

IF A TREE'S DIAMETER IS:	THE DISTANCE OF TUNNELING FROM ANY SIDE OF THE TREE SHOULD BE AT LEAST:
6 TO 9 INCHES	5 FEET
10 TO 14 INCHES	10 FEET
15 TO 19 INCHES	12 FEET
OVER 19 INCHES	15 FEET

NOTE:

FOR TREES UNDER 6 INCHES IN DIAMETER, TUNNELING SHOULD BEGIN AT LEAST 5 FEET FROM THE TREE, OR NO CLOSER THAN THE ROOT BALL IF NEWLY PLANTED. ANOTHER OPTION FOR SMALL TREES IS TO USE A TREE SPADE TO TEMPORARILY MOVE TREES OUT OF THE WAY OF UNDERGROUND WORK.
