data, or reports.
27
28

29 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
30 supported by empirical evidence
31

32 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
33 value of parks and other public amenities and on whom ABS purported to rely, testified
34 that ABS had completely misapplied his work and dramatically overstated both the
35 distance to which economic benefits might extend from the LID Improvements and the
36 extent of any anticipated benefit within the potentially benefited area.
37
38
39

40 **Legal Requirement:** Actual special benefit—Must take into account potential
41 disamenities
42

43 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
44 construction, as well as other potential disamenities associated with public places.
45
46
47

1 **Legal Requirement:** Cannot prematurely commit to build

2
3 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
4 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
5 are being imposed. But finalizing the roll is a commitment by the City to build the
6 improvements, which is a violation of legal process and commits the City to build things it
7 may not secure permission to build.
8
9

10
11 In addition to these general objections, there are property-specific issues raised by
12
13 Seattle Tower I, LLC as to which the Examiner also erred, discussed in the course of the
14
15 appeal statement below.
16

17 **V. Standard of Review**

18
19 “When considering the assessment roll, the city council sits ‘as a board of
20
21 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
22
23 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
24
25 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
26
27 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
28

29 The proposed assessments are presumed correct, “unless overcome by clear, cogent
30
31 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
32
33 than the heightened presumption of correctness on judicial appeal because “applying these
34
35 elevated standards at the municipal hearing would afford unwarranted deference to a report
36
37 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
38
39 presumption is not evidence and its efficacy is lost when the other party adduces credible
40
41 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
42
43 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
44
45 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
46
47 presented credible evidence showing that the City’s proposed assessment is arbitrary,

1 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
2 to the City to prove the assessments are actual, measurable, special, non-speculative and
3 proportionate. The City failed that burden.
4

5 **VI. Grounds for Appeal**

6 SEATTLE TOWER I, LLC appeals the Hearing Examiner's Findings and
7
8 Recommendations on the following grounds.
9

10 **Seattle Tower I, LLC Not Required to Provide A Special Benefit Study**

11
12 1. Contrary to the Examiner's findings and recommendations, there is no
13 requirement that experts or property owners provide an alternative special benefit
14 calculation under these circumstances—to do so would also require the same improper
15 speculation the City's expert engaged in, given the timing and information provided. *See*,
16 *e.g.*, Second Decl. of Peter Shorett ISO Closing Stmt., ¶¶ 3-4 (dated 7/7/2020); Decl. of
17 Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has
18 explained: "[W]e have explicitly rejected an argument that, because certain protestors 'failed
19 to offer expert testimony at the city council hearing[,] the presumptions [in favor of the
20 assessment] were still operative as to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting
21 *In re Indian Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*,
22 85 Wn. App. 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he
23 provided expert opinion showing that improvements actually diminished value of the
24 property). In fact, no independent evidence is required at all if, for example, objectors show
25 that the assessment was grounded on a fundamentally wrong basis due to an error in the
26 City's appraiser's methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
27 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
28 a property owner could simply point out that the square footage assumed in the City's
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 appraisal was incorrect. For these reasons, Seattle Tower I, LLC appeals the following
2 portions of the Examiner's Recommendation: Sections II.12, II.14, II.17, IV.A, IV.B.11(a),
3 IV.C.2, IV.C.8, and IV.C.11.
4

5
6
7 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**
8

9 2. RCW 35.43.040 provides cities and towns authority for ordering local
10 improvements and for levying and collecting special assessments "on property specially
11 benefited thereby[.]" The cost and expense of the local improvement "shall be assessed
12 upon all the property in accordance with the special benefits conferred thereon." RCW
13 35.44.010.
14
15
16
17

18 3. No analysis of general benefits. Special assessments have been "held valid
19 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
20 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
21 mains." *Heavens*, 66 Wn. 2d at 563. "All such assessments have one common element:
22 they are for the construction of local improvements that are appurtenant to specific land and
23 bring a benefit substantially more intense than is yielded to the rest of the municipality." *Id.*
24
25
26
27
28
29

30 4. Seattle Tower I, LLC's property is not specially benefited by the LID
31 Improvements. The primary purpose and effect of the LID Improvements are to benefit
32 "members of the whole community" and the public at large. *See, e.g., id.* at 565 ("it is plain
33 that a public library is for the benefit of the members of the whole community individually
34 and collectively who may be served by it"). Mr. Macaulay's own chapter of the LID
35 Manual states clearly that appraisers should "[c]onsider general benefits as well as special
36 benefits" (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that "general benefits
37
38
39
40
41
42
43
44
45

46 ² "Hrg. Exhibits" refer to exhibits that were submitted on behalf of multiple objectors
47 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil

1 probably accrue to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Seattle Tower
2
3 I, LLC’s expert confirmed that if an appraiser “identifies both general and special benefits,
4
5 these benefits should be clearly distinguished and explained, and only special benefits
6
7 should be included in the After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated
8
9 7/7/2020); *see also* 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/11/2020 (P. Shorett) Hrg.
10
11 Tr. at 182:14-183:4. It is undisputed that Mr. Macaulay did not analyze or measure general
12
13 benefits, including those arising from construction necessary to meet basic design standards.
14
15 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
16
17 construction costs related to meeting design standards which may be general benefits as
18
19 distinct from construction costs emanating from requirements of the LID project”). To the
20
21 extent Seattle Tower I, LLC’s property may benefit from the LID improvements, the benefit
22
23 is general and incidental, and failure to consider general benefits was a fatal flaw in the
24
25 City’s methodology. For these reasons, Seattle Tower I, LLC appeals the following portions
26
27 of the Examiner’s Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and
28
29 IV.C.4.

30
31 5. LID Improvements not necessary. Unlike typical LID projects, the
32
33 Waterfront LID improvements are largely unnecessary to the functionality of any particular
34
35 property, including Seattle Tower I, LLC’s property. *See In re Schmitz*, 44 Wn.2d 429, 433,
36
37 268 P.2d 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16
38
39 to 18 feet held invalid where owners would have benefitted equally from increase of only 9
40
41 feet); *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
42
43

44 _____
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Seattle Tower I, LLC has attached a master list of the hearing exhibits as Attachment A to this appeal
notice.

1 intersection for new water main for hydrant held invalid because land was already afforded
2 functional hydrant at nearby street). Here, Randy Meyer, CFO and Vice President of the
3 Hotel Group, which operates the Sound Hotel component of the Seattle Tower building,
4 testified via declaration that the LID improvements are not necessary to the functionality or
5 continued use of the property as a hotel. *See* Hrg. Exhibit 109, Meyer Decl. ¶ 17 (dated
6 4/15/2020). For the Arrive Apartments component of the property, the assumption that an
7 increase in tourism will cause lifts in property value is both anecdotally and empirically
8 unsupported. The fact that there is no case law differentiating between binary improvements
9 and parks does not change the law prohibiting assessments on properties already adequately
10 served by existing amenities. *See* Examiner's Recommendation at IV.C.3 (reasoning that
11 "no case law is provided to support the differentiation between a hardscape benefit and the
12 more ephemeral benefits of park"). Nor does the Examiner's reasoning excuse the City's
13 failure to account for existing amenities as part of the special benefit calculation. As Dr.
14 Crompton testified, existing view amenities may in fact diminish the incremental effect of
15 new park improvements on the value of properties, much like turning on a weak light in an
16 already brightly illuminated room. *See* Hrg. Exhibit 94 (Crompton's Report) at 12-13.

17
18
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33 6. To the extent benefits can be considered "special" as opposed to general, they
34 are nominal or nonexistent for many properties even in the Central Waterfront, which
35 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
36 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
37 change due to expansion of sewer service *near* owners' parcel which were already
38 connected). Here, the primary reasons users choose a particular hotel or apartment is not
39 proximity to the waterfront. Instead, like most of the downtown hotels, Sound Hotel caters
40 primarily to business travelers attending conventions and meetings. *See, e.g., Id.* at ¶ 18. For
41
42
43
44
45
46
47

1 this reason, Mr. Meyer explained that Sound Hotel does not expect the LID Improvements
2 to increase impact on demand for rooms or room rates. *Id.* Even if the City could assess for a
3 view change (and it has promised not to assess for viaduct removal), the fair market value of
4 SEATTLE TOWER I, LLC'S property has not changed because the LID Improvements
5 have not improved the property's waterfront view or access to the waterfront, nor will they
6 when the City anticipates completion in 2024. For these reasons, Seattle Tower I, LLC
7 appeals the following portions of the Examiner's Recommendation: Sections IV.C.3,
8 IV.B.9, and IV.C.3.

16 7. No analysis of special detriments. The Final Study fails to properly account
17 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
18 owners for removal and cleanup of underground storage tanks discovered during the
19 improvement project). Although Mr. Macaulay claims he analyzed impacts on the City's
20 planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation
21 of how lost parking might be a detriment, and no property-specific parking analysis in any
22 of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.

30 8. Likewise, there was no analysis of the risks associated with disamenities such
31 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
32 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
33 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
34 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
35 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
36
37
38
39
40
41
42
43
44
45
46
47

1 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
2 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
3 the maintenance agreement. *Id.* at 13:4-14:2.
4

5
6 9. There was also no consideration of negative impacts from another four-plus
7 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
8 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
9 law allowing him to dismiss these actual, non-speculative impacts. Because future special
10 benefits calculations are inherently speculative, Washington's eminent domain statute
11 specifically allows condemnees to postpone special benefits assessments until improvements
12 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
13 Moreover, the studies that Mr. Macaulay relied on demonstrate that construction disamenity
14 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
15 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
16 Greenway, the Greenway district "significantly" lagged in value). For these reasons, Seattle
17 Tower I, LLC appeals the following portions of the Examiner's Recommendation: Sections
18 II.25, IV.B.8, and IV.B.9.
19

21
22
23
24
25
26
27
28
29
30
31

32 10. Special benefit estimate is speculative. When calculating a special benefit,
33 "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at
34 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it
35 becomes pure speculation." *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335-36, 324
36 P.2d 1078 (1958)).
37
38
39
40
41
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 11. Assuming without conceding that one day, the City’s planned LID
2
3 Improvements might increase the value of neighboring properties to some extent, that
4
5 potential benefit is many years away and speculative. While appraisers tolerate some degree
6
7 of estimation and judgment, Seattle Tower I, LLC’s expert testified that Mr. Macaulay’s
8
9 Final Study is far too speculative to satisfy industry practices and standards. *See. e.g.,*
10
11 3/12/2020 (P. Shorett) Hrg. Tr. at 92:24-93:10 (it is impossible to perform a special benefit
12
13 analysis with the level of precision implied in the Final Study due to the size of the LID and
14
15 use of hypotheticals).

16 12. Although LIDs are sometimes finalized prior to completion of improvements,
17
18 this is typically just six month or a year prior, and the assessments are otherwise supported
19
20 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
21
22 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
23
24 will not be realized for four or five years. In the meantime, there is permitting risk,
25
26 construction risk, and general economic risk (e.g., COVID), which renders ABS’s 2019
27
28 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
29
30 and to what extent, different factors will impact value. *Id.* at 51:13-53:5; *see also* 3/11/2020
31
32 (P. Shorett) Hrg. Tr. at 196:17-21; 205:22-206:2. Ultimately, Mr. Macaulay concedes that
33
34 there is inherent uncertainty in valuing the future delivery of projects because “we can’t read
35
36 the future.” 6/23/2020 Hrg. Tr. at 79:18-80:8. As he testified: “I just don’t know what the
37
38 market value would be as of the date the project would be finally constructed” because
39
40 “[t]here could be a lot of elements in the market that did occur between now and then that
41
42 impact value.” 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.* at 211:8-20 (no way to know if
43
44 his estimates will be higher or lower than comparable sales in 2024 because “markets tend to
45
46 fluctuate over time” and “I can’t predict the future”).
47

1 13. The record is clear that while no one can know what “special benefit” might
2 accrue to these properties in four years (if any), we do know that there are no actual benefits
3 now. The LID improvements provide no immediate special benefit to property owners
4 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
5 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
6 sewer system for future users). For example, notwithstanding the questionable hypothesis
7 that hotels will benefit from an expected increase in tourism (higher room rates or
8 occupancy) when the improvements are complete, it is undisputed that tourists are not
9 coming in larger numbers and paying higher room rates now because of something
10 happening five years down the road. *See* 3/12/2020 (J. Gordon) Hrg. Tr. at 207:11-23.

11 14. Further, there are no “plans and specifications” on file with the Clerk’s Office
12 for the LID Improvements, and it is unlawful to move to final assessments without such
13 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
14 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
15 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
16 dollars on projects still early in the design process. *See* Washington Attorney General
17 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
18 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
19 of programs and included “only so much of the overall costs” that took place within and
20 benefitted the assessed properties).

21 15. The COVID-19 crisis highlights how fundamentally speculative and unfair it
22 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
23 anticipated to be delivered five years later. Even before COVID, it was speculative to
24 assume that market highs experienced in October 2019¹ would be sustained through 2024,

1 after an already extraordinarily long expansion period. *See, e.g.,* 3/3/2020 (A. Gibbons)
2 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
3 my analysis in October 2019, who would have thought that this COVID issue would
4 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
5 process was that the market was going to continue to go up”—in fact, it did not for Seattle
6 Tower I, LLC’s property. *Id.* Mr. Gordon’s appraisals after March 1, 2020 showed that
7 downtown hotel values had already dropped an estimated 10-15% from their October 2019
8 levels, and occupancy rates were at zero or in single digits. *See* Gordon Decl. (dated
9 4/21/2020) at ¶ 9. Hotels without guests will derive no benefit, special or otherwise, from
10 the planned LID Improvements. And even assuming hotels recover prior to 2024, there is
11 no basis for assuming that values hypothesized in October 2019 will remain relevant; they
12 are already irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶ 12 (dated 7/7/2020).
13 Although COVID does not change actual values as of October 2019 (*see* Examiner’s
14 Recommendation at 109), the pandemic has impacted *current* values and rendered the
15 hypothetical October 2019 Final Study valuations outdated.

30
31 16. As another example of how future events could affect the accuracy and
32 reliability of the City’s 2019 proposed assessment, Seattle Tower I, LLC recently requested
33 the Hearing Examiner re-open the record to allow the City to explain whether the
34 assessments against property owners within the LID are, in fact, being used by the City to
35 fund the emergency dismantling and reconstruction of Pier 58.⁴ It has been reported that the

36
37
38
39
40
41
42 ⁴ Associated Press, *Seattle mayor approves ‘emergency dismantling’ of waterfront Pier 58* (King

44 [approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-](https://www.king5.com/article/news/local/seattle/seattle-mayor-approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-0b60d4097aa3)
45 [0b60d4097aa3](https://www.king5.com/article/news/local/seattle/seattle-mayor-approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-0b60d4097aa3); *See* Aug. 21, 2020 Memo from R. Holtz et al. to L. Arber re HPA Request for Pier
46 58 (Waterfront Park) Emergency Demolition Project, *available at*
47 <https://www.govonlineaas.com/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.ashx?que>

1 City plans to use LID funding to pay for the expedited, emergency repairs and replacement.⁵
2
3 If true, the City would be improperly imposing costs on property owners within the LID for
4 improvements that are required to maintain the safety of Pier 58 and to remove a threat to
5 critical salmon habitat and City infrastructure—this does not provide any special benefit to
6
7 LID property owners.
8
9

10 17. There is also no certainty the improvements will be delivered on time. Mr.
11 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
12 delay in construction schedule would not constitute a “material change” under the City
13 Council’s ordinance authorizing the improvements. In other words, the City cannot
14 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
15 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Seattle Tower I, LLC’s experts Reid
16 Shockey and Richard Shiroyama testified via declaration as to the City’s permitting gauntlet,
17 and potential delays and project changes inherent in those processes, that call into question
18 the assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
19 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
20 Decl., dated 4/15/2020).

45 ⁵ Asia Fields, ‘Substantial’ pier shift closes Seattle’s Waterfront Park (Seattle Times, Aug. 8,
46 2020), available at [https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/)
47 [waterfront-park/](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/).

1 he has never recommended final special assessments based on designs less than 30 percent
2 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
3 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
4 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
5 at 66:17-25. He performed no independent due diligence to determine the reliability of the
6 City’s estimates for completion of the LID Improvements, or to ensure that proposed
7 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
8 agreed that if any of his assumptions are incorrect, his opinion of market value would need
9 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
10 68:11-18.

11
12 19. The City has cited no authority—and Seattle Tower I, LLC is aware of
13 none—that affirms the use of hypothetical, anticipatory Before and After values in order to
14 estimate and assess taxes for “actual” special benefits that will not accrue for another five
15 years (if all goes off without a hitch). To the contrary, the hypothetical assumption that all
16 of the Before and After Improvements are constructed as of October 1, 2019 allows Mr.
17 Macaulay to base his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
18 411. For these reasons, Seattle Tower I, LLC appeals the following portions of the
19 Examiner’s Recommendation: Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5,
20 IV.B.6, IV.B.11(c), IV.C.12, IV.C.14, and IV.C.18.

21 20. Failure to discount special benefit estimates to account for risks and present
22 value. Due to the inherent uncertainty, Seattle Tower I, LLC’s expert opine that the Final
23 Study should have accounted for risks associated with delivery of the improvements
24 (including permitting risk, construction risk, general economic risk) and any special
25 damages associated with interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-

1 120:9, 59:20-60:20. In addition, as is typical appraisal practice, Mr. Macaulay should have
2 discounted the anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-
3 55:1; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers
4 routinely consider the impact of future conditions [through] discounted cash flow
5 analysis.”).
6
7
8
9

10 21. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.
22
23
24
25
26
27
28
29
30
31
32
33

34 22. The City’s hotel expert, Mr. Lukens, likewise explained that to calculate
35 present value, an appraiser would consider discount rates for land development to account
36 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
37 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
38 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
39 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
40
41
42
43
44
45
46
47

1 23. Applying the Q19 Korpacz rates and assuming arguendo that Macauley's
2 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
3 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
4 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
5 ignoring momentarily all of the other methodological and other flaws discussed here and in
6 Seattle Tower I, LLC's case-in-chief, and assuming that the LID Improvements provide
7 special benefits as soon as they are complete in 2024, Mr. Macaulay's hypothetical
8 assessment materially exceeds special benefits when reduced to present value. Further, to
9 the extent the City is arguing that because they are permitted to assess 100% of the special
10 benefit, the special benefit estimate can be off by 60.8% because they only assess 39.2% of
11 that benefit, the City is again wrong. After applying proper discounting, the City's proposed
12 special benefit assessment is far more than 39.2% of the total estimated special benefit, and
13 in fact exceeds 100% of the total estimated special benefit.
14

15 24. But even the assumption that the LID improvements would deliver benefits
16 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
17 on. Rather, those studies demonstrate that a discount period of five years is conservative.
18 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
19 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
20 indicates that during the construction period, the Greenway district "significantly" lagged in
21 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
22 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
23 30-31 (discussing New York City High Line and San Francisco Embarcadero
24 improvements). Given the lengthy delay, any prediction of future special benefits is
25 speculative, especially during the construction phase where values are likely to decline.
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 Second Decl. of Shorett ISO Closing Stmt., ¶ 6 (dated 7/7/2020). And assuming the LID
2
3 Improvements take a similarly long period of time after they are complete to start producing
4
5 tangible property value benefits, each additional year of delay results in further discount to
6
7 the present value of any future alleged benefit. Gibbons Decl. ISO Closing Stmt., ¶ 19, Ex.
8
9 A.

10
11 25. Applying the same discounting methods described above and in Mr. Gibbons
12
13 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
14
15 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
16
17 before applying the 39.2% percentage assessment. *Id.* For Seattle Tower I, LLC, this means
18
19 at most the 100% assessment should be no more than \$147,423. Anything more would
20
21 permit the City to assess Seattle Tower I, LLC based on a hypothetical assumption that these
22
23 improvements are in place and providing benefit, and ignore the risks, construction
24
25 disamenity, and time value of money that normal appraisal principles would take into
26
27 account. *Id.*, ¶ 20. Proportionality would counsel that the assessment should be only 39.2%
28
29 of that assessment cap, or \$57,789.82.

30
31 26. Attachment C includes two Excel spreadsheets applying these discounting
32
33 methods to Seattle Tower I LLC's assessment. It is undisputed that special benefits will not
34
35 actually accrue until the LID Improvements are complete in 2024. Accordingly, the first
36
37 spreadsheet demonstrates that discounting the City's hypothetical October 2019 special
38
39 benefits to present value would reduce Seattle Tower I LLC's assessment to \$210,382,
40
41 exclusive of any other flaws in the City's proposed assessment. The second spreadsheet
42
43 shows even more drastic reductions after taking into account: (1) Seattle Tower I LLC's
44
45 experts' estimated "Before" value based on actual data from Seattle Tower I LLC; (2) a
46
47 rough discount for property value loss due to COVID-19 and (3) discounting to present

1 value for 5 years (*i.e.*, from 2024 when the City anticipates completing the LID
2 Improvements) and 10 years (*i.e.*, from 2029 to account for the time it takes for the
3 improvements to capture property value). After such reductions, Seattle Tower I LLC's
4 assessment would be just \$148,856 (for the 5-year discount) or \$40,901 (for the 10-year
5 discount). Further, the spreadsheet concludes a "zero" benefit for this property because,
6 based on Dr. Crompton's testimony, Seattle Tower I LLC's property is more than 2,000 feet
7 from the core "park" improvements and therefore too distant to receive any special benefit.
8 Neither of these spreadsheets address other issues raised by Seattle Tower I LLC's appeal,
9 but are intended to help demonstrate how unfair and inflated the City's proposed
10 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
11 Seattle Tower I LLC's discounting argument without legal or factual analysis; that failure is
12 error.
13
14
15
16
17
18
19
20
21
22
23

24 **Appraisal and Assessment Calculation Methods Are Flawed**

25
26 27. The "general rule is that each lot, piece, or parcel of land should be assessed
27 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
28 Wn.2d at 97.
29
30
31

32 28. It is proper to sustain a challenge to an assessment, even without the appraisal
33 testimony from the owner, where the objector's expert establishes that the assessment was
34 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
35 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
36
37
38
39

40 29. The City's appraiser purports to utilize the income method of valuation but
41 relied on inaccurate revenue and market data, as discussed further below.
42
43

44 30. The City's appraiser purports to utilize the comparable sales method of
45 valuation, but no City witness attempted "to characterize any one, or all of them, as
46
47

1 comparable to [Seattle Tower I, LLC's property]." *See Bellevue Plaza*, 121 Wn.2d at 406
2
3 (finding "several serious flaws" in ABS's LID analysis in that case, including that the
4 appraiser "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt
5 to characterize any one, or all of them, as comparable to any particular property within the
6 LID"). And no City witness could explain how specific adjustments were made to these sales
7
8 to account for value increases due to the hypothesized Before and After Improvements. For
9
10 this reason, Seattle Tower I, LLC appeals Section II.23 of the Examiner's Recommendation.
11
12
13

14 31. Special assessment improperly includes value lift from the Before
15 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
16 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
17 Improvements, which WSDOT had independently committed to fund. However, Mr.
18 Macaulay did not calculate the actual market value of LID properties in October 2019, and
19 did not separately analyze the hypothetical increase to property values attributable to
20 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
21 current value and then separately calculate a hypothetical "With WSDOT" Before value);
22 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
23 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
24 3-4. Shorett Appraisal Review (attached to Appeal Petition) at 2-14. Without any
25 documented basis or support, Mr. Macaulay simply "ma[de] a judgment a call" on what
26 occupancy and rates would have been for the commercial properties assuming all of the
27 WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-130:11. This
28 outright omission precludes any independent evaluation of the true market "Before" values.
29 *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards;
30
31 if an appraiser uses current sales data to infer values, then the appraiser must explain how he
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
2 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
3 other road, pedestrian and landscaping improvements WSDOT had already committed to
4 make.
5
6

7
8
9 32. However, because Mr. Macaulay testified that he did include some WSDOT-
10 related value-lift in the “Before” values, it follows that part of the special assessment
11 improperly is based on value attributable to the WSDOT Improvements. As shown by
12 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
13 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
14 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
15 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
16 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
17 to properly exclude the value of Before Improvements from the assessments. For these
18 reasons, Seattle Tower I, LLC appeals the following portions of the Examiner’s
19 Recommendation: Sections II.16, II.19, II.29, and IV.B.11(a)(ii)
20
21

22
23 33. Special benefits were assigned rather than measured. Mr. Macaulay
24 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
25 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/12/2020 (P.
26 Shorett) Hrg. Tr. at 49:4-50:1; *id.* (J. Gordon) at 168:2-20; 3/3/2020 (A. Gibbons) Hrg Tr. at
27 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr. Macaulay used to
28 analyze the commercial properties, Seattle Tower I, LLC’s experts concluded that Mr.
29 Macaulay based adjustments on hypothesized very small increases to property revenue and
30 very small reductions to cap rates to “calculate” an “After” value due to the coming 2024
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 LID Improvements. Attachment B (ABS Spreadsheet). These series of micro adjustments
2
3 were based on “professional judgment” that are neither shown nor replicable.
4

5 34. For these reasons, Seattle Tower I, LLC appeals the following portions of the
6
7 Examiner’s Recommendation: Sections II.19 and IV.B.11(a)(iii).
8

9 35. Special benefit falls within margin of error. The Final Special Benefit Study
10
11 applies an estimated value enhancement of less than 4%, which is generally within the
12
13 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
14
15 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
16
17 Seattle Tower I, LLC’s experts explained that if two appraisers independently arrive at
18
19 values within 5% of one another, this difference is considered reasonable as it falls within
20
21 the standard margin of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at
22
23 164:2-9; 3/11/2020 (P. Shorett) Hrg. Tr. at 216:25-217:11. Because Mr. Macaulay’s micro-
24
25 special benefit percentages fall far below that 5% margin, “there is no way of
26
27 authenticating” such incremental changes because “[m]arket forces completely obliterate
28
29 any tiny little noise factor like that.” *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5.
30
31 Mr. Macaulay agreed during his deposition that 0.25% is too small to measure. Macaulay
32
33 Depo. at 25:17-25. Additionally, the fact that “Before” values are also based on a
34
35 hypothetical that adds some unstated incremental value to actual 2019 values exacerbates
36
37 this issue—the ability for an appraiser to discern the micro-value differences between
38
39 hypothetical conditions that are so similar (the WSDOT improvements compared to the LID
40
41 improvements) “verges on being ludicrous.” 3/3/2020 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
42

43 36. Even if it were possible to accurately tease out such a miniscule hypothetical
44
45 value change due to improvements coming five years later, experts testified that there is no
46
47 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to

1 what he felt the changes (hypothetically) would be. *See* 3/12/2020 (J. Gordon) Hrg. Tr. at
2 168:2-20; 176:1-177:6; *id.* (P. Shorett) at 49:4-50:1; 3/3/2020 (A Gibbons) Hrg. Tr. at
3 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
4 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Seattle
5 Tower I, LLC appeals the following portions of the Examiner’s Recommendation: II.27 and
6 IV.B.4.
7
8
9
10
11

12 37. No analysis of value increase attributable to individual components of the
13 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
14 percentage difference between hypothetical Before and After conditions. Throughout his
15 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
16 descriptions in the Addenda even though he testified that he relied on these to calculate
17 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
18 someone might be able to determine how he attributed value to After conditions described in
19 the Addenda, he answered that that was “not the scope of the assignment” because he was
20 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
21 that the six components were not actually a continuous project, that he was viewing them
22 together because the City asked him to, and that if he were to view them independently,
23 there was a low probability that properties in the north would specially benefit from
24 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.
25
26
27
28
29
30
31
32
33
34
35
36
37

38 38. Not only did he fail to analyze benefits from each of these non-contiguous
39 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
40 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
41 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
42 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
43
44
45
46
47

1 objectives that guided regulators' assessment of architectural plans for buildings along a
2 "signature street" were so vague that they amounted to ad hoc review based on the
3 regulators' subjective impressions and feelings).⁶ It became clear through his testimony that
4 even though he used the renderings as "visual aid[s] in appraising the property in the before
5 and after" to "visually see what the differences would be," he could not explain what
6 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
7 when shown a rendering of a two-lane road going down to one-lane in the After condition
8 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
9 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
10 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
11 could explain the depiction of the same trees in the After condition nearly twice as tall as in
12 the Before. *Id.* at 173:17-175:4. For these reasons, Seattle Tower I, LLC appeals the
13 following portions of the Examiner's Recommendation: II.27 and IV.B.4.

14
15 39. Special assessment is not supported by comparable studies, data or reports.
16 Mr. Macaulay's references to empirical research do not justify his fundamental assumption
17 that the LID Improvements will lead to meaningfully increased real estate values for Seattle
18 Tower I, LLC. Indeed, no City witness was able to explain how ABS Valuation used
19 comparable sales or information from the "over twenty-five studies and reports" to arrive at
20 very precise special benefit increases for the commercial properties, including Seattle Tower
21
22

40
41
42
43
44
45
46
47

⁶ As an aside, this admission suggests that there should have been an explicit City Council finding that properties within the LID would benefit from the improvements as a whole. *See* RCW 35.43.050. Without this finding, the cost and expense of each component must "be ascertained separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and expense of each unit." *Id.* In other words, Mr. Macaulay should have estimated the benefit to each property from each component separately, consistent with the law and in recognition of his testimony that not all properties benefit from all components.

1 I, LLC's property. For example, although Mr. Macaulay stated that no single report or study
2 was directly on point due to the unique nature of the LID Improvements (*see, e.g.,* 6/25/2020
3 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
4 parcel-by-parcel analysis other than to say that the studies generally provided "some
5 background to base decisions on." *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
6 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
7 similarities and differences between these improvements and the comparable parks he
8 looked at).

16 40. Mr. Macaulay purports to rely on Dr. Crompton's research to justify the
17 assignment of incremental increase of 0.5% to 4% to property values within the LID.
18 However, among other critiques, Dr. Crompton testified that Mr. Macaulay's reliance on his
19 research misinterprets his work in critical ways, including because the LID Improvements
20 manifest the characteristics of a parkway (not a park), and his research indicates that most of
21 a *park's* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
22 in Seattle). *See* Hrg. Exhibit 94 (Crompton's report). Further, updated research shows park-
23 related value increases are in fact smaller; that estimated increases are "best guesses" rather
24 than predictions of property value increases in a particular city; and that percentages do not
25 account for diminishing returns after taking into account water views, which would be the
26 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
27 topography grants most properties in downtown a water view.

39 41. Rather than addressing Dr. Crompton's critiques, Mr. Macaulay simply states
40 that this was just one source of information that was not entirely relevant because, among
41 other things, Dr. Crompton's research dealt with parks and not streetscapes. However, Dr.
42 Crompton's critiques were based on Mr. Macaulay's own testimony that the core "park"

1 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
2 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
3 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
4 Crompton concluded that 500 feet via road from “park” improvements is just one or two
5 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
6 significantly beyond that which the park study indicated (even if it was legitimate to use the
7 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
8 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
9 impact applicable to “community parks”—which the LID Improvements are not. *Id.* Seattle
10 Tower I, LLC’s property is not within 2,000 road network feet from the “park”
11 improvements. *See* Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.
12
13
14
15
16
17
18
19
20
21
22

23 42. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
24 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
25 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
26 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
27 materials, it was clearly an important—if not *the* most important—source of information for
28 estimating special benefits (especially with respect to the condos).⁷ No City witness
29 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
30 parcel-by-parcel analysis.
31
32
33
34
35
36
37
38
39
40
41

42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 43. The destination parks discussed in the Final Special Benefit Study do not
2 provide reliable, comparable, and valid support for the calculation of special assessments
3 here. *See* Shorett Appraisal Review (attached to Appeal Petition) at 15-19 (Shorett’s
4 critique of every case study cited concludes the changes to those “dwarf the difference
5 between the before-after condition of the property with LID”); Gibbons 5/2/2018 Letter at 4;
6 Hrg. Exhibit 49 (P. Shorett’s Supplemental Report); 3/11/2020 (P. Shorett) Hrg. Tr. at
7 208:8-24; 3/12/2020 (P. Shorett) Hrg. Tr. at 6:19-7:18; Second Decl. of Shorett ISO Closing
8 Stmt., ¶ 5 (explaining again why the San Francisco, Boston, and Portland case studies are
9 not in fact comparable). None of the parks cited in the Final Special Benefit Study were
10 funded by a LID. And in virtually all of those cases, the park improvements dramatically
11 restored unimproved or blighted areas, and properties evaluated were within two or three
12 blocks of the park.
13

14 44. ABS’s claimed reliance on three economic studies to support property value
15 increase is also flawed. The HR&A study does not inform what value increases are
16 expected from the LID Improvements because it projects increases to tourism from *all* of the
17 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
18 dissimilar parks in other cities,⁸ making the methodological application to the LID
19 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study’s
20 conclusion that there would be *no new net visitors* from downtown residents as a result of
21

22 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
23 Kennedy Greenway, and Millennium Park where tourist “capture rates” varied from 5% (Rose
24 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
25 expected tourists visiting the LID park was calculated using data from only from New York City, a
26 notorious tourist destination. More fundamentally, the assumption that hotel visitors are going to
27 increase their stays in the Seattle core based on proximity to Pier 58, as an example, is contrary to
28 how hotel visitors actually select hotels to stay in.
29

1 the LID Improvements and could not explain how this impacted his condo analysis.
2
3 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on “The Impact of Parks on
4 Property Values” primarily focused on whether the benefits accrue to the larger community
5 rather than properties adjacent to the park. And the 2014 New York City Department of
6 Transportation study is not based on real estate transactions and market sales and fails to
7 substantiate any link between increased retail sales and property values. Moreover, this
8 study only looked at impact either directly abutting the streetscape improvement, or a couple
9 hundred feet for plaza-like improvements.
10
11
12
13
14
15

16 45. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
17 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
18 Exhibit 124. One explanation of that this omission could be TPL’s estimate of the economic
19 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
20 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
21 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
22 asked whether he considered that HR&A’s estimated LID impact is six times greater than
23 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
24 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
25 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
26 assumptions to account for this difference, which may be partly explained by the fact that
27 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
28 approximately 3.44% of King County tourists visit Seattle primarily because of the city
29 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
30 waterfront improvements.
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 46. Although proximity to the improvements is a key factor in all of these
2 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
3 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
4 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
5 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
6 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
7 Improvements is approximate 20 acres and it is not a community park.⁹

8 47. There is no explanation in the Final Study or the supporting materials of how
9 the studies or comparable sales were used to derive values for Seattle Tower I, LLC's
10 property. For these reasons, Seattle Tower I, LLC appeals the following portions of the
11 Examiner's Recommendation: Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30,
12 II.32, and IV.C.5.

13 48. Failure to comply with USPAP. Seattle Tower I, LLC's assessment also rests
14 on a fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid
15 mass-appraisal method. Randall Scott, a former mass appraiser responsible (and
16 professionally recognized) for developing the MAI standards for mass appraisals, testified
17 that the Final Study does not meet mass appraisal standards nor allow for independent
18 assessment of the accuracy of Mr. Macauley's conclusions.

19 49. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
20 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22

23 ⁹ *See*
24 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
25 connecting Seattle's central waterfront to downtown.").

1 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
2 testimony suggests that he incorrectly believed that the only difference between direct
3 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
4 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
5 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
6 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
7 Gordon uses in doing his limited restricted report").

8
9
10
11
12
13
14
15 50. But the difference is not only in reporting—mass appraisal techniques must
16 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
17 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
18 parcel approach:
19
20
21

22 The mass appraisal technique is an appraisal method used to evaluate
23 a group of properties that are subject to similar market forces as of a
24 certain date through the use of market data, statistical analysis and
25 testing. As a result, the mass appraisal technique does not require or
26 involve analysis of each individual property's specific data.
27
28

29 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
30
31

32 51. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
33 universe of properties as a given date using standard methodology, employing common data,
34 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
35 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
36 model" is "a mathematical expression of how supply and demand factors interact in a
37 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
38 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
39 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
40
41
42
43
44
45
46
47

1 52. Regardless of client direction, Mr. Macaulay is required to comply with
2
3 USPAP. So if, as he determined, a “[p]arcel-by-parcel direct appraisal” would not have been
4
5 economically feasible because it would have taken “an incredible amount of time and cost”
6
7 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
8
9 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 (“performing an
10
11 individual appraisal of each [condo] parcel would have been cost and time prohibitive”).

12 53. But Mr. Macaulay’s methods fail to comply with USPAP Standards 5 and 6
13
14 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
15
16 value, fails to calibrate the model structure to determine the contribution of the individual
17
18 characteristics affecting value, and does not review the mass appraisal results against actual
19
20 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
21
22 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

23 54. Mr. Macaulay explained that factors like “aesthetic change in the area, the
24
25 proximity to the elements, the increase in market rent, market vacancy changes,
26
27 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
28
29 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
30
31
32

33
34 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
2 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
3 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
4 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
5 were hypothetical, it was not possible to identify matched pair sales and no City witness
6 explained how ABS Valuation made adjustments to “comparable” sales in order to check
7 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
8 him to explain his model structure.
9

10
11 55. For these reasons, Seattle Tower I, LLC appeals the following portions of the
12 Examiner’s Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Seattle Tower I,
13 LLC renews Objectors’ Motion To Exclude The Expert Testimony of Robert J. Macaulay,
14 filed on April 8, 2020, and appeals the Examiner’s denial of that motion.
15

16
17 56. Finally, Seattle Tower I, LLC’s property is not appurtenant—or even in close
18 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
19 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
20 close proximity to the property on which expert testimony was given”). Indeed, Seattle
21 Tower I, LLC’s property is not even within 2,000 road network feet from the core park
22 improvements. And, as described above, the special assessment is overstated because the
23 Final Study makes no attempt to determine general benefits, existing amenities for Seattle
24 Tower I, LLC’s specific property, or special detriments. In addition, it is speculative due to
25 the fact that, as of October 2019, improvements were not in in place—and, in fact, much of
26 the waterfront is a construction zone following removal of the viaduct and now Pier 58
27 demolition. Under these circumstances, rather than relying on entirely imaginary income
28 and shaky hypotheticals, Mr. Macaulay at the very least should have discounted the special
29
30
31
32
33
34

43
44
45
46
47

1 benefit estimates or waited to perform the Study until the improvements were at least close
2 to complete.
3

4 **Erroneous Pre-Improvement Valuation**

5
6 57. The proposed final assessment erroneously overstates the pre-improvement
7 value of Seattle Tower I, LLC's property as of October 1, 2019 and, as a result, overstates
8 the special benefit to the Seattle Tower I, LLC's property.
9

10
11
12 58. The City's Final Study was used to compute the proposed final assessment of
13 SEATTLE TOWER I, LLC'S property. The City's Study purportedly uses data from the
14 King County Department of Assessments,¹¹ but the pre-improvement valuation information
15 in the Final Study does not accurately reflect this data. For example, the City's Study values
16 SEATTLE TOWER I, LLC'S property at \$301,002,000 as of October 1, 2019. However,
17 the King County assessor determined the true and fair value of the property to be
18 \$263,866,700, valued in 2019 for tax year 2020. In other words, the Final Special Benefit
19 Study's valuation is 114% of King County's assessed value. The Final Special Benefit Study
20 does not explain this difference—or any differences—between its pre-improvement
21 valuation and its supposed source for market data. For this reason, Seattle Tower I, LLC
22 appeals Section IV.C.11 of the Examiner's Recommendation.
23

24
25 59. Further, the City's analysis was based on unreliable market data. For the
26 hotels, Mr. Macaulay's decision to rely on inaccurate market data notably deviates from
27 standard appraisal practices because more reliable data in the form of STR reports are
28 readily available. Examiner Recommendation at Section IV.C.10; 3/12/2020 (J. Gordon)
29
30
31
32
33

34
35
36
37
38
39
40
41
42
43
44
45 ¹¹ See, e.g., Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

1 Hrg. Tr. at 196:5-197:12; 215:9-18. Without the STR reports or actual input from the hotels,
2
3 Mr. Macaulay’s “Before” valuations are drastically overstated in large part because he relies
4
5 on publicly available “room rack rates” to estimate hotel income. *See id.* (J. Gordon) at
6
7 162:3-18; 170:16-171:13; 179:25-180:14; 192:15-22. As the Examiner found, “Mr. Gordon
8
9 is a specialist expert in appraising hotels and his expert opinion, in addition to the specific
10
11 information he relied on for that opinion, is superior to the opinion and supporting data of
12
13 the City in its valuation.” Examiner’s Recommendation at II.16. The Examiner concluded
14
15 that Mr. Gordon’s valuations were more reliable “due to the specialist nature of Mr.
16
17 Gordon’s background and the specificity of the valuation data upon which he relied”—
18
19 namely STR reports or actual revenue data from the hotel. *Id.* at IV.C.10. Therefore, “the
20
21 valuation of [this] property should be remanded for recalculation by the City appraiser based
22
23 on the information provided by [this] Objector.” *Id.*

24
25 60. Seattle Tower I, LLC expects an opportunity to respond to the revised
26
27 assessment once that is provided (*see* Examiner’s Recommendation at V) and appeals the
28
29 remainder of Section IV.C.10 of the Examiner’s Recommendation rejecting Seattle Tower I,
30
31 LLC’s other bases for reducing the assessment. For example, Seattle Tower I, LLC
32
33 disagrees with the Examiner’s conclusion that one of the reasons Mr. Gordon’s appraisals
34
35 concludes a lower value for this property is because he was not valuing the properties in the
36
37 “Before” condition. Examiner’s Recommendation at Section II.16. This does not explain
38
39 the 94.7% difference between ABS Valuation’s estimate and actual average room rates for
40
41 the Sound Hotel. Further, Mr. Lukens—who reviewed ABS’s valuation estimates for
42
43 reasonableness—was not even aware that the Before values were supposed to include the
44
45 WSDOT Improvements. 6/26/2020 Hrg. Tr. at 165:2-166:22.
46
47

1 61. In addition, John Gordon provided an appraisal review and restricted
2 appraisals specific to the Sound Hotel and Arrive Apartments, respectively, finding that the
3 City overvalued the before-value of the Seattle Tower I LLC building by \$57,602,000 (Mr.
4 Gordon appraised the Sound Hotel at \$48,400,000 and the Arrive Apartments at
5 \$195,000,000). *See* J. Gordon 3/2/2020 Restricted Appraisal Report, Arrive Luxury
6 Apartments (attached to Appeal Petition) at 2 and J. Gordon 3/2/2020 Restricted Appraisal
7 Report, Sound Hotel (attached to Appeal Petition) at 2. Mr. Gordon, having access to more
8 better data for the Seattle Tower I LLC building, produced more accurate before value
9 appraisals for the Sound Hotel and Arrive Apartments and the Hearing Examiner was wrong
10 to discount this testimony and evidence.
11

12 62. Thus, aside from multiple other reasons why computation of the special
13 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
14 improvement values that do not accurately reflect market data. For these reason, Seattle
15 Tower I, LLC appeals the following portions of the Examiner’s Recommendation: Sections
16 II.16 and IV.C.10.
17

18 **Erroneous Computation of Special Benefit**

19 63. “Special benefit” is “the increase in fair market value attributable to the local
20 improvements.” *Doolittle*, 114 Wn.2d at 103. “A benefit that a particular piece of property
21 may receive by reason of the improvement is not measured alone by the physical character
22 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
23 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
24 the particular tract or property benefited by the entire improvement, and is it assessed
25 proportionately with the other property included within the assessment district?” *Id.* 165–
26 66.

40
41
42
43
44
45
46
47

1 64. The proposed final assessment erroneously overstates the special benefit of
2 LID improvements in a number of ways.
3

4 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
5 the Sound Hotel, Mr. Macaulay assumed room rates would increase by 0.20% (low) and
6 0.55% (high) due to the 2024 LID Improvements. For the Arrive Apartments, Mr. Macaulay
7 assumed rental rates would increase by 0.25% (low) and 0.75% (high) due to the 2024 LID
8 Improvements. But as Mr. Gordon testified, it is not possible to accurately conclude that the
9 reason for this level of percentage increase would be due to the LID Improvements, and
10 there appears to be no support for assignment of these percentages. Based on formulas in
11 the spreadsheets, Mr. Macaulay then uses these same percentages (0.20% and 0.55%) to
12 increase food and beverage revenue and parking and other income for the Sound Hotel and
13 the low and high percentages for the Arrive Apartments (0.25% and 0.75%) to increase the
14 retail and parking income. He then uses this hypothesized increased revenue to calculate a
15 new net operating income for the commercial properties and capitalizes that to come up with
16 an “After” valuation.
17

18 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
19 operating income remains the same as in the hypothetical “Before” condition, but changes
20 the cap rate. For the Sound Hotel, the cap rate goes from 7.25% to 7.19% (low scenario,
21 creating a bigger value increase) and 7.23% (high scenario, creating a lower value increase).
22 Mr. Gordon likewise explained that cap rate changes of 0.06% or 0.02% are not typically
23 measurable, and there appears to be no support for these changes in the Final Study or any
24 of its supporting materials. For the Arrive Apartments, the cap rate goes from 4.10% to
25 4.07% (low scenario, creating a bigger value increase) and 4.09% (high scenario, creating a
26 lower value increase), changes of 0.03% and 0.01%, respectively.
27

35
36
37
38
39
40
41
42
43
44
45
46
47

1 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
2 benefit conclusion. For the Seattle Tower building as a whole, this is an increase in property
3 value of 0.52% due to the LID Improvements.
4

5
6 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
7 and capitalization rates. When asked precisely what the basis is for his special benefit
8 percentage increases to revenue for each commercial property, he could not point to
9 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
10 is nothing in the report to allow a reader to understand how he came up with these
11 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
12 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
13 the basis for his belief that certain factors—liked increased connectivity—will increase
14 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
15 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
16 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
17 sources equally even though there was no separate analysis done for food and beverage or
18 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Seattle Tower I, LLC’s
19 expert’s conclusion that the adjustments are arbitrary and fall below generally accepted
20 margins of error, and that there is no actual, measurable, non-speculative special benefit to
21 Seattle Tower I, LLC’s properties.
22

23 69. When asked the basis for making such adjustments, Mr. Macaulay pointed to
24 “discussions with Mr. Lukens.” *Id.* at 116:5-19; 117:1-8; 126:3-7 (“Mr. Lukens helped
25 significantly in that regard in helping, you know, look at probable adjustments”). However,
26 Mr. Lukens testified that he did not review the percentage increases. *See* 6/25/2020 Hrg. Tr.

45
46
47

1 at 170:24-172:20.¹² And he did not review any work or data to determine whether the
2 revenue percentage adjustments in the spreadsheets were reasonable, nor did he ever find
3 them to be unreasonable or suggest any changes. *Id.* at 172:3-20. Instead, he appeared to be
4 considering them for the first time on cross examination, testifying that the adjustments
5 “appear to be a kind of sensitivity analysis” and “appear to be a very minor change.” *Id.* at
6 170:18-172:13. Likewise, he had no understanding of what factors went into determining
7 the change in capitalization rates in the spreadsheets. *Id.* at 173:23-174:1. And he did not
8 know how ABS Valuation reconciled the four scenarios to come to final estimated special
9 benefit. *Id.* at 174:22-175:4.

10
11 70. Mr. Macaulay testified that he used comparable sales as a reasonableness
12 check for commercial properties. But as explained above, no City witness has explained
13 how anyone, or all, of the sales are comparable to any particular commercial property within
14 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
15 in order to make sales “comparable,” he would have had to make adjustments to account for
16 Before and After conditions, but there is no way to understand how adjustments were made
17 because he “didn’t do a separate sales comparison approach where we showed adjustments
18 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
19 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
20 *Id.* at 127:10-128:24.

21
22 71. It also bears noting that any “internal review” of the special benefit estimates
23 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
24 error. Indeed, given all the same information, he seemed to suggest that it would be
25
26
27
28
29
30
31

46
47

1 perfectly reasonable for another experienced appraiser to come up with special benefit
2 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
3 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
4 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
5 margin of error conflicts with the testimony of Seattle Tower I, LLC's experts and reaffirms
6 that there are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if
7 the typical margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there
8 are still reasonable and unreasonable variations within the appraisal field. *See Examiner's*
9 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
10 special because it is arbitrarily assigned; and it is too small to realistically be supported by
11 appraisal techniques.
12

13 72. No evidence of special benefit. Meanwhile, there is "no actual evidence from
14 any seller or purchaser that the price was higher because of the LID improvements."
15 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
16 identified any seller or buyer, or any particular property where the existence of the LID
17 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Seattle Tower
18 I, LLC has explained that the property has not increased rental rates or revenue due to the
19 forthcoming LID Improvements, because, among other reasons (and apart from COVID),
20 the improvements ABS believes will generate value do not exist, and will not for a number
21 of years to come. There are no comparable sales because the LID Improvements are not in
22 place, nor will they be until the end of 2024 if completed on schedule.
23

24 73. The fair market value of SEATTLE TOWER I, LLC'S property has not
25 changed due to increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property
26 was not specially benefited from installation of new water main and fire hydrant where it
27
28

42
43
44
45
46
47

1 was already adequately supplied with water and afforded adequate fire protection). And in
2 any event, any value attributable to removal of the viaduct was to be excluded from the
3 assessment calculation.
4

5
6 74. There is no special benefit because LID improvements in fact diminish the
7 value of Seattle Tower I, LLC's property by drawing visitors away towards improvements
8 that do not abut the property, increasing competition. *See Kusky*, 85 Wn. App. 493
9 (testimony of owners' expert that LID actually diminished value of property was sufficient
10 to rebut presumption that assessment was proper).
11

12 75. Moreover, the assessment formula is an attempt to distribute costs that do not
13 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
14 "merely a mathematical model that distributes costs").
15

16 76. The Special Benefit Study fails to address whether the \$346,000,000
17 estimated LID project cost takes into account the investment that would have occurred in the
18 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
19 invested. This is a critical component of estimating which properties receive a direct benefit
20 from the improvements, versus more incidental benefits further from the park.
21

22 77. Assessments are disproportionate. Seattle Tower I, LLC also presented
23 evidence showing that the assessments are disproportionate with respect to the Sound Hotel.
24 For example, the City disproportionately assessed hotels a greater percentage of the cost of
25 the Improvements even though there no evidence that hotel properties will in fact benefit.
26 And even within the hotels, the assessments are disproportionate. Mr. Gordon testified that
27 the differences between the special benefit increases for the Hyatt at Olive 8, the Grand
28 Hyatt, and Hyatt Regency—which are all very close together—made little sense and raised
29 doubts as to proportionality. The Marriott is assessed a 3.2% special assessment, whereas
30
31
32

44
45
46
47

1 comparable hotels along the waterfront received an estimated 0.97% increase in value. Hrg.
2 Exhibit 108 (Rash Decl.), ¶ 11.
3

4 78. Mr. Macaulay also included personal property in his valuation of hotels even
5 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
6 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
7 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
8 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
9 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
10 receiving a disproportionately high LID assessment in comparison to other property types,
11 since hotels were the only property type subject to personal property LID assessments.
12 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
13 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
14 notice procedures because hotel property owners only received notice that their real estate
15 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).
16

17 79. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
18 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
19 a television at the waterfront Marriott is assigned a greater special benefit than the same
20 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
21 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
22 unreasonable to assign a value lift to personal property that is replaceable at the same cost
23 and may be obsolete before the LID improvements are even completed. *See* Second Decl. of
24 Shorett ISO Closing Stmt., ¶ 7 (dated 7/7/2020). Further, personal property is highly
25 depreciable, and likely to be fully depreciated or potentially discarded by 2024. *Id.*; *see also*

47

1 Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must be redone to correct
2
3 for this error.

4
5 80. The proposed final assessment substantially exceeds the special benefit to the
6
7 property and is grossly disproportionate to similarly situated properties within the LID. For
8
9 these reasons, Seattle Tower I, LLC appeals the following portions of the Examiner's
10
11 Recommendation: Sections II.17, II.22, II.23, II.27, IV.B.4, IV.B.11(a)(iii), and IV.C.10.

12
13 **State Environmental Policy Act and Other Environmental Permitting**

14
15 81. While this appeal is not challenging the City's environmental review and
16
17 permitting processes, those processes are relevant in determining the legality of the
18
19 assessments, and to assessing the delivery risk, the present value of the City's plans, and
20
21 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
22
23 pursue projects that have not yet undergone environmental review (thus limiting the choice
24
25 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
26
27 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
28
29 is just beginning. Further, the City has segmented environmental review, and still has a
30
31 gauntlet of federal, state and tribal review processes to complete before it will be clear what
32
33 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
34
35 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
36
37 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
38
39 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
40
41 committing to reconstruction of Pier 58 and major street improvements without
42
43 environmental review, or the City's Final Special Study has improperly included and is
44
45 proposing to assess the Seattle Tower I, LLC the costs and special benefits of improvements
46
47 that may not get built. Either way, it is faulty process.

Due Process Rights

1
2
3 82. The City's failed to notify SEATTLE TOWER I, LLC sufficiently in advance
4 of the hearing to allow SEATTLE TOWER I, LLC to obtain evidence and prepare to
5 properly challenge the assessments. Because LID assessments involve a deprivation of
6 property, affected owners have the right to a hearing as to whether the improvement resulted
7 (or will result) in special benefits to their properties and whether their assessments are
8 proportionate, which necessarily includes the right to adequate notice of the
9 hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d 555, 569–70, 229 P.3d 761
10 (2010).
11
12
13
14
15
16
17

18 83. The LID statute specifies that cities must mail notices giving the time and
19 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
20 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
21 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
22 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
23 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
24 secure their own appraisal), evaluate proportionality of the proposed assessments, and
25 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
26 for anybody to get an appraisal”).
27
28
29
30
31
32
33
34
35

36 84. The City’s Notice of Assessment was sent on December 30, 2019. And the
37 Final Special Benefit Study has only been available for public review since January 7, 2020.
38 Due to this short time frame, SEATTLE TOWER I, LLC requested a prehearing conference
39 and scheduling order that would preserve and protect Seattle Tower I, LLC’s right to
40 analyze and respond to the Final Study, obtain expert appraisal testimony, conduct
41 depositions, and to accommodate preliminary motions (*e.g.*, with respect to the interplay
42
43
44
45
46
47

1 between SEPA and the City's assessment of taxes for Pier 58 and Pike/Pine improvements).
2
3 The Hearing Examiner erroneously denied that request. For this reason, Seattle Tower I,
4
5 LLC appeals the following portions of the Examiner's Recommendation: I.B.
6

7 **VII. Relief Requested**

8 SEATTLE TOWER I, LLC respectfully requests that the City Council:
9

- 10
11 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
12 assessment dated December 30, 2019; or
13
14 2. Revise Seattle Tower I LLC's Waterfront Local Improvement District No. 6751
15 proposed final assessment to \$0 (zero), or such amount as Seattle Tower I LLC
16 establishes at the hearing in this matter; or
17
18 3. Grant the Examiner's recommended remand but with instructions recalculate and
19 reduce Seattle Tower I LLC's assessment using recognized appraisal techniques
20 consistent with USPAP and:
21
22 i. Excluding any property value increase attributable to viaduct removal
23 and other planned WSDOT Improvements;
24
25 ii. Excluding any value attributable to personal property;
26
27 iii. Taking into account the effects of the COVID-19 pandemic on the
28 value of Seattle Tower I LLC's property and other relevant
29 developments since October 2019;
30
31 iv. Accounting for and excluding (1) any special benefits from existing
32 or planned improvements that already provide similar benefits to
33 Seattle Tower I LLC's property, and (2) any special detriments from
34 construction and other anticipated LID-related disamenities;
35
36
37
38
39
40
41
42
43
44
45
46
47

- 1 v. Accounting for and including only those actual benefits anticipated to
2 accrue to Seattle Tower I LLC's property based on its location
3 relative to Pier 58, Overlook Walk, and the Promenade, and specific
4 elements of the LID Improvements;
5
6 vi. Discounting anticipated special benefits to present value, based on
7 reliable estimates regarding when special benefits will start accruing
8 following completion of the LID Improvements; and
9
10 vii. Accounting for such other issues specific to Seattle Tower I LLC's
11 property relevant to calculation of such assessment; and

Hearing Examiner File No. CWF-0415

NOTICE OF AMENDED APPEAL OF
HEARING EXAMINER’S FINDINGS AND
RECOMMENDATION ON SEATTLE
TOWER I, LLC’S OBJECTION TO
WATERFRONT LID NO. 6751 PROPOSED
FINAL ASSESSMENT FOR PARCEL NO.
0696000015

32
33 SEATTLE TOWER I, LLC files this amended appeal pursuant to RCW 35.44.070,
34 Seattle Municipal Code 20.04.090, City of Seattle Resolution 31915, City of Seattle
35
36 Resolution 31979, the notice of the Seattle Office of the City Clerk dated December 30,
37
38 2019, the notice of the Seattle Office of the City Clerk dated February 1, 2021, the Hearing
39
40 Examiner’s Findings and Recommendation issued September 8, 2020 (“Examiner’s
41
42 Recommendation”) and the Hearing Examiner’s Findings and Recommendation issued
43
44 February 1, 2021.
45
46
47

1 **I. Taxpayer / Appellant**

2 The Taxpayer filing this amended appeal is:

3
4
5 SEATTLE TOWER I, LLC
6 C/O TAX ADVISORS PLLC
7 203 SE PARK PLAZA DR #230

Facsimile: 206.359.9000

23 **III. Statement of Taxpayer's Interest and Incorporation of Prior Arguments**

24 SEATTLE TOWER I, LLC owns the property that is subject to the proposed final
25 assessment described in Section IV. As mentioned in the September 22, 2020 appeal to the
26 City Council, which this filing supplements, the Seattle Tower I, LLC property is a mixed-
27 use tower consisting of 344 residential apartments comprising the Arrive Luxury
28 Apartments above a 142-room hotel and restaurant comprising the Sound Hotel.
29
30
31
32
33
34

35 Taxpayer is amending its appeal as authorized in City of Seattle Resolution 31979 to
36 include additional arguments relevant to the revised Final Recommendations of the Hearing
37 Examiner issued on February 1, 2021. On February 4, 2020, Taxpayer timely filed an
38 objection to the assessment, which was based on the Final Study. Taxpayer further timely
39 filed an appeal of the Hearing Examiner's 2020 recommendations to the City Council.
40
41
42
43
44
45 Taxpayer maintains and incorporates all objections and arguments raised in its appeal filed
46
47

1 with the City Clerk on September 22, 2020. This amendment is a supplement is to be read
2 together with Taxpayer's appeal filed on September 22, 2020. Taxpayer incorporates by
3 reference all filings, evidence, and pleadings filed by any party before the Hearing Examiner
4 as authorized by the Hearing Examiner, including without limitation all records pertaining to
5 the November 2020 through February 2021 remand hearing ordered by Council.
6
7
8
9

10
11 **IV. Amended Arguments on Appeal**

12 SEATTLE TOWER I, LLC supplements its appeal of the Hearing Examiner's
13 recommendation to deny Taxpayer's objection to the City of Seattle's Waterfront Local
14 Improvement District No. 6751 proposed final assessment dated December 30, 2019 against
15 the following property:
16
17
18
19

20
21 King County Parcel No. 0696000015
22 Site Address: 2116 4th Ave. Seattle, Washington
23 Proposed Final LID Assessment for Parcel: \$596,745
24

25 To avoid repetition, Taxpayer incorporates the evidence and arguments raised before
26 the Hearing Examiner and before the City in its September 22, 2020 appeal, into this
27 amended appeal.
28
29

30
31 **A. The Anticipated Special Benefits to Taxpayer's Property should be**
32 **Discounted to Present Value and Assessments Adjusted as Appropriate**
33

34 On remand, the City's appraiser acknowledged that special benefits to parcels can be
35 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
36 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
37 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
38 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
39 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
40 accepted that recommendation. The City's appraiser further acknowledged that benefit
41
42
43
44
45
46
47

1 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
2 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
3 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
4 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
5 calculations to present value because the general benefits are not anticipated from the LID
6 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
7 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
8 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
9 benefit calculation, and related assessments, to account for the delay between the assessment
10 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
11 standard appraisal practice, and renders the other proposed Waterfront LID special
12 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
13 “fundamentally wrong methods.”
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
18 Additionally, the assessments may not materially exceed the actual special benefit conferred
19 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
20 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
21 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
22 discount benefits the City estimated would accrue to the properties from improvements to be
23 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
24 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
25 property while treating all or most others (including Taxpayer’s) differently, and
26

1 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
2 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
3 for some properties because the benefit are too distant, while assessing other properties as
4 though distant benefits have already been secured. As Taxpayer identified in its September
5 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
6 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
7 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
8 reject the improper calculation of the benefit or remand and require the appraiser to discount
9 the benefits to net present value.
10
11
12
13
14
15
16
17

18
19 **B. The City's Appraiser's Disregard of Hotel STR Report Performance**
20 **Data is Another Example of How His Analysis is Unreliable, Not**
21 **Admissible under Frye or ER 702, and His Proposed Special**
22 **Assessments are not based on Actual, Measurable and Special Value**
23 **Increases from the anticipated LID Improvements.**
24

25 The City's appraiser was provided actual performance data for the remanded hotels,
26 like Taxpayer's Sound Hotel, including their average daily room rates, from which he had
27 been instructed to "recalculate" hotel "before" values on remand. *See* Hearing Examiner
28 Initial Recommendation at p. 117 (Sept. 8, 2020). The appraiser refused, explaining that,
29 had he done so, his before values would be "too low." Instead, he divined an alternative
30 value from "comparable sales", and then worked backwards to calculate small adjustments
31 to his average daily room rate assumptions, substituting them in his "income spreadsheets,"
32 and thereby correlating his income analysis to his preconceived value estimate. His remand
33 analysis demonstrates that his whole "income approach to valuation", used for both hotels
34 and other commercial properties, is contrived speculation on speculation. The City's
35 appraiser disregarded these hotels' actual net income in a supposed "income analysis." *See*
36 *e.g.*, Deposition of Robert J. Macaulay, 7:10-13 (December 22, 2020) (Attached as Exhibit
37
38
39
40
41
42
43
44
45
46
47

1 A to Objector's Statement on Remand for Case Nos. CWF-0318, 0413, 0415, 0417, 0418,
2 0423, 0429, 0436). Taxpayer's appraiser submitted an appraisal with room rates much
3 closer to the actual performance of the hotel and should be incorporated. *See* Declaration of
4 John D. Gordon in City Council's LID Remand, Exh. I (Jan. 8, 2021).
5
6

7
8 For example, compare the room rate and valuation for the appraisals in the table
9 below, where the actual average daily room rate was \$209. The Taxpayer testified that the
10 City Appraiser's assumed room rate was too high - it not only had not been achieved, but
11 even pre-Covid, was not reasonably achievable.
12
13
14
15
16

17
18
19

Sound Hotel - CWF-0415	City's Revised Appraisal	Taxpayer's Appraisal
Hotel Value	\$66,462,000	\$48,400,000
Less Personal Property	\$2,600,000	\$2,600,000
Real Estate Value	\$63,862,000	\$45,800,000
Benefit Ratio	0.66%	0.66%
Special Benefit	\$420,590	\$302,000
Levy Ratio	39.18%	39.18%
LID Levy	\$164,796	\$118,330
Average Room Rate	\$290	\$218
Daily RevPAR	\$232	\$185

20
21
22
23
24
25
26
27
28
29
30
31
32
33
34

35 To correct the "before value" alone, the City Council should instead adopt
36 Taxpayer's valuation, which was developed using actual data, and otherwise applying the
37 City appraiser's assessment formula:
38
39
40
41
42

43
44
45
46
47

Sound Hotel - CWF-0415	Appraisal Amount
Hotel Value	\$48,400,000
Less Personal Property	\$2,600,000
Real Estate Value	\$45,800,000

Benefit Ratio	0.66%
Special Benefit	\$302,000
Levy Ratio	39.18%
Hotel LID Levy	\$118,330
Total for Parcel (Hotel + Apartments)	\$549,278

The City's appraiser only slightly reduced his original values in ways that are still entirely inconsistent with historical performance data. The City's appraisal and analysis is speculative and should be rejected. The City Council should at least adopt Taxpayer's "before values" and resultant LID assessments.

C. In Light of Covid's Continuing Impact on Taxpayer and other Downtown Property Owners and other Material Changes Since October 2019, the LID Should be Cancelled, or at Least Assessments Recalculated, to take Into Account Property Value Reductions

In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e] into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and other relevant developments since October 2019." When Washington's first COVID restrictions were imposed in March and April 2020, there was an assumption that they would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover for another 5 years. Retail stores are boarded up. Homelessness and related challenges have gotten much worse. The City has already imposed higher minimum wages and taxes on businesses to try to fund recovery. The West Seattle Bridge and other bridges are in immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several years from completion, as a best case. In current circumstances, a downtown tax to fund new, non-essential park improvements against financially strapped taxpayers, and likely

1 passed through to financially strapped tenants and customers would be unfair to taxpayers
2 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
3 rethinks its budget priorities for the next few years, and its potentially funding sources,
4
5 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
6
7 property owners) have a chance to recover, and that any assessment take into account the
8
9 changed circumstances since this appeal process started on February 4, 2020 to avoid
10
11 unnecessarily and perhaps permanently killing downtown properties and businesses in the
12
13 name of bettering them.
14
15

16
17 **V. Relief Requested**

18
19 Particularly in light of the Committee's decision not to take further comment from
20
21 appellants, Taxpayer respectfully request that each Committee member carefully review the
22
23 full record transmitted to Council before voting on Taxpayer's appeal.
24

25 SEATTLE TOWER I, LLC respectfully reiterates its request from the September 22,
26
27 2020 appeal that the City Council:

- 28 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final

30
31
- 32 2. Revise Seattle Tower I LLC's Waterfront Local Improvement District No. 6751
33 proposed final assessment to \$0 (zero), or such amount as Seattle Tower I LLC
34 establishes at the hearing in this matter; or
35
36
- 37 3. Grant the Examiner's initial recommendation on remand but further remand with
38 instructions recalculate and reduce Seattle Tower I LLC's assessment using
39
40 recognized appraisal techniques consistent with USPAP and:
41
42
43
44
45 i. Excluding any property value increase attributable to viaduct removal
46
47 and other planned WSDOT Improvements;

- 1 ii. Taking into account the effects of the COVID-19 pandemic on the
2 value of Seattle Tower I LLC's property and other relevant
3 developments since October 2019;
4
5
6 iii. Accounting for and excluding (1) any special benefits from existing
7 or planned improvements that already provide similar benefits to
8 Seattle Tower I LLC's property, and (2) any special detriments from
9 construction and other anticipated LID-related disamenities;
10
11 iv. Accounting for and including only those actual benefits anticipated to
12 accrue to Seattle Tower I LLC's property based on its location
13 relative to Pier 58, Overlook Walk, and the Promenade, and specific
14 elements of the LID Improvements;
15
16 v. Discounting anticipated special benefits to present value, based on
17 reliable estimates regarding when special benefits will start accruing
18 following completion of the LID Improvements; and
19
20 vi. Accounting for such other issues specific to Seattle Tower I LLC's
21 property relevant to calculation of such assessment; and
22
23 4. Grant such further relief as the City Council deems just and proper.

Subject: Waterfront LID Appeal for Case No. CWF-0416
Date: Tuesday, September 22, 2020 2:28:55 PM
Attachments: [CWF 0416.zip](#)

CAUTION: External Email

Dear City Council Clerk,

Attached please find the Waterfront LID Appeal for Case No. CWF-0416.

32 **III. Statement of Martin Apartments LLC's Interest**

33
34 MARTIN APARTMENTS LLC owns the property that is subject to the proposed
35 final assessment described in Section IV. The Martin Apartments LLC property is a 188 unit
36 apartment building with ground floor retail. The basis of the proposed assessment is a Final
37
38 Special Benefit/Proportionate Assessment Study for Waterfront Seattle Local Improvement
39 District ("Final Study"), dated October 1, 2019 and prepared by Robert Macaulay with ABS
40 Valuation (the City's appraiser). The Final Study proposes assessments that are purportedly
41 limited to paying for the LID-funded components—namely, the Promenade, Overlook Walk,
42
43
44
45
46
47

1 Pioneer Square Street Improvements, Union Street Pedestrian Connection, Pike/Pine
2 Streetscape Improvements, and Pier 58 (together, the “LID Improvements”). The Final
3 Study purports to exclude charges for other improvement projects in the Central Waterfront,
4 and specifically those WSDOT had already agreed to pay for and construct: viaduct
5 demolition, the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State
6 Route 99 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces
7 WSDOT planned fronting piers between Pike and Madison (together, the “WSDOT
8 Improvements”). But because construction was not complete on the LID Improvements or
9 the WSDOT Improvements at the time the Final Study was prepared, Mr. Macaulay’s
10 October 1, 2019 “Before” and “After” valuations are both based on hypothetical conditions
11 rather than actual facts. On February 4, 2020, Martin Apartments LLC timely filed an
12 objection to the assessment, which was based on the Final Study.
13
14

15 **IV. Matter Under Appeal**

16 MARTIN APARTMENTS LLC appeals the Hearing Examiner’s recommendation to
17 deny Martin Apartments LLC’s objection to the City of Seattle’s Waterfront Local
18 Improvement District No. 6751 proposed final assessment dated December 30, 2019 against
19 the following property:
20
21

22 King County Parcel No. 0696000055
23 Site Address: 2105 5th Ave., Seattle, Washington
24 Proposed Final LID Assessment for Parcel: \$197,086
25

26 See Examiner’s Recommendation at 61-62, 104. To avoid repetition, Martin Apartments
27 LLC incorporates the evidence and arguments raised before the Hearing Examiner into this
28 appeal. In particular, Martin Apartments LLC points the City Council to Martin Apartments
29 LLC’s initial Appeal Petition, *Frye* motion, Closing Brief submitted at the close of its case-
30

47

1 in-chief (dated 4/16/2020), and supplemental Closing Statement submitted at the close of the
2
3 City's case-in-chief (dated 7/7/2020).¹
4

5 As discussed more fully below, Martin Apartments LLC specifically appeals the
6
7 following Findings and Recommendations in the Hearing Examiner's September 8, 2020
8
9 Recommendation: Pages 61-62, 104, Sections II.6, II.7, II.14, II.15, II.18, II.19, II.20, II.21,
10
11 II.22, II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1,
12
13 IV.B.2, IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i),
14
15 IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.8,
16
17 IV.C.9, IV.C.11, IV.C.12, IV.C.14, and IV.C.18
18

19 Martin Apartments LLC also appeals the Hearing Examiner's failure to make
20
21 findings of fact or recommendations on material issues raised during Martin Apartments
22
23 LLC's appeal that were supported by law, expert testimony, and fact. The Final Study fails
24
25 in numerous ways to satisfy the basic requirements of a LID assessment study, and the
26
27 Examiner's Recommendation ignores the many deficiencies in the Final Study. In fact, the
28
29 only instances in which the Examiner recommended anything other than denial of objectors'
30
31 appeals were where the City's appraiser confessed error. The appraiser's proposed
32
33 assessments, and the Examiner's Recommendations, would have the City impose arbitrary
34
35 and capricious Waterfront LID special assessments based on "fundamentally wrong
36
37 methods."
38

39
40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$503,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
5 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS’s appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City’s appraiser asserts that the City is not collecting assessments “based
16 on the value of WSDOT’s planned improvements.” See Final Study at 3. However, the
17 City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition,
18 the City’s appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City’s promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT’s planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City’s appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be “physical and material and not merely speculative
35 or conjectural”
36

37
38 **ABS Study:** Not only are the improvements not yet “physical or material,” but
39 environmental review and permitting for the City’s proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City’s then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
2 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
3 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
4 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
5 Final Study fails to meet basic standards for admissibility and must be remanded.
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Martin Apartments LLC as to which the Examiner also erred, discussed in the course of the
3 appeal statement below.
4
5

6
7 **V. Standard of Review**
8

9 “When considering the assessment roll, the city council sits ‘as a board of
10 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
11 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
12 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
13 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
14
15

16 The proposed assessments are presumed correct, “unless overcome by clear, cogent
17 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
18 than the heightened presumption of correctness on judicial appeal because “applying these
19 elevated standards at the municipal hearing would afford unwarranted deference to a report
20 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
21 presumption is not evidence and its efficacy is lost when the other party adduces credible
22 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
23 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
24 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
25 presented credible evidence showing that the City’s proposed assessment is arbitrary,
26 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
27 to the City to prove the assessments are actual, measurable, special, non-speculative and
28 proportionate. The City failed that burden.

47

1 **VI. Grounds for Appeal**

2 MARTIN APARTMENTS LLC appeals the Hearing Examiner's Findings and
3
4 Recommendations on the following grounds.
5

6 **Martin Apartments LLC Not Required to Provide A Special Benefit Study**

7
8 1. Contrary to the Examiner's findings and recommendations, there is no
9
10 requirement that experts or property owners provide an alternative special benefit
11
12 calculation under these circumstances—to do so would also require the same improper
13
14 speculation the City's expert engaged in, given the timing and information provided. *See,*
15
16 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
17
18 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained:
19
20 “[W]e have explicitly rejected an argument that, because certain protestors ‘failed to offer
21
22 expert testimony at the city council hearing[,] the presumptions [in favor of the assessment]
23
24 were still operative as to their property.’” *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian*
25
26 *Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*, 85 Wn. App.
27
28 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he provided
29
30 expert opinion showing that improvements actually diminished value of the property). Here,
31
32 Ben Scott testified that he is an expert in reviewing mass appraisal reports and analyzing
33
34 their impact on individual properties - precisely the matter at issue in this appeal. *See*
35
36 3/5/2020 Hrg. Tr. at 13:1-4 (laying foundation as expert witness while testifying on behalf
37
38 of a different appellate represented by Perkins Coie). The Hearing Examiner erroneously
39
40 dismissed the weight of Mr. Scott's testimony, given his professional expertise and
41
42 experience. In fact, no independent evidence is required at all if, for example, objectors
43
44 show that the assessment was grounded on a fundamentally wrong basis due to an error in
45
46 the City's appraiser's methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
47

1 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
2 a property owner could simply point out that the square footage assumed in the City's
3 appraisal was incorrect. For these reasons, Martin Apartments LLC appeals the following
4 portions of the Examiner's Recommendation: Sections II.14, II.15, IV.A, IV.B.11(a),
5 IV.C.8, IV.C.9, and IV.C.11.
6
7
8
9

10
11 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

12 2. RCW 35.43.040 provides cities and towns authority for ordering local
13 improvements and for levying and collecting special assessments "on property specially
14 benefited thereby[.]" The cost and expense of the local improvement "shall be assessed
15 upon all the property in accordance with the special benefits conferred thereon." RCW
16 35.44.010.
17
18
19
20
21

22 3. No analysis of general benefits. Special assessments have been "held valid
23 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
24 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
25 mains." *Heavens*, 66 Wn. 2d at 563. "All such assessments have one common element:
26 they are for the construction of local improvements that are appurtenant to specific land and
27 bring a benefit substantially more intense than is yielded to the rest of the municipality." *Id.*
28
29
30
31
32
33

34 4. Martin Apartments LLC's property is not specially benefited by the LID
35 Improvements. The primary purpose and effect of the LID Improvements are to benefit
36 "members of the whole community" and the public at large. *See, e.g., id.* at 565 ("it is plain
37 that a public library is for the benefit of the members of the whole community individually
38 and collectively who may be served by it"). Mr. Macaulay's own chapter of the LID
39 Manual states clearly that appraisers should "[c]onsider general benefits as well as special
40
41
42
43
44
45
46
47

benefits” (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Martin Apartments LLC’s expert confirmed that if an appraiser “identifies both general and special benefits, these benefits should be clearly distinguished and explained, and only special benefits should be included in the After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also* 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4. It is undisputed that Mr. Macaulay did not analyze or measure general benefits, including those arising from construction necessary to meet basic design standards. *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those construction costs related to meeting design standards which may be general benefits as distinct from construction costs emanating from requirements of the LID project”). To the extent Martin Apartments LLC’s property may benefit from the LID improvements, the benefit is general and incidental, and failure to consider general benefits was a fatal flaw in the City’s methodology. For these reasons, Martin Apartments LLC appeals the following portions of the Examiner’s Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.

5. LID Improvements not necessary. Unlike typical LID projects, the Waterfront LID improvements are largely unnecessary to the functionality of any particular property, including Martin Apartments LLC’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet held invalid where owners would have benefitted equally from increase of

² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference, Martin Apartments LLC has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 only 9 feet); *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land
2 at intersection for new water main for hydrant held invalid because land was already
3 afforded functional hydrant at nearby street). Here, Martin Apartments LLC provided
4 testimony through Elton Lee, taxpayer representative, who testified that the Martin
5 Apartments LLC building caters to Denny Triangle and South Lake Union, rather than the
6 waterfront area. *See* 3/11/2020 (E. Lee) Hrg. Tr. at 117:13-118:16. The building has brief
7 tenancies averaging approximately six months to a year with demand driven primarily by
8 Amazon employees desiring to live near Amazon's South Lake Union employment centers.
9 *Id.* There is simply no special benefit to the Martin Apartments LLC building for additional
10 access to the Seattle waterfront. The fact that there is no case law differentiating between
11 binary improvements and parks does not change the law prohibiting assessments on
12 properties already adequately served by existing amenities. *See* Examiner's
13 Recommendation at IV.C.3 (reasoning that "no case law is provided to support the
14 differentiation between a hardscape benefit and the more ephemeral benefits of park"). Nor
15 does the Examiner's reasoning excuse the City's failure to account for existing amenities as
16 part of the special benefit calculation. As Dr. Crompton testified, existing view amenities
17 may in fact diminish the incremental effect of new park improvements on the value of
18 properties, much like turning on a weak light in an already brightly illuminated room. *See*
19 Hrg. Exhibit 94 (Crompton's Report) at 12-13.

20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39 6. To the extent benefits can be considered "special" as opposed to general, they
40 are nominal or nonexistent for many properties even in the Central Waterfront, which
41 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
42 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
43 change due to expansion of sewer service *near* owners' parcel which were already
44
45
46
47

1 connected). Here, again, Martin Apartments LLC provided testimony that the primary
2 reason tenants choose its building is not proximity to the water, but instead proximity to
3 major employment centers like Amazon in the South Lake Union area. Even if the City
4 could assess for a view change (and it has promised not to assess for viaduct removal), the
5 fair market value of MARTIN APARTMENTS LLC'S property has not changed because
6 the LID Improvements have not improved the property's waterfront view or access to the
7 waterfront, nor will they when the City anticipates completion in 2024. For these reasons,
8 Martin Apartments LLC appeals the following portions of the Examiner's Recommendation:
9 Sections IV.C.3, IV.B.9, and IV.C.3.

10
11 7. No analysis of special detriments. The Final Study fails to properly account
12 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
13 owners for removal and cleanup of underground storage tanks discovered during the
14 improvement project). Mr. Lee testified that because tenancies are relatively brief, the
15 market would not support increasing rental rates today to absorb the LID assessment when
16 the special benefits, to the extent any exist, will not be effective until at least 2024, well past
17 when many tenants will have moved. 3/11/2020 Hrg. Tr. at 124:21-125:13. Therefore, the
18 LID assessment in an immediate expense that comes with no immediate increase in revenue,
19 thereby decreasing the property value. This was not accounted for by the Mr. Macaulay.
20 Although Mr. Macaulay claims he analyzed impacts on the City's planned elimination of
21 450 parking stalls on a parcel-by-parcel basis, there is no explanation of how lost parking
22 might be a detriment, and no property-specific parking analysis in any of his materials.
23 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.

24
25 8. Likewise, there was no analysis of the risks associated with disamenities such
26 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
27

1 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
2 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
3 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
4 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
5 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
6 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
7 the maintenance agreement. *Id.* at 13:4-14:2.
8
9

10
11
12
13
14
15 9. There was also no consideration of negative impacts from another four-plus
16 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
17 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
18 law allowing him to dismiss these actual, non-speculative impacts. Because future special
19 benefits calculations are inherently speculative, Washington's eminent domain statute
20 specifically allows condemnees to postpone special benefits assessments until improvements
21 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
22 Moreover, the studies that Mr. Macaulay relied on demonstrate that construction disamenity
23 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
24 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
25 Greenway, the Greenway district "significantly" lagged in value). For these reasons, Martin
26 Apartments LLC appeals the following portions of the Examiner's Recommendation:
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue. However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore the assessment amounts.

1 10. Special benefit estimate is speculative. When calculating a special benefit,
2
3 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
4
5 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
6
7 becomes pure speculation.” *Id.* (quoting *In re Local Imp. 6097*, 52 Wn.2d 330, 335–36, 324
8
9 P.2d 1078 (1958)).

10 11. Assuming without conceding that one day, the City’s planned LID
11
12 Improvements might increase the value of neighboring properties to some extent, that
13
14 potential benefit is many years away and speculative. While appraisers tolerate some degree
15
16 of estimation and judgment, Martin Apartments LLC’s expert testified that Mr. Macaulay’s
17
18 Final Study is far too speculative to satisfy industry practices and standards.

19 12. Although LIDs are sometimes finalized prior to completion of improvements,
20
21 this is typically just six month or a year prior, and the assessments are otherwise supported
22
23 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
24
25 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
26
27 will not be realized for four or five years. In the meantime, there is permitting risk,
28
29 construction risk, and general economic risk (e.g., COVID), which renders ABS’s 2019
30
31 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
32
33 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
34
35 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
36
37 projects because “we can’t read the future.” 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
38
39 testified: “I just don’t know what the market value would be as of the date the project would
40
41 be finally constructed” because “[t]here could be a lot of elements in the market that did
42
43 occur between now and then that impact value.” 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
44
45
46
47

1 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
2 in 2024 because “markets tend to fluctuate over time” and “I can’t predict the future”).
3

4
5 13. The record is clear that while no one can know what “special benefit” might
6 accrue to these properties in four years (if any), we do know that there are no actual benefits
7 now. The LID improvements provide no immediate special benefit to property owners
8 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
9 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
10 sewer system for future users).
11

12
13 14. Further, there are no “plans and specifications” on file with the Clerk’s Office
14 for the LID Improvements, and it is unlawful to move to final assessments without such
15 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
16 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
17 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
18 dollars on projects still early in the design process. *See* Washington Attorney General
19 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
20 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
21 of programs and included “only so much of the overall costs” that took place within and
22 benefitted the assessed properties).
23
24

25 15. The COVID-19 crisis highlights how fundamentally speculative and unfair it
26 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
27 anticipated to be delivered five years later. Even before COVID, it was speculative to
28 assume that market highs experienced in October 2019¹ would be sustained through 2024,
29 after an already extraordinarily long expansion period. *See, e.g.,* 3/3/2020 (A. Gibbons)
30 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing

45
46
47

1 my analysis in October 2019, who would have thought that this COVID issue would
2 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
3 process was that the market was going to continue to go up.” See Gibbons Decl. ISO
4 Closing Stmt. at ¶ 12 (dated 7/7/2020). Although COVID does not change actual values as
5 of October 2019 (see Examiner’s Recommendation at 109), the pandemic has impacted
6 current values and rendered the hypothetical October 2019 Final Study valuations outdated.
7
8
9
10
11

12 16. As another example of how future events could affect the accuracy and
13 reliability of the City’s 2019 proposed assessment, Martin Apartments LLC recently
14 requested the Hearing Examiner re-open the record to allow the City to explain whether the
15 assessments against property owners within the LID are, in fact, being used by the City to
16 fund the emergency dismantling and reconstruction of Pier 58.⁴ It has been reported that the
17 City plans to use LID funding to pay for the expedited, emergency repairs and replacement.⁵
18 If true, the City would be improperly imposing costs on property owners within the LID for
19 improvements that are required to maintain the safety of Pier 58 and to remove a threat to
20 critical salmon habitat and City infrastructure—this does not provide any special benefit to
21 LID property owners.

47

1 17. There is also no certainty the improvements will be delivered on time. Mr.
2
3 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
4
5 delay in construction schedule would not constitute a “material change” under the City
6
7 Council’s ordinance authorizing the improvements. In other words, the City cannot
8
9 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
10
11 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Martin Apartments LLC’s experts Reid
12
13 Shockey and Richard Shiroyama testified via declaration as to the City’s permitting gauntlet,
14
15 and potential delays and project changes inherent in those processes, that call into question
16
17 the assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
18
19 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
20
21 Decl., dated 4/15/2020).

22 18. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
23
24 he could not point to a single one where the assessment roll was finalized five years in
25
26 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
27
28 he has never recommended final special assessments based on designs less than 30 percent
29
30 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
31
32 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
33
34 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
35
36 at 66:17-25. He performed no independent due diligence to determine the reliability of the
37
38 City’s estimates for completion of the LID Improvements, or to ensure that proposed
39
40 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
41
42 agreed that if any of his assumptions are incorrect, his opinion of market value would need
43
44 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
45
46 68:11-18.
47

1 19. The City has cited no authority—and Martin Apartments LLC is aware of
2 none—that affirms the use of hypothetical, anticipatory Before and After values in order to
3 estimate and assess taxes for “actual” special benefits that will not accrue for another five
4 years (if all goes off without a hitch). To the contrary, the hypothetical assumption that all
5 of the Before and After Improvements are constructed as of October 1, 2019 allows Mr.
6 Macaulay to base his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
7 411. For these reasons, Martin Apartments LLC appeals the following portions of the
8 Examiner’s Recommendation: Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5,
9 IV.B.6, IV.B.11(c), IV.C.12, IV.C.14, and IV.C.18.

10 20. Failure to discount special benefit estimates to account for risks and present
11 value. Due to the inherent uncertainty, Martin Apartments LLC’s expert opine that the Final
12 Study should have accounted for risks associated with delivery of the improvements
13 (including permitting risk, construction risk, general economic risk) and any special
14 damages associated with interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-
15 120:9, 59:20-60:20. In addition, as is typical appraisal practice, Mr. Macaulay should have
16 discounted the anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-
17 55:1; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers
18 routinely consider the impact of future conditions [through] discounted cash flow
19 analysis.”).

20 21. Mr. Macaulay acknowledged that appraisers can discount the value of a
21 future condition not in place at the date of valuation and can discount for the time value of
22 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
23 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
24 Discounting would also have been consistent with his approach for analyzing special

1 benefits to vacant land. He testified that the difference between similarly situated vacant
2 sites slated for development and already developed sites was that the labor, capital and risks
3 associated with development had not yet been borne for those vacant sites. Therefore, the
4 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
5 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
6 fully permitted, has not completed environmental review, and has not reached full design is
7 presently worth significantly less.
8
9

10
11
12
13
14
15 22. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
16 present value, an appraiser would consider discount rates for land development to account
17 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
18 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
19 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
20 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
21
22

23
24
25
26
27 23. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
28 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
29 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
30 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
31 ignoring momentarily all of the other methodological and other flaws discussed here and in
32 Martin Apartments LLC's case-in-chief, and assuming that the LID Improvements provide
33 special benefits as soon as they are complete in 2024, Mr. Macaulay's hypothetical
34 assessment materially exceeds special benefits when reduced to present value. Further, to
35 the extent the City is arguing that because they are permitted to assess 100% of the special
36 benefit, the special benefit estimate can be off by 60.8% because they only assess 39.2% of
37 that benefit, the City is again wrong. After applying proper discounting, the City's proposed
38
39
40
41
42
43
44
45
46
47

1 special benefit assessment is far more than 39.2% of the total estimated special benefit, and
2
3 in fact exceeds 100% of the total estimated special benefit.

4
5 24. But even the assumption that the LID improvements would deliver benefits
6
7 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
8
9 on. Rather, those studies demonstrate that a discount period of five years is conservative.
10
11 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A’s study
12
13 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay’s backup files)
14
15 indicates that during the construction period, the Greenway district “significantly” lagged in
16
17 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
18
19 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
20
21 30-31 (discussing New York City High Line and San Francisco Embarcadero
22
23 improvements). Given the lengthy delay, any prediction of future special benefits is
24
25 speculative, especially during the construction phase where values are likely to decline. And
26
27 assuming the LID Improvements take a similarly long period of time after they are complete
28
29 to start producing tangible property value benefits, each additional year of delay results in
30
31 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
32
33 Closing Stmt., ¶ 19, Ex. A.

34
35 25. Applying the same discounting methods described above and in Mr. Gibbons
36
37 declaration, the 2019 net present value of ABS’s estimate for benefits that actually start
38
39 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
40
41 before applying the 39.2% percentage assessment. *Id.* For Martin Apartments LLC, this
42
43 means at most the 100% assessment should be no more than \$47,382.60. Anything more
44
45 would permit the City to assess Martin Apartments LLC based on a hypothetical assumption
46
47 that these improvements are in place and providing benefit, and ignore the risks,

1 construction disamenity, and time value of money that normal appraisal principles would
2 take into account. *Id.*, ¶ 20. Proportionality would counsel that the assessment should be
3 only 39.2% of that assessment cap, or \$18,573.98.
4

5
6 26. Attachment C includes two Excel spreadsheets applying these discounting
7 methods to Martin Apartments LLC's assessment. It is undisputed that special benefits will
8 not actually accrue until the LID Improvements are complete in 2024. Accordingly, the first
9 spreadsheet demonstrates that discounting the City's hypothetical October 2019 special
10 benefits to present value would reduce Martin Apartments LLC's assessment to \$67,618,
11 exclusive of any other flaws in the City's proposed assessment. The second spreadsheet
12 shows even more drastic reductions after taking into account: (1) a rough discount for
13 property value loss due to COVID-19 and (2) discounting to present value for 5 years (*i.e.*,
14 from 2024 when the City anticipates completing the LID Improvements) and 10 years (*i.e.*,
15 from 2029 to account for the time it takes for the improvements to capture property value).
16 After such reductions, Martin Apartments LLC's assessment would be just \$59,166 (for the
17 5-year discount) or \$16,257 (for the 10-year discount). Further, the spreadsheet concludes a
18 "zero" benefit for this property because, based on Dr. Crompton's testimony, Martin
19 Apartments LLC's property is more than 2,000 feet from the core "park" improvements and
20 therefore too distant to receive any special benefit. Neither of these spreadsheets address
21 other issues raised by Martin Apartments LLC's appeal, but are intended to help
22 demonstrate how unfair and inflated the City's proposed hypothetical assessment is. The
23 Hearing Examiner's Recommendation simply dismisses Martin Apartments LLC's
24 discounting argument without legal or factual analysis; that failure is error.
25

45
46
47

1 **Appraisal and Assessment Calculation Methods Are Flawed**

2 27. The “general rule is that each lot, piece, or parcel of land should be assessed
3 separately” for purposes of local improvement district special assessment. *Doolittle*, 114
4 Wn.2d at 97.
5

6 28. It is proper to sustain a challenge to an assessment, even without the appraisal
7 testimony from the owner, where the objector’s expert establishes that the assessment was
8 “clearly grounded upon a fundamentally wrong basis” due to an error in the method
9 employed by the City’s appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
10

11 29. The City’s appraiser purports to utilize the income method of valuation but
12 relied on inaccurate revenue and market data, as discussed further below.
13

14 30. The City’s appraiser purports to utilize the comparable sales method of
15 valuation, but no City witness attempted “to characterize any one, or all of them, as
16 comparable to [Martin Apartments LLC’s property].” *See Bellevue Plaza*, 121 Wn.2d at 406
17 (finding “several serious flaws” in ABS’s LID analysis in that case, including that the
18 appraiser “attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt
19 to characterize any one, or all of them, as comparable to any particular property within the
20 LID”). And no City witness could explain how specific adjustments were made to these sales
21 to account for value increases due to the hypothesized Before and After Improvements. For
22 this reason, Martin Apartments LLC appeals Section II.23 of the Examiner’s
23 Recommendation.
24

25 31. Special assessment improperly includes value lift from the Before
26 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
27 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
28 Improvements, which WSDOT had independently committed to fund. However, Mr.
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 Macaulay did not calculate the actual market value of LID properties in October 2019, and
2 did not separately analyze the hypothetical increase to property values attributable to
3 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
4 current value and then separately calculate a hypothetical "With WSDOT" Before value);
5 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
6 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
7 3-4. Without any documented basis or support, Mr. Macaulay simply "ma[de] a judgment a
8 call" on what occupancy and rates would have been for the commercial properties assuming
9 all of the WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-
10 130:11. This outright omission precludes any independent evaluation of the true market
11 "Before" values. *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional
12 appraisal standards; if an appraiser uses current sales data to infer values, then the appraiser
13 must explain how he analyzed that data and other information to come up with the
14 hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just
15 removal of the viaduct, but also other road, pedestrian and landscaping improvements
16 WSDOT had already committed to make.

17
18
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33 32. However, because Mr. Macaulay testified that he did include some WSDOT-
34 related value-lift in the "Before" values, it follows that part of the special assessment
35 improperly is based on value attributable to the WSDOT Improvements. As shown by
36 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
37 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
38 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
39 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
40 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
41
42
43
44
45
46
47

1 to properly exclude the value of Before Improvements from the assessments. For these
2 reasons, Martin Apartments LLC appeals the following portions of the Examiner's
3 Recommendation: Sections II.19, II.29, and IV.B.11(a)(ii)
4

5
6 33. Special benefits were assigned rather than measured. Mr. Macaulay
7 arbitrarily "assigns" special benefits to Before values instead of measuring them for each
8 property. See 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/3/2020 (A.
9 Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr.
10 Macaulay used to analyze the commercial properties, Martin Apartments LLC's experts
11 concluded that Mr. Macaulay based adjustments on hypothesized very small increases to
12 property revenue and very small reductions to cap rates to "calculate" an "After" value due
13 to the coming 2024 LID Improvements. Attachment B (ABS Spreadsheet). These series of
14 micro adjustments were based on "professional judgment" that are neither shown nor
15 replicable.
16

17
18 34. For these reasons, Martin Apartments LLC appeals the following portions of
19 the Examiner's Recommendation: Section II.19, IV.B.11(a)(iii).
20

21
22 35. Special benefit falls within margin of error. The Final Special Benefit Study
23 applies an estimated value enhancement of less than 4%, which is generally within the
24 margin of error for appraisals and, therefore, not a reliable difference. See *Bellevue Plaza,*
25 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
26 Martin Apartments LLC's experts explained that if two appraisers independently arrive at
27 values within 5% of one another, this difference is considered reasonable as it falls within
28 the standard margin of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at
29 164:2-9. Because Mr. Macaulay's micro-special benefit percentages fall far below that 5%
30 margin, "there is no way of authenticating" such incremental changes because "[m]arket
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 forces completely obliterate any tiny little noise factor like that.” See 3/3/2020 (A. Gibbons)
2
3 Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition that 0.25% is too
4
5 small to measure. Macaulay Depo. at 25:17-25. Yet, Mr. Macaulay assigned or purported to
6
7 measure a difference in cap rates for Martin Apartments LLC’s property within that margin.
8
9 Additionally, the fact that “Before” values are also based on a hypothetical that adds some
10
11 unstated incremental value to actual 2019 values exacerbates this issue—the ability for an
12
13 appraiser to discern the micro-value differences between hypothetical conditions that are so
14
15 similar (the WSDOT improvements compared to the LID improvements) “verges on being
16
17 ludicrous.” 3/3/2020 (A. Gibbons) Hrg. Tr. at 89:4-90:7.

18
19 36. Even if it were possible to accurately tease out such a miniscule hypothetical
20
21 value change due to improvements coming five years later, experts testified that there is no
22
23 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
24
25 what he felt the changes (hypothetically) would be. 3/3/2020 (A. Gibbons) Hrg. Tr. at 88:21-
26
27 88:24 (“you cannot measure one percent difference in a high-rise building for this kind of a
28
29 medium ... it’s simply assigned to a before value”). For these reasons, Martin Apartments
30
31 LLC appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

32
33 37. No analysis of value increase attributable to individual components of the
34
35 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
36
37 percentage difference between hypothetical Before and After conditions. Throughout his
38
39 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
40
41 descriptions in the Addenda even though he testified that he relied on these to calculate
42
43 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
44
45 someone might be able to determine how he attributed value to After conditions described in
46
47 the Addenda, he answered that that was “not the scope of the assignment” because he was

1 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
2 that the six components were not actually a continuous project, that he was viewing them
3 together because the City asked him to, and that if he were to view them independently,
4 there was a low probability that properties in the north would specially benefit from
5 improvements in the south and vice versa. See 6/25/2020 Hrg. Tr. at 27:18-28:5.
6
7
8
9

10 38. Not only did he fail to analyze benefits from each of these non-contiguous
11 improvements, his familiarity with descriptions as whole was tenuous at best. See, e.g.,
12 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
13 arose from specific Before/After descriptions in the Addenda); cf. *Anderson v. City of*
14 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
15 objectives that guided regulators' assessment of architectural plans for buildings along a
16 "signature street" were so vague that they amounted to ad hoc review based on the
17 regulators' subjective impressions and feelings).⁶ It became clear through his testimony that
18 even though he used the renderings as "visual aid[s] in appraising the property in the before
19 and after" to "visually see what the differences would be," he could not explain what
20 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
21 when shown a rendering of a two-lane road going down to one-lane in the After condition
22 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
23 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
24
25
26

31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. See RCW
43 35.43.050. Without this finding, the cost and expense of each component must "be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit." *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
2 could explain the depiction of the same trees in the After condition nearly twice as tall as in
3 the Before. *Id.* at 173:17-175:4. For these reasons, Martin Apartments LLC appeals the
4 following portions of the Examiner’s Recommendation: II.27 and IV.B.4.
5
6

7
8 39. Special assessment is not supported by comparable studies, data or reports.
9
10 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
11 that the LID Improvements will lead to meaningfully increased real estate values for Martin
12 Apartments LLC. Indeed, no City witness was able to explain how ABS Valuation used
13 comparable sales or information from the “over twenty-five studies and reports” to arrive at
14 very precise special benefit increases for the commercial properties, including Martin
15 Apartments LLC’s property. For example, although Mr. Macaulay stated that no single
16 report or study was directly on point due to the unique nature of the LID Improvements (*see*,
17 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
18 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
19 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;
20 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
21 for similarities and differences between these improvements and the comparable parks he
22 looked at).
23
24

25
26 40. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
27 assignment of incremental increase of 0.5% to 4% to property values within the LID.
28
29 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
30 research misinterprets his work in critical ways, including because the LID Improvements
31 manifest the characteristics of a parkway (not a park), and his research indicates that most of
32 a *park*’s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
2 related value increases are in fact smaller; that estimated increases are “best guesses” rather
3 than predictions of property value increases in a particular city; and that percentages do not
4 account for diminishing returns after taking into account water views, which would be the
5 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
6 topography grants most properties in downtown a water view.
7
8
9
10
11

12 41. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
13 that this was just one source of information that was not entirely relevant because, among
14 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
15 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
16 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
17 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
18 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
19 Crompton concluded that 500 feet via road from “park” improvements is just one or two
20 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
21 significantly beyond that which the park study indicated (even if it was legitimate to use the
22 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
23 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
24 impact applicable to “community parks”—which the LID Improvements are not. *Id.* Martin
25 Apartments LLC’s property is not within 2,000 road network feet from the “park”
26 improvements. *See* Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41

42 42. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
43 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
44 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
45
46
47

1 based on the attention given to Dr. Crompton's work in the Final Study and supporting
2 materials, it was clearly an important—if not *the* most important—source of information for
3 estimating special benefits (especially with respect to the condos).⁷ No City witness
4 adequately explained exactly how Dr. Crompton's research informed ABS Valuation's
5 parcel-by-parcel analysis.
6
7
8
9

10
11 43. The destination parks discussed in the Final Special Benefit Study do not
12 provide reliable, comparable, and valid support for the calculation of special assessments
13 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
14 Study were funded by a LID. And in virtually all of those cases, the park improvements
15 dramatically restored unimproved or blighted areas, and properties evaluated were within
16 two or three blocks of the park.
17
18
19
20
21

22
23 44. ABS's claimed reliance on three economic studies to support property value
24 increase is also flawed. The HR&A study does not inform what value increases are
25 expected from the LID Improvements because it projects increases to tourism from *all* of the
26 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
27 dissimilar parks in other cities,⁸ making the methodological application to the LID
28 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
29
30
31
32
33
34
35

36
37 ⁷ Of the 62 files in Mr. Macaulay's "2019 Report Info" folder, which he explained contains all of
38 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
39 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
40 Dr. Crompton's study is the only one that found property value increases up to 2,000 feet from a
41 park (or streetscape) improvement—other studies estimated premiums for real estate only much
42 closer or cited to Dr. Crompton.
43

44 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
45 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
46 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
47 expected tourists visiting the LID park was calculated using data from only from New York City, a
notorious tourist destination.

1 conclusion that there would be *no new net visitors* from downtown residents as a result of
2 the LID Improvements and could not explain how this impacted his condo analysis.
3
4 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on “The Impact of Parks on
5 Property Values” primarily focused on whether the benefits accrue to the larger community
6 rather than properties adjacent to the park. And the 2014 New York City Department of
7 Transportation study is not based on real estate transactions and market sales and fails to
8 substantiate any link between increased retail sales and property values. Moreover, this
9 study only looked at impact either directly abutting the streetscape improvement, or a couple
10 hundred feet for plaza-like improvements.
11
12
13
14
15
16
17

18 45. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
19 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
20 Exhibit 124. One explanation of that this omission could be TPL’s estimate of the economic
21 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
22 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
23 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
24 asked whether he considered that HR&A’s estimated LID impact is six times greater than
25 TPL’s assessment of Seattle’s entire park system, he surmised that it was because the
26 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
27 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
28 assumptions to account for this difference, which may be partly explained by the fact that
29 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
30 approximately 3.44% of King County tourists visit Seattle primarily because of the city
31 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
32 waterfront improvements.
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 46. Although proximity to the improvements is a key factor in all of these
2 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
3 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
4 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
5 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
6 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
7 Improvements is approximate 20 acres and it is not a community park.⁹

8 47. There is no explanation in the Final Study or the supporting materials of how
9 the studies or comparable sales were used to derive values for Martin Apartments LLC's
10 property. For these reasons, Martin Apartments LLC appeals the following portions of the
11 Examiner's Recommendation: Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30,
12 II.32, and IV.C.5.

13 48. Failure to comply with USPAP. Martin Apartments LLC's assessment also
14 rests on a fundamentally wrong basis due to the City's appraiser's decision to utilize a
15 hybrid mass-appraisal method. Randall Scott, a former mass appraiser responsible (and
16 professionally recognized) for developing the MAI standards for mass appraisals, testified
17 that the Final Study does not meet mass appraisal standards nor allow for independent
18 assessment of the accuracy of Mr. Macauley's conclusions.

19 49. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
20 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22

23 ⁹ *See*
24 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
25 connecting Seattle's central waterfront to downtown.").

1 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
2 testimony suggests that he incorrectly believed that the only difference between direct
3 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
4 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
5 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
6 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
7 Gordon uses in doing his limited restricted report").
8

9
10 50. But the difference is not only in reporting—mass appraisal techniques must
11 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
12 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
13 parcel approach:
14

15 The mass appraisal technique is an appraisal method used to evaluate
16 a group of properties that are subject to similar market forces as of a
17 certain date through the use of market data, statistical analysis and
18 testing. As a result, the mass appraisal technique does not require or
19 involve analysis of each individual property's specific data.
20

21 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
22

23 51. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
24 universe of properties as a given date using standard methodology, employing common data,
25 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
26 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
27 model" is "a mathematical expression of how supply and demand factors interact in a
28 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
29 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
30 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 52. Regardless of client direction, Mr. Macaulay is required to comply with
2
3 USPAP. So if, as he determined, a “[p]arcel-by-parcel direct appraisal” would not have been
4
5 economically feasible because it would have taken “an incredible amount of time and cost”
6
7 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
8
9 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 (“performing an
10
11 individual appraisal of each [condo] parcel would have been cost and time prohibitive”).

12 53. But Mr. Macaulay’s methods fail to comply with USPAP Standards 5 and 6
13
14 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
15
16 value, fails to calibrate the model structure to determine the contribution of the individual
17
18 characteristics affecting value, and does not review the mass appraisal results against actual
19
20 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
21
22 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

23 54. Mr. Macaulay explained that factors like “aesthetic change in the area, the
24
25 proximity to the elements, the increase in market rent, market vacancy changes,
26
27 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
28
29 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
30
31
32

33
34 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
2 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
3 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
4 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
5 were hypothetical, it was not possible to identify matched pair sales and no City witness
6 explained how ABS Valuation made adjustments to “comparable” sales in order to check
7 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
8 him to explain his model structure.
9

10
11 55. For these reasons, Martin Apartments LLC appeals the following portions of
12 the Examiner’s Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Martin
13 Apartments LLC renews Objectors’ Motion To Exclude The Expert Testimony of Robert J.
14 Macaulay, filed on April 8, 2020, and appeals the Examiner’s denial of that motion.
15

16
17 56. Finally, Martin Apartments LLC’s property is not appurtenant—or even in
18 close proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the
19 burden of proving special benefit” shifted to the City because the protestors’ parcels merely
20 stood “in close proximity to the property on which expert testimony was given”). Indeed,
21 Martin Apartments LLC’s property is not even within 2,000 road network feet from the core
22 park improvements. And, as described above, the special assessment is overstated because
23 the Final Study makes no attempt to determine general benefits, existing amenities for
24 Martin Apartments LLC’s specific property, or special detriments. In addition, it is
25 speculative due to the fact that, as of October 2019, improvements were not in in place—
26 and, in fact, much of the waterfront is a construction zone following removal of the viaduct
27 and now Pier 58 demolition. Under these circumstances, rather than relying on entirely
28 imaginary income and shaky hypotheticals, Mr. Macaulay at the very least should have
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 discounted the special benefit estimates or waited to perform the Study until the
2
3 improvements were at least close to complete.
4

5 **Erroneous Pre-Improvement Valuation**

6 57. The proposed final assessment erroneously overstates the pre-improvement
7
8 value of Martin Apartments LLC's property as of October 1, 2019 and, as a result,
9
10 overstates the special benefit to the Martin Apartments LLC's property. This variation in
11
12 pre-improvement valuation calls into question the City's assessments because the City's
13
14 Final Benefit Study uses the pre-improvement valuation to then calculate the assessment
15
16 amount.
17

18 58. Thus, aside from multiple other reasons why computation of the special
19
20 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
21
22 improvement values that do not accurately reflect market data. For these reason, Martin
23
24 Apartments LLC appeals the following portions of the Examiner's Recommendation:
25
26 Section III.
27

28 **Erroneous Computation of Special Benefit**

29 59. "Special benefit" is "the increase in fair market value attributable to the local
30
31 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
32
33 may receive by reason of the improvement is not measured alone by the physical character
34
35 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
36
37 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). "The question is: To what extent is
38
39 the particular tract or property benefited by the entire improvement, and is it assessed
40
41 proportionately with the other property included within the assessment district?" *Id.* 165–
42
43 66.
44
45
46
47

1 60. The proposed final assessment erroneously overstates the special benefit of
2 LID improvements in a number of ways.
3

4 61. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
5 the Martin, Mr. Macaulay assumed rental rates would increase by 0.20% (low) and 0.60%
6 (high) due to the 2024 LID Improvements. Based on formulas in the spreadsheets, Mr.
7 Macaulay then uses these same percentages (0.20% and 0.60%) to increase retail and
8 parking income. He then uses this hypothesized increased revenue to calculate a new net
9 operating income for the commercial properties and capitalizes that to come up with an
10 “After” valuation.
11

12 62. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
13 operating income remains the same as in the hypothetical “Before” condition, but changes
14 the cap rate. For the Martin, the cap rate goes from 4.25% to 4.22% (low scenario, creating
15 a bigger value increase) and 4.24% (high scenario, creating a lower value increase).
16

17 63. Mr. Macaulay then averages his four “After” values to arrive at a final special
18 benefit conclusion. For the Martin, this is an increase in property value of 0.40% due to the
19 LID Improvements.
20

21 64. Mr. Macaulay offered little justification for his micro adjustments to revenue
22 and capitalization rates. When asked precisely what the basis is for his special benefit
23 percentage increases to revenue for each commercial property, he could not point to
24 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
25 is nothing in the report to allow a reader to understand how he came up with these
26 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
27 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
28 the basis for his belief that certain factors—liked increased connectivity—will increase
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
2 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
3
4 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
5
6 sources equally even though there was no separate analysis done for food and beverage or
7
8 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Martin Apartments LLC’s
9
10 expert’s conclusion that the adjustments are arbitrary and fall below generally accepted
11
12 margins of error, and that there is no actual, measurable, non-speculative special benefit to
13
14 Martin Apartments LLC’s properties.
15

16 65. Mr. Macaulay testified that he used comparable sales as a reasonableness
17
18 check for commercial properties. But as explained above, no City witness has explained
19
20 how anyone, or all, of the sales are comparable to any particular commercial property within
21
22 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
23
24 in order to make sales “comparable,” he would have had to make adjustments to account for
25
26 Before and After conditions, but there is no way to understand how adjustments were made
27
28 because he “didn’t do a separate sales comparison approach where we showed adjustments
29
30 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
31
32 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
33
34 *Id.* at 127:10-128:24.
35

36 66. It also bears noting that any “internal review” of the special benefit estimates
37
38 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
39
40 error. Indeed, given all the same information, he seemed to suggest that it would be
41
42 perfectly reasonable for another experienced appraiser to come up with special benefit
43
44 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
45
46 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
47

1 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
2 margin of error conflicts with the testimony of Martin Apartments LLC's experts and
3 reaffirms that there are absolutely no standards governing his process. *See id.* at 91:6-94:5.
4
5 Even if the typical margin of error (5%) is a "rule of thumb" and not a "hard legal standard,"
6
7 there are still reasonable and unreasonable variations within the appraisal field. *See*
8
9 Examiner's Recommendation at IV.B.4. Thus, the special assessment is not actual,
10
11 measurable or special because it is arbitrarily assigned; and it is too small to realistically be
12
13 supported by appraisal techniques.
14
15

16 67. No evidence of special benefit. Meanwhile, there is "no actual evidence from
17
18 any seller or purchaser that the price was higher because of the LID improvements."
19
20 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
21
22 identified any seller or buyer, or any particular property where the existence of the LID
23
24 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Martin
25
26 Apartments LLC has explained that the property has not increased rental rates or revenue
27
28 due to the forthcoming LID Improvements, because, among other reasons (and apart from
29
30 COVID), the improvements ABS believes will generate value do not exist, and will not for a
31
32 number of years to come. There are no comparable sales because the LID Improvements are
33
34 not in place, nor will they be until the end of 2024 if completed on schedule.
35
36

37 68. The fair market value of MARTIN APARTMENTS LLC'S property has not
38
39 changed due to increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property
40
41 was not specially benefited from installation of new water main and fire hydrant where it
42
43 was already adequately supplied with water and afforded adequate fire protection). And in
44
45 any event, any value attributable to removal of the viaduct was to be excluded from the
46
47 assessment calculation.

1 69. There is no special benefit because LID improvements in fact diminish the
2 value of Martin Apartments LLC's property by drawing visitors away towards
3 improvements that do not abut the property, increasing competition for the retail component.
4
5
6
7 *See Kusky*, 85 Wn. App. 493 (testimony of owners' expert that LID actually diminished
8 value of property was sufficient to rebut presumption that assessment was proper).
9

10 70. Moreover, the assessment formula is an attempt to distribute costs that do not
11 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
12 "merely a mathematical model that distributes costs").
13
14

15 71. The Special Benefit Study fails to address whether the \$346,000,000
16 estimated LID project cost takes into account the investment that would have occurred in the
17 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
18 invested. This is a critical component of estimating which properties receive a direct benefit
19 from the improvements, versus more incidental benefits further from the park.
20
21

22 72. Mr. Macaulay also included personal property in his valuation of hotels even
23 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
24 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
25 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
26 "[a]ppraisal applies to the land and building improvements only" (C-17 at 197). *See also*
27 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
28 receiving a disproportionately high LID assessment in comparison to other property types,
29 since hotels were the only property type subject to personal property LID assessments.
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 notice procedures because hotel property owners only received notice that their real estate
2 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).

3
4 73. The proposed final assessment substantially exceeds the special benefit to the
5 property and is grossly disproportionate to similarly situated properties within the LID. For
6 these reasons, Martin Apartments LLC appeals the following portions of the Examiner's
7 Recommendation: Sections II.22, II.23, II.27, IV.B.4 and IV.B.11(a)(iii).
8
9
10
11

12 **State Environmental Policy Act and Other Environmental Permitting**

13
14 74. While this appeal is not challenging the City's environmental review and
15 permitting processes, those processes are relevant in determining the legality of the
16 assessments, and to assessing the delivery risk, the present value of the City's plans, and
17 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
18 pursue projects that have not yet undergone environmental review (thus limiting the choice
19 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
20 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
21 is just beginning. Further, the City has segmented environmental review, and still has a
22 gauntlet of federal, state and tribal review processes to complete before it will be clear what
23 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
24 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
25 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
26 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
27 committing to reconstruction of Pier 58 and major street improvements without
28 environmental review, or the City's Final Special Study has improperly included and is
29 proposing to assess the Martin Apartments LLC the costs and special benefits of
30 improvements that may not get built. Either way, it is faulty process.
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

Due Process Rights

1
2
3 75. The City's failed to notify MARTIN APARTMENTS LLC sufficiently in
4 advance of the hearing to allow MARTIN APARTMENTS LLC to obtain evidence and
5
6 prepare to properly challenge the assessments. Because LID assessments involve a
7
8 deprivation of property, affected owners have the right to a hearing as to whether the
9
10 improvement resulted (or will result) in special benefits to their properties and whether their
11
12 assessments are proportionate, which necessarily includes the right to adequate notice of the
13
14 hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d 555, 569–70, 229 P.3d 761
15
16 (2010).

17
18 76. The LID statute specifies that cities must mail notices giving the time and
19
20 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
21
22 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
23
24 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
25
26 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
27
28 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
29
30 secure their own appraisal), evaluate proportionality of the proposed assessments, and
31
32 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
33
34 for anybody to get an appraisal”).

35
36 77. The City’s Notice of Assessment was sent on December 30, 2019. And the
37
38 Final Special Benefit Study has only been available for public review since January 7, 2020.
39
40 Due to this short time frame, MARTIN APARTMENTS LLC requested a prehearing
41
42 conference and scheduling order that would preserve and protect Martin Apartments LLC’s
43
44 right to analyze and respond to the Final Study, obtain expert appraisal testimony, conduct
45
46 depositions, and to accommodate preliminary motions (*e.g.*, with respect to the interplay
47

1 between SEPA and the City's assessment of taxes for Pier 58 and Pike/Pine improvements).
2
3 The Hearing Examiner erroneously denied that request. For this reason, Martin Apartments
4
5 LLC appeals the following portions of the Examiner's Recommendation: I.B.
6

7 **VII. Relief Requested**

8
9 MARTIN APARTMENTS LLC respectfully requests that the City Council:

- 10
11 1. Reject the Hearing Examiner's recommended denial of Martin Apartments
12
13 LLC's objection; and
14
15 a. Cancel the Waterfront Local Improvement District No. 6751 proposed final
16
17 assessment dated December 30, 2019; or
18
19 b. Revise Martin Apartments LLC's Waterfront Local Improvement District
20
21 No. 6751 proposed final assessment to \$0 (zero), or such amount as Martin
22
23 Apartments LLC establishes at the hearing in this matter; or
24
25 c. Remand the matter to the Hearing Examiner or City appraiser to recalculate
26
27 and reduce Martin Apartments LLC's assessment using recognized appraisal
28
29 techniques consistent with USPAP and:
30
31 i. Excluding any property value increase attributable to viaduct removal
32
33 and other planned WSDOT Improvements;
34
35 ii. Taking into account the effects of the COVID-19 pandemic on the
36
37 value of Martin Apartments LLC's property and other relevant
38
39 developments since October 2019;
40
41 iii. Accounting for and excluding (1) any special benefits from existing
42
43 or planned improvements that already provide similar benefits to
44
45 Martin Apartments LLC's property, and (2) any special detriments
46
47 from construction and other anticipated LID-related disamenities;

- 1 iv. Accounting for and including only those actual benefits anticipated to
2 accrue to Martin Apartments LLC's property based on its location
3 relative to Pier 58, Overlook Walk, and the Promenade, and specific
4 elements of the LID Improvements;
5
6 v. Discounting anticipated special benefits to present value, based on
7 reliable estimates regarding when special benefits will start accruing
8 following completion of the LID Improvements; and
9
10 vi. Accounting for such other issues specific to Martin Apartments
11 LLC's property relevant to calculation of such assessment; and
12
13 2. Grant such further relief as the City Council deems just and proper.
14

23
24
25 **III. Statement of MARTIN APARTMENTS LLC's Interest and Incorporation of**
26 **Prior Arguments**

27 MARTIN APARTMENTS LLC owns the property that is subject to the proposed
28
29 final assessment described in Section IV.

30
31 MARTIN APARTMENTS LLC is amending its appeal as authorized in City of
32
33 Seattle Resolution 31979 to include additional arguments relevant to the revised Final
34
35 Recommendations of the Hearing Examiner issued on February 1, 2021. On February 4,
36
37 2020, MARTIN APARTMENTS LLC timely filed an objection to the assessment, which
38
39 was based on the Final Study. MARTIN APARTMENTS LLC further timely filed an
40
41 appeal of the Hearing Examiner's 2020 recommendations to the City Council. MARTIN
42
43 APARTMENTS LLC maintains and incorporates all objections and arguments raised in its
44
45 appeal filed with the City Clerk on September 22, 2020. This amendment is a supplement is
46
47

1 to be read together with MARTIN APARTMENTS LLC's appeal filed on September 22,
2 2020. MARTIN APARTMENTS LLC incorporates by reference all filings, evidence, and
3 pleadings filed by any party before the Hearing Examiner as authorized by the Hearing
4 Examiner, including without limitation all records pertaining to the November 2020 through
5 February 2021 remand hearing ordered by Council.
6
7
8
9

10
11 **IV. Amended Arguments on Appeal**

12 MARTIN APARTMENTS LLC supplements its appeal of the Hearing Examiner's
13 recommendation to deny MARTIN APARTMENTS LLC's objection to the City of Seattle's
14 Waterfront Local Improvement District No. 6751 proposed final assessment dated
15 December 30, 2019 against the following property:
16
17
18
19

20
21 King County Parcel No. 0696000055
22 Site Address: 2105 5th Ave., Seattle, Washington
23 Proposed Final LID Assessment for Parcel: \$197086
24

25 To avoid repetition, MARTIN APARTMENTS LLC incorporates the evidence and
26 arguments raised before the Hearing Examiner and before the City in its September 22, 2020
27 appeal, into this amended appeal.
28
29

30
31 **A. The Anticipated Special Benefits to MARTIN APARTMENTS LLC's**
32 **Property should be Discounted to Present Value and Assessments**
33 **Adjusted as Appropriate**
34

35 On remand, the City's appraiser acknowledged that special benefits to parcels can be
36 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
37 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
38 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
39 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
40 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
41 accepted that recommendation. The City's appraiser further acknowledged that benefit
42
43
44
45
46
47

1 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
2 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
3 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
4 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
5 calculations to present value because the general benefits are not anticipated from the LID
6 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
7 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
8 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
9 benefit calculation, and related assessments, to account for the delay between the assessment
10 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
11 standard appraisal practice, and renders the other proposed Waterfront LID special
12 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
13 “fundamentally wrong methods.”
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17

18 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
19

20 Additionally, the assessments may not materially exceed the actual special benefit conferred
21 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
22 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
23 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
24 discount benefits the City estimated would accrue to the properties from improvements to be
25 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
26 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
27 property while treating all or most others (including Taxpayer’s) differently, and
28

1 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
2 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
3 for some properties because the benefits are too distant, while assessing other properties as
4 though distant benefits have already been secured. As Taxpayer identified in its September
5 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
6 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
7 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
8 reject the improper calculation of the benefit or remand and require the appraiser to discount
9 the benefits to net present value.
10
11
12
13
14
15
16
17

18
19 **B. In Light of Covid's Continuing Impact on MARTIN APARTMENTS**
20 **LLC and other Downtown Property Owners and other Material**
21 **Changes Since October 2019, the LID Should be Cancelled, or at Least**
22 **Assessments Recalculated, to take Into Account Property Value**
23 **Reductions**
24

25 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
26 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
27 other relevant developments since October 2019." When Washington's first COVID
28 restrictions were imposed in March and April 2020, there was an assumption that they
29 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
30 II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover
31 for another 5 years. Retail stores are boarded up. Homelessness and related challenges have
32 gotten much worse. The City has already imposed higher minimum wages and taxes on
33 businesses to try to fund recovery. The West Seattle Bridge and other bridges are in
34 immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park
35 hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several
36 years from completion, as a best case. In current circumstances, a downtown tax to fund
37
38
39
40
41
42
43
44
45
46
47

1 new, non-essential park improvements against financially strapped taxpayers, and likely
2 passed through to financially strapped tenants and customers would be unfair to taxpayers
3 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
4 rethinks its budget priorities for the next few years, and its potentially funding sources,
5 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
6 property owners) have a chance to recover, and that any assessment take into account the
7 changed circumstances since this appeal process started on February 4, 2020 to avoid
8 unnecessarily and perhaps permanently killing downtown properties and businesses in the
9 name of bettering them.
10

45
46
47
MARTIN APARTMENTS LLC respectfully reiterates its request from the
September 22, 2020 appeal that the City Council:

1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
assessment dated December 30, 2019; or
2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
proposed final assessment to \$0 (zero), or such amount as Taxpayer
establishes at the hearing in this matter; or
3. Grant the Examiner's recommended remand but with instructions to
recalculate and reduce Taxpayer's assessment using recognized appraisal
techniques consistent with USPAP and

- 1 a. Excluding any property value increase attributable to viaduct removal
2 and other planned WSDOT Improvements;
3
4
5 b. Taking into account the effects of the COVID-19 pandemic on the
6 value of Taxpayer's property and other relevant developments since
7 October 2019;
8
9
10 c. Accounting for and excluding (1) any special benefits from existing
11 or planned improvements that already provide similar benefits to
12 Taxpayer's property, and (2) any special detriments from construction
13 and other anticipated LID-related disamenities;
14
15
16 d. Accounting for and including only those actual benefits anticipated to
17 accrue to Taxpayer's property based on its location relative to Pier 58,
18 Overlook Walk, and the Promenade, and specific elements of the LID
19 Improvements;
20
21
22 e. Discounting anticipated special benefits to present value, based on
23 reliable estimates regarding when special benefits will start accruing
24 following completion of the LID Improvements; and
25
26
27 f. Accounting for such other issues specific to Taxpayer's property
28 relevant to calculation of such assessment; and
29
30
31
32
33
34
35
36
37 4. Grant such further relief as the City Council deems just and proper.

Hearing Examiner File No. CWF-0417

NOTICE OF APPEAL OF HEARING
EXAMINER’S FINDINGS AND
RECOMMENDATION ON UNITED WAY
OF KING COUNTY’S OBJECTION TO
WATERFRONT LID NO. 6751 PROPOSED
FINAL ASSESSMENT FOR PARCEL NO.
0939000240

32
33 United Way of King County (“Taxpayer”) files this appeal pursuant to RCW
34 35.44.070, Seattle Municipal Code 20.04.090, City of Seattle Resolution 31915, the notice
35 of the Seattle Office of the City Clerk dated December 30, 2019, and the Hearing
36 Examiner’s Findings and Recommendation issued September 8, 2020 (“Examiner’s
37 Recommendation”).

29
30

31 **III. Statement of Taxpayer's Interest**
32

33 United Way of King County owns the property that is subject to the proposed final
34 assessment described in Section IV. The property is the Foster & Marshall Building at 720
35 2nd Avenue, Seattle, WA. It is an office building of historic significance, and is fully
36 occupied by United Way.
37
38
39

40 The basis of the proposed assessment is a Final Special Benefit/Proportionate
41 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
42 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
43 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
44
45
46
47

1 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
2 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4 to exclude charges for other improvement projects in the Central Waterfront, and
5 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
6 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
7 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
8 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
9 because construction was not complete on the LID Improvements or the WSDOT
10 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
11 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
12 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
13 was based on the Final Study.
14

15 **IV. Matter Under Appeal**

16 Taxpayer appeals the Hearing Examiner’s recommendation to remand Taxpayer’s
17 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
18 final assessment dated December 30, 2019 against the following property:
19

20 King County Parcel No. 0939000240
21 Site Address: 720 2nd Ave., Seattle, Washington 98104
22 Proposed Final LID Assessment for Parcel: \$139,097
23 Revised Final LID Assessment for Parcel: \$81,928
24

25 *See* Examiner’s Recommendation at 61-62, 104.
26

27 On August 13, 2020, the City submitted the revised assessment amount because
28 “[t]he property sold its air rights” and “[t]his was not considered in the [City’s appraiser’s]
29 analysis.” However, as stated in Taxpayer’s objection, this was just one basis for its request
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 for a reduced assessment. Further, the revision simply stated that the revised special benefit
2 is \$209,000 (down from \$355,000) and that the revised assessment is \$81,928 (down from
3 \$139,097). There is no information or analysis supporting the City's proposed assessment
4 that would enable Taxpayer to evaluate whether it is a fair, actual, measurable,
5 proportionate, non-speculative estimate of special benefits, as revised. For example, it is not
6 clear whether the City's appraiser took into account the historic designation which—like the
7 sale of air rights—affects value, and therefore the ultimate assessment amount. In addition,
8 the United Way is a non-profit and funder of human and health services and does not expect
9 to realize any economic benefit from the improvements. The United Way leases no space in
10 the property and is fully owner-occupied. Further, the City's methods do not adequately
11 support a finding of special benefit to office buildings given the focus on future increased
12 tourism. And the City fails to account for potential harms to office buildings, such as
13 impacts from construction, increased traffic, and decreased parking availability. For these
14 reasons, Taxpayer submitted a response to the revised assessment renewing its objection on
15 grounds that the revised assessments are still too high, and hereby appeal the revised
16 assessment and the remand to the extent it is limited to the issue of air rights.

17
18 To avoid repetition, Taxpayer incorporates the evidence and arguments raised before
19 the Hearing Examiner into this appeal. In particular, Taxpayer points the City Council to
20 Taxpayer's initial Appeal Petition, *Frye* motion, Closing Brief submitted at the close of its
21 case-in-chief (dated 4/16/2020), and supplemental Closing Statement submitted at the close
22 of the City's case-in-chief (dated 7/7/2020).¹

45
46
47
¹ Because the City has not provided "metered index numbers," our appeals cannot reference them. *See* SMC 20.04.110. However, as part of the prehearing conference, we recommend that the Public Works committee secure and provide appellants with such a record, so that the appeals can then be supplemented with that additional information, so as to make the Committee's consideration

1 As discussed more fully below, Taxpayer specifically appeals the following Findings
2 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
3
4 Pages 61-62, 104, Sections II.6, II.7, II.12, II.14, II.18, II.19, II.20, II.21, II.22, II.23, II.24,
5
6 II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3, IV.B.4,
7
8 IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
9
10 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.2, IV.C.3, IV.C.4, IV.C.5, IV.C.8, IV.C.11,
11
12 IV.C.12, IV.C.14, and IV.C.18.
13

14 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
15
16 recommendations on material issues raised during Taxpayer's appeal that were supported by
17
18 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
19
20 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
21
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23
24 recommended anything other than denial of objectors' appeals were where the City's
25
26 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
27
28 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
29
30 special assessments based on "fundamentally wrong methods."
31

32 The special benefit for which special taxes are assessed must be "actual, physical and
33
34 material and not merely speculative or conjectural." *Heavens v. King Cty. Rural Library*
35
36 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
37
38 with the law, the assessments may not materially exceed the actual special benefit conferred
39
40 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
41

42
43
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45
46 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
47
Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
retained by Perkins Coie are part of this case file.

1 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
2 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
3 assessment. In this case, the proposed assessment fails each of the legal requirements for
4 special assessments and must be annulled as arbitrary or capricious, or founded on
5 fundamentally wrong methods.
6
7
8
9

10
11
12 **Legal Requirement:** Actual, non-speculative special benefit

13
14 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
15 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
16 October 2019 (they were not), and an “After” value purporting to assess the value of
17 properties with the LID improvements in place at least five years before anticipated
18 completion.
19

20
21 **Legal Requirement:** Cannot materially exceed the special benefit

22
23 **ABS Study:** ABS calculates a revised special benefit of \$209,000 assuming the LID
24 Improvements were in place and providing benefit in October 2019. However, the LID
25 Improvements will not be completed until the end of 2024 if the City meets its current
26 schedule, and many of WSDOT’s alternative improvements will not be built. The present
27 value of future improvements deliverable in five years is significantly lower than the
28 current value of improvements that already exist. Further, ABS’s own materials show that
29 benefits may not accrue for at least five years after they are completed, in 2029. If the
30 hypothesized special benefits are discounted to present value, the assessments materially
31 exceed the hypothesized special benefits.
32
33

34
35 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID

36
37 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
38 prepared his Final Study in October 2019, and the City issued its preliminary roll in
39 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
40 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
41 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
42 and must be based on actual special benefits. While that does not mean ABS’s appraisal
43 was wrong when completed, values and benefits need to be reanalyzed before assessments
44 are finalized in light of the unprecedented changes to the downtown real property market.
45
46
47

Legal Requirement: Actual benefit that cannot materially exceed special benefit—
Assessment cannot include value attributable to future WSDOT Improvements.

ABS Study: The City’s appraiser asserts that the City is not collecting assessments “based on the value of WSDOT’s planned improvements.” *See* Final Study at 3. However, the City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition, the City’s appraiser increased 2019 property market values as though WSDOT had completed its work by 2019. The proposed assessment is against this hypothetical WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent) higher than actual 2019 market values. The City is collecting an assessment against both the 2019 current values and the phantom 2019 WSDOT market value lift, in direct contravention of law and the City’s promise not to impose an assessment based on the value of viaduct demolition and the other components of WSDOT’s planned work.

Legal Requirement: Benefits must be special, not general

ABS Study: The City’s appraiser fails to determine or explain what general benefits arise due to the LID Improvements. However, the far-reaching and public nature of the improvements make any benefit arising from them general—not special.

Legal Requirement: Benefits must be “physical and material and not merely speculative or conjectural”

ABS Study: Not only are the improvements not yet “physical or material,” but environmental review and permitting for the City’s proposed LID Improvements is not complete, and the LID improvements are not anticipated to be complete until the end of 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in a manner consistent the City’s then-current proposals, which were in many respects merely conceptual designs.

Legal Requirement: Must comply with appraisal standards

ABS Study: ABS’s valuation methodology cannot be tested. It is a hybrid of “Individual” and “Mass” appraisal techniques, but fails to meet USPAP requirements for either. Until the Examiner admonished ABS, ABS even asserted its analysis was “confidential and proprietary.” ABS’s analysis and conclusions can neither be tested nor replicated. The Final Study fails to meet basic standards for admissibility and must be remanded.

Legal Requirement: Actual and measurable special benefit

1 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
2 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
3 on a host of "micro-judgments" that are not supported by any documentation, nor capable
4 of replication or quality assurance/quality control. The assessments are undocumented,
5 unreliable, and not supported by empirical studies, data, or reports.
6

7
8 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
9 supported by empirical evidence
10

11 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
12 value of parks and other public amenities and on whom ABS purported to rely, testified
13 that ABS had completely misapplied his work and dramatically overstated both the
14 distance to which economic benefits might extend from the LID Improvements and the
15 extent of any anticipated benefit within the potentially benefited area.
16

17
18 **Legal Requirement:** Actual special benefit—Must take into account potential
19 disamenities
20

21 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
22 construction, as well as other potential disamenities associated with public places.
23
24

25 **Legal Requirement:** Cannot prematurely commit to build
26

27 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
28 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
29 are being imposed. But finalizing the roll is a commitment by the City to build the
30 improvements, which is a violation of legal process and commits the City to build things it
31 may not secure permission to build.
32
33
34

35 In addition to these general objections, there are property-specific issues raised by
36 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
37 statement below.
38
39

40 **V. Standard of Review**

41 "When considering the assessment roll, the city council sits 'as a board of
42 equalization.'" *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
43
44
45
46
47

1 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
2 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
3 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
4
5

6 The proposed assessments are presumed correct, “unless overcome by clear, cogent
7 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
8 than the heightened presumption of correctness on judicial appeal because “applying these
9 elevated standards at the municipal hearing would afford unwarranted deference to a report
10 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
11 presumption is not evidence and its efficacy is lost when the other party adduces credible
12 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
13 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
14 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
15 presented credible evidence showing that the City’s proposed assessment is arbitrary,
16 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
17 to the City to prove the assessments are actual, measurable, special, non-speculative and
18 proportionate. The City failed that burden.
19
20
21
22
23
24
25
26
27
28
29
30
31

32 **VI. Grounds for Appeal**

33 Taxpayer appeals the Hearing Examiner’s Findings and Recommendations on the
34 following grounds.
35
36
37

38 **Taxpayer Not Required to Provide A Special Benefit Study**

39 1. Contrary to the Examiner’s findings and recommendations, there is no
40 requirement that experts or property owners provide an alternative special benefit
41 calculation under these circumstances—to do so would also require the same improper
42 speculation the City’s expert engaged in, given the timing and information provided. *See*,
43
44
45
46
47

1 e.g., Second Decl. of Peter Shorett ISO Closing Stmt., ¶¶ 3-4 (dated 7/7/2020); Decl. of
2 Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has
3 explained: “[W]e have explicitly rejected an argument that, because certain protestors ‘failed
4 to offer expert testimony at the city council hearing[,] the presumptions [in favor of the
5 assessment] were still operative as to their property.’” *Hasit*, 179 Wn. App. at 946 (quoting
6 *In re Indian Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*,
7 85 Wn. App. 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he
8 provided expert opinion showing that improvements actually diminished value of the
9 property). In fact, no independent evidence is required at all if, for example, objectors show
10 that the assessment was grounded on a fundamentally wrong basis due to an error in the
11 City’s appraiser’s methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
12 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
13 a property owner could simply point out that the square footage assumed in the City’s
14 appraisal was incorrect. For these reasons, Taxpayer appeals the following portions of the
15 Examiner’s Recommendation: Sections II.12, II.14, IV.A, IV.B.11(a), IV.C.2, IV.C.8, and
16 IV.C.11.

17
18
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

34 2. RCW 35.43.040 provides cities and towns authority for ordering local
35 improvements and for levying and collecting special assessments “on property specially
36 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed
37 upon all the property in accordance with the special benefits conferred thereon.” RCW
38 35.44.010.
39
40
41
42
43

44 3. No analysis of general benefits. Special assessments have been “held valid
45 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
46
47

1 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
2 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
3
4 they are for the construction of local improvements that are appurtenant to specific land and
5
6 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
7

8
9 4. Taxpayer’s property is not specially benefited by the LID Improvements.
10
11 The primary purpose and effect of the LID Improvements are to benefit “members of the
12
13 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
14
15 library is for the benefit of the members of the whole community individually and
16
17 collectively who may be served by it”). Mr. Macaulay’s own chapter of the LID Manual
18
19 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
20
21 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
22
23 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
24
25 that if an appraiser “identifies both general and special benefits, these benefits should be
26
27 clearly distinguished and explained, and only special benefits should be included in the
28
29 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
30
31 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/11/2020 (P. Shorett) Hrg. Tr. at 182:14-
32
33 183:4. It is undisputed that Mr. Macaulay did not analyze or measure general benefits,
34
35 including those arising from construction necessary to meet basic design standards. *See*
36
37 Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
38
39 construction costs related to meeting design standards which may be general benefits as
40

41
42 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
43 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
44 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
45 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
46 Taxpayer has attached a master list of the hearing exhibits, filings, and evidence presented as
47 Attachment A to this appeal notice.

1 distinct from construction costs emanating from requirements of the LID project”). To the
2 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
3 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
4 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
5 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.
6
7
8
9

10 5. LID Improvements not necessary. Unlike typical LID projects, the
11 Waterfront LID improvements are largely unnecessary to the functionality of any particular
12 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
13 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
14 held invalid where owners would have benefitted equally from increase of only 9 feet);
15 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
16 intersection for new water main for hydrant held invalid because land was already afforded
17 functional hydrant at nearby street). Here, Taxpayer testified that the building is fully
18 occupied by the United Way and already has easy access to the waterfront for its employees.
19 3/12/2020 Hrg. Tr. (D. Brown) at 143:20-144:17.
20
21
22
23
24
25
26
27
28
29

30 6. The fact that there is no case law differentiating between binary
31 improvements and parks does not change the law prohibiting assessments on properties
32 already adequately served by existing amenities. *See* Examiner’s Recommendation at
33 IV.C.3 (reasoning that “no case law is provided to support the differentiation between a
34 hardscape benefit and the more ephemeral benefits of park”). Nor does the Examiner’s
35 reasoning excuse the City’s failure to account for existing amenities as part of the special
36 benefit calculation. As Dr. Crompton testified, existing view amenities may in fact diminish
37 the incremental effect of new park improvements on the value of properties, much like
38
39
40
41
42
43
44
45
46
47

1 turning on a weak light in an already brightly illuminated room. *See* Hrg. Exhibit 94
2
3 (Crompton’s Report) at 12-13.

4
5 7. To the extent benefits can be considered “special” as opposed to general, they
6
7 are nominal or nonexistent for many properties even in the Central Waterfront, which
8
9 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
10 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties’ fair market value did not
11
12 change due to expansion of sewer service *near* owners’ parcel which were already
13
14 connected). Even if the City could assess for a view change (and it has promised not to
15
16 assess for viaduct removal), the fair market value of Taxpayer’s property has not changed
17
18 because the LID Improvements have not improved the property’s waterfront view or access
19
20 to the waterfront, nor will they when the City anticipates completion in 2024. For these
21
22 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
23
24 Sections IV.C.3, IV.B.9, and IV.C.3.

25
26 8. No analysis of special detriments. The Final Study fails to properly account
27
28 for special detriments. *See Kuskys*, 85 Wn. App. at 501 (city failed to consider the costs to
29
30 owners for removal and cleanup of underground storage tanks discovered during the
31
32 improvement project). Although Mr. Macaulay claims he analyzed impacts on the City’s
33
34 planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation
35
36 of how lost parking might be a detriment, and no property-specific parking analysis in any
37
38 of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12; *see also* 6/26/2020 Hrg.
39
40 Tr. at 153:18-154:19 (did not actually analyze impact of decreased parking on condos).
41
42 Meanwhile, Mr. Brown testified that vehicle access to the building is critical to support
43
44 United Way’s various program and parking is already an issue. There is concern that the
45
46
47

1 LID Improvements and increase in tourism could impact parking availability further.

2
3 3/12/2020 Hrg. Tr. (D. Brown) at 142:20-143:10.

4
5 9. Likewise, there was no analysis of the risks associated with disamenities such
6
7 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
8
9 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
10
11 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
12
13 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
14
15 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
16
17 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
18
19 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
20
21 the maintenance agreement. *Id.* at 13:4-14:2.

22
23 10. There was also no consideration of negative impacts from another four-plus
24
25 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
26
27 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
28
29 law allowing him to dismiss these actual, non-speculative impacts. Because future special
30
31 benefits calculations are inherently speculative, Washington's eminent domain statute
32
33 specifically allows condemnees to postpone special benefits assessments until improvements
34
35 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
36
37 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
38
39 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
40
41 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 Greenway, the Greenway district “significantly” lagged in value). For these reasons,
2
3 Taxpayer appeals the following portions of the Examiner’s Recommendation: Sections
4
5 II.25, IV.B.8, and IV.B.9.

6
7 11. Special benefit estimate is speculative. When calculating a special benefit,
8
9 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
10
11 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
12
13 becomes pure speculation.” *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324
14
15 P.2d 1078 (1958)).

16
17 12. Assuming without conceding that one day, the City’s planned LID
18
19 Improvements might increase the value of neighboring properties to some extent, that
20
21 potential benefit is many years away and speculative. While appraisers tolerate some degree
22
23 of estimation and judgment, Taxpayer’s expert testified that Mr. Macaulay’s Final Study is
24
25 far too speculative to satisfy industry practices and standards. *See. e.g.*, 3/12/2020 (P.
26
27 Shorett) Hrg. Tr. at 92:24-93:10 (it is impossible to perform a special benefit analysis with
28
29 the level of precision implied in the Final Study due to the size of the LID and use of
30
31 hypotheticals).

32
33 13. Although LIDs are sometimes finalized prior to completion of improvements,
34
35 this is typically just six month or a year prior, and the assessments are otherwise supported
36
37 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
38
39 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
40
41 will not be realized for four or five years. In the meantime, there is permitting risk,
42
43 construction risk, and general economic risk (e.g., COVID), which renders ABS’s 2019
44
45 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
46
47 and to what extent, different factors will impact value. *Id.* at 51:13-53:5; *see also* 3/11/2020

1 (P. Shorett) Hrg. Tr. at 196:17-21; 205:22-206:2. Ultimately, Mr. Macaulay concedes that
2 there is inherent uncertainty in valuing the future delivery of projects because “we can’t read
3 the future.” 6/23/2020 Hrg. Tr. at 79:18-80:8. As he testified: “I just don’t know what the
4 market value would be as of the date the project would be finally constructed” because
5 “[t]here could be a lot of elements in the market that did occur between now and then that
6 impact value.” 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.* at 211:8-20 (no way to know if
7 his estimates will be higher or lower than comparable sales in 2024 because “markets tend to
8 fluctuate over time” and “I can’t predict the future”).
9

10
11
12
13
14
15
16
17 14. The record is clear that while no one can know what “special benefit” might
18 accrue to these properties in four years (if any), we do know that there are no actual benefits
19 now. The LID improvements provide no immediate special benefit to property owners
20 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
21 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
22 sewer system for future users).
23

24
25
26
27
28
29 15. Further, there are no “plans and specifications” on file with the Clerk’s Office
30 for the LID Improvements, and it is unlawful to move to final assessments without such
31 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
32 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
33 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
34 dollars on projects still early in the design process. *See* Washington Attorney General
35 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
36 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
37 of programs and included “only so much of the overall costs” that took place within and
38 benefitted the assessed properties).
39
40
41
42
43
44
45
46
47

16. The COVID-19 crisis highlights how fundamentally speculative and unfair it would be to base a special benefit assessment on twin 2019 hypotheticals for improvements anticipated to be delivered five years later. Even before COVID, it was speculative to assume that market highs experienced in October 2019¹ would be sustained through 2024, after an already extraordinarily long expansion period. *See, e.g.*, 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing my analysis in October 2019, who would have thought that this COVID issue would happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought process was that the market was going to continue to go up.” *Id.* There is no basis for assuming that values hypothesized in October 2019 will remain relevant; they are already irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶ 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019 (*see* Examiner’s Recommendation at 109), the pandemic has impacted *current* values and rendered the hypothetical October 2019 Final Study valuations outdated.

17. As another example of how future events could affect the accuracy and reliability of the City's 2019 proposed assessment, Taxpayer recently requested the Hearing Examiner re-open the record to allow the City to explain whether the assessments against property owners within the LID are, in fact, being used by the City to fund the emergency dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use

⁴ Associated Press, *Seattle mayor approves ‘emergency dismantling’ of waterfront Pier 58* (King 5, Aug. 15, 2020), available at <https://www.king5.com/article/news/local/seattle/seattle-mayor-approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-0b60d4097aa3>; See Aug. 21, 2020 Memo from R. Holtz et al. to L. Arber re HPA Request for Pier 58 (Waterfront Park) Emergency Demolition Project, *available at* <https://www.govonlineas.com/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.ashx?query=UxFpa3XqI8020u5QdalfpJXX0C+FjfKT5/OpyMkto74->; see also Aug. 13, 2020 Ltr. from H. Burton to D. Graves et al. re Review of Pier 58 Movement Observation Report & Recommendations,

1 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
2 would be improperly imposing costs on property owners within the LID for improvements
3 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
4 habitat and City infrastructure—this does not provide any special benefit to LID property
5 owners.
6
7
8
9

10 18. There is also no certainty the improvements will be delivered on time. Mr.
11 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
12 delay in construction schedule would not constitute a “material change” under the City
13 Council’s ordinance authorizing the improvements. In other words, the City cannot
14 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
15 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
16 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
17 potential delays and project changes inherent in those processes, that call into question the
18 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
19 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
20 Decl., dated 4/15/2020).
21
22

45 ⁵ Asia Fields, ‘Substantial’ pier shift closes Seattle’s Waterfront Park (Seattle Times, Aug. 8,
46 2020), available at [https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/)
47 [waterfront-park/](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/).

1 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
2
3 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
4
5 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
6
7 at 66:17-25. He performed no independent due diligence to determine the reliability of the
8
9 City’s estimates for completion of the LID Improvements, or to ensure that proposed
10
11 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
12
13 agreed that if any of his assumptions are incorrect, his opinion of market value would need
14
15 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
16
17 68:11-18.

18
19 20. The City has cited no authority—and Taxpayer is aware of none—that
20
21 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
22
23 assess taxes for “actual” special benefits that will not accrue for another five years (if all
24
25 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
26
27 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
28
29 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
30
31 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
32
33 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
34
35 IV.C.14, and IV.C.18.

36
37 21. Failure to discount special benefit estimates to account for risks and present
38
39 value. Due to the inherent uncertainty, Taxpayer’s expert opine that the Final Study should
40
41 have accounted for risks associated with delivery of the improvements (including permitting
42
43 risk, construction risk, general economic risk) and any special damages associated with
44
45 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
46
47 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the

1 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
2 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers routinely consider
3 the impact of future conditions [through] discounted cash flow analysis.”).
4

5
6 22. Mr. Macaulay acknowledged that appraisers can discount the value of a
7 future condition not in place at the date of valuation and can discount for the time value of
8 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
9 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
10 Discounting would also have been consistent with his approach for analyzing special
11 benefits to vacant land. He testified that the difference between similarly situated vacant
12 sites slated for development and already developed sites was that the labor, capital and risks
13 associated with development had not yet been borne for those vacant sites. Therefore, the
14 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
15 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
16 fully permitted, has not completed environmental review, and has not reached full design is
17 presently worth significantly less.
18
19
20
21
22
23
24
25
26
27
28
29

30 23. The City’s hotel expert, Mr. Lukens, likewise explained that to calculate
31 present value, an appraiser would consider discount rates for land development to account
32 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
33 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
34 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
35 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
36
37
38
39
40
41

42 24. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley’s
43 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
44 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
45
46
47

1 Ex. A. Notably, this is lower than the City’s proposed \$171,000,000 assessment. Thus,
2
3 ignoring momentarily all of the other methodological and other flaws discussed here and in
4
5 Taxpayer’s case-in-chief, and assuming that the LID Improvements provide special benefits
6
7 as soon as they are complete in 2024, Mr. Macaulay’s hypothetical assessment materially
8
9 exceeds special benefits when reduced to present value. Further, to the extent the City is
10
11 arguing that because they are permitted to assess 100% of the special benefit, the special
12
13 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
14
15 is again wrong. After applying proper discounting, the City’s proposed special benefit
16
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18
19 100% of the total estimated special benefit.

20
21 25. But even the assumption that the LID improvements would deliver benefits
22
23 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
24
25 on. Rather, those studies demonstrate that a discount period of five years is conservative.
26
27 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A’s study
28
29 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay’s backup files)
30
31 indicates that during the construction period, the Greenway district “significantly” lagged in
32
33 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
34
35 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
36
37 30-31 (discussing New York City High Line and San Francisco Embarcadero
38
39 improvements). Given the lengthy delay, any prediction of future special benefits is
40
41 speculative, especially during the construction phase where values are likely to decline.
42
43 Second Decl. of Shorett ISO Closing Stmt., ¶ 6 (dated 7/7/2020). And assuming the LID
44
45 Improvements take a similarly long period of time after they are complete to start producing
46
47 tangible property value benefits, each additional year of delay results in further discount to

1 the present value of any future alleged benefit. Gibbons Decl. ISO Closing Stmt., ¶ 19, Ex.
2
3 A.

4
5 26. Applying the same discounting methods described above and in Mr. Gibbons
6 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
7 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
8 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
9 100% revised assessment should be no more than \$19,687. Anything more would permit
10 the City to assess Taxpayer based on a hypothetical assumption that these improvements are
11 in place and providing benefit, and ignore the risks, construction disamenity, and time value
12 of money that normal appraisal principles would take into account. *Id.*, ¶ 20.
13
14 Proportionality would counsel that the assessment should be only 39.2% of that assessment
15 cap, or \$7,717.
16

17
18 27. Attachment C includes two Excel spreadsheets applying these discounting
19 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
20 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
21 demonstrates that discounting the City's hypothetical October 2019 special benefits to
22 present value would reduce Taxpayer's assessment to \$28,096, exclusive of any other flaws
23 in the City's proposed assessment. The second spreadsheet shows even more drastic
24 reductions after taking into account: (1) Taxpayer's experts' estimated "Before" value based
25 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
26 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
27 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
28 the time it takes for the improvements to capture property value). After such reductions,
29 Taxpayer's assessment would be just \$16,798 (for the 5-year discount) or \$4,616 (for the
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
2 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
3 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
4 Taxpayer's discounting argument without legal or factual analysis; that failure is error.
5
6
7

8
9 **Appraisal and Assessment Calculation Methods Are Flawed**

10 28. The "general rule is that each lot, piece, or parcel of land should be assessed
11 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
12 Wn.2d at 97.
13
14
15

16 29. It is proper to sustain a challenge to an assessment, even without the appraisal
17 testimony from the owner, where the objector's expert establishes that the assessment was
18 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
19 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
20
21
22

23 30. The City's appraiser purports to utilize the comparable sales method of
24 valuation, but no City witness attempted "to characterize any one, or all of them, as
25 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
26 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
27 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
28 characterize any one, or all of them, as comparable to any particular property within the LID").
29 And no City witness could explain how specific adjustments were made to these sales to
30 account for value increases due to the hypothesized Before and After Improvements. For this
31 reason, Taxpayer appeals Section II.23 of the Examiner's Recommendation.
32
33
34
35
36
37
38
39
40
41

42 31. Special assessment improperly includes value lift from the Before
43 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
44 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
45
46
47

1 Improvements, which WSDOT had independently committed to fund. However, Mr.
2
3 Macaulay did not calculate the actual market value of LID properties in October 2019, and
4
5 did not separately analyze the hypothetical increase to property values attributable to
6
7 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
8
9 current value and then separately calculate a hypothetical "With WSDOT" Before value);
10
11 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
12
13 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
14
15 3-4; Shorett Appraisal Review (attached to Appeal Petition) at 2-14. Without any
16
17 documented basis or support, Mr. Macaulay simply "ma[de] a judgment a call" on what
18
19 occupancy and rates would have been for the commercial properties assuming all of the
20
21 WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-130:11. This
22
23 outright omission precludes any independent evaluation of the true market "Before" values.
24
25 *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards;
26
27 if an appraiser uses current sales data to infer values, then the appraiser must explain how he
28
29 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
30
31 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
32
33 other road, pedestrian and landscaping improvements WSDOT had already committed to
34
35 make.

36
37 32. However, because Mr. Macaulay testified that he did include some WSDOT-
38
39 related value-lift in the "Before" values, it follows that part of the special assessment
40
41 improperly is based on value attributable to the WSDOT Improvements. As shown by
42
43 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
44
45 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
46
47 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%

1 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
2 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
3 to properly exclude the value of Before Improvements from the assessments. For these
4 reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
5
6 Sections II.19, II.29, and IV.B.11(a)(ii)
7
8
9

10 33. Special benefits were assigned rather than measured. Mr. Macaulay
11 arbitrarily "assigns" special benefits to Before values instead of measuring them for each
12 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/12/2020 (P.
13 Shorett) Hrg. Tr. at 49:4-50:1; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13.
14 Based on formulas in spreadsheets that Mr. Macaulay used to analyze the commercial
15 properties, Taxpayer's experts concluded that Mr. Macaulay based adjustments on
16 hypothesized very small increases to land value. Attachment B (ABS Spreadsheet). These
17 micro adjustments were based on "professional judgment" that are neither shown nor
18 replicable.
19
20
21
22
23
24
25
26
27

28 34. For these reasons, Taxpayer appeals the following portions of the Examiner's
29 Recommendation: Sections II.19 and IV.B.11(a)(iii).
30
31

32 35. Special benefit falls within margin of error. The Final Special Benefit Study
33 applies an estimated value enhancement of less than 4%, which is generally within the
34 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
35 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
36 Taxpayer's experts explained that if two appraisers independently arrive at values within 5%
37 of one another, this difference is considered reasonable as it falls within the standard margin
38 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/11/2020
39 (P. Shorett) Hrg. Tr. at 216:25-217:11. Because Mr. Macaulay's micro-special benefit
40
41
42
43
44
45
46
47

1 percentages fall far below that 5% margin, “there is no way of authenticating” such
2 incremental changes because “[m]arket forces completely obliterate any tiny little noise
3 factor like that.” *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed
4 during his deposition that 0.25% is too small to measure. Macaulay Depo. at 25:17-25.
5
6 Additionally, the fact that “Before” values are also based on a hypothetical that adds some
7
8 unstated incremental value to actual 2019 values exacerbates this issue—the ability for an
9
10 appraiser to discern the micro-value differences between hypothetical conditions that are so
11
12 similar (the WSDOT improvements compared to the LID improvements) “verges on being
13
14 ludicrous.” 3/3/2020 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
15
16

17
18 36. Even if it were possible to accurately tease out such a miniscule hypothetical
19
20 value change due to improvements coming five years later, experts testified that there is no
21
22 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
23
24 what he felt the changes (hypothetically) would be. *See* 3/12/2020 (P. Shorett) Hrg. Tr. at
25
26 49:4-50:1; 3/3/2020 (A. Gibbons) Hrg. Tr. at 88:21-88:24 (“you cannot measure one percent
27
28 difference in a high-rise building for this kind of a medium ... it’s simply assigned to a
29
30 before value”). For these reasons, Taxpayer appeals the following portions of the
31
32 Examiner’s Recommendation: II.27 and IV.B.4.
33

34
35 37. No analysis of value increase attributable to individual components of the
36
37 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
38
39 percentage difference between hypothetical Before and After conditions. Throughout his
40
41 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
42
43 descriptions in the Addenda even though he testified that he relied on these to calculate
44
45 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
46
47 someone might be able to determine how he attributed value to After conditions described in

1 the Addenda, he answered that that was “not the scope of the assignment” because he was
2 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
3 that the six components were not actually a continuous project, that he was viewing them
4 together because the City asked him to, and that if he were to view them independently,
5 there was a low probability that properties in the north would specially benefit from
6 improvements in the south and vice versa. See 6/25/2020 Hrg. Tr. at 27:18-28:5.
7
8
9
10
11

12 38. Not only did he fail to analyze benefits from each of these non-contiguous
13 improvements, his familiarity with descriptions as whole was tenuous at best. See, e.g.,
14 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
15 arose from specific Before/After descriptions in the Addenda); cf. *Anderson v. City of*
16 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
17 objectives that guided regulators’ assessment of architectural plans for buildings along a
18 “signature street” were so vague that they amounted to ad hoc review based on the
19 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
20 even though he used the renderings as “visual aid[s] in appraising the property in the before
21 and after” to “visually see what the differences would be,” he could not explain what
22 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
23 when shown a rendering of a two-lane road going down to one-lane in the After condition
24 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. See RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
2 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
3 could explain the depiction of the same trees in the After condition nearly twice as tall as in
4 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
5 of the Examiner’s Recommendation: II.27 and IV.B.4.
6
7
8
9

10 39. Special assessment is not supported by comparable studies, data or reports.
11 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
12 that the LID Improvements will lead to meaningfully increased real estate values for
13 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
14 comparable sales or information from the “over twenty-five studies and reports” to arrive at
15 very precise special benefit increases for the commercial properties, including Taxpayer’s
16 property. For example, although Mr. Macaulay stated that no single report or study was
17 directly on point due to the unique nature of the LID Improvements (*see, e.g.*, 6/25/2020
18 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
19 parcel-by-parcel analysis other than to say that the studies generally provided “some
20 background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
21 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
22 similarities and differences between these improvements and the comparable parks he
23 looked at).
24
25
26
27
28
29
30
31
32
33
34
35
36
37

38 40. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
39 assignment of incremental increase of 0.5% to 4% to property values within the LID.
40 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
41 research misinterprets his work in critical ways, including because the LID Improvements
42 manifest the characteristics of a parkway (not a park), and his research indicates that most of
43
44
45
46
47

1 a *park*'s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
2 in Seattle). *See* Hrg. Exhibit 94 (Crompton's report). Further, updated research shows park-
3 related value increases are in fact smaller; that estimated increases are "best guesses" rather
4 than predictions of property value increases in a particular city; and that percentages do not
5 account for diminishing returns after taking into account water views, which would be the
6 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
7 topography grants most properties in downtown a water view.
8
9

10
11
12
13
14
15 41. Rather than addressing Dr. Crompton's critiques, Mr. Macaulay simply states
16 that this was just one source of information that was not entirely relevant because, among
17 other things, Dr. Crompton's research dealt with parks and not streetscapes. However, Dr.
18 Crompton's critiques were based on Mr. Macaulay's own testimony that the core "park"
19 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
20 180:2 (explaining that for purposes of "drawing boundaries around a park" he was
21 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
22 Crompton concluded that 500 feet via road from "park" improvements is just one or two
23 Seattle blocks and that Mr. Macaulay "inappropriately extend[ed] the LID impact
24 significantly beyond that which the park study indicated (even if it was legitimate to use the
25 park review's findings)." Hrg. Exhibit 94 (Crompton's Report) at 7. Indeed, the LID area
26 extends even past 2,000 feet from the core "park" improvements, which is the outer limit of
27 impact applicable to "community parks"—which the LID Improvements are not. *Id.*
28 Taxpayer's property is not within 500 road network feet from the "park" improvements. *See*
29 Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.
30
31

33
34
35
36
37
38
39
40
41
42
43

44 42. Further, Mr. Macaulay's testimony that he analyzed streetscapes, parkways,
45 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
46
47

1 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
2 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
3 materials, it was clearly an important—if not *the* most important—source of information for
4 estimating special benefits (especially with respect to the condos).⁷ No City witness
5 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
6 parcel-by-parcel analysis.
7

8
9
10
11
12 43. The destination parks discussed in the Final Special Benefit Study do not
13 provide reliable, comparable, and valid support for the calculation of special assessments
14 here. *See* Shorett Appraisal Review (attached to Appeal Petition) at 15-19 (Shorett’s
15 critique of every case study cited concludes the changes to those “dwarf the difference
16 between the before-after condition of the property with LID”); Gibbons 5/2/2018 Letter at 4;
17 Hrg. Exhibit 49 (P. Shorett’s Supplemental Report); 3/11/2020 (P. Shorett) Hrg. Tr. at
18 208:8-24; 3/12/2020 (P. Shorett) Hrg. Tr. at 6:19-7:18; Second Decl. of Shorett ISO Closing
19 Stmt., ¶ 5 (explaining again why the San Francisco, Boston, and Portland case studies are
20 not in fact comparable). None of the parks cited in the Final Special Benefit Study were
21 funded by a LID. And in virtually all of those cases, the park improvements dramatically
22 restored unimproved or blighted areas, and properties evaluated were within two or three
23 blocks of the park.
24
25
26
27
28
29
30
31
32
33
34
35

36 44. ABS’s claimed reliance on three economic studies to support property value
37 increase is also flawed. The HR&A study does not inform what value increases are
38
39
40
41

42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 expected from the LID Improvements because it projects increases to tourism from *all* of the
2 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
3 dissimilar parks in other cities,⁸ making the methodological application to the LID
4 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
5 conclusion that there would be *no new net visitors* from downtown residents as a result of
6 the LID Improvements and could not explain how this impacted his condo analysis.
7
8 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
9 Property Values" primarily focused on whether the benefits accrue to the larger community
10 rather than properties adjacent to the park. And the 2014 New York City Department of
11 Transportation study is not based on real estate transactions and market sales and fails to
12 substantiate any link between increased retail sales and property values. Moreover, this
13 study only looked at impact either directly abutting the streetscape improvement, or a couple
14 hundred feet for plaza-like improvements.
15

16
17 45. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
18 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
19 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
20 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
21 compared with HR&A's estimate of \$191 million for just the waterfront improvements, and
22 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
23 asked whether he considered that HR&A's estimated LID impact is six times greater than
24
25

26
27
28
29
30
31

33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated expected tourists visiting the LID park was calculated using data from only from New York City, a notorious tourist destination.

1 TLP's assessment of Seattle's entire park system, he surmised that it was because the
2 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
3 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
4 assumptions to account for this difference, which may be partly explained by the fact that
5 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
6 approximately 3.44% of King County tourists visit Seattle primarily because of the city
7 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
8 waterfront improvements.

16 46. Although proximity to the improvements is a key factor in all of these
17 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
18 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
19 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
20 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
21 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
22 Improvements is approximate 20 acres and it is not a community park.⁹

30 47. There is no explanation in the Final Study or the supporting materials of how
31 the studies or comparable sales were used to derive values for Taxpayer's property. For
32 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
33 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.

38 48. Failure to comply with USPAP. Taxpayer's assessment also rests on a
39 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
40

43 ⁹ *See*
44 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
45 connecting Seattle's central waterfront to downtown.").

1 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
2 recognized) for developing the MAI standards for mass appraisals, testified that the Final
3 Study does not meet mass appraisal standards nor allow for independent assessment of the
4 accuracy of Mr. Macauley's conclusions.
5
6

7
8
9 49. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
10 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
11 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
12 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
13 testimony suggests that he incorrectly believed that the only difference between direct
14 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
15 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
16 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
17 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
18 Gordon uses in doing his limited restricted report").
19
20

21
22
23 50. But the difference is not only in reporting—mass appraisal techniques must
24 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
25 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
26 parcel approach:
27

28
29
30
31
32
33
34
35
36
37 The mass appraisal technique is an appraisal method used to evaluate
38 a group of properties that are subject to similar market forces as of a
39 certain date through the use of market data, statistical analysis and
40 testing. As a result, the mass appraisal technique does not require or
41 involve analysis of each individual property's specific data.
42

43 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
44
45
46
47

1 51. Indeed, USPAP’s definition for “mass appraisal” is “the process of valuing a
2 universe of properties as a given date using standard methodology, employing common data,
3 and allowing for statistical testing.” Appraisal Foundation, Uniform Standards of
4 Professional Appraisal Practice at 5 (2020-2021). And the definition for “mass appraisal
5 model” is “a mathematical expression of how supply and demand factors interact in a
6 market.” *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
7 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
8 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
9

10 52. Regardless of client direction, Mr. Macaulay is required to comply with
11 USPAP. So if, as he determined, a “[p]arcel-by-parcel direct appraisal” would not have been
12 economically feasible because it would have taken “an incredible amount of time and cost”
13 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
14 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 (“performing an
15 individual appraisal of each [condo] parcel would have been cost and time prohibitive”).
16

17 53. But Mr. Macaulay’s methods fail to comply with USPAP Standards 5 and 6
18 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
19 value, fails to calibrate the model structure to determine the contribution of the individual
20 characteristics affecting value, and does not review the mass appraisal results against actual
21 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
22 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
23

24 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
25 relationship between characteristics that affect value, and to calibrate that model to specify how
26 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
27 21). The purpose is to rationally determine what characteristics will create value, and by how much.
28 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
29 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
30

1 54. Mr. Macaulay explained that factors like “aesthetic change in the area, the
2 proximity to the elements, the increase in market rent, market vacancy changes,
3 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
4 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
5 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
6 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
7 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
8 internal review process. *Id.* at 104:24-105:20. And because both the Before and After
9 values were hypothetical, it was not possible to identify matched pair sales and no City
10 witness explained how ABS Valuation made adjustments to “comparable” sales in order to
11 check their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which
12 requires him to explain his model structure.
13
14

15 55. For these reasons, Taxpayer appeals the following portions of the Examiner’s
16 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
17 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
18 and appeals the Examiner’s denial of that motion.
19
20

21 56. Finally, Taxpayer’s property is not appurtenant—or even in close
22 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
23 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
24
25

26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
42 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
43 include explanation of the model specification, data requirements, calibration methods, and
44 mathematical form of the final model. *See USPAP Standard 6: Mass Appraisal, Reporting* at 6-2(i)-
45 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
46 appraiser determined value, and this omission renders the report not credible. *See 3/3/2020 (R. Scott)*
47 Hrg. Tr. at 206:15-207:17.

1 close proximity to the property on which expert testimony was given”). Indeed, Taxpayer’s
2 property is not even within 500 road network feet from the core “park” improvements. And,
3 as described above, the special assessment is overstated because the Final Study makes no
4 attempt to determine general benefits, existing amenities for Taxpayer’s specific property, or
5 special detriments. In addition, it is speculative due to the fact that, as of October 2019,
6 improvements were not in in place—and, in fact, much of the waterfront is a construction
7 zone following removal of the viaduct and now Pier 58 demolition. Under these
8 circumstances, rather than relying on entirely imaginary income and shaky hypotheticals,
9 Mr. Macaulay at the very least should have discounted the special benefit estimates or
10 waited to perform the Study until the improvements were at least close to complete.
11

12 **Erroneous Pre-Improvement Valuation**

13 57. The proposed final assessment erroneously overstates the pre-improvement
14 value of Taxpayer’s property as of October 1, 2019 and, as a result, overstates the special
15 benefit to the Taxpayer’s property.
16

17 58. The City’s Final Study was used to compute the proposed final assessment of
18 Taxpayer’s property. The City’s Study purportedly uses data from the King County
19 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
20 Study does not accurately reflect this data. For example, the City’s Study values United
21 Way of King County’s property at \$24,019,000 as of October 1, 2019. However, the King
22 County assessor determined the true and fair value of the property to be \$20,325,900, valued
23 in 2019 for tax year 2020. In other words, the Final Special Benefit Study’s valuation is
24

25 ¹¹ See, e.g., Final Special Benefit Study, “All Other LID Commercial Properties” Spreadsheet
26 (providing a “County Link” to the King County Department of Assessment’s online “eReal
27 Property” search tool).
28

1 118% of King County's assessed value. The Final Special Benefit Study does not explain
2 this difference—or any differences—between its pre-improvement valuation and its
3 supposed source for market data. For this reason, Taxpayer appeals Section IV.C.11 of the
4 Examiner's Recommendation.
5
6
7

8 59. Further, the City's analysis was based on unreliable market data. Testimony
9 presented by Taxpayer showed that the building is encumbered by development restrictions
10 that were not considered by Mr. Macaulay when conducting the final benefit study and
11 appraisal. Mr. Macaulay has since conceded that his valuations were incorrect and the City
12 submitted a revised assessment for this property. *See* 6/23/2020 Hrg. Tr. at 7:7-18.
13 However, thus far Taxpayer has not seen or received any information supporting or
14 otherwise explaining the revised assessment amount.
15
16
17
18
19
20
21

22 60. Taxpayer expects an opportunity to respond to the revised (*see* Examiner's
23 Recommendation at V) and appeals the remainder of the Examiner's Recommendation to
24 the extent it rejects Taxpayer's other bases for reducing the assessment.
25
26
27
28

29 **Erroneous Computation of Special Benefit**

30 61. "Special benefit" is "the increase in fair market value attributable to the local
31 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
32 may receive by reason of the improvement is not measured alone by the physical character
33 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
34 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). "The question is: To what extent is
35 the particular tract or property benefited by the entire improvement, and is it assessed
36 proportionately with the other property included within the assessment district?" *Id.* 165–
37
38
39
40
41
42
43
44
45 66.
46
47

1 62. The proposed final assessment erroneously overstates the special benefit of
2 LID improvements in a number of ways.
3

4 63. Spreadsheets show arbitrary assignment of special benefit. For the United
5 Way building, Mr. Macaulay assumed land value would increase by \$25.50 per square foot.
6 This is an increase of 1.5% due to the LID Improvements.
7
8

9 64. Mr. Macaulay offered little justification for his micro adjustment. There is
10 nothing in the report to allow a reader to understand how he came up with these percentages.
11 6/23/2020 Hrg. Tr. at 112:24-113:3. And there is no model or equation that he relied on—
12 again, just his “judgment.” *Id.* at 113:4-6. Although Mr. Macaulay claims that the
13 spreadsheets explain the basis for his belief that certain factors—liked increased
14 connectivity—will increase property values (*id.* at 50:7-25), he could not explain how he
15 went from general principles to very specific percentage adjustments in the spreadsheets. *Id.*
16 at 115:10-24. Thus, he has not rebutted Taxpayer’s expert’s conclusion that the adjustments
17 are arbitrary and fall below generally accepted margins of error, and that there is no actual,
18 measurable, non-speculative special benefit to Taxpayer’s properties. *See* 3/12/2020 Hrg.
19 Tr. (P. Shorett) at 49:4-50:4.
20
21

22 65. Mr. Macaulay testified that he used comparable sales as a reasonableness
23 check for commercial properties. But as explained above, no City witness has explained
24 how anyone, or all, of the sales are comparable to any particular commercial property within
25 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
26 in order to make sales “comparable,” he would have had to make adjustments to account for
27 Before and After conditions, but there is no way to understand how adjustments were made
28 because he “didn’t do a separate sales comparison approach where we showed adjustments
29 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”

2
3 *Id.* at 127:10-128:24.

4
5 66. It also bears noting that any “internal review” of the special benefit estimates
6
7 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
8
9 error. Indeed, given all the same information, he seemed to suggest that it would be
10
11 perfectly reasonable for another experienced appraiser to come up with special benefit
12
13 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
14
15 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
16
17 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
18
19 margin of error conflicts with the testimony of Taxpayer’s experts and reaffirms that there
20
21 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
22
23 margin of error (5%) is a “rule of thumb” and not a “hard legal standard,” there are still
24
25 reasonable and unreasonable variations within the appraisal field. *See Examiner’s*
26
27 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
28
29 special because it is arbitrarily assigned; and it is too small to realistically be supported by
30
31 appraisal techniques.

32
33 67. No evidence of special benefit. Meanwhile, there is “no actual evidence from
34
35 any seller or purchaser that the price was higher because of the LID improvements.”
36
37 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City’s appraiser “has not
38
39 identified any seller or buyer, or any particular property where the existence of the LID
40
41 improvements had an effect on the market price.” *Id.* at 410-11. Taxpayer has explained
42
43 that the property has not increased rental rates due to the forthcoming LID Improvements,
44
45 because, among other reasons, the improvements ABS believes will generate value do not
46
47 exist, and will not for a number of years to come. There are no comparable sales because

1 the LID Improvements are not in place, nor will they be until the end of 2024 if completed
2 on schedule.
3

4
5 68. The fair market value of Taxpayer's property has not changed due to
6 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
7 benefited from installation of new water main and fire hydrant where it was already
8 adequately supplied with water and afforded adequate fire protection). And in any event,
9 any value attributable to removal of the viaduct was to be excluded from the assessment
10 calculation.
11

12
13 69. There is no special benefit because LID improvements may in fact diminish
14 the value of Taxpayer's property by, for example, limiting vehicle access to the building and
15 decreasing parking availability. *See Kusky*, 85 Wn. App. 493 (testimony of owners' expert
16 that LID actually diminished value of property was sufficient to rebut presumption that
17 assessment was proper).
18

19
20 70. Moreover, the assessment formula is an attempt to distribute costs that do not
21 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
22 "merely a mathematical model that distributes costs").
23

24
25 71. The Special Benefit Study fails to address whether the \$346,000,000
26 estimated LID project cost takes into account the investment that would have occurred in the
27 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
28 invested. This is a critical component of estimating which properties receive a direct benefit
29 from the improvements, versus more incidental benefits further from the park.
30

31
32 72. The proposed revised final assessment substantially still exceeds the special
33 benefit to the property and is grossly disproportionate to similarly situated properties within
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 the LID. For these reasons, Taxpayer appeals the following portions of the Examiner's
2
3 Recommendation: Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).

4
5 **State Environmental Policy Act and Other Environmental Permitting**

6
7 73. While this appeal is not challenging the City's environmental review and
8
9 permitting processes, those processes are relevant in determining the legality of the
10
11 assessments, and to assessing the delivery risk, the present value of the City's plans, and
12
13 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
14
15 pursue projects that have not yet undergone environmental review (thus limiting the choice
16
17 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
18
19 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
20
21 is just beginning. Further, the City has segmented environmental review, and still has a
22
23 gauntlet of federal, state and tribal review processes to complete before it will be clear what
24
25 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
26
27 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
28
29 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
30
31 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
32
33 committing to reconstruction of Pier 58 and major street improvements without
34
35 environmental review, or the City's Final Special Study has improperly included and is
36
37 proposing to assess the Taxpayer the costs and special benefits of improvements that may
38
39 not get built. Either way, it is faulty process.

40
41 **Due Process Rights**

42
43 74. The City's failed to notify Taxpayer sufficiently in advance of the hearing to
44
45 allow Taxpayer to obtain evidence and prepare to properly challenge the assessments.
46
47 Because LID assessments involve a deprivation of property, affected owners have the right

1 to a hearing as to whether the improvement resulted (or will result) in special benefits to
2 their properties and whether their assessments are proportionate, which necessarily includes
3 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
4 555, 569–70, 229 P.3d 761 (2010).
5
6
7

8 75. The LID statute specifies that cities must mail notices giving the time and
9 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
10 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
11 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
12 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
13 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
14 secure their own appraisal), evaluate proportionality of the proposed assessments, and
15 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
16 for anybody to get an appraisal”).
17
18
19
20
21
22
23
24
25

26 76. The City’s Notice of Assessment was sent on December 30, 2019. And the
27 Final Special Benefit Study has only been available for public review since January 7, 2020.
28 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
29 order that would preserve and protect Taxpayer’s right to analyze and respond to the Final
30 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
31 preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City’s
32 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
33 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
34 the Examiner’s Recommendation: I.B.
35
36
37
38
39
40
41
42
43
44

45 **VII. Relief Requested**

46 Taxpayer respectfully requests that the City Council:
47

- 1 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
2 assessment dated December 30, 2019; or
3
- 4 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751 proposed final
5 assessment to \$0 (zero), or such amount as Taxpayer establishes at the hearing in this
6 matter; or
7
- 8 3. Grant the Examiner's recommended remand but with instructions recalculate and
9 reduce Taxpayer's assessment using recognized appraisal techniques consistent with
10 USPAP and:
11
 - 12 a. Excluding any property value increase attributable to viaduct removal and
13 other planned WSDOT Improvements;
14
 - 15 b. Taking into account the effects of the COVID-19 pandemic on the value of
16 Taxpayer's property and other relevant developments since October 2019;
17
 - 18 c. Accounting for and excluding (1) any special benefits from existing or
19 planned improvements that already provide similar benefits to Taxpayer's
20 property, and (2) any special detriments from construction and other
21 anticipated LID-related disamenities;
22
 - 23 d. Accounting for and including only those actual benefits anticipated to accrue
24 to Taxpayer's property based on its location relative to Pier 58, Overlook
25 Walk, and the Promenade, and specific elements of the LID Improvements;
26
 - 27 e. Discounting anticipated special benefits to present value, based on reliable
28 estimates regarding when special benefits will start accruing following
29 completion of the LID Improvements; and
30
 - 31 f. Accounting for such other issues specific to Taxpayer's property relevant to
32 calculation of such assessment; and
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 3. Grant such further relief as the City Council deems just and proper.
2

Telephone: 206.359.8000
Facsimile: 206.359.9000

20
21 **III. Statement of Taxpayer's Interest and Incorporation of Prior Arguments**

22 United Way of King County owns the property that is subject to the proposed final
23 assessment described in Section IV.
24

25
26 Taxpayer is amending its appeal as authorized in City of Seattle Resolution 31979 to
27 include additional arguments relevant to the revised Final Recommendations of the Hearing
28 Examiner issued on February 1, 2021. On February 4, 2020, Taxpayer timely filed an
29 objection to the assessment, which was based on the Final Study. Taxpayer further timely
30 filed an appeal of the Hearing Examiner's 2020 recommendations to the City Council.
31
32 Taxpayer maintains and incorporates all objections and arguments raised in its appeal filed
33 with the City Clerk on September 22, 2020. This amendment is a supplement and is to be
34 read together with Taxpayer's appeal filed on September 22, 2020. Taxpayer incorporates
35 by reference all filings, evidence, and pleadings filed by any party before the Hearing
36 Examiner as authorized by the Hearing Examiner, including without limitation all records
37
38
39
40
41
42
43
44
45
46
47

1 pertaining to the November 2020 through February 2021 remand hearing ordered by
2 Council.
3

4
5 **IV. Amended Arguments on Appeal**

6 United Way of King County supplements its appeal of the Hearing Examiner's
7 recommendation to deny Taxpayer's objection to the City of Seattle's Waterfront Local
8 Improvement District No. 6751 proposed final assessment dated December 30, 2019 against
9 the following property:
10
11
12
13

14 King County Parcel No. 0939000240
15 Site Address: 720 2nd Ave., Seattle, Washington 98104
16 Proposed Final LID Assessment for Parcel: \$139,097
17 Revised Final LID Assessment for Parcel: \$81,928
18

19 To avoid repetition, Taxpayer incorporates the evidence and arguments raised before
20 the Hearing Examiner and before the City in its September 22, 2020 appeal, into this
21 amended appeal.
22
23
24

25
26 **A. The Anticipated Special Benefits to Taxpayer's Property should be**
27 **Discounted to Present Value and Assessments Adjusted as Appropriate**
28

29 On remand, the City's appraiser acknowledged that special benefits to parcels can be
30 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
31 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
32 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
33 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
34 the theatre parcel is too remote to support a current assessment. *Id.* The Examiner accepted
35 that recommendation. The City's appraiser further acknowledged that benefit reductions
36 due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined by
37 discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
38 (benefits to theatre "would be a long enough time out to where it wouldn't measurably affect
39
40
41
42
43
44
45
46
47

1 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
2
3 calculations to present value because the general benefits are not anticipated from the LID
4
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6
7 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
8
9 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
10
11 benefit calculation, and related assessments, to account for the delay between the assessment
12
13 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
14
15 standard appraisal practice, and renders the other proposed Waterfront LID special
16
17 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
18
19 “fundamentally wrong methods.”

20
21 All special benefit taxes assessed by a municipality must be based on “actual,
22
23 physical and material [special benefits that are] not merely speculative or conjectural.”
24
25 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
26
27 Additionally, the assessments may not materially exceed the actual special benefit conferred
28
29 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
30
31 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
32
33 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
34
35 discount benefits the City estimated would accrue to the properties from improvements to be
36
37 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
38
39 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
40
41 property while treating all or most others (including Taxpayer’s) differently, and
42
43 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
44
45 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
46
47 for some properties because the benefit are too distant, while assessing other properties as

1 though distant benefits have already been secured. As Taxpayer identified in its September
2
3 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
4
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6
7 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
8
9 reject the improper calculation of the benefit or remand and require the appraiser to discount
10
11 the benefits to net present value.
12

13 **B. In Light of Covid's Continuing Impact on United Way and other**
14 **Material Changes Since October 2019, the LID Should be Cancelled, or**
15 **at Least Assessments Recalculated, to take Into Account Property Value**
16 **Reductions**

17
18 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
19
20 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
21
22 other relevant developments since October 2019." When Washington's first COVID
23
24 restrictions were imposed in March and April 2020, there was an assumption that they
25
26 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
27
28 II" but many of the City's businesses and its citizens are still struggling through the
29
30 difficulties of the pandemic. In current circumstances, a downtown tax to fund new, non-
31
32 essential park improvements against United Way of King County will impose additional
33
34 burdens on the organization which is dedicated towards fighting homelessness, helping
35
36 students, and breaking the cycle of poverty. Instead, United Way of King County
37
38 respectfully requests that the City dissolve the assessment, at least until it (and property
39
40 owners) have a chance to recover, and that any assessment take into account the changed
41
42 circumstances since this appeal process started on February 4, 2020.
43
44
45
46
47

1 **V. Relief Requested**

2 Particularly in light of the Committee's decision not to take further comment from
3 appellants, Taxpayer respectfully request that each Committee member carefully review the
4 full record transmitted to Council before voting on Taxpayer's appeal.
5
6

7 United Way of King County respectfully reiterates its request from the September
8
9 22, 2020 appeal that the City Council:
10

- 11 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
12 assessment dated December 30, 2019; or
13
- 14 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751 proposed final
15 assessment to \$0 (zero), or such amount as Taxpayer establishes at the hearing in this
16 matter; or
17
- 18 3. Grant the Examiner's recommended reduction on remand but reduce Taxpayer's
19 assessment using recognized appraisal techniques consistent with USPAP and:
20
21
 - 22 a. Excluding any property value increase attributable to viaduct removal and
23 other planned WSDOT Improvements;
24
 - 25 b. Taking into account the effects of the COVID-19 pandemic on the value of
26 Taxpayer's property and other relevant developments since October 2019;
27
 - 28 c. Accounting for and excluding (1) any special benefits from existing or
29 planned improvements that already provide similar benefits to Taxpayer's
30 property, and (2) any special detriments from construction and other
31 anticipated LID-related disamenities;
32
 - 33 d. Accounting for and including only those actual benefits anticipated to accrue
34 to Taxpayer's property based on its location relative to Pier 58, Overlook
35 Walk, and the Promenade, and specific elements of the LID Improvements;
36
37
38
39
40
41
42
43
44
45
46
47

- 1 e. Discounting anticipated special benefits to present value, based on reliable
2 estimates regarding when special benefits will start accruing following
3 completion of the LID Improvements; and
4
5
6 f. Accounting for such other issues specific to Taxpayer's property relevant to
7 calculation of such assessment; and
8
9
10
11 4. Grant such further relief as the City Council deems just and proper.

NOTICE OF APPEAL OF HEARING
EXAMINER’S FINDINGS AND
RECOMMENDATION ON MADISON
HOTEL LLC’S OBJECTION TO
WATERFRONT LID NO. 6751 PROPOSED
FINAL ASSESSMENT FOR PARCEL NO.
0942000430

33
34 Madison Hotel LLC (“Taxpayer”) files this appeal pursuant to RCW 35.44.070,
35
36 Seattle Municipal Code 20.04.090, City of Seattle Resolution 31915, the notice of the
37
38 Seattle Office of the City Clerk dated December 30, 2019, and the Hearing Examiner’s
39
40 Findings and Recommendation issued September 8, 2020 (“Examiner’s Recommendation”).
41

42 **I. Taxpayer / Appellant**

27
28

29
30 **III. Statement of Taxpayer's Interest**
31

32 Madison Hotel LLC is the taxpayer for the property that is subject to the proposed
33 final assessment described in Section IV. This property is the Renaissance Hotel Seattle, a
34 28-story hotel containing 557 guest rooms and 26,781 square feet of meeting space.
35

36 The basis of the proposed assessment is a Final Special Benefit/Proportionate
37 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
38 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
39 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
40 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
41
42
43
44
45
46
47

1 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
2
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4
5 to exclude charges for other improvement projects in the Central Waterfront, and
6
7 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
8
9 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
10
11 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
12
13 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
14
15 because construction was not complete on the LID Improvements or the WSDOT
16
17 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
18
19 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
20
21 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
22
23 was based on the Final Study.

24 25 **IV. Matter Under Appeal**

26 Taxpayer appeals the Hearing Examiner’s recommendation to remand Taxpayer’s
27
28 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
29
30 final assessment dated December 30, 2019 against the following property:

31
32
33 King County Parcel No. 0942000430
34 Site Address: 515 Madison St., Seattle, Washington
35 Proposed Final LID Assessment for Parcel: \$445,110

36
37 See Examiner’s Recommendation at 61-62, 104. To avoid repetition, Taxpayer incorporates
38
39 the evidence and arguments raised before the Hearing Examiner into this appeal. In
40
41 particular, Taxpayer points the City Council to Taxpayer’s initial Appeal Petition, *Frye*
42
43 motion, Closing Brief submitted at the close of its case-in-chief (dated 4/16/2020), and
44
45
46
47

1 supplemental Closing Statement submitted at the close of the City's case-in-chief (dated
2 7/7/2020).¹
3

4
5 As discussed more fully below, Taxpayer specifically appeals the following Findings
6 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
7
8 Pages 61-62, 104, Sections II.6, II.7, II.12, II.14, II.16, II.17, II.18, II.19, II.20, II.21, II.22,
9 II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2,
10 IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i),
11 IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.2, IV.C.3, IV.C.4, IV.C.5,
12 IV.C.8, IV.C.10, IV.C.11, IV.C.12, IV.C.14, and IV.C.18.
13
14

15 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
16 recommendations on material issues raised during Taxpayer's appeal that were supported by
17 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
18 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
19 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
20 recommended anything other than denial of objectors' appeals were where the City's
21 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
22 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
23 special assessments based on "fundamentally wrong methods."
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38

39
40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$1,136,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
5 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS’s appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City’s appraiser asserts that the City is not collecting assessments “based
16 on the value of WSDOT’s planned improvements.” See Final Study at 3. However, the
17 City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition,
18 the City’s appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City’s promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT’s planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City’s appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be “physical and material and not merely speculative
35 or conjectural”
36

37
38 **ABS Study:** Not only are the improvements not yet “physical or material,” but
39 environmental review and permitting for the City’s proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City’s then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** LID assessments reflect special benefits and must be proportionate
47

1 **ABS Study:** The City's appraiser proposes to assess against the value of hotel personal
2 property (furniture, fixtures and equipment), but not personal property of other types of
3 property. It is not proportionate to assess against hotel personal property and not other
4 personal property. Further, personal property is moveable, the value does not depend on
5 location, and is likely to be fully depreciated and perhaps removed before the LID
6 Improvements are in place. (Note also that personal property accounts are separate, and
7 the City gave no notice of any LID assessment against personal property. The Examiner
8 should have reversed personal property assessments on that basis as well.)
9

10
11 **Legal Requirement:** Must comply with appraisal standards
12

13 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
14 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
15 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
16 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
17 Final Study fails to meet basic standards for admissibility and must be remanded.
18
19

20 **Legal Requirement:** Actual and measurable special benefit
21

22 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
23 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
24 on a host of "micro-judgments" that are not supported by any documentation, nor capable
25 of replication or quality assurance/quality control. The assessments are undocumented,
26 unreliable, and not supported by empirical studies, data, or reports.
27
28

29 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
30 supported by empirical evidence
31

32 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
33 value of parks and other public amenities and on whom ABS purported to rely, testified
34 that ABS had completely misapplied his work and dramatically overstated both the
35 distance to which economic benefits might extend from the LID Improvements and the
36 extent of any anticipated benefit within the potentially benefited area.
37
38
39

40 **Legal Requirement:** Actual special benefit—Must take into account potential
41 disamenities
42

43 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
44 construction, as well as other potential disamenities associated with public places.
45
46
47

1 **Legal Requirement:** Cannot prematurely commit to build

2
3 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
4 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
5 are being imposed. But finalizing the roll is a commitment by the City to build the
6 improvements, which is a violation of legal process and commits the City to build things it
7 may not secure permission to build.
8
9

10
11 In addition to these general objections, there are property-specific issues raised by
12 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
13 statement below.
14
15

16
17 **V. Standard of Review**

18
19 “When considering the assessment roll, the city council sits ‘as a board of
20 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
21 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
22 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
23 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
24
25

26
27 The proposed assessments are presumed correct, “unless overcome by clear, cogent
28 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
29 than the heightened presumption of correctness on judicial appeal because “applying these
30 elevated standards at the municipal hearing would afford unwarranted deference to a report
31 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
32 presumption is not evidence and its efficacy is lost when the other party adduces credible
33 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
34 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
35 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
36 presented credible evidence showing that the City’s proposed assessment is arbitrary,
37
38
39
40
41
42
43
44
45
46
47

1 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
2 to the City to prove the assessments are actual, measurable, special, non-speculative and
3 proportionate. The City failed that burden.
4

5 **VI. Grounds for Appeal**

6 Taxpayer appeals the Hearing Examiner's Findings and Recommendations on the
7 following grounds.
8

9 **Taxpayer Not Required to Provide A Special Benefit Study**

10 1. Contrary to the Examiner's findings and recommendations, there is no
11 requirement that experts or property owners provide an alternative special benefit
12 calculation under these circumstances—to do so would also require the same improper
13 speculation the City's expert engaged in, given the timing and information provided. *See*,
14 *e.g.*, Second Decl. of Peter Shorett ISO Closing Stmt., ¶¶ 3-4 (dated 7/7/2020); Decl. of
15 Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has
16 explained: "[W]e have explicitly rejected an argument that, because certain protestors 'failed
17 to offer expert testimony at the city council hearing[,] the presumptions [in favor of the
18 assessment] were still operative as to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting
19 *In re Indian Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*,
20 85 Wn. App. 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he
21 provided expert opinion showing that improvements actually diminished value of the
22 property). In fact, no independent evidence is required at all if, for example, objectors show
23 that the assessment was grounded on a fundamentally wrong basis due to an error in the
24 City's appraiser's methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
25 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
26 a property owner could simply point out that the square footage assumed in the City's
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 appraisal was incorrect. For these reasons, Taxpayer appeals the following portions of the
2 Examiner's Recommendation: Sections II.12, II.14, II.17, IV.A, IV.B.11(a), IV.C.2, IV.C.8,
3 and IV.C.11.
4

5
6
7 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**
8

9 2. RCW 35.43.040 provides cities and towns authority for ordering local
10 improvements and for levying and collecting special assessments "on property specially
11 benefited thereby[.]" The cost and expense of the local improvement "shall be assessed
12 upon all the property in accordance with the special benefits conferred thereon." RCW
13 35.44.010.
14
15

16
17
18 3. No analysis of general benefits. Special assessments have been "held valid
19 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
20 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
21 mains." *Heavens*, 66 Wn. 2d at 563. "All such assessments have one common element:
22 they are for the construction of local improvements that are appurtenant to specific land and
23 bring a benefit substantially more intense than is yielded to the rest of the municipality." *Id.*
24
25

26
27 4. Taxpayer's property is not specially benefited by the LID Improvements.
28 The primary purpose and effect of the LID Improvements are to benefit "members of the
29 whole community" and the public at large. *See, e.g., id.* at 565 ("it is plain that a public
30 library is for the benefit of the members of the whole community individually and
31 collectively who may be served by it"). Mr. Macaulay's own chapter of the LID Manual
32 states clearly that appraisers should "[c]onsider general benefits as well as special benefits"
33 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that "general benefits probably accrue
34
35
36
37
38
39
40
41
42
43
44

45
46 ² "Hrg. Exhibits" refer to exhibits that were submitted on behalf of multiple objectors
47 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil

1 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
2 that if an appraiser “identifies both general and special benefits, these benefits should be
3 clearly distinguished and explained, and only special benefits should be included in the
4 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
5 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/11/2020 (P. Shorett) Hrg. Tr. at 182:14-
6 183:4; *See* P. Shorett January 30, 2020 Appraisal Review (attached to Appeal Petition) at
7 Attachment p. 15 (explaining the examples in the Final Study only provide information
8 about general benefits and Study does not use proper measure of analysis to show special
9 benefits).

10
11
12
13
14
15
16
17
18
19 5. It is undisputed that Mr. Macaulay did not analyze or measure general
20 benefits, including those arising from construction necessary to meet basic design standards.
21 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
22 construction costs related to meeting design standards which may be general benefits as
23 distinct from construction costs emanating from requirements of the LID project”). To the
24 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
25 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
26 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
27 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.
28
29
30
31
32
33
34
35

36
37 6. LID Improvements not necessary. Unlike typical LID projects, the
38 Waterfront LID improvements are largely unnecessary to the functionality of any particular
39 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
40
41
42

43
44
45
46
47

 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
 Taxpayer has attached a master list of the hearing exhibits and evidence presented as Attachment A
 to this appeal notice.

1 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
2 held invalid where owners would have benefitted equally from increase of only 9 feet);
3
4 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
5
6 intersection for new water main for hydrant held invalid because land was already afforded
7
8 functional hydrant at nearby street). Here, Taxpayer testified that the LID Improvements are
9
10 not necessary to their hotel business, which caters primarily to business travelers attending
11
12 conventions and meetings and visiting Seattle companies. Hrg. Exhibit 114 (Decl. of Z.
13
14 Ahmed) at ¶¶ 31, 38, 39. For this reason, the Renaissance Hotel does not expect the LID
15
16 Improvements to increase impact on demand for rooms or room rates. *Id.*

17
18 7. The fact that there is no case law differentiating between binary
19
20 improvements and parks does not change the law prohibiting assessments on properties
21
22 already adequately served by existing amenities. *See* Examiner's Recommendation at
23
24 IV.C.3 (reasoning that "no case law is provided to support the differentiation between a
25
26 hardscape benefit and the more ephemeral benefits of park"). Nor does the Examiner's
27
28 reasoning excuse the City's failure to account for existing amenities as part of the special
29
30 benefit calculation. As Dr. Crompton testified, existing view amenities may in fact diminish
31
32 the incremental effect of new park improvements on the value of properties, much like
33
34 turning on a weak light in an already brightly illuminated room. *See* Hrg. Exhibit 94
35
36 (Crompton's Report) at 12-13.

37
38 8. To the extent benefits can be considered "special" as opposed to general, they
39
40 are nominal or nonexistent for many properties even in the Central Waterfront, which
41
42 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
43
44 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
45
46 change due to expansion of sewer service *near* owners' parcel which were already
47

1 connected). Even if the City could assess for a view change (and it has promised not to
2 assess for viaduct removal), the fair market value of Taxpayer's property has not changed
3 because the LID Improvements have not improved the property's waterfront view or access
4 to the waterfront, nor will they when the City anticipates completion in 2024. For these
5 reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
6
7 Sections IV.C.3, IV.B.9, and IV.C.3.
8
9

10
11
12 9. No analysis of special detriments. The Final Study fails to properly account
13 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
14 owners for removal and cleanup of underground storage tanks discovered during the
15 improvement project). Although Mr. Macaulay claims he analyzed impacts on the City's
16 planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation
17 of how lost parking might be a detriment, and no property-specific parking analysis in any
18 of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12; *see also* 6/26/2020 Hrg.
19 Tr. at 153:18-154:19 (did not actually analyze impact of decreased parking on condos).
20
21

22
23 10. Likewise, there was no analysis of the risks associated with disamenities such
24 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
25 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
26 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
27 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
28 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
29 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
30
31

32
33
34
35
36
37
38
39
40
41
42
43
44
45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
2 the maintenance agreement. *Id.* at 13:4-14:2.

3
4
5 11. There was also no consideration of negative impacts from another four-plus
6 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
7 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
8 law allowing him to dismiss these actual, non-speculative impacts. Because future special
9 benefits calculations are inherently speculative, Washington’s eminent domain statute
10 specifically allows condemnees to postpone special benefits assessments until improvements
11 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
12 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
13 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
14 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
15 Greenway, the Greenway district “significantly” lagged in value).
16

17
18 12. Meanwhile, Mr. Ahmed testified that the assessment is an immediate expense
19 for the Renaissance Hotel that comes with no immediate increase in revenue, thereby
20 decreasing property values. *See* Hrg. Exhibit 114 (Decl. of Z. Ahmed), ¶ 39. Mr. Ahmed
21 further testified that the Renaissance will receive no special benefit from the proposed
22 improvements, and in fact the property is more valuable without the proposed LID
23 improvements and the corresponding assessment. *Id.*, ¶¶ 40, 41. For these reasons,
24 Taxpayer appeals the following portions of the Examiner’s Recommendation: Sections
25 II.25, IV.B.8, and IV.B.9.
26

27
28 13. Special benefit estimate is speculative. When calculating a special benefit,
29 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
30 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 becomes pure speculation.” *Id.* (quoting *In re Local Imp. 6097*, 52 Wn.2d 330, 335–36, 324
2 P.2d 1078 (1958)).
3

4
5 14. Assuming without conceding that one day, the City’s planned LID
6
7 Improvements might increase the value of neighboring properties to some extent, that
8
9 potential benefit is many years away and speculative. While appraisers tolerate some degree
10
11 of estimation and judgment, Taxpayer’s expert testified that Mr. Macaulay’s Final Study is
12
13 far too speculative to satisfy industry practices and standards. *See. e.g.*, 3/12/2020 (P.
14
15 Shorett) Hrg. Tr. at 92:24-93:10 (it is impossible to perform a special benefit analysis with
16
17 the level of precision implied in the Final Study due to the size of the LID and use of
18
19 hypotheticals).
20

21 15. Although LIDs are sometimes finalized prior to completion of improvements,
22
23 this is typically just six month or a year prior, and the assessments are otherwise supported
24
25 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
26
27 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
28
29 will not be realized for four or five years. In the meantime, there is permitting risk,
30
31 construction risk, and general economic risk (e.g., COVID), which renders ABS’s 2019
32
33 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
34
35 and to what extent, different factors will impact value. *Id.* at 51:13-53:5; *see also* 3/11/2020
36
37 (P. Shorett) Hrg. Tr. at 196:17-21; 205:22-206:2. Ultimately, Mr. Macaulay concedes that
38
39 there is inherent uncertainty in valuing the future delivery of projects because “we can’t read
40
41 the future.” 6/23/2020 Hrg. Tr. at 79:18-80:8. As he testified: “I just don’t know what the
42
43 market value would be as of the date the project would be finally constructed” because
44
45 “[t]here could be a lot of elements in the market that did occur between now and then that
46
47 impact value.” 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.* at 211:8-20 (no way to know if

1 his estimates will be higher or lower than comparable sales in 2024 because “markets tend to
2 fluctuate over time” and “I can’t predict the future”).

3
4 16. The record is clear that while no one can know what “special benefit” might
5 accrue to these properties in four years (if any), we do know that there are no actual benefits
6 now. The LID improvements provide no immediate special benefit to property owners
7 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
8 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
9 sewer system for future users). For example, notwithstanding the questionable hypothesis
10 that hotels will benefit from an expected increase in tourism (higher room rates or
11 occupancy) when the improvements are complete, it is undisputed that tourists are not
12 coming in larger numbers and paying higher room rates now because of something
13 happening five years down the road. *See* 3/12/2020 (J. Gordon) Hrg. Tr. at 207:11-23.

14
15 17. Further, there are no “plans and specifications” on file with the Clerk’s Office
16 for the LID Improvements, and it is unlawful to move to final assessments without such
17 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
18 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
19 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
20 dollars on projects still early in the design process. *See* Washington Attorney General
21 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
22 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
23 of programs and included “only so much of the overall costs” that took place within and
24 benefitted the assessed properties).

25
26 18. The COVID-19 crisis highlights how fundamentally speculative and unfair it
27 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 anticipated to be delivered five years later. Even before COVID, it was speculative to
2
3 assume that market highs experienced in October 2019¹ would be sustained through 2024,
4
5 after an already extraordinarily long expansion period. *See, e.g.*, 3/3/2020 (A. Gibbons)
6
7 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
8
9 my analysis in October 2019, who would have thought that this COVID issue would
10
11 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
12
13 process was that the market was going to continue to go up”—in fact, it did not for
14
15 Taxpayer’s property. *Id.* Mr. Gordon’s appraisals after March 1, 2020 showed that
16
17 downtown hotel values had already dropped an estimated 10-15% from their October 2019
18
19 levels, and occupancy rates were at zero or in single digits. *See* Gordon Decl. (dated
20
21 4/21/2020) at ¶ 9. Hotels without guests will derive no benefit, special or otherwise, from
22
23 the planned LID Improvements. And even assuming hotels recover prior to 2024, there is
24
25 no basis for assuming that values hypothesized in October 2019 will remain relevant; they
26
27 are already irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶ 12 (dated 7/7/2020).
28
29 Although COVID does not change actual values as of October 2019 (*see* Examiner’s
30
31 Recommendation at 109), the pandemic has impacted *current* values and rendered the
32
33 hypothetical October 2019 Final Study valuations outdated.

34
35 19. As another example of how future events could affect the accuracy and
36
37 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
38
39 Examiner re-open the record to allow the City to explain whether the assessments against
40
41 property owners within the LID are, in fact, being used by the City to fund the emergency
42
43 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
44

45
46 ⁴ Associated Press, *Seattle mayor approves ‘emergency dismantling’ of waterfront Pier 58* (King
47 5, Aug. 15, 2020), available at <https://www.king5.com/article/news/local/seattle/seattle-mayor->

1 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
2 would be improperly imposing costs on property owners within the LID for improvements
3 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
4 habitat and City infrastructure—this does not provide any special benefit to LID property
5 owners.
6
7
8
9

10 20. There is also no certainty the improvements will be delivered on time. Mr.
11 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
12 delay in construction schedule would not constitute a “material change” under the City
13 Council’s ordinance authorizing the improvements. In other words, the City cannot
14 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
15 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
16 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
17 potential delays and project changes inherent in those processes, that call into question the
18 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
19 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
20 Decl., dated 4/15/2020).

46
47

1 21. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
2 he could not point to a single one where the assessment roll was finalized five years in
3 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
4 he has never recommended final special assessments based on designs less than 30 percent
5 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
6 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
7 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
8 at 66:17-25. He performed no independent due diligence to determine the reliability of the
9 City’s estimates for completion of the LID Improvements, or to ensure that proposed
10 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
11 agreed that if any of his assumptions are incorrect, his opinion of market value would need
12 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
13 68:11-18.

14 22. The City has cited no authority—and Taxpayer is aware of none—that
15 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
16 assess taxes for “actual” special benefits that will not accrue for another five years (if all
17 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
18 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
19 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
20 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
21 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
22 IV.C.14, and IV.C.18.

23 23. Failure to discount special benefit estimates to account for risks and present
24 value. Due to the inherent uncertainty, Taxpayer’s expert opine that the Final Study should

1 have accounted for risks associated with delivery of the improvements (including permitting
2 risk, construction risk, general economic risk) and any special damages associated with
3 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
4 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
5 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
6 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers routinely consider
7 the impact of future conditions [through] discounted cash flow analysis.”).
8
9

10
11
12
13
14
15 24. Mr. Macaulay acknowledged that appraisers can discount the value of a
16 future condition not in place at the date of valuation and can discount for the time value of
17 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
18 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
19
20 Discounting would also have been consistent with his approach for analyzing special
21 benefits to vacant land. He testified that the difference between similarly situated vacant
22 sites slated for development and already developed sites was that the labor, capital and risks
23 associated with development had not yet been borne for those vacant sites. Therefore, the
24 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
25 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
26 fully permitted, has not completed environmental review, and has not reached full design is
27 presently worth significantly less.
28
29

30
31
32
33
34
35
36
37
38
39 25. The City’s hotel expert, Mr. Lukens, likewise explained that to calculate
40 present value, an appraiser would consider discount rates for land development to account
41 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
42 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
43
44
45
46
47

1 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
2 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
3

4
5 26. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
6 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
7 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
8 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
9 ignoring momentarily all of the other methodological and other flaws discussed here and in
10 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
11 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
12 exceeds special benefits when reduced to present value. Further, to the extent the City is
13 arguing that because they are permitted to assess 100% of the special benefit, the special
14 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
15 is again wrong. After applying proper discounting, the City's proposed special benefit
16 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
17 100% of the total estimated special benefit.
18
19

20
21 27. But even the assumption that the LID improvements would deliver benefits
22 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
23 on. Rather, those studies demonstrate that a discount period of five years is conservative.
24 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
25 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
26 indicates that during the construction period, the Greenway district "significantly" lagged in
27 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
28 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
29 30-31 (discussing New York City High Line and San Francisco Embarcadero
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 improvements). Given the lengthy delay, any prediction of future special benefits is
2 speculative, especially during the construction phase where values are likely to decline.
3
4 Second Decl. of Shorett ISO Closing Stmt., ¶ 6 (dated 7/7/2020). And assuming the LID
5
6 Improvements take a similarly long period of time after they are complete to start producing
7
8 tangible property value benefits, each additional year of delay results in further discount to
9
10 the present value of any future alleged benefit. Gibbons Decl. ISO Closing Stmt., ¶ 19, Ex.
11
12 A.
13

14
15 28. Applying the same discounting methods described above and in Mr. Gibbons
16
17 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
18
19 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
20
21 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
22
23 100% assessment should be no more than \$107,011. Anything more would permit the City
24
25 to assess Taxpayer based on a hypothetical assumption that these improvements are in place
26
27 and providing benefit, and ignore the risks, construction disamenity, and time value of
28
29 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
30
31 would counsel that the assessment should be only 39.2% of that assessment cap, or \$41,948.
32

33 29. Attachment C includes two Excel spreadsheets applying these discounting
34
35 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
36
37 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
38
39 demonstrates that discounting the City's hypothetical October 2019 special benefits to
40
41 present value would reduce Taxpayer's assessment to \$152,712, exclusive of any other
42
43 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
44
45 reductions after taking into account: (1) Taxpayer's experts' estimated "Before" value based
46
47 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-

1 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
2 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
3 the time it takes for the improvements to capture property value). After such reductions,
4 Taxpayer's assessment would be just \$118,025 (for the 5-year discount) or \$32,429 (for the
5 10-year discount). Further, the spreadsheet concludes a "zero" benefit for this property
6 because, based on Dr. Crompton's testimony, Taxpayer's property is more than 2,000 feet
7 from the core "park" improvements and therefore too distant to receive any special benefit.
8 Neither of these spreadsheets address other issues raised by Taxpayer's appeal, but are
9 intended to help demonstrate how unfair and inflated the City's proposed hypothetical
10 assessment is. The Hearing Examiner's Recommendation simply dismisses Taxpayer's
11 discounting argument without legal or factual analysis; that failure is error.
12
13
14
15
16
17
18
19
20
21
22

23 **Appraisal and Assessment Calculation Methods Are Flawed**

24 30. The "general rule is that each lot, piece, or parcel of land should be assessed
25 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
26 Wn.2d at 97.
27
28
29

30 31. It is proper to sustain a challenge to an assessment, even without the appraisal
31 testimony from the owner, where the objector's expert establishes that the assessment was
32 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
33 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
34
35
36
37

38 32. The City's appraiser purports to utilize the income method of valuation but
39 relied on inaccurate revenue and market data, as discussed further below.
40
41

42 33. The City's appraiser purports to utilize the comparable sales method of
43 valuation, but no City witness attempted "to characterize any one, or all of them, as
44 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
45
46
47

1 “several serious flaws” in ABS’s LID analysis in that case, including that the appraiser
2 “attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
3 characterize any one, or all of them, as comparable to any particular property within the LID”).
4
5 And no City witness could explain how specific adjustments were made to these sales to
6
7 account for value increases due to the hypothesized Before and After Improvements. For this
8
9 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
10

11 34. Special assessment improperly includes value lift from the Before
12 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
13
14 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
15
16 Improvements, which WSDOT had independently committed to fund. However, Mr.
17
18 Macaulay did not calculate the actual market value of LID properties in October 2019, and
19
20 did not separately analyze the hypothetical increase to property values attributable to
21
22 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
23
24 current value and then separately calculate a hypothetical “With WSDOT” Before value);
25
26 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
27
28 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
29
30 3-4; Shorett Appraisal Review (attached to Appeal Petition) at 2-14. Without any
31
32 documented basis or support, Mr. Macaulay simply “ma[de] a judgment a call” on what
33
34 occupancy and rates would have been for the commercial properties assuming all of the
35
36 WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-130:11. This
37
38 outright omission precludes any independent evaluation of the true market “Before” values.
39
40 *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards;
41
42 if an appraiser uses current sales data to infer values, then the appraiser must explain how he
43
44 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
45
46
47

1 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
2 other road, pedestrian and landscaping improvements WSDOT had already committed to
3 make.
4

5
6 35. However, because Mr. Macaulay testified that he did include some WSDOT-
7 related value-lift in the “Before” values, it follows that part of the special assessment
8 improperly is based on value attributable to the WSDOT Improvements. As shown by
9 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
10 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
11 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
12 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
13 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
14 to properly exclude the value of Before Improvements from the assessments. For these
15 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
16 Sections II.16, II.19, II.29, and IV.B.11(a)(ii)
17

18 36. Special benefits were assigned rather than measured. Mr. Macaulay
19 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
20 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/12/2020 (P.
21 Shorett) Hrg. Tr. at 49:4-50:1; *id.* (J. Gordon) at 168:2-20; 3/3/2020 (A. Gibbons) Hrg Tr. at
22 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr. Macaulay used to
23 analyze the commercial properties, Taxpayer’s experts concluded that Mr. Macaulay based
24 adjustments on hypothesized very small increases to property revenue and very small
25 reductions to cap rates to “calculate” an “After” value due to the coming 2024 LID
26 Improvements. Attachment B (ABS Spreadsheet). These series of micro adjustments were
27 based on “professional judgment” that are neither shown nor replicable.
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 37. For these reasons, Taxpayer appeals the following portions of the Examiner's
2 Recommendation: Sections II.19 and IV.B.11(a)(iii).
3

4 38. Special benefit falls within margin of error. The Final Special Benefit Study
5 applies an estimated value enhancement of less than 4%, which is generally within the
6 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
7 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
8 Taxpayer's experts explained that if two appraisers independently arrive at values within 5%
9 of one another, this difference is considered reasonable as it falls within the standard margin
10 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/11/2020
11 (P. Shorett) Hrg. Tr. at 216:25-217:11. Because Mr. Macaulay's micro-special benefit
12 percentages fall far below that 5% margin, "there is no way of authenticating" such
13 incremental changes because "[m]arket forces completely obliterate any tiny little noise
14 factor like that." *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed
15 during his deposition that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Yet,
16 Mr. Macaulay assigned or purported to measure a difference in revenue and cap rates for
17 Taxpayer's property within that margin. Additionally, the fact that "Before" values are also
18 based on a hypothetical that adds some unstated incremental value to actual 2019 values
19 exacerbates this issue—the ability for an appraiser to discern the micro-value differences
20 between hypothetical conditions that are so similar (the WSDOT improvements compared to
21 the LID improvements) "verges on being ludicrous." 3/3/2020 (A. Gibbons) Hrg. Tr. at
22 89:4-90:7.
23

24 39. Even if it were possible to accurately tease out such a miniscule hypothetical
25 value change due to improvements coming five years later, experts testified that there is no
26 data to justify the mathematical adjustments—they are just the appraiser's guesses as to
27

1 what he felt the changes (hypothetically) would be. *See* 3/12/2020 (J. Gordon) Hrg. Tr. at
2
3 168:2-20; 176:1-177:6; *id.* (P. Shorett) at 49:4-50:1; 3/3/2020 (A Gibbons) Hrg. Tr. at
4
5 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
6
7 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
8
9 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

10
11 40. No analysis of value increase attributable to individual components of the
12 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
13
14 percentage difference between hypothetical Before and After conditions. Throughout his
15
16 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
17
18 descriptions in the Addenda even though he testified that he relied on these to calculate
19
20 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
21
22 someone might be able to determine how he attributed value to After conditions described in
23
24 the Addenda, he answered that that was “not the scope of the assignment” because he was
25
26 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
27
28 that the six components were not actually a continuous project, that he was viewing them
29
30 together because the City asked him to, and that if he were to view them independently,
31
32 there was a low probability that properties in the north would specially benefit from
33
34 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.

35
36
37 41. Not only did he fail to analyze benefits from each of these non-contiguous
38
39 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
40
41 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
42
43 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
44
45 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
46
47 objectives that guided regulators’ assessment of architectural plans for buildings along a

1 “signature street” were so vague that they amounted to ad hoc review based on the
2 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
3 even though he used the renderings as “visual aid[s] in appraising the property in the before
4 and after” to “visually see what the differences would be,” he could not explain what
5 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
6 when shown a rendering of a two-lane road going down to one-lane in the After condition
7 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
8 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
9 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
10 could explain the depiction of the same trees in the After condition nearly twice as tall as in
11 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
12 of the Examiner’s Recommendation: II.27 and IV.B.4.
13
14
15
16
17
18
19
20
21
22
23

24 42. Special assessment is not supported by comparable studies, data or reports.
25 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
26 that the LID Improvements will lead to meaningfully increased real estate values for
27 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
28 comparable sales or information from the “over twenty-five studies and reports” to arrive at
29 very precise special benefit increases for the commercial properties, including Taxpayer’s
30 property. For example, although Mr. Macaulay stated that no single report or study was
31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 directly on point due to the unique nature of the LID Improvements (*see, e.g.*, 6/25/2020
2 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
3 parcel-by-parcel analysis other than to say that the studies generally provided “some
4 background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
5 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
6 similarities and differences between these improvements and the comparable parks he
7 looked at).

14 43. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
15 assignment of incremental increase of 0.5% to 4% to property values within the LID.
16 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
17 research misinterprets his work in critical ways, including because the LID Improvements
18 manifest the characteristics of a parkway (not a park), and his research indicates that most of
19 a *park’s* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
20 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
21 related value increases are in fact smaller; that estimated increases are “best guesses” rather
22 than predictions of property value increases in a particular city; and that percentages do not
23 account for diminishing returns after taking into account water views, which would be the
24 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
25 topography grants most properties in downtown a water view.

38 44. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
39 that this was just one source of information that was not entirely relevant because, among
40 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
41 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
42 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-

1 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
2 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
3 Crompton concluded that 500 feet via road from “park” improvements is just one or two
4 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
5 significantly beyond that which the park study indicated (even if it was legitimate to use the
6 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
7 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
8 impact applicable to “community parks”—which the LID Improvements are not. *Id.*
9 Taxpayer’s property is not even within 2,000 road network feet from the “park”
10 improvements. *See* Hrg. Exhibits 104 (Ellen Kersten Decl.) at Exs. E, F; 114 (Decl. of Z.
11 Ahmed) at ¶ 37.

12
13 45. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
14 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
15 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
16 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
17 materials, it was clearly an important—if not *the* most important—source of information for
18 estimating special benefits (especially with respect to the condos).⁷ No City witness
19 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
20 parcel-by-parcel analysis.

34
35
36
37
38
39
40
41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 46. The destination parks discussed in the Final Special Benefit Study do not
2 provide reliable, comparable, and valid support for the calculation of special assessments
3 here. *See* Shorett Appraisal Review (attached to Appeal Petition) at 15-19 (Shorett’s
4 critique of every case study cited concludes the changes to those “dwarf the difference
5 between the before-after condition of the property with LID”); Gibbons 5/2/2018 Letter at 4;
6 Hrg. Exhibit 49 (P. Shorett’s Supplemental Report); 3/11/2020 (P. Shorett) Hrg. Tr. at
7 208:8-24; 3/12/2020 (P. Shorett) Hrg. Tr. at 6:19-7:18; Second Decl. of Shorett ISO Closing
8 Stmt., ¶ 5 (explaining again why the San Francisco, Boston, and Portland case studies are
9 not in fact comparable). None of the parks cited in the Final Special Benefit Study were
10 funded by a LID. And in virtually all of those cases, the park improvements dramatically
11 restored unimproved or blighted areas, and properties evaluated were within two or three
12 blocks of the park.
13

14 47. ABS’s claimed reliance on three economic studies to support property value
15 increase is also flawed. The HR&A study does not inform what value increases are
16 expected from the LID Improvements because it projects increases to tourism from *all* of the
17 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
18 dissimilar parks in other cities,⁸ making the methodological application to the LID
19 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study’s
20 conclusion that there would be *no new net visitors* from downtown residents as a result of
21

22 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
23 Kennedy Greenway, and Millennium Park where tourist “capture rates” varied from 5% (Rose
24 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
25 expected tourists visiting the LID park was calculated using data from only from New York City, a
26 notorious tourist destination. More fundamentally, the assumption that hotel visitors are going to
27 increase their stays in the Seattle core based on proximity to Pier 58, as an example, is contrary to
28 how hotel visitors actually select hotels to stay in.
29

1 the LID Improvements and could not explain how this impacted his condo analysis.
2
3 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on “The Impact of Parks on
4 Property Values” primarily focused on whether the benefits accrue to the larger community
5 rather than properties adjacent to the park. And the 2014 New York City Department of
6 Transportation study is not based on real estate transactions and market sales and fails to
7 substantiate any link between increased retail sales and property values. Moreover, this
8 study only looked at impact either directly abutting the streetscape improvement, or a couple
9 hundred feet for plaza-like improvements.
10

11
12 48. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
13 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
14 Exhibit 124. One explanation of that this omission could be TPL’s estimate of the economic
15 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
16 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
17 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
18 asked whether he considered that HR&A’s estimated LID impact is six times greater than
19 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
20 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
21 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
22 assumptions to account for this difference, which may be partly explained by the fact that
23 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
24 approximately 3.44% of King County tourists visit Seattle primarily because of the city
25 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
26 waterfront improvements.
27

39
40
41
42
43
44
45
46
47

1 49. Although proximity to the improvements is a key factor in all of these
2 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
3 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
4 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
5 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
6 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
7 Improvements is approximate 20 acres and it is not a community park.⁹
8
9

10 50. There is no explanation in the Final Study or the supporting materials of how
11 the studies or comparable sales were used to derive values for Taxpayer's property. For
12 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
13 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.
14
15

16 51. Failure to comply with USPAP. Taxpayer's assessment also rests on a
17 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
18 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
19 recognized) for developing the MAI standards for mass appraisals, testified that the Final
20 Study does not meet mass appraisal standards nor allow for independent assessment of the
21 accuracy of Mr. Macauley's conclusions.
22
23

24 52. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
25 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
26 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
27 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
28
29
30
31
32
33
34

43
44 ⁹ *See*
45 [https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf)
46 [Qs_Final.pdf](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf) ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle's central waterfront to downtown.").

1 testimony suggests that he incorrectly believed that the only difference between direct
2 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
3
4 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
5
6 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
7
8 at 205:8-14 (explaining that his mass appraisal simply uses “limited techniques, such as
9
10 Gordon uses in doing his limited restricted report”).
11

12
13 53. But the difference is not only in reporting—mass appraisal techniques must
14
15 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
16
17 Paul Bird (City’s witness) testified, the mass appraisal approach is distinct from a parcel-by-
18
19 parcel approach:

20
21 The mass appraisal technique is an appraisal method used to evaluate
22
23 a group of properties that are subject to similar market forces as of a
24
25 certain date through the use of market data, statistical analysis and
26
27 testing. As a result, the mass appraisal technique does not require or
28
29 involve analysis of each individual property’s specific data.

30
31 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).

32
33 54. Indeed, USPAP’s definition for “mass appraisal” is “the process of valuing a
34
35 universe of properties as a given date using standard methodology, employing common data,
36
37 and allowing for statistical testing.” Appraisal Foundation, Uniform Standards of
38
39 Professional Appraisal Practice at 5 (2020-2021). And the definition for “mass appraisal
40
41 model” is “a mathematical expression of how supply and demand factors interact in a
42
43 market.” *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
44
45 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
46
47 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

1 55. Regardless of client direction, Mr. Macaulay is required to comply with
2
3 USPAP. So if, as he determined, a “[p]arcel-by-parcel direct appraisal” would not have been
4
5 economically feasible because it would have taken “an incredible amount of time and cost”
6
7 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
8
9 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 (“performing an
10
11 individual appraisal of each [condo] parcel would have been cost and time prohibitive”).

12 56. But Mr. Macaulay’s methods fail to comply with USPAP Standards 5 and 6
13
14 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
15
16 value, fails to calibrate the model structure to determine the contribution of the individual
17
18 characteristics affecting value, and does not review the mass appraisal results against actual
19
20 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
21
22 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

23 57. Mr. Macaulay explained that factors like “aesthetic change in the area, the
24
25 proximity to the elements, the increase in market rent, market vacancy changes,
26
27 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
28
29 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
30
31
32

33
34 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
2 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
3 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
4 internal review process. *Id.* at 104:24-105:20. And because both the Before and After
5 values were hypothetical, it was not possible to identify matched pair sales and no City
6 witness explained how ABS Valuation made adjustments to “comparable” sales in order to
7 check their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which
8 requires him to explain his model structure.
9

10
11 58. For these reasons, Taxpayer appeals the following portions of the Examiner’s
12 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
13 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
14 and appeals the Examiner’s denial of that motion.
15

16
17 59. Finally, Taxpayer’s property is not appurtenant—or even in close
18 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
19 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
20 close proximity to the property on which expert testimony was given”). Indeed, the
21 Renaissance Hotel is more than a 3/4 of a mile walk—approximately 2,700 feet as a crow
22 flies—from Pier 58 and the core “park” improvements. Hrg. Exhibit 114 (Decl. of Z.
23 Ahmed) at ¶ 37. And, as described above, the special assessment is overstated because the
24 Final Study makes no attempt to determine general benefits, existing amenities for
25 Taxpayer’s specific property, or special detriments. In addition, it is speculative due to the
26 fact that, as of October 2019, improvements were not in in place—and, in fact, much of the
27 waterfront is a construction zone following removal of the viaduct and now Pier 58
28 demolition. Under these circumstances, rather than relying on entirely imaginary income
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 and shaky hypotheticals, Mr. Macaulay at the very least should have discounted the special
2 benefit estimates or waited to perform the Study until the improvements were at least close
3 to complete.
4
5

6 **Erroneous Pre-Improvement Valuation**

7
8
9 60. The proposed final assessment erroneously overstates the pre-improvement
10 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
11 benefit to the Taxpayer's property.
12
13

14
15 61. The City's Final Study was used to compute the proposed final assessment of
16 Taxpayer's property. The City's Study purportedly uses data from the King County
17 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
18 Study does not accurately reflect this data. For example, the City's Study values Taxpayer's
19 property at \$227,224,000 as of October 1, 2019. However, the King County assessor
20 determined the true and fair value of the property to be \$188,576,100, valued in 2019 for tax
21 year 2020. In other words, the Final Special Benefit Study's valuation is 120% of King
22 County's assessed value. The Final Special Benefit Study does not explain this difference—
23 or any differences—between its pre-improvement valuation and its supposed source for
24 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
25 Recommendation.
26
27
28
29
30
31
32
33
34
35

36
37 62. Further, the City's analysis was based on unreliable market data. For the
38 hotels, Mr. Macaulay's decision to rely on inaccurate market data notably deviates from
39 standard appraisal practices because more reliable data in the form of STR reports are
40
41
42
43
44

45 ¹¹ See, e.g., Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

1 readily available. Examiner Recommendation at Section IV.C.10; 3/12/2020 (J. Gordon)
2
3 Hrg. Tr. at 196:5-197:12; 215:9-18. Without the STR reports or actual input from the hotels,
4
5 Mr. Macaulay's "Before" valuations are drastically overstated in large part because he relies
6
7 on publicly available "room rack rates" to estimate hotel income. *See id.* (J. Gordon) at
8
9 162:3-18; 170:16-171:13; 179:25-180:14; 192:15-22. As the Examiner found, "Mr. Gordon
10
11 is a specialist expert in appraising hotels and his expert opinion, in addition to the specific
12
13 information he relied on for that opinion, is superior to the opinion and supporting data of
14
15 the City in its valuation." Examiner's Recommendation at II.16. The Examiner concluded
16
17 that Mr. Gordon's valuations were more reliable "due to the specialist nature of Mr.
18
19 Gordon's background and the specificity of the valuation data upon which he relied"—
20
21 namely STR reports or actual revenue data from the hotel. *Id.* at IV.C.10. Therefore, "the
22
23 valuation of [this] property should be remanded for recalculation by the City appraiser based
24
25 on the information provided by [this] Objector." *Id.*

26
27 63. Specifically, the evidence and testimony presented showed that the actual
28
29 average daily room rate (ADR) for this property in 2019 was \$204. However, Mr. Macaulay
30
31 incorrectly estimated an ADR of \$300 for this property which is 45% higher than actual
32
33 ADR, far exceeds the most optimistic assumptions about future growth in hotel room rates
34
35 for the Renaissance and is not a reasonable assumption in valuing a hotel of this type in the
36
37 downtown Seattle market. In addition, the Renaissance has significantly reduced operations
38
39 as a result of the COVID-19 outbreak.

40
41 64. Due to these errors alone, Mr. Macaulay artificially raised the property's
42
43 Before value; Mr. Gordon valued the property at \$200,700,000 (without personal property),
44
45 which is \$26,524,000 (or about 11.75%) less than ABS Valuation's estimate. Setting aside
46
47 that ABS Valuation's inclusion of personal property when valuing hotels is disproportionate

1 and flawed, Mr. Gordon's estimate of value including personal property is \$206,300,000,
2 which is still significantly lower than ABS Valuation's estimate (\$227,224,000). *See* Fourth
3 Decl. of Gordon, at ¶ 5 (dated 7/7/2020).
4

5
6 65. Taxpayer expects an opportunity to respond to the revised assessment once
7 that is provided (*see* Examiner's Recommendation at V) and appeals the remainder of
8 Section IV.C.10 of the Examiner's Recommendation rejecting Taxpayer's other bases for
9 reducing the assessment. For example, Taxpayer disagrees with the Examiner's conclusion
10 that one of the reasons Mr. Gordon's appraisals concludes a lower value for this property is
11 because he was not valuing the properties in the "Before" condition. Examiner's
12 Recommendation at Section II.16. This does not explain the 45% difference between ABS
13 Valuation's estimate and actual average room rates for the Renaissance. Further, Mr.
14 Lukens—who reviewed ABS's valuation estimates for reasonableness—was not even aware
15 that the Before values were supposed to include the WSDOT Improvements. 6/26/2020
16 Hrg. Tr. at 165:2-166:22.
17
18

19 66. Thus, aside from multiple other reasons why computation of the special
20 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
21 improvement values that do not accurately reflect market data. For these reason, Taxpayer
22 appeals Section II.16 of the Examiner's Recommendation.
23
24

25 **Erroneous Computation of Special Benefit**

26 67. "Special benefit" is "the increase in fair market value attributable to the local
27 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
28 may receive by reason of the improvement is not measured alone by the physical character
29 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
30 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). "The question is: To what extent is
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 the particular tract or property benefited by the entire improvement, and is it assessed
2 proportionately with the other property included within the assessment district?” *Id.* 165–
3
4 66.
5

6 68. The proposed final assessment erroneously overstates the special benefit of
7
8 LID improvements in a number of ways.
9

10 69. Overstated Before value led to overstated special benefit. ABS Valuation’s
11 overstated Before value resulted in an inflated special benefit estimate and assessment after
12
13 Mr. Macaulay made micro adjustments to “Before” revenue and capitalization rates to
14
15 calculate an After value. Mr. Macaulay conceded that using his methods and his
16
17 spreadsheets, changing the room rate alone would change the special assessment. 6/25/2020
18
19 Hrg. Tr. at 42:21-43:15 (explaining that changing the room rate will result in a different
20
21 assessment and the same is true for every hotel); *see also* 6/23/2020 Hrg. Tr. at 111:9-11,
22
23 132:12-133:10, 140:20-141:9. And he agreed that if Mr. Gordon’s numbers are accurate—
24
25 and there is no evidence they are not—then ABS would need to redo the appraisal for the
26
27 Renaissance to determine if adjustments are needed. *Cf. id.* 109:17-110:2 (discussing the
28
29 Hyatt Regency), 137:20-138:13 (discussing Grand Hyatt).
30
31

32 70. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
33 the Renaissance, Mr. Macaulay assumed room/rental rates would increase by 0.15% (low)
34
35 and 0.45% (high) due to the 2024 LID Improvements. But as Mr. Gordon testified, it is not
36
37 possible to accurately conclude that the reason for this level of percentage increase would be
38
39 due to the LID Improvements, and there appears to be no support for assignment of these
40
41 percentages. Based on formulas in the spreadsheets, Mr. Macaulay then uses these same
42
43 percentages (0.15% and 0.45%) to increase food and beverage revenue, and parking and
44
45 other income. He then uses this hypothesized increased revenue to calculate a new net
46
47

1 operating income for the commercial properties and capitalizes that to come up with an
2 “After” valuation.
3

4
5 71. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
6 operating income remains the same as in the hypothetical “Before” condition, but changes
7 the cap rate. For the Renaissance, the cap rate goes from 7.50% to 7.44% (low scenario,
8 creating a bigger value increase) and 7.48% (high scenario, creating a lower value increase).
9 Mr. Gordon likewise explained that cap rate changes of 0.06% or 0.02% are not typically
10 measurable, and there appears to be no support for these changes in the Final Study or any
11 of its supporting materials.
12
13
14
15
16
17

18
19 72. Mr. Macaulay then averages his four “After” values to arrive at a final special
20 benefit conclusion. For the Renaissance, this is an increase in property value of 0.50% due
21 to the LID Improvements.
22
23

24
25 73. Mr. Macaulay offered little justification for his micro adjustments to revenue
26 and capitalization rates. When asked precisely what the basis is for his special benefit
27 percentage increases to revenue for each commercial property, he could not point to
28 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
29 is nothing in the report to allow a reader to understand how he came up with these
30 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
31 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
32 the basis for his belief that certain factors—liked increased connectivity—will increase
33 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
34 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
35 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
36 sources equally even though there was no separate analysis done for food and beverage or
37
38
39
40
41
42
43
44
45
46
47

1 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
2 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
3 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
4 properties.
5
6
7

8 74. When asked the basis for making such adjustments specifically for hotels,
9 Mr. Macaulay pointed to “discussions with Mr. Lukens.” *Id.* at 116:5-19; 117:1-8; 126:3-7
10 (“Mr. Lukens helped significantly in that regard in helping, you know, look at probable
11 adjustments”). However, Mr. Lukens testified that he did not review the percentage
12 increases. *See* 6/25/2020 Hrg. Tr. at 170:24-172:20.¹² And he did not review any work or
13 data to determine whether the revenue percentage adjustments in the spreadsheets were
14 reasonable, nor did he ever find them to be unreasonable or suggest any changes. *Id.* at
15 172:3-20. Instead, he appeared to be considering them for the first time on cross
16 examination, testifying that the adjustments “appear to be a kind of sensitivity analysis” and
17 “appear to be a very minor change.” *Id.* at 170:18-172:13. Likewise, he had no
18 understanding of what factors went into determining the change in capitalization rates in the
19 spreadsheets. *Id.* at 173:23-174:1. And he did not know how ABS Valuation reconciled the
20 four scenarios to come to final estimated special benefit. *Id.* at 174:22-175:4.
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37

38 ¹² As another example of how arbitrary Mr. Macaulay’s methods are, he assigned different
39 special benefit and capitalization rate increases to the parking and retail parcels associated with the
40 Grand Hyatt and the Four Season even though these sources of revenue receive identical increases
41 when they are part of the same legal parcel as the hotel. But he ends up concluding the same special
42 benefit increase overall (3% for all of the Four Seasons parcels and 1.5% for the Grand Hyatt
43 parcels). When asked whether this was a matter of coincidence, his answer was that is “just our
44 estimate of how the market would react.” 6/23/2020 Hrg. Tr. at 151:24-152:9. But by comparison, a
45 parking lot near the Grand Hyatt (Parcel 0659000355) received just a 0.65% special benefit even
46 though it is one block closer to the waterfront.
47

1 75. Mr. Macaulay testified that he used comparable sales as a reasonableness
2 check for commercial properties. But as explained above, no City witness has explained
3 how anyone, or all, of the sales are comparable to any particular commercial property within
4 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
5 in order to make sales “comparable,” he would have had to make adjustments to account for
6 Before and After conditions, but there is no way to understand how adjustments were made
7 because he “didn’t do a separate sales comparison approach where we showed adjustments
8 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
9 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
10 *Id.* at 127:10-128:24.

11 76. It also bears noting that any “internal review” of the special benefit estimates
12 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
13 error. Indeed, given all the same information, he seemed to suggest that it would be
14 perfectly reasonable for another experienced appraiser to come up with special benefit
15 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
16 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
17 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
18 margin of error conflicts with the testimony of Taxpayer’s experts and reaffirms that there
19 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
20 margin of error (5%) is a “rule of thumb” and not a “hard legal standard,” there are still
21 reasonable and unreasonable variations within the appraisal field. *See Examiner’s*
22 *Recommendation* at IV.B.4. Thus, the special assessment is not actual, measurable or
23 special because it is arbitrarily assigned; and it is too small to realistically be supported by
24 appraisal techniques.

1 77. No evidence of special benefit. Meanwhile, there is “no actual evidence from
2
3 any seller or purchaser that the price was higher because of the LID improvements.”
4
5 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City’s appraiser “has not
6
7 identified any seller or buyer, or any particular property where the existence of the LID
8
9 improvements had an effect on the market price.” *Id.* at 410-11. Meanwhile, Taxpayer has
10
11 explained that the property has not increased rental rates or revenue due to the forthcoming
12
13 LID Improvements, because, among other reasons (and apart from COVID), the
14
15 improvements ABS believes will generate value do not exist, and will not for a number of
16
17 years to come. There are no comparable sales because the LID Improvements are not in
18
19 place, nor will they be until the end of 2024 if completed on schedule. Notably, this
20
21 property is further than 2,000 feet from the core waterfront improvement, making any basis
22
23 for finding a special benefit extremely tenuous given Dr. Crompton’s testimony and reports.
24
25 And, this property has closer direct access to the waterfront via the Harbor Steps, and
26
27 testimony regarding the Harbor Steps establishes that this property will not benefit from
28
29 increased connectivity.

30 78. The fair market value of Taxpayer’s property has not changed due to
31
32 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
33
34 benefited from installation of new water main and fire hydrant where it was already
35
36 adequately supplied with water and afforded adequate fire protection). And in any event,
37
38 any value attributable to removal of the viaduct was to be excluded from the assessment
39
40 calculation.
41

42 79. There is no special benefit because LID improvements in fact diminish the
43
44 value of Taxpayer’s property by drawing visitors away towards improvements that do not
45
46 abut the property. *See Kusky*, 85 Wn. App. 493 (testimony of owners’ expert that LID
47

1 actually diminished value of property was sufficient to rebut presumption that assessment
2 was proper).

3
4
5 80. Moreover, the assessment formula is an attempt to distribute costs that do not
6 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
7 “merely a mathematical model that distributes costs”).
8

9
10
11 81. The Special Benefit Study fails to address whether the \$346,000,000
12 estimated LID project cost takes into account the investment that would have occurred in the
13 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
14 invested. This is a critical component of estimating which properties receive a direct benefit
15 from the improvements, versus more incidental benefits further from the park.
16

17
18
19 82. Assessments are disproportionate. Taxpayer also presented evidence
20 showing that the assessments are disproportionate. For example, the City disproportionately
21 assessed hotels a greater percentage of the cost of the Improvements even though there no
22 evidence that hotel properties will in fact benefit.
23

24
25
26 83. Mr. Macaulay also included personal property in his valuation of hotels even
27 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
28 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
29 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
30 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
31 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
32 receiving a disproportionately high LID assessment in comparison to other property types,
33 since hotels were the only property type subject to personal property LID assessments.
34 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
35 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
36
37
38
39
40
41
42
43
44
45
46
47

1 notice procedures because hotel property owners only received notice that their real estate
2 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).

3
4 84. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
5 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
6 a television at the waterfront Marriott is assigned a greater special benefit than the same
7 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
8 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
9 unreasonable to assign a value lift to personal property that is replaceable at the same cost
10 and may be obsolete before the LID improvements are even completed. *See* Second Decl. of
11 Shorett ISO Closing Stmt., ¶ 7 (dated 7/7/2020). Further, personal property is highly
12 depreciable, and likely to be fully depreciated or potentially discarded by 2024. *Id.*; *see also*
13 Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must be redone to correct
14 for this error.

15
16 85. The only evidence the City provided specific to this property was to rebut
17 Mr. Gordon's "Before" valuation. But the Hearing Examiner has already found that Mr.
18 Gordon's valuation is more reliable. The remainder of the City's evidence and testimony
19 regarding this property provides only general responses which have already been rebutted by
20 Objectors in their case-in-chief and cross-examination. *See* Second Decl. of Bird, at ¶¶ 91-
21 96 (dated 6/26/2020).

22
23 86. The proposed final assessment substantially exceeds the special benefit to the
24 property and is grossly disproportionate to similarly situated properties within the LID. For
25 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
26 Sections II.17, II.22, II.23, II.27, IV.B.4, IV.B.11(a)(iii), and IV.C.10.
27
28
29
30
31
32
33
34

41
42
43
44
45
46
47

State Environmental Policy Act and Other Environmental Permitting

87. While this appeal is not challenging the City's environmental review and permitting processes, those processes are relevant in determining the legality of the assessments, and to assessing the delivery risk, the present value of the City's plans, and ultimately the amount of the assessment. If the roll is finalized, the City will commit to pursue projects that have not yet undergone environmental review (thus limiting the choice of reasonable alternatives to those projects). For example, if the roll is finalized, the City is committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63) is just beginning. Further, the City has segmented environmental review, and still has a gauntlet of federal, state and tribal review processes to complete before it will be clear what the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b), SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and committing to reconstruction of Pier 58 and major street improvements without environmental review, or the City's Final Special Study has improperly included and is proposing to assess the Taxpayer the costs and special benefits of improvements that may not get built. Either way, it is faulty process.

Due Process Rights

88. The City's failed to notify Taxpayer sufficiently in advance of the hearing to allow Taxpayer to obtain evidence and prepare to properly challenge the assessments. Because LID assessments involve a deprivation of property, affected owners have the right to a hearing as to whether the improvement resulted (or will result) in special benefits to their properties and whether their assessments are proportionate, which necessarily includes

1 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
2 555, 569–70, 229 P.3d 761 (2010).

3
4 89. The LID statute specifies that cities must mail notices giving the time and
5 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
6 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
7 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
8 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
9 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
10 secure their own appraisal), evaluate proportionality of the proposed assessments, and
11 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
12 for anybody to get an appraisal”).

13
14 90. The City’s Notice of Assessment was sent on December 30, 2019. And the
15 Final Special Benefit Study has only been available for public review since January 7, 2020.
16 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
17 order that would preserve and protect Taxpayer’s right to analyze and respond to the Final
18 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
19 preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City’s
20 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
21 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
22 the Examiner’s Recommendation: I.B.

23 **VII. Relief Requested**

24 Taxpayer respectfully requests that the City Council:

25 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
26 assessment dated December 30, 2019; or
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
2
3 proposed final assessment to \$0 (zero), or such amount as Taxpayer establishes at the
4
5 hearing in this matter; or

6 3. Grant the Examiner's recommended remand but with instructions recalculate
7
8 and reduce Taxpayer's assessment using recognized appraisal techniques consistent with
9
10 USPAP and

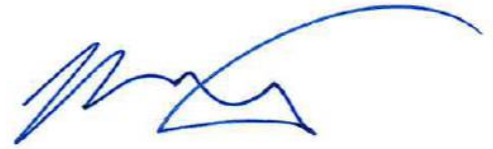

- 11 a. Excluding any property value increase attributable to viaduct removal and
12
13 other planned WSDOT Improvements;
14
15 b. Excluding any value attributable to personal property;
16
17 c. Taking into account the effects of the COVID-19 pandemic on the value of
18
19 Taxpayer's property and other relevant developments since October 2019;
20
21 d. Accounting for and excluding (1) any special benefits from existing or
22
23 planned improvements that already provide similar benefits to Taxpayer's
24
25 property, and (2) any special detriments from construction and other
26
27 anticipated LID-related disamenities;
28
29 e. Accounting for and including only those actual benefits anticipated to accrue
30
31 to Taxpayer's property based on its location relative to Pier 58, Overlook
32
33 Walk, and the Promenade, and specific elements of the LID Improvements;
34
35 f. Discounting anticipated special benefits to present value, based on reliable
36
37 estimates regarding when special benefits will start accruing following
38
39 completion of the LID Improvements; and
40
41 g. Accounting for such other issues specific to Taxpayer's property relevant to
42
43 calculation of such assessment; and
44
45

46 3. Grant such further relief as the City Council deems just and proper.

24
25
26 **III. Statement of Madison Hotel LLC's Interest and Incorporation of Prior**
27 **Arguments**

28
29 MADISON HOTEL LLC is the taxpayer for the property that is subject to the
30 proposed final assessment described in Section IV.

31
32
33 Madison Hotel LLC is amending its appeal as authorized in City of Seattle
34 Resolution 31979 to include additional arguments relevant to the revised Final
35 Recommendations of the Hearing Examiner issued on February 1, 2021. On February 4,
36 2020, Madison Hotel LLC timely filed an objection to the assessment, which was based on
37 the Final Study. Madison Hotel LLC further timely filed an appeal of the Hearing
38 Examiner's 2020 recommendations to the City Council. Madison Hotel LLC maintains and
39 incorporates all objections and arguments raised in its appeal filed with the City Clerk on
40 September 22, 2020. This amendment is a supplement is to be read together with Madison
41
42
43
44
45
46
47

1 Hotel LLC's appeal filed on September 22, 2020. Madison Hotel LLC incorporates by
2 reference all filings, evidence, and pleadings filed by any party before the Hearing Examiner
3 as authorized by the Hearing Examiner, including without limitation all records pertaining to
4 the November 2020 through February 2021 remand hearing ordered by Council.
5
6
7

8
9 **IV. Amended Arguments on Appeal**

10 MADISON HOTEL LLC supplements its appeal of the Hearing Examiner's
11 recommendation to deny in part and revise on remand in part Madison Hotel LLC's
12 objection to the City of Seattle's Waterfront Local Improvement District No. 6751 proposed
13 final assessment dated December 30, 2019 against the following property:
14
15
16
17

18 King County Parcel No. 0942000430
19 Site Address: 515 Madison St., Seattle, Washington
20 Proposed Final LID Assessment for Parcel: \$420,425
21
22

23 To avoid repetition, Madison Hotel LLC incorporates the evidence and arguments
24 raised before the Hearing Examiner and before the City in its September 22, 2020 appeal,
25 into this amended appeal.
26
27

28
29 **A. The Anticipated Special Benefits to Madison Hotel LLC's Property**
30 **should be Discounted to Present Value and Assessments Adjusted as**
31 **Appropriate**
32

33 On remand, the City's appraiser acknowledged that special benefits to parcels can be
34 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
35 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
36 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
37 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
38 the theatre parcel is too remotely to support a current assessment. *Id.* The Examiner
39 accepted that recommendation. The City's appraiser further acknowledged that benefit
40 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
41
42
43
44
45
46
47

1 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
2 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
3 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
4 calculations to present value because the general benefits are not anticipated from the LID
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
7 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
8 benefit calculation, and related assessments, to account for the delay between the assessment
9 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
10 standard appraisal practice, and renders the other proposed Waterfront LID special
11 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
12 “fundamentally wrong methods.”
13
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
18 Additionally, the assessments may not materially exceed the actual special benefit conferred
19 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
20 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
21 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
22 discount benefits the City estimated would accrue to the properties from improvements to be
23 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
24 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
25 property while treating all or most others (including Taxpayer’s) differently, and
26 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
2 for some properties because the benefits are too distant, while assessing other properties as
3 though distant benefits have already been secured. As Taxpayer identified in its September
4 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
7 reject the improper calculation of the benefit or remand and require the appraiser to discount
8 the benefits to net present value.
9

10
11
12
13
14
15
16
17 **B. The City's Appraiser's Disregard of Hotel STR Report Performance**
18 **Data is Another Example of How His Analysis is Unreliable, Not**
19 **Admissible under Frye or ER 702, and His Proposed Special**
20 **Assessments are not based on Actual, Measurable and Special Value**
21 **Increases from the anticipated LID Improvements.**
22

23 The City's appraiser was provided actual performance data for the remanded hotels,
24 including their average daily room rates, from which he had been instructed to "recalculate"
25 hotel "before" values on remand. *See* Hearing Examiner Initial Recommendation at p. 117
26 (Sept. 8, 2020). The appraiser refused, explaining that, had he done so, his before values
27 would be "too low." Instead, he divined an alternative value from "comparable sales", and
28 then worked backwards to calculate small adjustments to his average daily room rate
29 assumptions, substituting them in his "income spreadsheets," and thereby correlating his
30 income analysis to his preconceived value estimate. His remand analysis demonstrates that
31 his whole "income approach to valuation", used for both hotels and other commercial
32 properties, is contrived speculation on speculation. The City's appraiser disregarded these
33 hotels' actual net income in a supposed "income analysis." *See e.g.*, Deposition of Robert J.
34 Macaulay, 7:10-13 (December 22, 2020) (Attached as Exhibit A to Objector's Statement on
35 Remand for Case Nos. CWF-0318, 0413, 0415, 0417, 0418, 0423, 0429, 0436). Taxpayer's
36
37
38
39
40
41
42
43
44
45
46
47

1 appraiser submitted an appraisal with room rates much closer to the actual performance of
2 the hotel and should be incorporated. *See* Declaration of John D. Gordon in City Council's
3 LID Remand, (Jan. 8, 2021).
4

5
6 For example, compare the room rate and valuation for the appraisals in the table
7 below, where the actual average daily room rate for 2019 was \$204. Madison Hotel LLC
8 testified that the City Appraiser's assumed room rate was too high - it not only had not been
9 achieved, but even pre-Covid, was not reasonably achievable.
10
11
12
13
14
15

Hyatt Renaissance CWF-0418	City's Revised Appraisal	Madison Hotel LLC's Appraisal
Hotel Value	\$221,097,000	\$206,300,000
Less Personal Property	\$5,600,000	\$5,600,000
Real Estate Value	\$215,497,000	\$200,700,000
Benefit Ratio	0.50%	0.50%
Special Benefit	\$1,073,000	\$999,000
Levy Ratio	39.18%	39.18%
LID Levy	\$420,425	\$391,430
Average Room Rate	\$295	\$209
Daily RevPAR	\$236	\$176

16
17
18
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33 To correct the "before value" alone, the City Council should instead adopt Madison
34 Hotel LLC's valuation, which was developed using actual data, and otherwise applying the
35 City appraiser's assessment formula:
36
37
38
39
40
41
42
43
44
45
46
47

Hyatt Renaissance CWF-0418	Appraisal Amount
Hotel Value	\$116,292,000
Less Personal Property	\$5,600,000
Real Estate Value	\$110,692,000
Benefit Ratio	0.50%
Special Benefit	\$551,000
Levy Ratio	39.18%
LID Levy	\$215,894

The City's appraiser only slightly reduced his original values in ways that are still entirely inconsistent with historical performance data. The City's appraisal and analysis is speculative and should be rejected. The City Council should at least adopt Madison Hotel LLC's "before values" and resultant LID assessments.

C. In Light of Covid's Continuing Impact on Madison Hotel LLC and other Downtown Property Owners and other Material Changes Since October 2019, the LID Should be Cancelled, or at Least Assessments Recalculated, to take Into Account Property Value Reductions

In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e] into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and other relevant developments since October 2019." When Washington's first COVID restrictions were imposed in March and April 2020, there was an assumption that they would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover for another 5 years. Retail stores are boarded up. Homelessness and related challenges have gotten much worse. The City has already imposed higher minimum wages and taxes on businesses to try to fund recovery. The West Seattle Bridge and other bridges are in immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several

1 years from completion, as a best case. In current circumstances, a downtown tax to fund
2 new, non-essential park improvements against financially strapped taxpayers, and likely
3 passed through to financially strapped tenants and customers would be unfair to taxpayers
4 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
5 rethinks its budget priorities for the next few years, and its potentially funding sources,
6 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
7 property owners) have a chance to recover, and that any assessment take into account the
8 changed circumstances since this appeal process started on February 4, 2020 to avoid
9 unnecessarily and perhaps permanently killing downtown properties and businesses in the
10 name of bettering them.
11

12
13
14
15
16
17
18
19
20
21 **V. Relief Requested**

22 Particularly in light of the Committee's decision not to take further comment,
23 Madison Hotel LLC respectfully request that each Committee member carefully review the
24 record transmitted to Council before voting on our appeal.
25

43
44
45
46
47
MADISON HOTEL LLC respectfully reiterates its request from the September 22,
2020 appeal that the City Council:

1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
assessment dated December 30, 2019; or

2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
proposed final assessment to \$0 (zero), or such amount as Taxpayer establishes at the
hearing in this matter; or

3. Grant the Examiner's recommended remand but with instructions to
recalculate and reduce Taxpayer's assessment using recognized appraisal techniques
consistent with USPAP and

- 1 a. Excluding any property value increase attributable to viaduct removal and
2
3 other planned WSDOT Improvements;
4
5 b. Taking into account the effects of the COVID-19 pandemic on the value of
6
7 Taxpayer's property and other relevant developments since October 2019;
8
9 c. Accounting for and excluding (1) any special benefits from existing or
10
11 planned improvements that already provide similar benefits to Taxpayer's property, and (2)
12
13 any special detriments from construction and other anticipated LID-related disamenities;
14
15 d. Accounting for and including only those actual benefits anticipated to accrue
16
17 to Taxpayer's property based on its location relative to Pier 58, Overlook Walk, and the
18
19 Promenade, and specific elements of the LID Improvements;
20
21 e. Discounting anticipated special benefits to present value, based on reliable
22
23 estimates regarding when special benefits will start accruing following completion of the
24
25 LID Improvements; and
26
27 f. Accounting for such other issues specific to Taxpayer's property relevant to
28
29 calculation of such assessment; and
30
31 4. Grant such further relief as the City Council deems just and proper.

Hearing Examiner File No. CWF-0420

NOTICE OF APPEAL OF HEARING
EXAMINER’S FINDINGS AND
RECOMMENDATION ON LBA RV
COMPANY XXVIII, LP’S OBJECTION TO
WATERFRONT LID NO. 6751 PROPOSED
FINAL ASSESSMENT FOR PARCEL NO.
1117080020

33
34 LBA RV Company XXVIII, LP (“Taxpayer”) files this appeal pursuant to RCW
35 35.44.070, Seattle Municipal Code 20.04.090, City of Seattle Resolution 31915, the notice
36 of the Seattle Office of the City Clerk dated December 30, 2019, and the Hearing
37 Examiner’s Findings and Recommendation issued September 8, 2020 (“Examiner’s
38 Recommendation”).

31
32

33 **III. Statement of Taxpayer's Interest**

34
35 LBA RV Company XXVIII, LP owns the property that is subject to the proposed
36 final assessment described in Section IV. This property is located at 1601 2nd Ave., Seattle,
37 WA. The basement is occupied by a grocery store and the remainder of the building is
38 currently vacant.
39
40

41 The basis of the proposed assessment is a Final Special Benefit/Proportionate
42 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
43
44
45
46
47

1 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
2 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
3 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
4 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
5 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
6 to exclude charges for other improvement projects in the Central Waterfront, and
7 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
8 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
9 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
10 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
11 because construction was not complete on the LID Improvements or the WSDOT
12 Improvements at the time the Final Study was prepared, Mr. Macaulay's October 1, 2019
13 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
14 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
15 was based on the Final Study.

31 **IV. Matter Under Appeal**

32 Taxpayer appeals the Hearing Examiner's recommendation to deny Taxpayer's
33 objection to the City of Seattle's Waterfront Local Improvement District No. 6751 proposed
34 final assessment dated December 30, 2019 against the following property:

35 King County Parcel No. 1117080020
36 Site Address: 1601 2nd Ave., Seattle, Washington
37 Proposed Final LID Assessment for Parcel: \$670,407

38 See Examiner's Recommendation at 61-62, 104-105. To avoid repetition, Taxpayer
39 incorporates the evidence and arguments raised before the Hearing Examiner into this
40 appeal. In particular, Taxpayer points the City Council to Taxpayer's initial Appeal
41
42
43
44
45
46
47

1 Petition, *Frye* motion, Closing Brief submitted at the close of its case-in-chief (dated
2 4/16/2020), and supplemental Closing Statement submitted at the close of the City's case-in-
3 chief (dated 7/7/2020).¹
4

5
6 As discussed more fully below, Taxpayer specifically appeals the following Findings
7 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
8
9 Pages 61-62, 104-105, Sections II.6, II.7, II.14, II.18, II.19, II.20, II.21, II.22, II.23, II.24,
10 II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3, IV.B.4,
11 IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
12 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.8, IV.C.11,
13 IV.C.12, IV.C.14, and IV.C.18.
14
15

16 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
17 recommendations on material issues raised during Taxpayer's appeal that were supported by
18 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
19 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
20 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
21 recommended anything other than denial of objectors' appeals were where the City's
22 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
23 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
24 special assessments based on "fundamentally wrong methods."
25

43
44
45
46
47

¹ Because the City has not provided "metered index numbers," our appeals cannot reference them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the Public Works committee secure and provide appellants with such a record, so that the appeals can then be supplemented with that additional information, so as to make the Committee's consideration of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated, citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$1,711,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
5 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS’s appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City’s appraiser asserts that the City is not collecting assessments “based
16 on the value of WSDOT’s planned improvements.” See Final Study at 3. However, the
17 City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition,
18 the City’s appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City’s promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT’s planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City’s appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be “physical and material and not merely speculative
35 or conjectural”
36

37
38 **ABS Study:** Not only are the improvements not yet “physical or material,” but
39 environmental review and permitting for the City’s proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City’s then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
2 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
3 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
4 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
5 Final Study fails to meet basic standards for admissibility and must be remanded.
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6
7 **V. Standard of Review**
8

9 “When considering the assessment roll, the city council sits ‘as a board of
10 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
11 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
12 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
13 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
14
15

16 The proposed assessments are presumed correct, “unless overcome by clear, cogent
17 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
18 than the heightened presumption of correctness on judicial appeal because “applying these
19 elevated standards at the municipal hearing would afford unwarranted deference to a report
20 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
21 presumption is not evidence and its efficacy is lost when the other party adduces credible
22 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
23 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
24 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
25 presented credible evidence showing that the City’s proposed assessment is arbitrary,
26 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
27 to the City to prove the assessments are actual, measurable, special, non-speculative and
28 proportionate. The City failed that burden.

1 **VI. Grounds for Appeal**

2 Taxpayer appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington
12 court has explained: "[W]e have explicitly rejected an argument that, because certain
13 protestors 'failed to offer expert testimony at the city council hearing[,] the presumptions [in
14 favor of the assessment] were still operative as to their property.'" *Hasit*, 179 Wn. App. at
15 946 (quoting *In re Indian Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kusky v. City of*
16 *Goldendale*, 85 Wn. App. 493, 933 P.2d 430 (1997) (although appraiser did not submit an
17 appraisal, he provided expert opinion showing that improvements actually diminished value
18 of the property). In fact, no independent evidence is required at all if, for example, objectors
19 show that the assessment was grounded on a fundamentally wrong basis due to an error in
20 the City's appraiser's methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
21 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
22 a property owner could simply point out that the square footage assumed in the City's
23 appraisal was incorrect. For these reasons, Taxpayer appeals the following portions of the
24 Examiner's Recommendation: Sections II.14, IV.A, IV.B.11(a), IV.C.8, and IV.C.11.
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

2 2. RCW 35.43.040 provides cities and towns authority for ordering local
3
4 improvements and for levying and collecting special assessments “on property specially
5 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed
6
7 upon all the property in accordance with the special benefits conferred thereon.” RCW
8
9 35.44.010.
10

11 3. No analysis of general benefits. Special assessments have been “held valid
12
13 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
14
15 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
16
17 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
18
19 they are for the construction of local improvements that are appurtenant to specific land and
20
21 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
22

23 4. Taxpayer’s property is not specially benefited by the LID Improvements.
24
25 The primary purpose and effect of the LID Improvements are to benefit “members of the
26
27 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
28
29 library is for the benefit of the members of the whole community individually and
30
31 collectively who may be served by it”). Mr. Macaulay’s own chapter of the LID Manual
32
33 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
34
35 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
36
37 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
38
39
40
41

42
43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 that if an appraiser “identifies both general and special benefits, these benefits should be
2 clearly distinguished and explained, and only special benefits should be included in the
3 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
4
5 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4. It is undisputed that Mr. Macaulay did not
6
7 analyze or measure general benefits, including those arising from construction necessary to
8
9 meet basic design standards. *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration
10
11 may also be given to those construction costs related to meeting design standards which may
12
13 be general benefits as distinct from construction costs emanating from requirements of the
14
15 LID project”). To the extent Taxpayer’s property may benefit from the LID improvements,
16
17 the benefit is general and incidental, and failure to consider general benefits was a fatal flaw
18
19 in the City’s methodology. For these reasons, Taxpayer appeals the following portions of
20
21 the Examiner’s Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and
22
23 IV.C.4.
24
25

26
27 5. LID Improvements not necessary. Unlike typical LID projects, the
28
29 Waterfront LID improvements are largely unnecessary to the functionality of any particular
30
31 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
32
33 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
34
35 held invalid where owners would have benefitted equally from increase of only 9 feet);
36
37 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
38
39 intersection for new water main for hydrant held invalid because land was already afforded
40
41 functional hydrant at nearby street). Specifically, Ross Beckley, representative for
42
43 Taxpayer, testified that the proposed LID Improvements are not necessary to the use of this
44
45 property as an office and retail space. Hrg. Exhibit 112 (Decl. of R. Beckley) at ¶ 11.
46
47

1 6. The fact that there is no case law differentiating between binary
2
3 improvements and parks does not change the law prohibiting assessments on properties
4 already adequately served by existing amenities. *See* Examiner’s Recommendation at
5
6 IV.C.3 (reasoning that “no case law is provided to support the differentiation between a
7
8 hardscape benefit and the more ephemeral benefits of park”). Nor does the Examiner’s
9
10 reasoning excuse the City’s failure to account for existing amenities as part of the special
11
12 benefit calculation. As Dr. Crompton testified, existing view amenities may in fact diminish
13
14 the incremental effect of new park improvements on the value of properties, much like
15
16 turning on a weak light in an already brightly illuminated room. *See* Hrg. Exhibit 94
17
18 (Crompton’s Report) at 12-13.
19

20 7. To the extent benefits can be considered “special” as opposed to general, they
21
22 are nominal or nonexistent for many properties even in the Central Waterfront, which
23
24 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
25
26 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties’ fair market value did not
27
28 change due to expansion of sewer service *near* owners’ parcel which were already
29
30 connected). Even if the City could assess for a view change (and it has promised not to
31
32 assess for viaduct removal), the fair market value of Taxpayer’s property has not changed
33
34 because the LID Improvements have not improved the property’s waterfront view or access
35
36 to the waterfront, nor will they when the City anticipates completion in 2024. For these
37
38 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
39
40 Sections IV.C.3, IV.B.9, and IV.C.3.
41

42 8. No analysis of special detriments. The Final Study fails to properly account
43
44 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
45
46 owners for removal and cleanup of underground storage tanks discovered during the
47

1 improvement project). Although Mr. Macaulay claims he analyzed impacts on the City's
2 planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation
3 of how lost parking might be a detriment, and no property-specific parking analysis in any
4 of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12; *see also* 6/26/2020 Hrg.
5 Tr. at 153:18-154:19 (did not actually analyze impact of decreased parking on condos).
6
7
8
9

10 9. Likewise, there was no analysis of the risks associated with disamenities such
11 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
12 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
13 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
14 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
15 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
16 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
17 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
18 the maintenance agreement. *Id.* at 13:4-14:2.
19
20
21
22
23
24
25
26
27

28 10. There was also no consideration of negative impacts from another four-plus
29 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
30 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
31 law allowing him to dismiss these actual, non-speculative impacts. Because future special
32 benefits calculations are inherently speculative, Washington's eminent domain statute
33 specifically allows condemnees to postpone special benefits assessments until improvements
34 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
35
36
37
38
39
40
41
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
2 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
3 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
4 Greenway, the Greenway district “significantly” lagged in value).
5
6
7

8
9 11. Meanwhile, Mr. Beckley testified that the proposed LID assessment of
10 \$670,407 is a substantial additional cost to the TwoPine building, which will decrease the
11 fair market value of the property. Hrg. Exhibit 112 (Decl. of R. Beckley) at ¶ 12. No
12 rational office and retail building owner would invest \$670,407 today in a project that will
13 have no return for either the five years of planning and construction or the period afterward.
14 *Id.* In his professional opinion, the TwoPine building will receive no special benefit from
15 the proposed LID Improvements. *Id.* at ¶ 13. Further, the revenue and demand increases that
16 the TwoPine building would need to generate to recover the LID assessments are unrealistic
17 given the downtown Seattle commercial real estate market conditions, which have been
18 severely impacted by the COVID-19 outbreak. *Id.* at ¶ 14.
19
20
21
22
23
24
25
26
27

28
29 12. For these reasons, Taxpayer appeals the following portions of the Examiner’s
30 Recommendation: Sections II.25, IV.B.8, and IV.B.9.
31

32
33 13. Special benefit estimate is speculative. When calculating a special benefit,
34 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
35 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
36 becomes pure speculation.” *Id.* (quoting *In re Local Imp. 6097*, 52 Wn.2d 330, 335–36, 324
37 P.2d 1078 (1958)).
38
39
40
41

42
43 14. Assuming without conceding that one day, the City’s planned LID
44 Improvements might increase the value of neighboring properties to some extent, that
45 potential benefit is many years away and speculative. While appraisers tolerate some degree
46
47

1 of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is
2 far too speculative to satisfy industry practices and standards.
3

4
5 15. Although LIDs are sometimes finalized prior to completion of improvements,
6 this is typically just six month or a year prior, and the assessments are otherwise supported
7 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
8 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
9 will not be realized for four or five years. In the meantime, there is permitting risk,
10 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
11 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
12 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
13 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
14 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
15 testified: "I just don't know what the market value would be as of the date the project would
16 be finally constructed" because "[t]here could be a lot of elements in the market that did
17 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
18 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
19 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
20
21

22
23 16. The record is clear that while no one can know what "special benefit" might
24 accrue to these properties in four years (if any), we do know that there are no actual benefits
25 now. The LID improvements provide no immediate special benefit to property owners
26 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
27 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
28 sewer system for future users). For example, notwithstanding the questionable hypothesis
29 that retail may benefit from an expected increase in tourism when the improvements are
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 complete, it is undisputed that tourists are not coming in larger numbers and paying higher
2 room rates now because of something happening five years down the road.

3
4
5 17. Further, there are no “plans and specifications” on file with the Clerk’s Office
6 for the LID Improvements, and it is unlawful to move to final assessments without such
7 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
8 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
9 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
10 dollars on projects still early in the design process. *See* Washington Attorney General
11 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
12 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
13 of programs and included “only so much of the overall costs” that took place within and
14 benefitted the assessed properties).

15
16
17 18. The COVID-19 crisis highlights how fundamentally speculative and unfair it
18 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
19 anticipated to be delivered five years later. Even before COVID, it was speculative to
20 assume that market highs experienced in October 2019¹ would be sustained through 2024,
21 after an already extraordinarily long expansion period. *See, e.g.,* 3/3/2020 (A. Gibbons)
22 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
23 my analysis in October 2019, who would have thought that this COVID issue would
24 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
25 process was that the market was going to continue to go up.” But there is no basis for
26 assuming that values hypothesized in October 2019 will remain relevant; they are already
27 irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶ 12 (dated 7/7/2020). Although
28 COVID does not change actual values as of October 2019 (*see* Examiner’s
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 Recommendation at 109), the pandemic has impacted *current* values and rendered the
2
3 hypothetical October 2019 Final Study valuations outdated.

4
5 19. As another example of how future events could affect the accuracy and
6
7 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
8
9 Examiner re-open the record to allow the City to explain whether the assessments against
10
11 property owners within the LID are, in fact, being used by the City to fund the emergency
12
13 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
14
15 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
16
17 would be improperly imposing costs on property owners within the LID for improvements
18
19 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
20
21 habitat and City infrastructure—this does not provide any special benefit to LID property
22
23 owners.

24
25 20. There is also no certainty the improvements will be delivered on time. Mr.
26
27 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
28
29 delay in construction schedule would not constitute a “material change” under the City
30
31 Council’s ordinance authorizing the improvements. In other words, the City cannot
32

33
34 ⁴ Associated Press, *Seattle mayor approves ‘emergency dismantling’ of waterfront Pier 58* (King
35 5, Aug. 15, 2020), available at <https://www.king5.com/article/news/local/seattle/seattle-mayor-approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-0b60d4097aa3>; See Aug. 21, 2020 Memo from R. Holtz et al. to L. Arber re HPA Request for Pier

41
42
43
44
45
46
47 ⁵ Asia Fields, *‘Substantial’ pier shift closes Seattle’s Waterfront Park* (Seattle Times, Aug. 8, 2020), available at <https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/>.

1 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
2 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
3
4 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
5
6 potential delays and project changes inherent in those processes, that call into question the
7
8 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
9
10 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
11
12 Decl., dated 4/15/2020).
13

14 21. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
15
16 he could not point to a single one where the assessment roll was finalized five years in
17
18 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
19
20 he has never recommended final special assessments based on designs less than 30 percent
21
22 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
23
24 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
25
26 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
27
28 at 66:17-25. He performed no independent due diligence to determine the reliability of the
29
30 City’s estimates for completion of the LID Improvements, or to ensure that proposed
31
32 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
33
34 agreed that if any of his assumptions are incorrect, his opinion of market value would need
35
36 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
37
38 68:11-18.
39

40 22. The City has cited no authority—and Taxpayer is aware of none—that
41
42 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
43
44 assess taxes for “actual” special benefits that will not accrue for another five years (if all
45
46 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
47

1 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
2 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
3 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
4
5 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
6
7 IV.C.14, and IV.C.18.
8
9

10 23. Failure to discount special benefit estimates to account for risks and present
11 value. Due to the inherent uncertainty, Taxpayer’s expert opine that the Final Study should
12 have accounted for risks associated with delivery of the improvements (including permitting
13 risk, construction risk, general economic risk) and any special damages associated with
14 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
15 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
16 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
17 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers routinely consider
18 the impact of future conditions [through] discounted cash flow analysis.”).
19
20

21 24. Mr. Macaulay acknowledged that appraisers can discount the value of a
22 future condition not in place at the date of valuation and can discount for the time value of
23 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
24 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
25 Discounting would also have been consistent with his approach for analyzing special
26 benefits to vacant land. He testified that the difference between similarly situated vacant
27 sites slated for development and already developed sites was that the labor, capital and risks
28 associated with development had not yet been borne for those vacant sites. Therefore, the
29 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
30 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been

47

1 fully permitted, has not completed environmental review, and has not reached full design is
2 presently worth significantly less.
3

4 25. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
5 present value, an appraiser would consider discount rates for land development to account
6 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
7 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
8 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
9 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
10

11 26. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
12 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
13 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
14 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
15 ignoring momentarily all of the other methodological and other flaws discussed here and in
16 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
17 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
18 exceeds special benefits when reduced to present value. Further, to the extent the City is
19 arguing that because they are permitted to assess 100% of the special benefit, the special
20 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
21 is again wrong. After applying proper discounting, the City's proposed special benefit
22 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
23 100% of the total estimated special benefit.
24

25 27. But even the assumption that the LID improvements would deliver benefits
26 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
27 on. Rather, those studies demonstrate that a discount period of five years is conservative.

45
46
47

1 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A’s study
2 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay’s backup files)
3 indicates that during the construction period, the Greenway district “significantly” lagged in
4 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
5 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
6 30-31 (discussing New York City High Line and San Francisco Embarcadero
7 improvements). Given the lengthy delay, any prediction of future special benefits is
8 speculative, especially during the construction phase where values are likely to decline. And
9 assuming the LID Improvements take a similarly long period of time after they are complete
10 to start producing tangible property value benefits, each additional year of delay results in
11 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
12 Closing Stmt., ¶ 19, Ex. A.

13
14
15 28. Applying the same discounting methods described above and in Mr. Gibbons
16 declaration, the 2019 net present value of ABS’s estimate for benefits that actually start
17 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
18 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
19 100% assessment should be no more than \$161,176. Anything more would permit the City
20 to assess Taxpayer based on a hypothetical assumption that these improvements are in place
21 and providing benefit, and ignore the risks, construction disamenity, and time value of
22 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
23 would counsel that the assessment should be only 39.2% of that assessment cap, or \$63,181.

24
25 29. Attachment C includes two Excel spreadsheets applying these discounting
26 methods to Taxpayer’s assessment. It is undisputed that special benefits will not actually
27 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet

1 demonstrates that discounting the City’s hypothetical October 2019 special benefits to
2 present value would reduce Taxpayer’s assessment to \$230,008, exclusive of any other
3 flaws in the City’s proposed assessment. The second spreadsheet shows even more drastic
4 reductions after taking into account: (1) a rough discount for property value loss due to
5 COVID-19; and (2) discounting to present value for 5 years (*i.e.*, from 2024 when the City
6 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
7 the time it takes for the improvements to capture property value). After such reductions,
8 Taxpayer’s assessment would be just \$201,257 (for the 5-year discount) or \$55,299 (for the
9 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer’s
10 appeal, but are intended to help demonstrate how unfair and inflated the City’s proposed
11 hypothetical assessment is. The Hearing Examiner’s Recommendation simply dismisses
12 Taxpayer’s discounting argument without legal or factual analysis; that failure is error.

24 **Appraisal and Assessment Calculation Methods Are Flawed**

25
26 30. The “general rule is that each lot, piece, or parcel of land should be assessed
27 separately” for purposes of local improvement district special assessment. *Doolittle*, 114
28 Wn.2d at 97.
29
30
31

32 31. It is proper to sustain a challenge to an assessment, even without the appraisal
33 testimony from the owner, where the objector’s expert establishes that the assessment was
34 “clearly grounded upon a fundamentally wrong basis” due to an error in the method
35 employed by the City’s appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
36
37
38
39

40 32. The City’s appraiser purports to utilize the income method of valuation but
41 relied on inaccurate revenue and market data, as discussed further below.
42
43
44

45 33. The City’s appraiser purports to utilize the comparable sales method of
46 valuation, but no City witness attempted “to characterize any one, or all of them, as
47

1 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
2 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
3 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
4 characterize any one, or all of them, as comparable to any particular property within the LID").
5 And no City witness could explain how specific adjustments were made to these sales to
6 account for value increases due to the hypothesized Before and After Improvements. For this
7 reason, Taxpayer appeals Section II.23 of the Examiner's Recommendation.
8

9
10 34. Special assessment improperly includes value lift from the Before
11 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
12 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
13 Improvements, which WSDOT had independently committed to fund. However, Mr.
14 Macaulay did not calculate the actual market value of LID properties in October 2019, and
15 did not separately analyze the hypothetical increase to property values attributable to
16 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
17 current value and then separately calculate a hypothetical "With WSDOT" Before value);
18 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
19 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
20 3-4. Without any documented basis or support, Mr. Macaulay simply "ma[de] a judgment a
21 call" on what occupancy and rates would have been for the commercial properties assuming
22 all of the WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-
23 130:11. This outright omission precludes any independent evaluation of the true market
24 "Before" values. *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional
25 appraisal standards; if an appraiser uses current sales data to infer values, then the appraiser
26 must explain how he analyzed that data and other information to come up with the
27
28
29
30
31
32
33
34

47

1 hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just
2 removal of the viaduct, but also other road, pedestrian and landscaping improvements
3
4 WSDOT had already committed to make.
5

6 35. However, because Mr. Macaulay testified that he did include some WSDOT-
7 related value-lift in the “Before” values, it follows that part of the special assessment
8 improperly is based on value attributable to the WSDOT Improvements. As shown by
9 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
10 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
11 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
12 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
13 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
14 to properly exclude the value of Before Improvements from the assessments. For these
15 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
16 Sections II.19, II.29, and IV.B.11(a)(ii)
17
18

19 36. Special benefits were assigned rather than measured. Mr. Macaulay
20 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
21 property. *See* 1/30/2020 A. Gibbons Letter (attached to Appeal Petition); 3/3/2020 (A.
22 Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr.
23 Macaulay used to analyze the commercial properties, it is clear that Mr. Macaulay based
24 adjustments on hypothesized very small increases to property revenue and very small
25 reductions to cap rates to “calculate” an “After” value due to the coming 2024 LID
26 Improvements. Attachment B (ABS Spreadsheet). These series of micro adjustments were
27 based on “professional judgment” that are neither shown nor replicable.
28

35
36
37
38
39
40
41
42
43
44
45
46
47

1 37. For these reasons, Taxpayer appeals the following portions of the Examiner's
2 Recommendation: Sections II.19 and IV.B.11(a)(iii).
3

4 38. Special benefit falls within margin of error. The Final Special Benefit Study
5 applies an estimated value enhancement of less than 4%, which is generally within the
6 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
7 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
8 Taxpayer's experts explained that if two appraisers independently arrive at values within 5%
9 of one another, this difference is considered reasonable as it falls within the standard margin
10 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9. Because Mr.
11 Macaulay's micro-special benefit percentages fall far below that 5% margin, "there is no
12 way of authenticating" such incremental changes because "[m]arket forces completely
13 obliterate any tiny little noise factor like that." *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
14 160:23-161:5. Mr. Macaulay agreed during his deposition that 0.25% is too small to
15 measure. Macaulay Depo. at 25:17-25. Additionally, the fact that "Before" values are also
16 based on a hypothetical that adds some unstated incremental value to actual 2019 values
17 exacerbates this issue—the ability for an appraiser to discern the micro-value differences
18 between hypothetical conditions that are so similar (the WSDOT improvements compared to
19 the LID improvements) "verges on being ludicrous." 3/3/2020 (A. Gibbons) Hrg. Tr. at
20 89:4-90:7.
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37

38 39. Even if it were possible to accurately tease out such a miniscule hypothetical
39 value change due to improvements coming five years later, experts testified that there is no
40 data to justify the mathematical adjustments—they are just the appraiser's guesses as to
41 what he felt the changes (hypothetically) would be. *See, e.g.*, 3/3/2020 (A. Gibbons) Hrg. Tr.
42 at 88:21-88:24 ("you cannot measure one percent difference in a high-rise building for this
43
44
45
46
47

1 kind of a medium ... it's simply assigned to a before value"). For these reasons, Taxpayer
2
3 appeals the following portions of the Examiner's Recommendation: II.27 and IV.B.4.
4

5 40. No analysis of value increase attributable to individual components of the
6 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
7
8 percentage difference between hypothetical Before and After conditions. Throughout his
9
10 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
11
12 descriptions in the Addenda even though he testified that he relied on these to calculate
13
14 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
15
16 someone might be able to determine how he attributed value to After conditions described in
17
18 the Addenda, he answered that that was "not the scope of the assignment" because he was
19
20 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
21
22 that the six components were not actually a continuous project, that he was viewing them
23
24 together because the City asked him to, and that if he were to view them independently,
25
26 there was a low probability that properties in the north would specially benefit from
27
28 improvements in the south and vice versa. See 6/25/2020 Hrg. Tr. at 27:18-28:5.
29

30 41. Not only did he fail to analyze benefits from each of these non-contiguous
31
32 improvements, his familiarity with descriptions as whole was tenuous at best. See, e.g.,
33
34 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
35
36 arose from specific Before/After descriptions in the Addenda); cf. *Anderson v. City of*
37
38 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
39
40 objectives that guided regulators' assessment of architectural plans for buildings along a
41
42 "signature street" were so vague that they amounted to ad hoc review based on the
43
44
45
46
47

1 regulators' subjective impressions and feelings).⁶ It became clear through his testimony that
2 even though he used the renderings as "visual aid[s] in appraising the property in the before
3 and after" to "visually see what the differences would be," he could not explain what
4 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
5 when shown a rendering of a two-lane road going down to one-lane in the After condition
6 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
7 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
8 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
9 could explain the depiction of the same trees in the After condition nearly twice as tall as in
10 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
11 of the Examiner's Recommendation: II.27 and IV.B.4.
12
13
14
15
16
17
18
19
20
21

22
23 42. Special assessment is not supported by comparable studies, data or reports.

24 Mr. Macaulay's references to empirical research do not justify his fundamental assumption
25 that the LID Improvements will lead to meaningfully increased real estate values for
26 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
27 comparable sales or information from the "over twenty-five studies and reports" to arrive at
28 very precise special benefit increases for the commercial properties, including Taxpayer's
29 property. For example, although Mr. Macaulay stated that no single report or study was
30 directly on point due to the unique nature of the LID Improvements (*see, e.g.*, 6/25/2020
31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must "be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit." *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
2
3 parcel-by-parcel analysis other than to say that the studies generally provided “some
4
5 background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
6
7 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
8
9 similarities and differences between these improvements and the comparable parks he
10
11 looked at).

12 43. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
13
14 assignment of incremental increase of 0.5% to 4% to property values within the LID.
15
16 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
17
18 research misinterprets his work in critical ways, including because the LID Improvements
19
20 manifest the characteristics of a parkway (not a park), and his research indicates that most of
21
22 a *park’s* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
23
24 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
25
26 related value increases are in fact smaller; that estimated increases are “best guesses” rather
27
28 than predictions of property value increases in a particular city; and that percentages do not
29
30 account for diminishing returns after taking into account water views, which would be the
31
32 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
33
34 topography grants most properties in downtown a water view.
35

36 44. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
37
38 that this was just one source of information that was not entirely relevant because, among
39
40 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
41
42 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
43
44 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
45
46 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
47

1 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
2
3 Crompton concluded that 500 feet via road from “park” improvements is just one or two
4
5 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
6
7 significantly beyond that which the park study indicated (even if it was legitimate to use the
8
9 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
10
11 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
12
13 impact applicable to “community parks”—which the LID Improvements are not. *Id.*
14
15 Taxpayer’s property is not within 500 road network feet from the “park” improvements. *See*
16
17 Hrg. Exhibit 104 (Ellen Kersten Decl.) at Ex D.

18
19 45. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
20
21 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
22
23 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
24
25 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
26
27 materials, it was clearly an important—if not *the* most important—source of information for
28
29 estimating special benefits (especially with respect to the condos).⁷ No City witness
30
31 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
32
33 parcel-by-parcel analysis.

34
35 46. The destination parks discussed in the Final Special Benefit Study do not
36
37 provide reliable, comparable, and valid support for the calculation of special assessments
38
39 here. Gibbons 5/2/2018 Letter (attached to Appeal Petition) at 4. None of the parks cited in
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 the Final Special Benefit Study were funded by a LID. And in virtually all of those cases,
2 the park improvements dramatically restored unimproved or blighted areas, and properties
3 evaluated were within two or three blocks of the park.
4

5
6 47. ABS's claimed reliance on three economic studies to support property value
7 increase is also flawed. The HR&A study does not inform what value increases are
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
10 dissimilar parks in other cities,⁸ making the methodological application to the LID
11 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
12 conclusion that there would be *no new net visitors* from downtown residents as a result of
13 the LID Improvements and could not explain how this impacted his condo analysis.
14

15
16 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
17 Property Values" primarily focused on whether the benefits accrue to the larger community
18 rather than properties adjacent to the park. And the 2014 New York City Department of
19 Transportation study is not based on real estate transactions and market sales and fails to
20 substantiate any link between increased retail sales and property values. Moreover, this
21 study only looked at impact either directly abutting the streetscape improvement, or a couple
22 hundred feet for plaza-like improvements.
23

24
25 48. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
26 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
27

28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
2 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
3 compared with HR&A's estimate of \$191 million for just the waterfront improvements, and
4 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
5 asked whether he considered that HR&A's estimated LID impact is six times greater than
6 TPL's assessment of Seattle's entire park system, he surmised that it was because the
7 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
8 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
9 assumptions to account for this difference, which may be partly explained by the fact that
10 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
11 approximately 3.44% of King County tourists visit Seattle primarily because of the city
12 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
13 waterfront improvements.

26 49. Although proximity to the improvements is a key factor in all of these
27 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
28 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
29 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
30 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
31 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
32 Improvements is approximate 20 acres and it is not a community park.⁹

43
44 ⁹ *See*
45 [https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf)
46 [Qs_Final.pdf](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf) ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle's central waterfront to downtown.").

1 50. There is no explanation in the Final Study or the supporting materials of how
2 the studies or comparable sales were used to derive values for Taxpayer's property. For
3 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
4
5 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.
6
7

8 51. Failure to comply with USPAP. Taxpayer's assessment also rests on a
9 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
10 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12 Study does not meet mass appraisal standards nor allow for independent assessment of the
13 accuracy of Mr. Macauley's conclusions.
14
15

16 52. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
17 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
18 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
19 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
20 testimony suggests that he incorrectly believed that the only difference between direct
21 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
22 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
23 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
24 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
25 Gordon uses in doing his limited restricted report").
26
27

28 53. But the difference is not only in reporting—mass appraisal techniques must
29 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
30 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
31 parcel approach:
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 The mass appraisal technique is an appraisal method used to evaluate
2 a group of properties that are subject to similar market forces as of a
3 certain date through the use of market data, statistical analysis and
4 testing. As a result, the mass appraisal technique does not require or
5 involve analysis of each individual property's specific data.
6

7
8 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).

9
10 54. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
11 universe of properties as a given date using standard methodology, employing common data,
12 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
13 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
14 model" is "a mathematical expression of how supply and demand factors interact in a
15 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
16 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
17 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
18
19
20
21
22
23
24

25
26 55. Regardless of client direction, Mr. Macaulay is required to comply with
27 USPAP. So if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have been
28 economically feasible because it would have taken "an incredible amount of time and cost"
29 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
30 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 ("performing an
31 individual appraisal of each [condo] parcel would have been cost and time prohibitive").
32
33
34
35
36

37
38 56. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
39 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
40 value, fails to calibrate the model structure to determine the contribution of the individual
41 characteristics affecting value, and does not review the mass appraisal results against actual
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
3

4 57. Mr. Macaulay explained that factors like “aesthetic change in the area, the
5 proximity to the elements, the increase in market rent, market vacancy changes,
6 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
7 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
8 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
9 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
10 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
11 internal review process. *Id.* at 104:24-105:20. And because both the Before and After
12 values were hypothetical, it was not possible to identify matched pair sales and no City
13 witness explained how ABS Valuation made adjustments to “comparable” sales in order to
14 check their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which
15 requires him to explain his model structure.
16
17
18
19
20
21
22
23
24
25
26
27

28 58. For these reasons, Taxpayer appeals the following portions of the Examiner’s
29 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
30
31
32
33

34 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner’s denial of that motion.
4

5 59. Finally, Taxpayer’s property is not appurtenant—or even in close
6
7 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
8
9 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
10
11 close proximity to the property on which expert testimony was given”). Indeed, Taxpayer’s
12
13 property is not even within 500 road network feet from the core “park” improvements. And,
14
15 as described above, the special assessment is overstated because the Final Study makes no
16
17 attempt to determine general benefits, existing amenities for Taxpayer’s specific property, or
18
19 special detriments. In addition, it is speculative due to the fact that, as of October 2019,
20
21 improvements were not in in place—and, in fact, much of the waterfront is a construction
22
23 zone following removal of the viaduct and now Pier 58 demolition. Under these
24
25 circumstances, rather than relying on entirely imaginary income and shaky hypotheticals,
26
27 Mr. Macaulay at the very least should have discounted the special benefit estimates or
28
29 waited to perform the Study until the improvements were at least close to complete.
30

31 **Erroneous Pre-Improvement Valuation**

32
33 60. The proposed final assessment erroneously overstates the pre-improvement
34
35 value of Taxpayer’s property as of October 1, 2019 and, as a result, overstates the special
36
37 benefit to the Taxpayer’s property.
38

39 61. The City’s Final Study was used to compute the proposed final assessment of
40
41 Taxpayer’s property. The City’s Study purportedly uses data from the King County
42
43
44
45
46
47

1 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
2 Study does not accurately reflect this data. For example, the City's Study values Taxpayer's
3 property at \$61,054,000 as of October 1, 2019. However, the King County assessor
4 determined the true and fair value of the property to be \$33,270,000, valued in 2019 for tax
5 year 2020. In other words, the Final Special Benefit Study's valuation is 184% of King
6 County's assessed value. The Final Special Benefit Study does not explain this difference—
7 or any differences—between its pre-improvement valuation and its supposed source for
8 market data. For this reason, Taxpayer appeals Section IV.C. of the Examiner's
9 Recommendation.
10

11 62. In addition, Mr. Beckley testified that there is no evidence the City took into
12 account the fact that redevelopment of this property is restricted due to the fact that
13 development rights have been sold. Hrg. Exhibit 112 (Decl. of R. Beckley) at ¶ 10. Mr.
14 Macaulay claims he knew about the sold development rights but does not otherwise explain
15 his Before valuation or provide any other specific testimony regarding this property. *See*
16 Second Decl. of Macaulay, ¶¶ 2, 65-69 (dated 6/26/2020). There is no analysis of the sold
17 development rights in the spreadsheet for this property, ABS's backup data, or anywhere in
18 the Final Study. Thus, aside from multiple other reasons why computation of the special
19 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
20 improvement values that do not accurately reflect market data. For this reason, Taxpayer
21 appeals pages 104-105 of the Examiner's Recommendation.
22

44

45 ¹¹ *See, e.g.*, Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

Erroneous Computation of Special Benefit

63. “Special benefit” is “the increase in fair market value attributable to the local improvements.” *Doolittle*, 114 Wn.2d at 103. “A benefit that a particular piece of property may receive by reason of the improvement is not measured alone by the physical character or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is the particular tract or property benefited by the entire improvement, and is it assessed proportionately with the other property included within the assessment district?” *Id.* 165–66.

64. The proposed final assessment erroneously overstates the special benefit of LID improvements in a number of ways.

65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For the TwoPine property, Mr. Macaulay assumed office rental rates would increase by 0.45% (low) and 2.27% (high) due to the 2024 LID Improvements. But it is not possible to accurately conclude that the reason for this level of percentage increase would be due to the LID Improvements, and there appears to be no support for assignment of these percentages. Based on formulas in the spreadsheets, Mr. Macaulay then uses these same percentages (0.45% and 2.27%) to increase retail rental rates. He then uses this hypothesized increased revenue to calculate a new net operating income for the commercial properties and capitalizes that to come up with an “After” valuation.

66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net operating income remains the same as in the hypothetical “Before” condition, but changes the cap rate. For the TwoPine property, the cap rate goes from 4.90% to 4.80% (low scenario, creating a bigger value increase) and 4.75% (high scenario, creating a lower value

1 increase). But cap rate changes of 0.10% or 0.15% are not typically measurable, and there
2 appears to be no support for these changes in the Final Study or any of its supporting
3 materials.
4

5
6 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
7 benefit conclusion. For this property, this is an increase in property value of 2.80% due to
8 the LID Improvements.
9

10
11 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
12 and capitalization rates. When asked precisely what the basis is for his special benefit
13 percentage increases to revenue for each commercial property, he could not point to
14 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
15 is nothing in the report to allow a reader to understand how he came up with these
16 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
17 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
18 the basis for his belief that certain factors—liked increased connectivity—will increase
19 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
20 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
21 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
22 sources equally even though there was no separate analysis done for food and beverage or
23 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
24 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
25 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
26 properties.
27

28
29 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
30 check for commercial properties. But as explained above, no City witness has explained
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 how anyone, or all, of the sales are comparable to any particular commercial property within
2 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
3 in order to make sales “comparable,” he would have had to make adjustments to account for
4 Before and After conditions, but there is no way to understand how adjustments were made
5 because he “didn’t do a separate sales comparison approach where we showed adjustments
6 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
7 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
8 *Id.* at 127:10-128:24.
9

10
11 70. It also bears noting that any “internal review” of the special benefit estimates
12 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
13 error. Indeed, given all the same information, he seemed to suggest that it would be
14 perfectly reasonable for another experienced appraiser to come up with special benefit
15 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
16 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
17 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
18 margin of error conflicts with the testimony of Taxpayer’s experts and reaffirms that there
19 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
20 margin of error (5%) is a “rule of thumb” and not a “hard legal standard,” there are still
21 reasonable and unreasonable variations within the appraisal field. *See Examiner’s*
22 *Recommendation* at IV.B.4. Thus, the special assessment is not actual, measurable or
23 special because it is arbitrarily assigned; and it is too small to realistically be supported by
24 appraisal techniques.
25

26
27 71. No evidence of special benefit. Meanwhile, there is “no actual evidence from
28 any seller or purchaser that the price was higher because of the LID improvements.”
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City’s appraiser “has not
2 identified any seller or buyer, or any particular property where the existence of the LID
3 improvements had an effect on the market price.” *Id.* at 410-11. Meanwhile, Taxpayer has
4 explained that the property has not increased rental rates or revenue due to the forthcoming
5 LID Improvements, because, among other reasons (and apart from COVID), the
6 improvements ABS believes will generate value do not exist, and will not for a number of
7 years to come. There are no comparable sales because the LID Improvements are not in
8 place, nor will they be until the end of 2024 if completed on schedule.
9

10
11 72. The fair market value of Taxpayer’s property has not changed due to
12 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
13 benefited from installation of new water main and fire hydrant where it was already
14 adequately supplied with water and afforded adequate fire protection). And in any event,
15 any value attributable to removal of the viaduct was to be excluded from the assessment
16 calculation.
17

18
19 73. There is no special benefit because LID improvements in fact diminish the
20 value of Taxpayer’s property by, for example, imposing an immediate tax on the property
21 while providing no immediate benefits. *See Kusky*, 85 Wn. App. 493 (testimony of owners’
22 expert that LID actually diminished value of property was sufficient to rebut presumption
23 that assessment was proper).
24

25
26 74. Moreover, the assessment formula is an attempt to distribute costs that do not
27 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
28 “merely a mathematical model that distributes costs”).
29

30
31 75. The Special Benefit Study fails to address whether the \$346,000,000
32 estimated LID project cost takes into account the investment that would have occurred in the
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
2 invested. This is a critical component of estimating which properties receive a direct benefit
3 from the improvements, versus more incidental benefits further from the park.
4

5
6 76. The proposed final assessment substantially exceeds the special benefit to the
7 property and is grossly disproportionate to similarly situated properties within the LID.
8

9
10 Aside from claiming he knew about the sold development rights, Mr. Macaulay does not
11 provide any other specific testimony regarding this property; neither does the City. Instead,
12 the City offers only general responses which have already been rebutted by Objectors in
13 their case-in-chief and cross-examination. For these reasons, Taxpayer appeals the following
14 portions of the Examiner's Recommendation: Sections II.22, II.23, II.27, IV.B.4, and
15 IV.B.11(a)(iii).
16
17
18
19
20
21

22 **State Environmental Policy Act and Other Environmental Permitting**

23
24 77. While this appeal is not challenging the City's environmental review and
25 permitting processes, those processes are relevant in determining the legality of the
26 assessments, and to assessing the delivery risk, the present value of the City's plans, and
27 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
28 pursue projects that have not yet undergone environmental review (thus limiting the choice
29 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
30 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
31 is just beginning. Further, the City has segmented environmental review, and still has a
32 gauntlet of federal, state and tribal review processes to complete before it will be clear what
33 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
34 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
35 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
36
37
38
39
40
41
42
43
44
45
46
47

1 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
2
3 committing to reconstruction of Pier 58 and major street improvements without
4
5 environmental review, or the City's Final Special Study has improperly included and is
6
7 proposing to assess the Taxpayer the costs and special benefits of improvements that may
8
9 not get built. Either way, it is faulty process.

10 **Due Process Rights**

11
12 78. The City's failed to notify Taxpayer sufficiently in advance of the hearing to
13
14 allow Taxpayer to obtain evidence and prepare to properly challenge the assessments.
15
16 Because LID assessments involve a deprivation of property, affected owners have the right
17
18 to a hearing as to whether the improvement resulted (or will result) in special benefits to
19
20 their properties and whether their assessments are proportionate, which necessarily includes
21
22 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
23
24 555, 569–70, 229 P.3d 761 (2010).
25

26
27 79. The LID statute specifies that cities must mail notices giving the time and
28
29 place of the hearing to the affected owners "[a]t least fifteen days before" the hearing and
30
31 publish the notice once a week for 2 consecutive weeks in the city's official newspaper, with
32
33 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
34
35 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
36
37 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
38
39 secure their own appraisal), evaluate proportionality of the proposed assessments, and
40
41 whether the owner asked for more time. *Id.* (noting that 15 days was entirely "insufficient
42
43 for anybody to get an appraisal").
44

45 80. The City's Notice of Assessment was sent on December 30, 2019. And the
46
47 Final Special Benefit Study has only been available for public review since January 7, 2020.

1 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
2 order that would preserve and protect Taxpayer's right to analyze and respond to the Final
3 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
4 preliminary motions (e.g., with respect to the interplay between SEPA and the City's
5 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
6 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
7 the Examiner's Recommendation: I.B.
8
9
10
11
12
13
14

15 **VII. Relief Requested**

16 Taxpayer respectfully requests that the City Council:

- 17 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection; and
18
19 a. Cancel the Waterfront Local Improvement District No. 6751 proposed final
20 assessment dated December 30, 2019; or
21
22 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
23 proposed final assessment to \$0 (zero), or such amount as Taxpayer
24 establishes at the hearing in this matter; or
25
26 c. Remand the matter to the Hearing Examiner or City appraiser to recalculate
27 and reduce Taxpayer's assessment using recognized appraisal techniques
28 consistent with USPAP and:
29
30 i. Excluding any property value increase attributable to viaduct removal
31 and other planned WSDOT Improvements;
32
33 ii. Taking into account the effects of the COVID-19 pandemic on the
34 value of Taxpayer's property and other relevant developments since
35 October 2019;
36
37
38
39
40
41
42
43
44
45
46
47

24
25 **III. Statement of Taxpayer's Interest and Incorporation of Prior Arguments**

26 LBA RV Company XXVIII, LP owns the property that is subject to the proposed
27
28 final assessment described in Section IV.
29

30 Taxpayer is amending its appeal as authorized in City of Seattle Resolution 31979 to
31
32 include additional arguments relevant to the revised Final Recommendations of the Hearing
33 Examiner issued on February 1, 2021. On February 4, 2020, Taxpayer timely filed an
34
35 objection to the assessment, which was based on the Final Study. Taxpayer further timely
36
37 filed an appeal of the Hearing Examiner's 2020 recommendations to the City Council.
38
39 Taxpayer maintains and incorporates all objections and arguments raised in its appeal filed
40
41 with the City Clerk on September 22, 2020. This amendment is a supplement is to be read
42
43 together with Taxpayer's appeal filed on September 22, 2020. Taxpayer incorporates by
44
45 reference all filings, evidence, and pleadings filed by any party before the Hearing Examiner
46
47

1 as authorized by the Hearing Examiner, including without limitation all records pertaining to
2 the November 2020 through February 2021 remand hearing ordered by Council.
3

4
5 **IV. Amended Arguments on Appeal**

6 LBA RV Company XXVIII, LP supplements its appeal of the Hearing Examiner's
7 recommendation to deny Taxpayer's objection to the City of Seattle's Waterfront Local
8 Improvement District No. 6751 proposed final assessment dated December 30, 2019 against
9 the following property:
10
11
12
13

14 King County Parcel No. 1117080020
15 Site Address: 1601 2nd Ave., Seattle, Washington
16 Proposed Final LID Assessment for Parcel: \$670,407
17

18 To avoid repetition, Taxpayer incorporates the evidence and arguments raised before
19 the Hearing Examiner and before the City in its September 22, 2020 appeal, into this
20 amended appeal.
21
22
23

24
25 **A. The Anticipated Special Benefits to Taxpayer's Property should be**
26 **Discounted to Present Value and Assessments Adjusted as Appropriate**
27

28 On remand, the City's appraiser acknowledged that special benefits to parcels can be
29 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
30 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
31 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
32 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
33 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
34 accepted that recommendation. The City's appraiser further acknowledged that benefit
35 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
36 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
37 (benefits to theatre "would be a long enough time out to where it wouldn't measurably affect
38
39
40
41
42
43
44
45
46
47

1 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
2
3 calculations to present value because the general benefits are not anticipated from the LID
4
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6
7 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
8
9 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
10
11 benefit calculation, and related assessments, to account for the delay between the assessment
12
13 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
14
15 standard appraisal practice, and renders the other proposed Waterfront LID special
16
17 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
18
19 “fundamentally wrong methods.”

20
21 All special benefit taxes assessed by a municipality must be based on “actual,
22
23 physical and material [special benefits that are] not merely speculative or conjectural.”
24
25 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
26
27 Additionally, the assessments may not materially exceed the actual special benefit conferred
28
29 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
30
31 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
32
33 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
34
35 discount benefits the City estimated would accrue to the properties from improvements to be
36
37 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
38
39 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
40
41 property while treating all or most others (including Taxpayer’s) differently, and
42
43 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
44
45 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
46
47 for some properties because the benefits are too distant, while assessing other properties as

1 though distant benefits have already been secured. As Taxpayer identified in its September
2 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
3 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
4 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
5 reject the improper calculation of the benefit or remand and require the appraiser to discount
6 the benefits to net present value.
7
8
9
10
11

12
13 **B. In Light of Covid's Continuing Impact on Taxpayer and other**
14 **Downtown Property Owners and other Material Changes Since October**
15 **2019, the LID Should be Cancelled, or at Least Assessments**
16 **Recalculated, to take Into Account Property Value Reductions**
17

18 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
19 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
20 other relevant developments since October 2019." When Washington's first COVID
21 restrictions were imposed in March and April 2020, there was an assumption that they
22 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
23 II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover
24 for another 5 years. Retail stores are boarded up. Homelessness and related challenges have
25 gotten much worse. The City has already imposed higher minimum wages and taxes on
26 businesses to try to fund recovery. The West Seattle Bridge and other bridges are in
27 immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park
28 hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several
29 years from completion, as a best case. In current circumstances, a downtown tax to fund
30 new, non-essential park improvements against financially strapped taxpayers, and likely
31 passed through to financially strapped tenants and customers would be unfair to taxpayers
32 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 rethinks its budget priorities for the next few years, and its potentially funding sources,
2
3 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
4
5 property owners) have a chance to recover, and that any assessment take into account the
6
7 changed circumstances since this appeal process started on February 4, 2020 to avoid
8
9 unnecessarily and perhaps permanently killing downtown properties and businesses in the
10
11 name of bettering them.
12

13 **V. Relief Requested**

14
15 Particularly in light of the Committee's decision not to take further comment from
16
17 appellants, Taxpayer respectfully request that each Committee member carefully review the
18
19 full record transmitted to Council before voting on Taxpayer's appeal.
20

21 LBA RV Company XXVIII, LP respectfully reiterates its request from the
22
23 September 22, 2020 appeal that the City Council:
24

25 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection; and

26
27 a. Cancel the Waterfront Local Improvement District No. 6751 proposed
28
29 final assessment dated December 30, 2019; or

30
31 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
32
33 proposed final assessment to \$0 (zero), or such amount as Taxpayer
34
35 establishes at the hearing in this matter; or

36
37 c. Remand the matter to the Hearing Examiner or City appraiser to
38
39 recalculate and reduce Taxpayer's assessment using recognized appraisal
40
41 techniques consistent with USPAP and:

42
43 i. Excluding any property value increase attributable to viaduct
44
45 removal and other planned WSDOT Improvements;
46
47

- 1 ii. Taking into account the effects of the COVID-19 pandemic on
2 the value of Taxpayer's property and other relevant
3 developments since October 2019;
4
5 iii. Accounting for and excluding (1) any special benefits from
6 existing or planned improvements that already provide similar
7 benefits to Taxpayer's property, and (2) any special detriments
8 from construction and other anticipated LID-related
9 disamenities;
10
11 iv. Accounting for and including only those actual benefits
12 anticipated to accrue to Taxpayer's property based on its
13 location relative to Pier 58, Overlook Walk, and the
14 Promenade, and specific elements of the LID Improvements;
15
16 v. Discounting anticipated special benefits to present value,
17 based on reliable estimates regarding when special benefits
18 will start accruing following completion of the LID
19 Improvements; and
20
21 vi. Accounting for such other issues specific to Taxpayer's
22 property relevant to calculation of such assessment; and
23
24 2. Grant such further relief as the City Council deems just and proper.

36
37 **III. Statement of 2nd Avenue Real Estate Investments/ SCD2+U LLC's Interest and**
38 **Incorporation of Prior Arguments**

39 HS 2U Owner LLC, which recently acquired the property from SCD2+U LLC is the
40
41 long term ground lessee responsible for paying the LID assessment against the property that
42
43 is subject to the proposed final assessment described in Section IV.
44
45
46
47

1 HS 2U Owner LLC amending its appeal as authorized in City of Seattle Resolution
2
3 31979 to include additional arguments relevant to the revised Final Recommendations of the
4
5 Hearing Examiner issued on February 1, 2021. On February 4, 2020, 2nd Avenue Real
6
7 Estate Investments/ SCD2+U LLC timely filed an objection to the assessment, which was
8
9 based on the Final Study. 2nd Avenue Real Estate Investments/ SCD2+U LLC further
10
11 timely filed an appeal of the Hearing Examiner's 2020 recommendations to the City
12
13 Council. 2nd Avenue Real Estate Investments/ SCD2+U LLC maintains and incorporates
14
15 all objections and arguments raised in its appeal filed with the City Clerk on September 22,
16
17 2020. This amendment is a supplement is to be read together with 2nd Avenue Real Estate
18
19 Investments/ SCD2+U LLC's appeal filed on September 22, 2020. HS 2U Owner LLC
20
21 incorporates by reference all filings, evidence, and pleadings filed by any party before the
22
23 Hearing Examiner as authorized by the Hearing Examiner, including without limitation all
24
25 records pertaining to the November 2020 through February 2021 remand hearing ordered by
26
27 Council.

28
29 **IV. Amended Arguments on Appeal**

30 HS 2U Owner LLC supplements its appeal of the Hearing Examiner's
31
32 recommendation to deny 2nd Avenue Real Estate Investments/ SCD2+U LLC's objection to
33
34 the City of Seattle's Waterfront Local Improvement District No. 6751 proposed final
35
36 assessment dated December 30, 2019 against the following property:
37

38
39 King County Parcel No. 1974700175
40 Site Address: 1215 2nd Ave., Seattle, Washington
41 Proposed Final LID Assessment for Parcel: \$1,611,564
42

43 King County Parcel No. 1974700190
44 Site Address: 1206 1st Ave., Seattle, Washington
45 Proposed Final LID Assessment for Parcel: \$180,238
46

47 King County Parcel No. 1974700210

1 Site Address: 1200 1st Ave., Seattle, Washington
2 Proposed Final LID Assessment for Parcel: \$70,528
3
4

5 To avoid repetition, HS 2U Owner LLC incorporates the evidence and arguments
6 raised by 2nd Avenue Real Estate Investments/ SCD2+U LLC before the Hearing Examiner
7 and before the City in its September 22, 2020 appeal, into this amended appeal.
8
9

10
11 **A. The Anticipated Special Benefits to 2nd Avenue Real Estate Investments/
12 SCD2+U LLC's Property should be Discounted to Present Value and
13 Assessments Adjusted as Appropriate**
14

15 On remand, the City's appraiser acknowledged that special benefits to parcels can be
16 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
17 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
18 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
19 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
20 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
21 accepted that recommendation. The City's appraiser further acknowledged that benefit
22 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
23 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
24 (benefits to theatre "would be a long enough time out to where it wouldn't measurably affect
25 value."). Nevertheless, the appraiser refused to more generally discount his benefit
26 calculations to present value because the general benefits are not anticipated from the LID
27 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
28 perhaps not until 2029. The appraiser's and Examiner's recommendation to reduce the
29 theatre's assessment to zero is reasonable. His refusal to make other discounts to his special
30 benefit calculation, and related assessments, to account for the delay between the assessment
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 and realization of any special benefits to Taxpayer's property is unreasonable, contrary to
2 standard appraisal practice, and renders the other proposed Waterfront LID special
3 assessments, and the Examiner's Recommendations, arbitrary and capricious and based on
4 "fundamentally wrong methods."
5

6 All special benefit taxes assessed by a municipality must be based on "actual,
7 physical and material [special benefits that are] not merely speculative or conjectural."
8
9 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
10

11 Additionally, the assessments may not materially exceed the actual special benefit conferred
12 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
13 to meet any of these legal requirements is fatal to the assessment. Taxpayer's September 22,
14 2020 appeal challenged the City appraiser's valuation because, among other flaws, it did not
15 discount benefits the City estimated would accrue to the properties from improvements to be
16 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
17 appraiser's inconsistent approach, selectively applying discounting to one (that we know of)
18 property while treating all or most others (including Taxpayer's) differently, and
19 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
20 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
21 for some properties because the benefits are too distant, while assessing other properties as
22 though distant benefits have already been secured. As Taxpayer identified in its September
23 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
24 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
25 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
26 reject the improper calculation of the benefit or remand and require the appraiser to discount
27 the benefits to net present value.

1 **V. Relief Requested**

2 Particularly in light of the Committee's decision not to take further comment, HS 2U
3 Owner LLC respectfully requests that each Committee member carefully review the record
4 transmitted to Council before voting on our appeal.
5
6

7 HS 2U Owner LLC respectfully reiterates 2ND AVENUE REAL ESTATE
8 INVESTMENTS/ SCD2+U LLC's request from the September 22, 2020 appeal that the City
9 Council:
10
11

- 12 1. Discount the Waterfront Local Improvement District No. 6751 proposed final
13 assessment dated December 30, 2019; or
14
- 15 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
16 proposed final assessment to \$0 (zero), or such amount as Taxpayer
17 establishes at the hearing in this matter; or
18
- 19 3. Grant the Examiner's recommended remand but with instructions to
20 recalculate and reduce Taxpayer's assessment using recognized appraisal
21 techniques consistent with USPAP and
22
23
 - 24 a. Excluding any property value increase attributable to viaduct removal
25 and other planned WSDOT Improvements;
26
 - 27 b. Taking into account the effects of the COVID-19 pandemic on the
28 value of Taxpayer's property and other relevant developments since
29 October 2019;
30
 - 31 c. Accounting for and excluding (1) any special benefits from existing
32 or planned improvements that already provide similar benefits to
33 Taxpayer's property, and (2) any special detriments from construction
34 and other anticipated LID-related disamenities;
35
36
37
38
39
40
41
42
43
44
45
46
47

- 1 d. Accounting for and including only those actual benefits anticipated to
2 accrue to Taxpayer's property based on its location relative to Pier 58,
3 Overlook Walk, and the Promenade, and specific elements of the LID
4 Improvements;
5
6 e. Discounting anticipated special benefits to present value, based on
7 reliable estimates regarding when special benefits will start accruing
8 following completion of the LID Improvements; and
9
10 f. Accounting for such other issues specific to Taxpayer's property
11 relevant to calculation of such assessment; and
12
13
14
15
16
17

18 4. Grant such further relief as the City Council deems just and proper.
19

Subject: Waterfront LID Amended Appeal for Case No. CWF-0421
Date: Tuesday, February 16, 2021 4:01:04 PM
Attachments: [2+U LID Appeal before City Council.pdf](#)

CAUTION: External Email

Dear City Council Clerk,

Attached please find the Waterfront LID Amended Appeal for the above captioned matter. This amendment is a supplement and to be read in conjunction with Objector's initial appeal to the City Council.

Thank you,
Kimball Mullins

Hearing Examiner File No. CWF-0421

NOTICE OF APPEAL OF HEARING
EXAMINER’S FINDINGS AND
RECOMMENDATION ON 2ND AVENUE
REAL ESTATE INVESTMENTS
OBJECTION TO WATERFRONT LID NO.
6751 PROPOSED FINAL ASSESSMENT
FOR PARCEL NO. 1974700175

33 2ND AVENUE REAL ESTATE INVESTMENTS (“Taxpayer”) files this appeal
34 pursuant to RCW 35.44.070, Seattle Municipal Code 20.04.090, City of Seattle Resolution
35 31915, the notice of the Seattle Office of the City Clerk dated December 30, 2019, and the
36 Hearing Examiner’s Findings and Recommendation issued September 8, 2020 (“Examiner’s
37 Recommendation”).

31
32
33 **III. Statement of Taxpayer's Interest**

34
35 Taxpayer is the long term ground lessee responsible for paying the LID assessment
36 against the property that is subject to the proposed final assessment described in Section IV.

37
38 The property, the 2+U Building, is a recently completed office tower completely leased up
39 with 15 year tenancies along with ground floor retail. The basis of the proposed assessment
40 is a Final Special Benefit/Proportionate Assessment Study for Waterfront Seattle Local
41 Improvement District ("Final Study"), dated October 1, 2019 and prepared by Robert
42
43
44
45
46
47

1 Macaulay with ABS Valuation (the City’s appraiser). The Final Study proposes assessments
2 that are purportedly limited to paying for the LID-funded components—namely, the
3 Promenade, Overlook Walk, Pioneer Square Street Improvements, Union Street Pedestrian
4 Connection, Pike/Pine Streetscape Improvements, and Pier 58 (together, the “LID
5 Improvements”). The Final Study purports to exclude charges for other improvement
6 projects in the Central Waterfront, and specifically those WSDOT had already agreed to pay
7 for and construct: viaduct demolition, the new Alaskan/Elliott Way surface street, the
8 new/improved Seawall, the State Route 99 Tunnel, the Pier 62 rebuild, Bell Street
9 improvements, and parking spaces WSDOT planned fronting piers between Pike and
10 Madison (together, the “WSDOT Improvements”). But because construction was not
11 complete on the LID Improvements or the WSDOT Improvements at the time the Final
12 Study was prepared, Mr. Macaulay’s October 1, 2019 “Before” and “After” valuations are
13 both based on hypothetical conditions rather than actual facts. On February 4, 2020,
14 Taxpayer timely filed an objection to the assessment, which was based on the Final Study.

28 **IV. Matter Under Appeal**

29 Taxpayer appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
30 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
31 final assessment dated December 30, 2019 against the following property:

32 King County Parcel No. 1974700175
33 Site Address: 1215 2nd Ave., Seattle, Washington
34 Proposed Final LID Assessment for Parcel: \$1,611,564

35 *See* Examiner’s Recommendation at 61-62, 105. To avoid repetition, Taxpayer incorporates
36 the evidence and arguments raised before the Hearing Examiner into this appeal. In
37 particular, Taxpayer points the City Council to Taxpayer’s initial Appeal Petition, *Frye*
38 motion, Closing Brief submitted at the close of its case-in-chief (dated 4/16/2020), and
39
40
41
42
43
44
45
46
47

1 supplemental Closing Statement submitted at the close of the City's case-in-chief (dated
2 7/7/2020).¹
3

4 As discussed more fully below, Taxpayer specifically appeals the following Findings
5 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
6
7 Pages 61-62, 105, Sections II.6, II.7, II.14, II.15, II.18, II.19, II.20, II.21, II.22, II.23, II.24,
8 II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3, IV.B.4,
9 IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
10 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.8, IV.C.9, IV.C.11,
11 IV.C.12, IV.C.14, and IV.C.18.
12
13
14
15
16
17

18 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
19 recommendations on material issues raised during Taxpayer's appeal that were supported by
20 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
21 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23 recommended anything other than denial of objectors' appeals were where the City's
24 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
25 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
26 special assessments based on "fundamentally wrong methods."
27
28
29
30
31
32
33
34
35
36
37
38

39 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
40 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
41 Public Works committee secure and provide appellants with such a record, so that the appeals can
42 then be supplemented with that additional information, so as to make the Committee's consideration
43 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
44 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
45 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
46 retained by Perkins Coie are part of this case file.
47

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$4,113,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City's appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and
5 the City's preliminary roll. On the contrary, the City's assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS's appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City's appraiser asserts that the City is not collecting assessments "based
16 on the value of WSDOT's planned improvements." See Final Study at 3. However, the
17 City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition,
18 the City's appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City's promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT's planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City's appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Must comply with appraisal standards
35

36
37 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
38 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
39 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
40 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
41 Final Study fails to meet basic standards for admissibility and must be remanded.
42

43 **Legal Requirement:** Actual and measurable special benefit
44

45
46 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
47 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based

on a host of “micro-judgments” that are not supported by any documentation, nor capable of replication or quality assurance/quality control. The assessments are undocumented, unreliable, and not supported by empirical studies, data, or reports.

Legal Requirement: Actual and measurable special benefit—Park benefits must be supported by empirical evidence

ABS Study: Dr. John Crompton, the world’s preeminent expert regarding the economic value of parks and other public amenities and on whom ABS purported to rely, testified that ABS had completely misapplied his work and dramatically overstated both the distance to which economic benefits might extend from the LID Improvements and the extent of any anticipated benefit within the potentially benefited area.

Legal Requirement: Actual special benefit—Must take into account potential disamenities

ABS Study: The appraiser ignores the negative value impact of five years or more of construction, as well as other potential disamenities associated with public places.

Legal Requirement: Cannot prematurely commit to build

ABS Study: The City has not completed NEPA review or other entitlement process for its Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments are being imposed. But finalizing the roll is a commitment by the City to build the improvements, which is a violation of legal process and commits the City to build things it may not secure permission to build.

In addition to these general objections, there are property-specific issues raised by Taxpayer as to which the Examiner also erred, discussed in the course of the appeal statement below.

V. Standard of Review

“When considering the assessment roll, the city council sits ‘as a board of equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider

1 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
2 part thereof or set aside the roll.” *Id.* at 949 (quoting RCW 35.44.080(3)).

3
4 The proposed assessments are presumed correct, “unless overcome by clear, cogent
5 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
6 than the heightened presumption of correctness on judicial appeal because “applying these
7 elevated standards at the municipal hearing would afford unwarranted deference to a report
8 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
9 presumption is not evidence and its efficacy is lost when the other party adduces credible
10 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
11 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
12 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
13 presented credible evidence showing that the City’s proposed assessment is arbitrary,
14 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
15 to the City to prove the assessments are actual, measurable, special, non-speculative and
16 proportionate. The City failed that burden.
17
18
19
20
21
22
23
24
25
26
27
28
29

30 **VI. Grounds for Appeal**

31
32 Taxpayer appeals the Hearing Examiner’s Findings and Recommendations on the
33 following grounds.
34
35

36 **Taxpayer Not Required to Provide A Special Benefit Study**

37
38 1. Contrary to the Examiner’s findings and recommendations, there is no
39 requirement that experts or property owners provide an alternative special benefit
40 calculation under these circumstances—to do so would also require the same improper
41 speculation the City’s expert engaged in, given the timing and information provided. *See*,
42 *e.g.*, Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
43
44
45
46
47

1 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained:
2
3 “[W]e have explicitly rejected an argument that, because certain protestors ‘failed to offer
4 expert testimony at the city council hearing[,] the presumptions [in favor of the assessment]
5 were still operative as to their property.’” *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian*
6 *Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*, 85 Wn. App.
7 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he provided
8 expert opinion showing that improvements actually diminished value of the property). Here,
9 Ben Scott testified that he is an expert in reviewing mass appraisal reports and analyzing
10 their impact on individual properties - precisely the matter at issue in this appeal. *See*
11 3/5/2020 Hrg. Tr. at 13:1-4 (laying foundation as expert witness while testifying on behalf
12 of a different appellate represented by Perkins Coie). In fact, no independent evidence is
13 required at all if, for example, objectors show that the assessment was grounded on a
14 fundamentally wrong basis due to an error in the City’s appraiser’s methods—as is the case
15 here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106,
16 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out that
17 the square footage assumed in the City’s appraisal was incorrect. For these reasons,
18 Taxpayer appeals the following portions of the Examiner’s Recommendation: Sections
19 II.14, II.15, IV.A, IV.B.11(a), IV.C.8, IV.C.9, and IV.C.11.
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36

37 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

38
39 2. RCW 35.43.040 provides cities and towns authority for ordering local
40 improvements and for levying and collecting special assessments “on property specially
41 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed
42 upon all the property in accordance with the special benefits conferred thereon.” RCW
43 35.44.010.
44
45
46
47

1 3. No analysis of general benefits. Special assessments have been “held valid
2
3 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
4
5 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
6
7 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
8
9 they are for the construction of local improvements that are appurtenant to specific land and
10
11 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*

12 4. Taxpayer’s property is not specially benefited by the LID Improvements.
13
14 The primary purpose and effect of the LID Improvements are to benefit “members of the
15
16 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
17
18 library is for the benefit of the members of the whole community individually and
19
20 collectively who may be served by it”). Mr. Macaulay’s own chapter of the LID Manual
21
22 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
23
24 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
25
26 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
27
28 that if an appraiser “identifies both general and special benefits, these benefits should be
29
30 clearly distinguished and explained, and only special benefits should be included in the
31
32 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
33
34 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4. It is undisputed that Mr. Macaulay did not
35
36 analyze or measure general benefits, including those arising from construction necessary to
37
38 meet basic design standards. *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration
39
40
41
42

43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 may also be given to those construction costs related to meeting design standards which may
2 be general benefits as distinct from construction costs emanating from requirements of the
3 LID project”). To the extent Taxpayer’s property may benefit from the LID improvements,
4 the benefit is general and incidental, and failure to consider general benefits was a fatal flaw
5 in the City’s methodology. For these reasons, Taxpayer appeals the following portions of
6 the Examiner’s Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and
7 IV.C.4.
8
9

10
11
12
13
14
15 5. LID Improvements not necessary. Unlike typical LID projects, the
16 Waterfront LID improvements are largely unnecessary to the functionality of any particular
17 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
18 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
19 held invalid where owners would have benefitted equally from increase of only 9 feet);
20 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
21 intersection for new water main for hydrant held invalid because land was already afforded
22 functional hydrant at nearby street). Here, Taxpayer provided testimony that the LID
23 Improvements are not necessary to the business of their income-producing property, which
24 already has sufficient access to the waterfront and other downtown amenities and
25 transportation connectivity necessary for their tenants and customers. *See* 3/11/2020 (M.
26 Arnette) Hrg. Tr. at 35:18-36:2, 43:9-14, 45:8-21. With respect to the 2+U Building ground
27 floor retail, the construction of new access points is in fact a negative point because the LID
28 Improvements will draw foot traffic away, increasing competition in other areas of the city.
29
30
31
32
33
34
35
36
37
38
39
40
41

42 6. 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4 The fact that there is no case law
43 differentiating between binary improvements and parks does not change the law prohibiting
44 assessments on properties already adequately served by existing amenities. *See* Examiner’s
45
46
47

1 Recommendation at IV.C.3 (reasoning that “no case law is provided to support the
2 differentiation between a hardscape benefit and the more ephemeral benefits of park”). Nor
3 does the Examiner’s reasoning excuse the City’s failure to account for existing amenities as
4 part of the special benefit calculation. As Dr. Crompton testified, existing view amenities
5 may in fact diminish the incremental effect of new park improvements on the value of
6 properties, much like turning on a weak light in an already brightly illuminated room. *See*
7 Hrg. Exhibit 94 (Crompton’s Report) at 12-13.
8
9

10
11 7. To the extent benefits can be considered “special” as opposed to general, they
12 are nominal or nonexistent for many properties even in the Central Waterfront, which
13 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
14 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties’ fair market value did not
15 change due to expansion of sewer service *near* owners’ parcel which were already
16 connected). Even if the City could assess for a view change (and it has promised not to
17 assess for viaduct removal), the fair market value of Taxpayer’s property has not changed
18 because the LID Improvements have not improved the property’s waterfront view or access
19 to the waterfront, nor will they when the City anticipates completion in 2024. For these
20 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
21 Sections IV.C.3, IV.B.9, and IV.C.3.
22
23

24
25 8. No analysis of special detriments. The Final Study fails to properly account
26 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
27 owners for removal and cleanup of underground storage tanks discovered during the
28 improvement project). Property values may in fact be negatively impacted by the LID
29 Improvements. Mr. Arnette testified that the office component of the 2+U Building is
30 entirely leased up with 15 year tenancies. The leases did not incorporate any value lift from
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 the LID improvements; therefore, the building's ownership will absorb the assessment costs
2 without the ability to compensate this expense with higher rents for over a decade after the
3 improvements are complete. *See* 3/11/2020 (M. Arnette) Hrg. Tr. at 36:3-38:6. 97:4. This is
4 major detriment to property value that was not considered or analyzed. Additionally,
5 although Mr. Macaulay claims he analyzed impacts on the City's planned elimination of 450
6 parking stalls on a parcel-by-parcel basis, there is no explanation of how lost parking might
7 be a detriment, and no property-specific parking analysis in any of his materials. 6/23/2020
8 Hrg. Tr. at 185:20-24; 186:14-187:12.

9
10
11
12
13
14
15
16
17 9. Likewise, there was no analysis of the risks associated with disamenities such
18 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
19 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
20 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
21 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
22 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
23 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
24 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
25 the maintenance agreement. *Id.* at 13:4-14:2.

26
27
28
29
30
31
32
33
34
35 10. There was also no consideration of negative impacts from another four-plus
36 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
37 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
38 law allowing him to dismiss these actual, non-speculative impacts. Because future special
39
40
41
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 benefits calculations are inherently speculative, Washington’s eminent domain statute
2 specifically allows condemnees to postpone special benefits assessments until improvements
3 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
4

5
6 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
7 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
8 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
9 Greenway, the Greenway district “significantly” lagged in value). For these reasons,
10 Taxpayer appeals the following portions of the Examiner’s Recommendation: Sections
11 II.25, IV.B.8, and IV.B.9.
12

13
14 11. Special benefit estimate is speculative. When calculating a special benefit,
15 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
16 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
17 becomes pure speculation.” *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324
18 P.2d 1078 (1958)).
19

20
21 12. Assuming without conceding that one day, the City’s planned LID
22 Improvements might increase the value of neighboring properties to some extent, that
23 potential benefit is many years away and speculative. While appraisers tolerate some degree
24 of estimation and judgment, Taxpayer’s expert testified that Mr. Macaulay’s Final Study is
25 far too speculative to satisfy industry practices and standards.
26

27
28 13. Although LIDs are sometimes finalized prior to completion of improvements,
29 this is typically just six month or a year prior, and the assessments are otherwise supported
30 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
31 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
32 will not be realized for four or five years. In the meantime, there is permitting risk,
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
2 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
3 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
4
5 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
6
7 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
8
9 testified: "I just don't know what the market value would be as of the date the project would
10
11 be finally constructed" because "[t]here could be a lot of elements in the market that did
12
13 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
14
15 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
16
17 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
18
19

20
21 14. The record is clear that while no one can know what "special benefit" might
22
23 accrue to these properties in four years (if any), we do know that there are no actual benefits
24
25 now. The LID improvements provide no immediate special benefit to property owners
26
27 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
28
29 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
30
31 sewer system for future users).
32

33 15. Further, there are no "plans and specifications" on file with the Clerk's Office
34
35 for the LID Improvements, and it is unlawful to move to final assessments without such
36
37 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*
38
39 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
40
41 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
42
43 dollars on projects still early in the design process. *See* Washington Attorney General
44
45 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
46
47 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs

1 of programs and included “only so much of the overall costs” that took place within and
2 benefitted the assessed properties).
3

4
5 16. The COVID-19 crisis highlights how fundamentally speculative and unfair it
6 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
7 anticipated to be delivered five years later. Even before COVID, it was speculative to
8 assume that market highs experienced in October 2019¹ would be sustained through 2024,
9 after an already extraordinarily long expansion period. *See, e.g.,* 3/3/2020 (A. Gibbons)
10 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
11 my analysis in October 2019, who would have thought that this COVID issue would
12 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
13 process was that the market was going to continue to go up.” *See* Gibbons Decl. ISO
14 Closing Stmt. at ¶ 12 (dated 7/7/2020). Although COVID does not change actual values as
15 of October 2019 (*see* Examiner’s Recommendation at 109), the pandemic has impacted
16 *current* values and rendered the hypothetical October 2019 Final Study valuations outdated.
17
18

19 17. As another example of how future events could affect the accuracy and
20 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
21 Examiner re-open the record to allow the City to explain whether the assessments against
22 property owners within the LID are, in fact, being used by the City to fund the emergency
23 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
24
25
26
27
28
29
30
31

46
47

1 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
2 would be improperly imposing costs on property owners within the LID for improvements
3 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
4 habitat and City infrastructure—this does not provide any special benefit to LID property
5 owners.
6
7
8
9

10 18. There is also no certainty the improvements will be delivered on time. Mr.
11 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
12 delay in construction schedule would not constitute a “material change” under the City
13 Council’s ordinance authorizing the improvements. In other words, the City cannot
14 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
15 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
16 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
17 potential delays and project changes inherent in those processes, that call into question the
18 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
19 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
20 Decl., dated 4/15/2020).

45 ⁵ Asia Fields, ‘Substantial’ pier shift closes Seattle’s Waterfront Park (Seattle Times, Aug. 8,
46 2020), available at [https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/)
47 [waterfront-park/](https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/).

1 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
2
3 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
4
5 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
6
7 at 66:17-25. He performed no independent due diligence to determine the reliability of the
8
9 City’s estimates for completion of the LID Improvements, or to ensure that proposed
10
11 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
12
13 agreed that if any of his assumptions are incorrect, his opinion of market value would need
14
15 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
16
17 68:11-18.

18
19 20. The City has cited no authority—and Taxpayer is aware of none—that
20
21 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
22
23 assess taxes for “actual” special benefits that will not accrue for another five years (if all
24
25 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
26
27 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
28
29 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
30
31 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
32
33 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
34
35 IV.C.14, and IV.C.18.

36
37 21. Failure to discount special benefit estimates to account for risks and present
38
39 value. Due to the inherent uncertainty, Taxpayer’s expert opine that the Final Study should
40
41 have accounted for risks associated with delivery of the improvements (including permitting
42
43 risk, construction risk, general economic risk) and any special damages associated with
44
45 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
46
47 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the

1 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
2 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers routinely consider
3 the impact of future conditions [through] discounted cash flow analysis.”).
4

5
6 22. Mr. Macaulay acknowledged that appraisers can discount the value of a
7 future condition not in place at the date of valuation and can discount for the time value of
8 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
9 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
10 Discounting would also have been consistent with his approach for analyzing special
11 benefits to vacant land. He testified that the difference between similarly situated vacant
12 sites slated for development and already developed sites was that the labor, capital and risks
13 associated with development had not yet been borne for those vacant sites. Therefore, the
14 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
15 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
16 fully permitted, has not completed environmental review, and has not reached full design is
17 presently worth significantly less.
18
19
20
21
22
23
24
25
26
27
28
29

30 23. The City’s hotel expert, Mr. Lukens, likewise explained that to calculate
31 present value, an appraiser would consider discount rates for land development to account
32 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
33 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
34 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
35 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
36
37
38
39
40
41

42 24. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley’s
43 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
44 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
45
46
47

1 Ex. A. Notably, this is lower than the City’s proposed \$171,000,000 assessment. Thus,
2
3 ignoring momentarily all of the other methodological and other flaws discussed here and in
4
5 Taxpayer’s case-in-chief, and assuming that the LID Improvements provide special benefits
6
7 as soon as they are complete in 2024, Mr. Macaulay’s hypothetical assessment materially
8
9 exceeds special benefits when reduced to present value. Further, to the extent the City is
10
11 arguing that because they are permitted to assess 100% of the special benefit, the special
12
13 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
14
15 is again wrong. After applying proper discounting, the City’s proposed special benefit
16
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18
19 100% of the total estimated special benefit.

20
21 25. But even the assumption that the LID improvements would deliver benefits
22
23 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
24
25 on. Rather, those studies demonstrate that a discount period of five years is conservative.
26
27 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A’s study
28
29 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay’s backup files)
30
31 indicates that during the construction period, the Greenway district “significantly” lagged in
32
33 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
34
35 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
36
37 30-31 (discussing New York City High Line and San Francisco Embarcadero
38
39 improvements). Given the lengthy delay, any prediction of future special benefits is
40
41 speculative, especially during the construction phase where values are likely to decline. And
42
43 assuming the LID Improvements take a similarly long period of time after they are complete
44
45 to start producing tangible property value benefits, each additional year of delay results in
46
47

1 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
2
3 Closing Stmt., ¶ 19, Ex. A.

4
5 26. Applying the same discounting methods described above and in Mr. Gibbons
6
7 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
8
9 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
10
11 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
12
13 100% assessment should be no more than \$387,444.60. Anything more would permit the
14
15 City to assess Taxpayer based on a hypothetical assumption that these improvements are in
16
17 place and providing benefit, and ignore the risks, construction disamenity, and time value of
18
19 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
20
21 would counsel that the assessment should be only 39.2% of that assessment cap, or
22
23 \$151,878.28.

24
25 27. Attachment C includes two Excel spreadsheets applying these discounting
26
27 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
28
29 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
30
31 demonstrates that discounting the City's hypothetical October 2019 special benefits to
32
33 present value would reduce Taxpayer's assessment to \$552,907, exclusive of any other
34
35 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
36
37 reductions after taking into account: (1) Taxpayer's experts' estimated "Before" value based
38
39 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
40
41 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
42
43 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
44
45 the time it takes for the improvements to capture property value). After such reductions,
46
47 Taxpayer's assessment would be just \$457,629 (for the 5-year discount) or \$125,767 (for the

1 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
2 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
3 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
4 Taxpayer's discounting argument without legal or factual analysis; that failure is error.
5
6
7

8
9 **Appraisal and Assessment Calculation Methods Are Flawed**

10 28. The "general rule is that each lot, piece, or parcel of land should be assessed
11 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
12 Wn.2d at 97.
13
14
15

16 29. It is proper to sustain a challenge to an assessment, even without the appraisal
17 testimony from the owner, where the objector's expert establishes that the assessment was
18 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
19 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
20
21
22

23 30. The City's appraiser purports to utilize the income method of valuation but
24 relied on inaccurate revenue and market data, as discussed further below.
25
26
27

28 31. The City's appraiser purports to utilize the comparable sales method of
29 valuation, but no City witness attempted "to characterize any one, or all of them, as
30 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
31 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
32 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
33 characterize any one, or all of them, as comparable to any particular property within the LID").
34 And no City witness could explain how specific adjustments were made to these sales to
35 account for value increases due to the hypothesized Before and After Improvements. For this
36 reason, Taxpayer appeals Section II.23 of the Examiner's Recommendation.
37
38
39
40
41
42
43
44
45
46
47

1 32. Special assessment improperly includes value lift from the Before
2
3 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
4 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
5 Improvements, which WSDOT had independently committed to fund. However, Mr.
6
7 Macauley did not calculate the actual market value of LID properties in October 2019, and
8
9 did not separately analyze the hypothetical increase to property values attributable to
10
11 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
12
13 current value and then separately calculate a hypothetical "With WSDOT" Before value);
14
15 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
16
17 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
18
19 3-4. Without any documented basis or support, Mr. Macauley simply "ma[de] a judgment a
20
21 call" on what occupancy and rates would have been for the commercial properties assuming
22
23 all of the WSDOT Improvements are completed as of 2019. Macauley Depo. at 129:19-
24
25 130:11. This outright omission precludes any independent evaluation of the true market
26
27 "Before" values. *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional
28
29 appraisal standards; if an appraiser uses current sales data to infer values, then the appraiser
30
31 must explain how he analyzed that data and other information to come up with the
32
33 hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just
34
35 removal of the viaduct, but also other road, pedestrian and landscaping improvements
36
37 WSDOT had already committed to make.
38
39

40 33. However, because Mr. Macauley testified that he did include some WSDOT-
41
42 related value-lift in the "Before" values, it follows that part of the special assessment
43
44 improperly is based on value attributable to the WSDOT Improvements. As shown by
45
46 mathematical formulas in his spreadsheets, Mr. Macauley applies a special benefit
47

1 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
2 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
3 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
4 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
5 to properly exclude the value of Before Improvements from the assessments. For these
6 reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
7 Sections II.19, II.29, and IV.B.11(a)(ii)

14 34. Special benefits were assigned rather than measured. Mr. Macaulay
15 arbitrarily "assigns" special benefits to Before values instead of measuring them for each
16 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/3/2020 (A.
17 Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr.
18 Macaulay used to analyze the commercial properties, Taxpayer's experts concluded that Mr.
19 Macaulay based adjustments on hypothesized very small increases to property revenue and
20 very small reductions to cap rates to "calculate" an "After" value due to the coming 2024
21 LID Improvements. Attachment B (ABS Spreadsheet). These series of micro adjustments
22 were based on "professional judgment" that are neither shown nor replicable.

32 35. For these reasons, Taxpayer appeals the following portions of the Examiner's
33 Recommendation: Sections II.19 and IV.B.11(a)(iii).

36 36. Special benefit falls within margin of error. The Final Special Benefit Study
37 applies an estimated value enhancement of less than 4%, which is generally within the
38 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
39 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
40 Taxpayer's experts explained that if two appraisers independently arrive at values within 5%
41 of one another, this difference is considered reasonable as it falls within the standard margin
42
43
44
45
46
47

1 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9. Because Mr.
2 Macaulay's micro-special benefit percentages fall far below that 5% margin, "there is no
3 way of authenticating" such incremental changes because "[m]arket forces completely
4 obliterate any tiny little noise factor like that." See 3/3/2020 (A. Gibbons) Hrg. Tr. at
5 160:23-161:5. Mr. Macaulay agreed during his deposition that 0.25% is too small to
6 measure. Macaulay Depo. at 25:17-25. Yet, Mr. Macaulay assigned or purported to measure
7 a difference in cap rates for Taxpayer's property within that margin. Additionally, the fact
8 that "Before" values are also based on a hypothetical that adds some unstated incremental
9 value to actual 2019 values exacerbates this issue—the ability for an appraiser to discern the
10 micro-value differences between hypothetical conditions that are so similar (the WSDOT
11 improvements compared to the LID improvements) "verges on being ludicrous." 3/3/2020
12 (A. Gibbons) Hrg. Tr. at 89:4-90:7.

13
14
15
16
17
18
19
20
21
22
23
24
25 37. Even if it were possible to accurately tease out such a miniscule hypothetical
26 value change due to improvements coming five years later, experts testified that there is no
27 data to justify the mathematical adjustments—they are just the appraiser's guesses as to
28 what he felt the changes (hypothetically) would be. See 3/3/2020 (A. Gibbons) Hrg. Tr. at
29 88:21-88:24 ("you cannot measure one percent difference in a high-rise building for this
30 kind of a medium ... it's simply assigned to a before value"). For these reasons, Taxpayer
31 appeals the following portions of the Examiner's Recommendation: II.27 and IV.B.4.

32
33
34
35
36
37
38
39 38. No analysis of value increase attributable to individual components of the
40 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
41 percentage difference between hypothetical Before and After conditions. Throughout his
42 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
43 descriptions in the Addenda even though he testified that he relied on these to calculate
44
45
46
47

1 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
2
3 someone might be able to determine how he attributed value to After conditions described in
4
5 the Addenda, he answered that that was “not the scope of the assignment” because he was
6
7 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
8
9 that the six components were not actually a continuous project, that he was viewing them
10
11 together because the City asked him to, and that if he were to view them independently,
12
13 there was a low probability that properties in the north would specially benefit from
14
15 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.

16
17 39. Not only did he fail to analyze benefits from each of these non-contiguous
18
19 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
20
21 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
22
23 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
24
25 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
26
27 objectives that guided regulators’ assessment of architectural plans for buildings along a
28
29 “signature street” were so vague that they amounted to ad hoc review based on the
30
31 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
32
33 even though he used the renderings as “visual aid[s] in appraising the property in the before
34
35 and after” to “visually see what the differences would be,” he could not explain what
36
37 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,

38
39
40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 when shown a rendering of a two-lane road going down to one-lane in the After condition
2 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
3 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
4 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
5 could explain the depiction of the same trees in the After condition nearly twice as tall as in
6 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
7 of the Examiner’s Recommendation: II.27 and IV.B.4.
8
9

10
11
12
13
14
15 40. Special assessment is not supported by comparable studies, data or reports.
16 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
17 that the LID Improvements will lead to meaningfully increased real estate values for
18 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
19 comparable sales or information from the “over twenty-five studies and reports” to arrive at
20 very precise special benefit increases for the commercial properties, including Taxpayer’s
21 property. For example, although Mr. Macaulay stated that no single report or study was
22 directly on point due to the unique nature of the LID Improvements (*see, e.g.,* 6/25/2020
23 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
24 parcel-by-parcel analysis other than to say that the studies generally provided “some
25 background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
26 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
27 similarities and differences between these improvements and the comparable parks he
28 looked at).
29
30
31
32
33
34
35
36
37
38
39
40
41

42
43 41. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
44 assignment of incremental increase of 0.5% to 4% to property values within the LID.
45
46 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
47

1 research misinterprets his work in critical ways, including because the LID Improvements
2 manifest the characteristics of a parkway (not a park), and his research indicates that most of
3 a *park*'s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
4 in Seattle). *See* Hrg. Exhibit 94 (Crompton's report). Further, updated research shows park-
5 related value increases are in fact smaller; that estimated increases are "best guesses" rather
6 than predictions of property value increases in a particular city; and that percentages do not
7 account for diminishing returns after taking into account water views, which would be the
8 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
9 topography grants most properties in downtown a water view.

10
11 42. Rather than addressing Dr. Crompton's critiques, Mr. Macaulay simply states
12 that this was just one source of information that was not entirely relevant because, among
13 other things, Dr. Crompton's research dealt with parks and not streetscapes. However, Dr.
14 Crompton's critiques were based on Mr. Macaulay's own testimony that the core "park"
15 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
16 180:2 (explaining that for purposes of "drawing boundaries around a park" he was
17 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
18 Crompton concluded that 500 feet via road from "park" improvements is just one or two
19 Seattle blocks and that Mr. Macaulay "inappropriately extend[ed] the LID impact
20 significantly beyond that which the park study indicated (even if it was legitimate to use the
21 park review's findings)." Hrg. Exhibit 94 (Crompton's Report) at 7. Indeed, the LID area
22 extends even past 2,000 feet from the core "park" improvements, which is the outer limit of
23 impact applicable to "community parks"—which the LID Improvements are not. *Id.*
24 Taxpayer's property is not within 500 feet from the "park" improvements. *See* Hrg. Exhibit
25 104 (Ellen Kersten Decl.) at Exs. E, F.

1 43. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
2 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
3 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
4 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
5 materials, it was clearly an important—if not *the* most important—source of information for
6 estimating special benefits (especially with respect to the condos).⁷ No City witness
7 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
8 parcel-by-parcel analysis.
9

10 44. The destination parks discussed in the Final Special Benefit Study do not
11 provide reliable, comparable, and valid support for the calculation of special assessments
12 here. *See* Gibbons 5/2/2018 Letter at 4; Hrg. None of the parks cited in the Final Special
13 Benefit Study were funded by a LID. And in virtually all of those cases, the park
14 improvements dramatically restored unimproved or blighted areas, and properties evaluated
15 were within two or three blocks of the park.
16

17 45. ABS’s claimed reliance on three economic studies to support property value
18 increase is also flawed. The HR&A study does not inform what value increases are
19 expected from the LID Improvements because it projects increases to tourism from *all* of the
20 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
21 dissimilar parks in other cities,⁸ making the methodological application to the LID
22

23 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
24 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
25 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
26 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
27 park (or streetscape) improvement—other studies estimated premiums for real estate only much
28 closer or cited to Dr. Crompton.

29 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
30 Kennedy Greenway, and Millennium Park where tourist “capture rates” varied from 5% (Rose
31

1 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
2 conclusion that there would be *no new net visitors* from downtown residents as a result of
3 the LID Improvements and could not explain how this impacted his condo analysis.
4

5
6 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
7 Property Values" primarily focused on whether the benefits accrue to the larger community
8 rather than properties adjacent to the park. And the 2014 New York City Department of
9 Transportation study is not based on real estate transactions and market sales and fails to
10 substantiate any link between increased retail sales and property values. Moreover, this
11 study only looked at impact either directly abutting the streetscape improvement, or a couple
12 hundred feet for plaza-like improvements.
13
14

15
16 46. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
17 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
18 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
19 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
20 compared with HR&A's estimate of \$191 million for just the waterfront improvements, and
21 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
22 asked whether he considered that HR&A's estimated LID impact is six times greater than
23 TPL's assessment of Seattle's entire park system, he surmised that it was because the
24 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
25 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
26 assumptions to account for this difference, which may be partly explained by the fact that
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44

45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
2 approximately 3.44% of King County tourists visit Seattle primarily because of the city
3 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
4 waterfront improvements.
5
6

7
8 47. Although proximity to the improvements is a key factor in all of these
9 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
10 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
11 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
12 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
13 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
14 Improvements is approximate 20 acres and it is not a community park.⁹
15
16

17 48. There is no explanation in the Final Study or the supporting materials of how
18 the studies or comparable sales were used to derive values for Taxpayer's property. For
19 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
20 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.
21
22

23 49. Failure to comply with USPAP. Taxpayer's assessment also rests on a
24 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
25 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
26 recognized) for developing the MAI standards for mass appraisals, testified that the Final
27 Study does not meet mass appraisal standards nor allow for independent assessment of the
28 accuracy of Mr. Macauley's conclusions.
29
30

31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

⁹ *See* https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf ("Waterfront Seattle will create about 20 acres of improved parks and public spaces connecting Seattle's central waterfront to downtown.").

1 50. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
2
3 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
4 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
5
6 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay’s
7
8 testimony suggests that he incorrectly believed that the only difference between direct
9
10 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
11
12 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
13
14 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
15
16 at 205:8-14 (explaining that his mass appraisal simply uses “limited techniques, such as
17
18 Gordon uses in doing his limited restricted report”).
19

20 51. But the difference is not only in reporting—mass appraisal techniques must
21
22 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
23
24 Paul Bird (City’s witness) testified, the mass appraisal approach is distinct from a parcel-by-
25
26 parcel approach:
27

28 The mass appraisal technique is an appraisal method used to evaluate
29 a group of properties that are subject to similar market forces as of a
30 certain date through the use of market data, statistical analysis and
31 testing. As a result, the mass appraisal technique does not require or
32 involve analysis of each individual property’s specific data.
33
34

35 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
36
37

38 52. Indeed, USPAP’s definition for “mass appraisal” is “the process of valuing a
39
40 universe of properties as a given date using standard methodology, employing common data,
41
42 and allowing for statistical testing.” Appraisal Foundation, Uniform Standards of
43
44 Professional Appraisal Practice at 5 (2020-2021). And the definition for “mass appraisal
45
46 model” is “a mathematical expression of how supply and demand factors interact in a
47

1 market.” *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
2 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
3 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
4

5
6 53. Regardless of client direction, Mr. Macaulay is required to comply with
7 USPAP. So if, as he determined, a “[p]arcel-by-parcel direct appraisal” would not have been
8 economically feasible because it would have taken “an incredible amount of time and cost”
9 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
10 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 (“performing an
11 individual appraisal of each [condo] parcel would have been cost and time prohibitive”).
12
13

14 54. But Mr. Macaulay’s methods fail to comply with USPAP Standards 5 and 6
15 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
16 value, fails to calibrate the model structure to determine the contribution of the individual
17 characteristics affecting value, and does not review the mass appraisal results against actual
18 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
19 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
20
21
22
23
24
25
26
27
28
29
30
31
32
33

34 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 55. Mr. Macaulay explained that factors like “aesthetic change in the area, the
2 proximity to the elements, the increase in market rent, market vacancy changes,
3 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
4 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
5 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
6 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
7 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
8 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
9 were hypothetical, it was not possible to identify matched pair sales and no City witness
10 explained how ABS Valuation made adjustments to “comparable” sales in order to check
11 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
12 him to explain his model structure.
13
14

15 56. For these reasons, Taxpayer appeals the following portions of the Examiner’s
16 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
17 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
18 and appeals the Examiner’s denial of that motion.
19
20

21 57. Finally, Taxpayer’s property is not appurtenant—or even in close
22 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
23 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
24 close proximity to the property on which expert testimony was given”). Indeed, Taxpayer’s
25 property is not even within 500 feet from the core park improvements. And, as described
26 above, the special assessment is overstated because the Final Study makes no attempt to
27 determine general benefits, existing amenities for Taxpayer’s specific property, or special
28 detriments. In addition, it is speculative due to the fact that, as of October 2019,
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 improvements were not in place—and, in fact, much of the waterfront is a construction
2 zone following removal of the viaduct and now Pier 58 demolition. Under these
3 circumstances, rather than relying on entirely imaginary income and shaky hypotheticals,
4 Mr. Macaulay at the very least should have discounted the special benefit estimates or
5 waited to perform the Study until the improvements were at least close to complete.
6
7
8
9

10 **Erroneous Pre-Improvement Valuation**

11
12 58. The proposed final assessment erroneously overstates the pre-improvement
13 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
14 benefit to the Taxpayer's property.
15
16
17

18 59. The City's Final Study was used to compute the proposed final assessment of
19 Taxpayer's property. The City's Study purportedly uses data from the King County
20 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
21 Study does not accurately reflect this data. For example, the City's Study values Taxpayer's
22 property at \$591,082,000 as of October 1, 2019. However, the King County assessor
23 determined the true and fair value of the property to be \$292,245,000, valued in 2019 for tax
24 year 2020. In other words, the Final Special Benefit Study's valuation is 202% of King
25 County's assessed value. The Final Special Benefit Study does not explain this difference—
26 or any differences—between its pre-improvement valuation and its supposed source for
27 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
28 Recommendation.
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44

45 ¹¹ See, e.g., Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

1 60. Further, the City’s analysis was based on unreliable market data. Mr.
2
3 Macaulay included the value of all three parcels after concluding that two parcels could be
4
5 developed into other income-producing properties, when in fact, the 2+U Building
6
7 development precludes such use of those two parcels. *See* 3/11/2020 (B. Scott) Hrg. Tr. at
8
9 54:16-55:24. 58:17-59:13. Using accurate market information would have reduced the
10
11 “Before” value by \$31,968,000. *See* B. Scotts’ Supplemental Report for 2+U.

12 61. Thus, aside from multiple other reasons why computation of the special
13
14 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
15
16 improvement values that do not accurately reflect market data. For these reason, Taxpayer
17
18 appeals the following portions of the Examiner’s Recommendation: Section III.

19
20
21 **Erroneous Computation of Special Benefit**

22 62. “Special benefit” is “the increase in fair market value attributable to the local
23
24 improvements.” *Doolittle*, 114 Wn.2d at 103. “A benefit that a particular piece of property
25
26 may receive by reason of the improvement is not measured alone by the physical character
27
28 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
29
30 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
31
32 the particular tract or property benefited by the entire improvement, and is it assessed
33
34 proportionately with the other property included within the assessment district?” *Id.* 165–
35
36 66.

37
38 63. The proposed final assessment erroneously overstates the special benefit of
39
40 LID improvements in a number of ways.

41 64. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
42
43 the 2+U Building, Mr. Macaulay assumed retail revenues would increase by 2.86% (low)
44
45 and 5.71% (high) due to the 2024 LID Improvements. He then uses this hypothetical
46
47

1 increased revenue to calculate a new net operating income and capitalizes that to come up
2 with an “After” valuation.
3

4
5 65. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
6 operating income remains the same as in the hypothetical “Before” condition, but changes
7 the cap rate. For the 2+U Building, the cap rate goes from 4.50% to 4.48% and 4.46%.
8
9

10
11 66. Mr. Macaulay then averages his four “After” values to arrive at a final special
12 benefit conclusion. For the 2+U Building, this is an increase in property value of 0.70% due
13 to the LID Improvements.
14
15

16
17 67. Mr. Macaulay offered little justification for his micro adjustments to revenue
18 and capitalization rates. When asked precisely what the basis is for his special benefit
19 percentage increases to revenue for each commercial property, he could not point to
20 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
21 is nothing in the report to allow a reader to understand how he came up with these
22 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
23 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
24 the basis for his belief that certain factors—liked increased connectivity—will increase
25 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
26 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
27 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
28 sources equally even though there was no separate analysis done for food and beverage or
29 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
30 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
31 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
32 properties.
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 68. Mr. Macaulay testified that he used comparable sales as a reasonableness
2 check for commercial properties. But as explained above, no City witness has explained
3 how anyone, or all, of the sales are comparable to any particular commercial property within
4 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
5 in order to make sales “comparable,” he would have had to make adjustments to account for
6 Before and After conditions, but there is no way to understand how adjustments were made
7 because he “didn’t do a separate sales comparison approach where we showed adjustments
8 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
9 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
10 *Id.* at 127:10-128:24.

21 69. It also bears noting that any “internal review” of the special benefit estimates
22 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
23 error. Indeed, given all the same information, he seemed to suggest that it would be
24 perfectly reasonable for another experienced appraiser to come up with special benefit
25 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
26 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
27 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
28 margin of error conflicts with the testimony of Taxpayer’s experts and reaffirms that there
29 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
30 margin of error (5%) is a “rule of thumb” and not a “hard legal standard,” there are still
31 reasonable and unreasonable variations within the appraisal field. *See Examiner’s*
32 *Recommendation* at IV.B.4. Thus, the special assessment is not actual, measurable or
33 special because it is arbitrarily assigned; and it is too small to realistically be supported by
34 appraisal techniques.

1 70. No evidence of special benefit. Meanwhile, there is “no actual evidence from
2
3 any seller or purchaser that the price was higher because of the LID improvements.”
4
5 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City’s appraiser “has not
6
7 identified any seller or buyer, or any particular property where the existence of the LID
8
9 improvements had an effect on the market price.” *Id.* at 410-11. Meanwhile, Taxpayer has
10
11 explained that the property has not increased rental rates or revenue due to the forthcoming
12
13 LID Improvements, because, among other reasons (and apart from COVID), the
14
15 improvements ABS believes will generate value do not exist, and will not for a number of
16
17 years to come. There are no comparable sales because the LID Improvements are not in
18
19 place, nor will they be until the end of 2024 if completed on schedule.

20
21 71. The fair market value of Taxpayer’s property has not changed due to
22
23 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
24
25 benefited from installation of new water main and fire hydrant where it was already
26
27 adequately supplied with water and afforded adequate fire protection). And in any event,
28
29 any value attributable to removal of the viaduct was to be excluded from the assessment
30
31 calculation.

32
33 72. There is no special benefit because LID improvements in fact diminish the
34
35 value of Taxpayer’s property by drawing visitors away towards improvements that do not
36
37 abut the property and increase competition. *See Kuskay*, 85 Wn. App. 493 (testimony of
38
39 owners’ expert that LID actually diminished value of property was sufficient to rebut
40
41 presumption that assessment was proper).

42
43 73. Moreover, the assessment formula is an attempt to distribute costs that do not
44
45 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
46
47 “merely a mathematical model that distributes costs”).

1 74. The Special Benefit Study fails to address whether the \$346,000,000
2
3 estimated LID project cost takes into account the investment that would have occurred in the
4
5 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
6
7 invested. This is a critical component of estimating which properties receive a direct benefit
8
9 from the improvements, versus more incidental benefits further from the park.

10 75. Mr. Macaulay also included personal property in his valuation of hotels even
11
12 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
13
14 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
15
16 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
17
18 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
19
20 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
21
22 receiving a disproportionately high LID assessment in comparison to other property types,
23
24 since hotels were the only property type subject to personal property LID assessments.
25
26 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
27
28 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
29
30 notice procedures because hotel property owners only received notice that their real estate
31
32 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).
33

34 76. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
35
36 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
37
38 a television at the waterfront Marriott is assigned a greater special benefit than the same
39
40 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
41
42 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
43
44 unreasonable to assign a value lift to personal property that is replaceable at the same cost
45
46 and may be obsolete before the LID improvements are even completed. Further, personal
47

1 property is highly depreciable, and likely to be fully depreciated or potentially discarded by
2 2024. *Id.*; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must
3 be redone to correct for this error.
4

5
6 77. The proposed final assessment substantially exceeds the special benefit to the
7 property and is grossly disproportionate to similarly situated properties within the LID. For
8 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
9 Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).
10
11

12 **State Environmental Policy Act and Other Environmental Permitting**

13
14 78. While this appeal is not challenging the City's environmental review and
15 permitting processes, those processes are relevant in determining the legality of the
16 assessments, and to assessing the delivery risk, the present value of the City's plans, and
17 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
18 pursue projects that have not yet undergone environmental review (thus limiting the choice
19 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
20 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
21 is just beginning. Further, the City has segmented environmental review, and still has a
22 gauntlet of federal, state and tribal review processes to complete before it will be clear what
23 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
24 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
25 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
26 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
27 committing to reconstruction of Pier 58 and major street improvements without
28 environmental review, or the City's Final Special Study has improperly included and is
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 proposing to assess the Taxpayer the costs and special benefits of improvements that may
2 not get built. Either way, it is faulty process.
3
4

5 **Due Process Rights**

6 79. The City's failed to notify Taxpayer sufficiently in advance of the hearing to
7 allow Taxpayer to obtain evidence and prepare to properly challenge the assessments.
8
9

10 Because LID assessments involve a deprivation of property, affected owners have the right
11 to a hearing as to whether the improvement resulted (or will result) in special benefits to
12 their properties and whether their assessments are proportionate, which necessarily includes
13 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
14 555, 569–70, 229 P.3d 761 (2010).
15
16

17 80. The LID statute specifies that cities must mail notices giving the time and
18 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
19 publish the notice once a week for 2 consecutive weeks in the city's official newspaper, with
20 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
21 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
22 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
23 secure their own appraisal), evaluate proportionality of the proposed assessments, and
24 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
25 for anybody to get an appraisal”).
26
27

28 81. The City's Notice of Assessment was sent on December 30, 2019. And the
29 Final Special Benefit Study has only been available for public review since January 7, 2020.
30 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
31 order that would preserve and protect Taxpayer's right to analyze and respond to the Final
32 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 preliminary motions (e.g., with respect to the interplay between SEPA and the City's
2 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
3 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
4 the Examiner's Recommendation: I.B.
5
6
7
8

9 **VII. Relief Requested**

10 Taxpayer respectfully requests that the City Council:

- 11
12 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection;
13
14 and
15
16 a. Cancel the Waterfront Local Improvement District No. 6751 proposed final
17 assessment dated December 30, 2019; or
18
19 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
20 proposed final assessment to \$0 (zero), or such amount as Taxpayer
21 establishes at the hearing in this matter; or
22
23 c. Remand the matter to the Hearing Examiner or City appraiser to recalculate
24 and reduce Taxpayer's assessment using recognized appraisal techniques
25 consistent with USPAP and:
26
27 i. Excluding any property value increase attributable to viaduct removal
28 and other planned WSDOT Improvements;
29
30 ii. Taking into account the effects of the COVID-19 pandemic on the
31 value of Taxpayer's property and other relevant developments since
32 October 2019;
33
34 iii. Accounting for and excluding (1) any special benefits from existing
35 or planned improvements that already provide similar benefits to
36
37
38
39
40
41
42
43
44
45
46
47

1 Taxpayer's property, and (2) any special detriments from construction
2 and other anticipated LID-related disamenities;
3

4
5 iv. Accounting for and including only those actual benefits anticipated to
6 accrue to Taxpayer's property based on its location relative to Pier 58,
7 Overlook Walk, and the Promenade, and specific elements of the LID
8 Improvements;
9

10
11
12 v. Discounting anticipated special benefits to present value, based on
13 reliable estimates regarding when special benefits will start accruing
14 following completion of the LID Improvements; and
15

16
17 vi. Accounting for such other issues specific to Taxpayer's property
18 relevant to calculation of such assessment; and
19

20
21
22 2. Grant such further relief as the City Council deems just and proper.

33 **III. Statement of Taxpayer's Interest**

34
35 LBA RVI-Company XLI, LLC owns the property that is subject to the proposed
36 final assessment described in Section IV. The property is located at 1424 4th Ave., Seattle,
37 WA 98101. The building's tenants include three sidewalk-accessible ground level retail
38 businesses and nine additional floors of office and retail tenants.
39
40
41
42
43
44

45 ¹ The December 30, 2019 Assessment Notice (attached as EXHIBIT 1) is addressed to
46 Fourth & Pike (de) LLC. However, effective November 22, 2019, LBA RVI-Company XLI, LLC
47 purchased 4th & Pike, 1424 4th Avenue Seattle, WA 98101.

1 The basis of the proposed assessment is a Final Special Benefit/Proportionate
2
3 Assessment Study for Waterfront Seattle Local Improvement District (“Final Study”), dated
4
5 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City’s
6
7 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
8
9 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
10
11 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
12
13 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
14
15 to exclude charges for other improvement projects in the Central Waterfront, and
16
17 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
18
19 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
20
21 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
22
23 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
24
25 because construction was not complete on the LID Improvements or the WSDOT
26
27 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
28
29 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
30
31 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
32
33 was based on the Final Study.

34 35 **IV. Matter Under Appeal**

36 Taxpayer appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
37
38 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
39
40 final assessment dated December 30, 2019 against the following property:
41

42 King County Parcel No. 1975700235
43 Site Address: 1424 4th Ave., Seattle, Washington 98101
44 Proposed Final LID Assessment for Parcel: \$291,515.57
45
46
47

1 See Examiner's Recommendation at 61-62, 105. To avoid repetition, Taxpayer incorporates
2 the evidence and arguments raised before the Hearing Examiner into this appeal. In
3 particular, Taxpayer points the City Council to Taxpayer's initial Appeal Petition, *Frye*
4 motion, Closing Brief submitted at the close of its case-in-chief (dated 4/16/2020), and
5 supplemental Closing Statement submitted at the close of the City's case-in-chief (dated
6 7/7/2020).²

7
8 As discussed more fully below, Taxpayer specifically appeals the following Findings
9 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
10 Pages 61-62, 105, Sections II.6, II.7, II.14, II.18, II.19, II.20, II.21, II.22, II.23, II.24, II.25,
11 II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3, IV.B.4,
12 IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
13 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.8, IV.C.11,
14 IV.C.12, IV.C.14, and IV.C.18.

15 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
16 recommendations on material issues raised during Taxpayer's appeal that were supported by
17 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
18 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
19 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
20 recommended anything other than denial of objectors' appeals were where the City's

47
² Because the City has not provided "metered index numbers," our appeals cannot reference them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the Public Works committee secure and provide appellants with such a record, so that the appeals can then be supplemented with that additional information, so as to make the Committee's consideration of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated, citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors retained by Perkins Coie are part of this case file.

1 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
2 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
3 special assessments based on "fundamentally wrong methods."
4

5
6 The special benefit for which special taxes are assessed must be "actual, physical and
7 material and not merely speculative or conjectural." *Heavens v. King Cty. Rural Library*
8 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
9 with the law, the assessments may not materially exceed the actual special benefit conferred
10 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
11 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
12 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
13 assessment. In this case, the proposed assessment fails each of the legal requirements for
14 special assessments and must be annulled as arbitrary or capricious, or founded on
15 fundamentally wrong methods.
16
17
18
19
20
21
22
23
24
25
26
27

28 **Legal Requirement:** Actual, non-speculative special benefit

29
30 **ABS Study:** Estimates a hypothetical benefit based on "Before" values that increase
31 "actual 2019" values (unstated) assuming the WSDOT Improvements were in place in
32 October 2019 (they were not), and an "After" value purporting to assess the value of
33 properties with the LID improvements in place at least five years before anticipated
34 completion.
35
36

37 **Legal Requirement:** Cannot materially exceed the special benefit

38
39 **ABS Study:** ABS calculates a special benefit of \$744,000 assuming the LID
40 Improvements were in place and providing benefit in October 2019. However, the LID
41 Improvements will not be completed until the end of 2024 if the City meets its current
42 schedule, and many of WSDOT's alternative improvements will not be built. The present
43 value of future improvements deliverable in five years is significantly lower than the
44 current value of improvements that already exist. Further, ABS's own materials show that
45 benefits may not accrue for at least five years after they are completed, in 2029. If the
46
47

1 hypothesized special benefits are discounted to present value, the assessments materially
2 exceed the hypothesized special benefits.
3

4
5 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID

6
7 **ABS Study:** The City has not finalized the assessment roll. After the City’s appraiser
8 prepared his Final Study in October 2019, and the City issued its preliminary roll in
9 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
10 Examiner finds that COVID is irrelevant because it happened after ABS’s appraisal and
11 the City’s preliminary roll. On the contrary, the City’s assessments have yet to be made
12 and must be based on actual special benefits. While that does not mean ABS’s appraisal
13 was wrong when completed, values and benefits need to be reanalyzed before assessments
14 are finalized in light of the unprecedented changes to the downtown real property market.
15
16

17 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
18 Assessment cannot include value attributable to future WSDOT Improvements.
19

20
21 **ABS Study:** The City’s appraiser asserts that the City is not collecting assessments “based
22 on the value of WSDOT’s planned improvements.” *See* Final Study at 3. However, the
23 City’s own expert, Mark Lukens, acknowledged that was false. In the “Before” condition,
24 the City’s appraiser increased 2019 property market values as though WSDOT had
25 completed its work by 2019. The proposed assessment is against this hypothetical
26 WSDOT-enhanced “Before” value, which ABS acknowledges is (to some unstated extent)
27 higher than actual 2019 market values. The City is collecting an assessment against both
28 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
29 contravention of law and the City’s promise not to impose an assessment based on the
30 value of viaduct demolition and the other components of WSDOT’s planned work.
31
32

33 **Legal Requirement:** Benefits must be special, not general

34
35 **ABS Study:** The City’s appraiser fails to determine or explain what general benefits arise
36 due to the LID Improvements. However, the far-reaching and public nature of the
37 improvements make any benefit arising from them general—not special.
38
39

40 **Legal Requirement:** Benefits must be “physical and material and not merely speculative
41 or conjectural”
42

43
44 **ABS Study:** Not only are the improvements not yet “physical or material,” but
45 environmental review and permitting for the City’s proposed LID Improvements is not
46 complete, and the LID improvements are not anticipated to be complete until the end of
47 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in

1 a manner consistent the City's then-current proposals, which were in many respects merely
2 conceptual designs.
3

4 **Legal Requirement:** Must comply with appraisal standards
5

6 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
7 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
8 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
9 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
10 Final Study fails to meet basic standards for admissibility and must be remanded.
11
12

13 **Legal Requirement:** Actual and measurable special benefit
14

15 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
16 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
17 on a host of "micro-judgments" that are not supported by any documentation, nor capable
18 of replication or quality assurance/quality control. The assessments are undocumented,
19 unreliable, and not supported by empirical studies, data, or reports.
20
21
22

23 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
24 supported by empirical evidence
25

26 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
27 value of parks and other public amenities and on whom ABS purported to rely, testified
28 that ABS had completely misapplied his work and dramatically overstated both the
29 distance to which economic benefits might extend from the LID Improvements and the
30 extent of any anticipated benefit within the potentially benefited area.
31
32

33 **Legal Requirement:** Actual special benefit—Must take into account potential
34 disamenities
35

36 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
37 construction, as well as other potential disamenities associated with public places.
38
39

40 **Legal Requirement:** Cannot prematurely commit to build
41

42 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
43 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
44 are being imposed. But finalizing the roll is a commitment by the City to build the
45
46
47

1 improvements, which is a violation of legal process and commits the City to build things it
2 may not secure permission to build.
3

4
5 In addition to these general objections, there are property-specific issues raised by
6 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
7 statement below.
8
9

10 11 **V. Standard of Review**

12
13 “When considering the assessment roll, the city council sits ‘as a board of
14 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
15 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
16 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
17 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
18
19

20
21 The proposed assessments are presumed correct, “unless overcome by clear, cogent
22 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
23 than the heightened presumption of correctness on judicial appeal because “applying these
24 elevated standards at the municipal hearing would afford unwarranted deference to a report
25 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
26 presumption is not evidence and its efficacy is lost when the other party adduces credible
27 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
28 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
29 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
30 presented credible evidence showing that the City’s proposed assessment is arbitrary,
31 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 to the City to prove the assessments are actual, measurable, special, non-speculative and
2 proportionate. The City failed that burden.
3

4 **VI. Grounds for Appeal**

5
6 Taxpayer appeals the Hearing Examiner's Findings and Recommendations on the
7 following grounds.
8
9

10 **Taxpayer Not Required to Provide A Special Benefit Study**

11
12 1. Contrary to the Examiner's findings and recommendations, there is no
13 requirement that experts or property owners provide an alternative special benefit
14 calculation under these circumstances—to do so would also require the same improper
15 speculation the City's expert engaged in, given the timing and information provided. *See,*
16 *e.g., Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020).* A Washington
17 court has explained: "[W]e have explicitly rejected an argument that, because certain
18 protestors 'failed to offer expert testimony at the city council hearing[,] the presumptions [in
19 favor of the assessment] were still operative as to their property.'" *Hasit*, 179 Wn. App. at
20 946 (quoting *In re Indian Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of*
21 *Goldendale*, 85 Wn. App. 493, 933 P.2d 430 (1997) (although appraiser did not submit an
22 appraisal, he provided expert opinion showing that improvements actually diminished value
23 of the property). In fact, no independent evidence is required at all if, for example, objectors
24 show that the assessment was grounded on a fundamentally wrong basis due to an error in
25 the City's appraiser's methods—as is the case here. *Hasit*, 179 Wn. App. at 947 (citing
26 *Doolittle v. City of Everett*, 114 Wn. 2d 88, 106, 786 P.2d 253 (1990)). As a simple example,
27 a property owner could simply point out that the square footage assumed in the City's
28 appraisal was incorrect. For these reasons, Taxpayer appeals the following portions of the
29 Examiner's Recommendation: Sections II.14, IV.A, IV.B.11(a), IV.C.8, and IV.C.11.
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

2 2. RCW 35.43.040 provides cities and towns authority for ordering local
3
4 improvements and for levying and collecting special assessments “on property specially
5 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed
6
7 upon all the property in accordance with the special benefits conferred thereon.” RCW
8
9 35.44.010.
10

11 3. No analysis of general benefits. Special assessments have been “held valid
12
13 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
14
15 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
16
17 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
18
19 they are for the construction of local improvements that are appurtenant to specific land and
20
21 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
22

23 4. Taxpayer’s property is not specially benefited by the LID Improvements.
24
25 The primary purpose and effect of the LID Improvements are to benefit “members of the
26
27 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
28
29 library is for the benefit of the members of the whole community individually and
30
31 collectively who may be served by it”). Mr. Macaulay’s own chapter of the LID Manual
32
33 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
34
35 (Hrg. Exhibit 117 (LID Manual) at 58³) and he admits that “general benefits probably accrue
36
37 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
38
39
40
41

42
43 ³ “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 that if an appraiser “identifies both general and special benefits, these benefits should be
2 clearly distinguished and explained, and only special benefits should be included in the
3 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
4
5 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4. It is undisputed that Mr. Macaulay did not
6
7 analyze or measure general benefits, including those arising from construction necessary to
8
9 meet basic design standards. *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration
10
11 may also be given to those construction costs related to meeting design standards which may
12
13 be general benefits as distinct from construction costs emanating from requirements of the
14
15 LID project”). To the extent Taxpayer’s property may benefit from the LID improvements,
16
17 the benefit is general and incidental, and failure to consider general benefits was a fatal flaw
18
19 in the City’s methodology. For these reasons, Taxpayer appeals the following portions of
20
21 the Examiner’s Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and
22
23 IV.C.4.
24
25

26
27 5. LID Improvements not necessary. Unlike typical LID projects, the
28
29 Waterfront LID improvements are largely unnecessary to the functionality of any particular
30
31 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
32
33 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
34
35 held invalid where owners would have benefitted equally from increase of only 9 feet);
36
37 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
38
39 intersection for new water main for hydrant held invalid because land was already afforded
40
41 functional hydrant at nearby street). Specifically, Ross Beckley, representative for
42
43 Taxpayer, testified that the proposed LID Improvements are not necessary to the use of this
44
45 property as an office and retail space. Hrg. Exhibit 112 (Decl. of R. Beckley) at ¶ 16.
46
47

1 6. The fact that there is no case law differentiating between binary
2
3 improvements and parks does not change the law prohibiting assessments on properties
4 already adequately served by existing amenities. *See* Examiner’s Recommendation at
5
6 IV.C.3 (reasoning that “no case law is provided to support the differentiation between a
7
8 hardscape benefit and the more ephemeral benefits of park”). Nor does the Examiner’s
9
10 reasoning excuse the City’s failure to account for existing amenities as part of the special
11
12 benefit calculation. As Dr. Crompton testified, existing view amenities may in fact diminish
13
14 the incremental effect of new park improvements on the value of properties, much like
15
16 turning on a weak light in an already brightly illuminated room. *See* Hrg. Exhibit 94
17
18 (Crompton’s Report) at 12-13.
19

20 7. To the extent benefits can be considered “special” as opposed to general, they
21
22 are nominal or nonexistent for many properties even in the Central Waterfront, which
23
24 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
25
26 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties’ fair market value did not
27
28 change due to expansion of sewer service *near* owners’ parcel which were already
29
30 connected). Even if the City could assess for a view change (and it has promised not to
31
32 assess for viaduct removal), the fair market value of Taxpayer’s property has not changed
33
34 because the LID Improvements have not improved the property’s waterfront view or access
35
36 to the waterfront, nor will they when the City anticipates completion in 2024. For these
37
38 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
39
40 Sections IV.C.3, IV.B.9, and IV.C.3.
41

42 8. No analysis of special detriments. The Final Study fails to properly account
43
44 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
45
46 owners for removal and cleanup of underground storage tanks discovered during the
47

1 improvement project). Although Mr. Macaulay claims he analyzed impacts on the City's
2 planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation
3 of how lost parking might be a detriment, and no property-specific parking analysis in any
4 of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12; *see also* 6/26/2020 Hrg.
5 Tr. at 153:18-154:19 (did not actually analyze impact of decreased parking on condos).
6
7
8
9

10 9. Likewise, there was no analysis of the risks associated with disamenities such
11 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
12 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
13 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
14 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
15 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
16 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.⁴ And if
17 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
18 the maintenance agreement. *Id.* at 13:4-14:2.
19
20
21
22
23
24
25
26
27

28 10. There was also no consideration of negative impacts from another four-plus
29 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
30 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
31 law allowing him to dismiss these actual, non-speculative impacts. Because future special
32 benefits calculations are inherently speculative, Washington's eminent domain statute
33 specifically allows condemnees to postpone special benefits assessments until improvements
34 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
35
36
37
38
39
40
41
42
43
44

45 ⁴ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
2 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
3 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
4 Greenway, the Greenway district “significantly” lagged in value).
5
6

7
8 11. Meanwhile, Mr. Beckley testified that the proposed LID assessment of
9 \$291,516 is a substantial additional cost to the 4th and Pike building, which will decrease
10 the fair market value of the property. Hrg. Exhibit 112 (Decl. of R. Beckley) at ¶ 16. No
11 rational office and retail building owner would invest \$291,516 today in a project that will
12 have no return for either the five years of planning and construction or the period afterward.
13 *Id.* In his professional opinion, the 4th and Pike building will receive no special benefit
14 from the proposed LID Improvements. *Id.* at ¶ 18. Further, the revenue and demand
15 increases that the 4th and Pike building would need to generate to recover the LID
16 assessments are unrealistic given the downtown Seattle commercial real estate market
17 conditions, which have been severely impacted by the COVID-19 outbreak. *Id.* at ¶ 19.
18

19 12. For these reasons, Taxpayer appeals the following portions of the Examiner’s
20 Recommendation: Sections II.25, IV.B.8, and IV.B.9.
21

22 13. Special benefit estimate is speculative. When calculating a special benefit,
23 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
24 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
25 becomes pure speculation.” *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324
26 P.2d 1078 (1958)).
27

28 14. Assuming without conceding that one day, the City’s planned LID
29 Improvements might increase the value of neighboring properties to some extent, that
30 potential benefit is many years away and speculative. While appraisers tolerate some degree
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is
2 far too speculative to satisfy industry practices and standards.
3

4 15. Although LIDs are sometimes finalized prior to completion of improvements,
5 this is typically just six month or a year prior, and the assessments are otherwise supported
6 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
7 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
8 will not be realized for four or five years. In the meantime, there is permitting risk,
9 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
10 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
11 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
12 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
13 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
14 testified: "I just don't know what the market value would be as of the date the project would
15 be finally constructed" because "[t]here could be a lot of elements in the market that did
16 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
17 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
18 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
19
20

21 16. The record is clear that while no one can know what "special benefit" might
22 accrue to these properties in four years (if any), we do know that there are no actual benefits
23 now. The LID improvements provide no immediate special benefit to property owners
24 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
25 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
26 sewer system for future users). For example, notwithstanding the questionable hypothesis
27 that retail may benefit from an expected increase in tourism when the improvements are
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 complete, it is undisputed that tourists are not coming in larger numbers and paying higher
2 room rates now because of something happening five years down the road.

3
4 17. Further, there are no “plans and specifications” on file with the Clerk’s Office
5 for the LID Improvements, and it is unlawful to move to final assessments without such
6 “plans and specifications.” Ordinance 125760, Section 3; *Local and Road Improvement*
7 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
8 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
9 dollars on projects still early in the design process. *See* Washington Attorney General
10 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
11 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
12 of programs and included “only so much of the overall costs” that took place within and
13 benefitted the assessed properties).

14
15 18. The COVID-19 crisis highlights how fundamentally speculative and unfair it
16 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
17 anticipated to be delivered five years later. Even before COVID, it was speculative to
18 assume that market highs experienced in October 2019¹ would be sustained through 2024,
19 after an already extraordinarily long expansion period. *See, e.g.,* 3/3/2020 (A. Gibbons)
20 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
21 my analysis in October 2019, who would have thought that this COVID issue would
22 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
23 process was that the market was going to continue to go up.” *Id.* There is no basis for
24 assuming that values hypothesized in October 2019 will remain relevant; they are already
25 irrelevant. *See* Gibbons Decl. ISO Closing Stmt. at ¶ 12 (dated 7/7/2020). Although
26 COVID does not change actual values as of October 2019 (*see* Examiner’s
27
28
29
30
31
32
33

44
45
46
47

1 Recommendation at 109), the pandemic has impacted *current* values and rendered the
2
3 hypothetical October 2019 Final Study valuations outdated.

4
5 19. As another example of how future events could affect the accuracy and
6
7 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
8
9 Examiner re-open the record to allow the City to explain whether the assessments against
10
11 property owners within the LID are, in fact, being used by the City to fund the emergency
12
13 dismantling and reconstruction of Pier 58.⁵ It has been reported that the City plans to use
14
15 LID funding to pay for the expedited, emergency repairs and replacement.⁶ If true, the City
16
17 would be improperly imposing costs on property owners within the LID for improvements
18
19 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
20
21 habitat and City infrastructure—this does not provide any special benefit to LID property
22
23 owners.

24
25 20. There is also no certainty the improvements will be delivered on time. Mr.
26
27 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
28
29 delay in construction schedule would not constitute a “material change” under the City
30
31 Council’s ordinance authorizing the improvements. In other words, the City cannot
32

1 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
2 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
3
4 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
5
6 potential delays and project changes inherent in those processes, that call into question the
7
8 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
9
10 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
11
12 Decl., dated 4/15/2020).
13

14 21. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
15
16 he could not point to a single one where the assessment roll was finalized five years in
17
18 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
19
20 he has never recommended final special assessments based on designs less than 30 percent
21
22 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
23
24 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
25
26 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
27
28 at 66:17-25. He performed no independent due diligence to determine the reliability of the
29
30 City’s estimates for completion of the LID Improvements, or to ensure that proposed
31
32 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
33
34 agreed that if any of his assumptions are incorrect, his opinion of market value would need
35
36 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
37
38 68:11-18.
39

40 22. The City has cited no authority—and Taxpayer is aware of none—that
41
42 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
43
44 assess taxes for “actual” special benefits that will not accrue for another five years (if all
45
46 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
47

1 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
2 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
3 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
4
5 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
6
7 IV.C.14, and IV.C.18.
8
9

10 23. Failure to discount special benefit estimates to account for risks and present
11 value. Due to the inherent uncertainty, Taxpayer’s expert opine that the Final Study should
12 have accounted for risks associated with delivery of the improvements (including permitting
13 risk, construction risk, general economic risk) and any special damages associated with
14 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
15 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
16 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
17 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers routinely consider
18 the impact of future conditions [through] discounted cash flow analysis.”).
19
20

21 24. Mr. Macaulay acknowledged that appraisers can discount the value of a
22 future condition not in place at the date of valuation and can discount for the time value of
23 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
24 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
25 Discounting would also have been consistent with his approach for analyzing special
26 benefits to vacant land. He testified that the difference between similarly situated vacant
27 sites slated for development and already developed sites was that the labor, capital and risks
28 associated with development had not yet been borne for those vacant sites. Therefore, the
29 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
30 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
31
32
33
34

42
43
44
45
46
47

1 fully permitted, has not completed environmental review, and has not reached full design is
2 presently worth significantly less.
3

4 25. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
5 present value, an appraiser would consider discount rates for land development to account
6 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
7 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
8 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
9 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
10

11 26. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
12 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
13 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
14 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
15 ignoring momentarily all of the other methodological and other flaws discussed here and in
16 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
17 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
18 exceeds special benefits when reduced to present value. Further, to the extent the City is
19 arguing that because they are permitted to assess 100% of the special benefit, the special
20 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
21 is again wrong. After applying proper discounting, the City's proposed special benefit
22 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
23 100% of the total estimated special benefit.
24

25 27. But even the assumption that the LID improvements would deliver benefits
26 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
27 on. Rather, those studies demonstrate that a discount period of five years is conservative.

34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A’s study
2 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay’s backup files)
3 indicates that during the construction period, the Greenway district “significantly” lagged in
4 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
5 “reorientation of development to capture value takes time”—specifically, 12-13 years. *Id.* at
6 30-31 (discussing New York City High Line and San Francisco Embarcadero
7 improvements). Given the lengthy delay, any prediction of future special benefits is
8 speculative, especially during the construction phase where values are likely to decline. And
9 assuming the LID Improvements take a similarly long period of time after they are complete
10 to start producing tangible property value benefits, each additional year of delay results in
11 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
12 Closing Stmt., ¶ 19, Ex. A.

13
14
15 28. Applying the same discounting methods described above and in Mr. Gibbons
16 declaration, the 2019 net present value of ABS’s estimate for benefits that actually start
17 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
18 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
19 100% assessment should be no more than \$70,084. Anything more would permit the City to
20 assess Taxpayer based on a hypothetical assumption that these improvements are in place
21 and providing benefit, and ignore the risks, construction disamenity, and time value of
22 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
23 would counsel that the assessment should be only 39.2% of that assessment cap, or \$27,473.

24
25 29. Attachment C includes two Excel spreadsheets applying these discounting
26 methods to Taxpayer’s assessment. It is undisputed that special benefits will not actually
27 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet

1 demonstrates that discounting the City’s hypothetical October 2019 special benefits to
2 present value would reduce Taxpayer’s assessment to \$100,015, exclusive of any other
3 flaws in the City’s proposed assessment. The second spreadsheet shows even more drastic
4 reductions after taking into account: (1) a rough discount for property value loss due to
5 COVID-19; and (2) discounting to present value for 5 years (*i.e.*, from 2024 when the City
6 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
7 the time it takes for the improvements to capture property value). After such reductions,
8 Taxpayer’s assessment would be just \$87,513 (for the 5-year discount) or \$24,046 (for the
9 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer’s
10 appeal, but are intended to help demonstrate how unfair and inflated the City’s proposed
11 hypothetical assessment is. The Hearing Examiner’s Recommendation simply dismisses
12 Taxpayer’s discounting argument without legal or factual analysis; that failure is error.

25 **Appraisal and Assessment Calculation Methods Are Flawed**

26 30. The “general rule is that each lot, piece, or parcel of land should be assessed
27 separately” for purposes of local improvement district special assessment. *Doolittle*, 114
28 Wn.2d at 97.
29
30
31

32 31. It is proper to sustain a challenge to an assessment, even without the appraisal
33 testimony from the owner, where the objector’s expert establishes that the assessment was
34 “clearly grounded upon a fundamentally wrong basis” due to an error in the method
35 employed by the City’s appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
36
37
38
39

40 32. The City’s appraiser purports to utilize the income method of valuation but
41 relied on inaccurate revenue and market data, as discussed further below.
42
43
44

45 33. The City’s appraiser purports to utilize the comparable sales method of
46 valuation, but no City witness attempted “to characterize any one, or all of them, as
47

1 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
2 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
3 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to
4 characterize any one, or all of them, as comparable to any particular property within the LID").
5 And no City witness could explain how specific adjustments were made to these sales to
6 account for value increases due to the hypothesized Before and After Improvements. For this
7 reason, Taxpayer appeals Section II.23 of the Examiner's Recommendation.
8
9

10
11
12
13
14
15 34. Special assessment improperly includes value lift from the Before
16 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
17 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
18 Improvements, which WSDOT had independently committed to fund. However, Mr.
19 Macaulay did not calculate the actual market value of LID properties in October 2019, and
20 did not separately analyze the hypothetical increase to property values attributable to
21 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
22 current value and then separately calculate a hypothetical "With WSDOT" Before value);
23 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
24 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
25 3-4. Without any documented basis or support, Mr. Macaulay simply "ma[de] a judgment a
26 call" on what occupancy and rates would have been for the commercial properties assuming
27 all of the WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-
28 130:11. This outright omission precludes any independent evaluation of the true market
29 "Before" values. *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional
30 appraisal standards; if an appraiser uses current sales data to infer values, then the appraiser
31 must explain how he analyzed that data and other information to come up with the
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just
2 removal of the viaduct, but also other road, pedestrian and landscaping improvements
3
4 WSDOT had already committed to make.
5

6
7 35. However, because Mr. Macaulay testified that he did include some WSDOT-
8 related value-lift in the “Before” values, it follows that part of the special assessment
9 improperly is based on value attributable to the WSDOT Improvements. As shown by
10 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
11 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
12 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
13 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
14 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
15 to properly exclude the value of Before Improvements from the assessments. For these
16 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
17 Sections II.19, II.29, and IV.B.11(a)(ii)
18
19

20
21 36. Special benefits were assigned rather than measured. Mr. Macaulay
22 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
23 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/3/2020 (A.
24 Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr.
25 Macaulay used to analyze the commercial properties, Taxpayer’s experts concluded that Mr.
26 Macaulay based adjustments on hypothesized very small increases to property revenue and
27 very small reductions to cap rates to “calculate” an “After” value due to the coming 2024
28 LID Improvements. Attachment B (ABS Spreadsheet). These series of micro adjustments
29 were based on “professional judgment” that are neither shown nor replicable.
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 37. For these reasons, Taxpayer appeals the following portions of the Examiner's
2 Recommendation: Sections II.19 and IV.B.11(a)(iii).
3

4 38. Special benefit falls within margin of error. The Final Special Benefit Study
5 applies an estimated value enhancement of less than 4%, which is generally within the
6 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
7 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
8 Taxpayer's expert explained that if two appraisers independently arrive at values within 5%
9 of one another, this difference is considered reasonable as it falls within the standard margin
10 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9. Because Mr.
11 Macaulay's micro-special benefit percentages fall far below that 5% margin, "there is no
12 way of authenticating" such incremental changes because "[m]arket forces completely
13 obliterate any tiny little noise factor like that." *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
14 160:23-161:5. Mr. Macaulay agreed during his deposition that 0.25% is too small to
15 measure. Macaulay Depo. at 25:17-25. Additionally, the fact that "Before" values are also
16 based on a hypothetical that adds some unstated incremental value to actual 2019 values
17 exacerbates this issue—the ability for an appraiser to discern the micro-value differences
18 between hypothetical conditions that are so similar (the WSDOT improvements compared to
19 the LID improvements) "verges on being ludicrous." 3/3/2020 (A. Gibbons) Hrg. Tr. at
20 89:4-90:7.
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37

38 39. Even if it were possible to accurately tease out such a miniscule hypothetical
39 value change due to improvements coming five years later, experts testified that there is no
40 data to justify the mathematical adjustments—they are just the appraiser's guesses as to
41 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
42 88:21-88:24 ("you cannot measure one percent difference in a high-rise building for this
43
44
45
46
47

1 kind of a medium ... it's simply assigned to a before value"). For these reasons, Taxpayer
2
3 appeals the following portions of the Examiner's Recommendation: II.27 and IV.B.4.
4

5 40. No analysis of value increase attributable to individual components of the
6 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
7
8 percentage difference between hypothetical Before and After conditions. Throughout his
9
10 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
11
12 descriptions in the Addenda even though he testified that he relied on these to calculate
13
14 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
15
16 someone might be able to determine how he attributed value to After conditions described in
17
18 the Addenda, he answered that that was "not the scope of the assignment" because he was
19
20 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
21
22 that the six components were not actually a continuous project, that he was viewing them
23
24 together because the City asked him to, and that if he were to view them independently,
25
26 there was a low probability that properties in the north would specially benefit from
27
28 improvements in the south and vice versa. See 6/25/2020 Hrg. Tr. at 27:18-28:5.
29

30 41. Not only did he fail to analyze benefits from each of these non-contiguous
31
32 improvements, his familiarity with descriptions as whole was tenuous at best. See, e.g.,
33
34 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
35
36 arose from specific Before/After descriptions in the Addenda); cf. *Anderson v. City of*
37
38 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
39
40 objectives that guided regulators' assessment of architectural plans for buildings along a
41
42 "signature street" were so vague that they amounted to ad hoc review based on the
43
44
45
46
47

1 regulators' subjective impressions and feelings).⁷ It became clear through his testimony that
2 even though he used the renderings as "visual aid[s] in appraising the property in the before
3 and after" to "visually see what the differences would be," he could not explain what
4 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
5 when shown a rendering of a two-lane road going down to one-lane in the After condition
6 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
7 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
8 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
9 could explain the depiction of the same trees in the After condition nearly twice as tall as in
10 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
11 of the Examiner's Recommendation: II.27 and IV.B.4.
12
13
14
15
16
17
18
19
20
21
22

23 42. Special assessment is not supported by comparable studies, data or reports.

24 Mr. Macaulay's references to empirical research do not justify his fundamental assumption
25 that the LID Improvements will lead to meaningfully increased real estate values for
26 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
27 comparable sales or information from the "over twenty-five studies and reports" to arrive at
28 very precise special benefit increases for the commercial properties, including Taxpayer's
29 property. For example, although Mr. Macaulay stated that no single report or study was
30 directly on point due to the unique nature of the LID Improvements (*see, e.g.,* 6/25/2020
31
32
33
34
35
36
37
38
39
40

41 ⁷ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must "be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit." *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific adjustments in his
2
3 parcel-by-parcel analysis other than to say that the studies generally provided “some
4
5 background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12; *see also*
6
7 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account for
8
9 similarities and differences between these improvements and the comparable parks he
10
11 looked at).

12 43. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
13
14 assignment of incremental increase of 0.5% to 4% to property values within the LID.
15
16 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
17
18 research misinterprets his work in critical ways, including because the LID Improvements
19
20 manifest the characteristics of a parkway (not a park), and his research indicates that most of
21
22 a *park’s* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
23
24 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
25
26 related value increases are in fact smaller; that estimated increases are “best guesses” rather
27
28 than predictions of property value increases in a particular city; and that percentages do not
29
30 account for diminishing returns after taking into account water views, which would be the
31
32 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
33
34 topography grants most properties in downtown a water view.
35

36 44. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
37
38 that this was just one source of information that was not entirely relevant because, among
39
40 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
41
42 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
43
44 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
45
46 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
47

1 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
2
3 Crompton concluded that 500 feet via road from “park” improvements is just one or two
4
5 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
6
7 significantly beyond that which the park study indicated (even if it was legitimate to use the
8
9 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
10
11 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
12
13 impact applicable to “community parks”—which the LID Improvements are not. *Id.*
14
15 Taxpayer’s property is not within 500 road network feet from the “park” improvements. *See*
16
17 Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.

18
19 45. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
20
21 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
22
23 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
24
25 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
26
27 materials, it was clearly an important—if not *the* most important—source of information for
28
29 estimating special benefits (especially with respect to the condos).⁸ No City witness
30
31 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
32
33 parcel-by-parcel analysis.

34
35 46. The destination parks discussed in the Final Special Benefit Study do not
36
37 provide reliable, comparable, and valid support for the calculation of special assessments
38
39 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
40

41
42 ⁸ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 Study were funded by a LID. And in virtually all of those cases, the park improvements
2 dramatically restored unimproved or blighted areas, and properties evaluated were within
3 two or three blocks of the park.
4

5
6 47. ABS's claimed reliance on three economic studies to support property value
7 increase is also flawed. The HR&A study does not inform what value increases are
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
10 dissimilar parks in other cities,⁹ making the methodological application to the LID
11 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
12 conclusion that there would be *no new net visitors* from downtown residents as a result of
13 the LID Improvements and could not explain how this impacted his condo analysis.
14

15
16 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
17 Property Values" primarily focused on whether the benefits accrue to the larger community
18 rather than properties adjacent to the park. And the 2014 New York City Department of
19 Transportation study is not based on real estate transactions and market sales and fails to
20 substantiate any link between increased retail sales and property values. Moreover, this
21 study only looked at impact either directly abutting the streetscape improvement, or a couple
22 hundred feet for plaza-like improvements.
23

24
25 48. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
26 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
27

28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43 ⁹ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 Exhibit 124. One explanation of that this omission could be TPL’s estimate of the economic
2 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
3 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
4 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
5 asked whether he considered that HR&A’s estimated LID impact is six times greater than
6 TPL’s assessment of Seattle’s entire park system, his surmised that it was because the
7 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
8 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
9 assumptions to account for this difference, which may be partly explained by the fact that
10 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
11 approximately 3.44% of King County tourists visit Seattle primarily because of the city
12 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
13 waterfront improvements.

26 49. Although proximity to the improvements is a key factor in all of these
27 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
28 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
29 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
30 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
31 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
32 Improvements is approximate 20 acres and it is not a community park.¹⁰

43
44 ¹⁰ *See*
45 [https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf)
46 [Qs_Final.pdf](https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf) (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 50. There is no explanation in the Final Study or the supporting materials of how
2 the studies or comparable sales were used to derive values for Taxpayer's property. For
3 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
4
5 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.
6
7

8 51. Failure to comply with USPAP. Taxpayer's assessment also rests on a
9 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
10 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12 Study does not meet mass appraisal standards nor allow for independent assessment of the
13 accuracy of Mr. Macauley's conclusions.
14
15

16 52. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
17 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
18 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
19 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
20 testimony suggests that he incorrectly believed that the only difference between direct
21 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
22 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
23 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
24 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
25 Gordon uses in doing his limited restricted report").
26
27

28 53. But the difference is not only in reporting—mass appraisal techniques must
29 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
30 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
31 parcel approach:
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 The mass appraisal technique is an appraisal method used to evaluate
2 a group of properties that are subject to similar market forces as of a
3 certain date through the use of market data, statistical analysis and
4 testing. As a result, the mass appraisal technique does not require or
5 involve analysis of each individual property's specific data.
6

7
8 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).

9
10 54. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
11 universe of properties as a given date using standard methodology, employing common data,
12 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
13 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
14 model" is "a mathematical expression of how supply and demand factors interact in a
15 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
16 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
17 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
18
19
20
21
22
23
24

25
26 55. Regardless of client direction, Mr. Macaulay is required to comply with
27 USPAP. So if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have been
28 economically feasible because it would have taken "an incredible amount of time and cost"
29 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
30 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 ("performing an
31 individual appraisal of each [condo] parcel would have been cost and time prohibitive").
32
33
34
35
36

37
38 56. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
39 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
40 value, fails to calibrate the model structure to determine the contribution of the individual
41 characteristics affecting value, and does not review the mass appraisal results against actual
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2 217:1;¹¹ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

3
4
5 57. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6 proximity to the elements, the increase in market rent, market vacancy changes,
7 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
8 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
9 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
10 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
11 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
12 internal review process. *Id.* at 104:24-105:20. And because both the Before and After
13 values were hypothetical, it was not possible to identify matched pair sales and no City
14 witness explained how ABS Valuation made adjustments to “comparable” sales in order to
15 check their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which
16 requires him to explain his model structure.
17
18
19
20
21
22
23
24
25
26
27

28 58. For these reasons, Taxpayer appeals the following portions of the Examiner’s
29 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
30
31
32
33

34 ¹¹ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner’s denial of that motion.
4

5 59. Finally, Taxpayer’s property is not appurtenant—or even in close
6
7 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
8
9 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
10
11 close proximity to the property on which expert testimony was given”). Indeed, Taxpayer’s
12
13 property is not within 500 road network feet from the core “park” improvements. And, as
14
15 described above, the special assessment is overstated because the Final Study makes no
16
17 attempt to determine general benefits, existing amenities for Taxpayer’s specific property, or
18
19 special detriments. In addition, it is speculative due to the fact that, as of October 2019,
20
21 improvements were not in in place—and, in fact, much of the waterfront is a construction
22
23 zone following removal of the viaduct and now Pier 58 demolition. Under these
24
25 circumstances, rather than relying on entirely imaginary income and shaky hypotheticals,
26
27 Mr. Macaulay at the very least should have discounted the special benefit estimates or
28
29 waited to perform the Study until the improvements were at least close to complete.
30

31 **Erroneous Pre-Improvement Valuation**

32
33 60. The proposed final assessment erroneously overstates the pre-improvement
34
35 value of Taxpayer’s property as of October 1, 2019 and, as a result, overstates the special
36
37 benefit to the Taxpayer’s property.
38

39 61. The City’s Final Study was used to compute the proposed final assessment of
40
41 Taxpayer’s property. The City’s Study purportedly uses data from the King County
42
43
44
45
46
47

1 Department of Assessments,¹² but the pre-improvement valuation information in the Final
2 Study does not accurately reflect this data. For example, the City’s Study values Taxpayer’s
3 property at \$41,243,000 as of October 1, 2019. However, the King County assessor
4 determined the true and fair value of the property to be \$40,574,200, valued in 2019 for tax
5 year 2020. The Final Special Benefit Study does not explain this difference—or any
6 differences—between its pre-improvement valuation and its supposed source for market
7 data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner’s
8 Recommendation.
9

10
11
12
13
14
15
16
17 62. Thus, aside from multiple other reasons why computation of the special
18 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
19 improvement values that do not accurately reflect market data. For these reason, Taxpayer
20 appeals the Examiner’s recommended denial on page 105 of the Examiner’s
21 Recommendation.
22
23
24
25

26 27 **Erroneous Computation of Special Benefit**

28
29 63. “Special benefit” is “the increase in fair market value attributable to the local
30 improvements.” *Doolittle*, 114 Wn.2d at 103. “A benefit that a particular piece of property
31 may receive by reason of the improvement is not measured alone by the physical character
32 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
33 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
34 the particular tract or property benefited by the entire improvement, and is it assessed
35
36
37
38
39
40
41
42
43
44

45 ¹² See, e.g., Final Special Benefit Study, “All Other LID Commercial Properties” Spreadsheet
46 (providing a “County Link” to the King County Department of Assessment’s online “eReal
47 Property” search tool).

1 proportionately with the other property included within the assessment district?” *Id.* 165–
2
3 66.

4
5 64. The proposed final assessment erroneously overstates the special benefit of
6
7 LID improvements in a number of ways.

8
9 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
10
11 the 4th and Pike building, Mr. Macaulay assumed office rental rates would increase by
12
13 0.80% (low) and 1.00% (high) due to the 2024 LID Improvements. But it is not possible to
14
15 accurately conclude that the reason for this level of percentage increase would be due to the
16
17 LID Improvements, and there appears to be no support for assignment of these percentages.
18
19 Based on formulas in the spreadsheets, Mr. Macaulay then uses these same percentages
20
21 (0.80% and 1.00%) to increase retail rental space. He then uses this hypothesized increased
22
23 revenue to calculate a new net operating income for the commercial properties and
24
25 capitalizes that to come up with an “After” valuation.

26
27 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
28
29 operating income remains the same as in the hypothetical “Before” condition, but changes
30
31 the cap rate. For the 4th and Pike building, the cap rate goes from 5.25% to 5.20% (low
32
33 scenario, creating a bigger value increase) and 5.15% (high scenario, creating a lower value
34
35 increase). But cap rate changes of 0.05% or 0.10% are not typically measurable, and there
36
37 appears to be no support for these changes in the Final Study or any of its supporting
38
39 materials.

40
41 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
42
43 benefit conclusion. For the 4th and Pike building, this is an increase in property value of
44
45 1.80% due to the LID Improvements.
46
47

1 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
2 and capitalization rates. When asked precisely what the basis is for his special benefit
3 percentage increases to revenue for each commercial property, he could not point to
4 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
5 is nothing in the report to allow a reader to understand how he came up with these
6 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
7 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
8 the basis for his belief that certain factors—liked increased connectivity—will increase
9 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
10 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
11 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
12 sources equally even though there was no separate analysis done for food and beverage or
13 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
14 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
15 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
16 properties.
17

18 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
19 check for commercial properties. But as explained above, no City witness has explained
20 how anyone, or all, of the sales are comparable to any particular commercial property within
21 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
22 in order to make sales “comparable,” he would have had to make adjustments to account for
23 Before and After conditions, but there is no way to understand how adjustments were made
24 because he “didn’t do a separate sales comparison approach where we showed adjustments
25 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
2
3 *Id.* at 127:10-128:24.

4
5 70. It also bears noting that any “internal review” of the special benefit estimates
6
7 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
8
9 error. Indeed, given all the same information, he seemed to suggest that it would be
10
11 perfectly reasonable for another experienced appraiser to come up with special benefit
12
13 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
14
15 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
16
17 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
18
19 margin of error conflicts with the testimony of Taxpayer’s experts and reaffirms that there
20
21 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
22
23 margin of error (5%) is a “rule of thumb” and not a “hard legal standard,” there are still
24
25 reasonable and unreasonable variations within the appraisal field. *See Examiner’s*
26
27 *Recommendation* at IV.B.4. Thus, the special assessment is not actual, measurable or
28
29 special because it is arbitrarily assigned; and it is too small to realistically be supported by
30
31 appraisal techniques.

32
33 71. No evidence of special benefit. Meanwhile, there is “no actual evidence from
34
35 any seller or purchaser that the price was higher because of the LID improvements.”
36
37 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City’s appraiser “has not
38
39 identified any seller or buyer, or any particular property where the existence of the LID
40
41 improvements had an effect on the market price.” *Id.* at 410-11. Meanwhile, Taxpayer has
42
43 explained that the property has not increased rental rates or revenue due to the forthcoming
44
45 LID Improvements, because, among other reasons (and apart from COVID), the
46
47 improvements ABS believes will generate value do not exist, and will not for a number of

1 years to come. There are no comparable sales because the LID Improvements are not in
2 place, nor will they be until the end of 2024 if completed on schedule.
3

4
5 72. The fair market value of Taxpayer's property has not changed due to
6 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
7 benefited from installation of new water main and fire hydrant where it was already
8 adequately supplied with water and afforded adequate fire protection). And in any event,
9 any value attributable to removal of the viaduct was to be excluded from the assessment
10 calculation.
11

12
13 73. There is no special benefit because LID improvements in fact diminish the
14 value of Taxpayer's property by, for example, imposing an immediate tax on the property
15 while providing no immediate benefits or drawing visitors away towards improvements that
16 do not abut the property. *See Kusky*, 85 Wn. App. 493 (testimony of owners' expert that
17 LID actually diminished value of property was sufficient to rebut presumption that
18 assessment was proper).
19

20
21 74. Moreover, the assessment formula is an attempt to distribute costs that do not
22 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
23 "merely a mathematical model that distributes costs").
24

25
26 75. The Special Benefit Study fails to address whether the \$346,000,000
27 estimated LID project cost takes into account the investment that would have occurred in the
28 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
29 invested. This is a critical component of estimating which properties receive a direct benefit
30 from the improvements, versus more incidental benefits further from the park.
31

32
33 76. The proposed final assessment substantially exceeds the special benefit to the
34 property and is grossly disproportionate to similarly situated properties within the LID. The
35
36
37
38
39
40
41
42
43
44
45
46
47

1 City has not addressed any of these specific issues and offers only general responses which
2 have already been rebutted by Objectors in their case-in-chief and cross-examination. *See*
3
4 Second Decl. of Macaulay, ¶¶2, 70-73 (date 6/26/2020). For these reasons, Taxpayer
5
6 appeals the following portions of the Examiner's Recommendation: Sections II.22, II.23,
7
8 II.27, IV.B.4, IV.B.11(a)(iii) and page 105.
9

10 **State Environmental Policy Act and Other Environmental Permitting**

11
12 77. While this appeal is not challenging the City's environmental review and
13
14 permitting processes, those processes are relevant in determining the legality of the
15
16 assessments, and to assessing the delivery risk, the present value of the City's plans, and
17
18 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
19
20 pursue projects that have not yet undergone environmental review (thus limiting the choice
21
22 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
23
24 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
25
26 is just beginning. Further, the City has segmented environmental review, and still has a
27
28 gauntlet of federal, state and tribal review processes to complete before it will be clear what
29
30 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
31
32 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
33
34 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
35
36 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
37
38 committing to reconstruction of Pier 58 and major street improvements without
39
40 environmental review, or the City's Final Special Study has improperly included and is
41
42 proposing to assess the Taxpayer the costs and special benefits of improvements that may
43
44 not get built. Either way, it is faulty process.
45
46
47

Due Process Rights

1
2
3 78. The City's failed to notify Taxpayer sufficiently in advance of the hearing to
4 allow Taxpayer to obtain evidence and prepare to properly challenge the assessments.
5
6 Because LID assessments involve a deprivation of property, affected owners have the right
7 to a hearing as to whether the improvement resulted (or will result) in special benefits to
8 their properties and whether their assessments are proportionate, which necessarily includes
9 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
10 555, 569–70, 229 P.3d 761 (2010).
11
12
13
14
15

16 79. The LID statute specifies that cities must mail notices giving the time and
17 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
18 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
19 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
20 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
21 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
22 secure their own appraisal), evaluate proportionality of the proposed assessments, and
23 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
24 for anybody to get an appraisal”).
25
26
27
28
29
30
31
32
33

34 80. The City’s Notice of Assessment was sent on December 30, 2019. And the
35 Final Special Benefit Study has only been available for public review since January 7, 2020.
36 Due to this short time frame, Taxpayer requested a prehearing conference and scheduling
37 order that would preserve and protect Taxpayer’s right to analyze and respond to the Final
38 Study, obtain expert appraisal testimony, conduct depositions, and to accommodate
39 preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City’s
40 assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
41
42
43
44
45
46
47

1 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
2
3 the Examiner's Recommendation: I.B.
4

5 **VII. Relief Requested**
6

7 Taxpayer respectfully requests that the City Council:
8

- 9 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection; and
10
11 a. Cancel the Waterfront Local Improvement District No. 6751 proposed final
12 assessment dated December 30, 2019; or
13
14 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
15 proposed final assessment to \$0 (zero), or such amount as Taxpayer
16 establishes at the hearing in this matter; or
17
18 c. Remand the matter to the Hearing Examiner or City appraiser to recalculate
19 and reduce Taxpayer's assessment using recognized appraisal techniques
20 consistent with USPAP and:
21
22 i. Excluding any property value increase attributable to viaduct removal
23 and other planned WSDOT Improvements;
24
25 ii. Taking into account the effects of the COVID-19 pandemic on the
26 value of Taxpayer's property and other relevant developments since
27 October 2019;
28
29 iii. Accounting for and excluding (1) any special benefits from existing
30 or planned improvements that already provide similar benefits to
31 Taxpayer's property, and (2) any special detriments from construction
32 and other anticipated LID-related disamenities;
33
34 iv. Accounting for and including only those actual benefits anticipated to
35 accrue to Taxpayer's property based on its location relative to Pier 58,
36
37
38
39
40
41
42
43
44
45
46
47

1 Overlook Walk, and the Promenade, and specific elements of the LID
2 Improvements;

3
4
5 v. Discounting anticipated special benefits to present value, based on
6 reliable estimates regarding when special benefits will start accruing
7 following completion of the LID Improvements; and
8

9
10 vi. Accounting for such other issues specific to Taxpayer's property
11 relevant to calculation of such assessment; and
12

13
14
15 2. Grant such further relief as the City Council deems just and proper.
16

24
25 **III. Statement of Taxpayer's Interest and Incorporation of Prior Arguments**

26 LBA RVI-Company XLI, LLC owns the property that is subject to the proposed
27
28 final assessment described in Section IV.
29

30 Taxpayer is amending its appeal as authorized in City of Seattle Resolution 31979 to
31
32 include additional arguments relevant to the revised Final Recommendations of the Hearing
33 Examiner issued on February 1, 2021. On February 4, 2020, Taxpayer timely filed an
34
35 objection to the assessment, which was based on the Final Study. Taxpayer further timely
36
37 filed an appeal of the Hearing Examiner's 2020 recommendations to the City Council.
38
39 Taxpayer maintains and incorporates all objections and arguments raised in its appeal filed
40
41 with the City Clerk on September 22, 2020. This amendment is a supplement is to be read
42
43
44

45
46 ¹ See Taxpayer's September 22, 2020 Appeal to City Council, FN for explanation regarding
47 Ownership.

1 together with Taxpayer's appeal filed on September 22, 2020. Taxpayer incorporates by
2 reference all filings, evidence, and pleadings filed by any party before the Hearing Examiner
3 as authorized by the Hearing Examiner, including without limitation all records pertaining to
4 the November 2020 through February 2021 remand hearing ordered by Council.
5
6
7

8
9 **IV. Amended Arguments on Appeal**

10 LBA RVI-Company XLI, LLC supplements its appeal of the Hearing Examiner's
11 recommendation to deny Taxpayer's objection to the City of Seattle's Waterfront Local
12 Improvement District No. 6751 proposed final assessment dated December 30, 2019 against
13 the following property:
14
15
16
17

18 King County Parcel No. 1975700235
19 Site Address: 1424 4th Ave., Seattle, Washington
20 Proposed Final LID Assessment for Parcel: \$ 291,515.57
21
22

23 To avoid repetition, Taxpayer incorporates the evidence and arguments raised before
24 the Hearing Examiner and before the City in its September 22, 2020 appeal, into this
25 amended appeal.
26
27

28
29 **A. The Anticipated Special Benefits to Taxpayer's Property should be**
30 **Discounted to Present Value and Assessments Adjusted as Appropriate**
31

32 On remand, the City's appraiser acknowledged that special benefits to parcels can be
33 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
34 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
35 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
36 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
37 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
38 accepted that recommendation. The City's appraiser further acknowledged that benefit
39 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
40
41
42
43
44
45
46
47

1 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
2 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
3 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
4 calculations to present value because the general benefits are not anticipated from the LID
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
7 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
8 benefit calculation, and related assessments, to account for the delay between the assessment
9 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
10 standard appraisal practice, and renders the other proposed Waterfront LID special
11 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
12 “fundamentally wrong methods.”
13
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
18 Additionally, the assessments may not materially exceed the actual special benefit conferred
19 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
20 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
21 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
22 discount benefits the City estimated would accrue to the properties from improvements to be
23 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
24 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
25 property while treating all or most others (including Taxpayer’s) differently, and
26 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
2 for some properties because the benefits are too distant, while assessing other properties as
3 though distant benefits have already been secured. As Taxpayer identified in its September
4 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
7 reject the improper calculation of the benefit or remand and require the appraiser to discount
8 the benefits to net present value.
9

10
11
12
13
14
15
16
17 **B. In Light of Covid's Continuing Impact on Taxpayer and other**
18 **Downtown Property Owners and other Material Changes Since October**
19 **2019, the LID Should be Cancelled, or at Least Assessments**
20 **Recalculated, to take Into Account Property Value Reductions**
21

22 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
23 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
24 other relevant developments since October 2019." When Washington's first COVID
25 restrictions were imposed in March and April 2020, there was an assumption that they
26 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
27 II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover
28 for another 5 years. Retail stores are boarded up. Homelessness and related challenges have
29 gotten much worse. The City has already imposed higher minimum wages and taxes on
30 businesses to try to fund recovery. The West Seattle Bridge and other bridges are in
31 immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park
32 hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several
33 years from completion, as a best case. In current circumstances, a downtown tax to fund
34 new, non-essential park improvements against financially strapped taxpayers, and likely
35
36
37
38
39
40
41
42
43
44
45
46
47

1 passed through to financially strapped tenants and customers would be unfair to taxpayers
2 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
3 rethinks its budget priorities for the next few years, and its potentially funding sources,
4
5 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
6
7 property owners) have a chance to recover, and that any assessment take into account the
8
9 changed circumstances since this appeal process started on February 4, 2020 to avoid
10
11 unnecessarily and perhaps permanently killing downtown properties and businesses in the
12
13 name of bettering them.
14
15

16
17 **V. Relief Requested**

18
19 Particularly in light of the Committee's decision not to take further comment from
20
21 appellants, Taxpayer respectfully request that each Committee member carefully review the
22
23 full record transmitted to Council before voting on Taxpayer's appeal.
24

25 LBA RVI-Company XLI, LLC respectfully reiterates its request from the September
26
27 22, 2020 appeal that the City Council:

- 28
29 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection; and
30
31 a. Cancel the Waterfront Local Improvement District No. 6751 proposed
32
33 final assessment dated December 30, 2019; or
34
35 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
36
37 proposed final assessment to \$0 (zero), or such amount as Taxpayer
38
39 establishes at the hearing in this matter; or
40
41 c. Remand the matter to the Hearing Examiner or City appraiser to
42
43 recalculate and reduce Taxpayer's assessment using recognized appraisal
44
45 techniques consistent with USPAP and:
46

FINAL ASSESSMENT FOR PARCEL NO.
1975700365

33
34 FOURTH AVENUE ASSOCIATES hereby gives notice under ER 408 that it
35
36 accepts the Hearing Examiner’s revised recommendation to reduce the Waterfront LID No.
37
38 6751 final assessment on the subject property to \$158,760, as established in the Hearing
39
40 Examiner’s February 1, 2021 Final Findings and Recommendation, pages 108-109, and will
41
42 forego further appeal, and request that the Council accept this revised recommendation.
43
44 Should the Council reject that Examiner recommendation, Taxpayer incorporates all
45
46
47

1 additional information submitted into the record in the remand hearing ordered by the
2
3 Council and reserves all rights and remedies, including without limitation further appeal.

27 Facsimile: 206.359.9000
28
29

30 **III. Statement of Fourth Avenue Associates' Interest**

31
32 FOURTH AVENUE ASSOCIATES leases, with the right to challenge the
33
34 assessment, the property that is subject to the proposed final assessment described in Section
35
36 IV. The property, the Century Square Retail building, is a two story building for retail use
37
38 that is encumbered by development restrictions on building height and the ability to
39
40 redevelop the ground floor due to the presence of a light rail link station.

41
42 The basis of the proposed assessment is a Final Special Benefit/Proportionate
43
44 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
45
46 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
47

1 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
2 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
3 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
4 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
5 to exclude charges for other improvement projects in the Central Waterfront, and
6 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
7 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
8 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
9 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
10 because construction was not complete on the LID Improvements or the WSDOT
11 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
12 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
13 facts. On February 4, 2020, Fourth Avenue Associate timely filed an objection to the
14 assessment, which was based on the Final Study.

28 **IV. Matter Under Appeal**

29 FOURTH AVENUE ASSOCIATES appeals the Hearing Examiner’s
30 recommendation to remand Fourth Avenue Associates’ objection to the City of Seattle’s
31 Waterfront Local Improvement District No. 6751 proposed final assessment dated
32 December 30, 2019 against the following property:

33 King County Parcel No. 19675700365
34 Site Address: 1525 4th Ave., Seattle, Washington
35 Proposed Final LID Assessment for Parcel: \$161,504¹

36
37
38
39
40
41
42
43
44
45
46
47

¹ This is a revised final proposed assessment. The City’s original final proposed assessment of Century Square Retail was \$278,585, but the City conceded that ABS overvalued the building by failing to consider certain development restrictions. This failure is the basis for the Hearing Examiner’s recommendation to remand rather than deny the petition. *See* Examiner’s Recommendation at 105.

1 See Examiner's Recommendation at 61-62, 105. To avoid repetition, Fourth Avenue
2 Associates incorporates the evidence and arguments raised before the Hearing Examiner into
3 this appeal. In particular, Fourth Avenue Associates points the City Council to Fourth
4 Avenue Associates' initial Appeal Petition, *Frye* motion, Closing Brief submitted at the
5 close of its case-in-chief (dated 4/16/2020), and supplemental Closing Statement submitted
6 at the close of the City's case-in-chief (dated 7/7/2020).²
7
8
9
10
11

12 As discussed more fully below, Fourth Avenue Associate specifically appeals the
13 following Findings and Recommendations in the Hearing Examiner's September 8, 2020
14 Recommendation: Pages 61-62, 105, Sections II.6, II.7, II.14, II.15, II.18, II.19, II.20, II.21,
15 II.22, II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1,
16 IV.B.2, IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i),
17 IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.8,
18 IV.C.9, IV.C.11, IV.C.12, IV.C.14, IV.C.18
19
20
21
22
23
24
25

26 Fourth Avenue Associate also appeals the Hearing Examiner's failure to make
27 findings of fact or recommendations on material issues raised during Fourth Avenue
28 Associates' appeal that were supported by law, expert testimony, and fact. The Final Study
29 fails in numerous ways to satisfy the basic requirements of a LID assessment study, and the
30 Examiner's Recommendation ignores the many deficiencies in the Final Study. In fact, the
31 only instances in which the Examiner recommended anything other than denial of objectors'
32
33
34
35
36
37
38

39 ² Because the City has not provided "metered index numbers," our appeals cannot reference
40 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
41 Public Works committee secure and provide appellants with such a record, so that the appeals can
42 then be supplemented with that additional information, so as to make the Committee's consideration
43 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
44 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
45 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
46 retained by Perkins Coie are part of this case file.
47

1 appeals were where the City's appraiser confessed error. The appraiser's proposed
2 assessments, and the Examiner's Recommendations, would have the City impose arbitrary
3 and capricious Waterfront LID special assessments based on "fundamentally wrong
4 methods."
5
6
7

8 The special benefit for which special taxes are assessed must be "actual, physical and
9 material and not merely speculative or conjectural." *Heavens v. King Cty. Rural Library*
10 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
11 with the law, the assessments may not materially exceed the actual special benefit conferred
12 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
13 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
14 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
15 assessment. In this case, the proposed assessment fails each of the legal requirements for
16 special assessments and must be annulled as arbitrary or capricious, or founded on
17 fundamentally wrong methods.
18
19
20
21
22
23
24
25
26
27
28
29

30 **Legal Requirement:** Actual, non-speculative special benefit

31
32 **ABS Study:** Estimates a hypothetical benefit based on "Before" values that increase
33 "actual 2019" values (unstated) assuming the WSDOT Improvements were in place in
34 October 2019 (they were not), and an "After" value purporting to assess the value of
35 properties with the LID improvements in place at least five years before anticipated
36 completion.
37
38

39 **Legal Requirement:** Cannot materially exceed the special benefit

40
41 **ABS Study:** ABS calculates a special benefit of \$412,000³ assuming the LID
42 Improvements were in place and providing benefit in October 2019. However, the LID
43
44
45

46 ³ This is a revised special benefit. The original special benefit was estimated to be \$711,000,
47 but the City reduced the amount based on the ABS error discussed in footnote 1.

Improvements will not be completed until the end of 2024 if the City meets its current schedule, and many of WSDOT's alternative improvements will not be built. The present value of future improvements deliverable in five years is significantly lower than the current value of improvements that already exist. Further, ABS's own materials show that benefits may not accrue for at least five years after they are completed, in 2029. If the hypothesized special benefits are discounted to present value, the assessments materially exceed the hypothesized special benefits.

Legal Requirement: Actual, non-speculative special benefit—Date of valuation/COVID

ABS Study: The City has not finalized the assessment roll. After the City's appraiser prepared his Final Study in October 2019, and the City issued its preliminary roll in December 2019, COVID devastated downtown hotel and retail properties. The Hearing Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and the City's preliminary roll. On the contrary, the City's assessments have yet to be made and must be based on actual special benefits. While that does not mean ABS's appraisal was wrong when completed, values and benefits need to be reanalyzed before assessments are finalized in light of the unprecedented changes to the downtown real property market.

Legal Requirement: Actual benefit that cannot materially exceed special benefit—Assessment cannot include value attributable to future WSDOT Improvements.

ABS Study: The City's appraiser asserts that the City is not collecting assessments "based on the value of WSDOT's planned improvements." See Final Study at 3. However, the City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition, the City's appraiser increased 2019 property market values as though WSDOT had completed its work by 2019. The proposed assessment is against this hypothetical WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent) higher than actual 2019 market values. The City is collecting an assessment against both the 2019 current values and the phantom 2019 WSDOT market value lift, in direct contravention of law and the City's promise not to impose an assessment based on the value of viaduct demolition and the other components of WSDOT's planned work.

Legal Requirement: Benefits must be special, not general

ABS Study: The City's appraiser fails to determine or explain what general benefits arise due to the LID Improvements. However, the far-reaching and public nature of the improvements make any benefit arising from them general—not special.

Legal Requirement: Must comply with appraisal standards

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual"
2 and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
3 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
4 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
5 Final Study fails to meet basic standards for admissibility and must be remanded.
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2
3 Fourth Avenue Associate as to which the Examiner also erred, discussed in the course of the
4
5 appeal statement below.
6

7 **V. Standard of Review**
8

9 “When considering the assessment roll, the city council sits ‘as a board of
10
11 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
12
13 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
14
15 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
16
17 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
18

19 The proposed assessments are presumed correct, “unless overcome by clear, cogent
20
21 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
22
23 than the heightened presumption of correctness on judicial appeal because “applying these
24
25 elevated standards at the municipal hearing would afford unwarranted deference to a report
26
27 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
28
29 presumption is not evidence and its efficacy is lost when the other party adduces credible
30
31 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
32
33 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
34
35 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
36
37 presented credible evidence showing that the City’s proposed assessment is arbitrary,
38
39 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
40
41 to the City to prove the assessments are actual, measurable, special, non-speculative and
42
43 proportionate. The City failed that burden.
44
45
46
47

1 **VI. Grounds for Appeal**

2 FOURTH AVENUE ASSOCIATES appeals the Hearing Examiner's Findings and
3
4 Recommendations on the following grounds.
5

6 **Fourth Avenue Associate Not Required to Provide A Special Benefit Study**

7
8 1. Contrary to the Examiner's findings and recommendations, there is no
9
10 requirement that experts or property owners provide an alternative special benefit
11
12 calculation under these circumstances—to do so would also require the same improper
13
14 speculation the City's expert engaged in, given the timing and information provided. *See,*
15
16 *e.g.*, Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
17
18 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained:
19
20 "[W]e have explicitly rejected an argument that, because certain protestors 'failed to offer
21
22 expert testimony at the city council hearing[,], the presumptions [in favor of the assessment]
23
24 were still operative as to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian*
25
26 *Trail Trunk Sewer*, 35 Wn. App. at 843); *see also Kuskay v. City of Goldendale*, 85 Wn. App.
27
28 493, 933 P.2d 430 (1997) (although appraiser did not submit an appraisal, he provided
29
30 expert opinion showing that improvements actually diminished value of the property). Here,
31
32 Ben Scott testified that he is an expert in reviewing mass appraisal reports and analyzing
33
34 their impact on individual properties - precisely the matter at issue in this appeal. *See*
35
36 3/5/2020 Hrg. Tr. at 13:1-4 (laying foundation as expert witness). In fact, no independent
37
38 evidence is required at all if, for example, objectors show that the assessment was grounded
39
40 on a fundamentally wrong basis due to an error in the City's appraiser's methods—as is the
41
42 case here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88,
43
44 106, 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out
45
46 that the square footage assumed in the City's appraisal was incorrect. For these reasons,
47

1 Fourth Avenue Associate appeals the following portions of the Examiner's

2 Recommendation: Sections II.14, II.15, IV.A, IV.B.11(a), IV.C.8, IV.C.9, and IV.C.11.

3
4
5 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

6 2. RCW 35.43.040 provides cities and towns authority for ordering local
7 improvements and for levying and collecting special assessments "on property specially
8 benefited thereby[.]" The cost and expense of the local improvement "shall be assessed
9 upon all the property in accordance with the special benefits conferred thereon." RCW
10 35.44.010.
11

12 3. No analysis of general benefits. Special assessments have been "held valid
13 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
14 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
15 mains." *Heavens*, 66 Wn. 2d at 563. "All such assessments have one common element:
16 they are for the construction of local improvements that are appurtenant to specific land and
17 bring a benefit substantially more intense than is yielded to the rest of the municipality." *Id.*
18

19 4. Fourth Avenue Associates' property is not specially benefited by the LID
20 Improvements. The primary purpose and effect of the LID Improvements are to benefit
21 "members of the whole community" and the public at large. *See, e.g., id.* at 565 ("it is plain
22 that a public library is for the benefit of the members of the whole community individually
23 and collectively who may be served by it"). Mr. Macaulay's own chapter of the LID
24 Manual states clearly that appraisers should "[c]onsider general benefits as well as special
25 benefits" (Hrg. Exhibit 117 (LID Manual) at 58⁴) and he admits that "general benefits
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43

44 ⁴ "Hrg. Exhibits" refer to exhibits that were submitted on behalf of multiple objectors
45 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
46 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
47 days of cross-examination of the City's witnesses (June 23, 25 and 26, 2020). For ease of reference,

1 probably accrue to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Fourth
2
3 Avenue Associates’ expert confirmed that if an appraiser “identifies both general and special
4
5 benefits, these benefits should be clearly distinguished and explained, and only special
6
7 benefits should be included in the After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4
8
9 (dated 7/7/2020); *see also* 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4. It is undisputed that
10
11 Mr. Macaulay did not analyze or measure general benefits, including those arising from
12
13 construction necessary to meet basic design standards. *See* Hrg. Exhibit 117 (LID Manual)
14
15 at 58 (“[c]onsideration may also be given to those construction costs related to meeting
16
17 design standards which may be general benefits as distinct from construction costs
18
19 emanating from requirements of the LID project”). To the extent Fourth Avenue
20
21 Associates’ property may benefit from the LID improvements, the benefit is general and
22
23 incidental, and failure to consider general benefits was a fatal flaw in the City’s
24
25 methodology. For these reasons, Fourth Avenue Associate appeals the following portions of
26
27 the Examiner’s Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and
28
29 IV.C.4.

30
31 5. LID Improvements not necessary. Unlike typical LID projects, the
32
33 Waterfront LID improvements are largely unnecessary to the functionality of any particular
34
35 property, including Fourth Avenue Associates’ property. *See In re Schmitz*, 44 Wn.2d 429,
36
37 433, 268 P.2d 436 (1954) (assessment levied for the purpose of raising the grade of a road
38
39 by 16 to 18 feet held invalid where owners would have benefitted equally from increase of
40
41 only 9 feet); *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land
42
43 at intersection for new water main for hydrant held invalid because land was already
44

45
46
47 Fourth Avenue Associate has attached a master list of the hearing exhibits as Attachment A to this
appeal notice.

1 afforded functional hydrant at nearby street). Here, Fourth Avenue Associates provided
2 evidence through Gary Carpenter, taxpayer representative, who testified that the LID
3 Improvements are not necessary to the business of the Century Square Retail building,
4 which already has sufficient access to amenities necessary for their tenants and users. *See*
5 3/5/2020 (G. Carpenter) Hrg. Tr. at 50:18-52:4. The fact that there is no case law
6 differentiating between binary improvements and parks does not change the law prohibiting
7 assessments on properties already adequately served by existing amenities. *See* Examiner's
8 Recommendation at IV.C.3 (reasoning that "no case law is provided to support the
9 differentiation between a hardscape benefit and the more ephemeral benefits of park"). Nor
10 does the Examiner's reasoning excuse the City's failure to account for existing amenities as
11 part of the special benefit calculation. As Dr. Crompton testified, existing view amenities
12 may in fact diminish the incremental effect of new park improvements on the value of
13 properties, much like turning on a weak light in an already brightly illuminated room. *See*
14 Hrg. Exhibit 94 (Crompton's Report) at 12-13.

15
16 6. To the extent benefits can be considered "special" as opposed to general, they
17 are nominal or nonexistent for many properties even in the Central Waterfront, which
18 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
19 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
20 change due to expansion of sewer service *near* owners' parcel which were already
21 connected). Even if the City could assess for a view change (and it has promised not to
22 assess for viaduct removal), the fair market value of FOURTH AVENUE ASSOCIATES'
23 property has not changed because the LID Improvements have not improved the property's
24 waterfront view or access to the waterfront, nor will they when the City anticipates

1 completion in 2024. For these reasons, Fourth Avenue Associate appeals the following
2 portions of the Examiner's Recommendation: Sections IV.C.3, IV.B.9, and IV.C.3.
3

4
5 7. No analysis of special detriments. The Final Study fails to properly account
6 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
7 owners for removal and cleanup of underground storage tanks discovered during the
8 improvement project). Although Mr. Macaulay claims he analyzed impacts on the City's
9 planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no explanation
10 of how lost parking might be a detriment, and no property-specific parking analysis in any
11 of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.
12
13

14
15 8. Likewise, there was no analysis of the risks associated with disamenities such
16 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
17 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
18 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
19 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
20 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
21 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.⁵ And if
22 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
23 the maintenance agreement. *Id.* at 13:4-14:2.
24
25
26
27
28
29
30
31
32
33
34
35

36 9. There was also no consideration of negative impacts from another four-plus
37 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
38 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
39
40
41
42
43
44

45 ⁵ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 law allowing him to dismiss these actual, non-speculative impacts. Because future special
2 benefits calculations are inherently speculative, Washington’s eminent domain statute
3 specifically allows condemnees to postpone special benefits assessments until improvements
4 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
5
6 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
7 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
8 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
9 Greenway, the Greenway district “significantly” lagged in value). For these reasons, Fourth
10 Avenue Associate appeals the following portions of the Examiner’s Recommendation:
11
12 Sections II.25, IV.B.8, and IV.B.9.
13
14

15 10. Special benefit estimate is speculative. When calculating a special benefit,
16 “[f]air market value cannot include a speculative value.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
17 411. “When an appraiser uses a factor ‘beyond the knowledge of reasonable certainty’, it
18 becomes pure speculation.” *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324
19 P.2d 1078 (1958)).
20

21 11. Assuming without conceding that one day, the City’s planned LID
22 Improvements might increase the value of neighboring properties to some extent, that
23 potential benefit is many years away and speculative. While appraisers tolerate some degree
24 of estimation and judgment, Fourth Avenue Associates’ expert testified that Mr. Macaulay’s
25 Final Study is far too speculative to satisfy industry practices and standards.
26
27

28 12. Although LIDs are sometimes finalized prior to completion of improvements,
29 this is typically just six month or a year prior, and the assessments are otherwise supported
30 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
31 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 will not be realized for four or five years. In the meantime, there is permitting risk,
2 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
3 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
4 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
5 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
6 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
7 testified: "I just don't know what the market value would be as of the date the project would
8 be finally constructed" because "[t]here could be a lot of elements in the market that did
9 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
10 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
11 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
12
13
14
15
16
17
18
19
20
21
22

23 13. The record is clear that while no one can know what "special benefit" might
24 accrue to these properties in four years (if any), we do know that there are no actual benefits
25 now. The LID improvements provide no immediate special benefit to property owners
26 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
27 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
28 sewer system for future users).
29
30
31
32
33

34 14. Further, there are no "plans and specifications" on file with the Clerk's Office
35 for the LID Improvements, and it is unlawful to move to final assessments without such
36 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*
37 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
38 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
39 dollars on projects still early in the design process. *See* Washington Attorney General
40 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
41
42
43
44
45
46
47

1 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
2 of programs and included “only so much of the overall costs” that took place within and
3 benefitted the assessed properties).
4

5
6 15. The COVID-19 crisis highlights how fundamentally speculative and unfair it
7 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
8 anticipated to be delivered five years later. Even before COVID, it was speculative to
9 assume that market highs experienced in October 2019¹ would be sustained through 2024,
10 after an already extraordinarily long expansion period. *See, e.g.*, 3/3/2020 (A. Gibbons)
11 Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr. Macaulay conceded: “[W]hen I was doing
12 my analysis in October 2019, who would have thought that this COVID issue would
13 happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his deposition in late February, his “thought
14 process was that the market was going to continue to go up.” *See* Gibbons Decl. ISO
15 Closing Stmt. at ¶ 12 (dated 7/7/2020). Although COVID does not change actual values as
16 of October 2019 (*see* Examiner’s Recommendation at 109), the pandemic has impacted
17 *current* values and rendered the hypothetical October 2019 Final Study valuations outdated.
18
19

20
21 16. As another example of how future events could affect the accuracy and
22 reliability of the City’s 2019 proposed assessment, Fourth Avenue Associate recently
23 requested the Hearing Examiner re-open the record to allow the City to explain whether the
24 assessments against property owners within the LID are, in fact, being used by the City to
25 fund the emergency dismantling and reconstruction of Pier 58.⁶ It has been reported that the
26

45 [0b60d4097aa3](https://www.king5.com/article/news/local/seattle/seattle-mayor-approves-emergency-dismantling-of-waterfront-pier-58/281-f6b7c7d0-78f2-4826-97c8-0b60d4097aa3); *See* Aug. 21, 2020 Memo from R. Holtz et al. to L. Arber re HPA Request for Pier
46 58 (Waterfront Park) Emergency Demolition Project, *available at*
47 <https://www.govonlinesaas.com/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.ashx?que>

City plans to use LID funding to pay for the expedited, emergency repairs and replacement.⁷ If true, the City would be improperly imposing costs on property owners within the LID for improvements that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon habitat and City infrastructure—this does not provide any special benefit to LID property owners.

17. There is also no certainty the improvements will be delivered on time. Mr. Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a delay in construction schedule would not constitute a “material change” under the City Council’s ordinance authorizing the improvements. In other words, the City cannot guarantee that the LID Improvements will be delivered as expected in 2024 or any time after that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Fourth Avenue Associates’ experts Reid Shockey and Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and potential delays and project changes inherent in those processes, that call into question the assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson Decl., dated 4/15/2020).

18. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on, he could not point to a single one where the assessment roll was finalized five years in advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,

[ry=Ux5Fpa3XqI8020u5QdalfpJXX0C+FjfKT5/OpyMkto74=](https://www.govonline.sa.gov.au/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.aspx?query=Ux5Fpa3XqI8020u5QdalfpJXX0C+FjfKT5/OpyMkto74=); see also Aug. 13, 2020 Ltr. from H. Burton to D. Graves et al. re Review of Pier 58 Movement Observation Report & Recommendations, available at <https://www.govonline.sa.gov.au/WA/WDFW/Public/EnSuite/Shared/pages/util/StreamDoc.aspx?query=EvGV09Syk1HCKYhwoN5Gqo5VpGOk5QBr3KFzTsfO4Lw=>.

⁷ Asia Fields, 'Substantial' pier shift closes Seattle's Waterfront Park (Seattle Times, Aug. 8, 2020), available at <https://www.seattletimes.com/seattle-news/substantial-pier-shift-closes-seattles-waterfront-park/>.

1 he has never recommended final special assessments based on designs less than 30 percent
2 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
3 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
4 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
5 at 66:17-25. He performed no independent due diligence to determine the reliability of the
6 City’s estimates for completion of the LID Improvements, or to ensure that proposed
7 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
8 agreed that if any of his assumptions are incorrect, his opinion of market value would need
9 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
10 68:11-18.

11
12 19. The City has cited no authority—and Fourth Avenue Associates is aware of
13 none—that affirms the use of hypothetical, anticipatory Before and After values in order to
14 estimate and assess taxes for “actual” special benefits that will not accrue for another five
15 years (if all goes off without a hitch). To the contrary, the hypothetical assumption that all
16 of the Before and After Improvements are constructed as of October 1, 2019 allows Mr.
17 Macaulay to base his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at
18 411. For these reasons, Fourth Avenue Associate appeals the following portions of the
19 Examiner’s Recommendation: Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5,
20 IV.B.6, IV.B.11(c), IV.C.12, IV.C.14, and IV.C.18.

21 20. Failure to discount special benefit estimates to account for risks and present
22 value. Due to the inherent uncertainty, Fourth Avenue Associates’ expert opine that the
23 Final Study should have accounted for risks associated with delivery of the improvements
24 (including permitting risk, construction risk, general economic risk) and any special
25 damages associated with interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-

1 120:9, 59:20-60:20. In addition, as is typical appraisal practice, Mr. Macaulay should have
2 discounted the anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-
3 55:1; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) (“Appraisers
4 routinely consider the impact of future conditions [through] discounted cash flow
5 analysis.”).
6
7
8
9

10 21. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, “[y]ou would be discounting it back to a present value.” *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.
22
23
24
25
26
27
28
29
30
31
32
33

34 22. The City’s hotel expert, Mr. Lukens, likewise explained that to calculate
35 present value, an appraiser would consider discount rates for land development to account
36 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at
37 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer
38 to the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
39 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
40
41
42
43
44
45
46
47

1 23. Applying the Q19 Korpacz rates and assuming arguendo that Macauley's
2
3 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
4
5 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
6
7 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
8
9 ignoring momentarily all of the other methodological and other flaws discussed here and in
10
11 Fourth Avenue Associates' case-in-chief, and assuming that the LID Improvements provide
12
13 special benefits as soon as they are complete in 2024, Mr. Macaulay's hypothetical
14
15 assessment materially exceeds special benefits when reduced to present value. Further, to
16
17 the extent the City is arguing that because they are permitted to assess 100% of the special
18
19 benefit, the special benefit estimate can be off by 60.8% because they only assess 39.2% of
20
21 that benefit, the City is again wrong. After applying proper discounting, the City's proposed
22
23 special benefit assessment is far more than 39.2% of the total estimated special benefit, and
24
25 in fact exceeds 100% of the total estimated special benefit.

26 24. But even the assumption that the LID improvements would deliver benefits
27
28 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
29
30 on. Rather, those studies demonstrate that a discount period of five years is conservative.
31
32 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
33
34 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
35
36 indicates that during the construction period, the Greenway district "significantly" lagged in
37
38 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
39
40 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
41
42 30-31 (discussing New York City High Line and San Francisco Embarcadero
43
44 improvements). Given the lengthy delay, any prediction of future special benefits is
45
46 speculative, especially during the construction phase where values are likely to decline. And
47

1 assuming the LID Improvements take a similarly long period of time after they are complete
2 to start producing tangible property value benefits, each additional year of delay results in
3 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
4 Closing Stmt., ¶ 19, Ex. A.
5
6

7
8 25. Applying the same discounting methods described above and in Mr. Gibbons
9 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
10 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
11 before applying the 39.2% percentage assessment. *Id.* For Fourth Avenue Associate, this
12 means at most the 100% assessment should be no more than \$38,810.40. Anything more
13 would permit the City to assess Fourth Avenue Associates based on a hypothetical
14 assumption that these improvements are in place and providing benefit, and ignore the risks,
15 construction disamenity, and time value of money that normal appraisal principles would
16 take into account. *Id.*, ¶ 20. Proportionality would counsel that the assessment should be
17 only 39.2% of that assessment cap, or \$15,213.68.
18
19

20 26. Attachment C includes two Excel spreadsheets applying these discounting
21 methods to Fourth Avenue Associates' assessment. It is undisputed that special benefits will
22 not actually accrue until the LID Improvements are complete in 2024. Accordingly, the first
23 spreadsheet demonstrates that discounting the City's hypothetical October 2019 special
24 benefits to present value would reduce Fourth Avenue Associates' assessment to \$55,385,
25 exclusive of any other flaws in the City's proposed assessment. The second spreadsheet
26 shows even more drastic reductions after taking into account: (1) a rough discount for
27 property value loss due to COVID-19 and (2) discounting to present value for 5 years (*i.e.*,
28 from 2024 when the City anticipates completing the LID Improvements) and 10 years (*i.e.*,
29 from 2029 to account for the time it takes for the improvements to capture property value).
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 After such reductions, Fourth Avenue Associates' assessment would be just \$48,462 (for the
2 5-year discount) or \$13,316 (for the 10-year discount). Neither of these spreadsheets
3 address other issues raised by Fourth Avenue Associates' appeal, but are intended to help
4 demonstrate how unfair and inflated the City's proposed hypothetical assessment is. The
5 Hearing Examiner's Recommendation simply dismisses Fourth Avenue Associates'
6 discounting argument without legal or factual analysis; that failure is error.
7
8
9
10
11
12

13 **Appraisal and Assessment Calculation Methods Are Flawed**

14 27. The "general rule is that each lot, piece, or parcel of land should be assessed
15 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
16 Wn.2d at 97.
17
18
19

20 28. It is proper to sustain a challenge to an assessment, even without the appraisal
21 testimony from the owner, where the objector's expert establishes that the assessment was
22 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
23 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.
24
25
26
27

28 29. The City's appraiser purports to utilize the income method of valuation but
29 relied on inaccurate revenue and market data, as discussed further below.
30
31

32 30. The City's appraiser purports to utilize the comparable sales method of
33 valuation, but no City witness attempted "to characterize any one, or all of them, as
34 comparable to [Fourth Avenue Associates' property]." *See Bellevue Plaza*, 121 Wn.2d at 406
35 (finding "several serious flaws" in ABS's LID analysis in that case, including that the
36 appraiser "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt
37 to characterize any one, or all of them, as comparable to any particular property within the
38 LID"). And no City witness could explain how specific adjustments were made to these sales
39 to account for value increases due to the hypothesized Before and After Improvements. For
40
41
42
43
44
45
46
47

1 this reason, Fourth Avenue Associate appeals Section II.23 of the Examiner's
2 Recommendation.
3

4 31. Special assessment improperly includes value lift from the Before
5 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
6 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
7 Improvements, which WSDOT had independently committed to fund. However, Mr.
8 Macaulay did not calculate the actual market value of LID properties in October 2019, and
9 did not separately analyze the hypothetical increase to property values attributable to
10 WSDOT's planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
11 current value and then separately calculate a hypothetical "With WSDOT" Before value);
12 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
13 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
14 3-4. Without any documented basis or support, Mr. Macaulay simply "ma[de] a judgment a
15 call" on what occupancy and rates would have been for the commercial properties assuming
16 all of the WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-
17 130:11. This outright omission precludes any independent evaluation of the true market
18 "Before" values. *See* 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional
19 appraisal standards; if an appraiser uses current sales data to infer values, then the appraiser
20 must explain how he analyzed that data and other information to come up with the
21 hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just
22 removal of the viaduct, but also other road, pedestrian and landscaping improvements
23 WSDOT had already committed to make.
24

25 32. However, because Mr. Macaulay testified that he did include some WSDOT-
26 related value-lift in the "Before" values, it follows that part of the special assessment
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 improperly is based on value attributable to the WSDOT Improvements. As shown by
2 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
3 percentage to Before values. So for example, if Mr. Macaulay believed the WSDOT
4 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
5 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
6 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
7 to properly exclude the value of Before Improvements from the assessments. For these
8 reasons, Fourth Avenue Associate appeals the following portions of the Examiner's
9 Recommendation: Sections II.19, II.29, and IV.B.11(a)(ii)

10
11 33. Special benefits were assigned rather than measured. Mr. Macaulay
12 arbitrarily "assigns" special benefits to Before values instead of measuring them for each
13 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/3/2020 (A.
14 Gibbons) Hrg Tr. at 88:25-89:3; 90:8-91:13. Based on formulas in spreadsheets that Mr.
15 Macaulay used to analyze the commercial properties, Fourth Avenue Associates' experts
16 concluded that Mr. Macaulay based adjustments on hypothesized very small increases to
17 property revenue and very small reductions to cap rates to "calculate" an "After" value due
18 to the coming 2024 LID Improvements. Attachment B (ABS Spreadsheet). These series of
19 micro adjustments were based on "professional judgment" that are neither shown nor
20 replicable.

21
22 34. For these reasons, Fourth Avenue Associates appeals the following portions
23 of the Examiner's Recommendation: Sections II.19 and IV.B.11(a)(iii).

24
25 35. Special benefit falls within margin of error. The Final Special Benefit Study
26 applies an estimated value enhancement of less than 4%, which is generally within the
27 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*

1 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
2
3 Fourth Avenue Associates’ experts explained that if two appraisers independently arrive at
4 values within 5% of one another, this difference is considered reasonable as it falls within
5 the standard margin of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at
6
7 164:2-9. Because Mr. Macaulay’s micro-special benefit percentages fall far below that 5%
8
9 margin, “there is no way of authenticating” such incremental changes because “[m]arket
10
11 forces completely obliterate any tiny little noise factor like that.” *See* 3/3/2020 (A. Gibbons)
12
13 Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition that 0.25% is too
14
15 small to measure. Macaulay Depo. at 25:17-25. Yet, Mr. Macaulay assigned or purported to
16
17 measure a difference in cap rates for Fourth Avenue Associates’ property within that
18
19 margin. Additionally, the fact that “Before” values are also based on a hypothetical that
20
21 adds some unstated incremental value to actual 2019 values exacerbates this issue—the
22
23 ability for an appraiser to discern the micro-value differences between hypothetical
24
25 conditions that are so similar (the WSDOT improvements compared to the LID
26
27 improvements) “verges on being ludicrous.” 3/3/2020 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
28
29

30 36. Even if it were possible to accurately tease out such a miniscule hypothetical
31
32 value change due to improvements coming five years later, experts testified that there is no
33
34 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
35
36 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
37
38 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
39
40 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Fourth
41
42 Avenue Associate appeals the following portions of the Examiner’s Recommendation: II.27
43
44 and IV.B.4.
45
46
47

1 37. No analysis of value increase attributable to individual components of the
2 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
3 percentage difference between hypothetical Before and After conditions. Throughout his
4 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
5 descriptions in the Addenda even though he testified that he relied on these to calculate
6 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
7 someone might be able to determine how he attributed value to After conditions described in
8 the Addenda, he answered that that was “not the scope of the assignment” because he was
9 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
10 that the six components were not actually a continuous project, that he was viewing them
11 together because the City asked him to, and that if he were to view them independently,
12 there was a low probability that properties in the north would specially benefit from
13 improvements in the south and vice versa. See 6/25/2020 Hrg. Tr. at 27:18-28:5.
14
15

16 38. Not only did he fail to analyze benefits from each of these non-contiguous
17 improvements, his familiarity with descriptions as whole was tenuous at best. See, e.g.,
18 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
19 arose from specific Before/After descriptions in the Addenda); cf. *Anderson v. City of*
20 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
21 objectives that guided regulators’ assessment of architectural plans for buildings along a
22 “signature street” were so vague that they amounted to ad hoc review based on the
23 regulators’ subjective impressions and feelings).⁸ It became clear through his testimony that
24
25

26 ⁸ As an aside, this admission suggests that there should have been an explicit City Council
27 finding that properties within the LID would benefit from the improvements as a whole. See RCW
28 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
29 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and

46
47

1 even though he used the renderings as “visual aid[s] in appraising the property in the before
2 and after” to “visually see what the differences would be,” he could not explain what
3 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
4 when shown a rendering of a two-lane road going down to one-lane in the After condition
5 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
6 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
7 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
8 could explain the depiction of the same trees in the After condition nearly twice as tall as in
9 the Before. *Id.* at 173:17-175:4. For these reasons, Fourth Avenue Associate appeals the
10 following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

21 39. Special assessment is not supported by comparable studies, data or reports.
22 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
23 that the LID Improvements will lead to meaningfully increased real estate values for Fourth
24 Avenue Associate. Indeed, no City witness was able to explain how ABS Valuation used
25 comparable sales or information from the “over twenty-five studies and reports” to arrive at
26 very precise special benefit increases for the commercial properties, including Fourth
27 Avenue Associates’ property. For example, although Mr. Macaulay stated that no single
28 report or study was directly on point due to the unique nature of the LID Improvements (*see*,
29 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
30 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
31 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;

45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
2 for similarities and differences between these improvements and the comparable parks he
3 looked at).
4

5
6 40. Mr. Macaulay purports to rely on Dr. Crompton's research to justify the
7 assignment of incremental increase of 0.5% to 4% to property values within the LID.
8
9 However, among other critiques, Dr. Crompton testified that Mr. Macaulay's reliance on his
10 research misinterprets his work in critical ways, including because the LID Improvements
11 manifest the characteristics of a parkway (not a park), and his research indicates that most of
12 a *park's* impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
13 in Seattle). *See* Hrg. Exhibit 94 (Crompton's report). Further, updated research shows park-
14 related value increases are in fact smaller; that estimated increases are "best guesses" rather
15 than predictions of property value increases in a particular city; and that percentages do not
16 account for diminishing returns after taking into account water views, which would be the
17 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
18 topography grants most properties in downtown a water view.
19
20

21 41. Rather than addressing Dr. Crompton's critiques, Mr. Macaulay simply states
22 that this was just one source of information that was not entirely relevant because, among
23 other things, Dr. Crompton's research dealt with parks and not streetscapes. However, Dr.
24 Crompton's critiques were based on Mr. Macaulay's own testimony that the core "park"
25 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
26 180:2 (explaining that for purposes of "drawing boundaries around a park" he was
27 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
28 Crompton concluded that 500 feet via road from "park" improvements is just one or two
29 Seattle blocks and that Mr. Macaulay "inappropriately extend[ed] the LID impact
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 significantly beyond that which the park study indicated (even if it was legitimate to use the
2 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
3 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
4 impact applicable to “community parks”—which the LID Improvements are not. *Id.* Fourth
5 Avenue Associates’ property is not within 500 road network feet from the “park”
6 improvements. *See* Hrg. Exhibit 104 (Ellen Kersten Decl.) at Exs. E, F.
7
8
9
10
11

12 42. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
13 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
14 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
15 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
16 materials, it was clearly an important—if not *the* most important—source of information for
17 estimating special benefits (especially with respect to the condos).⁹ No City witness
18 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
19 parcel-by-parcel analysis.
20
21
22
23
24
25
26
27

28 43. The destination parks discussed in the Final Special Benefit Study do not
29 provide reliable, comparable, and valid support for the calculation of special assessments
30 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
31 Study were funded by a LID. And in virtually all of those cases, the park improvements
32 dramatically restored unimproved or blighted areas, and properties evaluated were within
33 two or three blocks of the park.
34
35
36
37
38
39
40
41

42 ⁹ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 44. ABS’s claimed reliance on three economic studies to support property value
2 increase is also flawed. The HR&A study does not inform what value increases are
3
4 expected from the LID Improvements because it projects increases to tourism from *all* of the
5
6 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
7
8 dissimilar parks in other cities,¹⁰ making the methodological application to the LID
9
10 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study’s
11
12 conclusion that there would be *no new net visitors* from downtown residents as a result of
13
14 the LID Improvements and could not explain how this impacted his condo analysis.
15
16 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on “The Impact of Parks on
17
18 Property Values” primarily focused on whether the benefits accrue to the larger community
19
20 rather than properties adjacent to the park. And the 2014 New York City Department of
21
22 Transportation study is not based on real estate transactions and market sales and fails to
23
24 substantiate any link between increased retail sales and property values. Moreover, this
25
26 study only looked at impact either directly abutting the streetscape improvement, or a couple
27
28 hundred feet for plaza-like improvements.
29

30 45. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
31
32 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
33
34 Exhibit 124. One explanation of that this omission could be TPL’s estimate of the economic
35
36 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
37
38 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
39
40
41
42

43 ¹⁰ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist “capture rates” varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
2 asked whether he considered that HR&A's estimated LID impact is six times greater than
3 TLP's assessment of Seattle's entire park system, his surmised that it was because the
4 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
5 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
6 assumptions to account for this difference, which may be partly explained by the fact that
7 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
8 approximately 3.44% of King County tourists visit Seattle primarily because of the city
9 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
10 waterfront improvements.

20 46. Although proximity to the improvements is a key factor in all of these
21 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
22 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
23 not understand that for both the Trust for Public Lands study and Dr. Crompton's study,
24 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
25 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
26 Improvements is approximate 20 acres and it is not a community park.¹¹

34 47. There is no explanation in the Final Study or the supporting materials of how
35 the studies or comparable sales were used to derive values for Fourth Avenue Associates'
36 property. For these reasons, Fourth Avenue Associate appeals the following portions of the
37
38
39
40
41

42 ¹¹ *See*
43 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf ("Waterfront Seattle will create about 20 acres of improved parks and public spaces
44 connecting Seattle's central waterfront to downtown.").

1 Examiner's Recommendation: Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30,
2
3 II.32, and IV.C.5.

4 48. Failure to comply with USPAP. Fourth Avenue Associates' assessment also
5
6 rests on a fundamentally wrong basis due to the City's appraiser's decision to utilize a
7
8 hybrid mass-appraisal method. Randall Scott, a former mass appraiser responsible (and
9
10 professionally recognized) for developing the MAI standards for mass appraisals, testified
11
12 that the Final Study does not meet mass appraisal standards nor allow for independent
13
14 assessment of the accuracy of Mr. Macauley's conclusions.

15
16 49. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
17
18 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
19
20 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
21
22 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
23
24 testimony suggests that he incorrectly believed that the only difference between direct
25
26 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
27
28 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
29
30 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
31
32 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
33
34 Gordon uses in doing his limited restricted report").

35
36 50. But the difference is not only in reporting—mass appraisal techniques must
37
38 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
39
40 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
41
42 parcel approach:

43
44 The mass appraisal technique is an appraisal method used to evaluate
45
46 a group of properties that are subject to similar market forces as of a
47
certain date through the use of market data, statistical analysis and

1 testing. As a result, the mass appraisal technique does not require or
2 involve analysis of each individual property's specific data.
3

4 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
5

6 51. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
7 universe of properties as a given date using standard methodology, employing common data,
8 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
9 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
10 model" is "a mathematical expression of how supply and demand factors interact in a
11 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
12 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
13 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
14
15
16
17
18
19
20
21

22 52. Regardless of client direction, Mr. Macaulay is required to comply with
23 USPAP. So if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have been
24 economically feasible because it would have taken "an incredible amount of time and cost"
25 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
26 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 ("performing an
27 individual appraisal of each [condo] parcel would have been cost and time prohibitive").
28
29
30
31
32
33

34 53. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
35 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
36 value, fails to calibrate the model structure to determine the contribution of the individual
37 characteristics affecting value, and does not review the mass appraisal results against actual
38
39
40
41
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2 217:1;¹² Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

3
4
5 54. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6 proximity to the elements, the increase in market rent, market vacancy changes,
7 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
8 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
9 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
10 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
11 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
12 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
13 were hypothetical, it was not possible to identify matched pair sales and no City witness
14 explained how ABS Valuation made adjustments to “comparable” sales in order to check
15 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
16 him to explain his model structure.
17
18
19
20
21
22
23
24
25
26
27

28 55. For these reasons, Fourth Avenue Associate appeals the following portions of
29 the Examiner’s Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Fourth
30
31
32
33

34 ¹² Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
35 relationship between characteristics that affect value, and to calibrate that model to specify how
36 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
37 21). The purpose is to rationally determine what characteristics will create value, and by how much.
38 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
39 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
40 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
41 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
42 include explanation of the model specification, data requirements, calibration methods, and
43 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
44 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
45 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
46 Hrg. Tr. at 206:15-207:17.
47

1 Avenue Associate renews Objectors' Motion To Exclude The Expert Testimony of Robert J.
2 Macaulay, filed on April 8, 2020, and appeals the Examiner's denial of that motion.
3

4 56. Finally, Fourth Avenue Associates' property is not appurtenant—or even in
5 close proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the
6 burden of proving special benefit” shifted to the City because the protestors' parcels merely
7 stood “in close proximity to the property on which expert testimony was given”). Indeed,
8 Fourth Avenue Associates' property is not even within 500 road network feet from the core
9 “park” improvements. And, as described above, the special assessment is overstated
10 because the Final Study makes no attempt to determine general benefits, existing amenities
11 for Fourth Avenue Associates' specific property, or special detriments. In addition, it is
12 speculative due to the fact that, as of October 2019, improvements were not in in place—
13 and, in fact, much of the waterfront is a construction zone following removal of the viaduct
14 and now Pier 58 demolition. Under these circumstances, rather than relying on entirely
15 imaginary income and shaky hypotheticals, Mr. Macaulay at the very least should have
16 discounted the special benefit estimates or waited to perform the Study until the
17 improvements were at least close to complete.
18
19
20
21
22
23
24
25
26
27
28
29
30
31

32 **Erroneous Pre-Improvement Valuation**

33 57. The proposed final assessment erroneously overstates the pre-improvement
34 value of Fourth Avenue Associates' property as of October 1, 2019 and, as a result,
35 overstates the special benefit to the Fourth Avenue Associates' property.
36
37
38
39

40 58. The City's Final Study was used to compute the proposed final assessment of
41 FOURTH AVENUE ASSOCIATES' property. The City's Study purportedly uses data
42
43
44
45
46
47

1 from the King County Department of Assessments,¹³ but the pre-improvement valuation
2 information in the Final Study does not accurately reflect this data. For example, the City's
3 Study values FOURTH AVENUE ASSOCIATES' property at \$35,538,000 as of October 1,
4 2019. However, the King County assessor determined the true and fair value of the property
5 to be \$19,969,7000, valued in 2019 for tax year 2020. In other words, the Final Special
6 Benefit Study's valuation is 178% of King County's assessed value. The Final Special
7 Benefit Study does not explain this difference—or any differences—between its pre-
8 improvement valuation and its supposed source for market data. For this reason, Fourth
9 Avenue Associate appeals Section IV.C.11 of the Examiner's Recommendation.

10
11
12
13
14
15
16
17
18
19 59. Fourth Avenue Associate expects an opportunity to respond to the revised
20 assessment once that is provided (*see* Examiner's Recommendation at V) and appeals the
21 remainder of Section IV.C.10 of the Examiner's Recommendation rejecting Fourth Avenue
22 Associates' other bases for reducing the assessment. In addition to failing to consider the
23 Century Square Retail building development restrictions, the City's analysis was based on
24 unreliable market data. Mr. Macaulay conceded he did not have all of the relevant
25 information for the Century Square Retail building and that he would be submitting re-
26 evaluations for the property. 6/23/2020 Hrg. Tr. at 7:7-18

27
28
29
30
31
32
33
34
35 60. Thus, aside from multiple other reasons why computation of the special
36 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
37 improvement values that do not accurately reflect market data. For these reason, Fourth
38
39
40
41
42
43
44

45 ¹³ See, e.g., Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

1 Avenue Associate appeals the following portions of the Examiner’s Recommendation:

2
3 Section III.

4
5 **Erroneous Computation of Special Benefit**

6 61. “Special benefit” is “the increase in fair market value attributable to the local
7 improvements.” *Doolittle*, 114 Wn.2d at 103. “A benefit that a particular piece of property
8 may receive by reason of the improvement is not measured alone by the physical character
9 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
10 *of Seattle*, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
11 the particular tract or property benefited by the entire improvement, and is it assessed
12 proportionately with the other property included within the assessment district?” *Id.* 165–
13 66.
14

15 62. The proposed final assessment erroneously overstates the special benefit of
16 LID improvements in a number of ways.
17

18 63. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
19 the Century Square Retail, Mr. Macaulay assumed revenue would increase by 1.67% (low)
20 and 2.22% (high) due to the 2024 LID Improvements. He then uses this hypothesized
21 increased revenue to calculate a new net operating income for the commercial properties and
22 capitalizes that to come up with an “After” valuation.
23

24 64. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
25 operating income remains the same as in the hypothetical “Before” condition, but changes
26 the cap rate. For the Century Square Retail building, the cap rate goes from 4.75% to 4.63%
27 and 4.65%.
28
29
30
31

45
46
47

1 65. Mr. Macaulay then averages his four “After” values to arrive at a final special
2 benefit conclusion. For Century Square Retail this is an increase in property value of 2.00%
3 due to the LID Improvements.
4

5 66. Mr. Macaulay offered little justification for his micro adjustments to revenue
6 and capitalization rates. When asked precisely what the basis is for his special benefit
7 percentage increases to revenue for each commercial property, he could not point to
8 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
9 is nothing in the report to allow a reader to understand how he came up with these
10 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
11 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
12 the basis for his belief that certain factors—liked increased connectivity—will increase
13 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
14 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
15 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
16 sources equally even though there was no separate analysis done for food and beverage or
17 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Fourth Avenue Associates’
18 expert’s conclusion that the adjustments are arbitrary and fall below generally accepted
19 margins of error, and that there is no actual, measurable, non-speculative special benefit to
20 Fourth Avenue Associates’ properties.
21

22 67. Mr. Macaulay testified that he used comparable sales as a reasonableness
23 check for commercial properties. But as explained above, no City witness has explained
24 how anyone, or all, of the sales are comparable to any particular commercial property within
25 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
26 in order to make sales “comparable,” he would have had to make adjustments to account for
27
28
29
30

43
44
45
46
47

1 Before and After conditions, but there is no way to understand how adjustments were made
2 because he “didn’t do a separate sales comparison approach where we showed adjustments
3 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
4 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
5
6
7
8
9 *Id.* at 127:10-128:24.

10
11 68. It also bears noting that any “internal review” of the special benefit estimates
12 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
13 error. Indeed, given all the same information, he seemed to suggest that it would be
14 perfectly reasonable for another experienced appraiser to come up with special benefit
15 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
16 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
17 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
18 margin of error conflicts with the testimony of Fourth Avenue Associates’ experts and
19 reaffirms that there are absolutely no standards governing his process. *See id.* at 91:6-94:5.
20 Even if the typical margin of error (5%) is a “rule of thumb” and not a “hard legal standard,”
21 there are still reasonable and unreasonable variations within the appraisal field. *See*
22 Examiner’s Recommendation at IV.B.4. Thus, the special assessment is not actual,
23 measurable or special because it is arbitrarily assigned; and it is too small to realistically be
24 supported by appraisal techniques.
25
26
27
28
29
30
31
32
33
34
35
36
37

38
39 69. No evidence of special benefit. Meanwhile, there is “no actual evidence from
40 any seller or purchaser that the price was higher because of the LID improvements.”
41
42 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City’s appraiser “has not
43 identified any seller or buyer, or any particular property where the existence of the LID
44 improvements had an effect on the market price.” *Id.* at 410-11. Meanwhile, Fourth Avenue
45
46
47

1 Associate has explained that the property has not increased rental rates or revenue due to the
2 forthcoming LID Improvements, because, among other reasons (and apart from COVID),
3 the improvements ABS believes will generate value do not exist, and will not for a number
4 of years to come. There are no comparable sales because the LID Improvements are not in
5 place, nor will they be until the end of 2024 if completed on schedule.
6
7
8
9

10 70. The fair market value of FOURTH AVENUE ASSOCIATES' property has
11 not changed due to increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143
12 (property was not specially benefited from installation of new water main and fire hydrant
13 where it was already adequately supplied with water and afforded adequate fire protection).
14 And in any event, any value attributable to removal of the viaduct was to be excluded from
15 the assessment calculation.
16
17
18
19
20
21

22 71. There is no special benefit because LID improvements may in fact diminish
23 the value of Fourth Avenue Associates' property by drawing visitors away towards
24 improvements that do not abut the property, increasing retail competition. *See Kuskys*, 85
25 Wn. App. 493 (testimony of owners' expert that LID actually diminished value of property
26 was sufficient to rebut presumption that assessment was proper).
27
28
29
30
31
32

33 72. Moreover, the assessment formula is an attempt to distribute costs that do not
34 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
35 "merely a mathematical model that distributes costs").
36
37
38

39 73. The Special Benefit Study fails to address whether the \$346,000,000
40 estimated LID project cost takes into account the investment that would have occurred in the
41 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
42 invested. This is a critical component of estimating which properties receive a direct benefit
43 from the improvements, versus more incidental benefits further from the park.
44
45
46
47

1 74. Mr. Macaulay also included personal property in his valuation of hotels even
2 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
3 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
4 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
5 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
6 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
7 receiving a disproportionately high LID assessment in comparison to other property types,
8 since hotels were the only property type subject to personal property LID assessments.
9 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
10 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
11 notice procedures because hotel property owners only received notice that their real estate
12 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).

13 75. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
14 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
15 a television at the waterfront Marriott is assigned a greater special benefit than the same
16 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
17 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
18 unreasonable to assign a value lift to personal property that is replaceable at the same cost
19 and may be obsolete before the LID improvements are even completed. Further, personal
20 property is highly depreciable, and likely to be fully depreciated or potentially discarded by
21 2024. *Id.*; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must
22 be redone to correct for this error.

23 76. The proposed final assessment substantially exceeds the special benefit to the
24 property and is grossly disproportionate to similarly situated properties within the LID. For

1 these reasons, Fourth Avenue Associate appeals the following portions of the Examiner's
2 Recommendation: Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).
3

4 **State Environmental Policy Act and Other Environmental Permitting**

5
6 77. While this appeal is not challenging the City's environmental review and
7 permitting processes, those processes are relevant in determining the legality of the
8 assessments, and to assessing the delivery risk, the present value of the City's plans, and
9 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
10 pursue projects that have not yet undergone environmental review (thus limiting the choice
11 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
12 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
13 is just beginning. Further, the City has segmented environmental review, and still has a
14 gauntlet of federal, state and tribal review processes to complete before it will be clear what
15 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
16 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
17 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
18 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
19 committing to reconstruction of Pier 58 and major street improvements without
20 environmental review, or the City's Final Special Study has improperly included and is
21 proposing to assess the Fourth Avenue Associate the costs and special benefits of
22 improvements that may not get built. Either way, it is faulty process.
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40

41 **Due Process Rights**

42 78. The City's failed to notify FOURTH AVENUE ASSOCIATES sufficiently in
43 advance of the hearing to allow FOURTH AVENUE ASSOCIATES to obtain evidence and
44 prepare to properly challenge the assessments. Because LID assessments involve a
45
46
47

1 deprivation of property, affected owners have the right to a hearing as to whether the
2 improvement resulted (or will result) in special benefits to their properties and whether their
3 assessments are proportionate, which necessarily includes the right to adequate notice of the
4 hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d 555, 569–70, 229 P.3d 761
5 (2010).
6
7
8
9

10 79. The LID statute specifies that cities must mail notices giving the time and
11 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
12 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
13 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
14 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
15 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
16 secure their own appraisal), evaluate proportionality of the proposed assessments, and
17 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
18 for anybody to get an appraisal”).
19
20
21
22
23
24
25
26
27

28 80. The City’s Notice of Assessment was sent on December 30, 2019. And the
29 Final Special Benefit Study has only been available for public review since January 7, 2020.
30 Due to this short time frame, FOURTH AVENUE ASSOCIATES requested a prehearing
31 conference and scheduling order that would preserve and protect Fourth Avenue Associates’
32 right to analyze and respond to the Final Study, obtain expert appraisal testimony, conduct
33 depositions, and to accommodate preliminary motions (*e.g.*, with respect to the interplay
34 between SEPA and the City’s assessment of taxes for Pier 58 and Pike/Pine improvements).
35 The Hearing Examiner erroneously denied that request. For this reason, Fourth Avenue
36 Associate appeals the following portions of the Examiner’s Recommendation: I.B.
37
38
39
40
41
42
43
44
45
46
47

1 **VII. Relief Requested**

2 FOURTH AVENUE ASSOCIATES respectfully requests that the City Council:

- 3
- 4 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
- 5 assessment dated December 30, 2019; or
- 6
- 7 2. Revise Fourth Avenue Associates' Waterfront Local Improvement District No. 6751
- 8 proposed final assessment to \$0 (zero), or such amount as Fourth Avenue Associates
- 9 establishes at the hearing in this matter; or
- 10
- 11 3. Grant the Examiner's recommended remand but with instructions recalculate and
- 12 reduce Fourth Avenue Associates' assessment using recognized appraisal techniques
- 13 consistent with USPAP and:
- 14
- 15 i. Excluding any property value increase attributable to viaduct removal
- 16 and other planned WSDOT Improvements;
- 17
- 18 ii. Taking into account the effects of the COVID-19 pandemic on the
- 19 value of Fourth Avenue Associates' property and other relevant
- 20 developments since October 2019;
- 21
- 22 iii. Accounting for and excluding (1) any special benefits from existing
- 23 or planned improvements that already provide similar benefits to
- 24 Fourth Avenue Associates' property, and (2) any special detriments
- 25 from construction and other anticipated LID-related disamenities;
- 26
- 27 iv. Accounting for and including only those actual benefits anticipated to
- 28 accrue to Fourth Avenue Associates' property based on its location
- 29 relative to Pier 58, Overlook Walk, and the Promenade, and specific
- 30 elements of the LID Improvements;
- 31
- 32
- 33
- 34
- 35
- 36
- 37
- 38
- 39
- 40
- 41
- 42
- 43
- 44
- 45
- 46
- 47

- 1 v. Discounting anticipated special benefits to present value, based on
2 reliable estimates regarding when special benefits will start accruing
3 following completion of the LID Improvements; and
4
5
6
7 vi. Accounting for such other issues specific to Fourth Avenue
8 Associates' property relevant to calculation of such assessment; and
9
10
11 4. Grant such further relief as the City Council deems just and proper.
12
13

27
28
29

30 **III. Statement of Taxpayer's Interest**
31

32 Harbor Steps owns the property that is subject to the proposed final assessment
33 described in Section IV. The property at issue is a multifamily residential apartment building
34 with ground floor retail. Additionally, there is a pedestrian corridor connecting the
35 downtown retail core to the waterfront amenities.
36
37
38

39 The basis of the proposed assessment is a Final Special Benefit/Proportionate
40 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
41 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
42 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
43
44
45
46
47

1 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
2 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4 to exclude charges for other improvement projects in the Central Waterfront, and
5 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
6 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
7 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
8 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
9 because construction was not complete on the LID Improvements or the WSDOT
10 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
11 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
12 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which was
13 based on the Final Study.
14

15 **IV. Matter Under Appeal**

16 Harbor Steps appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
17 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
18 final assessment dated December 30, 2019 against the following property:
19

20 King County Parcel No. 1976200070
21 Site Address: 1306 Western Ave., Seattle, Washington
22 Proposed Final LID Assessment for Parcel: \$839,674.55
23

24 *See* Examiner’s Recommendation at 61-62, 105. To avoid repetition, Taxpayer incorporates
25 the evidence and arguments raised before the Hearing Examiner into this appeal. In
26 particular, Taxpayer points the City Council to Taxpayer’s initial Appeal Petition, *Frye*
27 motion, Closing Brief submitted at the close of its case-in-chief (dated 4/16/2020), and
28

1 supplemental Closing Statement submitted at the close of the City's case-in-chief (dated
2 7/7/2020).¹
3

4 As discussed more fully below, Taxpayer specifically appeals the following Findings
5 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
6
7 Pages 61-62, 105, Sections II.6, II.7, II.12, II.13, II.14, II.15, II.18, II.19, II.20, II.21, II.22,
8 II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2,
9 IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i),
10 IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.7,
11 IV.C.8, IV.C.9, IV.C.11, IV.C.12, IV.C.14, IV.C.18
12
13
14
15
16
17

18 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
19 recommendations on material issues raised during Taxpayer's appeal that were supported by
20 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
21 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23 recommended anything other than denial of objectors' appeals were where the City's
24 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
25 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
26 special assessments based on "fundamentally wrong methods."
27
28
29
30
31
32
33
34
35
36
37
38
39

40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$2,143,000.00 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City's appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and
5 the City's preliminary roll. On the contrary, the City's assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS's appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City's appraiser asserts that the City is not collecting assessments "based
16 on the value of WSDOT's planned improvements." See Final Study at 3. However, the
17 City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition,
18 the City's appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City's promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT's planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City's appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be "physical and material and not merely speculative
35 or conjectural"
36

37
38 **ABS Study:** Not only are the improvements not yet "physical or material," but
39 environmental review and permitting for the City's proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City's then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual" and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
2 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
3 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
4 Final Study fails to meet basic standards for admissibility and must be remanded.
5
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6 **V. Standard of Review**

7 “When considering the assessment roll, the city council sits ‘as a board of
8 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
9 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
10 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
11 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
12
13
14
15
16
17

18 The proposed assessments are presumed correct, “unless overcome by clear, cogent
19 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
20 than the heightened presumption of correctness on judicial appeal because “applying these
21 elevated standards at the municipal hearing would afford unwarranted deference to a report
22 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
23 presumption is not evidence and its efficacy is lost when the other party adduces credible
24 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
25 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
26 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
27 presented credible evidence showing that the City’s proposed assessment is arbitrary,
28 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
29 to the City to prove the assessments are actual, measurable, special, non-speculative and
30 proportionate. The City failed that burden.
31
32

39
40
41
42
43
44
45
46
47

1 **VI. Grounds for Appeal**

2 Harbor Steps appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
12 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020); Decl. of Brian O'Connor ISO Closing
13 Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained: "[W]e have explicitly
14 rejected an argument that, because certain protestors 'failed to offer expert testimony at the
15 city council hearing[,] the presumptions [in favor of the assessment] were still operative as
16 to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian Trail Trunk Sewer*, 35
17 Wn. App. at 843); *see also Kuskys v. City of Goldendale*, 85 Wn. App. 493, 933 P.2d 430
18 (1997) (although appraiser did not submit an appraisal, he provided expert opinion showing
19 that improvements actually diminished value of the property). In fact, no independent
20 evidence is required at all if, for example, objectors show that the assessment was grounded
21 on a fundamentally wrong basis due to an error in the City's appraiser's methods—as is the
22 case here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88,
23 106, 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out
24 that the square footage assumed in the City's appraisal was incorrect.
25

26
27 2. On March 5, 2020, Harbor Steps presented testimony from experts Ben Scott
28 and Brian O'Connor. The Hearing Examiner failed to meaningfully respond either the expert
29

31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 testimony or the expert appraisal reviews. Instead, the Hearing Examiner simply dismissed
2 Harbor Steps' expert evidence as insufficient appraisal evidence. *See* Examiner's
3 Recommendation at IV.C.7–9. This is contrary to law.
4

5
6 3. For these reasons, Taxpayer appeals the following portions of the Examiner's
7 Recommendation: Sections II.13, II.14, II.15, IV.A, IV.B.11(a), IV.C.7, IV.C.8, IV.C.9, and
8 IV.C.11.
9

10
11
12 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

13
14 4. RCW 35.43.040 provides cities and towns authority for ordering local
15 improvements and for levying and collecting special assessments “on property specially
16 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed upon
17 all the property in accordance with the special benefits conferred thereon.” RCW 35.44.010.
18

19
20 5. No analysis of general benefits. Special assessments have been “held valid
21 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
22 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
23 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
24 they are for the construction of local improvements that are appurtenant to specific land and
25 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
26

27
28 6. Harbor Steps' property is not specially benefited by the LID Improvements.
29 The primary purpose and effect of the LID Improvements are to benefit “members of the
30 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
31 library is for the benefit of the members of the whole community individually and
32 collectively who may be served by it”). Mr. Macaulay's own chapter of the LID Manual
33 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
2 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
3 that if an appraiser “identifies both general and special benefits, these benefits should be
4 clearly distinguished and explained, and only special benefits should be included in the
5 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
6 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/5/2020 (B. O’Connor) Hrg. Tr. at 158:13-
7 159:8, 192:8-193:2. It is undisputed that Mr. Macaulay did not analyze or measure general
8 benefits, including those arising from construction necessary to meet basic design standards.
9 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
10 construction costs related to meeting design standards which may be general benefits as
11 distinct from construction costs emanating from requirements of the LID project”). To the
12 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
13 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
14 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
15 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.

16
17
18

20
21
22
23
24
25
26
27
28
29
30
31 7. LID Improvements not necessary. Unlike typical LID projects, the
32 Waterfront LID improvements are largely unnecessary to the functionality of any particular
33 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
34 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
35 held invalid where owners would have benefitted equally from increase of only 9 feet);
36
37
38
39
40
41

42
43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
2 intersection for new water main for hydrant held invalid because land was already afforded
3 functional hydrant at nearby street). Here, Taxpayer testified that the LID Improvements are
4 not necessary to the business of their income-producing properties, all of which already have
5 sufficient access to the waterfront, downtown restaurants, and other amenities necessary for
6 their tenants and clients. And for residential properties, like Harbor Steps, the assumption
7 that an increase in tourism will cause lifts in property value is both anecdotally and
8 empirically unsupported. Additionally, the construction of new access points is in fact a
9 negative point for the Harbor Steps, which are located at an existing connection between the
10 downtown core and the waterfront. The LID improvements will draw foot traffic away from
11 the Harbor Steps, increasing competition in other areas of the city. The fact that there is no
12 case law differentiating between binary improvements and parks does not change the law
13 prohibiting assessments on properties already adequately served by existing amenities. *See*
14 Examiner's Recommendation at IV.C.3 (reasoning that "no case law is provided to support
15 the differentiation between a hardscape benefit and the more ephemeral benefits of park").
16 Nor does the Examiner's reasoning excuse the City's failure to account for existing
17 amenities as part of the special benefit calculation. As Dr. Crompton testified, existing view
18 amenities may in fact diminish the incremental effect of new park improvements on the
19 value of properties, much like turning on a weak light in an already brightly illuminated
20 room. *See* Hrg. Exhibit 94 (Crompton's Report) at 12-13.

21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41 8. To the extent benefits can be considered "special" as opposed to general, they
42 are nominal or nonexistent for many properties even in the Central Waterfront, which
43 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
44 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
45
46
47

1 change due to expansion of sewer service *near* owners' parcel which were already
2
3 connected). Here, the primary reasons a user chooses a particular apartment is not proximity
4
5 to the waterfront. Instead, the reason residents choose to live in the Harbor Steps apartments
6
7 is proximity to their places of employment and other amenities downtown. *See* 3/5/2020 (E.
8
9 Leigh0 Hrg. Tr at 113:13-114:20; 124:3-126:9. For example, without any supporting written
10
11 analysis, Mr. Macaulay offhandedly concludes that the Harbor Steps apartments would
12
13 benefit from increased connectivity from being four to five blocks from the Overlook Walk
14
15 even though the properties currently have direct access to the waterfront via the Harbor
16
17 Steps. 6/23/2020 Hrg. Tr. At 48:1-50:25; *see also* B. Scott Decl., ¶ 7. Mr. Leigh testified that
18
19 he did not anticipate a benefit, and that the Harbor Steps retail component would suffer if a
20
21 measurable portion of waterfront-bound pedestrian traffic moved north to the market. *See*
22
23 *also* B. Scott Decl., ¶ 6 (describing failure to analyze how existing retail is harmed by foot
24
25 traffic being pulled away towards new amenities). Even if the City could assess for a view
26
27 change (and it has promised not to assess for viaduct removal), the fair market value of
28
29 Harbor Steps' property has not changed because the LID Improvements have not improved
30
31 the property's waterfront view or access to the waterfront, nor will they when the City
32
33 anticipates completion in 2024. For these reasons, Taxpayer appeals the following portions
34
35 of the Examiner's Recommendation: Sections IV.C.3, IV.B.9, and IV.C.3.

36
37 9. No analysis of special detriments. The Final Study fails to properly account
38
39 for special detriments. *See Kuskys*, 85 Wn. App. at 501 (city failed to consider the costs to
40
41 owners for removal and cleanup of underground storage tanks discovered during the
42
43 improvement project). The Property owner representative for Harbor Steps, Ed Leigh,
44
45 testified that property values may in fact be negatively impacted by the LID Improvements
46
47 due to loss of parking, increased traffic and noise, and increased potential for crime,

1 homelessness and sanitation issues. Mr. Leigh testified that the assessment is an immediate
2 expense for Harbor Steps that comes with no immediate increase in revenue, thereby
3 decreasing property values. *See* 3/5/2020 (E. Leigh) Hrg. Tr. at 126:10-129:9; 227:8-229:10.
4
5 And Harbor Steps does not expect near term the increases assumed in ABS Valuations'
6
7 spreadsheets or the Final Study. Although Mr. Macaulay claims he analyzed impacts on the
8
9 City's planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no
10
11 explanation of how lost parking might be a detriment, and no property-specific parking
12
13 analysis in any of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.
14
15

16 10. Likewise, there was no analysis of the risks associated with disamenities such
17
18 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
19
20 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
21
22 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
23
24 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
25
26 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
27
28 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
29
30 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
31
32 the maintenance agreement. *Id.* at 13:4-14:2.
33
34

35 11. There was also no consideration of negative impacts from another four-plus
36
37 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
38
39 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
40
41 law allowing him to dismiss these actual, non-speculative impacts. Because future special
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

benefits calculations are inherently speculative, Washington's eminent domain statute specifically allows condemnees to postpone special benefits assessments until improvements are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).

Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy Greenway, the Greenway district "significantly" lagged in value). For these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation: Sections II.25, IV.B.8, and IV.B.9.

12. Special benefit estimate is speculative. When calculating a special benefit, "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it becomes pure speculation." *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324 P.2d 1078 (1958)).

13. Assuming without conceding that one day, the City's planned LID Improvements might increase the value of neighboring properties to some extent, that potential benefit is many years away and speculative. While appraisers tolerate some degree of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is far too speculative to satisfy industry practices and standards.

14. Although LIDs are sometimes finalized prior to completion of improvements, this is typically just six month or a year prior, and the assessments are otherwise supported by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here will not be realized for four or five years. In the meantime, there is permitting risk,

1 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
2 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
3 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
4 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
5 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
6 testified: "I just don't know what the market value would be as of the date the project would
7 be finally constructed" because "[t]here could be a lot of elements in the market that did
8 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
9 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
10 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
11
12
13
14
15
16
17
18
19
20

21 15. The record is clear that while no one can know what "special benefit" might
22 accrue to these properties in four years (if any), we do know that there are no actual benefits
23 now. The LID improvements provide no immediate special benefit to property owners
24 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
25 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
26 sewer system for future users). For example, notwithstanding the questionable hypothesis
27 that apartments will benefit from an expected increase in tenant interest when the
28 improvements are complete, it is undisputed that tenants are not coming in larger numbers
29 and paying higher rental rates now because of something happening five years down the
30 road. *See O'Connor Decl. ISO Closing Stmt.*, ¶ 7 (dated 7/7/2020) (no apartment leased
31 today for 18 months would rent at a higher rate due to improvements coming in 2024).
32
33
34
35
36
37
38
39
40
41

42 16. Further, there are no "plans and specifications" on file with the Clerk's Office
43 for the LID Improvements, and it is unlawful to move to final assessments without such
44 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*
45
46
47

1 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
2
3 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
4
5 dollars on projects still early in the design process. *See* Washington Attorney General
6
7 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
8
9 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
10
11 of programs and included “only so much of the overall costs” that took place within and
12
13 benefitted the assessed properties).

14
15 17. The COVID-19 crisis highlights how fundamentally speculative and unfair it
16
17 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
18
19 anticipated to be delivered five years later. Even before COVID, it was speculative to
20
21 assume that market highs experienced in October 2019¹ would be sustained through 2024,
22
23 after an already extraordinarily long expansion period. *See, e.g.*, 3/5/2020 (E. Leigh) Hrg.
24
25 Tr. at 119:15-123:6; 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr.
26
27 Macaulay conceded: “[W]hen I was doing my analysis in October 2019, who would have
28
29 thought that this COVID issue would happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his
30
31 deposition in late February, his “thought process was that the market was going to continue
32
33 to go up,” but now, they are already irrelevant. *Id.*; *see* Gibbons Decl. ISO Closing Stmt. at ¶
34
35 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019
36
37 (*see* Examiner’s Recommendation at 109), the pandemic has impacted *current* values and
38
39 rendered the hypothetical October 2019 Final Study valuations outdated.

40
41 18. As another example of how future events could affect the accuracy and
42
43 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
44
45 Examiner re-open the record to allow the City to explain whether the assessments against
46
47 property owners within the LID are, in fact, being used by the City to fund the emergency

1 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
2 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
3 would be improperly imposing costs on property owners within the LID for improvements
4 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
5 habitat and City infrastructure—this does not provide any special benefit to LID property
6 owners.
7
8
9
10
11

12 19. There is also no certainty the improvements will be delivered on time. Mr.
13 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
14 delay in construction schedule would not constitute a “material change” under the City
15 Council’s ordinance authorizing the improvements. In other words, the City cannot
16 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
17 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
18 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
19 potential delays and project changes inherent in those processes, that call into question the
20 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110

1 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
2 Decl., dated 4/15/2020).
3

4
5 20. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
6 he could not point to a single one where the assessment roll was finalized five years in
7 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
8 he has never recommended final special assessments based on designs less than 30 percent
9 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
10 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
11 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
12 at 66:17-25. He performed no independent due diligence to determine the reliability of the
13 City’s estimates for completion of the LID Improvements, or to ensure that proposed
14 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
15 agreed that if any of his assumptions are incorrect, his opinion of market value would need
16 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
17 68:11-18.

23
24
25
26
27
28
29

30 21. The City has cited no authority—and Taxpayer is aware of none—that
31 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
32 assess taxes for “actual” special benefits that will not accrue for another five years (if all
33 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
34 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
35 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
36 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
37 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
38 IV.C.14, and IV.C.18.
39
40
41
42
43
44
45
46
47

1 22. Failure to discount special benefit estimates to account for risks and present
2 value. Due to the inherent uncertainty, Taxpayer's expert opine that the Final Study should
3 have accounted for risks associated with delivery of the improvements (including permitting
4 risk, construction risk, general economic risk) and any special damages associated with
5 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
6 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
7 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
8 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) ("Appraisers routinely consider
9 the impact of future conditions [through] discounted cash flow analysis.").

10 23. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, "[y]ou would be discounting it back to a present value." *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.

22 24. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
23 present value, an appraiser would consider discount rates for land development to account
24 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at

1 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer to
2 the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
3
4 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
5

6 25. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
7 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
8 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
9 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
10 ignoring momentarily all of the other methodological and other flaws discussed here and in
11 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
12 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
13 exceeds special benefits when reduced to present value. Further, to the extent the City is
14 arguing that because they are permitted to assess 100% of the special benefit, the special
15 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
16 is again wrong. After applying proper discounting, the City's proposed special benefit
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18 100% of the total estimated special benefit.
19
20
21
22
23
24
25
26
27
28
29
30
31

32 26. But even the assumption that the LID improvements would deliver benefits
33 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
34 on. Rather, those studies demonstrate that a discount period of five years is conservative.
35 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
36 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
37 indicates that during the construction period, the Greenway district "significantly" lagged in
38 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
39 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
40
41
42
43
44
45
46
47

1 30-31 (discussing New York City High Line and San Francisco Embarcadero
2 improvements). Given the lengthy delay, any prediction of future special benefits is
3 speculative, especially during the construction phase where values are likely to decline. And
4 assuming the LID Improvements take a similarly long period of time after they are complete
5 to start producing tangible property value benefits, each additional year of delay results in
6 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
7 Closing Stmt., ¶ 19, Ex. A.
8

9
10 27. Applying the same discounting methods described above and in Mr. Gibbons
11 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
12 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
13 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
14 100% assessment should be no more than \$201,870.60. Anything more would permit the
15 City to assess Taxpayer based on a hypothetical assumption that these improvements are in
16 place and providing benefit, and ignore the risks, construction disamenity, and time value of
17 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
18 would counsel that the assessment should be only 39.2% of that assessment cap, or
19 \$79,133.28.
20

21 28. Attachment C includes two Excel spreadsheets applying these discounting
22 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
23 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
24 demonstrates that discounting the City's hypothetical October 2019 special benefits to
25 present value would reduce Taxpayer's assessment to \$288,082, exclusive of any other
26 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
27 reductions after taking into account (1) Taxpayer's exerts' estimated "Before" valued based
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
2
3 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
4
5 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
6
7 the time it takes for the improvements to capture property value.). After such reductions,
8
9 Taxpayer's assessment would be just \$180,918 (for the 5-year discount) or \$49,710 (for the
10
11 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
12
13 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
14
15 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
16
17 Taxpayer's discounting argument without legal or factual analysis; that failure is error.

18 **Appraisal and Assessment Calculation Methods Are Flawed**

19
20
21 29. The "general rule is that each lot, piece, or parcel of land should be assessed
22
23 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
24
25 Wn.2d at 97.

26
27 30. It is proper to sustain a challenge to an assessment, even without the appraisal
28
29 testimony from the owner, where the objector's expert establishes that the assessment was
30
31 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
32
33 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.

34
35 31. The City's appraiser purports to utilize the income method of valuation but
36
37 relied on inaccurate revenue and market data, as discussed further below.

38
39 32. The City's appraiser purports to utilize the comparable sales method of
40
41 valuation, but no City witness attempted "to characterize any one, or all of them, as
42
43 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
44
45 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
46
47 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to

1 characterize any one, or all of them, as comparable to any particular property within the LID”).
2
3 And no City witness could explain how specific adjustments were made to these sales to
4
5 account for value increases due to the hypothesized Before and After Improvements. For this
6
7 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
8

9 33. Special assessment improperly includes value lift from the Before
10 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
11
12 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
13
14 Improvements, which WSDOT had independently committed to fund. However, Mr.
15
16 Macauley did not calculate the actual market value of LID properties in October 2019 and
17
18 did not separately analyze the hypothetical increase to property values attributable to
19
20 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
21
22 current value and then separately calculate a hypothetical “With WSDOT” Before value);
23
24 *see also* Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020
25
26 Letter (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal
27
28 Petition) at 3-4. Without any documented basis or support, Mr. Macauley simply “ma[de] a
29
30 judgment a call” on what occupancy and rates would have been for the commercial
31
32 properties assuming all of the WSDOT Improvements are completed as of 2019. Macauley
33
34 Depo. at 129:19-130:11. For example, Mr. Macauley surmised that Brian O’Connor’s
35
36 conclusion that the “Before” value for Harbor Steps was overstated by \$88M was perhaps
37
38 due to the fact that Mr. O’Connor was looking at current income numbers and not
39
40 accounting for the value of the “Before” conditions. However, when asked whether the
41
42 value of the of the “Before” conditions is lower or higher than \$88M, Mr. Macauley had no
43
44 clue because he did not do this analysis. 6/23/2020 Hrg. Tr. at 46:9-17:25. This outright
45
46 omission precludes any independent evaluation of the true market “Before” values. *See*
47

1 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards; if an
2 appraiser uses current sales data to infer values, then the appraiser must explain how he
3 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
4 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
5 other road, pedestrian and landscaping improvements WSDOT had already committed to
6 make.
7

8
9
10
11
12 34. However, because Mr. Macaulay testified that he did include some WSDOT-
13 related value-lift in the “Before” values, it follows that part of the special assessment
14 improperly is based on value attributable to the WSDOT Improvements. As shown by
15 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
16 percentage to Before values. So, for example, if Mr. Macaulay believed the WSDOT
17 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
18 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
19 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
20 to properly exclude the value of Before Improvements from the assessments. For these
21 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
22 Sections II.19, II.29, and IV.B.11(a)(ii)
23

24
25 35. Special benefits were assigned rather than measured. Mr. Macaulay
26 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
27 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/5/2020 (B.
28 O’Connor) Hrg. Tr. at 147:10-149:21; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-
29 91:13. Based on formulas in spreadsheets that Mr. Macaulay used to analyze the
30 commercial properties, Taxpayer’s experts concluded that Mr. Macaulay based adjustments
31 on hypothesized very small increases to property revenue and very small reductions to cap
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 rates to “calculate” an “After” value due to the coming 2024 LID Improvements.

2 Attachment B (ABS Spreadsheet). These series of micro adjustments were based on
3
4 “professional judgment” that are neither shown nor replicable.
5

6 36. For these reasons, Taxpayer appeals the following portions of the Examiner’s
7
8 Recommendation: Sections II.19 and IV.B.11(a)(iii)
9

10 37. Special benefit falls within margin of error. The Final Special Benefit Study
11
12 applies an estimated value enhancement of less than 4%, which is generally within the
13
14 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
15
16 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
17
18 Taxpayer’s experts explained that if two appraisers independently arrive at values within 5%
19
20 of one another, this difference is considered reasonable as it falls within the standard margin
21
22 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/5/2020 (B.
23
24 O’Connor) Hrg. Tr. 201:7-204:8. Because Mr. Macaulay’s micro-special benefit percentages
25
26 fall far below that 5% margin, “there is no way of authenticating” such incremental changes
27
28 because “[m]arket forces completely obliterate any tiny little noise factor like that.” *See*
29
30 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition
31
32 that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Additionally, the fact that
33
34 “Before” values are also based on a hypothetical that adds some unstated incremental value
35
36 to actual 2019 values exacerbates this issue—the ability for an appraiser to discern the
37
38 micro-value differences between hypothetical conditions that are so similar (the WSDOT
39
40 improvements compared to the LID improvements) “verges on being ludicrous.” 3/3/2020
41
42 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
43

44 38. Even if it were possible to accurately tease out such a miniscule hypothetical
45
46 value change due to improvements coming five years later, experts testified that there is no
47

1 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
2
3 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A Gibbons) Hrg. Tr. at
4
5 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
6
7 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
8
9 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

10
11 39. No analysis of value increase attributable to individual components of the
12 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
13
14 percentage difference between hypothetical Before and After conditions. Throughout his
15
16 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
17
18 descriptions in the Addenda even though he testified that he relied on these to calculate
19
20 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
21
22 someone might be able to determine how he attributed value to After conditions described in
23
24 the Addenda, he answered that that was “not the scope of the assignment” because he was
25
26 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
27
28 that the six components were not actually a continuous project, that he was viewing them
29
30 together because the City asked him to, and that if he were to view them independently,
31
32 there was a low probability that properties in the north would specially benefit from
33
34 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.

35
36
37 40. Not only did he fail to analyze benefits from each of these non-contiguous
38
39 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
40
41 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
42
43 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
44
45 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
46
47 objectives that guided regulators’ assessment of architectural plans for buildings along a

1 “signature street” were so vague that they amounted to ad hoc review based on the
2 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
3 even though he used the renderings as “visual aid[s] in appraising the property in the before
4 and after” to “visually see what the differences would be,” he could not explain what
5 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
6 when shown a rendering of a two-lane road going down to one-lane in the After condition
7 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
8 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
9 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
10 could explain the depiction of the same trees in the After condition nearly twice as tall as in
11 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
12 of the Examiner’s Recommendation: II.27 and IV.B.4.
13
14
15
16
17
18
19
20
21
22
23

24 41. Special assessment is not supported by comparable studies, data or reports.

25 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
26 that the LID Improvements will lead to meaningfully increased real estate values for
27 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
28 comparable sales or information from the “over twenty-five studies and reports” to arrive at
29 very precise special benefit increases for residential and commercial combined properties,
30 including Taxpayer’s property. For example, although Mr. Macaulay stated that no single
31
32
33
34
35
36
37
38
39
40

41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 report or study was directly on point due to the unique nature of the LID Improvements (*see*,
2
3 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
4
5 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
6
7 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;
8
9 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
10
11 for similarities and differences between these improvements and the comparable parks he
12
13 looked at).

14
15 42. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
16
17 assignment of incremental increase of 0.5% to 4% to property values within the LID.
18
19 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
20
21 research misinterprets his work in critical ways, including because the LID Improvements
22
23 manifest the characteristics of a parkway (not a park), and his research indicates that most of
24
25 a *park*’s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
26
27 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
28
29 related value increases are in fact smaller; that estimated increases are “best guesses” rather
30
31 than predictions of property value increases in a particular city; and that percentages do not
32
33 account for diminishing returns after taking into account water views, which would be the
34
35 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
36
37 topography grants most properties in downtown a water view.

38
39 43. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
40
41 that this was just one source of information that was not entirely relevant because, among
42
43 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
44
45 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
46
47 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-

1 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
2 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
3
4 Crompton concluded that 500 feet via road from “park” improvements is just one or two
5
6 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
7
8 significantly beyond that which the park study indicated (even if it was legitimate to use the
9
10 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
11
12 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
13
14 impact applicable to “community parks”—which the LID Improvements are not. *Id.*

15
16 44. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
17
18 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
19
20 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
21
22 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
23
24 materials, it was clearly an important—if not *the* most important—source of information for
25
26 estimating special benefits (especially with respect to the condos).⁷ No City witness
27
28 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
29
30 parcel-by-parcel analysis.
31

32
33 45. The destination parks discussed in the Final Special Benefit Study do not
34
35 provide reliable, comparable, and valid support for the calculation of special assessments
36
37 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
38
39 Study were funded by a LID. And in virtually all of those cases, the park improvements
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 dramatically restored unimproved or blighted areas, and properties evaluated were within
2
3 two or three blocks of the park.

4
5 46. ABS's claimed reliance on three economic studies to support property value
6 increase is also flawed. The HR&A study does not inform what value increases are
7 expected from the LID Improvements because it projects increases to tourism from *all* of the
8 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
9 dissimilar parks in other cities,⁸ making the methodological application to the LID
10 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
11 conclusion that there would be *no new net visitors* from downtown residents as a result of
12 the LID Improvements and could not explain how this impacted his condo analysis.
13
14 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
15 Property Values" primarily focused on whether the benefits accrue to the larger community
16 rather than properties adjacent to the park. And the 2014 New York City Department of
17 Transportation study is not based on real estate transactions and market sales and fails to
18 substantiate any link between increased retail sales and property values. Moreover, this
19 study only looked at impact either directly abutting the streetscape improvement, or a couple
20 hundred feet for plaza-like improvements.
21
22

23
24 47. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
25 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
26 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
27
28
29
30
31
32
33

34
35
36
37
38
39
40
41
42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
2 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
3 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
4 asked whether he considered that HR&A’s estimated LID impact is six times greater than
5 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
6 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
7 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
8 assumptions to account for this difference, which may be partly explained by the fact that
9 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
10 approximately 3.44% of King County tourists visit Seattle primarily because of the city
11 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
12 waterfront improvements.

13
14
15
16
17
18
19
20
21
22
23
24
25 48. Although proximity to the improvements is a key factor in all of these
26 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
27 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
28 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
29 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
30 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
31 Improvements is approximate 20 acres and it is not a community park.⁹

32
33
34
35
36
37
38
39 49. There is no explanation in the Final Study or the supporting materials of how
40 the studies or comparable sales were used to derive values for Taxpayer’s property. For
41

42
43
44
45 ⁹ *See*
46 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
2
3 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.

4
5 50. Failure to comply with USPAP. Taxpayer's assessment also rests on a
6
7 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
8
9 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
10
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12
13 Study does not meet mass appraisal standards nor allow for independent assessment of the
14
15 accuracy of Mr. Macauley's conclusions.

16
17 51. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
18
19 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
20
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22
23 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
24
25 testimony suggests that he incorrectly believed that the only difference between direct
26
27 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
28
29 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
30
31 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
32
33 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
34
35 Gordon uses in doing his limited restricted report").

36
37 52. But the difference is not only in reporting—mass appraisal techniques must
38
39 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
40
41 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
42
43 parcel approach:

44
45 The mass appraisal technique is an appraisal method used to evaluate
46
47 a group of properties that are subject to similar market forces as of a
certain date through the use of market data, statistical analysis and

1 testing. As a result, the mass appraisal technique does not require or
2 involve analysis of each individual property's specific data.
3

4 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
5
6

7 53. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
8 universe of properties as a given date using standard methodology, employing common data,
9 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
10 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
11 model" is "a mathematical expression of how supply and demand factors interact in a
12 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
13 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
14 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
15
16
17
18
19
20
21
22

23 54. Regardless of client direction, Mr. Macaulay is required to comply with
24 USPAP. So, if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have
25 been economically feasible because it would have taken "an incredible amount of time and
26 cost" (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an
27 appraisal consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8
28 ("performing an individual appraisal of each [condo] parcel would have been cost and time
29 prohibitive").
30
31
32
33
34
35
36

37 55. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
38 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
39 value, fails to calibrate the model structure to determine the contribution of the individual
40 characteristics affecting value, and does not review the mass appraisal results against actual
41
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2
3 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

4
5 56. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6
7 proximity to the elements, the increase in market rent, market vacancy changes,
8
9 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
10 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
11
12 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
13
14 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
15
16 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
17
18 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
19
20 were hypothetical, it was not possible to identify matched pair sales and no City witness
21
22 explained how ABS Valuation made adjustments to “comparable” sales in order to check
23
24 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
25
26 him to explain his model structure.
27

28
29 57. For these reasons, Taxpayer appeals the following portions of the Examiner’s
30
31 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
32
33

34
35 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
36
37 relationship between characteristics that affect value, and to calibrate that model to specify how
38
39 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
40
41 21). The purpose is to rationally determine what characteristics will create value, and by how much.
42
43 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
44
45 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
46
47 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
include explanation of the model specification, data requirements, calibration methods, and
mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
(o). Without this reporting, it is impossible for users of the appraisal report to determine how the
appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
Hrg. Tr. at 206:15-207:17.

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner's denial of that motion.
4

5 58. Finally, Taxpayer's property is not appurtenant to any proposed
6 improvements. *See Hasit*, 179 Wn. App. at 947 ("the burden of proving special benefit"
7 shifted to the City because the protestors' parcels merely stood "in close proximity to the
8 property on which expert testimony was given"). As described above, the special
9 assessment is overstated because the Final Study makes no attempt to determine general
10 benefits, existing amenities for Taxpayer's specific property, or special detriments. In
11 addition, it is speculative due to the fact that, as of October 2019, improvements were not in
12 in place—and, in fact, much of the waterfront is a construction zone following removal of
13 the viaduct and now Pier 58 demolition. Under these circumstances, rather than relying on
14 entirely imaginary income and shaky hypotheticals, Mr. Macaulay at the very least should
15 have discounted the special benefit estimates or waited to perform the Study until the
16 improvements were at least close to complete.
17
18
19
20
21
22
23
24
25
26
27

28 **Erroneous Pre-Improvement Valuation**

29
30 59. The proposed final assessment erroneously overstates the pre-improvement
31 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
32 benefit to the Taxpayer's property.
33
34
35

36 60. The City's Final Study was used to compute the proposed final assessment of
37 Harbor Steps' property. The City's Study purportedly uses data from the King County
38 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
39
40
41
42
43
44

45 ¹¹ *See, e.g.*, Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

1 Study does not accurately reflect this data. For example, the City's Study values Harbor
2 Steps' property at \$77,938,000 as of October 1, 2019. However, the King County assessor
3 determined the true and fair value of the property to be \$70,549,000, valued in 2019 for tax
4 year 2020. In other words, the Final Special Benefit Study's valuation is 110.5% of King
5 County's assessed value. The Final Special Benefit Study does not explain this difference—
6 or any differences—between its pre-improvement valuation and its supposed source for
7 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
8 Recommendation.
9

10
11
12
13
14
15
16
17 61. Further, the City's analysis was based on unreliable market data. The ABS
18 appraisal overstated the combined total before market value for all four Harbor Steps'
19 parcels by about \$88 million. B. O'Connor's Jan. 31, 2020 Report (attached to Appeal
20 Petition), Ex. 6. Based on our expert appraiser's appraisal review, the true and fair value of
21 the property here as of October 1, 2019 was \$55,938,000. *Id.* (Assuming equal value
22 between all parcels).
23
24
25
26
27

28
29 62. Thus, aside from multiple other reasons why computation of the special
30 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
31 improvement values that do not accurately reflect market data. For these reasons, Taxpayer
32 appeals the following portions of the Examiner's Recommendation: Sections II.13, II.14,
33 and II.15.
34
35
36
37
38

39 **Erroneous Computation of Special Benefit**

40
41 63. "Special benefit" is "the increase in fair market value attributable to the local
42 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
43 may receive by reason of the improvement is not measured alone by the physical character
44 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
45
46
47

1 of Seattle, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
2 the particular tract or property benefited by the entire improvement, and is it assessed
3 proportionately with the other property included within the assessment district?” *Id.* 165–
4
5 66.
6
7

8
9 64. The proposed final assessment erroneously overstates the special benefit of
10 LID improvements in a number of ways.
11

12
13 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
14 the Harbor Steps, Mr. Macaulay assumed room/rental rates would increase by 2.50% (low)
15 and 3.25% (high) due to the 2024 LID Improvements. Mr. Macaulay then uses these same
16 percentages (2.50% and 3.25%) to increase retail and parking. He then uses this
17 hypothesized increased revenue to calculate a new net operating income for the commercial
18 properties and capitalizes that to come up with an “After” valuation.
19
20

21
22 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
23 operating income remains the same as in the hypothetical “Before” condition but changes
24 the cap rate. For the Harbor Steps, the cap rate goes from 4.10% to 3.97% (low scenario,
25 creating a bigger value increase) and 4.00% (high scenario, creating a lower value increase).
26
27

28
29 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
30 benefit conclusion. For the Harbor Steps, this is an increase in property value of 2.75% due
31 to the LID Improvements.
32
33

34
35 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
36 and capitalization rates. When asked precisely what the basis is for his special benefit
37 percentage increases to revenue for each commercial property, he could not point to
38 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
39 is nothing in the report to allow a reader to understand how he came up with these
40
41
42
43
44
45
46
47

1 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
2
3 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
4
5 the basis for his belief that certain factors—liked increased connectivity—will increase
6
7 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
8
9 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
10
11 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
12
13 sources equally even though there was no separate analysis done for food and beverage or
14
15 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
16
17 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
18
19 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
20
21 properties.

22
23 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
24
25 check for commercial properties. But as explained above, no City witness has explained
26
27 how anyone, or all, of the sales are comparable to any particular commercial property within
28
29 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
30
31 in order to make sales “comparable,” he would have had to make adjustments to account for
32
33 Before and After conditions, but there is no way to understand how adjustments were made
34
35 because he “didn’t do a separate sales comparison approach where we showed adjustments
36
37 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
38
39 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
40
41 *Id.* at 127:10-128:24.

42
43 70. It also bears noting that any “internal review” of the special benefit estimates
44
45 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
46
47 error. Indeed, given all the same information, he seemed to suggest that it would be

1 perfectly reasonable for another experienced appraiser to come up with special benefit
2 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
3 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
4 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
5 margin of error conflicts with the testimony of Taxpayer's experts and reaffirms that there
6 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
7 margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there are still
8 reasonable and unreasonable variations within the appraisal field. *See Examiner's*
9 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
10 special because it is arbitrarily assigned; and it is too small to realistically be supported by
11 appraisal techniques.

22 71. No evidence of special benefit. Meanwhile, there is "no actual evidence from
23 any seller or purchaser that the price was higher because of the LID improvements."
24 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
25 identified any seller or buyer, or any particular property where the existence of the LID
26 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Taxpayer has
27 explained that the property has not increased rental rates or revenue due to the forthcoming
28 LID Improvements, because, among other reasons (and apart from COVID), the
29 improvements ABS believes will generate value do not exist and will not for a number of
30 years to come. There are no comparable sales because the LID Improvements are not in
31 place, nor will they be until the end of 2024 if completed on schedule.

42 72. The fair market value of Harbor Steps' property has not changed due to
43 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
44 benefited from installation of new water main and fire hydrant where it was already
45
46
47

1 adequately supplied with water and afforded adequate fire protection). And in any event, any
2 value attributable to removal of the viaduct was to be excluded from the assessment
3 calculation.
4

5
6 73. There is no special benefit to the Harbor Steps because its apartment demand
7 is driven by proximity to downtown job centers. In fact, the LID improvements diminish the
8 value of Harbor Steps' property by drawing visitors away towards improvements that do not
9 abut the property and increasing competition in other areas of the city. *See Kuskys*, 85 Wn.
10 App. 493 (testimony of owners' expert that LID actually diminished value of property was
11 sufficient to rebut presumption that assessment was proper). The ground floor retail tenants
12 will be harmed by the LID improvements because the Overlook Walk and Union Street
13 connection improvements will likely direct foot traffic away from the Harbor Steps and
14 towards Pike Place Market. Less demand for Harbor Steps' retail businesses will result in
15 lower rents and less revenue. Mr. Macaulay did not account for any of these impacts. Harbor
16 Steps already has a high-quality connectivity to the waterfront and no data was presented to
17 justify a value lift based on additional connection points several blocks away. On cross-
18 examination, Mr. Macaulay could not point to any specific data in the ABS Special Benefit
19 Study justifying the precise special benefit to Harbor Steps, claiming only that the market
20 would generally support additional connection points to the waterfront amenities. *See*
21 6/23/2020 Hrg. Tr. at 48-50.
22

23 74. Moreover, the assessment formula is an attempt to distribute costs that do not
24 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
25 "merely a mathematical model that distributes costs").
26

27 75. The Special Benefit Study fails to address whether the \$346,000,000
28 estimated LID project cost takes into account the investment that would have occurred in the
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
2 invested. This is a critical component of estimating which properties receive a direct benefit
3 from the improvements, versus more incidental benefits further from the park.
4

5
6 76. Mr. Macaulay also included personal property in his valuation of hotels even
7 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
8 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
9 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
10 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
11 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
12 receiving a disproportionately high LID assessment in comparison to other property types,
13 since hotels were the only property type subject to personal property LID assessments.
14
15 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
16 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
17 notice procedures because hotel property owners only received notice that their real estate
18 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).
19
20

21 77. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
22 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
23 a television at the waterfront Marriott is assigned a greater special benefit than the same
24 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
25 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
26 unreasonable to assign a value lift to personal property that is replaceable at the same cost
27 and may be obsolete before the LID improvements are even completed. Further, personal
28 property is highly depreciable, and likely to be fully depreciated or potentially discarded by
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 2024. *Id.*; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must
2
3 be redone to correct for this error.

4
5 78. The proposed final assessment substantially exceeds the special benefit to the
6
7 property and is grossly disproportionate to similarly situated properties within the LID. For
8
9 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
10
11 Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).

12 **State Environmental Policy Act and Other Environmental Permitting**

13
14
15 79. While this appeal is not challenging the City's environmental review and
16
17 permitting processes, those processes are relevant in determining the legality of the
18
19 assessments, and to assessing the delivery risk, the present value of the City's plans, and
20
21 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
22
23 pursue projects that have not yet undergone environmental review (thus limiting the choice
24
25 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
26
27 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
28
29 is just beginning. Further, the City has segmented environmental review, and still has a
30
31 gauntlet of federal, state and tribal review processes to complete before it will be clear what
32
33 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
34
35 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
36
37 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
38
39 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
40
41 committing to reconstruction of Pier 58 and major street improvements without
42
43 environmental review, or the City's Final Special Study has improperly included and is
44
45 proposing to assess the Taxpayer the costs and special benefits of improvements that may
46
47 not get built. Either way, it is faulty process.

Due Process Rights

1
2
3 80. The City's failed to notify Harbor Steps sufficiently in advance of the hearing
4 to allow Harbor Steps to obtain evidence and prepare to properly challenge the assessments.
5 Because LID assessments involve a deprivation of property, affected owners have the right
6 to a hearing as to whether the improvement resulted (or will result) in special benefits to
7 their properties and whether their assessments are proportionate, which necessarily includes
8 the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d
9 555, 569–70, 229 P.3d 761 (2010).
10
11
12
13
14
15

16 81. The LID statute specifies that cities must mail notices giving the time and
17 place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and
18 publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with
19 the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict
20 compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at
21 956. The key inquiry is whether the owner had sufficient time to gather evidence (and
22 secure their own appraisal), evaluate proportionality of the proposed assessments, and
23 whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient
24 for anybody to get an appraisal”).
25
26
27
28
29
30
31
32
33

34 82. The City’s Notice of Assessment was sent on December 30, 2019. And the
35 Final Special Benefit Study has only been available for public review since January 7, 2020.
36 Due to this short time frame, Harbor Steps requested a prehearing conference and
37 scheduling order that would preserve and protect Harbor Steps’ right to analyze and respond
38 to the Final Study, obtain expert appraisal testimony, conduct depositions, and to
39 accommodate preliminary motions (*e.g.*, with respect to the interplay between SEPA and the
40 City’s assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner
41
42
43
44
45
46
47

erroneously denied that request. For this reason, Taxpayer appeals the following portions of the Examiner's Recommendation: I.B.

VII. Relief Requested

Harbor Steps respectfully requests that the City Council:

1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection and:
 - a. Cancel the Waterfront Local Improvement District No. 6751 proposed final assessment dated December 20, 2019; or
 - b. Revise Taxpayer's Waterfront Local Improvement District No. 6751 proposed final assessment to \$0 (zero), or such amount as Taxpayer establishes at the hearing in this matter; or
 - c. Remand the matter to the Hearing Examiner or City appraiser to recalculate and reduce Taxpayer's assessment using recognized appraisal techniques consistent with USPAP and:
 - i. Excluding any property value increase attributable to viaduct removal and other planned WSDOT Improvements;
 - ii. Taking into account the effects of COVID-19 pandemic on the value of Taxpayers property and other relevant developments since October 2019;
 - iii. Accounting for and excluding (1) any special benefits from existing or planning improvements that already provide similar benefits to Taxpayers property, and (2) any special detriments from construction and other anticipated LID-related disamenities;

- 1 iv. Accounting for and including only those actual benefits
2 anticipated to accrue to Taxpayer's property based on its
3 location relative to Pier 58, Overlook Walk, and the
4 Promenade, and specific elements of the LID Improvements;
5
6 v. Discounting anticipated special benefits to present value,
7 based on reliable estimates regarding when special benefits
8 will start accruing following completion of the LID
9 Improvements; and
10
11 vi. Accounting for such other issues specific to Taxpayer's
12 property relevant to calculation of such assessment; and
13
14
15
16
17
18
19
20

21 2. Grant such further relief as the City Council deems just and proper.

BEFORE THE HEARING EXAMINER
CITY OF SEATTLE

In re Proposed Final Assessment Roll for
Local Improvement District No. 6751
("Waterfront LID")

Case Nos. CWF-0425, 0426, 0427, 0440, AND
0441

DECLARATION OF ED LEIGH

I, Ed Leigh, declare as follows:

1. I have personal knowledge of the facts stated below and am competent to testify regarding the same.
2. I am the Vice President of Investments for Equity Residential. I testified in this appeal as to my position, qualifications and employment history.
3. Eqr-Harbor Steps LLC is owned by Equity Residential. Eqr-Harbor Steps LLC owns a four-tower apartment complex encompassing parcel nos. 1976200070, 1976200075, 1976200076, and 7666202465. These parcels are located at 1306 Western Ave., 1301 1st Ave., 1201 1st Ave., and 1212 Western Ave., Seattle WA, and are the subject

DECLARATION OF ED LEIGH – 1

1 of case nos. CWF-0425, -0426, -0427, -0440. These properties are known as the "Harbor
2 Steps" apartment towers.
3

4 4. Eqr-Second & Pine LLC is also owned by Equity Residential, and owns real
5 property parcel no. 7683890010, which is located at 206 Pine St., Seattle WA, and is the
6 subject of case no. CWF-0441. This property is known as the Helios apartments.
7
8

9 5. Equity Residential appealed the City's proposed final assessment for
10 Waterfront LID No. 6751 for each of the properties described above.
11
12

13 **HARBOR STEPS (CWF-0425, -0426, -0427, -0440)**
14

15 6. The Harbor Steps are multifamily residential apartment buildings with
16 ground floor retail. Additionally, the Harbor Steps are on a pedestrian corridor connecting
17 the downtown retail core to the waterfront amenities.
18
19

20 **HELIOS (CWF-0441)**
21

22 7. Helios is a multifamily residential apartment building located a block east of
23 Pike Place Market, and approximately two blocks from the proposed overlook walk.
24
25

26 **COVID-19 Calculations**
27

28 8. After we appealed our assessments, the Covid-19 pandemic broke out,
29 causing significant disruptions in Seattle and around the world. Based on our current rents,
30 compared with Brian O'Connor's appraisal calculations to support our appeals, our
31 properties have decreased in value in the range consistent with those described by John
32 Gordon. In Mr. Gordon's April 21, 2020 Declaration, he noted that property values for
33 hotels in Downtown Seattle would be at least 10% to 15% lower when compared with the
34 values as of October 2019 and January 2020. The same is true for our properties. The year-
35 over-year rent reductions that I have observed in our Downtown Seattle assets are consistent
36 with Mr. Gordon's valuation reduction, assuming that rents do not quickly rebound. We

Hearing Examiner File No. CWF-0425

NOTICE OF APPEAL OF HEARING
EXAMINER’S FINDINGS AND
RECOMMENDATION ON EQR-HARBOR
STEPS LLC OBJECTION TO
WATERFRONT LID NO. 6751 PROPOSED
FINAL ASSESSMENT FOR PARCEL NO.
1976200070

32
33 Eqr-Harbor Steps LLC (“Harbor Steps”) files this appeal pursuant to RCW
34 35.44.070, Seattle Municipal Code 20.04.090, City of Seattle Resolution 31915, the notice
35 of the Seattle Office of the City Clerk dated December 30, 2019, and the Hearing
36
37 Examiner’s Findings and Recommendation issued September 8, 2020 (“Examiner’s
38
39 Recommendation”).
40
41
42

43 **I. Taxpayer / Appellant**

26 Facsimile: 206.359.9000
27
28
29

30 **III. Statement of Taxpayer's Interest**
31

32 Harbor Steps owns the property that is subject to the proposed final assessment
33 described in Section IV. The property at issue is a multifamily residential apartment building
34 with ground floor retail. Additionally, there is a pedestrian corridor connecting the
35 downtown retail core to the waterfront amenities.
36
37
38

39 The basis of the proposed assessment is a Final Special Benefit/Proportionate
40 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
41 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
42 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
43
44
45
46
47

1 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
2 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4 to exclude charges for other improvement projects in the Central Waterfront, and
5 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
6 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
7 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
8 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
9 because construction was not complete on the LID Improvements or the WSDOT
10 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
11 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
12 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which was
13 based on the Final Study.
14

15 **IV. Matter Under Appeal**

16 Harbor Steps appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
17 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
18 final assessment dated December 30, 2019 against the following property:
19

20 King County Parcel No. 1976200070
21 Site Address: 1306 Western Ave., Seattle, Washington
22 Proposed Final LID Assessment for Parcel: \$839,674.55
23

24 *See* Examiner’s Recommendation at 61-62, 105. To avoid repetition, Taxpayer incorporates
25 the evidence and arguments raised before the Hearing Examiner into this appeal. In
26 particular, Taxpayer points the City Council to Taxpayer’s initial Appeal Petition, *Frye*
27 motion, Closing Brief submitted at the close of its case-in-chief (dated 4/16/2020), and
28

1 supplemental Closing Statement submitted at the close of the City's case-in-chief (dated
2 7/7/2020).¹
3

4 As discussed more fully below, Taxpayer specifically appeals the following Findings
5 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
6
7 Pages 61-62, 105, Sections II.6, II.7, II.12, II.13, II.14, II.15, II.18, II.19, II.20, II.21, II.22,
8 II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2,
9 IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i),
10 IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.7,
11 IV.C.8, IV.C.9, IV.C.11, IV.C.12, IV.C.14, IV.C.18
12
13
14
15
16
17

18 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
19 recommendations on material issues raised during Taxpayer's appeal that were supported by
20 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
21 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23 recommended anything other than denial of objectors' appeals were where the City's
24 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
25 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
26 special assessments based on "fundamentally wrong methods."
27
28
29
30
31
32
33
34
35
36
37
38
39

40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$2,143,000.00 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City's appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and
5 the City's preliminary roll. On the contrary, the City's assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS's appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City's appraiser asserts that the City is not collecting assessments "based
16 on the value of WSDOT's planned improvements." See Final Study at 3. However, the
17 City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition,
18 the City's appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City's promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT's planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City's appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be "physical and material and not merely speculative
35 or conjectural"
36

37
38 **ABS Study:** Not only are the improvements not yet "physical or material," but
39 environmental review and permitting for the City's proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City's then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual" and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
2 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
3 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
4 Final Study fails to meet basic standards for admissibility and must be remanded.
5
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6 **V. Standard of Review**

7
8 “When considering the assessment roll, the city council sits ‘as a board of
9 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
10 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
11 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
12 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
13
14

15 The proposed assessments are presumed correct, “unless overcome by clear, cogent
16 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
17 than the heightened presumption of correctness on judicial appeal because “applying these
18 elevated standards at the municipal hearing would afford unwarranted deference to a report
19 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
20 presumption is not evidence and its efficacy is lost when the other party adduces credible
21 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
22 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
23 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
24 presented credible evidence showing that the City’s proposed assessment is arbitrary,
25 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
26 to the City to prove the assessments are actual, measurable, special, non-speculative and
27 proportionate. The City failed that burden.

42
43
44
45
46
47

1 **VI. Grounds for Appeal**

2 Harbor Steps appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
12 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020); Decl. of Brian O'Connor ISO Closing
13 Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained: "[W]e have explicitly
14 rejected an argument that, because certain protestors 'failed to offer expert testimony at the
15 city council hearing[,] the presumptions [in favor of the assessment] were still operative as
16 to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian Trail Trunk Sewer*, 35
17 Wn. App. at 843); *see also Kuskys v. City of Goldendale*, 85 Wn. App. 493, 933 P.2d 430
18 (1997) (although appraiser did not submit an appraisal, he provided expert opinion showing
19 that improvements actually diminished value of the property). In fact, no independent
20 evidence is required at all if, for example, objectors show that the assessment was grounded
21 on a fundamentally wrong basis due to an error in the City's appraiser's methods—as is the
22 case here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88,
23 106, 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out
24 that the square footage assumed in the City's appraisal was incorrect.
25

26
27 2. On March 5, 2020, Harbor Steps presented testimony from experts Ben Scott
28 and Brian O'Connor. The Hearing Examiner failed to meaningfully respond either the expert
29

43
44
45
46
47

1 testimony or the expert appraisal reviews. Instead, the Hearing Examiner simply dismissed
2 Harbor Steps' expert evidence as insufficient appraisal evidence. *See* Examiner's
3 Recommendation at IV.C.7–9. This is contrary to law.
4

5
6 3. For these reasons, Taxpayer appeals the following portions of the Examiner's
7 Recommendation: Sections II.13, II.14, II.15, IV.A, IV.B.11(a), IV.C.7, IV.C.8, IV.C.9, and
8 IV.C.11.
9

10
11
12 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

13
14 4. RCW 35.43.040 provides cities and towns authority for ordering local
15 improvements and for levying and collecting special assessments “on property specially
16 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed upon
17 all the property in accordance with the special benefits conferred thereon.” RCW 35.44.010.
18

19
20 5. No analysis of general benefits. Special assessments have been “held valid
21 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
22 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
23 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
24 they are for the construction of local improvements that are appurtenant to specific land and
25 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
26

27
28 6. Harbor Steps' property is not specially benefited by the LID Improvements.
29 The primary purpose and effect of the LID Improvements are to benefit “members of the
30 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
31 library is for the benefit of the members of the whole community individually and
32 collectively who may be served by it”). Mr. Macaulay's own chapter of the LID Manual
33 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
2 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
3 that if an appraiser “identifies both general and special benefits, these benefits should be
4 clearly distinguished and explained, and only special benefits should be included in the
5 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
6 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/5/2020 (B. O’Connor) Hrg. Tr. at 158:13-
7 159:8, 192:8-193:2. It is undisputed that Mr. Macaulay did not analyze or measure general
8 benefits, including those arising from construction necessary to meet basic design standards.
9 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
10 construction costs related to meeting design standards which may be general benefits as
11 distinct from construction costs emanating from requirements of the LID project”). To the
12 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
13 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
14 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
15 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.

16
17

20
21
22
23
24
25
26
27
28
29
30
31 7. LID Improvements not necessary. Unlike typical LID projects, the
32 Waterfront LID improvements are largely unnecessary to the functionality of any particular
33 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
34 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
35 held invalid where owners would have benefitted equally from increase of only 9 feet);
36
37
38
39
40
41

42
43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
2 intersection for new water main for hydrant held invalid because land was already afforded
3 functional hydrant at nearby street). Here, Taxpayer testified that the LID Improvements are
4 not necessary to the business of their income-producing properties, all of which already have
5 sufficient access to the waterfront, downtown restaurants, and other amenities necessary for
6 their tenants and clients. And for residential properties, like Harbor Steps, the assumption
7 that an increase in tourism will cause lifts in property value is both anecdotally and
8 empirically unsupported. Additionally, the construction of new access points is in fact a
9 negative point for the Harbor Steps, which are located at an existing connection between the
10 downtown core and the waterfront. The LID improvements will draw foot traffic away from
11 the Harbor Steps, increasing competition in other areas of the city. The fact that there is no
12 case law differentiating between binary improvements and parks does not change the law
13 prohibiting assessments on properties already adequately served by existing amenities. *See*
14 Examiner's Recommendation at IV.C.3 (reasoning that "no case law is provided to support
15 the differentiation between a hardscape benefit and the more ephemeral benefits of park").
16 Nor does the Examiner's reasoning excuse the City's failure to account for existing
17 amenities as part of the special benefit calculation. As Dr. Crompton testified, existing view
18 amenities may in fact diminish the incremental effect of new park improvements on the
19 value of properties, much like turning on a weak light in an already brightly illuminated
20 room. *See* Hrg. Exhibit 94 (Crompton's Report) at 12-13.

21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41 8. To the extent benefits can be considered "special" as opposed to general, they
42 are nominal or nonexistent for many properties even in the Central Waterfront, which
43 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
44 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
45
46
47

1 change due to expansion of sewer service *near* owners' parcel which were already
2 connected). Here, the primary reasons a user chooses a particular apartment is not proximity
3 to the waterfront. Instead, the reason residents choose to live in the Harbor Steps apartments
4 is proximity to their places of employment and other amenities downtown. *See* 3/5/2020 (E.
5 Leigh0 Hrg. Tr at 113:13-114:20; 124:3-126:9. For example, without any supporting written
6 analysis, Mr. Macaulay offhandedly concludes that the Harbor Steps apartments would
7 benefit from increased connectivity from being four to five blocks from the Overlook Walk
8 even though the properties currently have direct access to the waterfront via the Harbor
9 Steps. 6/23/2020 Hrg. Tr. At 48:1-50:25; *see also* B. Scott Decl., ¶ 7. Mr. Leigh testified that
10 he did not anticipate a benefit, and that the Harbor Steps retail component would suffer if a
11 measurable portion of waterfront-bound pedestrian traffic moved north to the market. *See*
12 *also* B. Scott Decl., ¶ 6 (describing failure to analyze how existing retail is harmed by foot
13 traffic being pulled away towards new amenities). Even if the City could assess for a view
14 change (and it has promised not to assess for viaduct removal), the fair market value of
15 Harbor Steps' property has not changed because the LID Improvements have not improved
16 the property's waterfront view or access to the waterfront, nor will they when the City
17 anticipates completion in 2024. For these reasons, Taxpayer appeals the following portions
18 of the Examiner's Recommendation: Sections IV.C.3, IV.B.9, and IV.C.3.

19
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37 9. No analysis of special detriments. The Final Study fails to properly account
38 for special detriments. *See Kuskys*, 85 Wn. App. at 501 (city failed to consider the costs to
39 owners for removal and cleanup of underground storage tanks discovered during the
40 improvement project). The Property owner representative for Harbor Steps, Ed Leigh,
41 testified that property values may in fact be negatively impacted by the LID Improvements
42 due to loss of parking, increased traffic and noise, and increased potential for crime,
43
44
45
46
47

1 homelessness and sanitation issues. Mr. Leigh testified that the assessment is an immediate
2 expense for Harbor Steps that comes with no immediate increase in revenue, thereby
3 decreasing property values. *See* 3/5/2020 (E. Leigh) Hrg. Tr. at 126:10-129:9; 227:8-229:10.
4
5 And Harbor Steps does not expect near term the increases assumed in ABS Valuations'
6
7 spreadsheets or the Final Study. Although Mr. Macaulay claims he analyzed impacts on the
8
9 City's planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no
10
11 explanation of how lost parking might be a detriment, and no property-specific parking
12
13 analysis in any of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.
14
15

16 10. Likewise, there was no analysis of the risks associated with disamenities such
17
18 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
19
20 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
21
22 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
23
24 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
25
26 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
27
28 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
29
30 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
31
32 the maintenance agreement. *Id.* at 13:4-14:2.
33
34

35 11. There was also no consideration of negative impacts from another four-plus
36
37 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
38
39 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
40
41 law allowing him to dismiss these actual, non-speculative impacts. Because future special
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

benefits calculations are inherently speculative, Washington's eminent domain statute specifically allows condemnees to postpone special benefits assessments until improvements are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).

Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy Greenway, the Greenway district "significantly" lagged in value). For these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation: Sections II.25, IV.B.8, and IV.B.9.

12. Special benefit estimate is speculative. When calculating a special benefit, "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it becomes pure speculation." *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324 P.2d 1078 (1958)).

13. Assuming without conceding that one day, the City's planned LID Improvements might increase the value of neighboring properties to some extent, that potential benefit is many years away and speculative. While appraisers tolerate some degree of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is far too speculative to satisfy industry practices and standards.

14. Although LIDs are sometimes finalized prior to completion of improvements, this is typically just six month or a year prior, and the assessments are otherwise supported by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here will not be realized for four or five years. In the meantime, there is permitting risk,

1 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
2 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
3 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
4
5 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
6
7 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
8
9 testified: "I just don't know what the market value would be as of the date the project would
10
11 be finally constructed" because "[t]here could be a lot of elements in the market that did
12
13 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
14
15 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
16
17 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
18
19

20
21 15. The record is clear that while no one can know what "special benefit" might
22
23 accrue to these properties in four years (if any), we do know that there are no actual benefits
24
25 now. The LID improvements provide no immediate special benefit to property owners
26
27 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
28
29 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
30
31 sewer system for future users). For example, notwithstanding the questionable hypothesis
32
33 that apartments will benefit from an expected increase in tenant interest when the
34
35 improvements are complete, it is undisputed that tenants are not coming in larger numbers
36
37 and paying higher rental rates now because of something happening five years down the
38
39 road. *See O'Connor Decl. ISO Closing Stmt.*, ¶ 7 (dated 7/7/2020) (no apartment leased
40
41 today for 18 months would rent at a higher rate due to improvements coming in 2024).
42

43 16. Further, there are no "plans and specifications" on file with the Clerk's Office
44
45 for the LID Improvements, and it is unlawful to move to final assessments without such
46
47 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*

1 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
2
3 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
4
5 dollars on projects still early in the design process. *See* Washington Attorney General
6
7 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
8
9 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
10
11 of programs and included “only so much of the overall costs” that took place within and
12
13 benefitted the assessed properties).

14
15 17. The COVID-19 crisis highlights how fundamentally speculative and unfair it
16
17 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
18
19 anticipated to be delivered five years later. Even before COVID, it was speculative to
20
21 assume that market highs experienced in October 2019¹ would be sustained through 2024,
22
23 after an already extraordinarily long expansion period. *See, e.g.*, 3/5/2020 (E. Leigh) Hrg.
24
25 Tr. at 119:15-123:6; 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr.
26
27 Macaulay conceded: “[W]hen I was doing my analysis in October 2019, who would have
28
29 thought that this COVID issue would happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his
30
31 deposition in late February, his “thought process was that the market was going to continue
32
33 to go up,” but now, they are already irrelevant. *Id.*; *see* Gibbons Decl. ISO Closing Stmt. at ¶
34
35 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019
36
37 (*see* Examiner’s Recommendation at 109), the pandemic has impacted *current* values and
38
39 rendered the hypothetical October 2019 Final Study valuations outdated.

40
41 18. As another example of how future events could affect the accuracy and
42
43 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
44
45 Examiner re-open the record to allow the City to explain whether the assessments against
46
47 property owners within the LID are, in fact, being used by the City to fund the emergency

1 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
2 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
3 would be improperly imposing costs on property owners within the LID for improvements
4 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
5 habitat and City infrastructure—this does not provide any special benefit to LID property
6 owners.
7
8
9
10
11

12 19. There is also no certainty the improvements will be delivered on time. Mr.
13 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
14 delay in construction schedule would not constitute a “material change” under the City
15 Council’s ordinance authorizing the improvements. In other words, the City cannot
16 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
17 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
18 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
19 potential delays and project changes inherent in those processes, that call into question the
20 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110
21

2 Decl., dated 4/15/2020).
3

4
5 20. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
6 he could not point to a single one where the assessment roll was finalized five years in
7 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
8 he has never recommended final special assessments based on designs less than 30 percent
9 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
10 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
11 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
12 at 66:17-25. He performed no independent due diligence to determine the reliability of the
13 City’s estimates for completion of the LID Improvements, or to ensure that proposed
14 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
15 agreed that if any of his assumptions are incorrect, his opinion of market value would need
16 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
17 68:11-18.

19
20
21
22
23
24
25
26
27
28
29

30 21. The City has cited no authority—and Taxpayer is aware of none—that
31 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
32 assess taxes for “actual” special benefits that will not accrue for another five years (if all
33 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
34 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
35 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
36 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
37 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
38 IV.C.14, and IV.C.18.

46
47

1 22. Failure to discount special benefit estimates to account for risks and present
2 value. Due to the inherent uncertainty, Taxpayer's expert opine that the Final Study should
3 have accounted for risks associated with delivery of the improvements (including permitting
4 risk, construction risk, general economic risk) and any special damages associated with
5 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
6 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
7 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
8 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) ("Appraisers routinely consider
9 the impact of future conditions [through] discounted cash flow analysis.").

10 23. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, "[y]ou would be discounting it back to a present value." *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.

22 24. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
23 present value, an appraiser would consider discount rates for land development to account
24 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at

1 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer to
2 the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
3
4 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
5
6

7 25. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
8 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
9 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
10 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
11 ignoring momentarily all of the other methodological and other flaws discussed here and in
12 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
13 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
14 exceeds special benefits when reduced to present value. Further, to the extent the City is
15 arguing that because they are permitted to assess 100% of the special benefit, the special
16 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
17 is again wrong. After applying proper discounting, the City's proposed special benefit
18 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
19 100% of the total estimated special benefit.
20
21

22 26. But even the assumption that the LID improvements would deliver benefits
23 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
24 on. Rather, those studies demonstrate that a discount period of five years is conservative.
25 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
26 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
27 indicates that during the construction period, the Greenway district "significantly" lagged in
28 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
29 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 30-31 (discussing New York City High Line and San Francisco Embarcadero
2 improvements). Given the lengthy delay, any prediction of future special benefits is
3 speculative, especially during the construction phase where values are likely to decline. And
4 assuming the LID Improvements take a similarly long period of time after they are complete
5 to start producing tangible property value benefits, each additional year of delay results in
6 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
7 Closing Stmt., ¶ 19, Ex. A.
8

9
10 27. Applying the same discounting methods described above and in Mr. Gibbons
11 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
12 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
13 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
14 100% assessment should be no more than \$201,870.60. Anything more would permit the
15 City to assess Taxpayer based on a hypothetical assumption that these improvements are in
16 place and providing benefit, and ignore the risks, construction disamenity, and time value of
17 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
18 would counsel that the assessment should be only 39.2% of that assessment cap, or
19 \$79,133.28.
20

21 28. Attachment C includes two Excel spreadsheets applying these discounting
22 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
23 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
24 demonstrates that discounting the City's hypothetical October 2019 special benefits to
25 present value would reduce Taxpayer's assessment to \$288,082, exclusive of any other
26 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
27 reductions after taking into account (1) Taxpayer's exerts' estimated "Before" valued based
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
2
3 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
4
5 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
6
7 the time it takes for the improvements to capture property value.). After such reductions,
8
9 Taxpayer's assessment would be just \$180,918 (for the 5-year discount) or \$49,710 (for the
10
11 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
12
13 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
14
15 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
16
17 Taxpayer's discounting argument without legal or factual analysis; that failure is error.

18 **Appraisal and Assessment Calculation Methods Are Flawed**

19
20
21 29. The "general rule is that each lot, piece, or parcel of land should be assessed
22
23 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
24
25 Wn.2d at 97.

26
27 30. It is proper to sustain a challenge to an assessment, even without the appraisal
28
29 testimony from the owner, where the objector's expert establishes that the assessment was
30
31 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
32
33 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.

34
35 31. The City's appraiser purports to utilize the income method of valuation but
36
37 relied on inaccurate revenue and market data, as discussed further below.

38
39 32. The City's appraiser purports to utilize the comparable sales method of
40
41 valuation, but no City witness attempted "to characterize any one, or all of them, as
42
43 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
44
45 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
46
47 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to

1 characterize any one, or all of them, as comparable to any particular property within the LID”).
2
3 And no City witness could explain how specific adjustments were made to these sales to
4
5 account for value increases due to the hypothesized Before and After Improvements. For this
6
7 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
8

9 33. Special assessment improperly includes value lift from the Before
10 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
11
12 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
13
14 Improvements, which WSDOT had independently committed to fund. However, Mr.
15
16 Macauley did not calculate the actual market value of LID properties in October 2019 and
17
18 did not separately analyze the hypothetical increase to property values attributable to
19
20 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
21
22 current value and then separately calculate a hypothetical “With WSDOT” Before value);
23
24 *see also* Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020
25
26 Letter (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal
27
28 Petition) at 3-4. Without any documented basis or support, Mr. Macauley simply “ma[de] a
29
30 judgment a call” on what occupancy and rates would have been for the commercial
31
32 properties assuming all of the WSDOT Improvements are completed as of 2019. Macauley
33
34 Depo. at 129:19-130:11. For example, Mr. Macauley surmised that Brian O’Connor’s
35
36 conclusion that the “Before” value for Harbor Steps was overstated by \$88M was perhaps
37
38 due to the fact that Mr. O’Connor was looking at current income numbers and not
39
40 accounting for the value of the “Before” conditions. However, when asked whether the
41
42 value of the of the “Before” conditions is lower or higher than \$88M, Mr. Macauley had no
43
44 clue because he did not do this analysis. 6/23/2020 Hrg. Tr. at 46:9-17:25. This outright
45
46 omission precludes any independent evaluation of the true market “Before” values. *See*
47

1 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards; if an
2 appraiser uses current sales data to infer values, then the appraiser must explain how he
3 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
4 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
5 other road, pedestrian and landscaping improvements WSDOT had already committed to
6 make.
7

8
9
10
11
12 34. However, because Mr. Macaulay testified that he did include some WSDOT-
13 related value-lift in the “Before” values, it follows that part of the special assessment
14 improperly is based on value attributable to the WSDOT Improvements. As shown by
15 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
16 percentage to Before values. So, for example, if Mr. Macaulay believed the WSDOT
17 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
18 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
19 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
20 to properly exclude the value of Before Improvements from the assessments. For these
21 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
22 Sections II.19, II.29, and IV.B.11(a)(ii)
23

24
25 35. Special benefits were assigned rather than measured. Mr. Macaulay
26 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
27 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/5/2020 (B.
28 O’Connor) Hrg. Tr. at 147:10-149:21; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-
29 91:13. Based on formulas in spreadsheets that Mr. Macaulay used to analyze the
30 commercial properties, Taxpayer’s experts concluded that Mr. Macaulay based adjustments
31 on hypothesized very small increases to property revenue and very small reductions to cap
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 rates to “calculate” an “After” value due to the coming 2024 LID Improvements.

2 Attachment B (ABS Spreadsheet). These series of micro adjustments were based on
3
4 “professional judgment” that are neither shown nor replicable.
5

6 36. For these reasons, Taxpayer appeals the following portions of the Examiner’s
7
8 Recommendation: Sections II.19 and IV.B.11(a)(iii)
9

10 37. Special benefit falls within margin of error. The Final Special Benefit Study
11
12 applies an estimated value enhancement of less than 4%, which is generally within the
13
14 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
15
16 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
17
18 Taxpayer’s experts explained that if two appraisers independently arrive at values within 5%
19
20 of one another, this difference is considered reasonable as it falls within the standard margin
21
22 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/5/2020 (B.
23
24 O’Connor) Hrg. Tr. 201:7-204:8. Because Mr. Macaulay’s micro-special benefit percentages
25
26 fall far below that 5% margin, “there is no way of authenticating” such incremental changes
27
28 because “[m]arket forces completely obliterate any tiny little noise factor like that.” *See*
29
30 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition
31
32 that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Additionally, the fact that
33
34 “Before” values are also based on a hypothetical that adds some unstated incremental value
35
36 to actual 2019 values exacerbates this issue—the ability for an appraiser to discern the
37
38 micro-value differences between hypothetical conditions that are so similar (the WSDOT
39
40 improvements compared to the LID improvements) “verges on being ludicrous.” 3/3/2020
41
42 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
43

44 38. Even if it were possible to accurately tease out such a miniscule hypothetical
45
46 value change due to improvements coming five years later, experts testified that there is no
47

1 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
2
3 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A Gibbons) Hrg. Tr. at
4
5 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
6
7 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
8
9 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

10
11 39. No analysis of value increase attributable to individual components of the
12 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
13
14 percentage difference between hypothetical Before and After conditions. Throughout his
15
16 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
17
18 descriptions in the Addenda even though he testified that he relied on these to calculate
19
20 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
21
22 someone might be able to determine how he attributed value to After conditions described in
23
24 the Addenda, he answered that that was “not the scope of the assignment” because he was
25
26 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
27
28 that the six components were not actually a continuous project, that he was viewing them
29
30 together because the City asked him to, and that if he were to view them independently,
31
32 there was a low probability that properties in the north would specially benefit from
33
34 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.

35
36
37 40. Not only did he fail to analyze benefits from each of these non-contiguous
38
39 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
40
41 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
42
43 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
44
45 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
46
47 objectives that guided regulators’ assessment of architectural plans for buildings along a

1 “signature street” were so vague that they amounted to ad hoc review based on the
2 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
3 even though he used the renderings as “visual aid[s] in appraising the property in the before
4 and after” to “visually see what the differences would be,” he could not explain what
5 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
6 when shown a rendering of a two-lane road going down to one-lane in the After condition
7 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
8 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
9 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
10 could explain the depiction of the same trees in the After condition nearly twice as tall as in
11 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
12 of the Examiner’s Recommendation: II.27 and IV.B.4.
13
14
15
16
17
18
19
20
21
22
23

24 41. Special assessment is not supported by comparable studies, data or reports.

25 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
26 that the LID Improvements will lead to meaningfully increased real estate values for
27 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
28 comparable sales or information from the “over twenty-five studies and reports” to arrive at
29 very precise special benefit increases for residential and commercial combined properties,
30 including Taxpayer’s property. For example, although Mr. Macaulay stated that no single
31
32
33
34
35
36
37
38
39
40

41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 report or study was directly on point due to the unique nature of the LID Improvements (*see*,
2
3 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
4
5 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
6
7 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;
8
9 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
10
11 for similarities and differences between these improvements and the comparable parks he
12
13 looked at).

14
15 42. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
16
17 assignment of incremental increase of 0.5% to 4% to property values within the LID.
18
19 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
20
21 research misinterprets his work in critical ways, including because the LID Improvements
22
23 manifest the characteristics of a parkway (not a park), and his research indicates that most of
24
25 a *park*’s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
26
27 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
28
29 related value increases are in fact smaller; that estimated increases are “best guesses” rather
30
31 than predictions of property value increases in a particular city; and that percentages do not
32
33 account for diminishing returns after taking into account water views, which would be the
34
35 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
36
37 topography grants most properties in downtown a water view.

38
39 43. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
40
41 that this was just one source of information that was not entirely relevant because, among
42
43 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
44
45 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
46
47 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-

1 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
2 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
3
4 Crompton concluded that 500 feet via road from “park” improvements is just one or two
5
6 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
7
8 significantly beyond that which the park study indicated (even if it was legitimate to use the
9
10 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
11
12 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
13
14 impact applicable to “community parks”—which the LID Improvements are not. *Id.*

15
16 44. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
17
18 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
19
20 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
21
22 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
23
24 materials, it was clearly an important—if not *the* most important—source of information for
25
26 estimating special benefits (especially with respect to the condos).⁷ No City witness
27
28 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
29
30 parcel-by-parcel analysis.
31

32
33 45. The destination parks discussed in the Final Special Benefit Study do not
34
35 provide reliable, comparable, and valid support for the calculation of special assessments
36
37 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
38
39 Study were funded by a LID. And in virtually all of those cases, the park improvements
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 dramatically restored unimproved or blighted areas, and properties evaluated were within
2
3 two or three blocks of the park.

4
5 46. ABS's claimed reliance on three economic studies to support property value
6 increase is also flawed. The HR&A study does not inform what value increases are
7
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9
10 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
11
12 dissimilar parks in other cities,⁸ making the methodological application to the LID
13
14 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
15
16 conclusion that there would be *no new net visitors* from downtown residents as a result of
17
18 the LID Improvements and could not explain how this impacted his condo analysis.
19
20 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
21
22 Property Values" primarily focused on whether the benefits accrue to the larger community
23
24 rather than properties adjacent to the park. And the 2014 New York City Department of
25
26 Transportation study is not based on real estate transactions and market sales and fails to
27
28 substantiate any link between increased retail sales and property values. Moreover, this
29
30 study only looked at impact either directly abutting the streetscape improvement, or a couple
31
32 hundred feet for plaza-like improvements.
33

34
35 47. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
36
37 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
38
39 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
40
41

42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
2 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
3 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
4 asked whether he considered that HR&A’s estimated LID impact is six times greater than
5 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
6 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
7 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
8 assumptions to account for this difference, which may be partly explained by the fact that
9 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
10 approximately 3.44% of King County tourists visit Seattle primarily because of the city
11 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
12 waterfront improvements.

13
14
15
16
17
18
19
20
21
22
23
24
25 48. Although proximity to the improvements is a key factor in all of these
26 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
27 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
28 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
29 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
30 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
31 Improvements is approximate 20 acres and it is not a community park.⁹

32
33
34
35
36
37
38
39 49. There is no explanation in the Final Study or the supporting materials of how
40 the studies or comparable sales were used to derive values for Taxpayer’s property. For
41

42
43
44
45 ⁹ *See*
46 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
2
3 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.

4
5 50. Failure to comply with USPAP. Taxpayer's assessment also rests on a
6
7 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
8
9 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
10
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12
13 Study does not meet mass appraisal standards nor allow for independent assessment of the
14
15 accuracy of Mr. Macauley's conclusions.

16
17 51. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
18
19 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
20
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22
23 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
24
25 testimony suggests that he incorrectly believed that the only difference between direct
26
27 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
28
29 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
30
31 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
32
33 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
34
35 Gordon uses in doing his limited restricted report").

36
37 52. But the difference is not only in reporting—mass appraisal techniques must
38
39 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
40
41 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
42
43 parcel approach:

44
45 The mass appraisal technique is an appraisal method used to evaluate
46
47 a group of properties that are subject to similar market forces as of a
certain date through the use of market data, statistical analysis and

1 testing. As a result, the mass appraisal technique does not require or
2 involve analysis of each individual property's specific data.
3

4 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
5
6

7 53. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
8 universe of properties as a given date using standard methodology, employing common data,
9 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
10 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
11 model" is "a mathematical expression of how supply and demand factors interact in a
12 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
13 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
14 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
15
16
17
18
19
20
21
22

23 54. Regardless of client direction, Mr. Macaulay is required to comply with
24 USPAP. So, if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have
25 been economically feasible because it would have taken "an incredible amount of time and
26 cost" (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an
27 appraisal consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8
28 ("performing an individual appraisal of each [condo] parcel would have been cost and time
29 prohibitive").
30
31
32
33
34
35
36

37 55. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
38 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
39 value, fails to calibrate the model structure to determine the contribution of the individual
40 characteristics affecting value, and does not review the mass appraisal results against actual
41
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2
3 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

4
5 56. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6
7 proximity to the elements, the increase in market rent, market vacancy changes,
8
9 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
10 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
11
12 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
13
14 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
15
16 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
17
18 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
19
20 were hypothetical, it was not possible to identify matched pair sales and no City witness
21
22 explained how ABS Valuation made adjustments to “comparable” sales in order to check
23
24 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
25
26 him to explain his model structure.
27

28
29 57. For these reasons, Taxpayer appeals the following portions of the Examiner’s
30
31 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
32
33

34
35 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
36 relationship between characteristics that affect value, and to calibrate that model to specify how
37 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
38 21). The purpose is to rationally determine what characteristics will create value, and by how much.
39 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
40 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
41 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
42 against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
43 include explanation of the model specification, data requirements, calibration methods, and
44 mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
45 (o). Without this reporting, it is impossible for users of the appraisal report to determine how the
46 appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
47 Hrg. Tr. at 206:15-207:17.

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner's denial of that motion.
4

5 58. Finally, Taxpayer's property is not appurtenant to any proposed
6 improvements. *See Hasit*, 179 Wn. App. at 947 ("the burden of proving special benefit"
7 shifted to the City because the protestors' parcels merely stood "in close proximity to the
8 property on which expert testimony was given"). As described above, the special
9 assessment is overstated because the Final Study makes no attempt to determine general
10 benefits, existing amenities for Taxpayer's specific property, or special detriments. In
11 addition, it is speculative due to the fact that, as of October 2019, improvements were not in
12 in place—and, in fact, much of the waterfront is a construction zone following removal of
13 the viaduct and now Pier 58 demolition. Under these circumstances, rather than relying on
14 entirely imaginary income and shaky hypotheticals, Mr. Macaulay at the very least should
15 have discounted the special benefit estimates or waited to perform the Study until the
16 improvements were at least close to complete.
17
18
19
20
21
22
23
24
25
26
27

28 **Erroneous Pre-Improvement Valuation**

29
30 59. The proposed final assessment erroneously overstates the pre-improvement
31 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
32 benefit to the Taxpayer's property.
33
34
35

36 60. The City's Final Study was used to compute the proposed final assessment of
37 Harbor Steps' property. The City's Study purportedly uses data from the King County
38 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
39
40
41
42
43
44

45 ¹¹ *See, e.g.*, Final Special Benefit Study, "All Other LID Commercial Properties" Spreadsheet
46 (providing a "County Link" to the King County Department of Assessment's online "eReal
47 Property" search tool).

1 Study does not accurately reflect this data. For example, the City's Study values Harbor
2 Steps' property at \$77,938,000 as of October 1, 2019. However, the King County assessor
3 determined the true and fair value of the property to be \$70,549,000, valued in 2019 for tax
4 year 2020. In other words, the Final Special Benefit Study's valuation is 110.5% of King
5 County's assessed value. The Final Special Benefit Study does not explain this difference—
6 or any differences—between its pre-improvement valuation and its supposed source for
7 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
8 Recommendation.
9

10
11
12
13
14
15
16
17 61. Further, the City's analysis was based on unreliable market data. The ABS
18 appraisal overstated the combined total before market value for all four Harbor Steps'
19 parcels by about \$88 million. B. O'Connor's Jan. 31, 2020 Report (attached to Appeal
20 Petition), Ex. 6. Based on our expert appraiser's appraisal review, the true and fair value of
21 the property here as of October 1, 2019 was \$55,938,000. *Id.* (Assuming equal value
22 between all parcels).
23
24
25
26
27

28
29 62. Thus, aside from multiple other reasons why computation of the special
30 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
31 improvement values that do not accurately reflect market data. For these reasons, Taxpayer
32 appeals the following portions of the Examiner's Recommendation: Sections II.13, II.14,
33 and II.15.
34
35
36
37
38

39 **Erroneous Computation of Special Benefit**

40
41 63. "Special benefit" is "the increase in fair market value attributable to the local
42 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
43 may receive by reason of the improvement is not measured alone by the physical character
44 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
45
46
47

1 of Seattle, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
2 the particular tract or property benefited by the entire improvement, and is it assessed
3 proportionately with the other property included within the assessment district?” *Id.* 165–
4
5
6
7 66.

8
9 64. The proposed final assessment erroneously overstates the special benefit of
10 LID improvements in a number of ways.

11
12 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
13 the Harbor Steps, Mr. Macaulay assumed room/rental rates would increase by 2.50% (low)
14 and 3.25% (high) due to the 2024 LID Improvements. Mr. Macaulay then uses these same
15 percentages (2.50% and 3.25%) to increase retail and parking. He then uses this
16
17 hypothesized increased revenue to calculate a new net operating income for the commercial
18 properties and capitalizes that to come up with an “After” valuation.

19
20 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
21 operating income remains the same as in the hypothetical “Before” condition but changes
22 the cap rate. For the Harbor Steps, the cap rate goes from 4.10% to 3.97% (low scenario,
23 creating a bigger value increase) and 4.00% (high scenario, creating a lower value increase).

24
25 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
26 benefit conclusion. For the Harbor Steps, this is an increase in property value of 2.75% due
27 to the LID Improvements.

28
29 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
30 and capitalization rates. When asked precisely what the basis is for his special benefit
31 percentage increases to revenue for each commercial property, he could not point to
32 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
33 is nothing in the report to allow a reader to understand how he came up with these
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
2
3 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
4
5 the basis for his belief that certain factors—liked increased connectivity—will increase
6
7 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
8
9 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
10
11 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
12
13 sources equally even though there was no separate analysis done for food and beverage or
14
15 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
16
17 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
18
19 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
20
21 properties.

22
23 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
24
25 check for commercial properties. But as explained above, no City witness has explained
26
27 how anyone, or all, of the sales are comparable to any particular commercial property within
28
29 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
30
31 in order to make sales “comparable,” he would have had to make adjustments to account for
32
33 Before and After conditions, but there is no way to understand how adjustments were made
34
35 because he “didn’t do a separate sales comparison approach where we showed adjustments
36
37 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
38
39 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
40
41 *Id.* at 127:10-128:24.

42
43 70. It also bears noting that any “internal review” of the special benefit estimates
44
45 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
46
47 error. Indeed, given all the same information, he seemed to suggest that it would be

1 perfectly reasonable for another experienced appraiser to come up with special benefit
2 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
3
4 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
5 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
6
7 margin of error conflicts with the testimony of Taxpayer's experts and reaffirms that there
8
9 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
10
11 margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there are still
12
13 reasonable and unreasonable variations within the appraisal field. *See Examiner's*
14
15 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
16
17 special because it is arbitrarily assigned; and it is too small to realistically be supported by
18
19 appraisal techniques.
20
21

22 71. No evidence of special benefit. Meanwhile, there is "no actual evidence from
23 any seller or purchaser that the price was higher because of the LID improvements."
24
25 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
26 identified any seller or buyer, or any particular property where the existence of the LID
27 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Taxpayer has
28 explained that the property has not increased rental rates or revenue due to the forthcoming
29 LID Improvements, because, among other reasons (and apart from COVID), the
30 improvements ABS believes will generate value do not exist and will not for a number of
31 years to come. There are no comparable sales because the LID Improvements are not in
32 place, nor will they be until the end of 2024 if completed on schedule.
33
34

35 72. The fair market value of Harbor Steps' property has not changed due to
36 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
37 benefited from installation of new water main and fire hydrant where it was already
38
39
40
41
42
43
44
45
46
47

1 adequately supplied with water and afforded adequate fire protection). And in any event, any
2 value attributable to removal of the viaduct was to be excluded from the assessment
3 calculation.
4

5
6 73. There is no special benefit to the Harbor Steps because its apartment demand
7 is driven by proximity to downtown job centers. In fact, the LID improvements diminish the
8 value of Harbor Steps' property by drawing visitors away towards improvements that do not
9 abut the property and increasing competition in other areas of the city. *See Kuskys*, 85 Wn.
10 App. 493 (testimony of owners' expert that LID actually diminished value of property was
11 sufficient to rebut presumption that assessment was proper). The ground floor retail tenants
12 will be harmed by the LID improvements because the Overlook Walk and Union Street
13 connection improvements will likely direct foot traffic away from the Harbor Steps and
14 towards Pike Place Market. Less demand for Harbor Steps' retail businesses will result in
15 lower rents and less revenue. Mr. Macaulay did not account for any of these impacts. Harbor
16 Steps already has a high-quality connectivity to the waterfront and no data was presented to
17 justify a value lift based on additional connection points several blocks away. On cross-
18 examination, Mr. Macaulay could not point to any specific data in the ABS Special Benefit
19 Study justifying the precise special benefit to Harbor Steps, claiming only that the market
20 would generally support additional connection points to the waterfront amenities. *See*
21 6/23/2020 Hrg. Tr. at 48-50.
22

23 74. Moreover, the assessment formula is an attempt to distribute costs that do not
24 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
25 "merely a mathematical model that distributes costs").
26

27 75. The Special Benefit Study fails to address whether the \$346,000,000
28 estimated LID project cost takes into account the investment that would have occurred in the
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
2 invested. This is a critical component of estimating which properties receive a direct benefit
3 from the improvements, versus more incidental benefits further from the park.
4

5
6 76. Mr. Macaulay also included personal property in his valuation of hotels even
7 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
8 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
9 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
10 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
11 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
12 receiving a disproportionately high LID assessment in comparison to other property types,
13 since hotels were the only property type subject to personal property LID assessments.
14
15 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
16 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
17 notice procedures because hotel property owners only received notice that their real estate
18 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).
19
20

21 77. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
22 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
23 a television at the waterfront Marriott is assigned a greater special benefit than the same
24 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
25 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
26 unreasonable to assign a value lift to personal property that is replaceable at the same cost
27 and may be obsolete before the LID improvements are even completed. Further, personal
28 property is highly depreciable, and likely to be fully depreciated or potentially discarded by
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 2024. *Id.*; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must
2
3 be redone to correct for this error.

4
5 78. The proposed final assessment substantially exceeds the special benefit to the
6
7 property and is grossly disproportionate to similarly situated properties within the LID. For
8
9 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
10
11 Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).

12 **State Environmental Policy Act and Other Environmental Permitting**

13
14
15 79. While this appeal is not challenging the City's environmental review and
16
17 permitting processes, those processes are relevant in determining the legality of the
18
19 assessments, and to assessing the delivery risk, the present value of the City's plans, and
20
21 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
22
23 pursue projects that have not yet undergone environmental review (thus limiting the choice
24
25 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
26
27 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
28
29 is just beginning. Further, the City has segmented environmental review, and still has a
30
31 gauntlet of federal, state and tribal review processes to complete before it will be clear what
32
33 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
34
35 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
36
37 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
38
39 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
40
41 committing to reconstruction of Pier 58 and major street improvements without
42
43 environmental review, or the City's Final Special Study has improperly included and is
44
45 proposing to assess the Taxpayer the costs and special benefits of improvements that may
46
47 not get built. Either way, it is faulty process.

Due Process Rights

80. The City's failed to notify Harbor Steps sufficiently in advance of the hearing to allow Harbor Steps to obtain evidence and prepare to properly challenge the assessments. Because LID assessments involve a deprivation of property, affected owners have the right to a hearing as to whether the improvement resulted (or will result) in special benefits to their properties and whether their assessments are proportionate, which necessarily includes the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d 555, 569–70, 229 P.3d 761 (2010).

81. The LID statute specifies that cities must mail notices giving the time and place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at 956. The key inquiry is whether the owner had sufficient time to gather evidence (and secure their own appraisal), evaluate proportionality of the proposed assessments, and whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient for anybody to get an appraisal”).

82. The City’s Notice of Assessment was sent on December 30, 2019. And the Final Special Benefit Study has only been available for public review since January 7, 2020. Due to this short time frame, Harbor Steps requested a prehearing conference and scheduling order that would preserve and protect Harbor Steps’ right to analyze and respond to the Final Study, obtain expert appraisal testimony, conduct depositions, and to accommodate preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City’s assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner

1 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
2
3 the Examiner's Recommendation: I.B.
4

5 **VII. Relief Requested**
6

7 Harbor Steps respectfully requests that the City Council:
8

- 9 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection
10 and:
11
12 a. Cancel the Waterfront Local Improvement District No. 6751 proposed
13 final assessment dated December 20, 2019; or
14
15 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
16 proposed final assessment to \$0 (zero), or such amount as Taxpayer
17 establishes at the hearing in this matter; or
18
19 c. Remand the matter to the Hearing Examiner or City appraiser to
20 recalculate and reduce Taxpayer's assessment using recognized
21 appraisal techniques consistent with USPAP and:
22
23 i. Excluding any property value increase attributable to viaduct
24 removal and other planned WSDOT Improvements;
25
26 ii. Taking into account the effects of COVID-19 pandemic on the
27 value of Taxpayers property and other relevant developments
28 since October 2019;
29
30 iii. Accounting for and excluding (1) any special benefits from
31 existing or planning improvements that already provide
32 similar benefits to Taxpayers property, and (2) any special
33 detriments from construction and other anticipated LID-
34 related disamenities;
35

23 **III. Statement of Eqr-Harbor Steps LLC's Interest and Incorporation of Prior**
24 **Arguments**

25
26 EQR-HARBOR STEPS LLC owns the property that is subject to the proposed final
27
28 assessment described in Section IV.
29

30 Eqr-Harbor Steps LLC is amending its appeal as authorized in City of Seattle
31
32 Resolution 31979 to include additional arguments relevant to the revised Final
33
34 Recommendations of the Hearing Examiner issued on February 1, 2021. On February 4,
35
36 2020, Eqr-Harbor Steps LLC timely filed an objection to the assessment, which was based
37
38 on the Final Study. Eqr-Harbor Steps LLC further timely filed an appeal of the Hearing
39
40 Examiner's 2020 recommendations to the City Council. Eqr-Harbor Steps LLC maintains
41
42 and incorporates all objections and arguments raised in its appeal filed with the City Clerk
43
44 on September 22, 2020. This amendment is a supplement is to be read together with Eqr-
45
46 Harbor Steps LLC's appeal filed on September 22, 2020. Eqr-Harbor Steps LLC
47

1 incorporates by reference all filings, evidence, and pleadings filed by any party before the
2
3 Hearing Examiner as authorized by the Hearing Examiner, including without limitation all
4
5 records pertaining to the November 2020 through February 2021 remand hearing ordered by
6
7 Council.
8

9 **IV. Amended Arguments on Appeal**

10 EQR-HARBOR STEPS LLC supplements its appeal of the Hearing Examiner's
11
12 recommendation to deny Eqr-Harbor Steps LLC's objection to the City of Seattle's
13
14 Waterfront Local Improvement District No. 6751 proposed final assessment dated
15
16 December 30, 2019 against the following property:
17

18 King County Parcel No. 1976200070
19 Site Address: 1306 Western Ave., Seattle, Washington
20 Proposed Final LID Assessment for Parcel: \$839,674.55
21
22

23 To avoid repetition, Eqr-Harbor Steps LLC incorporates the evidence and arguments
24
25 raised before the Hearing Examiner and before the City in its September 22, 2020 appeal,
26
27 into this amended appeal.
28

29 **A. The Anticipated Special Benefits to Eqr-Harbor Steps LLC's Property**
30 **should be Discounted to Present Value and Assessments Adjusted as**
31 **Appropriate**
32

33 On remand, the City's appraiser acknowledged that special benefits to parcels can be
34
35 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
36
37 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
38
39 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
40
41 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
42
43 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
44
45 accepted that recommendation. The City's appraiser further acknowledged that benefit
46
47 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined

1 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
2 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
3 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
4 calculations to present value because the general benefits are not anticipated from the LID
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
7 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
8 benefit calculation, and related assessments, to account for the delay between the assessment
9 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
10 standard appraisal practice, and renders the other proposed Waterfront LID special
11 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
12 “fundamentally wrong methods.”
13
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
18 Additionally, the assessments may not materially exceed the actual special benefit conferred
19 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
20 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
21 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
22 discount benefits the City estimated would accrue to the properties from improvements to be
23 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
24 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
25 property while treating all or most others (including Taxpayer’s) differently, and
26 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
2 for some properties because the benefits are too distant, while assessing other properties as
3 though distant benefits have already been secured. As Taxpayer identified in its September
4 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
7 reject the improper calculation of the benefit or remand and require the appraiser to discount
8 the benefits to net present value.
9

10
11
12
13
14
15
16
17 **B. The City's Appraiser's Disregard of Data on Remand is Another**
18 **Example of How His Analysis is Unreliable, Not Admissible under Frye**
19 **or ER 702, and His Proposed Special Assessments are not based on**
20 **Actual, Measurable and Special Value Increases from the anticipated**
21 **LID Improvements.**
22

23 The City's appraiser was provided actual performance data for the remanded hotels,
24 including their average daily room rates, from which he had been instructed to "recalculate"
25 hotel "before" values on remand. *See* Hearing Examiner Initial Recommendation at p. 117
26 (Sept. 8, 2020). The appraiser refused, explaining that, had he done so, his before values
27 would be "too low." His remand analysis demonstrates that his whole "income approach to
28 valuation", used for both hotels and other commercial properties, like Taxpayer's, is
29 contrived speculation on speculation. The City's appraiser disregarded these hotels' actual
30 net income in a supposed "income analysis." *See e.g.*, Deposition of Robert J. Macaulay,
31 7:10-13 (December 22, 2020) (Attached as Exhibit A to Objector's Statement on Remand
32 for Case Nos. CWF-0318, 0413, 0415, 0417, 0418, 0423, 0429, 0436).
33
34
35
36
37
38
39
40
41

42 Taxpayer's appraiser submitted an appraisal which was similarly realistic and
43 specific to the property but was disregarded. Taxpayer's appraiser demonstrated the actual
44 value of the property is \$55,938,000, and the LID assessment should be reduced to reflect
45
46
47

1 this before-value. *See* CWF-0425 Statement of Objections, Exh. 6, Appraisal of Brian
2
3 O'Connor (Jan. 31, 2020).

4
5 **C. In Light of Covid's Continuing Impact on Eqr-Harbor Steps LLC and**
6 **other Downtown Property Owners and other Material Changes Since**
7 **October 2019, the LID Should be Cancelled, or at Least Assessments**
8 **Recalculated, to take Into Account Property Value Reductions**
9

10 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
11 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
12 other relevant developments since October 2019." When Washington's first COVID
13 restrictions were imposed in March and April 2020, there was an assumption that they
14 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
15 II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover
16 for another 5 years. Retail stores are boarded up. Homelessness and related challenges have
17 gotten much worse. The City has already imposed higher minimum wages and taxes on
18 businesses to try to fund recovery. The West Seattle Bridge and other bridges are in
19 immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park
20 hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several
21 years from completion, as a best case. In current circumstances, a downtown tax to fund
22 new, non-essential park improvements against financially strapped taxpayers, and likely
23 passed through to financially strapped tenants and customers would be unfair to taxpayers
24 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
25 rethinks its budget priorities for the next few years, and its potentially funding sources,
26 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
27 property owners) have a chance to recover, and that any assessment take into account the
28 changed circumstances since this appeal process started on February 4, 2020 to avoid
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

unnecessarily and perhaps permanently killing downtown properties and businesses in the name of bettering them.

V. Relief Requested

Particularly in light of the Committee's decision not to take further comment, Eqr-Harbor Steps LLC respectfully request that each Committee member carefully review the record transmitted to Council before voting on our appeal.

EQR-HARBOR STEPS LLC respectfully reiterates its request from the September 22, 2020 appeal that the City Council:

1. Cancel the Waterfront Local Improvement District No. 6751 proposed final assessment dated December 30, 2019; or
2. Revise Taxpayer's Waterfront Local Improvement District No. 6751 proposed final assessment to \$0 (zero), or such amount as Taxpayer establishes at the hearing in this matter; or
3. Grant the Examiner's recommended remand but with instructions to recalculate and reduce Taxpayer's assessment using recognized appraisal techniques consistent with USPAP and
 - a. Excluding any property value increase attributable to viaduct removal and other planned WSDOT Improvements;
 - b. Taking into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and other relevant developments since October 2019;
 - c. Accounting for and excluding (1) any special benefits from existing or planned improvements that already provide similar benefits to

1 Taxpayer's property, and (2) any special detriments from construction
2 and other anticipated LID-related disamenities;
3

4
5 d. Accounting for and including only those actual benefits anticipated to
6 accrue to Taxpayer's property based on its location relative to Pier 58,
7 Overlook Walk, and the Promenade, and specific elements of the LID
8 Improvements;
9

10
11
12 e. Discounting anticipated special benefits to present value, based on
13 reliable estimates regarding when special benefits will start accruing
14 following completion of the LID Improvements; and
15

16
17 f. Accounting for such other issues specific to Taxpayer's property
18 relevant to calculation of such assessment; and
19

20
21
22 4. Grant such further relief as the City Council deems just and proper.

BEFORE THE HEARING EXAMINER
CITY OF SEATTLE

In re Proposed Final Assessment Roll for
Local Improvement District No. 6751
("Waterfront LID")

Case Nos. CWF-0425, 0426, 0427, 0440, AND
0441

DECLARATION OF ED LEIGH

I, Ed Leigh, declare as follows:

1. I have personal knowledge of the facts stated below and am competent to testify regarding the same.
2. I am the Vice President of Investments for Equity Residential. I testified in this appeal as to my position, qualifications and employment history.
3. Eqr-Harbor Steps LLC is owned by Equity Residential. Eqr-Harbor Steps LLC owns a four-tower apartment complex encompassing parcel nos. 1976200070, 1976200075, 1976200076, and 7666202465. These parcels are located at 1306 Western Ave., 1301 1st Ave., 1201 1st Ave., and 1212 Western Ave., Seattle WA, and are the subject

DECLARATION OF ED LEIGH – 1

1 of case nos. CWF-0425, -0426, -0427, -0440. These properties are known as the "Harbor
2 Steps" apartment towers.
3

4 4. Eqr-Second & Pine LLC is also owned by Equity Residential, and owns real
5 property parcel no. 7683890010, which is located at 206 Pine St., Seattle WA, and is the
6 subject of case no. CWF-0441. This property is known as the Helios apartments.
7
8

9 5. Equity Residential appealed the City's proposed final assessment for
10 Waterfront LID No. 6751 for each of the properties described above.
11
12

13 **HARBOR STEPS (CWF-0425, -0426, -0427, -0440)**
14

15 6. The Harbor Steps are multifamily residential apartment buildings with
16 ground floor retail. Additionally, the Harbor Steps are on a pedestrian corridor connecting
17 the downtown retail core to the waterfront amenities.
18
19

20 **HELIOS (CWF-0441)**
21

22 7. Helios is a multifamily residential apartment building located a block east of
23 Pike Place Market, and approximately two blocks from the proposed overlook walk.
24
25

26 **COVID-19 Calculations**
27

28 8. After we appealed our assessments, the Covid-19 pandemic broke out,
29 causing significant disruptions in Seattle and around the world. Based on our current rents,
30 compared with Brian O'Connor's appraisal calculations to support our appeals, our
31 properties have decreased in value in the range consistent with those described by John
32 Gordon. In Mr. Gordon's April 21, 2020 Declaration, he noted that property values for
33 hotels in Downtown Seattle would be at least 10% to 15% lower when compared with the
34 values as of October 2019 and January 2020. The same is true for our properties. The year-
35 over-year rent reductions that I have observed in our Downtown Seattle assets are consistent
36 with Mr. Gordon's valuation reduction, assuming that rents do not quickly rebound. We

25 Facsimile: 206.359.9000
26
27

28 **III. Statement of Taxpayer's Interest**
29

30 Harbor Steps owns the property that is subject to the proposed final assessment
31 described in Section IV. The property at issue is a multifamily residential apartment building
32 with ground floor retail. Additionally, there is a pedestrian corridor connecting the
33 downtown retail core to the waterfront amenities.
34
35

36 The basis of the proposed assessment is a Final Special Benefit/Proportionate
37 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
38 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
39 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
40 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
41
42
43
44
45
46
47

1 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
2
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4
5 to exclude charges for other improvement projects in the Central Waterfront, and
6
7 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
8
9 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
10
11 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
12
13 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
14
15 because construction was not complete on the LID Improvements or the WSDOT
16
17 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
18
19 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
20
21 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
22
23 was based on the Final Study.
24

25 **IV. Matter Under Appeal**

26 Harbor Steps appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
27
28 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
29
30 final assessment dated December 30, 2019 against the following property:
31

32
33 King County Parcel No. 1976200075
34 Site Address: 1301 1st Ave., Seattle, Washington
35 Proposed Final LID Assessment for Parcel: \$1,376,078.86
36

37 See Examiner’s Recommendation at 61-62, 105. To avoid repetition, Harbor Steps
38
39 incorporates the evidence and arguments raised before the Hearing Examiner into this
40
41 appeal. In particular, Harbor Steps points the City Council to Taxpayer’s initial Appeal
42
43 Petition, *Frye* motion, Closing Brief submitted at the close of its case-in-chief (dated
44
45
46
47

1 4/16/2020), and supplemental Closing Statement submitted at the close of the City's case-in-
2 chief (dated 7/7/2020).¹
3

4 As discussed more fully below, Taxpayer specifically appeals the following Findings
5 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
6
7 Pages 61-62, 105, Sections II.6, II.7, II.13, II.14, II.15, II.18, II.19, II.20, II.21, II.22, II.23,
8 II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3,
9 IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
10 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.7, IV.C.8, IV.C.9,
11 IV.C.11, IV.C.12, IV.C.14, IV.C.18
12
13
14
15
16
17

18 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
19 recommendations on material issues raised during Taxpayer's appeal that were supported by
20 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
21 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23 recommended anything other than denial of objectors' appeals were where the City's
24 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
25 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
26 special assessments based on "fundamentally wrong methods."
27
28
29
30
31
32
33
34
35
36
37
38
39

40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. *See* SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29
30

31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$3,512,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City's appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and
5 the City's preliminary roll. On the contrary, the City's assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS's appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City's appraiser asserts that the City is not collecting assessments "based
16 on the value of WSDOT's planned improvements." See Final Study at 3. However, the
17 City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition,
18 the City's appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City's promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT's planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City's appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be "physical and material and not merely speculative
35 or conjectural"
36

37
38 **ABS Study:** Not only are the improvements not yet "physical or material," but
39 environmental review and permitting for the City's proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City's then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual" and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
2 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
3 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
4 Final Study fails to meet basic standards for admissibility and must be remanded.
5
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6 **V. Standard of Review**

7
8 “When considering the assessment roll, the city council sits ‘as a board of
9 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
10 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
11 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
12 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
13
14

15 The proposed assessments are presumed correct, “unless overcome by clear, cogent
16 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
17 than the heightened presumption of correctness on judicial appeal because “applying these
18 elevated standards at the municipal hearing would afford unwarranted deference to a report
19 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
20 presumption is not evidence and its efficacy is lost when the other party adduces credible
21 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
22 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
23 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
24 presented credible evidence showing that the City’s proposed assessment is arbitrary,
25 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
26 to the City to prove the assessments are actual, measurable, special, non-speculative and
27 proportionate. The City failed that burden.
28

43
44
45
46
47

1 **VI. Grounds for Appeal**

2 Harbor Steps appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
12 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020); Decl. of Brian O'Connor ISO Closing
13 Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained: "[W]e have explicitly
14 rejected an argument that, because certain protestors 'failed to offer expert testimony at the
15 city council hearing[,] the presumptions [in favor of the assessment] were still operative as
16 to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian Trail Trunk Sewer*, 35
17 Wn. App. at 843); *see also Kuskys v. City of Goldendale*, 85 Wn. App. 493, 933 P.2d 430
18 (1997) (although appraiser did not submit an appraisal, he provided expert opinion showing
19 that improvements actually diminished value of the property). In fact, no independent
20 evidence is required at all if, for example, objectors show that the assessment was grounded
21 on a fundamentally wrong basis due to an error in the City's appraiser's methods—as is the
22 case here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88,
23 106, 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out
24 that the square footage assumed in the City's appraisal was incorrect.
25

26
27 2. On March 5, 2020, Harbor Steps presented testimony from experts Ben Scott
28 and Brian O'Connor. The Hearing Examiner failed to meaningfully respond either the expert
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 testimony or the expert appraisal reviews. Instead, the Hearing Examiner simply dismissed
2 Harbor Steps' expert evidence as insufficient appraisal evidence. *See* Examiner's
3 Recommendation at IV. C.7–9. This is contrary to law.
4

5
6 3. For these reasons, Taxpayer appeals the following portions of the Examiner's
7 Recommendation: Sections II.13, II.14, II.15, IV.A, IV.B.11(a), IV.C.7, IV.C.8, IV.C.9, and
8 IV.C.11.
9
10

11
12
13 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**
14

15 4. RCW 35.43.040 provides cities and towns authority for ordering local
16 improvements and for levying and collecting special assessments “on property specially
17 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed upon
18 all the property in accordance with the special benefits conferred thereon.” RCW 35.44.010.
19
20

21 5. No analysis of general benefits. Special assessments have been “held valid
22 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
23 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
24 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
25 they are for the construction of local improvements that are appurtenant to specific land and
26 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
27
28

29 6. Harbor Steps' property is not specially benefited by the LID Improvements.
30 The primary purpose and effect of the LID Improvements are to benefit “members of the
31 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
32 library is for the benefit of the members of the whole community individually and
33 collectively who may be served by it”). Mr. Macaulay's own chapter of the LID Manual
34 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
35
36
37
38
39
40
41
42
43
44
45
46
47

1 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
2 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
3 that if an appraiser “identifies both general and special benefits, these benefits should be
4 clearly distinguished and explained, and only special benefits should be included in the
5 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
6 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/5/2020 (B. O’Connor) Hrg. Tr. at 158:13-
7 159:8, 192:8-193:2. It is undisputed that Mr. Macaulay did not analyze or measure general
8 benefits, including those arising from construction necessary to meet basic design standards.
9 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
10 construction costs related to meeting design standards which may be general benefits as
11 distinct from construction costs emanating from requirements of the LID project”). To the
12 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
13 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
14 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
15 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.

16
17
18
19
20
21
22
23
24
25
26
27
28
29
30
31 7. LID Improvements not necessary. Unlike typical LID projects, the
32 Waterfront LID improvements are largely unnecessary to the functionality of any particular
33 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
34 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
35 held invalid where owners would have benefitted equally from increase of only 9 feet);
36
37
38
39
40
41

42
43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
2 intersection for new water main for hydrant held invalid because land was already afforded
3 functional hydrant at nearby street). Here, Taxpayer testified that the LID Improvements are
4 not necessary to the business of their income-producing properties, all of which already have
5 sufficient access to the waterfront, downtown restaurants, and other amenities necessary for
6 their tenants and clients. And for residential properties, like Harbor Steps, the assumption
7 that an increase in tourism will cause lifts in property value is both anecdotally and
8 empirically unsupported. Additionally, the construction of new access points is in fact a
9 negative point for the Harbor Steps, which are located at an existing connection between the
10 downtown core and the waterfront. The LID improvements will draw foot traffic away from
11 the Harbor Steps, increasing competition in other areas of the city. The fact that there is no
12 case law differentiating between binary improvements and parks does not change the law
13 prohibiting assessments on properties already adequately served by existing amenities. *See*
14 Examiner's Recommendation at IV.C.3 (reasoning that "no case law is provided to support
15 the differentiation between a hardscape benefit and the more ephemeral benefits of park").
16 Nor does the Examiner's reasoning excuse the City's failure to account for existing
17 amenities as part of the special benefit calculation. As Dr. Crompton testified, existing view
18 amenities may in fact diminish the incremental effect of new park improvements on the
19 value of properties, much like turning on a weak light in an already brightly illuminated
20 room. *See* Hrg. Exhibit 94 (Crompton's Report) at 12-13.

21
22
23
24
25

30
31
32
33
34
35
36
37
38
39
40
41 8. To the extent benefits can be considered "special" as opposed to general, they
42 are nominal or nonexistent for many properties even in the Central Waterfront, which
43 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
44 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
45
46
47

1 change due to expansion of sewer service *near* owners' parcel which were already
2 connected). Here, the primary reasons a user chooses a particular apartment is not proximity
3 to the waterfront. Instead, the reason residents choose to live in the Harbor Steps apartments
4 is proximity to their places of employment and other amenities downtown. See 3/5/2020 (E.
5 Leigh0 Hrg. Tr at 113:13-114:20; 124:3-126:9. For example, without any supporting written
6 analysis, Mr. Macaulay offhandedly concludes that the Harbor Steps apartments would
7 benefit from increased connectivity from being four to five blocks from the Overlook Walk
8 even though the properties currently have direct access to the waterfront via the Harbor
9 Steps. 6/23/2020 Hrg. Tr. At 48:1-50:25; see also B. Scott Decl., ¶ 7. Mr. Leigh testified that
10 he did not anticipate a benefit, and that the Harbor Steps retail component would suffer if a
11 measurable portion of waterfront-bound pedestrian traffic moved north to the market. See
12 also B. Scott Decl., ¶ 6 (describing failure to analyze how existing retail is harmed by foot
13 traffic being pulled away towards new amenities). Even if the City could assess for a view
14 change (and it has promised not to assess for viaduct removal), the fair market value of
15 Harbor Steps' property has not changed because the LID Improvements have not improved
16 the property's waterfront view or access to the waterfront, nor will they when the City
17 anticipates completion in 2024. For these reasons, Taxpayer appeals the following portions
18 of the Examiner's Recommendation: Sections IV.C.3, IV.B.9, and IV.C.3.

19
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37 9. No analysis of special detriments. The Final Study fails to properly account
38 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
39 owners for removal and cleanup of underground storage tanks discovered during the
40 improvement project). The Property owner representative for Harbor Steps, Ed Leigh,
41 testified that property values may in fact be negatively impacted by the LID Improvements
42 due to loss of parking, increased traffic and noise, and increased potential for crime,
43
44
45
46
47

1 homelessness and sanitation issues. Mr. Leigh testified that the assessment is an immediate
2 expense for Harbor Steps that comes with no immediate increase in revenue, thereby
3 decreasing property values. See 3/5/2020 (E. Leigh) Hrg. Tr. at 126:10-129:9; 227:8-229:10.
4
5 And Harbor Steps does not expect near term the increases assumed in ABS Valuations'
6
7 spreadsheets or the Final Study. Although Mr. Macaulay claims he analyzed impacts on the
8
9 City's planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no
10
11 explanation of how lost parking might be a detriment, and no property-specific parking
12
13 analysis in any of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.
14
15

16
17 10. Likewise, there was no analysis of the risks associated with disamenities such
18
19 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
20
21 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
22
23 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
24
25 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
26
27 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
28
29 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
30
31 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
32
33 the maintenance agreement. *Id.* at 13:4-14:2.
34

35 11. There was also no consideration of negative impacts from another four-plus
36
37 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
38
39 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
40
41 law allowing him to dismiss these actual, non-speculative impacts. Because future special
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 benefits calculations are inherently speculative, Washington's eminent domain statute
2 specifically allows condemnees to postpone special benefits assessments until improvements
3 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
4

5
6 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
7 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
8 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
9 Greenway, the Greenway district "significantly" lagged in value). For these reasons,
10 Taxpayer appeals the following portions of the Examiner's Recommendation: Sections
11 II.25, IV.B.8, and IV.B.9.
12

13
14 12. Special benefit estimate is speculative. When calculating a special benefit,
15 "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at
16 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it
17 becomes pure speculation." *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324
18 P.2d 1078 (1958)).
19

20
21 13. Assuming without conceding that one day, the City's planned LID
22 Improvements might increase the value of neighboring properties to some extent, that
23 potential benefit is many years away and speculative. While appraisers tolerate some degree
24 of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is
25 far too speculative to satisfy industry practices and standards.
26

27
28 14. Although LIDs are sometimes finalized prior to completion of improvements,
29 this is typically just six month or a year prior, and the assessments are otherwise supported
30 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
31 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
32 will not be realized for four or five years. In the meantime, there is permitting risk,
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
2 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
3 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
4
5 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
6
7 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
8
9 testified: "I just don't know what the market value would be as of the date the project would
10
11 be finally constructed" because "[t]here could be a lot of elements in the market that did
12
13 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
14
15 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
16
17 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
18
19

20
21 15. The record is clear that while no one can know what "special benefit" might
22
23 accrue to these properties in four years (if any), we do know that there are no actual benefits
24
25 now. The LID improvements provide no immediate special benefit to property owners
26
27 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
28
29 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
30
31 sewer system for future users). For example, notwithstanding the questionable hypothesis
32
33 that apartments will benefit from an expected increase in tenant interest when the
34
35 improvements are complete, it is undisputed that tenants are not coming in larger numbers
36
37 and paying higher rental rates now because of something happening five years down the
38
39 road. See O'Connor Decl. ISO Closing Stmt., ¶ 7 (dated 7/7/2020) (no apartment leased
40
41 today for 18 months would rent at a higher rate due to improvements coming in 2024).
42

43 16. Further, there are no "plans and specifications" on file with the Clerk's Office
44
45 for the LID Improvements, and it is unlawful to move to final assessments without such
46
47 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*

1 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
2
3 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
4
5 dollars on projects still early in the design process. *See* Washington Attorney General
6
7 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
8
9 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
10
11 of programs and included “only so much of the overall costs” that took place within and
12
13 benefitted the assessed properties).

14
15 17. The COVID-19 crisis highlights how fundamentally speculative and unfair it
16
17 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
18
19 anticipated to be delivered five years later. Even before COVID, it was speculative to
20
21 assume that market highs experienced in October 2019¹ would be sustained through 2024,
22
23 after an already extraordinarily long expansion period. *See, e.g.*, 3/5/2020 (E. Leigh) Hrg.
24
25 Tr. at 119:15-123:6; 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr.
26
27 Macaulay conceded: “[W]hen I was doing my analysis in October 2019, who would have
28
29 thought that this COVID issue would happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his
30
31 deposition in late February, his “thought process was that the market was going to continue
32
33 to go up,” but now, they are already irrelevant. *Id.*; *see* Gibbons Decl. ISO Closing Stmt. at ¶
34
35 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019
36
37 (*see* Examiner’s Recommendation at 109), the pandemic has impacted *current* values and
38
39 rendered the hypothetical October 2019 Final Study valuations outdated.

40
41 18. As another example of how future events could affect the accuracy and
42
43 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
44
45 Examiner re-open the record to allow the City to explain whether the assessments against
46
47 property owners within the LID are, in fact, being used by the City to fund the emergency

1 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
2 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
3 would be improperly imposing costs on property owners within the LID for improvements
4 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
5 habitat and City infrastructure—this does not provide any special benefit to LID property
6 owners.
7
8
9
10
11

12 19. There is also no certainty the improvements will be delivered on time. Mr.
13 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
14 delay in construction schedule would not constitute a “material change” under the City
15 Council’s ordinance authorizing the improvements. In other words, the City cannot
16 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
17 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
18 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
19 potential delays and project changes inherent in those processes, that call into question the
20 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110

2 Decl., dated 4/15/2020).
3

4
5 20. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
6 he could not point to a single one where the assessment roll was finalized five years in
7 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
8 he has never recommended final special assessments based on designs less than 30 percent
9 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
10 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
11 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
12 at 66:17-25. He performed no independent due diligence to determine the reliability of the
13 City’s estimates for completion of the LID Improvements, or to ensure that proposed
14 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
15 agreed that if any of his assumptions are incorrect, his opinion of market value would need
16 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
17 68:11-18.
18
19
20
21
22
23
24
25
26
27
28
29

30 21. The City has cited no authority—and Taxpayer is aware of none—that
31 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
32 assess taxes for “actual” special benefits that will not accrue for another five years (if all
33 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
34 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
35 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
36 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
37 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
38 IV.C.14, and IV.C.18.
39
40
41
42
43
44
45
46
47

1 22. Failure to discount special benefit estimates to account for risks and present
2 value. Due to the inherent uncertainty, Taxpayer's expert opine that the Final Study should
3 have accounted for risks associated with delivery of the improvements (including permitting
4 risk, construction risk, general economic risk) and any special damages associated with
5 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
6 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
7 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
8 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) ("Appraisers routinely consider
9 the impact of future conditions [through] discounted cash flow analysis.").

10 23. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, "[y]ou would be discounting it back to a present value." *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.

22 24. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
23 present value, an appraiser would consider discount rates for land development to account
24 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at

1 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer to
2 the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
3
4 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
5

6 25. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
7 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
8 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
9 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
10 ignoring momentarily all of the other methodological and other flaws discussed here and in
11 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
12 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
13 exceeds special benefits when reduced to present value. Further, to the extent the City is
14 arguing that because they are permitted to assess 100% of the special benefit, the special
15 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
16 is again wrong. After applying proper discounting, the City's proposed special benefit
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18 100% of the total estimated special benefit.
19
20
21
22
23
24
25
26
27
28
29
30
31

32 26. But even the assumption that the LID improvements would deliver benefits
33 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
34 on. Rather, those studies demonstrate that a discount period of five years is conservative.
35 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
36 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
37 indicates that during the construction period, the Greenway district "significantly" lagged in
38 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
39 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
40
41
42
43
44
45
46
47

1 30-31 (discussing New York City High Line and San Francisco Embarcadero
2 improvements). Given the lengthy delay, any prediction of future special benefits is
3 speculative, especially during the construction phase where values are likely to decline. And
4 assuming the LID Improvements take a similarly long period of time after they are complete
5 to start producing tangible property value benefits, each additional year of delay results in
6 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
7 Closing Stmt., ¶ 19, Ex. A.
8

9
10 27. Applying the same discounting methods described above and in Mr. Gibbons
11 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
12 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
13 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
14 100% assessment should be no more than \$330,830.40. Anything more would permit the
15 City to assess Taxpayer based on a hypothetical assumption that these improvements are in
16 place and providing benefit, and ignore the risks, construction disamenity, and time value of
17 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
18 would counsel that the assessment should be only 39.2% of that assessment cap, or
19 \$129,685.52.
20

21
22 28. Attachment C includes two Excel spreadsheets applying these discounting
23 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
24 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
25 demonstrates that discounting the City's hypothetical October 2019 special benefits to
26 present value would reduce Taxpayer's assessment to \$472,115, exclusive of any other
27 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
28 reductions after taking into account (1) Taxpayer's exerts' estimated "Before" valued based
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
2
3 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
4
5 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
6
7 the time it takes for the improvements to capture property value.) After such reductions,
8
9 Taxpayer's assessment would be just \$341,853 (for the 5-year discount) or \$93,930 (for the
10
11 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
12
13 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
14
15 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
16
17 Taxpayer's discounting argument without legal or factual analysis; that failure is error.

18 **Appraisal and Assessment Calculation Methods Are Flawed**

19
20
21 29. The "general rule is that each lot, piece, or parcel of land should be assessed
22
23 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
24
25 Wn.2d at 97.

26
27 30. It is proper to sustain a challenge to an assessment, even without the appraisal
28
29 testimony from the owner, where the objector's expert establishes that the assessment was
30
31 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
32
33 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.

34
35 31. The City's appraiser purports to utilize the income method of valuation but
36
37 relied on inaccurate revenue and market data, as discussed further below.

38
39 32. The City's appraiser purports to utilize the comparable sales method of
40
41 valuation, but no City witness attempted "to characterize any one, or all of them, as
42
43 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
44
45 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
46
47 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to

1 characterize any one, or all of them, as comparable to any particular property within the LID”).
2
3 And no City witness could explain how specific adjustments were made to these sales to
4
5 account for value increases due to the hypothesized Before and After Improvements. For this
6
7 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
8

9 33. Special assessment improperly includes value lift from the Before
10 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
11
12 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
13
14 Improvements, which WSDOT had independently committed to fund. However, Mr.
15
16 Macauley did not calculate the actual market value of LID properties in October 2019 and
17
18 did not separately analyze the hypothetical increase to property values attributable to
19
20 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
21
22 current value and then separately calculate a hypothetical “With WSDOT” Before value);
23
24 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
25
26 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
27
28 3-4. Without any documented basis or support, Mr. Macauley simply “ma[de] a judgment a
29
30 call” on what occupancy and rates would have been for the commercial properties assuming
31
32 all of the WSDOT Improvements are completed as of 2019. Macauley Depo. at 129:19-
33
34 130:11. For example, Mr. Macauley surmised that Brian O’Connor’s conclusion that the
35
36 “Before” value for Harbor Steps was overstated by \$88M was perhaps due to the fact that
37
38 Mr. O’Connor was looking at current income numbers and not accounting for the value of
39
40 the “Before” conditions. However, when asked whether the value of the of the “Before”
41
42 conditions is lower or higher than \$88M, Mr. Macauley had no clue because he did not do
43
44 this analysis. 6/23/2020 Hrg. Tr. at 46:9-17:25. This outright omission precludes any
45
46 independent evaluation of the true market “Before” values. *See* 6/23/2020 Hrg. Tr. at 44:25-
47

1 45:9. It also fails to meet professional appraisal standards; if an appraiser uses current sales
2 data to infer values, then the appraiser must explain how he analyzed that data and other
3 information to come up with the hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at
4 128:1-130:4. This includes not just removal of the viaduct, but also other road, pedestrian
5 and landscaping improvements WSDOT had already committed to make.
6
7
8
9

10 34. However, because Mr. Macaulay testified that he did include some WSDOT-
11 related value-lift in the “Before” values, it follows that part of the special assessment
12 improperly is based on value attributable to the WSDOT Improvements. As shown by
13 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
14 percentage to Before values. So, for example, if Mr. Macaulay believed the WSDOT
15 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
16 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
17 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
18 to properly exclude the value of Before Improvements from the assessments. For these
19 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
20 Sections II.19, II.29, and IV.B.11(a)(ii)
21
22
23
24
25
26
27
28
29
30
31

32 35. Special benefits were assigned rather than measured. Mr. Macaulay
33 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
34 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/5/2020 (B.
35 O’Connor) Hrg. Tr. at 147:10-149:21; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-
36 91:13. Based on formulas in spreadsheets that Mr. Macaulay used to analyze the
37 commercial properties, Taxpayer’s experts concluded that Mr. Macaulay based adjustments
38 on hypothesized very small increases to property revenue and very small reductions to cap
39 rates to “calculate” an “After” value due to the coming 2024 LID Improvements.
40
41
42
43
44
45
46
47

1 Attachment B (ABS Spreadsheet). These series of micro adjustments were based on
2
3 “professional judgment” that are neither shown nor replicable.
4

5 36. For these reasons, Taxpayer appeals the following portions of the Examiner’s
6 Recommendation: Sections II.19 and IV.B.11(a)(iii).
7

8 37. Special benefit falls within margin of error. The Final Special Benefit Study
9 applies an estimated value enhancement of less than 4%, which is generally within the
10 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
11 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
12 Taxpayer’s experts explained that if two appraisers independently arrive at values within 5%
13 of one another, this difference is considered reasonable as it falls within the standard margin
14 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/5/2020 (B.
15 O’Connor) Hrg. Tr. 201:7-204:8. Because Mr. Macaulay’s micro-special benefit percentages
16 fall far below that 5% margin, “there is no way of authenticating” such incremental changes
17 because “[m]arket forces completely obliterate any tiny little noise factor like that.” *See*
18 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition
19 that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Additionally, the fact that
20 “Before” values are also based on a hypothetical that adds some unstated incremental value
21 to actual 2019 values exacerbates this issue—the ability for an appraiser to discern the
22 micro-value differences between hypothetical conditions that are so similar (the WSDOT
23 improvements compared to the LID improvements) “verges on being ludicrous.” 3/3/2020
24 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
25

26 38. Even if it were possible to accurately tease out such a miniscule hypothetical
27 value change due to improvements coming five years later, experts testified that there is no
28 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A Gibbons) Hrg. Tr. at
2
3 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
4
5 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
6
7 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.
8

9 39. No analysis of value increase attributable to individual components of the
10 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
11
12 percentage difference between hypothetical Before and After conditions. Throughout his
13
14 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
15
16 descriptions in the Addenda even though he testified that he relied on these to calculate
17
18 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
19
20 someone might be able to determine how he attributed value to After conditions described in
21
22 the Addenda, he answered that that was “not the scope of the assignment” because he was
23
24 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
25
26 that the six components were not actually a continuous project, that he was viewing them
27
28 together because the City asked him to, and that if he were to view them independently,
29
30 there was a low probability that properties in the north would specially benefit from
31
32 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.
33

34 40. Not only did he fail to analyze benefits from each of these non-contiguous
35
36 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
37
38 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
39
40 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
41
42 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
43
44 objectives that guided regulators’ assessment of architectural plans for buildings along a
45
46 “signature street” were so vague that they amounted to ad hoc review based on the
47

1 regulators' subjective impressions and feelings).⁶ It became clear through his testimony that
2 even though he used the renderings as "visual aid[s] in appraising the property in the before
3 and after" to "visually see what the differences would be," he could not explain what
4 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
5 when shown a rendering of a two-lane road going down to one-lane in the After condition
6 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
7 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
8 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
9 could explain the depiction of the same trees in the After condition nearly twice as tall as in
10 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
11 of the Examiner's Recommendation: II.27 and IV.B.4.
12
13
14
15
16
17
18
19
20
21

22 41. Special assessment is not supported by comparable studies, data or reports.
23

24 Mr. Macaulay's references to empirical research do not justify his fundamental assumption
25 that the LID Improvements will lead to meaningfully increased real estate values for
26 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
27 comparable sales or information from the "over twenty-five studies and reports" to arrive at
28 very precise special benefit increases for residential and commercial combined properties,
29 including Taxpayer's property. For example, although Mr. Macaulay stated that no single
30 report or study was directly on point due to the unique nature of the LID Improvements (*see*,
31
32
33
34
35
36
37
38
39

40
41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must "be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit." *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
2 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
3 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;
4
5 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
6
7 for similarities and differences between these improvements and the comparable parks he
8
9 looked at).
10

11
12 42. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
13 assignment of incremental increase of 0.5% to 4% to property values within the LID.
14
15 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
16
17 research misinterprets his work in critical ways, including because the LID Improvements
18
19 manifest the characteristics of a parkway (not a park), and his research indicates that most of
20
21 a *park*’s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
22
23 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
24
25 related value increases are in fact smaller; that estimated increases are “best guesses” rather
26
27 than predictions of property value increases in a particular city; and that percentages do not
28
29 account for diminishing returns after taking into account water views, which would be the
30
31 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
32
33 topography grants most properties in downtown a water view.
34
35

36
37 43. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
38
39 that this was just one source of information that was not entirely relevant because, among
40
41 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
42
43 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
44
45 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
46
47 180:2 (explaining that for purposes of “drawing boundaries around a park” he was

1 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
2
3 Crompton concluded that 500 feet via road from “park” improvements is just one or two
4
5 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
6
7 significantly beyond that which the park study indicated (even if it was legitimate to use the
8
9 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
10
11 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
12
13 impact applicable to “community parks”—which the LID Improvements are not. *Id.*

14
15 44. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
16
17 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
18
19 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
20
21 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
22
23 materials, it was clearly an important—if not *the* most important—source of information for
24
25 estimating special benefits (especially with respect to the condos).⁷ No City witness
26
27 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
28
29 parcel-by-parcel analysis.

30
31 45. The destination parks discussed in the Final Special Benefit Study do not
32
33 provide reliable, comparable, and valid support for the calculation of special assessments
34
35 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
36
37 Study were funded by a LID. And in virtually all of those cases, the park improvements
38
39
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43
44 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
45
46 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
47
Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
park (or streetscape) improvement—other studies estimated premiums for real estate only much
closer or cited to Dr. Crompton.

1 dramatically restored unimproved or blighted areas, and properties evaluated were within
2
3 two or three blocks of the park.

4
5 46. ABS's claimed reliance on three economic studies to support property value
6 increase is also flawed. The HR&A study does not inform what value increases are
7
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9
10 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
11
12 dissimilar parks in other cities,⁸ making the methodological application to the LID
13
14 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
15
16 conclusion that there would be *no new net visitors* from downtown residents as a result of
17
18 the LID Improvements and could not explain how this impacted his condo analysis.
19
20 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
21
22 Property Values" primarily focused on whether the benefits accrue to the larger community
23
24 rather than properties adjacent to the park. And the 2014 New York City Department of
25
26 Transportation study is not based on real estate transactions and market sales and fails to
27
28 substantiate any link between increased retail sales and property values. Moreover, this
29
30 study only looked at impact either directly abutting the streetscape improvement, or a couple
31
32 hundred feet for plaza-like improvements.
33

34
35 47. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
36
37 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
38
39 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
40
41

42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
2 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
3 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
4 asked whether he considered that HR&A’s estimated LID impact is six times greater than
5 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
6 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
7 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
8 assumptions to account for this difference, which may be partly explained by the fact that
9 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
10 approximately 3.44% of King County tourists visit Seattle primarily because of the city
11 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
12 waterfront improvements.

13
14
15
16
17
18
19
20
21
22
23
24
25 48. Although proximity to the improvements is a key factor in all of these
26 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
27 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
28 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
29 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
30 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
31 Improvements is approximate 20 acres and it is not a community park.⁹

32
33
34
35
36
37
38
39 49. There is no explanation in the Final Study or the supporting materials of how
40 the studies or comparable sales were used to derive values for Taxpayer’s property. For
41

42
43
44
45 ⁹ *See*
46 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
2
3 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.

4
5 50. Failure to comply with USPAP. Taxpayer's assessment also rests on a
6
7 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
8
9 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
10
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12
13 Study does not meet mass appraisal standards nor allow for independent assessment of the
14
15 accuracy of Mr. Macauley's conclusions.

16
17 51. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
18
19 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
20
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22
23 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
24
25 testimony suggests that he incorrectly believed that the only difference between direct
26
27 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
28
29 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
30
31 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
32
33 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
34
35 Gordon uses in doing his limited restricted report").

36
37 52. But the difference is not only in reporting—mass appraisal techniques must
38
39 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
40
41 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
42
43 parcel approach:

44
45 The mass appraisal technique is an appraisal method used to evaluate
46
47 a group of properties that are subject to similar market forces as of a
certain date through the use of market data, statistical analysis and

1 testing. As a result, the mass appraisal technique does not require or
2 involve analysis of each individual property's specific data.
3

4 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
5

6
7 53. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
8 universe of properties as a given date using standard methodology, employing common data,
9 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
10 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
11 model" is "a mathematical expression of how supply and demand factors interact in a
12 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
13 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
14 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
15
16

17 54. Regardless of client direction, Mr. Macaulay is required to comply with
18 USPAP. So, if as he determined, a "[p]arcel-by-parcel direct appraisal" would not have been
19 economically feasible because it would have taken "an incredible amount of time and cost"
20 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
21 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 ("performing an
22 individual appraisal of each [condo] parcel would have been cost and time prohibitive").
23
24

25 55. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
26 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
27 value, fails to calibrate the model structure to determine the contribution of the individual
28 characteristics affecting value, and does not review the mass appraisal results against actual
29
30
31
32
33
34

47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2
3 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

4
5 56. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6
7 proximity to the elements, the increase in market rent, market vacancy changes,
8
9 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
10 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
11
12 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
13
14 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
15
16 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
17
18 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
19
20 were hypothetical, it was not possible to identify matched pair sales and no City witness
21
22 explained how ABS Valuation made adjustments to “comparable” sales in order to check
23
24 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
25
26 him to explain his model structure.
27

28
29 57. For these reasons, Taxpayer appeals the following portions of the Examiner’s
30
31 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
32
33

34
35 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
36
37 relationship between characteristics that affect value, and to calibrate that model to specify how
38
39 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
40
41 21). The purpose is to rationally determine what characteristics will create value, and by how much.
42
43 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
44
45 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
46
47 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
include explanation of the model specification, data requirements, calibration methods, and
mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
(o). Without this reporting, it is impossible for users of the appraisal report to determine how the
appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
Hrg. Tr. at 206:15-207:17.

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner’s denial of that motion.
4

5 58. Finally, Taxpayer’s property is not appurtenant—or even in close
6
7 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
8
9 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
10
11 close proximity to the property on which expert testimony was given”). And, as described
12
13 above, the special assessment is overstated because the Final Study makes no attempt to
14
15 determine general benefits, existing amenities for Taxpayer’s specific property, or special
16
17 detriments. In addition, it is speculative due to the fact that, as of October 2019,
18
19 improvements were not in place—and, in fact, much of the waterfront is a construction
20
21 zone following removal of the viaduct and now Pier 58 demolition. Under these
22
23 circumstances, rather than relying on entirely imaginary income and shaky hypotheticals,
24
25 Mr. Macaulay at the very least should have discounted the special benefit estimates or
26
27 waited to perform the Study until the improvements were at least close to complete.
28

29 **Erroneous Pre-Improvement Valuation**

30
31 59. The proposed final assessment erroneously overstates the pre-improvement
32
33 value of Taxpayer’s property as of October 1, 2019 and, as a result, overstates the special
34
35 benefit to the Taxpayer’s property.
36

37 60. The City’s Final Study was used to compute the proposed final assessment of
38
39 Harbor Steps’ property. The City’s Study purportedly uses data from the King County
40
41 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
42
43

44
45 ¹¹ *See, e.g.*, Final Special Benefit Study, “All Other LID Commercial Properties” Spreadsheet
46 (providing a “County Link” to the King County Department of Assessment’s online “eReal
47 Property” search tool).

1 Study does not accurately reflect this data. For example, the City's Study values Harbor
2 Steps' property at \$127,557,000 as of October 1, 2019. However, the King County assessor
3 determined the true and fair value of the property to be \$104,290,000, valued in 2019 for tax
4 year 2020. In other words, the Final Special Benefit Study's valuation is 122.3% of King
5 County's assessed value. The Final Special Benefit Study does not explain this difference—
6 or any differences—between its pre-improvement valuation and its supposed source for
7 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
8 Recommendation.
9

10
11
12
13
14
15
16
17 61. Further, the City's analysis was based on unreliable market data. The ABS
18 appraisal overstated the combined total before market value for all four Harbor Steps'
19 parcels by about \$88 million. B. O'Connor's Jan. 31, 2020 Report (attached to Appeal
20 Petition), Ex. 6. Based on our expert appraiser's appraisal review, the true and fair value of
21 the property here as of October 1, 2019 was \$105,557,000. *Id.* (Assuming equal value
22 between all parcels).
23
24
25
26
27

28
29 62. Thus, aside from multiple other reasons why computation of the special
30 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
31 improvement values that do not accurately reflect market data. For these reasons, Taxpayer
32 appeals the following portions of the Examiner's Recommendation: Sections II.13, II.14,
33 and II.15.
34
35
36
37
38

39 **Erroneous Computation of Special Benefit**

40
41 63. "Special benefit" is "the increase in fair market value attributable to the local
42 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
43 may receive by reason of the improvement is not measured alone by the physical character
44 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
45
46
47

1 of Seattle, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
2 the particular tract or property benefited by the entire improvement, and is it assessed
3 proportionately with the other property included within the assessment district?” *Id.* 165–
4
5 66.
6
7

8
9 64. The proposed final assessment erroneously overstates the special benefit of
10 LID improvements in a number of ways.
11

12
13 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
14 the Harbor Steps, Mr. Macaulay assumed room/rental rates would increase by 2.50% (low)
15 and 3.25% (high) due to the 2024 LID Improvements. Mr. Macaulay then uses these same
16 percentages (2.50% and 3.25%) to increase retail and parking. He then uses this
17 hypothesized increased revenue to calculate a new net operating income for the commercial
18 properties and capitalizes that to come up with an “After” valuation.
19
20

21
22 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
23 operating income remains the same as in the hypothetical “Before” condition but changes
24 the cap rate. For the Harbor Steps, the cap rate goes from 4.10% to 3.97% (low scenario,
25 creating a bigger value increase) and 4.00% (high scenario, creating a lower value increase).
26
27

28
29 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
30 benefit conclusion. For the Harbor Steps, this is an increase in property value of 2.75% due
31 to the LID Improvements.
32
33

34
35 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
36 and capitalization rates. When asked precisely what the basis is for his special benefit
37 percentage increases to revenue for each commercial property, he could not point to
38 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
39 is nothing in the report to allow a reader to understand how he came up with these
40
41
42
43
44
45
46
47

1 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
2
3 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
4
5 the basis for his belief that certain factors—liked increased connectivity—will increase
6
7 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
8
9 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
10
11 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
12
13 sources equally even though there was no separate analysis done for food and beverage or
14
15 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
16
17 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
18
19 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
20
21 properties.

22
23 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
24
25 check for commercial properties. But as explained above, no City witness has explained
26
27 how anyone, or all, of the sales are comparable to any particular commercial property within
28
29 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
30
31 in order to make sales “comparable,” he would have had to make adjustments to account for
32
33 Before and After conditions, but there is no way to understand how adjustments were made
34
35 because he “didn’t do a separate sales comparison approach where we showed adjustments
36
37 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
38
39 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
40
41 *Id.* at 127:10-128:24.

42
43 70. It also bears noting that any “internal review” of the special benefit estimates
44
45 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
46
47 error. Indeed, given all the same information, he seemed to suggest that it would be

1 perfectly reasonable for another experienced appraiser to come up with special benefit
2 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
3
4 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
5 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
6
7 margin of error conflicts with the testimony of Taxpayer's experts and reaffirms that there
8
9 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
10
11 margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there are still
12
13 reasonable and unreasonable variations within the appraisal field. *See Examiner's*
14
15 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
16
17 special because it is arbitrarily assigned; and it is too small to realistically be supported by
18
19 appraisal techniques.
20
21

22 71. No evidence of special benefit. Meanwhile, there is "no actual evidence from
23
24 any seller or purchaser that the price was higher because of the LID improvements."
25
26 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
27
28 identified any seller or buyer, or any particular property where the existence of the LID
29
30 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Taxpayer has
31
32 explained that the property has not increased rental rates or revenue due to the forthcoming
33
34 LID Improvements, because, among other reasons (and apart from COVID), the
35
36 improvements ABS believes will generate value do not exist and will not for a number of
37
38 years to come. There are no comparable sales because the LID Improvements are not in
39
40 place, nor will they be until the end of 2024 if completed on schedule.
41

42 72. The fair market value of Harbor Steps' property has not changed due to
43
44 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
45
46 benefited from installation of new water main and fire hydrant where it was already
47

1 adequately supplied with water and afforded adequate fire protection). And in any event,
2
3 any value attributable to removal of the viaduct was to be excluded from the assessment
4
5 calculation.

6
7 73. There is no special benefit to the Harbor Steps because its apartment demand
8
9 is driven by proximity to downtown job centers. In fact, the LID improvements diminish the
10
11 value of Harbor Steps' property by drawing visitors away towards improvements that do not
12
13 abut the property and increasing competition in other areas of the city. *See Kuskys*, 85 Wn.
14
15 App. 493 (testimony of owners' expert that LID actually diminished value of property was
16
17 sufficient to rebut presumption that assessment was proper). The ground floor retail tenants
18
19 will be harmed by the LID improvements because the Overlook Walk and Union Street
20
21 connection improvements will likely direct foot traffic away from the Harbor Steps and
22
23 towards Pike Place Market. Less demand for Harbor Steps' retail businesses will result in
24
25 lower rents and less revenue. Mr. Macaulay did not account for any of these impacts. Harbor
26
27 Steps already has a high-quality connectivity to the waterfront and no data was presented to
28
29 justify a value lift based on additional connection points several blocks away. On cross-
30
31 examination, Mr. Macaulay could not point to any specific data in the ABS Special Benefit
32
33 Study justifying the precise special benefit to Harbor Steps, claiming only that the market
34
35 would generally support additional connection points to the waterfront amenities. *See*
36
37 6/23/2020 Hrg. Tr. at 48-50.

38
39 74. Moreover, the assessment formula is an attempt to distribute costs that do not
40
41 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
42
43 "merely a mathematical model that distributes costs").

44
45 75. The Special Benefit Study fails to address whether the \$346,000,000
46
47 estimated LID project cost takes into account the investment that would have occurred in the

1 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
2 invested. This is a critical component of estimating which properties receive a direct benefit
3 from the improvements, versus more incidental benefits further from the park.
4

5
6 76. Mr. Macaulay also included personal property in his valuation of hotels even
7 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
8 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
9 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
10 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
11 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
12 receiving a disproportionately high LID assessment in comparison to other property types,
13 since hotels were the only property type subject to personal property LID assessments.
14
15 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
16 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
17 notice procedures because hotel property owners only received notice that their real estate
18 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).
19
20

21 77. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
22 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
23 a television at the waterfront Marriott is assigned a greater special benefit than the same
24 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
25 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
26 unreasonable to assign a value lift to personal property that is replaceable at the same cost
27 and may be obsolete before the LID improvements are even completed. Further, personal
28 property is highly depreciable, and likely to be fully depreciated or potentially discarded by
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 2024. *Id.*; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must
2
3 be redone to correct for this error.

4
5 78. The proposed final assessment substantially exceeds the special benefit to the
6
7 property and is grossly disproportionate to similarly situated properties within the LID. For
8
9 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
10
11 Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).

12 **State Environmental Policy Act and Other Environmental Permitting**

13
14
15 79. While this appeal is not challenging the City's environmental review and
16
17 permitting processes, those processes are relevant in determining the legality of the
18
19 assessments, and to assessing the delivery risk, the present value of the City's plans, and
20
21 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
22
23 pursue projects that have not yet undergone environmental review (thus limiting the choice
24
25 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
26
27 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
28
29 is just beginning. Further, the City has segmented environmental review, and still has a
30
31 gauntlet of federal, state and tribal review processes to complete before it will be clear what
32
33 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
34
35 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
36
37 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
38
39 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
40
41 committing to reconstruction of Pier 58 and major street improvements without
42
43 environmental review, or the City's Final Special Study has improperly included and is
44
45 proposing to assess the Taxpayer the costs and special benefits of improvements that may
46
47 not get built. Either way, it is faulty process.

Due Process Rights

80. The City's failed to notify Harbor Steps sufficiently in advance of the hearing to allow Harbor Steps to obtain evidence and prepare to properly challenge the assessments. Because LID assessments involve a deprivation of property, affected owners have the right to a hearing as to whether the improvement resulted (or will result) in special benefits to their properties and whether their assessments are proportionate, which necessarily includes the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d 555, 569–70, 229 P.3d 761 (2010).

81. The LID statute specifies that cities must mail notices giving the time and place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at 956. The key inquiry is whether the owner had sufficient time to gather evidence (and secure their own appraisal), evaluate proportionality of the proposed assessments, and whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient for anybody to get an appraisal”).

82. The City’s Notice of Assessment was sent on December 30, 2019. And the Final Special Benefit Study has only been available for public review since January 7, 2020. Due to this short time frame, Harbor Steps requested a prehearing conference and scheduling order that would preserve and protect Harbor Steps’ right to analyze and respond to the Final Study, obtain expert appraisal testimony, conduct depositions, and to accommodate preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City’s assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner

1 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
2
3 the Examiner's Recommendation: I.B.
4

5 **VII. Relief Requested**
6

7 Harbor Steps respectfully requests that the City Council:
8

- 9 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection
10 and:
11
12 a. Cancel the Waterfront Local Improvement District No. 6751 proposed
13 final assessment dated December 20, 2019; or
14
15 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
16 proposed final assessment to \$0 (zero), or such amount as Taxpayer
17 establishes at the hearing in this matter; or
18
19 c. Remand the matter to the Hearing Examiner or City appraiser to
20 recalculate and reduce Taxpayer's assessment using recognized
21 appraisal techniques consistent with USPAP and:
22
23 i. Excluding any property value increase attributable to viaduct
24 removal and other planned WSDOT Improvements;
25
26 ii. Taking into account the effects of COVID-19 pandemic on the
27 value of Taxpayers property and other relevant developments
28 since October 2019;
29
30 iii. Accounting for and excluding (1) any special benefits from
31 existing or planning improvements that already provide
32 similar benefits to Taxpayers property, and (2) any special
33 detriments from construction and other anticipated LID-
34 related disamenities;
35
36
37
38
39
40
41
42
43
44
45
46
47

- 1 iv. Accounting for and including only those actual benefits
2 anticipated to accrue to Taxpayer's property based on its
3 location relative to Pier 58, Overlook Walk, and the
4 Promenade, and specific elements of the LID Improvements;
5
6 v. Discounting anticipated special benefits to present value,
7 based on reliable estimates regarding when special benefits
8 will start accruing following completion of the LID
9 Improvements; and
10
11 vi. Accounting for such other issues specific to Taxpayer's
12 property relevant to calculation of such assessment; and
13
14
15
16
17
18
19
20

21 2. Grant such further relief as the City Council deems just and proper.

25 Facsimile: 206.359.9000
26
27

28 **III. Statement of Taxpayer's Interest**
29

30 Harbor Steps owns the property that is subject to the proposed final assessment
31 described in Section IV. The property at issue is a multifamily residential apartment building
32 with ground floor retail. Additionally, there is a pedestrian corridor connecting the
33 downtown retail core to the waterfront amenities.
34
35

36 The basis of the proposed assessment is a Final Special Benefit/Proportionate
37 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
38 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
39 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
40 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
41
42
43
44
45
46
47

1 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
2
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4
5 to exclude charges for other improvement projects in the Central Waterfront, and
6
7 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
8
9 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
10
11 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
12
13 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
14
15 because construction was not complete on the LID Improvements or the WSDOT
16
17 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
18
19 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
20
21 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which
22
23 was based on the Final Study.
24

25 **IV. Matter Under Appeal**

26 Harbor Steps appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
27
28 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
29
30 final assessment dated December 30, 2019 against the following property:
31

32
33 King County Parcel No. 1976200075
34 Site Address: 1301 1st Ave., Seattle, Washington
35 Proposed Final LID Assessment for Parcel: \$1,376,078.86
36

37 See Examiner’s Recommendation at 61-62, 105. To avoid repetition, Harbor Steps
38
39 incorporates the evidence and arguments raised before the Hearing Examiner into this
40
41 appeal. In particular, Harbor Steps points the City Council to Taxpayer’s initial Appeal
42
43 Petition, *Frye* motion, Closing Brief submitted at the close of its case-in-chief (dated
44
45
46
47

1 4/16/2020), and supplemental Closing Statement submitted at the close of the City's case-in-
2 chief (dated 7/7/2020).¹
3

4 As discussed more fully below, Taxpayer specifically appeals the following Findings
5 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
6
7 Pages 61-62, 105, Sections II.6, II.7, II.13, II.14, II.15, II.18, II.19, II.20, II.21, II.22, II.23,
8 II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2, IV.B.3,
9 IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i), IV.B.11(a)(ii),
10 IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.7, IV.C.8, IV.C.9,
11 IV.C.11, IV.C.12, IV.C.14, IV.C.18
12
13
14
15
16
17

18 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
19 recommendations on material issues raised during Taxpayer's appeal that were supported by
20 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
21 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23 recommended anything other than denial of objectors' appeals were where the City's
24 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
25 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
26 special assessments based on "fundamentally wrong methods."
27
28
29
30
31
32
33
34
35
36
37
38
39

40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29

30
31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$3,512,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City's appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and
5 the City's preliminary roll. On the contrary, the City's assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS's appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City's appraiser asserts that the City is not collecting assessments "based
16 on the value of WSDOT's planned improvements." See Final Study at 3. However, the
17 City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition,
18 the City's appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City's promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT's planned work.
25

26
27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City's appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34
35 **Legal Requirement:** Benefits must be "physical and material and not merely speculative
36 or conjectural"
37

38 **ABS Study:** Not only are the improvements not yet "physical or material," but
39 environmental review and permitting for the City's proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City's then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual" and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
2 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
3 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
4 Final Study fails to meet basic standards for admissibility and must be remanded.
5
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6 **V. Standard of Review**

7 “When considering the assessment roll, the city council sits ‘as a board of
8 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
9 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
10 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
11 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
12
13
14
15
16
17

18 The proposed assessments are presumed correct, “unless overcome by clear, cogent
19 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
20 than the heightened presumption of correctness on judicial appeal because “applying these
21 elevated standards at the municipal hearing would afford unwarranted deference to a report
22 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
23 presumption is not evidence and its efficacy is lost when the other party adduces credible
24 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
25 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
26 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
27 presented credible evidence showing that the City’s proposed assessment is arbitrary,
28 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
29 to the City to prove the assessments are actual, measurable, special, non-speculative and
30 proportionate. The City failed that burden.

42
43
44
45
46
47

1 **VI. Grounds for Appeal**

2 Harbor Steps appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
12 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020); Decl. of Brian O'Connor ISO Closing
13 Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained: "[W]e have explicitly
14 rejected an argument that, because certain protestors 'failed to offer expert testimony at the
15 city council hearing[,] the presumptions [in favor of the assessment] were still operative as
16 to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian Trail Trunk Sewer*, 35
17 Wn. App. at 843); *see also Kuskay v. City of Goldendale*, 85 Wn. App. 493, 933 P.2d 430
18 (1997) (although appraiser did not submit an appraisal, he provided expert opinion showing
19 that improvements actually diminished value of the property). In fact, no independent
20 evidence is required at all if, for example, objectors show that the assessment was grounded
21 on a fundamentally wrong basis due to an error in the City's appraiser's methods—as is the
22 case here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88,
23 106, 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out
24 that the square footage assumed in the City's appraisal was incorrect.
25

26
27 2. On March 5, 2020, Harbor Steps presented testimony from experts Ben Scott
28 and Brian O'Connor. The Hearing Examiner failed to meaningfully respond either the expert
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 testimony or the expert appraisal reviews. Instead, the Hearing Examiner simply dismissed
2 Harbor Steps' expert evidence as insufficient appraisal evidence. *See* Examiner's
3 Recommendation at IV. C.7–9. This is contrary to law.
4

5
6 3. For these reasons, Taxpayer appeals the following portions of the Examiner's
7 Recommendation: Sections II.13, II.14, II.15, IV.A, IV.B.11(a), IV.C.7, IV.C.8, IV.C.9, and
8 IV.C.11.
9
10

11
12
13 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**
14

15 4. RCW 35.43.040 provides cities and towns authority for ordering local
16 improvements and for levying and collecting special assessments “on property specially
17 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed upon
18 all the property in accordance with the special benefits conferred thereon.” RCW 35.44.010.
19
20

21 5. No analysis of general benefits. Special assessments have been “held valid
22 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
23 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
24 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
25 they are for the construction of local improvements that are appurtenant to specific land and
26 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
27
28

29 6. Harbor Steps' property is not specially benefited by the LID Improvements.
30 The primary purpose and effect of the LID Improvements are to benefit “members of the
31 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
32 library is for the benefit of the members of the whole community individually and
33 collectively who may be served by it”). Mr. Macaulay's own chapter of the LID Manual
34 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
35
36
37
38
39
40
41
42
43
44
45
46
47

1 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
2 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
3 that if an appraiser “identifies both general and special benefits, these benefits should be
4 clearly distinguished and explained, and only special benefits should be included in the
5 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
6 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/5/2020 (B. O’Connor) Hrg. Tr. at 158:13-
7 159:8, 192:8-193:2. It is undisputed that Mr. Macaulay did not analyze or measure general
8 benefits, including those arising from construction necessary to meet basic design standards.
9 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
10 construction costs related to meeting design standards which may be general benefits as
11 distinct from construction costs emanating from requirements of the LID project”). To the
12 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
13 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
14 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
15 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.

16
17
18
19
20
21
22
23
24
25
26
27
28
29
30
31 7. LID Improvements not necessary. Unlike typical LID projects, the
32 Waterfront LID improvements are largely unnecessary to the functionality of any particular
33 property, including Taxpayer’s property. *See In re Schmitz*, 44 Wn.2d 429, 433, 268 P.2d
34 436 (1954) (assessment levied for the purpose of raising the grade of a road by 16 to 18 feet
35 held invalid where owners would have benefitted equally from increase of only 9 feet);
36
37
38
39
40
41
42

43 ² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors
44 represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil
45 (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two
46 days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference,
47 Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
2 intersection for new water main for hydrant held invalid because land was already afforded
3 functional hydrant at nearby street). Here, Taxpayer testified that the LID Improvements are
4 not necessary to the business of their income-producing properties, all of which already have
5 sufficient access to the waterfront, downtown restaurants, and other amenities necessary for
6 their tenants and clients. And for residential properties, like Harbor Steps, the assumption
7 that an increase in tourism will cause lifts in property value is both anecdotally and
8 empirically unsupported. Additionally, the construction of new access points is in fact a
9 negative point for the Harbor Steps, which are located at an existing connection between the
10 downtown core and the waterfront. The LID improvements will draw foot traffic away from
11 the Harbor Steps, increasing competition in other areas of the city. The fact that there is no
12 case law differentiating between binary improvements and parks does not change the law
13 prohibiting assessments on properties already adequately served by existing amenities. *See*
14 Examiner's Recommendation at IV.C.3 (reasoning that "no case law is provided to support
15 the differentiation between a hardscape benefit and the more ephemeral benefits of park").
16 Nor does the Examiner's reasoning excuse the City's failure to account for existing
17 amenities as part of the special benefit calculation. As Dr. Crompton testified, existing view
18 amenities may in fact diminish the incremental effect of new park improvements on the
19 value of properties, much like turning on a weak light in an already brightly illuminated
20 room. *See* Hrg. Exhibit 94 (Crompton's Report) at 12-13.

21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41 8. To the extent benefits can be considered "special" as opposed to general, they
42 are nominal or nonexistent for many properties even in the Central Waterfront, which
43 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
44 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
45
46
47

1 change due to expansion of sewer service *near* owners' parcel which were already
2 connected). Here, the primary reasons a user chooses a particular apartment is not proximity
3 to the waterfront. Instead, the reason residents choose to live in the Harbor Steps apartments
4 is proximity to their places of employment and other amenities downtown. See 3/5/2020 (E.
5 Leigh0 Hrg. Tr at 113:13-114:20; 124:3-126:9. For example, without any supporting written
6 analysis, Mr. Macaulay offhandedly concludes that the Harbor Steps apartments would
7 benefit from increased connectivity from being four to five blocks from the Overlook Walk
8 even though the properties currently have direct access to the waterfront via the Harbor
9 Steps. 6/23/2020 Hrg. Tr. At 48:1-50:25; see also B. Scott Decl., ¶ 7. Mr. Leigh testified that
10 he did not anticipate a benefit, and that the Harbor Steps retail component would suffer if a
11 measurable portion of waterfront-bound pedestrian traffic moved north to the market. See
12 also B. Scott Decl., ¶ 6 (describing failure to analyze how existing retail is harmed by foot
13 traffic being pulled away towards new amenities). Even if the City could assess for a view
14 change (and it has promised not to assess for viaduct removal), the fair market value of
15 Harbor Steps' property has not changed because the LID Improvements have not improved
16 the property's waterfront view or access to the waterfront, nor will they when the City
17 anticipates completion in 2024. For these reasons, Taxpayer appeals the following portions
18 of the Examiner's Recommendation: Sections IV.C.3, IV.B.9, and IV.C.3.

19
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37 9. No analysis of special detriments. The Final Study fails to properly account
38 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
39 owners for removal and cleanup of underground storage tanks discovered during the
40 improvement project). The Property owner representative for Harbor Steps, Ed Leigh,
41 testified that property values may in fact be negatively impacted by the LID Improvements
42 due to loss of parking, increased traffic and noise, and increased potential for crime,
43
44
45
46
47

1 homelessness and sanitation issues. Mr. Leigh testified that the assessment is an immediate
2 expense for Harbor Steps that comes with no immediate increase in revenue, thereby
3 decreasing property values. See 3/5/2020 (E. Leigh) Hrg. Tr. at 126:10-129:9; 227:8-229:10.
4
5 And Harbor Steps does not expect near term the increases assumed in ABS Valuations'
6
7 spreadsheets or the Final Study. Although Mr. Macaulay claims he analyzed impacts on the
8
9 City's planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no
10
11 explanation of how lost parking might be a detriment, and no property-specific parking
12
13 analysis in any of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.
14
15

16
17 10. Likewise, there was no analysis of the risks associated with disamenities such
18
19 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
20
21 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
22
23 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
24
25 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
26
27 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
28
29 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
30
31 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
32
33 the maintenance agreement. *Id.* at 13:4-14:2.
34

35 11. There was also no consideration of negative impacts from another four-plus
36
37 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
38
39 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
40
41 law allowing him to dismiss these actual, non-speculative impacts. Because future special
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

benefits calculations are inherently speculative, Washington's eminent domain statute specifically allows condemnees to postpone special benefits assessments until improvements are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).

Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy Greenway, the Greenway district "significantly" lagged in value). For these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation: Sections II.25, IV.B.8, and IV.B.9.

12. Special benefit estimate is speculative. When calculating a special benefit, "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it becomes pure speculation." *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324 P.2d 1078 (1958)).

13. Assuming without conceding that one day, the City's planned LID Improvements might increase the value of neighboring properties to some extent, that potential benefit is many years away and speculative. While appraisers tolerate some degree of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is far too speculative to satisfy industry practices and standards.

14. Although LIDs are sometimes finalized prior to completion of improvements, this is typically just six month or a year prior, and the assessments are otherwise supported by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here will not be realized for four or five years. In the meantime, there is permitting risk,

1 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
2 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
3 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
4
5 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
6
7 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
8
9 testified: "I just don't know what the market value would be as of the date the project would
10
11 be finally constructed" because "[t]here could be a lot of elements in the market that did
12
13 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
14
15 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
16
17 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
18
19

20
21 15. The record is clear that while no one can know what "special benefit" might
22
23 accrue to these properties in four years (if any), we do know that there are no actual benefits
24
25 now. The LID improvements provide no immediate special benefit to property owners
26
27 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
28
29 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
30
31 sewer system for future users). For example, notwithstanding the questionable hypothesis
32
33 that apartments will benefit from an expected increase in tenant interest when the
34
35 improvements are complete, it is undisputed that tenants are not coming in larger numbers
36
37 and paying higher rental rates now because of something happening five years down the
38
39 road. See O'Connor Decl. ISO Closing Stmt., ¶ 7 (dated 7/7/2020) (no apartment leased
40
41 today for 18 months would rent at a higher rate due to improvements coming in 2024).
42

43 16. Further, there are no "plans and specifications" on file with the Clerk's Office
44
45 for the LID Improvements, and it is unlawful to move to final assessments without such
46
47 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*

1 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
2
3 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
4
5 dollars on projects still early in the design process. *See* Washington Attorney General
6
7 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
8
9 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
10
11 of programs and included “only so much of the overall costs” that took place within and
12
13 benefitted the assessed properties).

14
15 17. The COVID-19 crisis highlights how fundamentally speculative and unfair it
16
17 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
18
19 anticipated to be delivered five years later. Even before COVID, it was speculative to
20
21 assume that market highs experienced in October 2019¹ would be sustained through 2024,
22
23 after an already extraordinarily long expansion period. *See, e.g.*, 3/5/2020 (E. Leigh) Hrg.
24
25 Tr. at 119:15-123:6; 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr.
26
27 Macaulay conceded: “[W]hen I was doing my analysis in October 2019, who would have
28
29 thought that this COVID issue would happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his
30
31 deposition in late February, his “thought process was that the market was going to continue
32
33 to go up,” but now, they are already irrelevant. *Id.*; *see* Gibbons Decl. ISO Closing Stmt. at ¶
34
35 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019
36
37 (*see* Examiner’s Recommendation at 109), the pandemic has impacted *current* values and
38
39 rendered the hypothetical October 2019 Final Study valuations outdated.

40
41 18. As another example of how future events could affect the accuracy and
42
43 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
44
45 Examiner re-open the record to allow the City to explain whether the assessments against
46
47 property owners within the LID are, in fact, being used by the City to fund the emergency

1 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
2 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
3 would be improperly imposing costs on property owners within the LID for improvements
4 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
5 habitat and City infrastructure—this does not provide any special benefit to LID property
6 owners.
7
8
9
10
11

12 19. There is also no certainty the improvements will be delivered on time. Mr.
13 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
14 delay in construction schedule would not constitute a “material change” under the City
15 Council’s ordinance authorizing the improvements. In other words, the City cannot
16 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
17 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
18 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
19 potential delays and project changes inherent in those processes, that call into question the
20 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110

2 Decl., dated 4/15/2020).
3

4
5 20. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
6 he could not point to a single one where the assessment roll was finalized five years in
7 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
8 he has never recommended final special assessments based on designs less than 30 percent
9 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
10 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
11 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
12 at 66:17-25. He performed no independent due diligence to determine the reliability of the
13 City’s estimates for completion of the LID Improvements, or to ensure that proposed
14 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
15 agreed that if any of his assumptions are incorrect, his opinion of market value would need
16 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
17 68:11-18.

21
22
23
24
25
26
27
28
29

30 21. The City has cited no authority—and Taxpayer is aware of none—that
31 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
32 assess taxes for “actual” special benefits that will not accrue for another five years (if all
33 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
34 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
35 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
36 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
37 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
38 IV.C.14, and IV.C.18.
39
40
41
42
43
44
45
46
47

1 22. Failure to discount special benefit estimates to account for risks and present
2 value. Due to the inherent uncertainty, Taxpayer's expert opine that the Final Study should
3 have accounted for risks associated with delivery of the improvements (including permitting
4 risk, construction risk, general economic risk) and any special damages associated with
5 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
6 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
7 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
8 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) ("Appraisers routinely consider
9 the impact of future conditions [through] discounted cash flow analysis.").

10 23. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, "[y]ou would be discounting it back to a present value." *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.

22 24. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
23 present value, an appraiser would consider discount rates for land development to account
24 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at

1 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer to
2 the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
3
4 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
5

6 25. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
7 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
8 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
9 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
10 ignoring momentarily all of the other methodological and other flaws discussed here and in
11 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
12 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
13 exceeds special benefits when reduced to present value. Further, to the extent the City is
14 arguing that because they are permitted to assess 100% of the special benefit, the special
15 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
16 is again wrong. After applying proper discounting, the City's proposed special benefit
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18 100% of the total estimated special benefit.
19
20
21
22
23
24
25
26
27
28
29
30
31

32 26. But even the assumption that the LID improvements would deliver benefits
33 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
34 on. Rather, those studies demonstrate that a discount period of five years is conservative.
35 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
36 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
37 indicates that during the construction period, the Greenway district "significantly" lagged in
38 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
39 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at
40
41
42
43
44
45
46
47

1 30-31 (discussing New York City High Line and San Francisco Embarcadero
2 improvements). Given the lengthy delay, any prediction of future special benefits is
3 speculative, especially during the construction phase where values are likely to decline. And
4 assuming the LID Improvements take a similarly long period of time after they are complete
5 to start producing tangible property value benefits, each additional year of delay results in
6 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
7 Closing Stmt., ¶ 19, Ex. A.
8

9
10 27. Applying the same discounting methods described above and in Mr. Gibbons
11 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
12 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
13 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
14 100% assessment should be no more than \$330,830.40. Anything more would permit the
15 City to assess Taxpayer based on a hypothetical assumption that these improvements are in
16 place and providing benefit, and ignore the risks, construction disamenity, and time value of
17 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
18 would counsel that the assessment should be only 39.2% of that assessment cap, or
19 \$129,685.52.
20

21 28. Attachment C includes two Excel spreadsheets applying these discounting
22 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
23 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
24 demonstrates that discounting the City's hypothetical October 2019 special benefits to
25 present value would reduce Taxpayer's assessment to \$472,115, exclusive of any other
26 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
27 reductions after taking into account (1) Taxpayer's exerts' estimated "Before" valued based
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
2
3 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
4
5 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
6
7 the time it takes for the improvements to capture property value.) After such reductions,
8
9 Taxpayer's assessment would be just \$341,853 (for the 5-year discount) or \$93,930 (for the
10
11 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
12
13 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
14
15 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
16
17 Taxpayer's discounting argument without legal or factual analysis; that failure is error.

18 **Appraisal and Assessment Calculation Methods Are Flawed**

19
20
21 29. The "general rule is that each lot, piece, or parcel of land should be assessed
22
23 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
24
25 Wn.2d at 97.

26
27 30. It is proper to sustain a challenge to an assessment, even without the appraisal
28
29 testimony from the owner, where the objector's expert establishes that the assessment was
30
31 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
32
33 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.

34
35 31. The City's appraiser purports to utilize the income method of valuation but
36
37 relied on inaccurate revenue and market data, as discussed further below.

38
39 32. The City's appraiser purports to utilize the comparable sales method of
40
41 valuation, but no City witness attempted "to characterize any one, or all of them, as
42
43 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
44
45 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
46
47 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to

1 characterize any one, or all of them, as comparable to any particular property within the LID”).
2
3 And no City witness could explain how specific adjustments were made to these sales to
4
5 account for value increases due to the hypothesized Before and After Improvements. For this
6
7 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
8

9 33. Special assessment improperly includes value lift from the Before
10 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
11
12 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
13
14 Improvements, which WSDOT had independently committed to fund. However, Mr.
15
16 Macaulay did not calculate the actual market value of LID properties in October 2019 and
17
18 did not separately analyze the hypothetical increase to property values attributable to
19
20 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
21
22 current value and then separately calculate a hypothetical “With WSDOT” Before value);
23
24 Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020 Letter
25
26 (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal Petition) at
27
28 3-4. Without any documented basis or support, Mr. Macaulay simply “ma[de] a judgment a
29
30 call” on what occupancy and rates would have been for the commercial properties assuming
31
32 all of the WSDOT Improvements are completed as of 2019. Macaulay Depo. at 129:19-
33
34 130:11. For example, Mr. Macaulay surmised that Brian O’Connor’s conclusion that the
35
36 “Before” value for Harbor Steps was overstated by \$88M was perhaps due to the fact that
37
38 Mr. O’Connor was looking at current income numbers and not accounting for the value of
39
40 the “Before” conditions. However, when asked whether the value of the of the “Before”
41
42 conditions is lower or higher than \$88M, Mr. Macaulay had no clue because he did not do
43
44 this analysis. 6/23/2020 Hrg. Tr. at 46:9-17:25. This outright omission precludes any
45
46 independent evaluation of the true market “Before” values. *See* 6/23/2020 Hrg. Tr. at 44:25-
47

1 45:9. It also fails to meet professional appraisal standards; if an appraiser uses current sales
2 data to infer values, then the appraiser must explain how he analyzed that data and other
3 information to come up with the hypothetical value. 3/3/2020 (A. Gibbons) Hrg. Tr. at
4 128:1-130:4. This includes not just removal of the viaduct, but also other road, pedestrian
5 and landscaping improvements WSDOT had already committed to make.
6
7
8
9

10 34. However, because Mr. Macaulay testified that he did include some WSDOT-
11 related value-lift in the “Before” values, it follows that part of the special assessment
12 improperly is based on value attributable to the WSDOT Improvements. As shown by
13 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
14 percentage to Before values. So, for example, if Mr. Macaulay believed the WSDOT
15 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
16 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
17 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
18 to properly exclude the value of Before Improvements from the assessments. For these
19 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
20 Sections II.19, II.29, and IV.B.11(a)(ii)
21
22
23
24
25
26
27
28
29
30
31

32 35. Special benefits were assigned rather than measured. Mr. Macaulay
33 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
34 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/5/2020 (B.
35 O’Connor) Hrg. Tr. at 147:10-149:21; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-
36 91:13. Based on formulas in spreadsheets that Mr. Macaulay used to analyze the
37 commercial properties, Taxpayer’s experts concluded that Mr. Macaulay based adjustments
38 on hypothesized very small increases to property revenue and very small reductions to cap
39 rates to “calculate” an “After” value due to the coming 2024 LID Improvements.
40
41
42
43
44
45
46
47

1 Attachment B (ABS Spreadsheet). These series of micro adjustments were based on
2
3 “professional judgment” that are neither shown nor replicable.
4

5 36. For these reasons, Taxpayer appeals the following portions of the Examiner’s
6 Recommendation: Sections II.19 and IV.B.11(a)(iii).
7

8 37. Special benefit falls within margin of error. The Final Special Benefit Study
9 applies an estimated value enhancement of less than 4%, which is generally within the
10 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
11 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
12 Taxpayer’s experts explained that if two appraisers independently arrive at values within 5%
13 of one another, this difference is considered reasonable as it falls within the standard margin
14 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/5/2020 (B.
15 O’Connor) Hrg. Tr. 201:7-204:8. Because Mr. Macaulay’s micro-special benefit percentages
16 fall far below that 5% margin, “there is no way of authenticating” such incremental changes
17 because “[m]arket forces completely obliterate any tiny little noise factor like that.” *See*
18 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition
19 that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Additionally, the fact that
20 “Before” values are also based on a hypothetical that adds some unstated incremental value
21 to actual 2019 values exacerbates this issue—the ability for an appraiser to discern the
22 micro-value differences between hypothetical conditions that are so similar (the WSDOT
23 improvements compared to the LID improvements) “verges on being ludicrous.” 3/3/2020
24 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
25

26 38. Even if it were possible to accurately tease out such a miniscule hypothetical
27 value change due to improvements coming five years later, experts testified that there is no
28 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A Gibbons) Hrg. Tr. at
2
3 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
4
5 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
6
7 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.
8

9 39. No analysis of value increase attributable to individual components of the
10 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
11
12 percentage difference between hypothetical Before and After conditions. Throughout his
13
14 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
15
16 descriptions in the Addenda even though he testified that he relied on these to calculate
17
18 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
19
20 someone might be able to determine how he attributed value to After conditions described in
21
22 the Addenda, he answered that that was “not the scope of the assignment” because he was
23
24 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
25
26 that the six components were not actually a continuous project, that he was viewing them
27
28 together because the City asked him to, and that if he were to view them independently,
29
30 there was a low probability that properties in the north would specially benefit from
31
32 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.
33

34 40. Not only did he fail to analyze benefits from each of these non-contiguous
35
36 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
37
38 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
39
40 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
41
42 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
43
44 objectives that guided regulators’ assessment of architectural plans for buildings along a
45
46 “signature street” were so vague that they amounted to ad hoc review based on the
47

1 regulators' subjective impressions and feelings).⁶ It became clear through his testimony that
2 even though he used the renderings as "visual aid[s] in appraising the property in the before
3 and after" to "visually see what the differences would be," he could not explain what
4 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
5 when shown a rendering of a two-lane road going down to one-lane in the After condition
6 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
7 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
8 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
9 could explain the depiction of the same trees in the After condition nearly twice as tall as in
10 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
11 of the Examiner's Recommendation: II.27 and IV.B.4.

22 41. Special assessment is not supported by comparable studies, data or reports.
23 Mr. Macaulay's references to empirical research do not justify his fundamental assumption
24 that the LID Improvements will lead to meaningfully increased real estate values for
25 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
26 comparable sales or information from the "over twenty-five studies and reports" to arrive at
27 very precise special benefit increases for residential and commercial combined properties,
28 including Taxpayer's property. For example, although Mr. Macaulay stated that no single
29 report or study was directly on point due to the unique nature of the LID Improvements (*see*,

41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must "be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit." *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
2
3 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
4
5 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;
6
7 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
8
9 for similarities and differences between these improvements and the comparable parks he
10
11 looked at).

12
13 42. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
14
15 assignment of incremental increase of 0.5% to 4% to property values within the LID.
16
17 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
18
19 research misinterprets his work in critical ways, including because the LID Improvements
20
21 manifest the characteristics of a parkway (not a park), and his research indicates that most of
22
23 a *park*’s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
24
25 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
26
27 related value increases are in fact smaller; that estimated increases are “best guesses” rather
28
29 than predictions of property value increases in a particular city; and that percentages do not
30
31 account for diminishing returns after taking into account water views, which would be the
32
33 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
34
35 topography grants most properties in downtown a water view.

36
37 43. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
38
39 that this was just one source of information that was not entirely relevant because, among
40
41 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
42
43 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
44
45 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-
46
47 180:2 (explaining that for purposes of “drawing boundaries around a park” he was

1 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
2
3 Crompton concluded that 500 feet via road from “park” improvements is just one or two
4
5 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
6
7 significantly beyond that which the park study indicated (even if it was legitimate to use the
8
9 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
10
11 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
12
13 impact applicable to “community parks”—which the LID Improvements are not. *Id.*

14
15 44. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
16
17 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
18
19 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
20
21 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
22
23 materials, it was clearly an important—if not *the* most important—source of information for
24
25 estimating special benefits (especially with respect to the condos).⁷ No City witness
26
27 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
28
29 parcel-by-parcel analysis.

30
31 45. The destination parks discussed in the Final Special Benefit Study do not
32
33 provide reliable, comparable, and valid support for the calculation of special assessments
34
35 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
36
37 Study were funded by a LID. And in virtually all of those cases, the park improvements
38
39
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43
44 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
45
46 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
47
Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
park (or streetscape) improvement—other studies estimated premiums for real estate only much
closer or cited to Dr. Crompton.

1 dramatically restored unimproved or blighted areas, and properties evaluated were within
2
3 two or three blocks of the park.

4
5 46. ABS's claimed reliance on three economic studies to support property value
6 increase is also flawed. The HR&A study does not inform what value increases are
7
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9
10 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
11
12 dissimilar parks in other cities,⁸ making the methodological application to the LID
13
14 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
15
16 conclusion that there would be *no new net visitors* from downtown residents as a result of
17
18 the LID Improvements and could not explain how this impacted his condo analysis.
19
20 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
21
22 Property Values" primarily focused on whether the benefits accrue to the larger community
23
24 rather than properties adjacent to the park. And the 2014 New York City Department of
25
26 Transportation study is not based on real estate transactions and market sales and fails to
27
28 substantiate any link between increased retail sales and property values. Moreover, this
29
30 study only looked at impact either directly abutting the streetscape improvement, or a couple
31
32 hundred feet for plaza-like improvements.
33

34
35 47. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
36
37 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
38
39 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
40
41

42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
2 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
3 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
4 asked whether he considered that HR&A’s estimated LID impact is six times greater than
5 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
6 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
7 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
8 assumptions to account for this difference, which may be partly explained by the fact that
9 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
10 approximately 3.44% of King County tourists visit Seattle primarily because of the city
11 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
12 waterfront improvements.

13
14
15
16
17
18
19
20
21
22
23
24
25 48. Although proximity to the improvements is a key factor in all of these
26 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
27 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
28 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
29 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
30 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
31 Improvements is approximate 20 acres and it is not a community park.⁹

32
33
34
35
36
37
38
39 49. There is no explanation in the Final Study or the supporting materials of how
40 the studies or comparable sales were used to derive values for Taxpayer’s property. For
41

42
43
44
45 ⁹ *See*
46 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
2
3 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.

4
5 50. Failure to comply with USPAP. Taxpayer's assessment also rests on a
6
7 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
8
9 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
10
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12
13 Study does not meet mass appraisal standards nor allow for independent assessment of the
14
15 accuracy of Mr. Macauley's conclusions.

16
17 51. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
18
19 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
20
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22
23 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
24
25 testimony suggests that he incorrectly believed that the only difference between direct
26
27 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
28
29 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
30
31 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
32
33 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
34
35 Gordon uses in doing his limited restricted report").

36
37 52. But the difference is not only in reporting—mass appraisal techniques must
38
39 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
40
41 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
42
43 parcel approach:

44
45 The mass appraisal technique is an appraisal method used to evaluate
46
47 a group of properties that are subject to similar market forces as of a
certain date through the use of market data, statistical analysis and

1 testing. As a result, the mass appraisal technique does not require or
2 involve analysis of each individual property's specific data.
3

4 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).
5

6
7 53. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
8 universe of properties as a given date using standard methodology, employing common data,
9 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
10 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
11 model" is "a mathematical expression of how supply and demand factors interact in a
12 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
13 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
14 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).
15
16
17
18
19
20
21
22

23 54. Regardless of client direction, Mr. Macaulay is required to comply with
24 USPAP. So, if as he determined, a "[p]arcel-by-parcel direct appraisal" would not have been
25 economically feasible because it would have taken "an incredible amount of time and cost"
26 (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an appraisal
27 consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8 ("performing an
28 individual appraisal of each [condo] parcel would have been cost and time prohibitive").
29
30
31
32
33
34

35 55. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
36 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
37 value, fails to calibrate the model structure to determine the contribution of the individual
38 characteristics affecting value, and does not review the mass appraisal results against actual
39
40
41
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2
3 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

4
5 56. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6
7 proximity to the elements, the increase in market rent, market vacancy changes,
8
9 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
10 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
11
12 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
13
14 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
15
16 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
17
18 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
19
20 were hypothetical, it was not possible to identify matched pair sales and no City witness
21
22 explained how ABS Valuation made adjustments to “comparable” sales in order to check
23
24 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
25
26 him to explain his model structure.
27

28
29 57. For these reasons, Taxpayer appeals the following portions of the Examiner’s
30
31 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
32
33

34
35 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
36
37 relationship between characteristics that affect value, and to calibrate that model to specify how
38
39 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
40
41 21). The purpose is to rationally determine what characteristics will create value, and by how much.
42
43 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
44
45 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
46
47 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
include explanation of the model specification, data requirements, calibration methods, and
mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
(o). Without this reporting, it is impossible for users of the appraisal report to determine how the
appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
Hrg. Tr. at 206:15-207:17.

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner's denial of that motion.
4

5 58. Finally, Taxpayer's property is not appurtenant—or even in close
6 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
7 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
8 close proximity to the property on which expert testimony was given”). And, as described
9 above, the special assessment is overstated because the Final Study makes no attempt to
10 determine general benefits, existing amenities for Taxpayer's specific property, or special
11 detriments. In addition, it is speculative due to the fact that, as of October 2019,
12 improvements were not in place—and, in fact, much of the waterfront is a construction
13 zone following removal of the viaduct and now Pier 58 demolition. Under these
14 circumstances, rather than relying on entirely imaginary income and shaky hypotheticals,
15 Mr. Macaulay at the very least should have discounted the special benefit estimates or
16 waited to perform the Study until the improvements were at least close to complete.
17
18
19
20
21
22
23
24
25
26
27
28

29 **Erroneous Pre-Improvement Valuation**

30 59. The proposed final assessment erroneously overstates the pre-improvement
31 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
32 benefit to the Taxpayer's property.
33
34
35

36 60. The City's Final Study was used to compute the proposed final assessment of
37 Harbor Steps' property. The City's Study purportedly uses data from the King County
38 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
39
40
41
42
43
44

45 ¹¹ *See, e.g.*, Final Special Benefit Study, “All Other LID Commercial Properties” Spreadsheet
46 (providing a “County Link” to the King County Department of Assessment's online “eReal
47 Property” search tool).

1 Study does not accurately reflect this data. For example, the City's Study values Harbor
2 Steps' property at \$127,557,000 as of October 1, 2019. However, the King County assessor
3 determined the true and fair value of the property to be \$104,290,000, valued in 2019 for tax
4 year 2020. In other words, the Final Special Benefit Study's valuation is 122.3% of King
5 County's assessed value. The Final Special Benefit Study does not explain this difference—
6 or any differences—between its pre-improvement valuation and its supposed source for
7 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
8 Recommendation.
9

10
11
12
13
14
15
16
17 61. Further, the City's analysis was based on unreliable market data. The ABS
18 appraisal overstated the combined total before market value for all four Harbor Steps'
19 parcels by about \$88 million. B. O'Connor's Jan. 31, 2020 Report (attached to Appeal
20 Petition), Ex. 6. Based on our expert appraiser's appraisal review, the true and fair value of
21 the property here as of October 1, 2019 was \$105,557,000. *Id.* (Assuming equal value
22 between all parcels).
23
24
25
26
27

28
29 62. Thus, aside from multiple other reasons why computation of the special
30 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
31 improvement values that do not accurately reflect market data. For these reasons, Taxpayer
32 appeals the following portions of the Examiner's Recommendation: Sections II.13, II.14,
33 and II.15.
34
35
36
37
38

39 **Erroneous Computation of Special Benefit**

40
41 63. "Special benefit" is "the increase in fair market value attributable to the local
42 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
43 may receive by reason of the improvement is not measured alone by the physical character
44 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
45
46
47

1 of Seattle, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
2 the particular tract or property benefited by the entire improvement, and is it assessed
3 proportionately with the other property included within the assessment district?” *Id.* 165–
4
5 66.
6
7

8
9 64. The proposed final assessment erroneously overstates the special benefit of
10 LID improvements in a number of ways.
11

12
13 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
14 the Harbor Steps, Mr. Macaulay assumed room/rental rates would increase by 2.50% (low)
15 and 3.25% (high) due to the 2024 LID Improvements. Mr. Macaulay then uses these same
16 percentages (2.50% and 3.25%) to increase retail and parking. He then uses this
17 hypothesized increased revenue to calculate a new net operating income for the commercial
18 properties and capitalizes that to come up with an “After” valuation.
19
20

21
22 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
23 operating income remains the same as in the hypothetical “Before” condition but changes
24 the cap rate. For the Harbor Steps, the cap rate goes from 4.10% to 3.97% (low scenario,
25 creating a bigger value increase) and 4.00% (high scenario, creating a lower value increase).
26
27

28
29 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
30 benefit conclusion. For the Harbor Steps, this is an increase in property value of 2.75% due
31 to the LID Improvements.
32
33

34
35 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
36 and capitalization rates. When asked precisely what the basis is for his special benefit
37 percentage increases to revenue for each commercial property, he could not point to
38 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
39 is nothing in the report to allow a reader to understand how he came up with these
40
41
42
43
44
45
46
47

1 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
2
3 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
4
5 the basis for his belief that certain factors—liked increased connectivity—will increase
6
7 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
8
9 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
10
11 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
12
13 sources equally even though there was no separate analysis done for food and beverage or
14
15 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
16
17 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
18
19 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
20
21 properties.

22
23 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
24
25 check for commercial properties. But as explained above, no City witness has explained
26
27 how anyone, or all, of the sales are comparable to any particular commercial property within
28
29 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
30
31 in order to make sales “comparable,” he would have had to make adjustments to account for
32
33 Before and After conditions, but there is no way to understand how adjustments were made
34
35 because he “didn’t do a separate sales comparison approach where we showed adjustments
36
37 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
38
39 his adjustments were reliable, he said it would have simply been a “test of reasonableness.”
40
41 *Id.* at 127:10-128:24.

42
43 70. It also bears noting that any “internal review” of the special benefit estimates
44
45 would have been largely arbitrary given Mr. Macaulay’s testimony that there is no margin of
46
47 error. Indeed, given all the same information, he seemed to suggest that it would be

1 perfectly reasonable for another experienced appraiser to come up with special benefit
2 estimates that were five times higher than his estimates. 6/23/2020 Hrg. Tr. at 93:2-12; *see*
3
4 *also id.* at 89:20-90:2 (testifying that it might be reasonable for two appraisers with the exact
5 same quality of data to be 50% off). Ultimately, his repeated insistence that there is no
6
7 margin of error conflicts with the testimony of Taxpayer's experts and reaffirms that there
8
9 are absolutely no standards governing his process. *See id.* at 91:6-94:5. Even if the typical
10
11 margin of error (5%) is a "rule of thumb" and not a "hard legal standard," there are still
12
13 reasonable and unreasonable variations within the appraisal field. *See Examiner's*
14
15 Recommendation at IV.B.4. Thus, the special assessment is not actual, measurable or
16
17 special because it is arbitrarily assigned; and it is too small to realistically be supported by
18
19 appraisal techniques.
20
21

22 71. No evidence of special benefit. Meanwhile, there is "no actual evidence from
23 any seller or purchaser that the price was higher because of the LID improvements."
24
25 *Bellevue Plaza, Inc.*, 121 Wn.2d at 409. As in *Bellevue Plaza*, the City's appraiser "has not
26
27 identified any seller or buyer, or any particular property where the existence of the LID
28
29 improvements had an effect on the market price." *Id.* at 410-11. Meanwhile, Taxpayer has
30
31 explained that the property has not increased rental rates or revenue due to the forthcoming
32
33 LID Improvements, because, among other reasons (and apart from COVID), the
34
35 improvements ABS believes will generate value do not exist and will not for a number of
36
37 years to come. There are no comparable sales because the LID Improvements are not in
38
39 place, nor will they be until the end of 2024 if completed on schedule.
40
41

42 72. The fair market value of Harbor Steps' property has not changed due to
43 increased waterfront view. *Cf. Appeals of Jones*, 52 Wn.2d 143 (property was not specially
44
45 benefited from installation of new water main and fire hydrant where it was already
46
47

1 adequately supplied with water and afforded adequate fire protection). And in any event,
2
3 any value attributable to removal of the viaduct was to be excluded from the assessment
4
5 calculation.

6
7 73. There is no special benefit to the Harbor Steps because its apartment demand
8
9 is driven by proximity to downtown job centers. In fact, the LID improvements diminish the
10
11 value of Harbor Steps' property by drawing visitors away towards improvements that do not
12
13 abut the property and increasing competition in other areas of the city. *See Kuskys*, 85 Wn.
14
15 App. 493 (testimony of owners' expert that LID actually diminished value of property was
16
17 sufficient to rebut presumption that assessment was proper). The ground floor retail tenants
18
19 will be harmed by the LID improvements because the Overlook Walk and Union Street
20
21 connection improvements will likely direct foot traffic away from the Harbor Steps and
22
23 towards Pike Place Market. Less demand for Harbor Steps' retail businesses will result in
24
25 lower rents and less revenue. Mr. Macaulay did not account for any of these impacts. Harbor
26
27 Steps already has a high-quality connectivity to the waterfront and no data was presented to
28
29 justify a value lift based on additional connection points several blocks away. On cross-
30
31 examination, Mr. Macaulay could not point to any specific data in the ABS Special Benefit
32
33 Study justifying the precise special benefit to Harbor Steps, claiming only that the market
34
35 would generally support additional connection points to the waterfront amenities. *See*
36
37 6/23/2020 Hrg. Tr. at 48-50.

38
39 74. Moreover, the assessment formula is an attempt to distribute costs that do not
40
41 relate to special benefits. *See Bellevue Plaza, Inc.*, 121 Wn.2d at 416 (model cannot be
42
43 "merely a mathematical model that distributes costs").

44
45 75. The Special Benefit Study fails to address whether the \$346,000,000
46
47 estimated LID project cost takes into account the investment that would have occurred in the

1 LID area anyway. Furthermore, there is no spatial presentation concerning where dollars are
2 invested. This is a critical component of estimating which properties receive a direct benefit
3 from the improvements, versus more incidental benefits further from the park.
4

5
6 76. Mr. Macaulay also included personal property in his valuation of hotels even
7 though none of the assessment notices were for personal property (*see* Hrg. Exhibit 130) and
8 he did not include personal property values for any other types of property. 6/23/2020 Hrg.
9 Tr. at 62:5-11. This is contrary to an explicit disclosure in the Final Study stating that the
10 “[a]ppraisal applies to the land and building improvements only” (C-17 at 197). *See also*
11 Gibbons Decl. ISO Closing Stmt., ¶ 10 (dated 7/7/2020). This also resulted in hotels
12 receiving a disproportionately high LID assessment in comparison to other property types,
13 since hotels were the only property type subject to personal property LID assessments.
14 Fourth Decl. of Gordon ISO Closing Stmt., ¶ 11 (dated 7/7/2020); Gibbons Decl. ISO
15 Closing Stmt., ¶ 10. Further, inclusion of personal property in hotel valuations violated
16 notice procedures because hotel property owners only received notice that their real estate
17 was being assessed. *See* Fourth Decl. of Gordon ISO Closing Stmt., ¶ 12 (dated 7/7/2020).
18
19

20
21 77. With seemingly no basis, Mr. Macaulay calculated special benefit to personal
22 property at the same rate as real property. 6/23/2020 Hrg. Tr. at 134:5-24. So, for example,
23 a television at the waterfront Marriott is assigned a greater special benefit than the same
24 television at the Hyatt Regency. *Id.* at 134:25-135. But it is simply wrong to assume that
25 furniture and equipment is instantly worth more at a hotel closer to the waterfront, and
26 unreasonable to assign a value lift to personal property that is replaceable at the same cost
27 and may be obsolete before the LID improvements are even completed. Further, personal
28 property is highly depreciable, and likely to be fully depreciated or potentially discarded by
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 2024. *Id.*; *see also* Gibbons Decl. ISO Closing Stmt., ¶ 10. Thus, the hotel valuations must
2
3 be redone to correct for this error.

4
5 78. The proposed final assessment substantially exceeds the special benefit to the
6
7 property and is grossly disproportionate to similarly situated properties within the LID. For
8
9 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
10
11 Sections II.22, II.23, II.27, IV.B.4, and IV.B.11(a)(iii).

12 **State Environmental Policy Act and Other Environmental Permitting**

13
14
15 79. While this appeal is not challenging the City's environmental review and
16
17 permitting processes, those processes are relevant in determining the legality of the
18
19 assessments, and to assessing the delivery risk, the present value of the City's plans, and
20
21 ultimately the amount of the assessment. If the roll is finalized, the City will commit to
22
23 pursue projects that have not yet undergone environmental review (thus limiting the choice
24
25 of reasonable alternatives to those projects). For example, if the roll is finalized, the City is
26
27 committed to build all of LID Improvements, even though NEPA review of Pier 58 (and 63)
28
29 is just beginning. Further, the City has segmented environmental review, and still has a
30
31 gauntlet of federal, state and tribal review processes to complete before it will be clear what
32
33 the City can legally build, and when. *See Summary and Fiscal Note*, Sea. City Council Bill
34
35 No. 119447 at 3 (Jan. 28, 2019); *see also* SMC 25.05.070(A), SMC 25.05.440(D)(2)(b),
36
37 SMC 25.05.406 and their counterparts in the SEPA Rules, Chapter 197-11 WAC. Either the
38
39 City is violating SEPA and chapter 25.05 SMC by finalizing the assessment roll and
40
41 committing to reconstruction of Pier 58 and major street improvements without
42
43 environmental review, or the City's Final Special Study has improperly included and is
44
45 proposing to assess the Taxpayer the costs and special benefits of improvements that may
46
47 not get built. Either way, it is faulty process.

Due Process Rights

80. The City's failed to notify Harbor Steps sufficiently in advance of the hearing to allow Harbor Steps to obtain evidence and prepare to properly challenge the assessments. Because LID assessments involve a deprivation of property, affected owners have the right to a hearing as to whether the improvement resulted (or will result) in special benefits to their properties and whether their assessments are proportionate, which necessarily includes the right to adequate notice of the hearing. *Carlisle v. Columbia Irrigation Dist.*, 168 Wn.2d 555, 569–70, 229 P.3d 761 (2010).

81. The LID statute specifies that cities must mail notices giving the time and place of the hearing to the affected owners “[a]t least fifteen days before” the hearing and publish the notice once a week for 2 consecutive weeks in the city’s official newspaper, with the final publication at least 15 days prior to the hearing. RCW 35.44.090. However, strict compliance with the statute does not necessarily satisfy due process. *Hasit*, 179 Wn. App. at 956. The key inquiry is whether the owner had sufficient time to gather evidence (and secure their own appraisal), evaluate proportionality of the proposed assessments, and whether the owner asked for more time. *Id.* (noting that 15 days was entirely “insufficient for anybody to get an appraisal”).

82. The City’s Notice of Assessment was sent on December 30, 2019. And the Final Special Benefit Study has only been available for public review since January 7, 2020. Due to this short time frame, Harbor Steps requested a prehearing conference and scheduling order that would preserve and protect Harbor Steps’ right to analyze and respond to the Final Study, obtain expert appraisal testimony, conduct depositions, and to accommodate preliminary motions (*e.g.*, with respect to the interplay between SEPA and the City’s assessment of taxes for Pier 58 and Pike/Pine improvements). The Hearing Examiner

1 erroneously denied that request. For this reason, Taxpayer appeals the following portions of
2
3 the Examiner's Recommendation: I.B.
4

5 **VII. Relief Requested**
6

7 Harbor Steps respectfully requests that the City Council:
8

- 9 1. Reject the Hearing Examiner's recommended denial of Taxpayer's objection
10 and:
11
12 a. Cancel the Waterfront Local Improvement District No. 6751 proposed
13 final assessment dated December 20, 2019; or
14
15 b. Revise Taxpayer's Waterfront Local Improvement District No. 6751
16 proposed final assessment to \$0 (zero), or such amount as Taxpayer
17 establishes at the hearing in this matter; or
18
19 c. Remand the matter to the Hearing Examiner or City appraiser to
20 recalculate and reduce Taxpayer's assessment using recognized
21 appraisal techniques consistent with USPAP and:
22
23 i. Excluding any property value increase attributable to viaduct
24 removal and other planned WSDOT Improvements;
25
26 ii. Taking into account the effects of COVID-19 pandemic on the
27 value of Taxpayers property and other relevant developments
28 since October 2019;
29
30 iii. Accounting for and excluding (1) any special benefits from
31 existing or planning improvements that already provide
32 similar benefits to Taxpayers property, and (2) any special
33 detriments from construction and other anticipated LID-
34 related disamenities;
35
36
37
38
39
40
41

24 **Arguments**

25
26 EQR-HARBOR STEPS LLC owns the property that is subject to the proposed final
27
28 assessment described in Section IV.
29

30 Eqr-Harbor Steps LLC is amending its appeal as authorized in City of Seattle
31
32 Resolution 31979 to include additional arguments relevant to the revised Final
33
34 Recommendations of the Hearing Examiner issued on February 1, 2021. On February 4,
35
36 2020, Eqr-Harbor Steps LLC timely filed an objection to the assessment, which was based
37
38 on the Final Study. Eqr-Harbor Steps LLC further timely filed an appeal of the Hearing
39
40 Examiner's 2020 recommendations to the City Council. Eqr-Harbor Steps LLC maintains
41
42 and incorporates all objections and arguments raised in its appeal filed with the City Clerk
43
44 on September 22, 2020. This amendment is a supplement is to be read together with Eqr-
45
46 Harbor Steps LLC's appeal filed on September 22, 2020. Eqr-Harbor Steps LLC
47

1 incorporates by reference all filings, evidence, and pleadings filed by any party before the
2 Hearing Examiner as authorized by the Hearing Examiner, including without limitation all
3 records pertaining to the November 2020 through February 2021 remand hearing ordered by
4 Council.
5
6
7

8
9 **IV. Amended Arguments on Appeal**

10 EQR-HARBOR STEPS LLC supplements its appeal of the Hearing Examiner's
11 recommendation to deny Eqr-Harbor Steps LLC's objection to the City of Seattle's
12 Waterfront Local Improvement District No. 6751 proposed final assessment dated
13 December 30, 2019 against the following property:
14
15
16

17 King County Parcel No. 1976200075
18 Site Address: 1301 1st Ave., Seattle, Washington
19 Proposed Final LID Assessment for Parcel: \$1,376,078.86
20
21
22

23 To avoid repetition, Eqr-Harbor Steps LLC incorporates the evidence and arguments
24 raised before the Hearing Examiner and before the City in its September 22, 2020 appeal,
25 into this amended appeal.
26
27

28
29 **A. The Anticipated Special Benefits to Eqr-Harbor Steps LLC's Property**
30 **should be Discounted to Present Value and Assessments Adjusted as**
31 **Appropriate**
32

33 On remand, the City's appraiser acknowledged that special benefits to parcels can be
34 reduced, even to zero, if those benefits accrue in the future. *See* Declaration of Robert
35 Macaulay at 20 (Dec. 4, 2020). For that reason, the City's appraiser recommended the
36 assessment on CWF-442 (the Act Theatre) be reduced to zero because a restriction prohibits
37 redevelopment of the theatre's condominium until 2035, and therefore, any special benefit to
38 the theatre parcel is too remoted to support a current assessment. *Id.* The Examiner
39 accepted that recommendation. The City's appraiser further acknowledged that benefit
40 reductions due to delays in delivery of benefits, e.g., to 2030 or 2025, could be determined
41
42
43
44
45
46
47

1 by discounting to present value. *Id.*; Macaulay Dep. at 51:16-17, 52:9-13 (Dec. 22, 2020)
2 (benefits to theatre “would be a long enough time out to where it wouldn’t measurably affect
3 value.”). Nevertheless, the appraiser refused to more generally discount his benefit
4 calculations to present value because the general benefits are not anticipated from the LID
5 improvements until after they are completed in 2024, 5 years after his 2019 assessment, and
6 perhaps not until 2029. The appraiser’s and Examiner’s recommendation to reduce the
7 theatre’s assessment to zero is reasonable. His refusal to make other discounts to his special
8 benefit calculation, and related assessments, to account for the delay between the assessment
9 and realization of any special benefits to Taxpayer’s property is unreasonable, contrary to
10 standard appraisal practice, and renders the other proposed Waterfront LID special
11 assessments, and the Examiner’s Recommendations, arbitrary and capricious and based on
12 “fundamentally wrong methods.”
13
14

15 All special benefit taxes assessed by a municipality must be based on “actual,
16 physical and material [special benefits that are] not merely speculative or conjectural.”
17 *Heavens v. King Cty. Rural Library Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965).
18 Additionally, the assessments may not materially exceed the actual special benefit conferred
19 by the LID Improvements. *Id.* Further, LID assessments must be proportionate. *Id.* Failure
20 to meet any of these legal requirements is fatal to the assessment. Taxpayer’s September 22,
21 2020 appeal challenged the City appraiser’s valuation because, among other flaws, it did not
22 discount benefits the City estimated would accrue to the properties from improvements to be
23 delivered sometime between 2024 and 2029 to present, 2019 value. Now, add to that the
24 appraiser’s inconsistent approach, selectively applying discounting to one (that we know of)
25 property while treating all or most others (including Taxpayer’s) differently, and
26 withholding any discount. This inconsistent treatment is both arbitrary and capricious and
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 disproportionate, where the appraiser has arbitrarily decided that no assessment is warranted
2 for some properties because the benefit are too distant, while assessing other properties as
3 though distant benefits have already been secured. As Taxpayer identified in its September
4 22, 2020 appeal, the City appraiser's own materials show that benefits for a project like this
5 may not accrue for at least five years after they are completed, in 2029. *See* Gibbons Decl.
6 ISO Closing Stmt., Ex. C at 24, 30-31 (dated 7/7/2020). The City Council should either
7 reject the improper calculation of the benefit or remand and require the appraiser to discount
8 the benefits to net present value.
9

10
11
12
13
14
15
16
17 **B. The City's Appraiser's Disregard of Data on Remand is Another**
18 **Example of How His Analysis is Unreliable, Not Admissible under Frye**
19 **or ER 702, and His Proposed Special Assessments are not based on**
20 **Actual, Measurable and Special Value Increases from the anticipated**
21 **LID Improvements.**
22

23 The City's appraiser was provided actual performance data for the remanded hotels,
24 including their average daily room rates, from which he had been instructed to "recalculate"
25 hotel "before" values on remand. *See* Hearing Examiner Initial Recommendation at p. 117
26 (Sept. 8, 2020). The appraiser refused, explaining that, had he done so, his before values
27 would be "too low." His remand analysis demonstrates that his whole "income approach to
28 valuation", used for both hotels and other commercial properties, like Taxpayer's, is
29 contrived speculation on speculation. The City's appraiser disregarded these hotels' actual
30 net income in a supposed "income analysis." *See e.g.*, Deposition of Robert J. Macaulay,
31 7:10-13 (December 22, 2020) (Attached as Exhibit A to Objector's Statement on Remand
32 for Case Nos. CWF-0318, 0413, 0415, 0417, 0418, 0423, 0429, 0436).
33
34
35
36
37
38
39
40
41

42 Taxpayer's appraiser submitted an appraisal which was similarly realistic and
43 specific to the property but was disregarded. Taxpayer's appraiser demonstrated the actual
44 value of the property is \$105,557,000, and the LID assessment should be reduced to reflect
45
46
47

1 this before-value. *See* CWF-0426 Statement of Objections, Exh. 6, Appraisal of Brian
2
3 O'Connor (Jan. 31, 2020).

4
5 **C. In Light of Covid's Continuing Impact on Eqr-Harbor Steps LLC and**
6 **other Downtown Property Owners and other Material Changes Since**
7 **October 2019, the LID Should be Cancelled, or at Least Assessments**
8 **Recalculated, to take Into Account Property Value Reductions**
9

10 In Taxpayer's September 22, 2020 appeal, Taxpayer requested the Council "[t]ak[e]
11 into account the effects of the COVID-19 pandemic on the value of Taxpayer's property and
12 other relevant developments since October 2019." When Washington's first COVID
13 restrictions were imposed in March and April 2020, there was an assumption that they
14 would be short-lived. A year later, the Puget Sound area is finally again moving to "Phase
15 II." Many downtown hotels are closed, and our hotels are not anticipated to fully recover
16 for another 5 years. Retail stores are boarded up. Homelessness and related challenges have
17 gotten much worse. The City has already imposed higher minimum wages and taxes on
18 businesses to try to fund recovery. The West Seattle Bridge and other bridges are in
19 immediate need of repairs and maintenance. Pier 58, instead of the vibrant waterfront park
20 hypothesized in the City's appraisal to exist as of October 2019, collapsed, and is several
21 years from completion, as a best case. In current circumstances, a downtown tax to fund
22 new, non-essential park improvements against financially strapped taxpayers, and likely
23 passed through to financially strapped tenants and customers would be unfair to taxpayers
24 and a misallocation of city resources. COVID threw everyone for a loop. But as the City
25 rethinks its budget priorities for the next few years, and its potentially funding sources,
26 Taxpayer respectfully requests that the City dissolve the assessment, at least until it (and
27 property owners) have a chance to recover, and that any assessment take into account the
28 changed circumstances since this appeal process started on February 4, 2020 to avoid
29
30
31
32

43
44
45
46
47

1 unnecessarily and perhaps permanently killing downtown properties and businesses in the
2 name of bettering them.
3

4
5 **V. Relief Requested**

6 Particularly in light of the Committee's decision not to take further comment, Eqr-
7 Harbor Steps LLC respectfully request that each Committee member carefully review the
8 record transmitted to Council before voting on our appeal.
9

10 EQR-HARBOR STEPS LLC respectfully reiterates its request from the September
11 22, 2020 appeal that the City Council:
12

- 13 1. Cancel the Waterfront Local Improvement District No. 6751 proposed final
14 assessment dated December 30, 2019; or
15
- 16 2. Revise Taxpayer's Waterfront Local Improvement District No. 6751
17 proposed final assessment to \$0 (zero), or such amount as Taxpayer
18 establishes at the hearing in this matter; or
19
- 20 3. Grant the Examiner's recommended remand but with instructions to
21 recalculate and reduce Taxpayer's assessment using recognized appraisal
22 techniques consistent with USPAP and
23
 - 24 a. Excluding any property value increase attributable to viaduct removal
25 and other planned WSDOT Improvements;
26
 - 27 b. Taking into account the effects of the COVID-19 pandemic on the
28 value of Taxpayer's property and other relevant developments since
29 October 2019;
30
 - 31 c. Accounting for and excluding (1) any special benefits from existing
32 or planned improvements that already provide similar benefits to
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 Taxpayer's property, and (2) any special detriments from construction
2 and other anticipated LID-related disamenities;
3

4
5 d. Accounting for and including only those actual benefits anticipated to
6 accrue to Taxpayer's property based on its location relative to Pier 58,
7 Overlook Walk, and the Promenade, and specific elements of the LID
8 Improvements;
9

10
11
12 e. Discounting anticipated special benefits to present value, based on
13 reliable estimates regarding when special benefits will start accruing
14 following completion of the LID Improvements; and
15

16
17 f. Accounting for such other issues specific to Taxpayer's property
18 relevant to calculation of such assessment; and
19

20
21
22 4. Grant such further relief as the City Council deems just and proper.

BEFORE THE HEARING EXAMINER
CITY OF SEATTLE

In re Proposed Final Assessment Roll for
Local Improvement District No. 6751
("Waterfront LID")

Case Nos. CWF-0425, 0426, 0427, 0440, AND
0441

DECLARATION OF ED LEIGH

I, Ed Leigh, declare as follows:

1. I have personal knowledge of the facts stated below and am competent to testify regarding the same.
2. I am the Vice President of Investments for Equity Residential. I testified in this appeal as to my position, qualifications and employment history.
3. Eqr-Harbor Steps LLC is owned by Equity Residential. Eqr-Harbor Steps LLC owns a four-tower apartment complex encompassing parcel nos. 1976200070, 1976200075, 1976200076, and 7666202465. These parcels are located at 1306 Western Ave., 1301 1st Ave., 1201 1st Ave., and 1212 Western Ave., Seattle WA, and are the subject

DECLARATION OF ED LEIGH – 1

1 of case nos. CWF-0425, -0426, -0427, -0440. These properties are known as the "Harbor
2 Steps" apartment towers.
3

4 4. Eqr-Second & Pine LLC is also owned by Equity Residential, and owns real
5 property parcel no. 7683890010, which is located at 206 Pine St., Seattle WA, and is the
6 subject of case no. CWF-0441. This property is known as the Helios apartments.
7
8

9 5. Equity Residential appealed the City's proposed final assessment for
10 Waterfront LID No. 6751 for each of the properties described above.
11
12

13 **HARBOR STEPS (CWF-0425, -0426, -0427, -0440)**
14

15 6. The Harbor Steps are multifamily residential apartment buildings with
16 ground floor retail. Additionally, the Harbor Steps are on a pedestrian corridor connecting
17 the downtown retail core to the waterfront amenities.
18
19

20 **HELIOS (CWF-0441)**
21

22 7. Helios is a multifamily residential apartment building located a block east of
23 Pike Place Market, and approximately two blocks from the proposed overlook walk.
24
25

26 **COVID-19 Calculations**
27

28 8. After we appealed our assessments, the Covid-19 pandemic broke out,
29 causing significant disruptions in Seattle and around the world. Based on our current rents,
30 compared with Brian O'Connor's appraisal calculations to support our appeals, our
31 properties have decreased in value in the range consistent with those described by John
32 Gordon. In Mr. Gordon's April 21, 2020 Declaration, he noted that property values for
33 hotels in Downtown Seattle would be at least 10% to 15% lower when compared with the
34 values as of October 2019 and January 2020. The same is true for our properties. The year-
35 over-year rent reductions that I have observed in our Downtown Seattle assets are consistent
36 with Mr. Gordon's valuation reduction, assuming that rents do not quickly rebound. We

25 Facsimile: 206.359.9000
26
27

28 **III. Statement of Taxpayer's Interest**
29

30 Harbor Steps owns the property that is subject to the proposed final assessment
31 described in Section IV. The property at issue is a multifamily residential apartment building
32 with ground floor retail. Additionally, there is a pedestrian corridor connecting the
33 downtown retail core to the waterfront amenities.
34
35

36 The basis of the proposed assessment is a Final Special Benefit/Proportionate
37 Assessment Study for Waterfront Seattle Local Improvement District ("Final Study"), dated
38 October 1, 2019 and prepared by Robert Macaulay with ABS Valuation (the City's
39 appraiser). The Final Study proposes assessments that are purportedly limited to paying for
40 the LID-funded components—namely, the Promenade, Overlook Walk, Pioneer Square
41
42
43
44
45
46
47

1 Street Improvements, Union Street Pedestrian Connection, Pike/Pine Streetscape
2
3 Improvements, and Pier 58 (together, the “LID Improvements”). The Final Study purports
4
5 to exclude charges for other improvement projects in the Central Waterfront, and
6
7 specifically those WSDOT had already agreed to pay for and construct: viaduct demolition,
8
9 the new Alaskan/Elliott Way surface street, the new/improved Seawall, the State Route 99
10
11 Tunnel, the Pier 62 rebuild, Bell Street improvements, and parking spaces WSDOT planned
12
13 fronting piers between Pike and Madison (together, the “WSDOT Improvements”). But
14
15 because construction was not complete on the LID Improvements or the WSDOT
16
17 Improvements at the time the Final Study was prepared, Mr. Macaulay’s October 1, 2019
18
19 “Before” and “After” valuations are both based on hypothetical conditions rather than actual
20
21 facts. On February 4, 2020, Taxpayer timely filed an objection to the assessment, which was
22
23 based on the Final Study.

24
25 **IV. Matter Under Appeal**

26 Harbor Steps appeals the Hearing Examiner’s recommendation to deny Taxpayer’s
27
28 objection to the City of Seattle’s Waterfront Local Improvement District No. 6751 proposed
29
30 final assessment dated December 30, 2019 against the following property:

31
32
33 King County Parcel No. 1976200076
34 Site Address: 1201 1st Ave., Seattle, Washington
35 Proposed Final LID Assessment for Parcel: \$1,767,509.04

36
37 See Examiner’s Recommendation at 61-62, 105-106. To avoid repetition, Harbor Steps
38
39 incorporates the evidence and arguments raised before the Hearing Examiner into this
40
41 appeal. In particular, Harbor Steps points the City Council to Taxpayer’s initial Appeal
42
43 Petition, *Frye* motion, Closing Brief submitted at the close of its case-in-chief (dated
44
45
46
47

1 4/16/2020), and supplemental Closing Statement submitted at the close of the City's case-in-
2 chief (dated 7/7/2020).¹
3

4 As discussed more fully below, Taxpayer specifically appeals the following Findings
5 and Recommendations in the Hearing Examiner's September 8, 2020 Recommendation:
6
7 Pages 61-62, 105-106, Sections II.6, II.7, II.13, II.14, II.15, II.18, II.19, II.20, II.21, II.22,
8
9 II.23, II.24, II.25, II.26, II.27, II.28, II.29, II.30, II.31, II.32, II.33, IV.A, IV.B.1, IV.B.2,
10
11 IV.B.3, IV.B.4, IV.B.5, IV.B.6, IV.B.7, IV.B.8, IV.B.9, IV.B.11(a), IV.B.11(a)(i),
12
13 IV.B.11(a)(ii), IV.B.11(a)(iii), IV.B.11(a)(iv), IV.B.11(c), IV.C.3, IV.C.4, IV.C.5, IV.C.7,
14
15 IV.C.8, IV.C.9, IV.C.11, IV.C.12, IV.C.14, IV.C.18
16
17

18 Taxpayer also appeals the Hearing Examiner's failure to make findings of fact or
19 recommendations on material issues raised during Taxpayer's appeal that were supported by
20 law, expert testimony, and fact. The Final Study fails in numerous ways to satisfy the basic
21 requirements of a LID assessment study, and the Examiner's Recommendation ignores the
22 many deficiencies in the Final Study. In fact, the only instances in which the Examiner
23 recommended anything other than denial of objectors' appeals were where the City's
24 appraiser confessed error. The appraiser's proposed assessments, and the Examiner's
25 Recommendations, would have the City impose arbitrary and capricious Waterfront LID
26 special assessments based on "fundamentally wrong methods."
27
28
29
30
31
32
33
34
35
36
37
38
39

40 ¹ Because the City has not provided "metered index numbers," our appeals cannot reference
41 them. See SMC 20.04.110. However, as part of the prehearing conference, we recommend that the
42 Public Works committee secure and provide appellants with such a record, so that the appeals can
43 then be supplemented with that additional information, so as to make the Committee's consideration
44 of each individual appeal more efficient and fair. Until that is provided, unless otherwise stated,
45 citations to the record before the Hearing Examiner are to the record for CWF-0233. Based on the
46 Examiner's electronic records, it appears most of the materials submitted on behalf of all objectors
47 retained by Perkins Coie are part of this case file.

1 The special benefit for which special taxes are assessed must be “actual, physical and
2 material and not merely speculative or conjectural.” *Heavens v. King Cty. Rural Library*
3 *Dist.*, 66 Wn. 2d 558, 563, 404 P.2d 453 (1965). For a proposed assessment roll to comply
4 with the law, the assessments may not materially exceed the actual special benefit conferred
5 by the LID Improvements. *Id.* The special benefit assessment cannot include charges for
6 general benefits enjoyed by the public at large. *Id.* Further, LID assessments must be
7 proportionate. *Id.* Failure to meet any one of these legal requirements is fatal to the
8 assessment. In this case, the proposed assessment fails each of the legal requirements for
9 special assessments and must be annulled as arbitrary or capricious, or founded on
10 fundamentally wrong methods.
11
12
13
14
15
16
17
18
19
20
21

22 **Legal Requirement:** Actual, non-speculative special benefit

23
24 **ABS Study:** Estimates a hypothetical benefit based on “Before” values that increase
25 “actual 2019” values (unstated) assuming the WSDOT Improvements were in place in
26 October 2019 (they were not), and an “After” value purporting to assess the value of
27 properties with the LID improvements in place at least five years before anticipated
28 completion.
29

30
31 **Legal Requirement:** Cannot materially exceed the special benefit

32
33 **ABS Study:** ABS calculates a special benefit of \$4,511,000 assuming the LID
34 Improvements were in place and providing benefit in October 2019. However, the LID
35 Improvements will not be completed until the end of 2024 if the City meets its current
36 schedule, and many of WSDOT’s alternative improvements will not be built. The present
37 value of future improvements deliverable in five years is significantly lower than the
38 current value of improvements that already exist. Further, ABS’s own materials show that
39 benefits may not accrue for at least five years after they are completed, in 2029. If the
40 hypothesized special benefits are discounted to present value, the assessments materially
41 exceed the hypothesized special benefits.
42
43
44

45 **Legal Requirement:** Actual, non-speculative special benefit—Date of valuation/COVID
46
47

1 **ABS Study:** The City has not finalized the assessment roll. After the City's appraiser
2 prepared his Final Study in October 2019, and the City issued its preliminary roll in
3 December 2019, COVID devastated downtown hotel and retail properties. The Hearing
4 Examiner finds that COVID is irrelevant because it happened after ABS's appraisal and
5 the City's preliminary roll. On the contrary, the City's assessments have yet to be made
6 and must be based on actual special benefits. While that does not mean ABS's appraisal
7 was wrong when completed, values and benefits need to be reanalyzed before assessments
8 are finalized in light of the unprecedented changes to the downtown real property market.
9

10
11 **Legal Requirement:** Actual benefit that cannot materially exceed special benefit—
12 Assessment cannot include value attributable to future WSDOT Improvements.
13

14
15 **ABS Study:** The City's appraiser asserts that the City is not collecting assessments "based
16 on the value of WSDOT's planned improvements." See Final Study at 3. However, the
17 City's own expert, Mark Lukens, acknowledged that was false. In the "Before" condition,
18 the City's appraiser increased 2019 property market values as though WSDOT had
19 completed its work by 2019. The proposed assessment is against this hypothetical
20 WSDOT-enhanced "Before" value, which ABS acknowledges is (to some unstated extent)
21 higher than actual 2019 market values. The City is collecting an assessment against both
22 the 2019 current values and the phantom 2019 WSDOT market value lift, in direct
23 contravention of law and the City's promise not to impose an assessment based on the
24 value of viaduct demolition and the other components of WSDOT's planned work.
25
26

27 **Legal Requirement:** Benefits must be special, not general
28

29
30 **ABS Study:** The City's appraiser fails to determine or explain what general benefits arise
31 due to the LID Improvements. However, the far-reaching and public nature of the
32 improvements make any benefit arising from them general—not special.
33

34 **Legal Requirement:** Benefits must be "physical and material and not merely speculative
35 or conjectural"
36

37
38 **ABS Study:** Not only are the improvements not yet "physical or material," but
39 environmental review and permitting for the City's proposed LID Improvements is not
40 complete, and the LID improvements are not anticipated to be complete until the end of
41 2024. The appraiser nevertheless hypothesized that they were all completed as of 2019 in
42 a manner consistent the City's then-current proposals, which were in many respects merely
43 conceptual designs.
44

45
46 **Legal Requirement:** Must comply with appraisal standards
47

1 **ABS Study:** ABS's valuation methodology cannot be tested. It is a hybrid of "Individual" and "Mass" appraisal techniques, but fails to meet USPAP requirements for either. Until
2 the Examiner admonished ABS, ABS even asserted its analysis was "confidential and
3 proprietary." ABS's analysis and conclusions can neither be tested nor replicated. The
4 Final Study fails to meet basic standards for admissibility and must be remanded.
5
6

7
8 **Legal Requirement:** Actual and measurable special benefit
9

10 **ABS Study:** ABS's proposed assessments are assigned rather than measured, as
11 demonstrated by formulas in ABS's spreadsheets. The percentage assignments are based
12 on a host of "micro-judgments" that are not supported by any documentation, nor capable
13 of replication or quality assurance/quality control. The assessments are undocumented,
14 unreliable, and not supported by empirical studies, data, or reports.
15
16

17 **Legal Requirement:** Actual and measurable special benefit—Park benefits must be
18 supported by empirical evidence
19

20 **ABS Study:** Dr. John Crompton, the world's preeminent expert regarding the economic
21 value of parks and other public amenities and on whom ABS purported to rely, testified
22 that ABS had completely misapplied his work and dramatically overstated both the
23 distance to which economic benefits might extend from the LID Improvements and the
24 extent of any anticipated benefit within the potentially benefited area.
25
26

27 **Legal Requirement:** Actual special benefit—Must take into account potential
28 disamenities
29

30 **ABS Study:** The appraiser ignores the negative value impact of five years or more of
31 construction, as well as other potential disamenities associated with public places.
32
33

34 **Legal Requirement:** Cannot prematurely commit to build
35

36 **ABS Study:** The City has not completed NEPA review or other entitlement process for its
37 Pier 58 plans or planned Pike Pine or Pioneer Square improvements for which assessments
38 are being imposed. But finalizing the roll is a commitment by the City to build the
39 improvements, which is a violation of legal process and commits the City to build things it
40 may not secure permission to build.
41
42
43
44
45
46
47

1 In addition to these general objections, there are property-specific issues raised by
2 Taxpayer as to which the Examiner also erred, discussed in the course of the appeal
3 statement below.
4
5

6
7 **V. Standard of Review**
8

9 “When considering the assessment roll, the city council sits ‘as a board of
10 equalization.’” *Hasit, LLC v. City of Edgewood*, 179 Wn. App. 917, 948, 320 P.3d 163
11 (2014) (quoting RCW 35.44.080(2)). “As such, the council or hearings officer ‘will consider
12 the objections made and will correct, revise, raise, lower, change, or modify the roll or any
13 part thereof or set aside the roll.’” *Id.* at 949 (quoting RCW 35.44.080(3)).
14
15

16 The proposed assessments are presumed correct, “unless overcome by clear, cogent
17 and convincing evidence.” *Hasit*, 179 Wn. App. at 948. This standard is less deferential
18 than the heightened presumption of correctness on judicial appeal because “applying these
19 elevated standards at the municipal hearing would afford unwarranted deference to a report
20 prepared under contract by a private appraisal firm.” *Id.* at 949. Importantly, “a
21 presumption is not evidence and its efficacy is lost when the other party adduces credible
22 evidence to the contrary.... The sole purpose of a presumption is to establish which party has
23 the burden of going forward with evidence on an issue....” *In re Indian Trail Trunk Sewer*
24 *Sys.*, 35 Wn. App. 840, 843, 670 P.2d 675 (1983). In other words, because objectors have
25 presented credible evidence showing that the City’s proposed assessment is arbitrary,
26 capricious and founded on a number of fundamentally wrong foundations, the burden shifts
27 to the City to prove the assessments are actual, measurable, special, non-speculative and
28 proportionate. The City failed that burden.

43
44
45
46
47

1 **VI. Grounds for Appeal**

2 Harbor Steps appeals the Hearing Examiner's Findings and Recommendations on the
3 following grounds.
4

5 **Taxpayer Not Required to Provide A Special Benefit Study**

6
7 1. Contrary to the Examiner's findings and recommendations, there is no
8 requirement that experts or property owners provide an alternative special benefit
9 calculation under these circumstances—to do so would also require the same improper
10 speculation the City's expert engaged in, given the timing and information provided. *See,*
11 *e.g.,* Decl. of Anthony Gibbons ISO Closing Stmt., ¶ 3(dated 7/7/2020); *see also* Decl. of
12 Ben Scott ISO Closing Stmt., ¶ 3(dated 7/7/2020); Decl. of Brian O'Connor ISO Closing
13 Stmt., ¶ 3(dated 7/7/2020). A Washington court has explained: "[W]e have explicitly
14 rejected an argument that, because certain protestors 'failed to offer expert testimony at the
15 city council hearing[,] the presumptions [in favor of the assessment] were still operative as
16 to their property.'" *Hasit*, 179 Wn. App. at 946 (quoting *In re Indian Trail Trunk Sewer*, 35
17 Wn. App. at 843); *see also Kuskay v. City of Goldendale*, 85 Wn. App. 493, 933 P.2d 430
18 (1997) (although appraiser did not submit an appraisal, he provided expert opinion showing
19 that improvements actually diminished value of the property). In fact, no independent
20 evidence is required at all if, for example, objectors show that the assessment was grounded
21 on a fundamentally wrong basis due to an error in the City's appraiser's methods—as is the
22 case here. *Hasit*, 179 Wn. App. at 947 (citing *Doolittle v. City of Everett*, 114 Wn. 2d 88,
23 106, 786 P.2d 253 (1990)). As a simple example, a property owner could simply point out
24 that the square footage assumed in the City's appraisal was incorrect.
25

26
27 2. On March 5, 2020, Harbor Steps presented testimony from experts Ben Scott
28 and Brian O'Connor. The Hearing Examiner failed to meaningfully respond either the expert
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 testimony or the expert appraisal reviews. Instead, the Hearing Examiner simply dismissed
2 Harbor Steps' expert evidence as insufficient appraisal evidence. *See* Examiner's
3 Recommendation at IV. C.7–9. This is contrary to law.
4

5
6 3. For these reasons, Taxpayer appeals the following portions of the Examiner's
7 Recommendation: Sections II.13, II.14, II.15, IV.A, IV.B.11(a), IV.C.7, IV.C.8, IV.C.9, and
8 IV.C.11.
9

10
11
12 **No Actual, Measurable, Non-speculative, Proportionate, Special Benefit**

13
14 4. RCW 35.43.040 provides cities and towns authority for ordering local
15 improvements and for levying and collecting special assessments “on property specially
16 benefited thereby[.]” The cost and expense of the local improvement “shall be assessed upon
17 all the property in accordance with the special benefits conferred thereon.” RCW 35.44.010.
18

19
20 5. No analysis of general benefits. Special assessments have been “held valid
21 for the construction and improvement of streets, curbs, gutters, sidewalks, and for the
22 installation of sanitary and storm sewers, drains, levees, ditches, street lighting, and water
23 mains.” *Heavens*, 66 Wn. 2d at 563. “All such assessments have one common element:
24 they are for the construction of local improvements that are appurtenant to specific land and
25 bring a benefit substantially more intense than is yielded to the rest of the municipality.” *Id.*
26

27
28 6. Harbor Steps' property is not specially benefited by the LID Improvements.
29 The primary purpose and effect of the LID Improvements are to benefit “members of the
30 whole community” and the public at large. *See, e.g., id.* at 565 (“it is plain that a public
31 library is for the benefit of the members of the whole community individually and
32 collectively who may be served by it”). Mr. Macaulay's own chapter of the LID Manual
33 states clearly that appraisers should “[c]onsider general benefits as well as special benefits”
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 (Hrg. Exhibit 117 (LID Manual) at 58²) and he admits that “general benefits probably accrue
2 to the LID area” as well (*see* 6/23/2020 Hrg. Tr. at 22:4-12). Taxpayer’s expert confirmed
3 that if an appraiser “identifies both general and special benefits, these benefits should be
4 clearly distinguished and explained, and only special benefits should be included in the
5 After assessment.” Gibbons Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020); *see also*
6 3/3/2020 (A. Gibbons) Hrg. Tr. at 96:6-97:4; 3/5/2020 (B. O’Connor) Hrg. Tr. at 158:13-
7 159:8, 192:8-193:2. It is undisputed that Mr. Macaulay did not analyze or measure general
8 benefits, including those arising from construction necessary to meet basic design standards.
9 *See* Hrg. Exhibit 117 (LID Manual) at 58 (“[c]onsideration may also be given to those
10 construction costs related to meeting design standards which may be general benefits as
11 distinct from construction costs emanating from requirements of the LID project”). To the
12 extent Taxpayer’s property may benefit from the LID improvements, the benefit is general
13 and incidental, and failure to consider general benefits was a fatal flaw in the City’s
14 methodology. For these reasons, Taxpayer appeals the following portions of the Examiner’s
15 Recommendation: Sections IV.B.7, and IV.B.11(a)(i), IV.B.11(a)(iv), and IV.C.4.

16
17

² “Hrg. Exhibits” refer to exhibits that were submitted on behalf of multiple objectors represented by Perkins Coie during its seven days of hearing before Hearing Examiner Vancil (March 3, March 5, March 11, March 12, April 13, April 14, and April 16, 2020) and during the two days of cross-examination of the City’s witnesses (June 23, 25 and 26, 2020). For ease of reference, Taxpayer has attached a master list of the hearing exhibits as Attachment A to this appeal notice.

1 *Appeals of Jones*, 52 Wn.2d 143, 324 P.2d 259 (1958) (assessment against land at
2 intersection for new water main for hydrant held invalid because land was already afforded
3 functional hydrant at nearby street Here, Taxpayer testified that the LID Improvements are
4 not necessary to the business of their income-producing properties, all of which already have
5 sufficient access to the waterfront, downtown restaurants, and other amenities necessary for
6 their tenants and clients. And for residential properties, like Harbor Steps, the assumption
7 that an increase in tourism will cause lifts in property value is both anecdotally and
8 empirically unsupported. Additionally, the construction of new access points is in fact a
9 negative point for the Harbor Steps, which are located at an existing connection between the
10 downtown core and the waterfront. The LID improvements will draw foot traffic away from
11 the Harbor Steps, increasing competition in other areas of the city. The fact that there is no
12 case law differentiating between binary improvements and parks does not change the law
13 prohibiting assessments on properties already adequately served by existing amenities. *See*
14 Examiner's Recommendation at IV.C.3 (reasoning that "no case law is provided to support
15 the differentiation between a hardscape benefit and the more ephemeral benefits of park").
16 Nor does the Examiner's reasoning excuse the City's failure to account for existing
17 amenities as part of the special benefit calculation. As Dr. Crompton testified, existing view
18 amenities may in fact diminish the incremental effect of new park improvements on the
19 value of properties, much like turning on a weak light in an already brightly illuminated
20 room. *See* Hrg. Exhibit 94 (Crompton's Report) at 12-13.

21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37
38
39
40
41 8. To the extent benefits can be considered "special" as opposed to general, they
42 are nominal or nonexistent for many properties even in the Central Waterfront, which
43 already has a promenade, viewpoints, as well as connecting streets and bridges. *Douglass v.*
44 *Spokane Cty.*, 115 Wn. App. 900, 64 P.3d 71 (2003) (properties' fair market value did not
45
46
47

1 change due to expansion of sewer service *near* owners' parcel which were already
2 connected). Here, the primary reasons a user chooses a particular apartment is not proximity
3 to the waterfront. Instead, the reason residents choose to live in the Harbor Steps apartments
4 is proximity to their places of employment and other amenities downtown. See 3/5/2020 (E.
5 Leigh0 Hrg. Tr at 113:13-114:20; 124:3-126:9. For example, without any supporting written
6 analysis, Mr. Macaulay offhandedly concludes that the Harbor Steps apartments would
7 benefit from increased connectivity from being four to five blocks from the Overlook Walk
8 even though the properties currently have direct access to the waterfront via the Harbor
9 Steps. 6/23/2020 Hrg. Tr. At 48:1-50:25; see also B. Scott Decl., ¶ 7. Mr. Leigh testified that
10 he did not anticipate a benefit, and that the Harbor Steps retail component would suffer if a
11 measurable portion of waterfront-bound pedestrian traffic moved north to the market. See
12 also B. Scott Decl., ¶ 6 (describing failure to analyze how existing retail is harmed by foot
13 traffic being pulled away towards new amenities). Even if the City could assess for a view
14 change (and it has promised not to assess for viaduct removal), the fair market value of
15 Harbor Steps' property has not changed because the LID Improvements have not improved
16 the property's waterfront view or access to the waterfront, nor will they when the City
17 anticipates completion in 2024. For these reasons, Taxpayer appeals the following portions
18 of the Examiner's Recommendation: Sections IV.C.3, IV.B.9, and IV.C.3.

19
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34
35
36
37 9. No analysis of special detriments. The Final Study fails to properly account
38 for special detriments. *See Kusky*, 85 Wn. App. at 501 (city failed to consider the costs to
39 owners for removal and cleanup of underground storage tanks discovered during the
40 improvement project). The Property owner representative for Harbor Steps, Ed Leigh,
41 testified that property values may in fact be negatively impacted by the LID Improvements
42 due to loss of parking, increased traffic and noise, and increased potential for crime,
43
44
45
46
47

1 homelessness and sanitation issues. Mr. Leigh testified that the assessment is an immediate
2 expense for Harbor Steps that comes with no immediate increase in revenue, thereby
3 decreasing property values. See 3/5/2020 (E. Leigh) Hrg. Tr. at 126:10-129:9; 227:8-229:10.
4
5 And Harbor Steps does not expect near term the increases assumed in ABS Valuations'
6
7 spreadsheets or the Final Study. Although Mr. Macaulay claims he analyzed impacts on the
8
9 City's planned elimination of 450 parking stalls on a parcel-by-parcel basis, there is no
10
11 explanation of how lost parking might be a detriment, and no property-specific parking
12
13 analysis in any of his materials. 6/23/2020 Hrg. Tr. at 185:20-24; 186:14-187:12.
14
15

16
17 10. Likewise, there was no analysis of the risks associated with disamenities such
18
19 as increased crime, homelessness and unsanitary conditions, and Mr. Macaulay did not
20
21 quantify the risk that the waterfront will not in fact be maintained. 6/23/2020 Hrg. Tr. at
22
23 193:21-194. Instead he relied on the maintenance ordinance (Ordinance 125761) to dismiss
24
25 these concerns. However, Mr. Foster explained that although the ordinance anticipates that
26
27 City Council will appropriate \$4.8M each year for waterfront operation, it does not bind any
28
29 future city councils or guaranty funding. 6/26/2020 Hrg. Tr. at 12:7-20; 15:2-10.³ And if
30
31 the City fails to appropriate that baseline funding, there is an option to suspend or terminate
32
33 the maintenance agreement. *Id.* at 13:4-14:2.
34

35 11. There was also no consideration of negative impacts from another four-plus
36
37 years of construction (at least). Mr. Macaulay reasoned that construction impacts are not
38
39 compensable in eminent domain cases. However, there is nothing in the LID statutes or case
40
41 law allowing him to dismiss these actual, non-speculative impacts. Because future special
42
43
44

45 ³ The Examiner suggests that the issue of whether future City Councils are bound is not at issue.
46 However, the issue of maintenance was part of Mr. Macaulay's special benefit analysis and therefore
47 the assessment amounts.

1 benefits calculations are inherently speculative, Washington's eminent domain statute
2 specifically allows condemnees to postpone special benefits assessments until improvements
3 are in place. RCW 8.25.220; *State v. Green*, 90 Wn.2d 52, 56, 578 P.2d 855 (1978).
4

5
6 Moreover, the studies that Mr. Macualay relied on demonstrate that construction disamenity
7 is real and does have a near-term negative effect on property values. *See* Gibbons Decl. ISO
8 Closing Stmt. (dated 7/7/2020), Ex. C at 24 (during construction of Rose Kennedy
9 Greenway, the Greenway district "significantly" lagged in value). For these reasons,
10 Taxpayer appeals the following portions of the Examiner's Recommendation: Sections
11 II.25, IV.B.8, and IV.B.9.
12

13
14 12. Special benefit estimate is speculative. When calculating a special benefit,
15 "[f]air market value cannot include a speculative value." *Bellevue Plaza, Inc.*, 121 Wn.2d at
16 411. "When an appraiser uses a factor 'beyond the knowledge of reasonable certainty', it
17 becomes pure speculation." *Id.* (quoting *In re Local Imp.* 6097, 52 Wn.2d 330, 335–36, 324
18 P.2d 1078 (1958)).
19

20
21 13. Assuming without conceding that one day, the City's planned LID
22 Improvements might increase the value of neighboring properties to some extent, that
23 potential benefit is many years away and speculative. While appraisers tolerate some degree
24 of estimation and judgment, Taxpayer's expert testified that Mr. Macaulay's Final Study is
25 far too speculative to satisfy industry practices and standards.
26

27
28 14. Although LIDs are sometimes finalized prior to completion of improvements,
29 this is typically just six month or a year prior, and the assessments are otherwise supported
30 by the near-term construction of the improvements. *See* 3/3/2020 (A. Gibbons) Hrg. Tr. at
31 117:20-118:9; 119:5-120:9; 122:15-124:9. By contrast, the estimated special benefits here
32 will not be realized for four or five years. In the meantime, there is permitting risk,
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 construction risk, and general economic risk (e.g., COVID), which renders ABS's 2019
2 hypotheticals inherently speculative and unreliable because it is impossible to predict which,
3 and to what extent, different factors will impact value. *Id.* at 51:13-53:5. Ultimately, Mr.
4
5 Macaulay concedes that there is inherent uncertainty in valuing the future delivery of
6
7 projects because "we can't read the future." 6/23/2020 Hrg. Tr. at 79:18-80:8. As he
8
9 testified: "I just don't know what the market value would be as of the date the project would
10
11 be finally constructed" because "[t]here could be a lot of elements in the market that did
12
13 occur between now and then that impact value." 6/25/2020 Hrg. Tr. at 212:9-13; *see also id.*
14
15 at 211:8-20 (no way to know if his estimates will be higher or lower than comparable sales
16
17 in 2024 because "markets tend to fluctuate over time" and "I can't predict the future").
18
19

20
21 15. The record is clear that while no one can know what "special benefit" might
22
23 accrue to these properties in four years (if any), we do know that there are no actual benefits
24
25 now. The LID improvements provide no immediate special benefit to property owners
26
27 because the bulk of the components are still in design stages. *Cf. Hasit*, 179 Wn. App. 917
28
29 (assessments calculated on a fundamentally wrong basis by including costs for an oversized
30
31 sewer system for future users). For example, notwithstanding the questionable hypothesis
32
33 that apartments will benefit from an expected increase in tenant interest when the
34
35 improvements are complete, it is undisputed that tenants are not coming in larger numbers
36
37 and paying higher rental rates now because of something happening five years down the
38
39 road. See O'Connor Decl. ISO Closing Stmt., ¶ 7 (dated 7/7/2020) (no apartment leased
40
41 today for 18 months would rent at a higher rate due to improvements coming in 2024).
42

43 16. Further, there are no "plans and specifications" on file with the Clerk's Office
44
45 for the LID Improvements, and it is unlawful to move to final assessments without such
46
47 "plans and specifications." Ordinance 125760, Section 3; *Local and Road Improvement*

1 *Districts Manual for Washington State 6th Edition*, pp. 3, 19, 31, 44 (2009). It is also
2
3 unlawful to bind future City Councils and future budgets to spend hundreds of millions of
4
5 dollars on projects still early in the design process. *See* Washington Attorney General
6
7 Opinion 2012 No. 4 (May 15, 2012)); *cf. City of Seattle v. Rogers Clothing for Men, Inc.*,
8
9 114 Wn.2d 213, 787 P.2d 39 (1990) (assessment upheld because City has apportioned costs
10
11 of programs and included “only so much of the overall costs” that took place within and
12
13 benefitted the assessed properties).

14
15 17. The COVID-19 crisis highlights how fundamentally speculative and unfair it
16
17 would be to base a special benefit assessment on twin 2019 hypotheticals for improvements
18
19 anticipated to be delivered five years later. Even before COVID, it was speculative to
20
21 assume that market highs experienced in October 2019¹ would be sustained through 2024,
22
23 after an already extraordinarily long expansion period. *See, e.g.*, 3/5/2020 (E. Leigh) Hrg.
24
25 Tr. at 119:15-123:6; 3/3/2020 (A. Gibbons) Hrg. Tr. at 117:6-118:9, 119:17-120:9. And Mr.
26
27 Macaulay conceded: “[W]hen I was doing my analysis in October 2019, who would have
28
29 thought that this COVID issue would happen?” 6/23/2020 Hrg. Tr. at 80:3-8. At his
30
31 deposition in late February, his “thought process was that the market was going to continue
32
33 to go up,” but now, they are already irrelevant. *Id.*; *see* Gibbons Decl. ISO Closing Stmt. at ¶
34
35 12 (dated 7/7/2020). Although COVID does not change actual values as of October 2019
36
37 (*see* Examiner’s Recommendation at 109), the pandemic has impacted *current* values and
38
39 rendered the hypothetical October 2019 Final Study valuations outdated.

40
41 18. As another example of how future events could affect the accuracy and
42
43 reliability of the City’s 2019 proposed assessment, Taxpayer recently requested the Hearing
44
45 Examiner re-open the record to allow the City to explain whether the assessments against
46
47 property owners within the LID are, in fact, being used by the City to fund the emergency

1 dismantling and reconstruction of Pier 58.⁴ It has been reported that the City plans to use
2 LID funding to pay for the expedited, emergency repairs and replacement.⁵ If true, the City
3 would be improperly imposing costs on property owners within the LID for improvements
4 that are required to maintain the safety of Pier 58 and to remove a threat to critical salmon
5 habitat and City infrastructure—this does not provide any special benefit to LID property
6 owners.
7
8
9
10
11

12 19. There is also no certainty the improvements will be delivered on time. Mr.
13 Foster testified that 2024 is not a hard deadline for delivery of the improvements, and a
14 delay in construction schedule would not constitute a “material change” under the City
15 Council’s ordinance authorizing the improvements. In other words, the City cannot
16 guarantee that the LID Improvements will be delivered as expected in 2024 or any time after
17 that. 6/26/2020 Hrg. Tr. at 18:5-13. Meanwhile, Taxpayer’s experts Reid Shockey and
18 Richard Shiroyama testified via declaration as to the City’s permitting gauntlet, and
19 potential delays and project changes inherent in those processes, that call into question the
20 assumption that the City can deliver the LID Improvements by 2024. Hrg. Exhibits 110

1 (Shockey Decl., dated 4/15/2020); 111 (Shiroyama Decl., dated 4/15/2020); 107 (Anderson
2 Decl., dated 4/15/2020).
3

4
5 20. Unsurprisingly, of the over one hundred LIDs Mr. Macaulay has worked on,
6 he could not point to a single one where the assessment roll was finalized five years in
7 advance of the anticipated project completion. *See* 6/23/2020 Hrg. Tr. at 16:1-22. Likewise,
8 he has never recommended final special assessments based on designs less than 30 percent
9 complete, other than in this case. *Id.* at 17:22-18:2. Nevertheless, he proceeded with his
10 2019 hypothetical before, hypothetical after analysis because the City “wanted to get
11 moving ahead with the project” and gave him assurances that designs would not change. *Id.*
12 at 66:17-25. He performed no independent due diligence to determine the reliability of the
13 City’s estimates for completion of the LID Improvements, or to ensure that proposed
14 designs or cost estimates were not going to materially change. *Id.* at 78:14-79:13. Yet he
15 agreed that if any of his assumptions are incorrect, his opinion of market value would need
16 to be revised. 6/23/2020 Hrg. Tr. at 68:19-69:8; *see also id.* at 64:13-65:12; 67:10-16;
17 68:11-18.

28
29

30 21. The City has cited no authority—and Taxpayer is aware of none—that
31 affirms the use of hypothetical, anticipatory Before and After values in order to estimate and
32 assess taxes for “actual” special benefits that will not accrue for another five years (if all
33 goes off without a hitch). To the contrary, the hypothetical assumption that all of the Before
34 and After Improvements are constructed as of October 1, 2019 allows Mr. Macaulay to base
35 his estimates on “pure speculation.” *Bellevue Plaza, Inc.*, 121 Wn.2d at 411. For these
36 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
37 Sections II.6, II.7, II.33, IV.B.1, IV.B.2, IV.B.3, IV.B.5, IV.B.6, IV.B.11(c), IV.C.12,
38 IV.C.14, and IV.C.18.
39
40
41
42
43
44
45
46
47

1 22. Failure to discount special benefit estimates to account for risks and present
2 value. Due to the inherent uncertainty, Taxpayer's expert opine that the Final Study should
3 have accounted for risks associated with delivery of the improvements (including permitting
4 risk, construction risk, general economic risk) and any special damages associated with
5 interim construction. 3/3/2020 (A. Gibbons) Hrg. Tr. at 119:17-120:9, 59:20-60:20. In
6 addition, as is typical appraisal practice, Mr. Macaulay should have discounted the
7 anticipated 2024 benefit to account for the time value of money. *Id.* at 54:17-55:1; *see also*
8 Gibbons Decl. ISO Closing Stmt., ¶ 13, 16 (dated 7/7/2020) ("Appraisers routinely consider
9 the impact of future conditions [through] discounted cash flow analysis.").

10 23. Mr. Macaulay acknowledged that appraisers can discount the value of a
11 future condition not in place at the date of valuation and can discount for the time value of
12 money. 6/23/2020 Hrg. Tr. at 74:1-75:1. And he agreed that if improvements are not built
13 until 2024, "[y]ou would be discounting it back to a present value." *Id.* at 77:2-19.
14 Discounting would also have been consistent with his approach for analyzing special
15 benefits to vacant land. He testified that the difference between similarly situated vacant
16 sites slated for development and already developed sites was that the labor, capital and risks
17 associated with development had not yet been borne for those vacant sites. Therefore, the
18 vacant land was not valued as highly and received a smaller assessment. 6/19/2020 Hrg. Tr.
19 at 28:1-13; *see also* 6/18/2020 Hrg. Tr. at 205:9-12. *A fortiori*, a project that has not been
20 fully permitted, has not completed environmental review, and has not reached full design is
21 presently worth significantly less.

22 24. The City's hotel expert, Mr. Lukens, likewise explained that to calculate
23 present value, an appraiser would consider discount rates for land development to account
24 for inflation, entitlement risks, cash flow issues, construction, etc. 6/26/2020 Hrg. Tr. at

1 184:5-185:22. And Mr. Lukens agreed that it would be reasonable for an appraiser to refer to
2 the PricewaterhouseCoopers Korpacz study for applicable discount rates. *Id.* at 187:18-
3 189:23; *see also* Gibbons Decl. ISO Closing Stmt, ¶ 17 (dated 7/7/2020).
4

5
6 25. Applying the Q19 Korpacz rates and assuming *arguendo* that Macauley's
7 total estimated special benefit is correct, \$447,908,000 discounted to 2019 present value for
8 raw land to be developed by 2024 is approximately \$153,600,000. *See* Gibbons Decl., ¶ 17,
9 Ex. A. Notably, this is lower than the City's proposed \$171,000,000 assessment. Thus,
10 ignoring momentarily all of the other methodological and other flaws discussed here and in
11 Taxpayer's case-in-chief, and assuming that the LID Improvements provide special benefits
12 as soon as they are complete in 2024, Mr. Macaulay's hypothetical assessment materially
13 exceeds special benefits when reduced to present value. Further, to the extent the City is
14 arguing that because they are permitted to assess 100% of the special benefit, the special
15 benefit estimate can be off by 60.8% because they only assess 39.2% of that benefit, the City
16 is again wrong. After applying proper discounting, the City's proposed special benefit
17 assessment is far more than 39.2% of the total estimated special benefit, and in fact exceeds
18 100% of the total estimated special benefit.
19
20

21 26. But even the assumption that the LID improvements would deliver benefits
22 as soon as they were complete in 2024 is not supported by the studies Mr. Macaulay relied
23 on. Rather, those studies demonstrate that a discount period of five years is conservative.
24 *See* Gibbons Decl. ISO Closing Stmt., ¶ 18 (dated 7/7/2020). In particular, HR&A's study
25 on the Rose Kennedy Greenway in Boston (included in Mr. Macaulay's backup files)
26 indicates that during the construction period, the Greenway district "significantly" lagged in
27 value (i.e., construction disamenity). *Id.*, Ex. C at 24. That study also recognized that the
28 "reorientation of development to capture value takes time"—specifically, 12-13 years. *Id.* at

47

1 30-31 (discussing New York City High Line and San Francisco Embarcadero
2 improvements). Given the lengthy delay, any prediction of future special benefits is
3 speculative, especially during the construction phase where values are likely to decline. And
4 assuming the LID Improvements take a similarly long period of time after they are complete
5 to start producing tangible property value benefits, each additional year of delay results in
6 further discount to the present value of any future alleged benefit. Gibbons Decl. ISO
7 Closing Stmt., ¶ 19, Ex. A.
8

9
10 27. Applying the same discounting methods described above and in Mr. Gibbons
11 declaration, the 2019 net present value of ABS's estimate for benefits that actually start
12 accruing in 2029 is just \$42,204,597, only 9.4% of the benefits ABS hypothesized, even
13 before applying the 39.2% percentage assessment. *Id.* For Taxpayer, this means at most the
14 100% assessment should be no more than \$424,936.20. Anything more would permit the
15 City to assess Taxpayer based on a hypothetical assumption that these improvements are in
16 place and providing benefit, and ignore the risks, construction disamenity, and time value of
17 money that normal appraisal principles would take into account. *Id.*, ¶ 20. Proportionality
18 would counsel that the assessment should be only 39.2% of that assessment cap, or
19 \$166,574.99.
20
21

22 28. Attachment C includes two Excel spreadsheets applying these discounting
23 methods to Taxpayer's assessment. It is undisputed that special benefits will not actually
24 accrue until the LID Improvements are complete in 2024. Accordingly, the first spreadsheet
25 demonstrates that discounting the City's hypothetical October 2019 special benefits to
26 present value would reduce Taxpayer's assessment to \$606,410, exclusive of any other
27 flaws in the City's proposed assessment. The second spreadsheet shows even more drastic
28 reductions after taking into account (1) Taxpayer's exerts' estimated "Before" valued based
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 on actual data from Taxpayer; (2) a rough discount for property value loss due to COVID-
2
3 19; and (3) discounting to present value for 5 years (*i.e.*, from 2024 when the City
4
5 anticipates completing the LID Improvements) and 10 years (*i.e.*, from 2029 to account for
6
7 the time it takes for the improvements to capture property value.) After such reductions,
8
9 Taxpayer's assessment would be just \$465,940 (for the 5-year discount) or \$128,025 (for the
10
11 10-year discount). Neither of these spreadsheets address other issues raised by Taxpayer's
12
13 appeal, but are intended to help demonstrate how unfair and inflated the City's proposed
14
15 hypothetical assessment is. The Hearing Examiner's Recommendation simply dismisses
16
17 Taxpayer's discounting argument without legal or factual analysis; that failure is error.

18 **Appraisal and Assessment Calculation Methods Are Flawed**

19
20
21 29. The "general rule is that each lot, piece, or parcel of land should be assessed
22
23 separately" for purposes of local improvement district special assessment. *Doolittle*, 114
24
25 Wn.2d at 97.

26
27 30. It is proper to sustain a challenge to an assessment, even without the appraisal
28
29 testimony from the owner, where the objector's expert establishes that the assessment was
30
31 "clearly grounded upon a fundamentally wrong basis" due to an error in the method
32
33 employed by the City's appraiser. *See, e.g., Doolittle*, 114 Wn.2d at 106.

34
35 31. The City's appraiser purports to utilize the income method of valuation but
36
37 relied on inaccurate revenue and market data, as discussed further below.

38
39 32. The City's appraiser purports to utilize the comparable sales method of
40
41 valuation, but no City witness attempted "to characterize any one, or all of them, as
42
43 comparable to [Taxpayer's property]." *See Bellevue Plaza*, 121 Wn.2d at 406 (finding
44
45 "several serious flaws" in ABS's LID analysis in that case, including that the appraiser
46
47 "attache[d] a list of a number of land sales within the CBD, but ma[de] no attempt to

1 characterize any one, or all of them, as comparable to any particular property within the LID”).
2
3 And no City witness could explain how specific adjustments were made to these sales to
4
5 account for value increases due to the hypothesized Before and After Improvements. For this
6
7 reason, Taxpayer appeals Section II.23 of the Examiner’s Recommendation.
8

9 33. Special assessment improperly includes value lift from the Before
10 Improvements. Mr. Macauley is required to exclude (and claims to have excluded) any
11
12 assessment based on value attributable to demolition of the viaduct and the planned WSDOT
13
14 Improvements, which WSDOT had independently committed to fund. However, Mr.
15
16 Macauley did not calculate the actual market value of LID properties in October 2019 and
17
18 did not separately analyze the hypothetical increase to property values attributable to
19
20 WSDOT’s planned improvements. *See* 6/23/2020 Hrg. Tr. at 41:11-18 (did not estimate a
21
22 current value and then separately calculate a hypothetical “With WSDOT” Before value);
23
24 *see also* Gibbons Decl. ISO Closing Stmt., ¶ 8 (dated 7/7/2020); *see also* Gibbons 1/30/2020
25
26 Letter (attached to Appeal Petition) at 4; Gibbons 5/2/2018 Letter (attached to Appeal
27
28 Petition) at 3-4. Without any documented basis or support, Mr. Macauley simply “ma[de] a
29
30 judgment a call” on what occupancy and rates would have been for the commercial
31
32 properties assuming all of the WSDOT Improvements are completed as of 2019. Macauley
33
34 Depo. at 129:19-130:11. For example, Mr. Macauley surmised that Brian O’Connor’s
35
36 conclusion that the “Before” value for Harbor Steps was overstated by \$88M was perhaps
37
38 due to the fact that Mr. O’Connor was looking at current income numbers and not
39
40 accounting for the value of the “Before” conditions. However, when asked whether the
41
42 value of the of the “Before” conditions is lower or higher than \$88M, Mr. Macauley had no
43
44 clue because he did not do this analysis. 6/23/2020 Hrg. Tr. at 46:9-17:25. This outright
45
46 omission precludes any independent evaluation of the true market “Before” values. *See*
47

1 6/23/2020 Hrg. Tr. at 44:25-45:9. It also fails to meet professional appraisal standards; if an
2 appraiser uses current sales data to infer values, then the appraiser must explain how he
3 analyzed that data and other information to come up with the hypothetical value. 3/3/2020
4 (A. Gibbons) Hrg. Tr. at 128:1-130:4. This includes not just removal of the viaduct, but also
5 other road, pedestrian and landscaping improvements WSDOT had already committed to
6 make.
7

8
9
10
11
12 34. However, because Mr. Macaulay testified that he did include some WSDOT-
13 related value-lift in the “Before” values, it follows that part of the special assessment
14 improperly is based on value attributable to the WSDOT Improvements. As shown by
15 mathematical formulas in his spreadsheets, Mr. Macaulay applies a special benefit
16 percentage to Before values. So, for example, if Mr. Macaulay believed the WSDOT
17 Improvements would add \$10,000,000 in value, then his method of analysis assuming a 3%
18 special benefit assignment would result in \$300,000 of over-assessment. *See* Gibbons Decl.
19 ISO Closing Stmt., ¶ 9 (dated 7/7/2020). At a minimum, the Final Study should be redone
20 to properly exclude the value of Before Improvements from the assessments. For these
21 reasons, Taxpayer appeals the following portions of the Examiner’s Recommendation:
22 Sections II.19, II.29, and IV.B.11(a)(ii)
23

24
25 35. Special benefits were assigned rather than measured. Mr. Macaulay
26 arbitrarily “assigns” special benefits to Before values instead of measuring them for each
27 property. *See* 1/30/2020 Gibbons Letter (attached to Appeal Petition); 3/5/2020 (B.
28 O’Connor) Hrg. Tr. at 147:10-149:21; 3/3/2020 (A. Gibbons) Hrg Tr. at 88:25-89:3; 90:8-
29 91:13. Based on formulas in spreadsheets that Mr. Macaulay used to analyze the
30 commercial properties, Taxpayer’s experts concluded that Mr. Macaulay based adjustments
31 on hypothesized very small increases to property revenue and very small reductions to cap
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 rates to “calculate” an “After” value due to the coming 2024 LID Improvements.

2 Attachment B (ABS Spreadsheet). These series of micro adjustments were based on
3
4 “professional judgment” that are neither shown nor replicable.
5

6 36. For these reasons, Taxpayer appeals the following portions of the Examiner’s
7
8 Recommendation: Sections II.19, and IV.B.11(a)(iii).
9

10 37. Special benefit falls within margin of error. The Final Special Benefit Study
11
12 applies an estimated value enhancement of less than 4%, which is generally within the
13
14 margin of error for appraisals and, therefore, not a reliable difference. *See Bellevue Plaza,*
15
16 *Inc.*, 121 Wn.2d at 401 (must substantiate use of percentages when allocating assessments).
17
18 Taxpayer’s experts explained that if two appraisers independently arrive at values within 5%
19
20 of one another, this difference is considered reasonable as it falls within the standard margin
21
22 of error accepted in the profession. 3/3/2020 (A. Gibbons) Hrg. Tr. at 164:2-9; 3/5/2020 (B.
23
24 O’Connor) Hrg. Tr. 201:7-204:8. Because Mr. Macaulay’s micro-special benefit percentages
25
26 fall far below that 5% margin, “there is no way of authenticating” such incremental changes
27
28 because “[m]arket forces completely obliterate any tiny little noise factor like that.” *See*
29
30 3/3/2020 (A. Gibbons) Hrg. Tr. at 160:23-161:5. Mr. Macaulay agreed during his deposition
31
32 that 0.25% is too small to measure. Macaulay Depo. at 25:17-25. Additionally, the fact that
33
34 “Before” values are also based on a hypothetical that adds some unstated incremental value
35
36 to actual 2019 values exacerbates this issue—the ability for an appraiser to discern the
37
38 micro-value differences between hypothetical conditions that are so similar (the WSDOT
39
40 improvements compared to the LID improvements) “verges on being ludicrous.” 3/3/2020
41
42 (A. Gibbons) Hrg. Tr. at 89:4-90:7.
43

44 38. Even if it were possible to accurately tease out such a miniscule hypothetical
45
46 value change due to improvements coming five years later, experts testified that there is no
47

1 data to justify the mathematical adjustments—they are just the appraiser’s guesses as to
2
3 what he felt the changes (hypothetically) would be. *See* 3/3/2020 (A Gibbons) Hrg. Tr. at
4
5 88:21-88:24 (“you cannot measure one percent difference in a high-rise building for this
6
7 kind of a medium ... it’s simply assigned to a before value”). For these reasons, Taxpayer
8
9 appeals the following portions of the Examiner’s Recommendation: II.27 and IV.B.4.

10
11 39. No analysis of value increase attributable to individual components of the
12 LID Improvements. The Final Special Benefit Study lacks clarity to fairly estimate a small
13
14 percentage difference between hypothetical Before and After conditions. Throughout his
15
16 testimony, Mr. Macaulay could not explain what benefit arose from specific Before/After
17
18 descriptions in the Addenda even though he testified that he relied on these to calculate
19
20 special benefits. 6/23/2020 Hrg. Tr. at 26:21-30:10. When asked where in his report
21
22 someone might be able to determine how he attributed value to After conditions described in
23
24 the Addenda, he answered that that was “not the scope of the assignment” because he was
25
26 asked to look at all of the projects as a whole. 6/23/2020 Hrg. Tr. at 30:3-8. But he admitted
27
28 that the six components were not actually a continuous project, that he was viewing them
29
30 together because the City asked him to, and that if he were to view them independently,
31
32 there was a low probability that properties in the north would specially benefit from
33
34 improvements in the south and vice versa. *See* 6/25/2020 Hrg. Tr. at 27:18-28:5.

35
36
37 40. Not only did he fail to analyze benefits from each of these non-contiguous
38
39 improvements, his familiarity with descriptions as whole was tenuous at best. *See, e.g.,*
40
41 6/23/2020 Hrg. Tr. at 26:21-30:10 (Mr. Macaulay could not explain what specific benefit
42
43 arose from specific Before/After descriptions in the Addenda); *cf. Anderson v. City of*
44
45 *Issaquah*, 70 Wn. App. 64, 851 P.2d 744 (deprivation of due process where building design
46
47 objectives that guided regulators’ assessment of architectural plans for buildings along a

1 “signature street” were so vague that they amounted to ad hoc review based on the
2 regulators’ subjective impressions and feelings).⁶ It became clear through his testimony that
3 even though he used the renderings as “visual aid[s] in appraising the property in the before
4 and after” to “visually see what the differences would be,” he could not explain what
5 specific elements in the visuals added or reduced value. *Id.* at 36:3-39:12. For example,
6 when shown a rendering of a two-lane road going down to one-lane in the After condition
7 near the Pike Street Market, he dismissively reasoned there would be no potential impact on
8 traffic because cars could still technically get through. *Id.* at 171:11- 173:11. When shown a
9 rendering of street improvements on Pike/Pine, he posited absurdly that seasonal variation
10 could explain the depiction of the same trees in the After condition nearly twice as tall as in
11 the Before. *Id.* at 173:17-175:4. For these reasons, Taxpayer appeals the following portions
12 of the Examiner’s Recommendation: II.27 and IV.B.4.

13
14
15
16
17
18
19
20
21
22
23
24
25 41. Special assessment is not supported by comparable studies, data or reports.
26
27 Mr. Macaulay’s references to empirical research do not justify his fundamental assumption
28 that the LID Improvements will lead to meaningfully increased real estate values for
29 Taxpayer. Indeed, no City witness was able to explain how ABS Valuation used
30 comparable sales or information from the “over twenty-five studies and reports” to arrive at
31 very precise special benefit increases for residential and commercial combined properties,
32 including Taxpayer’s property. For example, although Mr. Macaulay stated that no single
33
34
35
36
37
38
39
40

41 ⁶ As an aside, this admission suggests that there should have been an explicit City Council
42 finding that properties within the LID would benefit from the improvements as a whole. *See* RCW
43 35.43.050. Without this finding, the cost and expense of each component must “be ascertained
44 separately, as near as may be, and the assessment rates shall be computed on the basis of the cost and
45 expense of each unit.” *Id.* In other words, Mr. Macaulay should have estimated the benefit to each
46 property from each component separately, consistent with the law and in recognition of his testimony
47 that not all properties benefit from all components.

1 report or study was directly on point due to the unique nature of the LID Improvements (*see*,
2
3 *e.g.*, 6/25/2020 Hrg. Tr. at 146:21-147:8), he could not explain how he made specific
4
5 adjustments in his parcel-by-parcel analysis other than to say that the studies generally
6
7 provided “some background to base decisions on.” *See* 6/23/2020 Hrg. Tr. at 161:5-162:12;
8
9 *see also* 6/26/2020 Hrg Tr. at 118:7-19 (did not make any specific adjustments to account
10
11 for similarities and differences between these improvements and the comparable parks he
12
13 looked at).

14
15 42. Mr. Macaulay purports to rely on Dr. Crompton’s research to justify the
16
17 assignment of incremental increase of 0.5% to 4% to property values within the LID.
18
19 However, among other critiques, Dr. Crompton testified that Mr. Macaulay’s reliance on his
20
21 research misinterprets his work in critical ways, including because the LID Improvements
22
23 manifest the characteristics of a parkway (not a park), and his research indicates that most of
24
25 a *park*’s impact on single-family home values occurs within a 500-foot range (or 1.5 blocks
26
27 in Seattle). *See* Hrg. Exhibit 94 (Crompton’s report). Further, updated research shows park-
28
29 related value increases are in fact smaller; that estimated increases are “best guesses” rather
30
31 than predictions of property value increases in a particular city; and that percentages do not
32
33 account for diminishing returns after taking into account water views, which would be the
34
35 driving value enhancer. The latter is especially true in a city like Seattle where the sloping
36
37 topography grants most properties in downtown a water view.

38
39 43. Rather than addressing Dr. Crompton’s critiques, Mr. Macaulay simply states
40
41 that this was just one source of information that was not entirely relevant because, among
42
43 other things, Dr. Crompton’s research dealt with parks and not streetscapes. However, Dr.
44
45 Crompton’s critiques were based on Mr. Macaulay’s own testimony that the core “park”
46
47 improvements are the Promenade, Overlook Walk, and Pier 58. Macaulay Depo. at 178:15-

1 180:2 (explaining that for purposes of “drawing boundaries around a park” he was
2 considering only at Overlook Walk, Promenade, and Pier 58). Based on this testimony, Dr.
3
4 Crompton concluded that 500 feet via road from “park” improvements is just one or two
5
6 Seattle blocks and that Mr. Macaulay “inappropriately extend[ed] the LID impact
7
8 significantly beyond that which the park study indicated (even if it was legitimate to use the
9
10 park review’s findings).” Hrg. Exhibit 94 (Crompton’s Report) at 7. Indeed, the LID area
11
12 extends even past 2,000 feet from the core “park” improvements, which is the outer limit of
13
14 impact applicable to “community parks”—which the LID Improvements are not. *Id.*

15
16 44. Further, Mr. Macaulay’s testimony that he analyzed streetscapes, parkways,
17
18 greenways, and park-amenities separately contradicts his insistence that he viewed all of the
19
20 six LID components together as one entity. *See* 6/23/2020 Hrg. Tr. at 167:15-180:16. And
21
22 based on the attention given to Dr. Crompton’s work in the Final Study and supporting
23
24 materials, it was clearly an important—if not *the* most important—source of information for
25
26 estimating special benefits (especially with respect to the condos).⁷ No City witness
27
28 adequately explained exactly how Dr. Crompton’s research informed ABS Valuation’s
29
30 parcel-by-parcel analysis.
31

32
33 45. The destination parks discussed in the Final Special Benefit Study do not
34
35 provide reliable, comparable, and valid support for the calculation of special assessments
36
37 here. *See* Gibbons 5/2/2018 Letter at 4. None of the parks cited in the Final Special Benefit
38
39 Study were funded by a LID. And in virtually all of those cases, the park improvements
40

41
42 ⁷ Of the 62 files in Mr. Macaulay’s “2019 Report Info” folder, which he explained contains all of
43 the studies he relied on to prepare the Final Study (*see* Hrg. Exhibit 122 at ¶ 12; 6/23/2020 Hrg. Tr.
44 at 152:10-154:18), 10 are authored by Dr. Crompton and 9 cite Dr. Crompton. Further, it appears
45 Dr. Crompton’s study is the only one that found property value increases up to 2,000 feet from a
46 park (or streetscape) improvement—other studies estimated premiums for real estate only much
47 closer or cited to Dr. Crompton.

1 dramatically restored unimproved or blighted areas, and properties evaluated were within
2
3 two or three blocks of the park.

4
5 46. ABS's claimed reliance on three economic studies to support property value
6 increase is also flawed. The HR&A study does not inform what value increases are
7
8 expected from the LID Improvements because it projects increases to tourism from *all* of the
9
10 Waterfront Projects (not just those funded by the LID) and is based on tourism data from
11
12 dissimilar parks in other cities,⁸ making the methodological application to the LID
13
14 speculative. Further, Mr. Macaulay appears to have selectively ignored the HR&A Study's
15
16 conclusion that there would be *no new net visitors* from downtown residents as a result of
17
18 the LID Improvements and could not explain how this impacted his condo analysis.
19
20 6/25/2020 Hrg. Tr. at 152:15-153:21. The Texas A & M study on "The Impact of Parks on
21
22 Property Values" primarily focused on whether the benefits accrue to the larger community
23
24 rather than properties adjacent to the park. And the 2014 New York City Department of
25
26 Transportation study is not based on real estate transactions and market sales and fails to
27
28 substantiate any link between increased retail sales and property values. Moreover, this
29
30 study only looked at impact either directly abutting the streetscape improvement, or a couple
31
32 hundred feet for plaza-like improvements.
33

34
35 47. Meanwhile, Mr. Macaulay decided not to include the Trust for Public Lands
36
37 (TPL) Study in the Final Report even though it is Seattle-specific. *Id.* at 171:21-17; Hrg.
38
39 Exhibit 124. One explanation of that this omission could be TPL's estimate of the economic
40
41

42
43 ⁸ These included distinct destination parks like Golden Gate Park, Hudson River Park, Rose
44 Kennedy Greenway, and Millennium Park where tourist "capture rates" varied from 5% (Rose
45 Kennedy Greenway in Boston) to 44% (Golden Gate Park in San Francisco). Further, the calculated
46 expected tourists visiting the LID park was calculated using data from only from New York City, a
47 notorious tourist destination.

1 impact of the *whole park system* on the Seattle economy is much lower—\$30 million as
2 compared with HR&A’s estimate of \$191 million for just the waterfront improvements, and
3 thus would counsel a much lower assessment. Hrg. Exhibit 124 at 3. Regardless, when
4 asked whether he considered that HR&A’s estimated LID impact is six times greater than
5 TLP’s assessment of Seattle’s entire park system, his surmised that it was because the
6 HR&A Study came out in 2019, whereas the TPL Study came out in 2011. *See* 6/23/2020
7 Hrg. Tr. at 172:19-173:10. But, he did not do any additional analysis and did not adjust his
8 assumptions to account for this difference, which may be partly explained by the fact that
9 the TPL study is Seattle-specific. *Id.* at 173:11-174:1. The TPL Study also estimated that
10 approximately 3.44% of King County tourists visit Seattle primarily because of the city
11 parks, whereas HR&A estimated that 55% of visitors would visit primarily because of the
12 waterfront improvements.

13
14
15
16
17
18
19
20
21
22
23
24
25 48. Although proximity to the improvements is a key factor in all of these
26 studies, Mr. Macaulay could not explain in what circumstances he measured distance as the
27 crow flies or via travel routes. *See* 6/23/2020 Hrg. Tr. at 180:17-182:19. And he seemed to
28 not understand that for both the Trust for Public Lands study and Dr. Crompton’s study,
29 benefits extending out 2,000 feet were only observed for community parks that exceeded 40
30 acres. *See* 6/25/2020 Hrg. Tr. at 145:2-21. By contrast, the total size of the LID
31 Improvements is approximate 20 acres and it is not a community park.⁹

32
33
34
35
36
37
38
39 49. There is no explanation in the Final Study or the supporting materials of how
40 the studies or comparable sales were used to derive values for Taxpayer’s property. For
41

42
43
44
45 ⁹ *See*
46 https://waterfrontseattle.blob.core.windows.net/media/Default/pdf/2019_0208_Waterfront_LID_FA_Qs_Final.pdf (“Waterfront Seattle will create about 20 acres of improved parks and public spaces
47 connecting Seattle’s central waterfront to downtown.”).

1 these reasons, Taxpayer appeals the following portions of the Examiner's Recommendation:
2
3 Sections II.18, II.20, II.21, II.22, II.23, II.24, II.26, II.30, II.32, and IV.C.5.

4
5 50. Failure to comply with USPAP. Taxpayer's assessment also rests on a
6
7 fundamentally wrong basis due to the City's appraiser's decision to utilize a hybrid mass-
8
9 appraisal method. Randall Scott, a former mass appraiser responsible (and professionally
10
11 recognized) for developing the MAI standards for mass appraisals, testified that the Final
12
13 Study does not meet mass appraisal standards nor allow for independent assessment of the
14
15 accuracy of Mr. Macauley's conclusions.

16
17 51. Specifically, because the parcel-by-parcel approach is not a mass appraisal,
18
19 Mr. Macaulay was required to comply with USPAP Standards 1 and 2 which govern direct
20
21 appraisals. *See* Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020). However,
22
23 the Final Study does not purport to comply with Standards 1 and 2. And Mr. Macaulay's
24
25 testimony suggests that he incorrectly believed that the only difference between direct
26
27 appraisals and mass appraisals is the reporting. *See* 6/23/2020 Hrg. Tr. at 207:7-208:12;
28
29 6/25/2020 Hrg. Tr. at 140:23-141:7 (explaining that he does not have to comply with
30
31 USPAP Standards 1 and 2 because he has not written an actual report on any condo unit); *id.*
32
33 at 205:8-14 (explaining that his mass appraisal simply uses "limited techniques, such as
34
35 Gordon uses in doing his limited restricted report").

36
37 52. But the difference is not only in reporting—mass appraisal techniques must
38
39 instead comply with substantive standards in USPAP Standards 5 and 6. For example, as
40
41 Paul Bird (City's witness) testified, the mass appraisal approach is distinct from a parcel-by-
42
43 parcel approach:

44
45 The mass appraisal technique is an appraisal method used to evaluate
46
47 a group of properties that are subject to similar market forces as of a
certain date through the use of market data, statistical analysis and

1 testing. As a result, the mass appraisal technique does not require or
2 involve analysis of each individual property's specific data.

3
4 Second Decl. of Paul Bird ¶ 20 (dated 6/26/2020).

5
6
7 53. Indeed, USPAP's definition for "mass appraisal" is "the process of valuing a
8 universe of properties as a given date using standard methodology, employing common data,
9 and allowing for statistical testing." Appraisal Foundation, Uniform Standards of
10 Professional Appraisal Practice at 5 (2020-2021). And the definition for "mass appraisal
11 model" is "a mathematical expression of how supply and demand factors interact in a
12 market." *Id.* Mr. Scott explains that a mass appraisal must use a model that is suitable for
13 statistical testing—otherwise, there would be no way to assess the accuracy or validity of the
14 mass appraisal. R. Scott Decl. ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

15
16
17 54. Regardless of client direction, Mr. Macaulay is required to comply with
18 USPAP. So, if, as he determined, a "[p]arcel-by-parcel direct appraisal" would not have
19 been economically feasible because it would have taken "an incredible amount of time and
20 cost" (6/18/2020 Hrg. Tr. at 125:15-10), then ABS Valuation should have conducted an
21 appraisal consistent with USPAP Standards 5 and 6. *See also* Hamel Decl. at ¶ 8
22 ("performing an individual appraisal of each [condo] parcel would have been cost and time
23 prohibitive").

24
25 55. But Mr. Macaulay's methods fail to comply with USPAP Standards 5 and 6
26 because, *inter alia*, he fails to develop a model structure that reflects characteristics affecting
27 value, fails to calibrate the model structure to determine the contribution of the individual
28 characteristics affecting value, and does not review the mass appraisal results against actual
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

1 sales/data as a quality assurance/quality control check. *See* 3/3/2020 Hrg. Tr. at 216:18-
2
3 217:1;¹⁰ Decl. of Randall Scott ISO Closing Stmt., ¶ 4 (dated 7/7/2020).

4
5 56. Mr. Macaulay explained that factors like “aesthetic change in the area, the
6
7 proximity to the elements, the increase in market rent, market vacancy changes,
8
9 capitalization rate changes, and things of that nature” drove value increases. 6/23/2020 Hrg.
10 Tr. at 211:14-212:3. But he could not specify how these factors were considered in his
11
12 “parcel-by-parcel” approach, and no one reviewing his work would have a clue. And he did
13
14 not calibrate his approach to determine how each factor contributes to value. *Id.* at 212:8-
15
16 213:5. As for reviewing the mass appraisal results, there were no criteria governing the
17
18 internal review process. *Id.* at 104:24-105:20. And because both the Before and After values
19
20 were hypothetical, it was not possible to identify matched pair sales and no City witness
21
22 explained how ABS Valuation made adjustments to “comparable” sales in order to check
23
24 their conclusions. Finally, Mr. Macaulay failed to comply with Standard 6 which requires
25
26 him to explain his model structure.
27

28
29 57. For these reasons, Taxpayer appeals the following portions of the Examiner’s
30
31 Recommendation: Sections II.28, II.31 and IV.C.8. In addition, Taxpayer renews Objectors’
32
33

34
35 ¹⁰ Standard 5 requires mass appraisals to develop a model structure that conceptualizes the
36
37 relationship between characteristics that affect value, and to calibrate that model to specify how
38
39 individual characteristics affect value. *See* USPAP Standard 5: Mass Appraisal, Development (2020-
40
41 21). The purpose is to rationally determine what characteristics will create value, and by how much.
42
43 This allows the mass appraiser to not only generate outputs, but also to test the reliability of the
44
45 model (and allow others to do so) by comparing the results of the model with actual sales. *See*
46
47 3/3/2020 (R. Scott) Hrg. Tr. at 197:7-15; 203:21-205:13 (explaining that it is typical to test output
against actual sales). USPAP Standard 6 sets forth the mass appraisal reporting requirements, which
include explanation of the model specification, data requirements, calibration methods, and
mathematical form of the final model. *See* USPAP Standard 6: Mass Appraisal, Reporting at 6-2(i)-
(o). Without this reporting, it is impossible for users of the appraisal report to determine how the
appraiser determined value, and this omission renders the report not credible. *See* 3/3/2020 (R. Scott)
Hrg. Tr. at 206:15-207:17.

1 Motion To Exclude The Expert Testimony of Robert J. Macaulay, filed on April 8, 2020,
2
3 and appeals the Examiner's denial of that motion.
4

5 58. Finally, Taxpayer's property is not appurtenant—or even in close
6
7 proximity—to any proposed improvements. *See Hasit*, 179 Wn. App. at 947 (“the burden of
8
9 proving special benefit” shifted to the City because the protestors’ parcels merely stood “in
10
11 close proximity to the property on which expert testimony was given”). As described above,
12
13 the special assessment is overstated because the Final Study makes no attempt to determine
14
15 general benefits, existing amenities for Taxpayer's specific property, or special detriments.
16
17 In addition, it is speculative due to the fact that, as of October 2019, improvements were not
18
19 in in place—and, in fact, much of the waterfront is a construction zone following removal of
20
21 the viaduct and now Pier 58 demolition. Under these circumstances, rather than relying on
22
23 entirely imaginary income and shaky hypotheticals, Mr. Macaulay at the very least should
24
25 have discounted the special benefit estimates or waited to perform the Study until the
26
27 improvements were at least close to complete.
28

29 **Erroneous Pre-Improvement Valuation**

30
31 59. The proposed final assessment erroneously overstates the pre-improvement
32
33 value of Taxpayer's property as of October 1, 2019 and, as a result, overstates the special
34
35 benefit to the Taxpayer's property.
36

37 60. The City's Final Study was used to compute the proposed final assessment of
38
39 Harbor Steps' property. The City's Study purportedly uses data from the King County
40
41 Department of Assessments,¹¹ but the pre-improvement valuation information in the Final
42
43

44
45 ¹¹ *See, e.g.*, Final Special Benefit Study, “All Other LID Commercial Properties” Spreadsheet
46 (providing a “County Link” to the King County Department of Assessment's online “eReal
47 Property” search tool).

1 Study does not accurately reflect this data. For example, the City's Study values Harbor
2 Steps' property at \$180,511,000 as of October 1, 2019. However, the King County assessor
3 determined the true and fair value of the property to be \$185,880,000, valued in 2019 for tax
4 year 2020. In other words, the Final Special Benefit Study's valuation is 97.1% of King
5 County's assessed value. The Final Special Benefit Study does not explain this difference—
6 or any differences—between its pre-improvement valuation and its supposed source for
7 market data. For this reason, Taxpayer appeals Section IV.C.11 of the Examiner's
8 Recommendation.
9

10
11
12
13
14
15
16
17 61. Further, the City's analysis was based on unreliable market data. The ABS
18 appraisal overstated the combined total before market value for all four Harbor Steps'
19 parcels by about \$88 million. B. O'Connor's Jan. 31, 2020 Report (attached to Appeal
20 Petition), Ex. 6. Based on our expert appraiser's appraisal review, the true and fair value of
21 the property here as of October 1, 2019 was \$158,511,000. *Id.* (Assuming equal value
22 between all parcels).
23
24
25
26
27

28
29 62. Thus, aside from multiple other reasons why computation of the special
30 benefits was flawed (discussed further below), the assessment is based incorrectly on pre-
31 improvement values that do not accurately reflect market data. For these reasons, Taxpayer
32 appeals the following portions of the Examiner's Recommendation: Sections II.13, II.14,
33 and II.15.
34
35
36
37

38 **Erroneous Computation of Special Benefit**

39
40
41 63. "Special benefit" is "the increase in fair market value attributable to the local
42 improvements." *Doolittle*, 114 Wn.2d at 103. "A benefit that a particular piece of property
43 may receive by reason of the improvement is not measured alone by the physical character
44 or cost of that portion of the improvement upon which the property abuts. *La Franchi v. City*
45
46
47

1 of Seattle, 78 Wash. 158, 165, 138 P. 659, 662 (1914). “The question is: To what extent is
2 the particular tract or property benefited by the entire improvement, and is it assessed
3 proportionately with the other property included within the assessment district?” *Id.* 165–
4
5 66.
6
7

8
9 64. The proposed final assessment erroneously overstates the special benefit of
10 LID improvements in a number of ways.
11

12
13 65. Spreadsheets show arbitrary changes to revenue and capitalization rates. For
14 the Harbor Steps, Mr. Macaulay assumed room/rental rates would increase by 2.00% (low)
15 and 3.00% (high) due to the 2024 LID Improvements. Mr. Macaulay then uses these same
16 percentages (2.00% and 3.00%) to increase retail and parking. He then uses this
17 hypothesized increased revenue to calculate a new net operating income for the commercial
18 properties and capitalizes that to come up with an “After” valuation.
19
20

21
22 66. For changes to capitalization rate (“cap rate”), Mr. Macaulay assumes the net
23 operating income remains the same as in the hypothetical “Before” condition but changes
24 the cap rate. For the Harbor Steps, the cap rate goes from 4.10% to 3.98% (low scenario,
25 creating a bigger value increase) and 4.02% (high scenario, creating a lower value increase).
26
27

28
29 67. Mr. Macaulay then averages his four “After” values to arrive at a final special
30 benefit conclusion. For the Harbor Steps, this is an increase in property value of 2.50% due
31 to the LID Improvements.
32
33

34
35 68. Mr. Macaulay offered little justification for his micro adjustments to revenue
36 and capitalization rates. When asked precisely what the basis is for his special benefit
37 percentage increases to revenue for each commercial property, he could not point to
38 anything specific other than his judgment. 6/23/2020 Hrg. Tr. at 113:24-115:24. There also
39 is nothing in the report to allow a reader to understand how he came up with these
40
41
42
43
44
45
46
47

1 percentages. *Id.* at 112:24-113:3. And there is no model or equation that he relied on—
2
3 again, just his “judgment.” *Id.* at 113:4-6. Although he claims that the spreadsheets explain
4
5 the basis for his belief that certain factors—liked increased connectivity—will increase
6
7 property values (*id.* at 50:7-25), he could not explain how he went from general principles to
8
9 very specific percentage adjustments to revenue and capitalize rate. *Id.* at 115:10-24. And
10
11 for the first two “Scenarios” in the spreadsheet, he applied percentage changes to all revenue
12
13 sources equally even though there was no separate analysis done for food and beverage or
14
15 parking. *Id.* at 116:14-25, 117:11-21. Thus, he has not rebutted Taxpayer’s expert’s
16
17 conclusion that the adjustments are arbitrary and fall below generally accepted margins of
18
19 error, and that there is no actual, measurable, non-speculative special benefit to Taxpayer’s
20
21 properties.

22
23 69. Mr. Macaulay testified that he used comparable sales as a reasonableness
24
25 check for commercial properties. But as explained above, no City witness has explained
26
27 how anyone, or all, of the sales are comparable to any particular commercial property within
28
29 the LID. *Compare Bellevue Plaza*, 121 Wn.2d at 406. Further, Mr. Macaulay testifies that
30
31 in order to make sales “comparable,” he would have had to make adjustments to account for
32
33 Before and After conditions, but there is no way to understand how adjustments were made
34
35 because he “didn’t do a separate sales comparison approach where we showed adjustments
36
37 and whatnot.” 6/23/2020 Hrg. Tr. at 128:25-129:24. When asked how he determined that
38
