ORDINANCE 120982

AN ORDINANCE relating to the Building and Construction Codes, Subtitle VI Fire Code, amending Seattle Municipal Code Section 22.602.040, Section 22.602.050 and Section 22.602.070 to revise fees for Fire Department permits, plan review, and certification examinations, and to establish fees for inspection of fire protection systems in new or existing buildings under construction.

WHEREAS, in order to be more consistent and equitable regarding recovery of costs for fire prevention services; NOW, THEREFORE,

BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:

Section 1. Effective January 1, 2003, Seattle Municipal Code Section 22.602.040 and its Schedules, are amended as follows:

SMC 22.602.040 Fees.

A. The fees for the following permits and inspections are established in Schedule A. See Schedule A in Table 22.602.040A.

C. Hazardous Material Related Permits. Fees for hazardous material related permits are established in Schedule C (See Table 22.602.040 C). In some cases these fees are based on the

quantity of hazardous material stored and/or handled at the site and the relative risk posed by each material.

1. Definitions:

a. "Quantity Range Number" as established in the Quantity Range Table below, is a number between 1 and 2 which is assigned to a hazard category based upon the amount of hazardous material located at the site.

QUANTITY RANGE TABLE

| QUANTITY RANGE NUMBER | SOLIDS (Pounds) | LIQUIDS (Gallons) | GASES (Cu. Ft.) |
|-----------------------|------------------|-------------------|-------------------|
| 1 | 0-550 | 0-55 | 0-1,000 |
| 1.25 | >550 - 5,500 | >55 - 550 | >1,000 - 5,000 |
| 1.5 | >5,500 - 27,500 | >550 - 2,750 | >5,000 - 50,000 |
| 1.75 | >27,500 - 55,000 | >2,750 - 5,500 | >50,000 - 100,000 |
| 2 | >55,000 | >5,500 | >100,000 |

b. "Assigned Risk Factor" as established below, is a number assigned to each hazard class and category of hazardous material indicating the relative hazard posed by materials in that hazard category.

| Hazard Category | Assigned Risk Factor | Hazard Category | Assigned Risk Factor |
|---------------------|----------------------|----------------------|----------------------|
| Aerosol products | 1.3 | Liquid petroleum gas | 1.4 |
| Cellulose nitrate | 1.3 | Magnesium | 1.3 |
| Combustible fiber | 1.2 | Organic peroxides | |
| Combustible liquids | | Unclassified | 1.5 |
| Class II | 1.2 | Class I | 1.4 |
| Class III-A | 1.1 | Class II | 1.3 |
| Class III-B | 1.1 | Class III | 1.2 |

| | | | |
|---------------------------------|-----|--|-----|
| Compressed gases | | Class IV | 1.1 |
| Highly toxic | 1.5 | Oxidizers | |
| Pyrophoric | 1.4 | Class 4 | 1.5 |
| Flammable | 1.4 | Class 3 | 1.4 |
| Unstable | 1.4 | Class 2 | 1.2 |
| Oxidizing | 1.4 | Class 1 | 1.1 |
| Toxic | 1.3 | Pyrophoric liquids and solids | 1.3 |
| Cryogenic | 1.3 | Radioactives | 1.4 |
| Corrosive | 1.3 | Toxic liquids and solids | 1.2 |
| Corrosives | 1.1 | Unstable (reactive) liquids and solids | |
| Explosives and blasting agents | 1.5 | Class 4 | 1.5 |
| Flammable liquids | | Class 3 | 1.4 |
| Class I-A | 1.5 | Class 2 | 1.3 |
| Class I-B | 1.4 | Class 1 | 1.2 |
| Class I-C | 1.3 | Water-reactive materials | |
| Flammable solids | 1.3 | Class 3 | 1.5 |
| Highly toxic liquids and solids | 1.5 | Class 2 | 1.3 |
| | | Class 1 | 1.1 |

c. "Fixed permit cost" (~~(Ninety-eight Dollars (\$98.00))~~) One hundred fourteen Dollars (\$114.00)

is the minimum cost for the Seattle Fire Department to issue a hazardous material permit.

d. "Base permit fee" is determined by multiplying the sum of the products of the quantity range number and assigned risk factor for each hazard class by the fixed permit cost divided by 1.1 and is represented by the following equation:

$$\text{Base permit fee} = [\Sigma (Q)(R)][F/1.1]$$

Where: Q = The quantity range number.

R = The assigned risk factor.

F = The fixed permit cost (~~(\$98.00)~~) (\$114.00).

Example:

XYZ Company stores five hundred (500) gallons of gasoline and two hundred (200) pounds of nitric acid. Gasoline is classified as a Class I-B flammable liquid which has an assigned risk factor of 1.4. Nitric acid is classified as a corrosive liquid and a Class 1 oxidizer, both of which have an assigned risk factor of 1.1.

$$\text{Base permit fee} = [(1.25)(1.4)_{\text{flammable}} + (1)(1.1)_{\text{Class 1 oxidizer}}][\$((98)) \underline{114}/1.1]$$

$$\text{Base permit fee} = ((\$253.94)) \underline{\$295.37}$$

When a material has multiple hazards, only the hazard presented by the material that has been assigned the highest risk factor shall be considered.

Fees apply to non pre-approved applicants.

Fees for pre-approved applicants equal one-half (1/2) of the fee identified in Table 4915.

Any preapproved applicant found to be in violation of permit conditions shall be removed from the pre-approved applicant list and subject to non pre-approved applicant fees and conditions.

Each applicant who receives a minimum of six (6) permits (Code 4915) during a six (6) month period and is found to be in compliance with all permit conditions will be considered a pre-approved applicant after the six (6) month period. Applicants who obtain fewer than six (6)

permits (Code 4915) during a six (6) month period will be considered a pre-approved applicant only after six (6) permits have been issued and no permit violations are noted.

* Biannual Renewal Fee

D. All permits listed under subsection A and C of this section, except for those permits for which a time charge is indicated, have a base fee which incorporates the cost of an initial site inspection and one (1) site reinspection to determine compliance with the Seattle Fire Code. Permits for which a time charge is indicated include a base fee and a labor charge calculated on actual costs for labor and other services incurred by the Fire Department before a permit is issued. Any subsequent inspections will result in a fee based on a time charge which shall be calculated on actual costs for labor and other services. Such fees shall include overtime costs only when the work performed outside normal business hours (eight a.m. (8:00 a.m.) to four-

thirty p.m. (4:30 p.m.) Monday through Friday) is required by the Seattle Fire Code or is performed at the request of the owner or responsible person or permit holder.

E. Temporary permits listed under Schedule A and C will not be renewed on an annual basis.

F. Those permit applications which are required to be filed within time limitations specified under the Seattle Fire Code or by order of the Fire Chief, shall be subject to a late fee, if not filed within the prescribed time period. The late fee shall be calculated at 1.75 times the original permit fee.

For permits listed under Schedules A and C as renewable, renewal payments received more than thirty (30) days, but less than ninety-one (91) days, past the permit expiration date, shall be subject to a late fee. Permit renewal payments received more than ninety (90) days past the expiration date will not be processed as a renewal and will be subject to original permit fees and the new permit application process.

G. Unless specifically stated on the permit, no temporary use permit shall be valid for a term exceeding twelve (12) months.

H. Each examination fee listed under this section shall include one (1) test and one (1) re-test.

1
2 I. The annual permit renewal fee for Schedule C permits where the fee worksheet is used
3 to determine permit fee will be one-half (½) of the original base permit fee, if the facility is found
4 to be in compliance with the original permit conditions.
5

6
7 J. Effective January 1, ~~((1999))~~ 2003, those facilities which have existing hazardous
8 materials-related permits authorized under Ordinance ~~((116258))~~ 119256, or any other prior
9 version of this section, shall have their permits renewed at the rate of ~~((Ninety Eight Dollars~~
10 ~~(\$98.00)))~~ One-hundred fourteen Dollars (\$114.00) until the Fire Department Article 80 program
11 inspection and inventory analysis for the facility has been performed.
12
13

14 K. In special circumstances, hazardous material permit fees may be adjusted, modified or
15 combined. Authority to adjust, modify or combine such permit fees is limited to the Fire Chief,
16 the Fire Marshal and the Assistant Fire Marshal.

7 shall pay a fee for such an inspection ((or plan review)). Such fees shall be based on actual labor
8 costs including any overtime actually paid as determined by the then-current collective
9 bargaining agreement adopted by ordinance.
10

11
12 ((D))B. Whenever the Fire Prevention Division is requested to perform an inspection as
13 required by the Fire Code and the responsible party fails to appear within twenty (20) minutes
14 from the original appointment time, the Chief shall collect and the responsible party shall pay a
15 fee for such staff time and preparation required to meet the inspection appointment. Such fees
16 shall be based on actual labor costs including any overtime actually paid as determined by the
17 then-current collective bargaining agreement adopted by ordinance.
18

19 ((E))C. Whenever the Fire Prevention Division is required to perform an inspection after
20 three (3) inspections have been performed to gain compliance with Seattle Fire Code
21 requirements, the Chief shall collect and responsible party shall pay a fee in the amount of One
22 Hundred Dollars (\$100.00). Such fee shall be due upon each inspection performed by the Fire
23 Prevention Division until compliance with Seattle Fire Code requirements has been
24 accomplished. The Chief shall waive the inspection fee if the original order or notice is

Honorable Peter Steinbrueck
President
Seattle City Council
Municipal Building, 11th Floor

Dear Council President Steinbrueck:

The attached ordinance will increase fees for Fire Department services including permits, plan review of building architectural plans and fire protection system designs, and the certification examination of persons who install, test, or maintain fire protection systems. The ordinance also establishes fees for the inspection of fire protection systems such as fire alarms and fire sprinklers that are being installed in new and existing buildings. Previously, the cost of all Fire Department inspection of fire protection systems in new buildings, and buildings being remodeled, has been borne by the General Fund.

This ordinance raises permit fees and certification examination fees for most categories by 16.8 percent, which reflects increased Fire Department labor costs since the last significant revision was made to the Fire Department fee schedule in 1998. Fees for plan review services increase for the first time since 1982. Fees for plan review services are charged hourly and are estimated to begin at \$39 for a plan requiring only minor review, extending upward to more than \$1000 for a high-rise building or a complex special construction project.

Fees for Fire Department inspection of new fire protection systems range from \$75 for a minor tenant improvement to \$250, plus a per device fee of \$2.50, for a fire alarm inspection. All fees for plan review and inspection services will be collected at the Department of Design, Construction and Land Use at the time of permit submittals, or when approved plans are returned to the customer.

Thank you for your consideration of this legislation. Should you have questions please contact Diane Hansen at 386-1451.

Sincerely,

Fiscal Note

Each piece of legislation that is financial in nature requires a fiscal note. The fiscal note should be drafted by department staff and should identify operating, capital, revenue, and FTE impacts of the legislation. After preparation by departmental staff, the Department of Finance (DOF) will review and make necessary revisions before transmittal to Council.

Legislation Title: AN ORDINANCE relating to the Building and Construction Codes, Subtitle VI Fire Code, amending Seattle Municipal Code Section 22.602.040, Section 22.602.050 and Section 22.602.070 to revise fees for Fire Department permits, plan review, and certification examinations, and to establish fees for inspection of fire protection systems in new or existing buildings under construction.

Summary of the Legislation:

This Legislation revises existing Fire Department fees for permits, plan review of building and fire protection system plans, and certification examinations for persons who install, test or maintain fire protection systems. The legislation authorizes new fees for the inspection of fire protection systems in new or existing buildings under construction.

Background (Include justification for the legislation and funding history, if applicable):

Fire Department permit fees and certification examination fees are being revised to reflect increased cost of service since the last significant fee schedule revision occurred in 1998. Fire Department Plan Review fees were established in 1982. However, they have only been collected for several short periods since that time. (There was long-standing confusion about whether this service was already covered by the DCLU building permit fees. DCLU has since confirmed it does not collect for this service.) This legislation would update the fee to reflect the current cost to provide the service and enable the Fire Department to begin fee recovery. The legislation will also add new fees for Fire Department inspection of required fire protection systems in buildings undergoing construction. Previously, the full cost of these inspection services has been borne by the General Fund.
