

***King County Department of Natural Resources
and Parks,
Wastewater Treatment Division***

***Barton Combined
Sewer Overflow
Control Project***

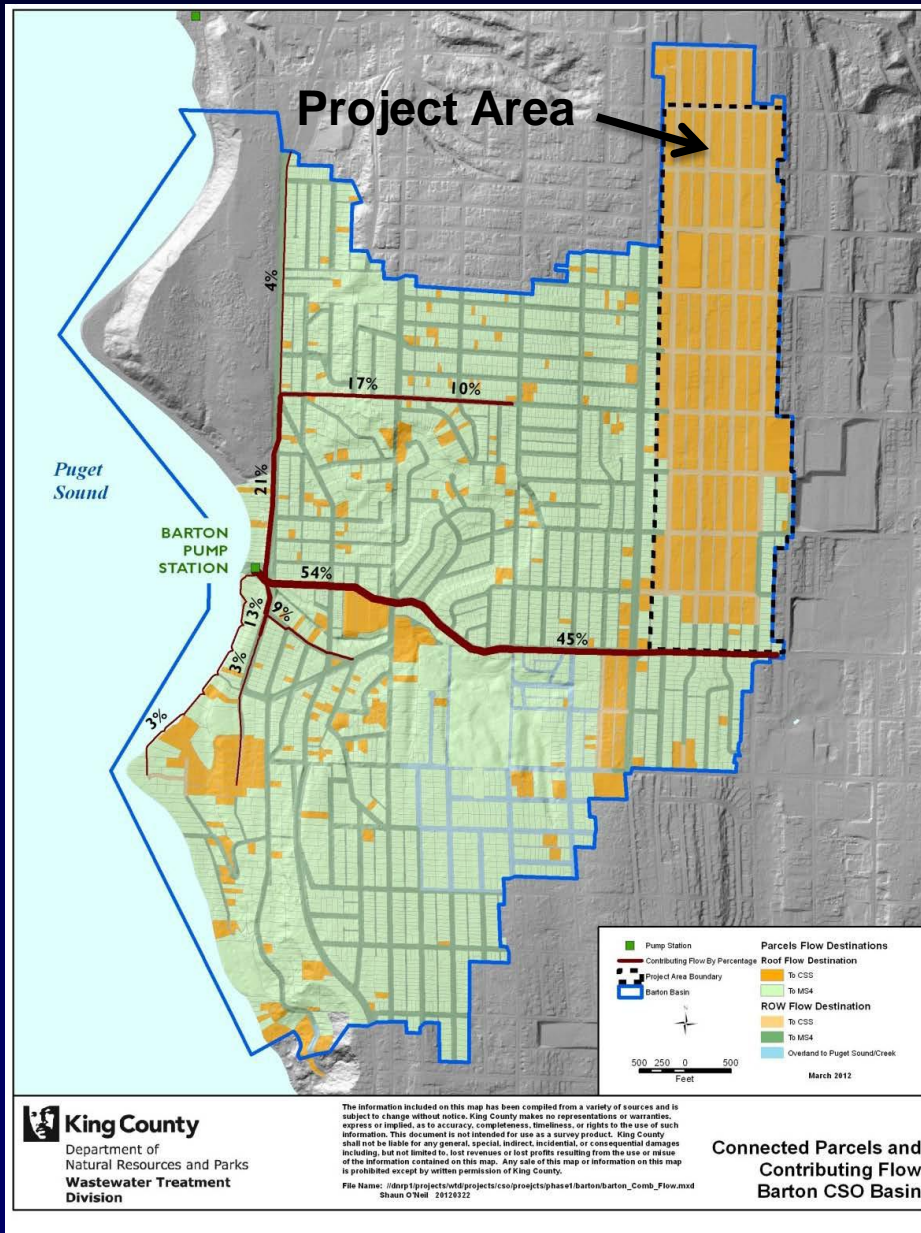

April 9, 2013

Project Area

- Barton basin -1,112 acres

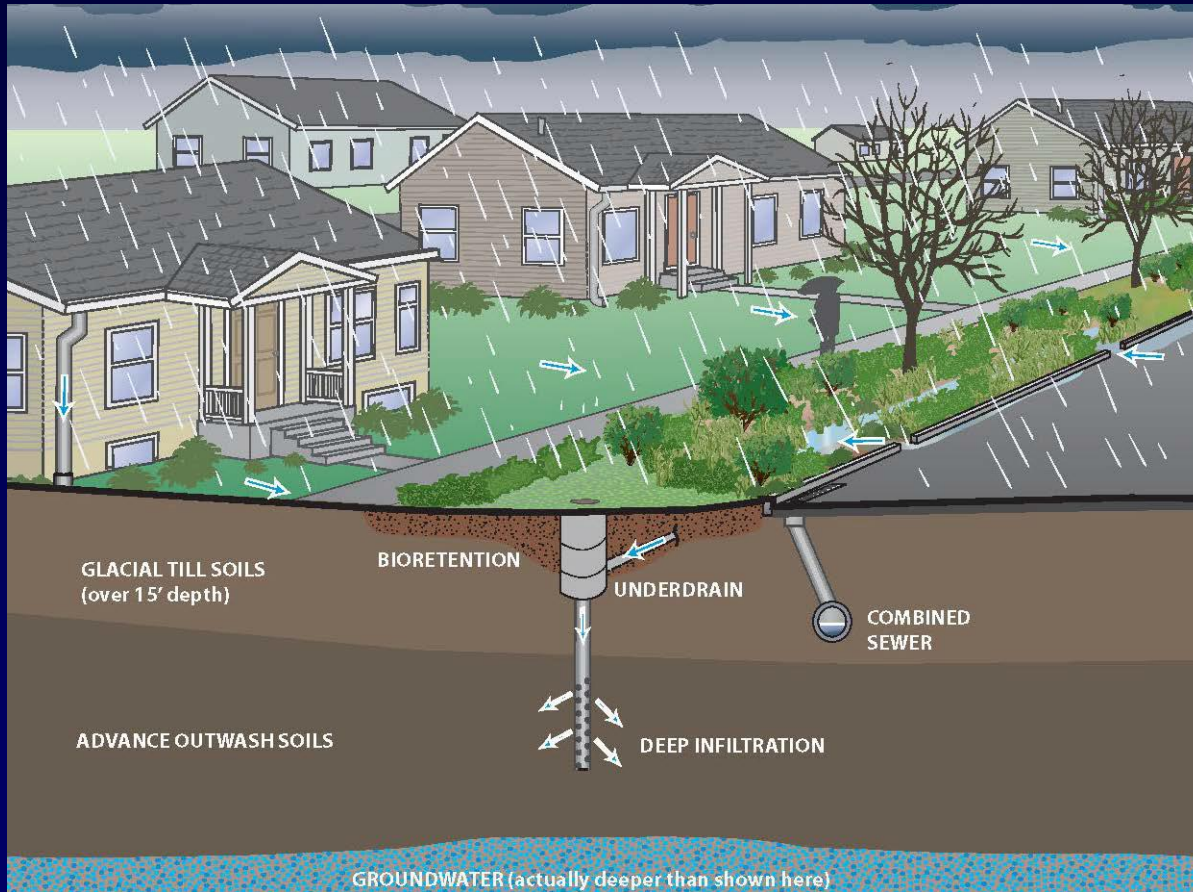

- Project located in the Sunrise Heights and Westwood neighborhoods in West Seattle -151 acres (Subbasin 416)

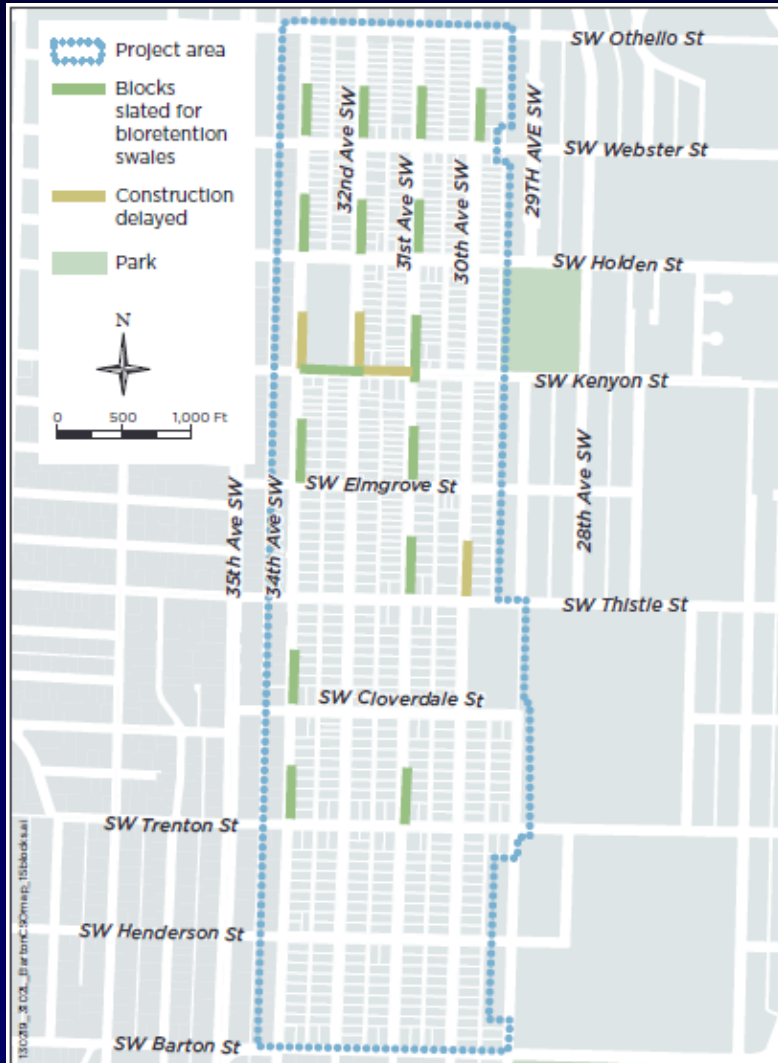

- 45% of the combined sewer flows come from this project area
- Ecology requires no more than one overflow event per year
- 2008 KCWTD averaged 4 events

Green Stormwater Infrastructure (GSI) Design Elements

- Bioretention swales
- Under drains
- Underground Injection Control (UIC) wells

Proposed GSI Project

- Phase I:
 - 93 swale cells
 - 15 UIC wells
- Phase II:
 - Monitor and add 4 sites pending results
