To Whom It May Concern:

The Pioneer Square Community Association (PSCA) would like to express our support of the City of Seattle Parks and Recreation Park Ranger program. The Park Rangers are an asset to our neighborhood through their work in Occidental Square and Pioneer Square Park.

Parks staff has done an excellent job of community outreach; introducing the rangers to staff and community members, as well as keeping the PSCA informed. Since its inception, program staff has demonstrated a commitment to improving the service and partnership with the neighborhood in addressing the issues that affect our parks. As the rangers have adjusted to their new role, they have addressed issues head on.

Our organization staffs the information kiosk in Occidental Square during events and during the summer months. The Park Rangers are an invaluable tool to our staff and can be relied upon to supply additional information and support when necessary. Requests for additional support have been addressed immediately and City staff is willing to go above and beyond their duty.

Both Occidental Square and Pioneer Square Park have unique problems which need to be addressed. The Park Ranger program is an important step towards making our neighborhood both safer and more welcoming to both residents and visitors
