Legislation Title:

AN ORDINANCE relating to the construction of a new Fire Station 20; transferring jurisdiction of a portion of Lots 9, 10, 11 and 12, Block 29, Gilman's Addition to the City of Seattle from the Department of Finance and Administrative Services to the Seattle Department of Transportation and designating the property for street purposes; and laying off, opening, widening, extending, and establishing the transferred property as street right of way.

Summary of the Legislation: The purpose of the legislation is to transfer jurisdiction over certain portions of the property acquired by the City for the new Fire Station 20, from the Department of Finance and Administrative Services (FAS) to the Department of Transportation (SDOT), to allow adequate right of way widths for public transportation purposes.

Background:

The 2003 Fire Facilities and Emergency Response Levy that was proposed under ordinance 121230, approved by Seattle voters on November 4, 2003, and funded under ordinance 121380, allowed for the improvement and/or replacement of several existing fire stations. In 2009, ordinances 123134, 123136, and 123137 authorized the acquisition of three parcels of land for construction of a new Fire Station 20. As a condition of the Department of Planning and Development's Master Use Permit for the new station, the western seven feet and the eastern two feet of the site needs to be transferred to SDOT for public right of way.

X **This legislation does not have any financial implications.**

Other Implications:

- a) **Does the legislation have indirect financial implications, or long-term implications?**
The legislation allows for the long term establishment of the public right of way to accommodate current transportation needs.
- b) **What is the financial cost of not implementing the legislation?** The City of Seattle land use permitting process frequently requires both private and public development to construct public street improvements and to dedicate property for street right of way. Without implementing this legislation, the land use permit conditions for the construction of this fire station could not be met, which could result in costs to the City for the

planning, acquisition and permitting of this site.

- c) **Does this legislation affect any departments besides the originating department?** Yes, this ordinance affects the Department of Transportation. This legislation will add property to the public right of way managed by SDOT.
- d) **What are the possible alternatives to the legislation that could achieve the same or similar objectives?** There are no other alternatives that achieve the same objective.
- e) **Is a public hearing required for this legislation?** No.
- f) **Is publication of notice with *The Daily Journal of Commerce* and/or *The Seattle Times* required for this legislation?** No.
- g) **Does this legislation affect a piece of property?** Yes. A graphical map of the property to be transferred is attached as Attachment 1 to the ordinance, and a map showing the proposed site plan for Fire Station 20 is attached to this fiscal note as Exhibit A.
- h) **Other Issues:** No other issues.
