10.76.010 Findings and authority.

A. The City of Seattle finds that it is in the interest of the preservation and promotion of public health that moderate risk wastes not be commingled with other solid waste nor placed into sewage disposal systems through which underground and surface waters may be contaminated. The City finds that enhanced public education and enforcement of existing regulations will reduce the quantity of moderate risk wastes entering the regular solid waste stream and sewage disposal systems, and that additional funding is required for these enhancements. The City finds that a regional intergovernmental approach is best suited to these enhancements as described in the Local Hazardous Waste Management Plan for Seattle-King County.
